(a) Rates on refined oil from mid-continent field to Arizona and New Mexico, from southern California to Arizona, and from El Paso to certain destinations in those States, found unreasonable. These rates found their origin in the intermediate application of transcontinental rates established by carriers to meet water competition, and while they might well be near the border line of confiscation for the transcontinental movement, they are unreasonable when applied to the small proportion of total movements here involved. Reparation awarded. Associated Oil Co. v. A. E. R. R., 112 I. C. C. 350.

§9. Cost of Service and Operation.

See Advanced Rates §7 (2); Evidence §6, §17, §18.

(a) Evidence tending to show burdens and expense of handling a particular commodity, and, as compared with other traffic, low earnings therefrom, can not be accepted as the sole criterion in measuring reasonableness of the rates thereon. Rates applying on same commodity in same general region must also be looked to. Sioux Falls Live Stock Exchange v. A., T. & S. F., 109 I. C. C. 501, 511.

(b) While a traffic test which furnishes evidence as to the level of existing rates on a particular class of traffic is entitled to weight in arriving at maximum reasonable rates it is not controlling. Fertilizers between Southern Points, 113 I. C. C. 389, 419, 420.

(c) Cost figures are at best only estimates and are not at times of sufficient accuracy or certainty to warrant their use in determining reasonableness of rates. Amer. Fruit & Veg. Shippers Asso. v. Amer. Ry. Exp. Co., 128 I. C. C. 651, 658.

§10. Distance.

See Infra §36; Blanket Rates §9; Differentials; Distance Rates; Evidence §20, §58.

(a) Distance is not a controlling element in fixing of group rates. Alexander Grocery Co. v. B., S. L. & W., 104 I. C. C. 155, 159.

(b) Fact that one point has a decided advantage in distance to specific destinations does not establish unreasonableness of rates from the former. Bliss Syrup Refining Co. v. A., T. & S. F., 109 I. C. C. 391, 393.

(c) Distance is an important consideration in determining proper rate relationship between territories where there is no material difference in transportation conditions. Como Chemical Co. v. A., T. & S. F., 120 I. C. C. 517, 519.

§11. Earnings.

See Infra §36; Evidence §5, §51.

(a) The commission has frequently commented upon the fallacy of attempting to measure reasonableness of rates on particular commodities by comparing earnings on such commodities with earnings on all traffic. Cotton Linters from Southwest, 118 I. C. C. 419, 430.

(b) Fact that a carrier may be prosperous and that a particular commodity constitutes a large part of its traffic, does not prove that rates on that commodity are unreasonable, as prosperity of a carrier, is the result of many causes. If all earnings of a carrier were considered in passing on the measure of the rates on a single commodity between two points on its lines, there could be no uniformity of rates. In fact rates between the same points would vary with the routes between those points. Roquemore Gravel Co. v. A. & W. P. R. R., 126 I. C. C. 575, 577.

§13a. Erroneous Rate.

See Erroneous Rates.

(a) Carriers over a long period of time erred in not collecting applicable rates and complainant urged that this long-continued practice raises a presumption that basis upon which rates were collected was and is reasonable. HELD: A practice based on an error, however long maintained, raises no presumption whatsoever. Berninghaus Co. v. C. & N. W., 109 I. C. C. 104, 106.

§16. Long Continued Adjustment.

See Evidence §29, §43, §66.

(a) Mere fact that one incident of a general readjustment was reduction of

a rate from a given point does not prove that former rate was unreasonable. See 58 I. C. C. 46. Manget Bros. Co. v. G. R. R., 123 I. C. C. 532, 534.

(b) Where a rate, voluntarily established by the carrier, has been in force for a long period, such rate may be presumed to be prima facie just and reasonable, and the burden is on any one attacking the same to show that the rate so fixed is unreasonable. Chicago, M. & St. P. Ry. Co., v. Public Utilities Commission of Idaho, (Idaho, 1925) 238 Pac. 970.

(c) In considering its reasonableness the long continuance of a rate or rate basis is entitled to consideration. Acme Brick Co. v. A. & V., 128 I. C. C. 715, 719.

§20. Need For Revenue.

See Infra §36; Evidence §36, §51.

(a) The unfavorable financial condition of a carrier is not justification for continuance of unreasonable rates on a particular commodity. Richmond Radiator Co. v. N. Y., N. H. & H., 109 I. C. C. 497, 500.

(b) Distance is only one of the elements to be considered in measuring reasonableness of rates. Furniture from Southern Points, 112 I. C. C. 302, 307.

§22. Origin of Traffic.

(a) Shippers are entitled to move their products to any market at reasonable and nonprejudicial rates and commission has repeatedly condemned action of carriers in adjusting rates so as to impede or stifle movement of commodities in any given direction. Old Ben Coal Corp. v. C., C., C. & St. L., 115 I. C. C. 84, 87.

§24. Paper Rate.

(a) The fact that there have been relatively few shipments of a commodity between certain points is not sufficient grounds to deny shippers reasonable rates. Dame Furniture Co. v. C. N. O. & T. P. Ry., 115 I. C. C. 566, 568.

(b) Shippers are entitled to reasonable rates from points from which there has been no previous movement, so that they may procure commodities from those points whenever available, since a movement might develop which would not be possible under excessive rates. Apache Powder Co. v. A., T. & S. F., 115 I. C. C. 339, 340.

(c) Fact that but relatively few shipments of a commodity move between certain points is not sufficient grounds to deny shippers reasonable rates. Dame Furniture Co. v. C., N. O. & T. P., 115 I. C. C. 566, 568.

(d) It was contended that the shipments constitute an isolated movement. Complainant is entitled to a reasonable rate. United Paperboard Co. v. B. & M. R. R., 120 I. C. C. 280, 282.

§25. Past Rates.

See Supra §16; Evidence §29, §43, §66; Passenger Fares and Facilities §7.

(a) While a prima facie presumption of reasonableness attaches to a rate long voluntarily maintained, the continuance of a given rate is not conclusive evidence of its reasonableness. Tunnell & Co. v. P. R. R., 120 I. C. C. 425, 427.

(b) Carriers showed that no shipments of commodity in issue moved from and to points involved since establishment of lower rate, and contended that such shipments constituted a sporadic movement, citing cases wherein commission declined to award reparation on such movements. HELD, Cases cited do not support that finding here. Every shipper is entitled to a reasonable rate on his traffic, and where he attacks the reasonableness of a rate, whether class or commodity, that issue must be decided on its merits. See 100 I. C. C. 411. Davies & Thomas Co. v. C. R. R. Co., 128 I. C. C. 241, 242.

§26½. Prior Adjudication.

See Classification §17; Evidence §43½, V; Previous Decision of Commission; Reparation §8½.

(a) Upon further hearing, original report, 74 I. C. C. 369, wherein rates on iron ore from Ironwood, Mich., and Baraboo, Wis., to Carondelet, Mo., within St. Louis switching district, were found not unreasonable as compared with lower rates prescribed in 62 I. C. C. 194, from same points to Granite City, Ill., within East St. Louis switching district, and subsequently made applicable to Carondelet, affirmed. Mississippi Valley Iron Co. v. C. & N. W., 104 I. C. C. 243.

(b) Rates on paper boxes from Nashville to Atlanta, Augusta, Savannah, Macon, Birmingham, Montgomery, and Jacksonville, published in accordance with commission's findings in Paper Boxes between Southeastern Points, 93 I. C. C. 559, found not unreasonable. American

Tri-State Paper Box Co. v. L. & N., 104 I. C. C. 442.

(c) Rates on newsprint and printing papers from producing points in Atlantic seaboard territory to points in Texas, found unreasonable in the past to extent they exceeded rates conforming to those prescribed in Minnesota & Ontario Paper Co., 66 I. C. C. 571, but present rates found not unreasonable. Reparation awarded. Express Publishing Co. v. A. S., 107 I. C. C. 528.

(d) Southwestern points: Interstate rates on brick and related articles carried in uniform brick list prescribed in General Brick case, 68 I. C. C. 213, from points in Texas, Arkansas, Oklahoma, and Kansas to points in those States and in Louisiana and to Memphis, Tenn., and from Texas, Arkansas, and Oklahoma to points in southern Missouri found unreasonable and unduly prejudicial. Reasonable distance scale of rates prescribed and reparation denied. Southwestern Brick Cases, 107 I. C. C. 681.

(e) Taking into consideration rates prescribed on like traffic from Kansas City, Mo., and other competing points to same destinations in Wilson case, 81 I. C. C. 79, rates on fresh meats and packing-house products, in straight and mixed carloads, from Sioux Falls, S. Dak., and Mason City, Waterloo, Cedar Rapids, Des Moines, and Ottumwa, Iowa, to destinations in Oklahoma and Texas, found unreasonable. No consistency exists in rates on these commodities from points in issue; each has had a different basis, and the relationships to each other and to other competing points have not been well defined. Reasonable rates prescribed and reparation awarded. Decker & Sons v. C., R. I. & P., 109 I. C. C. 261.

(f) Following Miami Copper Co., 93 I. C. C. 221; 104 I. C. C. 467, rates on fuel oil from Burkburnett and Wichita Falls, Tex., and Beckett, Okla., found not unreasonable, discriminatory, or unduly prejudicial as compared with rates contemporaneously in effect from other points in same origin groups or with lower rate subsequently established. Globe Light & Power Co. v. A. E. R. R., 109 I. C. C. 405.

(g) Rates on lard substitutes and vegetable cooking oils from Houston, Tex., to points in Arkansas and Louisiana found unreasonable to extent they exceeded those which would have accrued at rates found reasonable on same commodities from and to those points in Procter & Gamble Distributing Co., 101 I. C. C. 563. Reparation awarded. Merchants & Planters Oil Co. v. A., T. & S. F., 109 I. C. C. 477.

(h) Rate on crude feldspar, minimum weight 40,000 pounds, from DeKalb Junction, N. Y., to Cleveland, Ohio, found unreasonable as compared with lower rates from Keene, N. H., and Penland, N. C., competing points, and with rates prescribed in Ceramic Traffic Asso., 92 I. C. C. 675, for application from producing points in New England to Trenton, N. J. Reasonable rate, minimum weight marked capacity of car, prescribed for future and reparation awarded. Green Hill Mining Co. v. N. Y. C., 109 I. C. C. 643.

(i) Rate on linseed oil from St. Louis to New Orleans, found unreasonable to extent it exceeded rate prescribed in 98 I. C. C. 183, and unduly prejudicial to extent it exceeded rate on analogous vegetable oils from and to the same points. Reasonable rate prescribed for the future and reparation awarded. Glidden Co. v. I. C., 109 I. C. C. 721.

(j) Upon reconsideration, rate on paper from Orange, Tex., to Hutchinson, Kans., prescribed in former report, 95 I. C. C. 457, and equal to rate from St. Louis and Kansas City to Houston and other Texas points, found not unduly prejudicial because it exceeded 110 per cent of rate from Orange to Kansas City. Rates from St. Louis and Kansas City referred to were based on rates found reasonable and prescribed in Minnesota & Ontario Paper case, 66 I. C. C. 571, and rate from Orange to Kansas City is shown to be depressed by market competition and is not a maximum reasonable rate. Former finding of unreasonableness adhered to. Hutchinson Paper Co. v. T. & N. O., 112 I. C. C. 49.

(k) Rates on paper and paper articles from Urbana, Ohio, and St. Louis, Mo., to Dallas, El Paso, and San Antonio, Tex., found unreasonable to extent they exceed rates subsequently established, in conformity with those prescribed in the Paper case, 66 I. C. C. 571. Reparation awarded. Graham Paper Co. v. C., R. I. & P. Ry., 112 I. C. C. 51.

(l) Rate on wrapping paper from Orange, Tex., to Wichita, Kans., found unreasonable to extent it exceeded lower rate to Hutchinson, Kans., prescribed in 95 I. C. C. 457. Reparation awarded. Wichita Chamber of Commerce v. A., T.

& S. F., 112 I. C. C. 67.

(m) Rates on newsprint paper and printing paper from Port Edwards and and Wisconsin Rapids, Wis., to Dallas, Tex., found unreasonable to extent they exceeded those prescribed as reasonable from these points of origin to Texas common points, including Dallas, in the Paper case, 66 I. C. C. 571. Palmer & Co. v. C. G. W. R. R., 112 I. C. C. 323.

(n) Rates on prepared roofing, asphalt shingles, roofing and building paper and certain other related articles from various producing points in c. f. a., Buffalo-Pittsburgh, and trunk-line territories to southern territory, and from points in trunk-line territory to Virginia and West Virginia, found unreasonable and unduly prejudicial to extent they exceed rates determined on basis of those prescribed in Southern Class Rate Investigation, 109 I C. C. 300. Reasonable and non-prejudicial rates and relationships prescribed for the future. Standard Paint Co. v. Director General, 112 I. C. C. 589.

(o) Following Fletcher-Wilson Coffee Co., 93 I. C. C. 555, rates on imported green coffee from New Orleans, La., to Montgomery, Ala., found not unreasonable or unduly prejudicial as compared with rates to various points in Mississippi, Alabama, and Tennessee, and to St. Louis, Louisville, and Chicago. Fletcher-Wilson Coffee Co. v. L. & N., 113 I. C. C. 319.

(p) Rates on bananas, in carloads, and on bananas and coconuts, in mixed carloads, from New Orleans, La., to San Antonio, Tex., found unreasonable to extent they exceeded rates prescribed in 101 I. C. C. 196, and 113 I. C. C. 454. Reparation awarded. Gugenheim-Goldsmith Co. v. G., H. & S. A., 113 I. C. C. 459.

(q) Rate on sand from Sandusky, Ohio, to Pittsburgh, Pa., found not unreasonable as applied to past shipments, but unreasonable for future to extent it exceeded rate for like distances under the distance scale prescribed in 104 I. C. C. 717 for application from points in western Pennsylvania to points in Ohio. Rates prescribed in cited case forming basis of a general readjustment, a finding that rates applicable prior thereto were unreasonable to extent they exceeded the rates under new basis, and that damages were accordingly sustained, is not warranted. Moreover, reparation will not ordinarily be awarded to basis of a finding resulting in a widespread readjustment of rates. Accordingly, reparation denied in instant case, but reasonable rate prescribed for future. Booth & Flinn v. P. R. R., 113 I. C. C. 613.

(r) Upon complaint alleging that rates on shipments of bituminous coal from mines in Kansas, Missouri, Oklahoma, and Arkansas to Kansas City Mo.-Kans., Independence, Mo., and related points, were unreasonable in past to extent they exceeded rates prescribed for future in 89 I. C. C. 73, FOUND: Rates assailed compare favorably with various rates between other points, and with those prescribed by commission on various low-grade commodities, for comparable distances. Moreover, prescribed rates were in the nature of general readjustment, following which reparation is not ordinarily awarded. Beatty Coal Co. v. A. V. I., 115 I. C. C. 8.

(s) Following Southern Class Rate Investigation, 109 I. C. C. 300, commodity rates which are constructed on basis of previously existing class rates to and from river crossings should be adjusted with relation to class rates prescribed as reasonable therein. Birmingham Traffic Bureau v. Director General, 115 I. C. C. 33, 38.

(t) Commodity rate charged on sporadic shipments of phosphate rock from Milldale, Fla., to Shreveport, La., found not unreasonable. Milldale is not a producing point in the Florida group accorded lower rates; moreover, rate charged was actually less than contemporaneous rate from entire Florida phosphate rock group to Shreveport and such group rate was found not unreasonable in 78 I. C. C. 107. Meridian Fertilizer Factory v. A. C. L., 115 I. C. C. 226.

(u) In original report, 104 I. C. C. 183, rates on broom handles (wooden) in the white, turned to shape, were found unreasonable and rates 1.5 cents over contemporaneous lumber rates prescribed, reparation being awarded to that basis. Upon further hearing, carriers pointing out that tariffs naming rates on articles taking arbitraries over lumber rates provided rates equal to 1.5 cents over lumber rates when higher than 31.5 cents prior to July 1, 1922, and higher than 28.5 cents thereafter; and rates equal to 2 cents over lumber rates when such rates are 31.5 cents or less prior to July 1, 1922, and 28.5 cents thereafter, original finding modified, reasonable rates prescribed, and reparation awarded accordingly. Deshler Broom Factory v.

A., T. & S. F., 115 I. C. C. 437.

(v) Following Crescent Bed Co., 102 I. C. C. 419, rate on metallic couch frames found unreasonable to extent it exceeded 75 per cent of corresponding rate on furniture. Reparation awarded. Memphis Furniture Mfg. Co. v. I. C., 115 I. C. C. 554.

(w) Upon reargument, original report, 109 I. C. C. 733, affirmed, and rates on meat animals from points in Alabama to Moultrie, Ga., found not unreasonable; but relationship of rates on hogs from southeastern Alabama to Moultrie, on the one hand, and Montgomery and Birmingham, Ala., on the other, found unduly prejudicial to Moultrie, unduly preferential of Montgomery and Birmingham, and unjustly discriminatory against interstate commerce. Removal of such prejudice, preference, and discrimination by establishment of intrastate rates upon, basis of compromise scale set forth in Appendix A in 74 I. C. C. 419 prescribed. Swift & Co. v. G. N., 115 I. C. C. 661.

(x) An isolated shipment of limestone rock from Margerum, Ala., to Dallas, Tex., to be used for street paving, moved to Memphis, Tenn., at commodity rate applicable on broken stone, and at commodity rate applicable on paving stone, rough quarried, beyond. Upon contention that broken or crushed-stone rate should have applied over entire route, using scale prescribed in 77 I. C. C. 473, HELD: Scale basis sought was not prescribed to apply to Texas common points and its extension to that territory from New Orleans on paving and roofing materials was denied in 102 I. C. C. 31, being found too low for application between those points. Moreover, as class rates are ordinarily assessed on sporadic movements, charges collected under commodity rates in instant case were not unreasonable. Florence Chamber of Commerce v. S. Ry., 118 I. C. C. 7.

(y) Rates on hay from points in Texas differential territory and New Mexico to destinations in southern Arkansas and northern Louisiana, found unduly prejudicial to extent that differences between such rates and corresponding rates to Monroe, La., are more favorable to last-named point than would result by application of distance scale of rates prescribed in 101 I. C. C. 116, extending beyond 800 miles at same rate of progression as for the last 300 miles in that scale, plus differentials for hauls in differential territory and New Mexico. Nonprejudicial basis of rates prescribed for future. Arkansas Jobbers & Mfrs. Asso. v. A., T. & S. F., 118 I. C. C. 238.

(z) A finding by commission in a proceeding dealing with rate level on a particular commodity as a whole from points of origin covering a wide territory may not be considered as controlling in determining reasonableness of rates from a particular origin point. Colgate & Co. v. P. R. R., 118 I. C. C. 243, 245.

(aa) Rate on sawdust from Los Angeles, Calif., and points taking same rates, to Curtiss, Ariz., equal to rates on lumber, found unreasonable as compared with rates on various commodities of higher value and with rate prescribed on sawdust in 115 I. C. C. 339 from Albuquerque, N. Mex., and El Paso., Tex., to Curtiss and Kennard, Ariz. Reasonable rate prescribed for future and reparation awarded. Apache Powder Co. v. A., T. & S. F., 118 I. C. C. 457.

(bb) Sixth-class rates on logs from Adrian, Grosvenor, and Pittsford, Mich., to Hicksville, Ohio, found unreasonable to extent they exceeded rates based on the C. F. A. log scale prescribed in 85 I. C. C. 533 for similar distances. See also 107 I. C. C. 379 and 112 I. C. C. 399 wherein sixth-class rates on this commodity from various Indiana and Michigan points to Hicksville were found unreasonable. Crook Son & Co. v. N. Y. C., 118 I. C. C. 512.

(cc) Following 96 I. C. C. 136, rates on gasoline and naphtha from Beckett, Wilson, Bristow, Okmulgee, and Tulsa, Okla., to Blue Creek, W. Va., found unreasonable in their relation to rates to Charleston, W. Va., no warrant being found for the spread in the rates maintained between these two destinations. Reasonable rate prescribed for future and reparation awarded. Transcontinental Oil Co. v. B. & O., 118 I. C. C. 518.

(dd) Rates on charcoal from Gaskins Siding, Fla., to Amsterdam and Wataga, Ga., found unreasonable and unduly prejudicial to extent they exceeded lower rate upon which basis reparation was awarded in 95 I. C. C. 463 on similar shipments from Savannah, Ga., to Havanna, Fla., such lower rate having been subsequently established from Gaskins Siding to Amsterdam and Wataga. Although there is no evidence as to similarity of transportation conditions of these movements, the destinations are very near each other and there is no justification for the great

difference between rates assailed and those found reasonable in cited cases. Reparation awarded. American Sumatra Tobacco Co. v. A. C. L., 118 I. C. C. 583.

(ee) Rates on brick from Perla and Fort Smith, Ark., to Texas destinations found unreasonable to extent they exceeded those made on basis of brick rates prescribed in 77 I. C. C. 473, 534, and contemporaneously in effect generally in the Southwest. Reparation awarded Acme Brick Co. v. A. & N. R., 120 I. C. C. 112.

(ff) Rate on gasoline and petroleum refined burning oil from Casper, Wyo., to Glenwood Springs, Rifle, and Grand Junction, Colo., found unreasonable to extent it exceeded rate found reasonable in 66 I. C. C. 8; 92 I. C. C. 376, from Casper to Salt Lake City, Utah, to which Glenwood Springs, Rifle, and Grand Junction are intermediate, such lower rate having been subsequently established to intermediate points to comply with fourth section of the act. Reparation awarded. White Eagle Oil & Refining Co. v. D. & R. G., 120 I. C. C. 166.

(gg) In 85 I. C. C. 270, commission prescribed specific rates on lumber and forest products from points in southeastern and Carolina territories and Virginia cities to various New Jersey points. Upon complaint contending that rates prescribed do not reflect proper spreads under the New York rates and seeking establishment of rates to Trenton, N. J., on same basis as those to Philadelphia, with relatively higher rates to Jersey City, HELD: It is not unusual for a general rate adjustment such as that resulting from above-cited case to include increases as well as reductions, and fact that spread in rates to Jersey City and Trenton under New York is less than that formerly existing, does not demonstrate that rates assailed are unreasonable. Moreover, rates assailed compare favorably with those on lumber from Georgia and Alabama points to c. f. a. territory. New Jersey Lumbermens' Committee v. A. C. L., 120 I. C. C. 329.

(hh) Findings in original report, 104 I. C. C. 408; that rates on rosin to Burlington, Ontario, Canada, from south Atlantic and Gulf ports and points taking same rates, were not unduly prejudicial or unduly preferential; that rates from Gulf ports and points taking same rates were not unreasonable; and that rates from south Atlantic ports and points taking same rates were unreasonable to extent they exceeded rates contemporaneously in effect from Gulf ports to same destinations, affirmed. Vera Chemical Co. v. A. C., 120 I. C. C. 434.

(ii) Upon reconsideration, finding in 113 I. C. C. 280, that rates on green or green salted hides, pelts, skins, tallow, and grease, from Norfolk, Nebr., to Chicago and points taking same rates, were unreasonable, affirmed, no transportation conditions justifying the charging of a relatively higher rate from points in Nebraska, such as Norfolk, west of Nebraska differential territory than from points within that territory. Reparation awarded on shipments moving subsequent to filing of complaint, but denied on those moving prior thereto, rates on such shipments having been found not unreasonable in 74 I. C. C. 482. Robinson v. A., T. & S. F., 120 I. C. C. 452.

(jj) Upon further hearing, previous findings in 89 I. C. C. 356 and 100 I. C. C. 210, that applicable rates on gasoline from points in Texas and Oklahoma to destinations in California and Washington were not unreasonable, affirmed. Complainants compared rates assailed with rates on dissimilar traffic and on similar traffic in different territories but such comparisons are of little probative value. Carriers, on the other hand, showed that assailed rates are group rates having been established as an outgrowth of various decisions of the commission. Also that rates assailed compare favorably with those in same general territory from and to which shipments here involved were transported and with other rates found reasonable by commission in this same general territory in 92 I. C. C. 376 and 112 I. C. C. 350. McLeod v. T. & P., 120 I. C. C. 550.

(kk) Rates on lubricating-oil stock from Chaison, Tex., to Eldorado and Topeka, Kans., found unreasonable to extent they exceed rates constructed in accordance with oil rates prescribed in 112 I. C. C. 421, from Texas points to destinations in western trunk-line territory. However, as findings in that case were designed to effect proper relations rather than to establish maximum reasonable rates, they do not afford a proper measure of reasonableness in the past and record herein establishes no adequate basis for reparation. Reasonable rates prescribed for future. Petroleum

Oils Corp. v. A., T. & S. F., 120 I. C. C. 614.

(ll) Based upon finding in 92 I. C. C. 194, charges assessed on manganese-steel scrap from New Castle, Del., a Philadelphia rate point, to Chicago Heights, Ill., moving prior to date of decision in above case, found unreasonable to extent they exceeded $6 per long ton, minimum 50 tons, prescribed in case cited. Reparation awarded. Chicago Heights Mfrs. Asso. v. P. R. R., 120 I. C. C. 739.

(mm) In 118 I. C. C. 205 commission found rates on newsprint paper, in carloads from Berlin, N. H., to Birmingham, Ala., unreasonable to extent they exceeded 64 cents all rail and 60 cents rail-water and rail and that present rail-water-rail rate and present all rate over the B. & M., as initial carrier not unreasonable, and that all rail rates to Birmingham which exceeded by more than 1 cent the all rail rates maintained in connection with defendants lines to Nashville, Tenn., and rail-water and rail rates to Birmingham which exceed similar rates to Memphis, Tenn., and Nashville were unduly prejudicial. In view of the marked difference between the rates over the G. T. to Memphis as compared with rates of that carrier and the B. & M., to Nashville and Birmingham and in view of the further fact that the findings as to the reasonableness of a rate of 64 cents to the last named destination appears proper in the present state of the record, it becomes apparent that a further hearing will be necessary. In the meantime defendants will be expected to promptly publish the rate of 61.5 cents pending the general readjustment of rates on newsprint paper in this territory. Birmingham News Co. v. A. B. & A. Ry., 123 I. C. C. 133.

(nn) Rates on gasoline from Casper, Wyo., to Price, Provo, Salt Lake City, and Ogden, Utah, except when shipments to latter point were routed via Denver & Rio Grande Western, found unreasonable to extent they exceeded rates based on findings in 92 I. C. C. 376. Reparation awarded. Texas Co. v. C., B. & Q., 122 I. C. C. 109.

(oo) Rate on linseed oil from Fredonia, Kans., to Kansas City, Mo., found unreasonable as compared with rates from Chicago, Des Moines, Minneapolis, St. Louis, and Omaha, to same destination; from and to other points for comparable distances; and to extent it exceeded rate constructed in accordance with distance scale prescribed in 98 I. C. C. 183, on vegetable oils between points in the Southwest and from Oklahoma and other southwestern States to Kansas City and points in western trunk-line territory. Reasonable rate prescribed for future and reparation awarded. Fredonia Linseed Oil Works Co. v. A., T. & S. F., 122 I. C. C. 291.

(pp) Following Texas Co., 122 I. C. C. 109, rates on gasoline from Florence, Colo., to certain destinations in Utah found unreasonable to extent they exceeded lower rate voluntarily established by carriers contemporaneously with their compliance with commission's order in the Utah case, 66 I. C. C. 8; 92 I. C. C. 376, wherein a reasonable rate for future was prescribed from various origin points to Salt Lake City, Ogden, and Provo, Utah. Reparation awarded. Continental Oil Co. v. A., T. & S. F., 122 I. C. C. 335.

(qq) Upon contention that a mere citation of a decision of commission in another proceeding is insufficient to warrant conclusion that similar rates brought in issue in a new case were unreasonable, HELD: When a given situation has been fully considered, and deliberately passed upon by commission, that decision ought not to be disregarded and the question kept open indefinitely unless good cause is shown for adoption of a different course. Accordingly shippers may rely upon findings in former cases dealing with same subject. American Door & Mfg. Co. v. B. & O., 122 I. C. C. 471.

(rr) Rates on scrap copper and scrap brass, from points in official, southern, and western classification territories to East Liberty, Pittsburgh, Pa., found not unreasonable as compared with rates on like traffic between various points for comparable distances, except in so far as they exceeded those based on the general readjustment prescribed in 109 I. C. C. 351, modified in 118 I. C. C. 725. Reparation denied. Federated Metals Corp. v. B. & O., 122 I. C. C. 513.

(ss) Upon further consideration, former report, 118 I. C. C. 37, modified, and rate on green-salted hides from Meridian, Miss., to Portville, N. Y., found unreasonable to extent it exceeded rate which is in line with general readjustment of rates approved by commission on this commodity from points in Mississippi Valley, southeastern, and Carolina territories to destinations in trunk-line and

New England territories. Reasonable rate prescribed for future and reparation awarded. Northwestern Leather Co. Trust v. M. & O., 122 I. C. C. 517.

(tt) Upon further consideration, finding in previous report, 93 I. C. C. 85, that rates on crude oil from Irvine and Beattyville, Ky., to Blue Island, Ill., were unreasonable, corrected to include, as points of origin, all oil-producing points in eastern Kentucky. Both the complaint and evidence were broad enough to cover entire eastern Kentucky fields, and findings should not have been limited to Irvine and Beattyville. Reparation awarded. Barnett Oil & Gas Co. v. Director General, 122 I. C. C. 651.

(uu) Rates on pig iron from points in Alabama, Kentucky, and Tennessee, to Ansonia, Conn., found not unreasonable or otherwise unlawful as compared with lower rates to Derby and Shelton, Conn., and to other near-by destinations in Connecticut, New York, and Rhode Island. No evidence was introduced showing competition between these points in marketing of southern pig iron. Carriers showed that lower rates were predicated upon rates established by northern lines to meet water competition and while admitting that there never was water competition on traffic from and to this origin and destination territory, urged that the normal rate is a higher rate blanketed over New England. Moreover, in 87 I. C. C. 102, the commission found not unreasonable a higher rate on pig iron from Birmingham to Weehawken, N. J., involving a shorter distance than from and to points here involved. Farrell Foundry & Machine Co. v. A., B. & A., 123 I. C. C. 127.

(vv) Rates on linseed oil from Fredonia, Kan., to points in Missouri, Illinois, Michigan, Indiana, Kentucky, Ohio, Pennsylvania, and New York, found unreasonable as compared with rates from Minneapolis, Des Moines, St. Louis, and Chicago, to same destinations. Reasonable rates based upon distance scale approved in 98 I. C. C. 183, prescribed for future and reparation awarded. Fredonia Linseed Oil Works Co. v. A., T. & S. F., 123 I. C. C. 153.

(ww) Rate on cotton from, Corinth, Miss., to Monroe, Ga., found not unreasonable or otherwise unlawful as compared with those from Memphis, to which Corinth is intermediate; from New Orleans to Monroe and other Georgia destinations; or with rate subsequently established. Rates from Memphis and New Orleans were depressed and in 89 I. C. C. 47, it was found that rates on cotton to the Southeast departed in many instances from provisions of fourth section. Moreover, comparisons of rates assailed with those from other origins to Monroe for similar distances indicate that rate from Corinth was properly adjusted with relation to general level of rates from other Mississippi points intermediate to the various river crossings, and from points in interior Tennessee and Alabama. Manget Bros. Co. v. G. R. R., 123 I. C. C. 532.

(xx) Combination rates on gravel from Montgomery, Ala., to Barney, Ga., found unreasonable as compared with rates prescribed in 77 I. C. C. 473, 567, 593, for joint-line hauls in higher-rated southwestern territory; with those under distance scale prescribed in 83 I. C. C. 436, from South Carolina points to Georgia and Florida destinations; and to extent they exceeded rates contemporaneously maintained from Montgomery to destinations beyond Barney for comparable hauls. Reparation awarded. Luten Bridge Co. v. A. C. L., 123 I. C. C. 612.

(yy) Rates on salt from mines in Kansas, Michigan, and Ohio, to Mason City, Ia., found unreasonable to extent they exceeded lower commodity rates prescribed in Salt Cases of 1923, 92 I. C. C. 388. In 74 I. C. C. 409, the commission explained that proposal to reduce rates to Des Moines, without corresponding reductions to Mason City, was obviously unjustifiable, and recommended that Mason City and any other important salt-consuming point in northeastern and central Iowa, similarly situated, be given the same reduction. Complainants had a right to rely upon a prompt compliance with such recommendations which carriers failed to carry out until compelled to do so by order in the Salt Cases. Reparation awarded. Decker & Sons v. U. P. R. R., 123 I. C. C. 621.

(zz) Rates on paraffin wax from Casper, Wyo., and on crude glycerin from Chicago, Kansas City, Galveston, Tex., and Berkeley, Calif., to Curtiss and Kennard, Ariz., found not unreasonable or otherwise unlawful. Rate from Casper is lower than that prescribed in 112 I. C. C. 350, from mid-continent field to Arizona destinations including Curtiss, while glycerin rates are generally lower

than those on many other commodities rated fifth class between same points, and are substantially lower than rates to Bacchus, Utah, which is approximately the same distance from producing points as Curtiss. Apache Powder Co. v. A., T. & S. F., 123 I. C. C. 639.

(3a) Rates on paraffin wax from Ponca City, Okla., to Curtiss and Kennard, Ariz., found unreasonable to extent they exceeded rates prescribed on petroleum products in 112 I. C. C. 350, from points in mid-continent field, including Ponca City, to Arizona destinations, including Curtiss. Rates on nitrate of soda from New Orleans, Galveston, Tex., and San Pedro and Wilmington, Calif., to same destinations, found unreasonable as compared with rates contemporaneously maintained from New Orleans to Douglas, Ariz., which usually takes same rates as Curtiss; from New Orleans and Galveston to Hercules, Calif.; from San Pedro and San Francisco to Denver; and from New Orleans subports to Arkansas destinations under distance scale prescribed in 89 I. C. C. 223. Reasonable rates prescribed for future and reparation awarded. Apache Powder Co. v. A., T. & S. F., 123 I. C. C. 639.

(3b) Rate on waste paper from Boston, Mass., to Thomson, N. Y., established pursuant to decision in 81 I. C. C. 591 FOUND unreasonable as compared with lower rate contemporaneously in effect to various New York destinations, and to extent it exceeded lower rate contemporaneously in effect to Trionda, N. Y. While record clearly shows that rate assailed is now too high, it does not indicate that it should be found unreasonable for period extending back two years from date of filing of the complaint. Accordingly reasonable rate prescribed for the future and reparation awarded only back to date of filing of the complaint. United Paperboard Co. v. B. & A. R. R. 126 I. C. C. 751.

(3c) Upon further consideration, combination rates based on Norfolk, Va., assessed on lumber from Roach, Fla., to Harrison and Jersey City, N. J., and Great Works, Me., from Springdale, Fla., to Harrison and from Scott, Ga., to Great Works found unreasonable to extent they exceeded lower combinations based on Live Oak, Fla., and Savannah, Ga., plus a transit charge maintained by the Atlantic Coast Line at time of shipment for stoppage at Portsmouth. The A. C. L. sought to compute reparation on basis of a higher transit charge established subsequent to movement. While the lower charge was applicable only on shipments originating on that carrier's rails, no reason appears why it should not be used in computing the reparation due complainant under the original findings. Reparation awarded. Former report, 100 I. C. C. 405. McClave & Son v. A. C. L., 128 I. C. C. 1.

(3d) In original report 118 I. C. C. 524, rates on cordwood from Twin and Crosby, Miss., to Braithwaite, La., were found unreasonable. Complaint alleged that five shipments involved originated at Crosby, but freight bills submitted in evidence indicated that two were shipped from Goodyear, Miss., and as rates from latter point were not assailed no consideration was given those shipments. Upon further consideration the two shipments eliminated from original report found to have originated at Crosby, Goodyear being the point from which they were waybilled. Reparation awarded. E-Z Opener Bag Co. v. P. R. V., 128 I. C. C. 48.

(3e) Rate on cement from Ada, Okla., to Shreveport, La., found unreasonable to extent it exceeded rate prescribed in 24 I. C. C. 158 between same points. Reasonable rate prescribed for future and reparation awarded. Oklahoma Portland Cement Co. v. D. & R. G. W., 128 I. C. C. 63, 85, 86.

(3f) Upon further hearing, original report 95 I. C. C. 104, reversed in part, following 118 I. C. C. 725. Rates on scrap brass and copper from certain points in New York and New Jersey to East Liberty and Pittsburgh, Pa., found unreasonable with certain exceptions. Reparation awarded. Union Smelting & Refining Co. v. C. R. R. of N. J., 128 I. C. C. 129.

(3g) Rates on enameled iron bathtubs in straight carloads or mixed with enameled iron lavatories from Monaca, Pa., and on plumbers' lead goods from Joplin, Mo., to Dallas, Tex., found unreasonable to extent they exceeded or exceed rates prescribed in Consolidated Southwestern Cases, 123 I. C. C. 203, for comparable hauls. Rates on tubs are higher than those on various other comparable commodities between the same points or than rates to other destinations in the transcontinental group. Rates on lavatories are considerably higher than those to destinations in Louisiana, Mississippi, Arkansas, or from St. Louis to same destinations for comparable dis-

tances. Reparation awarded. Fisher Supply Co. v. A. & V., 128 I. C. C. 215.

(3h) Rates on tin plate from McKeesport, Pa., to New London, Wis., found unreasonable to extent they exceeded lower rates prescribed in 100 I. C. C. 153 on same commodity between same points. Reparation awarded. McKeesport Tin Plate Co. v. A. A. R. R., 128 I. C. C. 259.

(3i) Rates on bituminous coal from producing points in Illinois, Indiana and western Kentucky to certain interior Iowa destinations, found unreasonable as compared with lower rates contemporaneously in effect to destinations in Illinois, Wisconsin, and Minnesota and with rates under distance scale prescribed in 60 I. C. C. 687; 69 I. C. C. 11, from Lake Superior points to Minnesota and the Dakotas for comparable distances. Scale referred to was result of long and careful consideration and offers a proper and convenient basis of comparison with due regard to differences in traffic and transportation conditions. Reasonable rates prescribed for future. Iowa R. R. Commissioners v. A. & S., 128 I. C. C. 293.

(3j) All-rail rates on refined sugar from New Orleans and other Louisiana refining points to points in Arkansas, found unreasonable as compared with lower rates contemporaneously in effect to numerous points in southern territory; to various points on the Mississippi and Ohio Rivers for comparable distances; and to extent they exceed rates that will result from application of distance rates prescribed in Consolidated Southwestern Cases, 123 I. C. C. 203. Although evidence is inadequate to determine maximum reasonable river-and-rail rates, unless there are circumstances and conditions not revealed by the record, river-and-rail rates related differentially to all-rail rates on usual bases should be established. Sugar Between Louisiana and Texas Points, 128 I. C. C. 309.

(3k) Class rate assessed and commodity rate subsequently established on gravel from Holliday, Kas., to Standish, Mo., found unreasonable and unduly prejudicial as compared with lower rate contemporaneously in effect to St. Joseph, Mo.; with those under distance scales prescribed in 77 I. C. C. 473 and 88 I. C. C. 1; and to extent they exceeded lower rates contemporaneously in effect from Grinter, Muncie, and Morris, Kans., competing producing points. Various other comparisons showed that rate charged and present rate were in excess of rates on sand and gravel for both interstate and intrastate hauls in same general territory of equal or greater length. Reasonable rate prescribed for future and reparation awarded. Spencer Co. v. A., T. & S. F., 128 I. C. C. 346.

(3l) Upon further consideration, finding in former report, 118 I. C. C. 689, that rates on gasoline from certain points in Texas and Oklahoma to Bradford, Pa., were not unreasonable as compared with those to Buffalo, N. Y., reversed and rates to Bradford found unreasonable to extent they exceeded those to Buffalo. Car-mile and ton-mile earnings to Bradford exceed those to Buffalo. As transportation conditions are equal and considering the principle that ton-mile earnings should ordinarily decrease as distance increases, earnings under rates assailed appear too high as compared with those under rates prescribed in 96 I. C. C. 485 and other cited cases from Oklahoma points to various destinations for comparable distances. Reasonable rates prescribed for future and reparation awarded. Kendall Refining Co. v. A. &. V., 128 I. C. C. 427.

(3m) Rates on furniture from Memphis, Tenn., to destinations in c. f. a., Buffalo-Pittsburgh, and southern territories, found unreasonable to extent they exceed: In case of mixed furniture, minimum 12,000 pounds, 60 per cent of the corresponding first-class rates; in case of iron beds and articles classified therewith, minimum 12,000 pounds, the fourth-class rates and minimum 30,000 pounds the sixth-class rates, all of which are to be established under Southern Class Rate Investigation 100 I. C. C. 513; 109 I. C. C. 300; 113 I. C. C. 200; and in the case of l. c. l. rates on all articles of furniture, the class rates so established applicable under southern classification. Reasonable bases of rates prescribed for future. Memphis Freight Bureau v. A. G. S., 128 I. C. C. 445.

(3n) Complainant alleged rates charged on crushed stone, carloads, from Buffalo and Linwood, Ia., to Illinois destinations were unreasonable and unduly prejudicial. Original report, Dolese Bros. Co. v. A. T. & S. F. Ry., 89 I. C. C. 110. The record on further hearing shows failures on the part of defendants to carry out the original decision. The original report shows clearly that the level of rates from competing Illinois quarries in the Chicago, Joliet and Kankakee districts is considerably lower than the level

of rates from Buffalo and Linwood to Illinois destinations, even where the Illinois destinations are nearer to Buffalo and Linwood than to the producing points in Illinois. HELD, present rates do not conform to the original findings. Specific rates prescribed to designated points in Illinois. Dolese Bros. Co. v. A. T. & S. F. Ry., 128 I. C. C. 471.

(3o) Upon further hearing, present rates on crushed stone from Buffalo and Linwood, Iowa, to points in northern Illinois, found in many instances not in accord with findings in original report 89 I. C. C. 110, wherein reasonable and nonprejudicial rates were prescribed to 10 so-called key points and carriers were left to work out a schedule of properly related rates to all other destinations. Intention of original report was to prescribe rates that would eliminate disparity in rates from Iowa quarries and not to sanction blanketing of key-point rates all the way back to Buffalo and Linwood or to next intermediate key point as has been done. Therefore, to avoid further misunderstanding, carriers will be expected to publish rates in accordance with rates prescribed to points shown in appendix, rate to nearest point named therein by shortest workable route. Such rates are in accord with original findings and will be reasonable for the future. Dolese Bros. Co. v. A., T. & S. F., 128 I. C. C. 471.

(3p) Upon further consideration, findings in former report 123 I. C. C. 41, that rates on metal beds from New Orleans to destinations in Louisiana, Arkansas, Oklahoma, and Texas were not unreasonable or unduly prejudicial, except to Oklahoma, Texas common points, and Texas differential territory, minimum weight 30,000 pounds, modified and rates found unreasonable to extent they exceed column 55 and 41 rates, minimum weight 12,000 and 30,000 pounds respectively, prescribed in Consolidated Southwestern Cases, 123 I. C. C. 203. Reasonable rates prescribed for future. Crescent Bed Co. v. C., R. I. & P., 128 I. C. C. 505.

(3q) Combination rates on grain and products from Oklahoma points to destinations in southeastern and Carolina territories found unreasonable to extent that factors east of Memphis, Tenn., exceed rates based on and approximating the class 12 rates prescribed in Southern Class Rate Investigation 113 I. C. C. 200, and to extent that factors west of Memphis from all points exceed present group rates, computed as provided in Consolidated Southwestern Cases 123 I. C. C. 203, up to 610 miles and from points at greater distance from Memphis those graded up 1.5 cents on wheat and flour and made less by 10 per cent on coarse grains, for each 50 miles. Factors east of Memphis constructed as above should apply not only on Oklahoma traffic but also from other western States from which through rates are equalized via the various gateways. Reasonable joint through rates prescribed for future. Oklahoma Millers' League v. A. & M., 128 I. C. C. 523.

(3r) Combination rates on grain and products from Oklahoma points to destinations in Louisiana west of the Mississippi River, including points on west bank thereof, and to Mississippi River crossings in Mississippi and Louisiana on east bank thereof, found unreasonable as compared with rates contemporaneously in effect from Kansas City, Mo., and Council Bluffs, Iowa, and to extent they exceed through rates based on those prescribed in Consolidated Southwestern Cases, 123 I. C. C. 203. Reasonable joint through rates prescribed for future. Oklahoma Millers' League v. A. & M., 128 I. C. C. 523.

(3s) Rate on printing paper, from Appleton, Wis., to Dallas, Tex., found unreasonable to extent it exceeded lower rate prescribed in 88 I. C. C. 417, and 112 I. C. C. 323, from Appleton and other Wisconsin points to Dallas. Reparation awarded. Practical Drawing Co. v. C. & N. W., 128 I. C. C. 540.

(3t) Sixth-class rates on crushed stone moving interstate from Security, Md., to Best Gate, Md., found unreasonable as compared with those under distance scale prescribed in 49 I. C. C. 681; 100 I. C. C. 411, from Pennsylvania and Maryland points to destinations in Maryland, New York, New Jersey, Delaware, Virginia, and District of Columbia, and to extent they exceeded lower commodity rates subsequently established. Reparation awarded. North American Cement Corp. v. W. M., 129 I. C. C. 90.

(3u) Rates on Portland cement from Hanover and Trident, Mont., to western and central portions of North Dakota and South Dakota, coterminous with original and extended cement Scale IV territory in those States, found unreasonable as compared with rates under that scale prescribed in 48 I. C. C. 201;

69 I. C. C. 644, from Portland, Colo., to Montana Scale IV territory and Utah destinations; from El Paso, Tex., to groups just described for comparable distances; and unreasonable and unduly prejudicial as compared with lower rates from Mason City, Iowa, and Steelton and Duluth, Minn., competing points, to extent they exceed distance rates herein prescribed. Reasonable and nonprejudicial rates prescribed for future. Calif. Growers' and Shippers' Protective League v. S. P., 129 I. C. C. 25, 107.

(3v) Rates on millet seed from points in Colorado, Kansas, Nebraska, North Dakota, and South Dakota to Minneapolis, Minn., found unreasonable as compared with rates contemporaneously in effect on corn, coarse grains, and flaxseed, and to extent they exceeded by more than 12 per cent the contemporaneous rates on wheat. In 107 I. C. C. 35, rates on flaxseed were found unreasonable to extent they exceeded wheat rates by more than 12 per cent, and since from a traffic standpoint millet seed resembles flaxseed in many respects, although of less value, and the two seeds have been maintained on same rate basis in the past, this relationship, for convenience, should be preserved. Reasonable rates prescribed for future and reparation awarded. Northrup, King & Co. v. A., T. & S. F., 129 I. C. C. 125.

(3w) Rates on canned goods in straight or mixed carloads from Mobile, Ala., to destinations in Georgia, Mississippi, Tennessee, Kentucky, Missouri, Ohio, and Illinois, and from New Orleans to Nashville, Tenn., found unreasonable as compared with those prescribed in 77 I. C. C. 473; 123 I. C. C. 203; with lower rates contemporaneously maintained from Neely, Ala., a point within Mobile switching limits to same destinations; and to extent they exceed class 7 rates approved in 113 I. C. C. 200, applicable between same points. Reasonable rates prescribed for future. Mobile Chamber of Commerce v. A. & V., 129 I. C. C. 147.

(3x) Rates on bed springs or spring beds, compressed, from Carthage, Mo., to points in Oklahoma and Texas, found unreasonable and unduly prejudicial as compared with lower rates contemporaneously in effect from Chicago, Kansas City, St. Louis, and various other points and to extent they exceeded 55 and 41 per cent of first-class rates to Oklahoma and Texas, respectively, prescribed in 123 I. C. C. 203, between same points. Reasonable maximum basis of rates prescribed for future and reparation awarded. Leggett & Platt Mfg. Co. v. A., T. & S. F., 129 I. C. C. 219.

(3y) Rates on canned goods, including canned milk from Illinois Freight Association and c. f. a. territory points to Memphis, New Orleans, and other Mississippi Valley points, found not unreasonable as compared with rates on axle grease, fruits, and vegetables and other commodities between same and to various other Mississippi Valley points. Rates assailed are fairly aligned with those to the rest of the South, Southwest, and Southeast; are considerably lower than those prescribed in Consolidated Southwestern Cases, 123 I. C. C. 203; and record affords no basis for a disturbance of present adjustment or change in relationship between points in destination territory. National Canners Asso. v. B. & O., 129 I. C. C. 269.

(3z) Rates on lard substitutes from Greenville, Tex., to Arkansas and Louisiana destinations west of Mississippi River, and to Joplin, Mo.; collected on basis of rates from Fort Worth, Tex., with which Greenville was apparently grouped, found unreasonable to extent they exceeded rates based on distance scale prescribed in 22 I. C. C. 160. While lard substitutes were not originally included in list of commodities on which that scale applied, it has been prescribed for application on packing-house products in southwestern territory generally and was found to be a reasonable basis on lard substitutes in 32 I. C. C. 192, and other cited cases. Reparation awarded. Texas Refining Co. v. C., R. I. & G., 129 I. C. C. 304.

(4a) Rates on grapes from producing points in California to Hibbing, Gilbert, Ely, Chisholm, and Keewatin, Minn., found unreasonable to extent they exceeded rates on same traffic between same points found reasonable in 113 I. C. C. 575. In that case rates assailed were found unreasonable to extent they exceeded rates to Duluth. Reparation awarded. Fena v. A., T. & S. F., 129 I. C. C. 311.

(4b) Fifth-class rates on pig lead, red lead, and litharge from Joplin, Mo., to Oklahoma City, Okla., found unreasonable but not unduly prejudicial as

compared with lower commodity rates from Joplin to various points in western territory, including St. Louis, Mo., East St. Louis, Ill., and Kansas City, Mo., and with distance rates prescribed in Consolidated Southwestern Cases, 123 I. C. C. 203. Competitive situation prevents lower rates from Joplin to St. Louis, East St. Louis, and Kansas City from being basis of undue prejudice. Reasonable rates prescribed for future and reparation awarded. Oklahoma Traffic Asso. v. St. L.-S. F., 129 I. C. C. 461.

(4c) Rates on coke from Troy, N. Y., to destinations in New England territory found unreasonable as compared with contemporaneous rates under Seaboard distance scale prescribed in 62 I. C. C. 317, 327, or rates of same level from points in New Jersey, Rhode Island, and Massachusetts to same destinations, and to extent they exceeded distance rates based on shortest routes over which carload traffic can be moved without transfer of lading, subject to minimum weights as herein provided. See 113 I. C. C. 200. Reasonable rates prescribed for future and reparation awarded. Hudson Valley Coke & Products Corp. v. N. Y., N. H. & H., 129 I. C. C. 472.

(4d) Rates on pears from Fayette Junction, Ark., to Jackson, Miss., found unreasonable as compared with rates on the same commodity between points in the same general territory, and with rates subsequently established in 123 I. C. C. 203. Reparation awarded. Jackson Traffic Bureau v. I. C., 129 I. C. C. 497.

(4e) C. L. and l. c. l. rates on granite from, Granite Mountain, Llano, Teich, and Fredericksburg, Tex., to various interstate destinations, found not unduly prejudicial but unreasonable as compared with lower rates contemporaneously in effect from points in Vermont, Massachusetts, Georgia, North Carolina, South Carolina, Minnesota, Colorado, California, and various other points to same and various other destinations for comparable distances, and to extent they exceed distance rates prescribed in Consolidated Southwestern Cases, 123 I. C. C. 203, between same points, except that rates to portions of Wyoming, Utah, and Colorado, found not unreasonable except to extent they will be reduced by reductions herein required to Colorado common points. Reasonable bases of rates prescribed for future. West Texas Chamber of Commerce v. H. & T. C., 129 I. C. C. 546.

(4f) Rates on apples from St. Joseph, Mo., and related points in Missouri and Kansas to destinations in Nebraska, Iowa, Minnesota, North Dakota, and South Dakota, found unreasonable as compared with lower rates contemporaneously in effect from St. Louis and Hannibal, Mo., Alton and Quincy, Ill., and various other points in same general territory, and to extent they exceed those ascertained by use of the Kansas-Missouri scale prescribed in Consolidated Southwestern Cases, 123 I. C. C. 203; and unduly prejudicial to extent they exceed the contemporaneous rates from St. Louis, Alton, Hannibal, Quincy, and related points, or to extent their relation with rates to those points is less favorable than that which now exists. Reasonable and nonprejudicial rates prescribed for future. Hunt Bros. Fruit Co. v. A. & W., 129 I. C. C. 579.

(4g) Rates on sash, doors, and related articles from Clinton, Dubuque, Muscatine, and Davenport, Iowa, and Rock Island, Ill., to points in c. f. a. territory, except to Michigan points, including western termini of eastern trunk lines and points taking same rates or arbitraries higher except Buffalo, N. Y., found unreasonable and unduly prejudicial to extent they exceed present rates to Oshkosh, Wis., and rates from same origin points to Buffalo, N. Y., Bay City and Grand Rapids, Mich., found unreasonable and unduly prejudicial as compared with those from Oshkosh, with those from Pacific coast points, and with those prescribed or approved in 38 I. C. C. 105, and other cited cases. Reasonable rates prescribed for future. Farley & Loetscher Mfg. Co. v. A., C. & Y., 129 I. C. C. 645.

(4h) Rates on tomatoes from Fruitland, Gibson, and Humboldt, Tenn., to Hutchinson, Kans., found not unreasonable in past but for future found unreasonable and unduly prejudicial as compared with lower rates contemporaneously in effect to Kansas City, Mo., and Topeka, Kans., for comparable distances, and to extent they exceed rates prescribed in Consolidated Southwestern Case, 123 I. C. C. 203. No order entered but carriers expected to establish rates in conformity with findings herein at time they comply with rates prescribed in case cited. Former report 104 I. C. C.

745, modified. Grovier-Starr Produce Co. v. C., R. I. & P., 129 I. C. C. 711.

(4i) Fifth-class water-and-rail rates on quebracho tanning extract from New York and Brooklyn to St. Louis, Mo., found not unreasonable as compared with lower all-rail sixth-class rates from Glenn Falls, N. Y., and all-rail commodity rates from Norfolk, Va., to same destination, or with lower commodity rates applicable all-rail or rail and water subsequently established. In 120 I. C. C. 711, fifth-class rates on liquid tanning (quebracho) extract, from Brooklyn to Winchester and Peabody, Mass., were not unreasonable and evidence of record does not warrant a different conclusion with respect to rates assailed. Herman Oak Leather Co. v. C. G., 129 I. C. C. 725.

§27. Profit of Shipper.

See Advanced Rates §6 (6); Equalization of Rates; Evidence §16, §27, §45, §62.

(a) Reasonableness of a rate does not necessarily depend upon ability of shippers profitably to market their product under it. Rawlings v. C., B. & Q., 115 I. C. C. 103, 104.

§27½. Rate Via Competing Route.

See Evidence §30, §47; Routing and Misrouting §5; Through Routes and Joint Rates §15½.

(a) Rate on lumber from Tupelo, Miss., to Normal and Buntyn, Tenn., found unreasonable to extent it exceeded lower contemporaneous rate on like traffic from Pinson and Henderson, Tenn., to Normal. Reparation awarded. Northeast Mississippi Traffic Bureau v. M. & O., 104 I. C. C. 15.

(b) Shipments of matches moving from Chico, Calif., to destinations in Washington were assessed a rate to Portland, Oreg., higher than proportional rate applicable over a route other than route of movement to St. Johns, situated within corporate and switching limits of Portland. Lower rates was restricted to destinations other than those here involved and carried a switching charge at Portland also restricted to switching service performed in connection with a line haul. There was no switching in connection with a line haul via route of movement, and an out-of-line haul would have resulted had traffic moved through St. Johns. FOUND: Rates assessed were not unreasonable or otherwise unlawful. Diamond Match Co. v. Director General, 104 I. C. C. 147.

(c) Existence of a lower rate over other routes is not itself sufficient to establish unreasonableness of rate over a particular route of movement. Lynchburg Chamber of Commerce v. G. R. R., 115 I. C. C. 419, 420.

(d) Mere showing of existence of lower rates over other routes, and comparisons based upon distance alone, are insufficient to establish unreasonableness of rates. See 64 I. C. C. 78. Crerar Clinch Coal Co. v. A. A. R. R., 118 I. C. C. 171, 174.

(e) Rates on bituminous coal from Plymouth and Shrewsbury, W. Va., to Connersville and New Castle, Ind., moving via route specified by shipper, found not unreasonable as compared with lower rates contemporaneously in effect over other routes. While lower rate contended for applied over all routes except route of movement, the higher rates apply over latter due to fact that they are circuitous, the higher rates thereover apply to intermediate points in a higher rated territory; and rates to such intermediate territory were found not unreasonable in 96 I. C. C. 178. Connersville Lbr. Co. v. L. E. & W., 118 I. C. C. 499.

(f) Rates on gas oil in tank-car loads from Iowa Park and Electra, Tex., to Kassel, La., found not unreasonable. While contemporaneously a lower rate applied via other available routes such lower rate is shown by carriers to be subnormal, having been established upon request of shippers to meet a similar rate published by Texas lines to Texas ports. Altitude Petroleum Co. v. F. W. & D. C., 118 I. C. C. 572.

(g) Combination rate on farm wagons from Fort Smith, Ark., to Fredericksburg, located in Texas differential territory on the Fredericksburg & Northern R. R., found unreasonable to extent it exceeded a lower joint rate contemporaneously in effect via routes other than route of movement, such lower joint rate also applying to Kerrville, situated in same territory on the San Antonio & Aransas Pass Ry., approximately same distance from junction point on which the combination was based as is Fredericksburg. Route over which shipment moved constitutes the most practicable and reasonable route and no justification appears for maintenance of a higher rate to Fredericks-

burg than to Kerrville. Reasonable rate prescribed for future and reparation awarded. Deere Plow Co. v. St. L.-S. F., 120 I. C. C. 67.

(h) Although no presumption of unreasonableness attaches to rate over a particular route because lower rate applies over another route, shipper is not to be denied a reasonable rate merely because he could have secured it by designating another route. See 58 I. C. C. 42. Deere Plow Co. v. St. L.-S. F., 120 I. C. C. 67, 68.

(i) Rates on stoves and furnaces from Indianapolis, Ind., to Des Moines, Iowa, found unreasonable to extent they exceeded lower rates contemporaneously in effect via other routes and subsequently established via route of movement. Reparation awarded. Indianapolis Chamber of Commerce v. P. R. R., 120 I. C. C. 153.

(j) Applicable rate on lemons from New York, N. Y., to Nashville, Tenn., over various routes, found unreasonable to extent it exceeded lower rate contemporaneously in effect over longer routes through the Virginia gateways. Reasonable rate for future prescribed and waiver of undercharges authorized. Hill Grocery Co. v. L. V., 120 I. C. C. 161.

(k) Combination rate charged on coal from La Follette, Tenn., moving through Benton Harbor, Mich., to Milwaukee, Wis., reconsigned to Hawkeye, Iowa, found unreasonable to extent it exceeded a lower rate contemporaneously maintained on like traffic moving through Toledo, Ohio. Benton Harbor and Toledo are in same general territory, the distances over both routes are practically equal, and rates through the two gateways should be same. Reparation awarded. Reeves Coal & Dock Co. v. L. & N., 120 I. C. C. 428.

(l) Rate on eggs from Brownwood and Killeen, Tex., to Philadelphia, Pa., found unreasonable to extent it exceeded lower rate contemporaneously in effect from and to same points via routes other than routes of movement, which lower rate also applied from other Texas points to Philadelphia for comparable distances. Reparation awarded. Sheaffer & Marvel v. B. & O., 120 I. C. C. 673.

(m) The existence of a lower rate over a competing route does not of itself establish unreasonableness of a rate over a particular route of movement. Newsome Feed & Grain Co. v. P. & L. E., 122 I. C. C. 329, 330.

(n) Fact that a lower rate was applicable over another route does not deprive a shipper of a reasonable rate over route of movement. Spencer Co. v. A., T. & S. F., 122 I. C. C. 689, 690.

(o) Rate on cotton-factory products, l. c. l., from Mobile, Ala., via water-and-rail route to Rockland, Md., found unreasonable as compared with lower rate contemporaneously in effect over water-and-rail routes from Mobile to Baltimore, Md., Chester, Pa., and various points in New England, New York, New Jersey, and Pennsylvania, from various Mississippi and Tennessee points to Rockland, and to extent it exceeded the water-and-rail rate contemporaneously in effect from Meridian, Miss., to Rockland. Reasonable rate prescribed for future, and reparation awarded. Cotton Mills Products Co. v. Mallory S. S. Co., 123 I. C. C. 25.

(p) A rate can not be condemned merely because it was higher than a rate applicable over other routes. Dreer v. L. A. & S. L., 126 I. C. C. 130, 132.

(q) Neither voluntary reduction of a rate by carrier nor maintenance of a lower rate over another route between same points is sufficient to establish unreasonableness of a higher rate. Western Paper Makers Chemical Co. v. A. C. L., 128 I. C. C. 244, 245.

(r) Failure of a shipper to avail itself of a lower rate applicable over other routes does not establish the unreasonableness of the rate over route of movement. Citizens Coal Co. v. C., C., C. & St. L., 128 I. C. C. 263, 264.

(s) For determining the reasonableness or unreasonableness of rates applied to given shipments, the earnings and distances over the routes actually traveled constitute a better measure than do computations based on short line distances without regard for routes of movements. Tidal Western Oil Corp. v. M. K. T. R. R., 132 I. C. C. 681, 684.

(t) The principal laid down does not warrant a finding of unreasonableness where the points claimed to be intermediate to a lower rated point are intermediate only over excessively circuitous and unnatural routes over which no shipper could reasonably demand transportation under the provisions of section 1 (4) of the act. Tidal Western Oil Corp. v. M. K. T. R. R., 132 I. C. C. 681, 684.

§27¾. Rate in Opposite Direction.

See Classification §17; Differentials; Evidence §30, §56, §66; Relative Rates; Through Routes and Joint Rates §8.

(a) Fact that a rate is higher in one direction than in reverse direction does not of itself establish unreasonableness of higher rate, but such a situation may require satisfactory explanation. Garrett & Co. v. N. Y. C., 112 I. C. C. 519, 521.

(b) Fact that a rate is higher in one direction between same points than it is in reverse direction does not of itself prove that higher rate is unreasonable. Colgate & Co. v. N. Y. C., 112 I. C. C. 573, 576.

(c) Applicable rates on common brick from Nashville, Tenn., to Morehead, Ky., found unreasonable to extent they exceeded lower rates contemporaneously in effect in the opposite direction, no transportation conditions justifying a higher rate from Nashville to Morehead than from Morehead to Nashville. Reasonable rate prescribed for the future and reparation awarded. Bush & Co. v. L. & N., 115 I. C. C. 45.

(d) Sixth-class rate assessed and lower commodity rate subsequently established on scrap iron from Burnham, Pa., to Cumberland, Md., found unreasonable to extent it exceeded lower rate contemporaneously in effect in the reverse direction from Cumberland to Burnham. Reparation awarded. Cohen & Son v. P. R. R., 115 I. C. C. 307.

(e) Fifth-class rate charged on a sporadic shipment of fire-damaged sugar specifically routed by shipper from Jacksonville, Fla., to New Orleans, La., found not unreasonable as compared with lower rate contemporaneously in effect over other routes, and in the reverse direction. Underwriters Salvage Co. v. L. & N., 115 I. C. C. 585.

(f) Rate on creosote oil from Fort Worth, Tex., to Woodward, Ala., found unreasonable to extent it exceeded lower rate contemporaneously maintained in reverse direction. Rate from Woodward to Fort Worth does not appear low as compared with rates in same general territory and there is no showing that transportation conditions are any different in reverse direction. American Tar Products Co. v. C., R. I. & P., 115 I. C. C. 677.

(g) Fact that rates in one direction exceed rates in the opposite direction does not demonstrate unreasonableness of the higher rates. See 51 I. C. C. 23, 24. Stanley Lbr. Co. v. A. & V., 122 I. C. C. 506, 508.

(h) Difference in transportation conditions may justify a higher rate in one direction than in the opposite direction, provided the higher rate is not intrinsically unreasonable. See 92 I. C. C. 671. American Linseed Co. v. C., M. & St. P., 128 I. C. C. 163, 166.

(i) The fact that rate in one direction exceeds rate between same points in opposite direction does not in itself demonstrate that higher rate is unreasonable. Montello Granite Co. v. M., St. P. & S. S. M., 129 I. C. C. 427, 428.

§28. Relativity Of The Rate.

See Class Rates §2; Classification §17; Differentials; Discrimination; Evidence; Relative Rates; Through Routes and Joint Rates §8.

(a) Rates on carload shipments of newsprint-paper winding cores from various points in eastern and c. f. a. territories to destinations in New York and New England States, found unreasonable to extent they exceeded contemporaneous sixth-class rates from and to same points. Reasonable rates prescribed for future and reparation awarded. Washington Publishers' Asso. v. A. C. & H. B., 104 I. C. C. 4.

(b) Rate on wood flour from North Tonawanda, N. Y., to destinations in New York, New Jersey, and Pennsylvania, found unreasonable to extent it exceeded lower contemporaneous rates on like traffic from Newhall, Me., and Glens Falls, N. Y., to same and other destinations for comparable distances. Reasonable rate prescribed for future and reparation awarded. Becker, Moore & Co. v. N. Y. C., 104 I. C. C. 11.

(c) Rate on lumber from Tupelo, Miss., to Normal and Buntyn, Tenn., found unreasonable to extent it exceeded lower contemporaneous rate on like traffic from Pinson and Henderson, Tenn., to Normal, but not discriminatory or unduly prejudicial. Reasonable rate prescribed for future and reparation awarded. Northeast Mississippi Traffic Bureau v. M. & O., 104 I. C. C. 15.

(d) Rates on green salted hides from

Nashville, Tenn., to points in Massachusetts, New Hampshire, New York, and Pennsylvania, found unreasonable and unduly prejudicial to extent they exceeded specific rates named herein and as compared with contemporaneous rates on like traffic from points in same or adjacent territory to same destination. Reasonable rates prescribed and reparation awarded. Tolman, Dow & Co. v. T. C. Ry., 104 I. C. C. 37.

(e) Where evidence tends to show "relative unreasonableness" as distinguished from "intrinsic" or "per se unreasonableness," commission's findings must be based to a great extent upon measuring rate assailed with other rates; and it must be convinced that rates submitted by way of comparison are properly comparable. Mere fact that a rate under attack appears to be out of line with a few rates to which it is closely related does not necessarily afford a basis for finding of unreasonableness. Such a showing may indicate that comparative rates are too low rather than that assailed rate is too high, and correction of such a maladjustment might properly be made under section 3 of the act instead of section 1. See 87 I. C. C. 383. Tolman, Dow & Co. v. T. C. Ry., 104 I. C. C. 37, 39, 40.

(f) Mere fact that a rate under attack appears to be out of line with a few rates to which it is closely related does not necessarily afford a basis for finding of unreasonableness. Such a showing may indicate that comparative rates are too low rather than that assailed rate is too high, and correction of such a malajustment might properly be made under section 3 of the act instead of section 1. See 87 I, C. C. 383. Tolman, Dow & Co. v. T. C. Ry., 104 I. C. C. 37, 40.

(g) Having in mind varying existing conditions, large amounts of capital invested under existing rates, great disturbance which would result from prescribing fixed relationships, and fact that it is not commission's province to prescribe rates which appear desirable to it, but to ascertain whether existing rates are unlawful and, if so, to prescribe lawful rates in lieu thereof, no fixed rate relationships between rates on fresh and cured meats, hides, hogs, sheep, and cattle can be prescribed in instant proceeding. Morrell & Co. v. N. Y. C., 104 I. C. C., 104, 134, 135.

(h) Rates on fresh meats from Chicago, St. Louis and other packing points in c. f. a. territory to trunk-line and New England territories found unreasonable for future. Reasonable rates and percentage relationships, based on the Chicago-New York rates, which will not result in undue prejudice in their relation to present rates on livestock, prescribed. Morrell & Co. v. N. Y. C., 104 I. C. C. 104, 135.

(i) Rates on dried, dry-salted, smoked and pickled meats, loose, from Chicago and various other packing points to destinations in trunk-line territory east of Buffalo-Pittsburgh line and to New England territory found unjust and unreasonable for future to extent they exceed contemporaneous rates on cured meats and packing-house products, packed, from and to same points. Reasonable rates prescribed. Morrell & Co. v. N. Y. C., 104 I. C. C. 104, 136, 137.

(j) Rate on sulphuric acid from, Grasselli, Ind., to Toledo, Ohio, found not unreasonable as compared with contemporaneous rates on like traffic from and to points in same general territory for comparable disances. Royster Guano Co. v. M. C., 104 I. C. C. 151.

(k) Texas points: Rates on green coffee from New York to Denison, Fort Worth, Dallas, and Austin, Tex., and from New Orleans, La., and Galveston and Houston, Tex., to Austin and San Antonio, Tex., found unreasonable as compared with rates on like traffic from same original points of shipment to other destinations and from and to other points for comparable distances. Reparation awarded. Findings in original report, 92 I. C. C. 14, modified. Alexander Grocery Co. v. B., S. L. & W., 104 I. C. C. 155.

(l) Rates on petroleum products from Beverly, Mass., to Manchester and Concord, N. H., found unreasonable to extent they exceeded rates determined by use of rates applicable over class A lines based on short-line distance over such lines through Nashua, N. H. Reasonable rates prescribed for future, and reparation awarded. Gulf Refining Co. v. B. & A., 104 I. C. C. 165.

(m) Rates on broom handles from points in Michigan and Wisconsin to Des Moines, Iowa, Kansas City and North Kansas City, Mo., and Deshler, Nebr., found unreasonable to extent they exceeded rates 1.5 cents over those contemporaneously maintained on lumber.

Reasonable rates prescribed for future and reparation awarded. Deshler Broom Factory v. A., T. & S. F., 104 I. C. C. 183.

(n) Coraopolis, Pa.: Rates assessed on petroleum lubricating oil, in barrels, from, to New York, found unreasonable to extent it exceeded lower contemporaneous rate applicable over available routes other than route of movement, from same point of origin to certain destinations in New Jersey over route of movement, and to various points in Pennsylvania, New Jersey, New York, and Maryland for comparable distances. Reparation awarded. Transcontinental Oil Co. v. P. R. R., 104 I. C. C. 259.

(o) Rates on zinc skimmings, zinc salammoniac skimmings, zinc dross and zinc ashes from Illinois, Missouri, Ohio, and Wisconsin points to Van Buren, Ark., found not unreasonable as compared with rates contemporaneously maintained to competitive Oklahoma points. Falcon Zinc Co. v. M. P., 104 I. C. C. 267.

(p) Fifth-class rates on furnaces and furnace parts from Holland, Mich., to Milwaukee and Chicago and points taking Chicago rates, found unduly prejudicial to extent they exceeded those based upon rates bearing same relationship to fifth-class rate from Holland that contemporaneous commodity rates bear to corresponding fifth-class rates from Detroit. Nonprejudicial rates prescribed. Holland Furnace Co. v. A., T. & S. F., 104 I. C. C. 286.

(q) Rate assessed on shipment of lime from Gibsonburg, Ohio, to Rivermont, Va., found unreasonable to extent it exceeded lower contemporaneous rate from Gibsonburg to Lynchburg, Va., a farther distant point, which lower rate was established to Rivermont subsequent to movement here involved. Reparation awarded. Lynchburg Chamber of Commerce v. P. R. R., 104 I. C. C. 293.

(r) San Pedro, Calif.: Interstate rates on lumber and products from Westwood, Calif., Portland, Grants Pass, Medford, and Klamath Falls, Oreg., and points taking same rates, to Sacramento and other California points, found not unreasonably low, or to result in discrimination or undue prejudice to San Pedro. While some of these rates are on a low basis they are not unjustifiably low, as they yield to carriers something in excess of out-of-pocket cost, in addition to making possible a profitable traffic in transcontinental lumber and inbound supplies. Lumber industries of Oregon and California are dependent upon maintenance of existing adjustment, which has developed in view of many competitive forces. Moreover, present rate basis is satisfactory to all producing sections except San Pedro, from which intrastate rates are properly related to similar rates from other California producing sections. Los Angeles Lbr. Products Co. v. S. P. Co., 104 I. C. C. 297.

(s) Rate on corn and oats from certain Nebraska Group G points to Portland, Oreg., found unreasonable to extent it exceeded lower rate contemporaneously in effect from other points in same group, which lower rate was established from points here involved subsequent to movement. Reparation awarded. See also 64 I. C. C. 461. Albers Bros. Milling Co. v. Director General, 104 I. C. C. 330.

(t) Alabama points: Rates on coal from Grants, Ala., to Florence, Ala., via an interstate route through Columbus, Tenn., found not unreasonable as compared with rates between various points in same general territory for comparable distances. Here interstate route was used because of delays over customary intrastate route caused by a strike. Such interstate route was not logical or reasonable route and will probably not be used again except in case of emergency. Florence Chamber of Commerce v. C. of G. Ry., 104 I. C. C. 373.

(u) Alabama and Tennessee points: Present rates on sand from Lipe, Tenn., to Sheffield, Florence, and Tuscumbia, Ala., which conform with rates for similar distances under scales approved by commission in various cases, found not unreasonable. Florence Chamber of Commerce v. N., C. & St. L., 104 I. C. C. 393.

(v) Los Angeles, Calif.: Rates on sporadic shipments of fruit-wrapping paper from, to Ordway and Rocky Ford, Colo., found unreasonable as compared with rates from paper-producing points in Washington, Oregon, Wisconsin, and Minnesota to same destinations, and to extent they exceeded lower rate subsequently established. Reparation awarded. Crown Willamette Paper Co. v. U. P. R. R., 104 I. C. C. 399.

(w) Rate on evaporated milk from Lamar, Colo., to Dawson, N. Mex., found not unreasonable or otherwise unlawful as compared with rates from Pueblo or the Denver group to same destination.

Movement was sporadic and earnings under rate charged do not compare unfavorably with those on similar traffic in same general territory. Helvetia Milk Condensing Co. v. A., T. & S. F., 104 I. C. C. 402.

(x) South Atlantic ports: Rates on rosin from south Atlantic ports, and points taking same rates, to Burlington, Ont., Canada, found unreasonable to extent they exceeded rates contemporaneously in effect from Gulf ports to same destination. Rates from the Gulf ports found not unreasonable. Reparation awarded. Vera Chemical Co. v. A. C. R. R., 104 I. C. C. 408.

(y) Milltown, Ind. Rates on lime from Milltown, Ind., to destinations in c. f. a. territory found not unreasonable or unduly prejudicial as compared with rates from Mitchell, Bedford, and Salem, Ind., to same destinations. There is no showing by complainant that delivering carriers which participate in joint rates from Salem can by withdrawing from such participation thereby remove alleged undue prejudice against Milltown. Moreover, in certain instances delivering lines shown in complainant's comparisons are not same. Louisville Cement Co. v. S. Ry., 104 I. C. C. 455.

(z) Rates on prepared roofing and asphalt shingles from Chicago, St. Louis, Cairo, Evansville, Louisville, and Cincinnati, to Florence, Sheffield, and Tuscumbia, Ala., found not unreasonable, but, in view of level of rates in Mississippi Valley territory and circumstances under which they were established in comparison with contemporaneous rates in Southeast at points adjacent to that territory, the spread between rates that have for many years prevailed at Corinth, Miss., and rates at Florence, Sheffield, and Tuscumbia found too great, subjecting jobbers at latter points to undue prejudice in competing with Corinth jobbers for trade in same common territory. Differentials prescribed for removal of undue prejudice. Florence Chamber of Commerce v. L. & N., 104 I. C. C. 459.

(aa) Rates on grain from Minnesota points to Chicago, Milwaukee, and other Wisconsin destinations taking same rate, which at time of movement, exceeded contemporaneous combination of locals, to, and proportionals from, Winona, Minn., found not unreasonable. In view of commission's finding in 78 I. C. C. 110, that such through rates were reasonable carriers could have complied with fourth section by increasing the several components or by cancelling outbound proportionals from Winona. They elected, however, to reduce through rates to combination basis and later canceled proportionals. In support of reasonableness of rates charged, defendants presented numerous comparisons of through rates, and of components of lower combinations on Winona, with other rates from Iowa points to Minneapolis and between other points in same general territory. Lewiston Elevator Co. v. C. G. W., 104 I. C. C. 473.

(bb) Washington and Oregon points: Rates on unfermented grape juice, in glass, in boxes, from Melvin, Calif., to Aberdeen, Tacoma, and Seattle, Wash., found not unreasonable, but similar rates to Portland, Oreg., found unreasonable as compared with those to first named points. Joseph v. O. W. R. R. & N. Co., 104 I. C. C. 477.

(cc) Georgia and Tennessee points: Rates on coke from Chickamauga and Durham, Ga., and Chattanooga and Alton Park, Tenn., to Pacific coast terminals, found not unreasonable or discriminatory but unduly prejudicial to extent they exceed rates from Birmingham, Ala., district to same destinations. Following 34 I. C. C. 10, rates from these origin points were placed on a rate parity and so remained until disrupted by a reduction in rate from Birmingham. While southeastern carriers are willing to reduce rates involved to same as that applicable from Birmingham, the transcontinental lines are unwilling to concur therein because of low divisions which they would receive thereunder. Durham Coal & Iron Co. v. C. of G., 104 I. C. C. 483.

(dd) Atlanta, Ga.: Rate on glucose, in tank-car loads, from Clinton, Iowa, and Roby, Ind., to, found unreasonable to extent it exceeded rate from Chicago to Meridian and Jackson, Miss. Reasonable rate prescribed for future and reparation awarded. Cairo Syrup Co. v. I. H. B., 104 I. C. C. 487.

(ee) Existence of lower rate from a more distant point on same line or route is not in and of itself sufficient to justify a finding of unreasonableness and an award of reparation by reason of exaction of higher rates from an intermediate point or points. See 50 I. C. C. 719. Ohio Farm Bureau Federation v. N. Y. C., 104 I. C. C. 490, 492.

(ff) California points: Rail rates on lumber from Los Angeles, Wilmington and San Pedro, Calif., to El Paso, Tex., and destinations in Arizona and New Mexico, originally moving into these origin points by water from competing Pacific coast producing territory, found unreasonable and unduly prejudicial as compared with lower all-rail rates from same origin points to same destinations. Reasonable and nonprejudicial rates prescribed. Lumbermen's Exchange v. S. P. Co., 104 I. C. C. 538.

(gg) East St. Louis, Ill.: Applicable rates on articles named in uniform brick list from complainant's plant at East St. Louis to destinations within switching district of St. Louis, Mo., found not unreasonable or otherwise unlawful as compared with rates from farther distant competing points in Illinois and Missouri. Rates from complainant's plant are lower than those from more distant points in Illinois and are as low as or lower than rates prescribed for similar distances in the Brick case, 68 I. C. C. 213. It is not shown that complainant has lost any sales in St. Louis by reason of adjustment complained of; moreover, shipments from its plant for delivery in St. Louis switching district move freely under present rates. H. & R. Mining & Mfg. Co. v. A. & S., 104 I. C. C. 671.

(hh) Combination of commodity rates to Ohio River and class rates beyond assessed on strawberries and tomatoes from points in Tennessee and Kentucky to Youngstown, Ohio, found unreasonable to extent they exceeded lower joint rates contemporaneously in effect to Pittsburgh, Allegheny, and Erie, Pa., and other c. f. a. points in Buffalo-Pittsburgh district. Reasonable rates prescribed for future and reparation awarded. Coulbourn Fruit Co. v. B. & O., 104 I. C. C. 734.

(ii) Rates on tomatoes from Fruitland and Gibson, Tenn., to Hutchinson, Kans., found not unreasonable but unduly prejudicial in favor of Saline and Kansas City, competing points located in same general territory. Relationship of rates prescribed for future. Grovier-Starr Produce Co. v. C., R. I. & P., 104 I. C. C. 745.

(jj) Sixth-class rates on empty steel shells from Penniman, Va., situated on a short branch line of C. & O., to Carnegie, Pa., and Canton, Ohio, found unreasonable to extent they exceeded lower commodity rate contemporaneously maintained from Williamsburg, Va., a mainline point to same destinations, which lower rate was established from Penniman subsequent to movements here involved. Reparation awarded. Hyman-Michaels Co. v. C. & O., 104 I. C. C. 749.

(kk) Rates on wrapping paper, l. c. l., from Hartsville, S. C., to Jackson, Miss., found not unreasonable, but unduly prejudicial to extent they exceeded contemporaneous rates to Vicksburg, a farther distant competitive point. Nonprejudicial rate prescribed and reparation denied. Jackson Paper Co. v. A. G. S. Ry., 104 I. C. C. 758.

(ll) Rates on gas oil in tank-car loads from Parco, Wyo., to Denver, Colo., found unreasonable to extent they exceeded lower contemporaneous rate on like traffic from Parco and Laramie, Wyo., to Ogden and Salt Lake City, Utah. Reasonable rate prescribed and reparation awarded. Colorado Public Service Co. v. U. P. R. R., 107 I. C. C. 97.

(mm) North Carolina points: Rates on crushed stone from Columbia, S. C., to Wilford, Edwards, and Dean Siding, N. C., destinations on the Washington & Vandemere, a short-line carrier under same management and control as Atlantic Coast Line, found not unreasonable as compared with single-line distance rates from same point of origin to same and other destinations, or with rates between numerous other points for application over two or more lines for approximately equal distances. Raleigh Freight Traffic Bureau v. A. C. L., 107 I. C. C. 156.

(nn) Iowa points: Rates on lumber and related commodities from Washington, Oregon, Idaho, Montana, and California, to destinations in Iowa, found unreasonable and unduly prejudicial as compared with rates to Missouri River cities, the Twin Cities, and Chicago, Ill. Reasonable and nonprejudicial rates prescribed for future. Burlington Shippers' Asso. v. A., T. & S. F., 107 I. C. C. 198.

(oo) Rates on articles in uniform brick list from Danville, Ill., to points in Wisconsin, Michigan, Minnesota, and North Dakota, found not unreasonable but unduly prejudicial to Danville and unduly preferential of other competing Illinois origin points. Nonprejudicial relationship of rates prescribed for future and reparation denied. Western Brick Co. v. N. Y. C., 107 I. C. C. 245.

(pp) Proposal to readjust class rates between upper Mississippi River crossings and related points and points in Minnesota and North Dakota to basis of rates between Chicago group and Fargo, N. Dak., resulting in both increases and decreases, the former predominating, found not justified. Transportation conditions between the crossings and the destination territory, on one hand, and between Chicago and destination territory, on the other, are not materially different, and difference in distance can not be ignored. Reasonable maximum class rates between the crossings and Fargo and Moorhead, N. Dak., and from crossings to Fargo for application on traffic from points east of Chicago in c. f. a. trunk-line, and New England territories, determined. Rates from Upper Mississippi Crossings, 107 I. C. C. 256.

(qq) Montana points: Domestic rates on grain and products from, to destinations, in California, Oregon, Washington, Nebraska, Missouri, Iowa, Minnesota, Wisconsin, and Illinois, found not unreasonable or otherwise unlawful as compared with lower export rates from Montana to north Pacific coast ports for equal distances. Export Rates on Wheat and Products, 107 I. C. C. 276.

(rr) Rates on coal from Ohio and Crescent districts to certain points in Lower Peninsula of Michigan and to Elkhart, Ind., found not unreasonable or otherwise unlawful as compared with rates to Toledo, Detroit, and Jackson. Spreads between assailed and compared rates are not sufficiently out of line to warrant finding of undue prejudice and complainant's case, built entirely on distance, fails to take into consideration different conditions which render compared rates unacceptable as the foundation upon which to construct rates on a distance basis. Radical changes are sought in group adjustment which has existed for many years with commission's approval. However, evidence adduced deals with only a relatively small portion thereof and record fails to indicate how proposed changes will react on the group adjustment as a whole. Kalamazoo Chamber of Commerce v. C. & O., 107 I. C. C. 291.

(ss) Rates on logs from Pawpaw and Lawton, Mich., to Hicksville, Ohio, found unreasonable to extent they exceeded lower contemporaneous rate on like traffic between other points in same general territory for comparable distances. Reparation awarded. Crook, Son & Co. v. K., L. S. & C., 107 I. C. C. 379.

(tt) Following 88 I. C. C. 188, rate on common window glass from Okmulgee, Okla., to Jackson, Miss., via Memphis, Tenn., found unreasonable to extent it exceeded lower contemporaneous rate via Memphis to New Orleans, Vicksburg, Gulfport, and Mobile. Reparation awarded. Jackson Traffic Bureau v. St. L.-S. F., 107 I. C. C. 383.

(uu) Rates on sewer pipe and wall coping from Brazil and Mecca, Ind., to points in Illinois classification territory found unreasonable and unduly prejudicial to extent they exceeded contemporaneously applicable rates for like distances from St. Louis to same destinations. Reasonable and nonprejudicial rate for future prescribed and reparation denied. Chicago Fire Brick Co. v. A. & W., 107 I. C. C. 399, 406.

(vv) Rate on bituminous coal from South Providence and Harbor Junction Wharf, R. I., to Sterling, Conn., as part of a through interstate movement from Virginia mines by rail and water, found unreasonable to extent it exceeded lower contemporaneous rate on like traffic from New Haven and Stratford to other destinations in Connecticut for comparable distances found reasonable in 83 I. C. C. 563. Reasonable rate prescribed and reparation awarded. United States Finishing Co. v. N. Y., N. H. & H., 107 I. C. C. 412.

(ww) Rate on bituminous coal from Allyn's Point to Sterling, Conn., as part of a through interstate movement from Virginia mines by rail and water, found not unreasonable as compared with contemporaneous rates on like traffic between points in same general territory for comparable distances and with rates found reasonable in 83 I. C. C. 563. United States Finishing Co. v. N. Y., N. H. & H., 107 I. C. C. 412.

(xx) Gary, Ill.: Applicable rate on crushed stone from Gary, Ill., situated within the Chicago switching district, to Kankakee and Stillwell, Ind., found unreasonable to extent it exceeded rate contemporaneously in effect from Chicago. Waiver of undercharges authorized. Taylor v. N. Y., C. & St. L., 107 I. C. C. 441.

(yy) Florida points: Rates on crate and box material from Bainbridge and

Brunswick, Ga., to destinations in Florida on Florida East Coast Ry., found not unreasonable as compared with lower intrastate rates on like traffic in Florida and with interstate rates from and to other points for comparable distances. Elberta Crate Co. v. A. C. L., 107 I. C. C. 499.

(zz) Upon further argument and reconsideration, rate on bituminous coal from Harrisburg, Ill., to La Fayette, Ind., found not unreasonable as compared with rates from Harrisburg to other farther distant destinations in Indiana. Finding in former report, 93 I. C. C. 579, affirmed. La Fayette Box Board & Paper Co. v. C., C., C. & St. L., 107 I. C. C. 509.

(3a) New York and New Jersey points: Rates on inedible tallow and inedible grease from Georgetown and Bennings, D. C., to Jersey City, N. J., Port Ivory, and Brooklyn, N. Y., and New York Harbor lighterage points, found not unreasonable as compared with contemporaneous rates on like traffic between other points in trunk-line and c. f. a. territories. Hopfenmaier v. B. & O., 107 I. C. C. 577.

(3b) Rates on baled hay from Arizona points to El Paso, and from Yuma group in Arizona to Los Angeles, and points taking same rates found not unreasonable or otherwise unlawful. Rates on same commodity from the Thatcher, Phoenix, and Yuma groups in Arizona to points in New Mexico, Clifton, Ariz., Ft. Bliss, Tex., Texas common points, Kansas City and St. Louis, Mo., and Mississippi River crossings, Memphis, Tenn., and south thereof;from Alhambra, Glendale and Peoria, Ariz., to same points east of New Mexico, and to El Paso, Tex.; and from the Thatcher and Phoenix groups to Los Angeles, found unreasonable. Reasonable rates or bases of rates prescribed. Arizona Hay Traffic Asso. v. A. E., 107 I. C. C. 591.

(3c) Rates on nails, washers, nuts, and bolts, l. c. l., from Birdsboro, Coatesville, Lebanon, and Pottstown, Pa., to Lynchburg, Va., found neither unreasonable nor unduly prejudicial as compared with rates on like traffic from same points of origin to other Virginia points for comparable distances. Lynchburg Chamber of Commerce v. R. Co., 107 I. C. C. 610.

(3d) Knoxville, Tenn.: Rates on bar iron from, to stations on Ohio & Kentucky Ry., a short-line carrier, found unreasonable as compared with rates from Pittsburgh and other points to same destinations, with rates between other points for comparable distances, and to extent they exceeded lower rate subsequently established. Reparation awarded. Knoxville Iron Co. v. L. & N., 107 I. C. C. 627, 633, 634.

(3e) Rock Springs District of Wyoming: Rate on slack coal from, to Sugarton and Cornish, Utah, found unreasonable to extent it exceeded lower contemporaneous rate on like traffic from Castle Gate district in Utah to same destinations. Reparation awarded. Amalgamated Sugar Co. v. U. P., 107 I. C. C. 635.

(3f) Class rates and commodity rates bearing a direct relation thereto from points in c. f. a. and border territories to Williamson, W. Va., found unreasonable as compared with rates from same territories of origin to Charleston, Gauley, Kenova, Huntington, and other West Virginia destinations, and to extent they exceed rates constructed on distance scale of class rates applicable in c. f. a. territory for short-line distance to Williamson, plus specific arbitraries for the six classes respectively. Williamson Chamber of Commerce v. A., C. & Y., 107 I. C. C. 639.

(3g) Rates on iron and steel articles, c. l. and l. c. l., from Pittsburgh and Woodlawn, Pa., to Williamson, W. Va., found unreasonable as compared with rates on like traffic from more distant points of origin to which Woodlawn and Pittsburgh are intermediate, and with rates from same origin points to Ashland, Ky., Kenova, Huntington, and Charleston, W. Va. Reasonable rates prescribed for future and reparation awarded. Williamson Chamber of Commerce v. A., C. & Y., 107 I. C. C. 639.

(3h) Rate on grapefruit from Bowling Green, Fla., to Wausau, Wis., found unreasonable to extent it exceeded lower joint rate contemporaneously in effect to Duluth and Albert Lea, Minn., Eau Claire, Wis., and other points in same territory, which lower rate was established to Wausau subsequent to movement here involved. Reparation awarded. Murphy v. A. C. L., 107 I. C. C. 651.

(3i) Rate on potatoes from Almora, Minn., to Tinley Park, Ill., via Chicago, found not unreasonable as compared with rates from North Dakota origin points to Chicago for greater distances. Thoem-

ing & Co. v. M., St. P. & S. S. M., 107 I. C. C. 658.

(3j) Upon further hearing, rate on wrapping paper from Madison, Me., to New Hope, Pa., found unreasonable to extent that proportional rate comprising factor to Brunswick, Me., exceeded lower proportional rate from Enfield, Howland, Montague, and Lincoln, Me., farther distant points, which lower rate was established from Madison subsequent to movements here involved. Reparation awarded. To this extent former report, 88 I. C. C. 593, reversed. Universal Paper Bag Co. v. M. C., 107 I. C. C. 661.

(3k) Rates on linoleum, oilcloth, and paper-felt carpeting from Philadelphia and other eastern points to Memphis, Tenn. found not unreasonable or otherwise unlawful as compared with rates on like traffic from same points to St. Louis and from and to other points for comparable distances. Memphis Freight Bureau v. A. C. L., 109 I. C. C. 31.

(3l) Rates on black sheet steel, c. l. and l. c. l., from Lynchburg, Va., to Nashville, Ga., found not unreasonable as compared with lower contemporaneous rates on like traffic from Lynchburg to Sparks, Moultrie, and Valdosta, Ga., farther distant competing points. Lynchburg Chamber of Commerce v. G. & F., 109 I. C. C. 39.

(3m) El Paso, Tex.: Upon further hearing, findings in original report 85 I. C. C. 425, that rates on asphalt, in barrels, from Richmond and El Segundo, Calif., to El Paso, Tex., were unreasonable to extent they exceeded lower rates from same origin points to Albuquerque, N. Mex., and Denver, Colo., reversed as to Richmond and affirmed as to El Segundo. Reparation awarded on shipments from El Segundo. El Paso Bithulithic Co. v. E. P. & S. W., 109 I. C. C. 42.

(3n) Rates on lumber from Cornwall, Va., to destinations in Pennsylvania and to Boston, found not unreasonable or otherwise unlawful as compared with lower contemporaneous rates on like traffic from Hotchkiss, Va., to same destinations, which lower rates were subsequently established from Cornwall. South River Lbr. Co. v. N. & W., 109 I. C. C. 173.

(3o) Mere fact that as a result of general readjustment in rates certain rates from a given point were reduced does not warrant a finding that higher rates were unreasonable. South River Lbr. Co. v. N. & W., 109 I. C. C. 173, 175.

(3p) Spocari, Ala.: Rates on gypsum rock from Plasterco and Saltville, Va., to, found unreasonable as compared with rates to Chattanooga, Tenn., and Birmingham and Leeds, Ala., competing points, and to extent they exceeded rates subsequently established to Spocari. During period of idleness when operations of complainant's plant at Spocari were suspended, the rate adjustment thereto in its relation to rates to competing points became disrupted, and upon resumption of operations was not restored until after shipments here involved had moved. Present rates found not unreasonable or otherwise unlawful. Reparation awarded. Gulf States Portland Cement Co. v. N. & W., 109 I. C. C. 231.

(3q) Rates on lumber from points in Washington, Oregon, Idaho, Montana, and British Columbia, to Lincoln and Omaha, Nebr., and other points in Nebraska, Kansas, Missouri, Iowa, and South Dakota, found not unreasonable during period when such rates were on basis higher than to Twin Cities. These rates were formerly on a parity, the equalization being disrupted by application of general reductions required in Reduced Rates, 1922, 68 I. C. C. 676, which rate parity carriers subsequently restored. Rates assailed, however, are shown to compare favorably with rates from the Northwest to various points for substantially equal or greater distances. Adams & Kelly Co. v. A., T. & S. F., 109 I. C. C. 241.

(3r) Rate on overalls, l. c. l., from Middlesboro, Ky., to Tupelo, Miss., found not unreasonable or unduly prejudicial as compared with rate from same point to Memphis, Tenn., and various other points in Mississippi for comparable distances. Northeast Miss. Traffic Bureau v. M. & O., 109 I. C. C. 246.

(3s) Rates on molding sand from Ottawa and Utica, Ill., to Keokuk, Iowa, found improperly related to rates to Burlington, Iowa, Quincy, Ill., and other Mississippi River crossings, resulting in undue prejudice to Keokuk in favor of such other crossings. Relationship of rates prescribed for future and reparation denied. Keokuk Shippers' Asso. v. B. & O., 109 I. C. C. 346.

(3t) Rate on manure from Harlem River, N. Y., to North Hatfield, Mass., via a route embracing the New York,

New Haven & Hartford and Boston & Maine Railroads, found unreasonable to extent it exceeded lower rate contemporaneously in effect from and to the same points in connection with the New York Central and Boston & Maine. Reasonable rate for the future prescribed and reparation awarded. American Sumatra Tobacco Co. v. N. Y., N. H. & H., 109 I. C. C. 383.

(3u) Rates on sirup and molasses, in straight carloads, and on sirup, molasses, and preserves, in mixed carloads, from Kansas City, Mo., to destinations in Kansas, found not unreasonable or otherwise unlawful as compared with rates from St. Louis and Chicago. While Kansas City has an advantage in distance and the St. Louis rates are a lesser percentage of fifth class than are those from Kansas City, the former bear no fixed relationship to class rates. Complainant's difficulties in meeting competition at St. Louis and Chicago are due to fact that it obtains its raw material at points east of Kansas City, paying inbound freight charges thereon, whereas its competitors either manufacture their own raw material or secure it where their plants are located. Bliss Syrup Refining Co. v. A., T. & S. F., 109 I. C. C. 391.

(3v) Rates on iron, steel, tin, and galvanized cans from Kansas City to Fort Smith, Ark., Wichita, Kans., and Sioux City, Iowa, found not unreasonable or otherwise unlawful as compared with rates on tin cans from Kansas City and other origin points to various destinations for comparable distances. Gille Mfg. Co. v. K. C. S., 109 I. C. C. 408.

(3w) Class C rates on excelsior cushions, mats, or pads from Oshkosh and Rice Lake, Wis., to Ft. Smith, Ark., found unreasonable as compared with rates contemporaneously applicable to Chicago, St. Louis, Kansas City, and other competing cities in western classification territory to which excelsior pads from Wisconsin move at commodity rates lower than class C, and to extent they exceeded rates constructed by application of the rates prescribed in 100 I. C. C. 274, for distances here involved, with the addition of an arbitrary, excelsior pads over excelsior, of 3.5 cents. Reasonable rates for the future prescribed and reparation awarded. Ballman-Cummings Furniture Co. v. C. & E. I. Ry., 109 I. C. C. 413.

(3x) Rates on crude feldspar from certain points in New Hampshire to Manchester, Conn., found unreasonable as compared with rates from same origin points to Trenton and East Liverpool, from Bowdoinham, Me., to Buffalo and Trenton, with rates on crushed stone and other commodities in same general territory which are relatively lower, distance considered, and with rates found reasonable on crude feldspar from Keene and Rumney, N. H., to Trenton. Reasonable rates prescribed for the future and reparation awarded. Orford Soap Co. v. B. & M., 109 I. C. C. 434.

(3y) Combination rates assessed on forest products and naval stores from Barth, Kiln, and Loretta, local points on the Mississippi Southern R. R. a short-line carrier, to interstate destinations, and on coal from interstate points to above-named stations, found not unreasonable as compared with lower blanket rates contemporaneously maintained from and to Lumberton, the junction point, and adjacent points in Mississippi Valley territory, which lower rates were subsequently established as through rates from and to Kiln, Barth, and Loretta. Reparation denied for any undue prejudice which may have existed in the past, no such proof of damage as is required to sustain an award of reparation under such a finding having been furnished. Hines Yellow Pine Trustees v. A., C. & Y., 109 I. C. C. 453.

(3z) Class rates on ginger ale, root beer, and mineral water, l. c. l., from Tazewell, Va., to points in West Virginia on the Virginian and Kanawha, Glen Jean & Eastern Railways, and on empty bottles, l. c. l., returned from those points to Tazewell, found not unduly prejudicial or discriminatory, but unreasonable as compared with rates accorded other Virginia and West Virginia points. Reasonable distance scale of rates prescribed for future. Was-Cott Corp. v. K., G. J. & E., 109 I. C. C. 468.

(4a) Class rate assessed on sporadic shipments of green salted hides from Moultrie, Ga., to Elsmere Junction, Del., found unreasonable as compared with lower commodity rates contemporaneously in effect from various points in Georgia, Alabama, and Florida to Elsmere Junction and to Philadelphia, New York, and Boston, and to extent it exceeded lower commodity rate subsequently established. Reparation awarded. Barr & Dougherty v. G. N., 109 I. C. C. 487.

(4b) Rate on monumental granite

from Montello, Wis., to Muscatine, Iowa, found not unreasonable or otherwise unlawful as compared with lower rates on building or paving stone, rough or dressed, not carved, lettered, polished, or traced, to Muscatine from Montello, Oshkosh, and Eau Claire, Wis., and from Rhinelander and Menominee, Mich. Comparisons submitted are not persuasive since unsupported by evidence concerning relative transportation characteristics of the kinds of stone on which they apply and of monumenal granite. Moreover, there is no movement of stone from Rhinelander, and rate from Menominee applies on a class of stone which is not competitive with that received by complainant. Olson v. M., St. P. & S. S. M., 109 I. C. C. 526.

(4c) Rate on crude feldspar from DeKalb Junction, N. Y., to Manchester, Conn., found unreasonable as compared with rates contemporaneously in effect on same commodity between various points for comparable distances and to extent it exceeded rate from DeKalb Junction to Trenton, N. J. Reasonable rate prescribed for future and reparation awarded. Green Hill Mining Co. v. N. Y. C., 109 I. C. C. 632.

(4d) Rate on crude feldspar, minimum weight 40,000 pounds, from DeKalb Junction to Cleveland, Ohio, found unreasonable as compared with lower rates from Keene, N. H., and Penland, N. C., competing points, and with rates prescribed in Ceramic Traffic Asso., 92 I. C. C. 675, for application from producing points in New England to Trenton, N. J. Reasonable rate, minimum weight marked capacity of car, prescribed for future and reparation awarded. Green Hill Mining Co. v. N. Y. C., 109 I. C. C. 643.

(4e) Rates on candle pitch from New York, N. Y., to Lancaster, Pa., found not unreasonable as compared with rates contemporaneously in effect on same commodity between various points for comparable distances. Armstrong Cork Co. v. P. R. R., 109 I. C. C. 655.

(4f) Relation of rates on canned goods from Illinois freight association territory to certain west-bank Misisssippi River points in that territory on the one hand, and from Illinois territory to Chicago, Peoria, and St. Louis, on the other, found not unduly prejudicial to river cities. While general level of rates to alleged preferred points is lower, mere showing of differences in inbound rates to competing jobbing points does not establish undue prejudice. No definite showing is here made with respect to character or intensity of competition encountered, the specific effect of rate relationship upon such competition, or extent to which conditions affecting transportation to the respective jobbing points are properly comparable. Burlington Shippers Asso. v. A., T. & S. F., 109 I. C. C. 694.

(4g) Illinois territory: Rates on canned goods from Illinois freight association territory to certain west-bank Mississippi River points in that territory found not unreasonable as compared with rates on cereal beverages in Illinois territory, or with cereal-beverage rates and canned-goods rates in western trunk-line and c. f. a. territories, except to extent they exceeded fifth class. Transportation conditions in Illinois are not shown to be more favorable than in c. f. a. territory, and prescription of rates lower than fifth class would be based not on transportation conditions but on existence of commodity rates voluntarily established by carriers to meet competitive conditions, and which they regard as too low. Burlington Shippers' Asso. v. A., T. & S. F., 109 I. C. C. 694.

(4h) Applicable rate on clean rice from Galveston, Tex. to Bluefield, W. Va., found not unreasonable as compared with rates from Lake Charles and New Orleans, La., to eastern points, or with rates subsequently established when Galveston and Lake Charles were placed on a rate parity on this traffic moving to Bluefield over various routes. There is no fixed relationship on clean rice from these origin points to eastern destinations, and any change in rate from Galveston without a corresponding change from other points in same group would result in disruption not warranted by the record. Seaboard Rice Milling Co. v. A. G. S., 109 I. C. C. 718.

(4i) Sixth-class rates on sand and gravel from La Fayette, Ind., in connection with the Wabash, Illinois Central, B. & O., Kankakee & Urbana, and Illinois Traction, to specified points in Illinois, found unreasonable as compared with rates from Attica, Ind. Maximum reasonable joint commodity rates prescribed for future. Western Indiana Gravel Co. v. N. Y., C. & St. L., 109 I. C. C. 727.

(4j) Rates on meat animals from points in Alabama to Moultrie, Ga., found

not unreasonable, but the relationship of rates on hogs from southeastern Alabama to Moultrie, on the one hand, and Montgomery and Birmingham, Ala., on the other, found unduly prejudicial and preferential and unjustly discriminatory against interstate commerce. Nonprejudicial relationship prescribed for future. Swift & Co., v. G. N., 109 I. C. C. 733.

(4k) Relationship between rates on coal, Birmingham district on one hand, and western Kentucky and southern Illinois districts on the other, to destinations in Tennessee, Alabama, Mississippi, Louisiana, Arkansas, and Texas, found unduly prejudicial to Birmingham district, and unduly preferential of Kentucky and Illinois districts. Nonprejudicial differential relationship in favor of Birmingham district, prescribed. Alabama Mining Institute v. I. C., 109 I. C. C. 740.

(4l) Rate assessed on fresh peaches from Quincy, Pa., to Jacksonville, Fla., found not unreasonable or otherwise unlawful as compared with rates on like traffic from producing points in same general territory to same and other destinations for comparable distances. Nooney & Co. v. P. R. R., 112 I. C. C. 35.

(4m) Rates on wooden railroad ties from Argyle, Canaan, Rosebud, and Bagnell, Mo., to Rapid City, S. Dak., found not unreasonable or otherwise unlawful as compared with rate on like traffic from St. Louis to same destination and with rates from and to other points for comparable distances. Abeles & Taussig Lbr. & Tie Co. v. C., R. I. & P., 112 I. C. C. 62.

(4n) Rates on coke from St. Louis to destinations in Colorado, Iowa, Kansas, Missouri, and Nebraska found unreasonable as compared with rates from Chicago and Birmingham, competing points shipping to same destinations. Warren Coke Co. v. A., T. & S. F. Ry., 112 I. C. C. 71.

(4o) St. Louis territory group rates applicable at time of movement on fire brick from Wellsville, Mo., to certain points in Oklahoma and Texas, found unreasonable to extent they exceeded Mexico, Mo., group rates contemporaneously in effect and subsequently established Shipper at Wellsville was in direct competition with manufacturers in the Mexico group; in order to market its product at these destinations it was forced to meet prices of those competitors, and shipments here were sold without profit. Only possible profit was to be obtained through promised refunds from carriers after publication of the Mexico basis. Reparation awarded. Wellsville Fire Brick Co. v. Director General, 112 I. C. C. 98.

(4p) Rate on sand from Michigan City, Ind., to points on connecting lines in Chicago, Ill., switching district, found not unreasonable or unduly prejudicial as compared with lower rates from Dune Park, Aetna, Millers, and Gary, Ind., and other near-by competing producing points. The comparisons, based merely upon differences in distance do not constitute sufficient justification for a finding either of unreasonableness or of undue prejudice, the differential between Michigan City and alleged preferred points is less than that prescribed by commission between the inner and outer zones, Michigan City having been found to be properly included in the higher 52-mile scale, whereas alleged preferred points are in the lower 35-mile scale, indicating that alleged preferred points are entitled to advantage of their location. Furthermore, certain of these points are not served by same carriers serving Michigan City. Bos Sand Co. v. A., T. & S. F., 112 I. C. C. 121.

(4q) Rate on copperas moving via interstate route from Farrell to Easton, Pa., found not unreasonable, as compared with rates from and to other points, or with lower rate contemporaneously maintained from New Castle, Pa., to Easton, the latter being subsequently made applicable from Farrell by incorporation of an intermediate clause in tariff. Distance over route of movement was substantially greater than short-line distance between origin and destination, and subsequently established rate was compelled by carrier competition. Williams & Co. v. L. V., 112 I. C. C. 171.

(4r) Rates on printing paper from Providence, Md., and Wilmington, Del., to Richmond, Va., found unreasonable as compared with rates from and to various points for comparable distances. Reparation awarded. Jessup & Moore Paper Co. v. B. & O., 112 I. C. C. 174.

(4s) Rates and minimum weights on strawberries and cabbage from points in Kentucky and Tennessee to Kalama-

zoo, Battle Creek, Sturgis, and Coldwater, Mich., found unreasonable and unduly prejudicial to extent they exceed those contemporaneously applicable to Grand Rapids, Mich. Reparation awarded. Lewis Co. v. L. & N., 112 I. C. C. 213.

(4t) Upon further hearing, former report, 93 I. C. C. 593, reversed, and rate on rough staves and headings from Bonita, La., to Louisville, Ky., found unreasonable to extent it exceeded lower group rate contemporaneously maintained from a large number of stations to which Bonita is closely related, the lower rate being established by carriers from Bonita subsequent to movement. Reparation awarded. Louisville Cooperage Co. v. L. & N., 112 I. C. C. 228.

(4u) The mere fact that a rate under attack appears to be out of line with a few other related rates does not necessarily prove rate attacked unreasonable. Louisville Cooperage Co. v. L. & N., 112 I. C. C. 228, 229, 230.

(4v) Combination rates on coal from Colorado and northern New Mexico producing districts to local points in State of Kansas on the Frisco, Katy, and Midland Valley railroads found unreasonable and unduly prejudicial as compared with joint rates maintained to destinations on other lines in same general Kansas territory. Kansas Public Utilities Comm. v. A., T. & S. F., 112 I. C. C. 235.

(4w) Rate on mine cars from Chattanooga, Tenn., to Carbon Hill, Ala., found unreasonable as compared with rates contemporaneously in effect from Chattanooga and other points of origin to numerous points in same general destination territory. Reasonable rate prescribed for future and reparation awarded. Gustafson Mfg, Co. v. St. L.-S. F., 112 I. C. C. 277.

(4x) Rates on potatoes from Pocomoke, Md., and various points on eastern shore of Virginia to Jacksonville, Fla., found unreasonable, as compared with rates from various origin points to same destination for comparable distances, and to extent they exceeded lower group rate contemporaneously in effect in New York. Origin points here under consideration are usually located in New York group, and carrier subsequently established such rates therefrom. Reparation awarded. Hulsey-Bessent Co. v. P. R. R., 112 I. C. C. 317.

(4y) Rates on ties from Bealeton, Brandy, Culpeper, Remington, and Warrenton, Va., to Canton, Ohio, found not unreasonable as compared with rates from various other Virginia points to Canton and other destinations in Ohio for comparable distances. Lafayette Lbr. Co. v. S. Ry., 112 I. C. C. 341.

(4z) Refined-oil rate assessed on petroleum refined-oil distillate having a specific gravity in excess of 36°, from Casper, Wyo., to Sioux City, Iowa, found not unreasonable. While the oil here shipped is much lower in value than that of various commodities on which refined-oil rates apply, such as kerosene and gasoline, the rates charged compare favorably with those on low-grade oils from Casper and Tulsa, Okla., to various destinations for comparable distances, and with rates found reasonable by the commission in other cases. Sioux City Gas & Elec. Co. v. C., B. & Q., 112 I C. C. 344.

(5a) Relationship of fuel-oil rates from southern California to Arizona with those from the mid-continent field to the same destinations found not unduly prejudicial, with exception of rates from Galveston and other Texas points to Douglas and Bisbee, Ariz. If rates from California and mid-continent fields into Arizona were constructed strictly according to relative distances, as California would have them, the only logical result would be to deprive mid-continent producers from competing in this territory, provided the price of fuel oil in the two fields is anywhere near same. Associated Oil Co. v. A. E. R. R., 112 I. C. C. 350.

(5b) Rates on fuel oil from the mid-continent field and from southern California to destinations in Arizona and New Mexico, distance considered, found not unreasonable per se or relatively. Rates from the mid-continent field not only compare favorably with those from California from standpoint of intrinsic reasonableness but they also compare favorably with rates to other territories to which the rate levels are as a rule considerably lower than on traffic to Arizona. Associated Oil Co. v. A. E. R. R., 112 I. C. C. 350.

(5c) Rates on rosin from points in the South and Southeast to Hamilton, Ontario, Canada, found not unreasonable, unduly prejudicial, or otherwise unlawful as compared with rates to Buffalo, N. Y.

The present rates on this traffic resulted from relatively low rates established following the decision in Naval Stores from Southern Points, 87 I. C. C. 740, and 89 I. C. C. 634, and there is nothing of record to show that rate factors to or beyond either Cincinnati or Buffalo are unreasonable. Proctor & Gamble Co. v. A. & V., 112 I. C. C. 381.

(5d) Rate on ground limestone from Cartersville, Ga., to Cuyahoga Falls, Ohio, found unreasonable to extent it exceeded lower rate contemporaneously in effect to Cleveland, Ohio, a farther distant point, which lower rate was established to Cuyahoga Falls subsequent to movement. Thompson, Weinman & Co. v. W. & A., 112 I. C. C. 395.

(5e) Rate on barrel staves and headings from Camden, Ala., to Pensacola, Fla., found not unreasonable or unduly prejudicial as compared with somewhat lower rates from numerous Alabama and Florida points to Pensacola, New Orleans, La., Gautier, Miss., and Birmingham, Montgomery, and Tuscaloosa, Ala. Rate assailed is substantially lower than on lumber, staves, and headings between numerous points in the South for hauls of comparable distances, and is less than normal basis of rates on these commodities in southern territory. Pensacola Cooperage Co. v. L. & N., 112 I. C. C. 401.

(5f) Rate on printing paper other than newsprint from Spring Grove, Pa., to Nashville, Tenn., found unreasonable and unduly prejudicial to extent it exceeded the rate contemporaneously in effect from Luke, Md., Piedmont, W. Va., and Williamsburg, Tyrone, and Roaring Spring, Pa., to same destination. Reasonable rate for future prescribed and reparation awarded. Clements Paper Co. v. T. C., 112 I. C. C. 411.

(5g) Rates on gasoline and other so-called refined oils from mid-continent Group 2 points to St. Joseph, Mo., found unreasonable and unduly prejudicial to extent they exceed rates contemporaneously maintained from same points of origin to Kansas City, Mo. Reasonable and nonprejudicial basis of rates prescribed. Midcontinent Oil Rates, 1925, 112 I. C. C. 421, 473, 474.

(5h) Upon further consideration, original report, 96 I. C. C. 485, modified and rates on gasoline from Tulsa and grouped points in Oklahoma to destinations in Indiana found unreasonable and unduly prejudicial as compared with rates from same origin points to Chicago and other Illinois destinations. In view of substantial similarity of transportation conditions in Indiana and Illinois, there is no warrant for maintenance of higher rates to points in western Indiana than to Chicago and other Illinois points taking same rates. Concurrently, rate on fuel oil and other products taking same rates from same origins to same destinations found unreasonable to extent they exceeded 80 per cent of the contemporaneous rates on gasoline. Reasonable and nonprejudicial rates prescribed for future. Indiana State Chamber of Commerce v. A., T. & S. F., 112 I. C. C. 481.

(5i) Combination rates, component factors of which are joint rates, assessed on gasoline moving from Peckham, Okla., to Port Arthur, Ontario, Canada, found not unreasonable or otherwise unlawful, due to factor beyond Duluth, or as compared with lower rates contemporaneously maintained to Winnipeg. In an endeavor to establish unreasonableness, complainant showed distances and rates on gasoline from Peckham to North Dakota points and on various commodities moving from Duluth to Port Arthur. However, competition met by shippers at Winnipeg is due to fact that oil is shipped by tank steamers on Lake Superior, carrier competition and equalizing of commercial advantages between neighboring destination points being controlling elements in establishing petroleum rates to the Northwest. Northwestern Oil Co. v. St. L.-S. F., 112 I. C. C. 488.

(5j) Rate on crude sulphur from Freeport, Tex., to Elyria, Ohio, located in Detroit-Cleveland group, found unreasonable to extent it exceeded lower rate contemporaneously in effect to other Reparation awarded. Stauffer Chemical Co. of Tex. v. H. & B. V., 112 I. C. C. 495.

(5k) Third-class rates on wine in bulk in barrels, and in tank cars from St. Louis, Mo., and Sandusky, Ohio, to Brooklyn, N. Y., found not unreasonable as compared with fourth-class rates contemporaneously in effect to Brooklyn from various other origin points for comparable distances. Garrett & Co. v. N. Y. C., 112 I. C. C. 519.

(5l) Rate on tin-plate scrap found unreasonable and reasonable rate for future prescribed. While rate on this commodity is equal to that on scrap iron and billets, revenues on the latter are mate-

rially greater because of heavier car loadings. Scrap tin plate is a refuse of little intrinsic value and can move only under a rate relatively low as compared with articles usually classed as junk. See points in that group, which lower rate was subsequently established to Elyria. also 21 I. C. C. 93. Reparation awarded. Metal & Thermit Corp. v. C. R. R. Co. of N. J., 112 I. C. C. 523.

(5m) Rates on coal from Christopher, Ill., to Malvern, Iowa, found unreasonable as compared with rates contemporaneously in effect from Illinois and Kentucky points to various destinations over routes involving substantially similar hauls and operating conditions. Green Bay Lumber Co. v. C. B. & Q., 112 I. C. C. 562, 563.

(5n) Applicable rate on cottonseed linters from Memphis to Chicago found unreasonable to extent it exceeded lower joint rate contemporaneously in effect on cotton-hull fiber or shavings and on second-cut linters to Chicago from Bridge Junction, Ark., 3 miles west of Memphis, via which city this rate applied all rail. Reparation awarded. Stern-Kauders Co. v. U. S. War Dept., 112 I. C. C. 580.

(5o) Rate on face brick from Wichita Heights, Kans., to Wellington, Texas, found unreasonable to extent it exceeded the joint-line rate on face and other kinds of brick for like distances under the so-called 9702 distance scale prescribed for application throughout southwestern territory, as subsequently extended. The lower rate sought compares favorably with rates for equal distances from Kansas to Oklahoma and Texas, with rates from various points in Texas to Wellington, and with joint-line rates under intrastate distance scales applying in Kansas, Oklahoma, Arkansas, and Missouri. Reparation awarded. Reliance Brick Co. v. St. L.-S. F., 112 I. C. C. 619.

(5p) Combination rate on canned vegetables, in tin and glass, moving from Albion, N. Y., by rail to Baltimore, thence via water to Jacksonville, Fla., found not unreasonable, or otherwise unlawful, as compared with lower joint rates from Mount Morris and other New York points to Jacksonville and Savannah, when moving by rail to Baltimore and water beyond. Zaring & Co. v. N. Y. C., 112 I. C. C. 621.

(5q) Rates on newsprint paper from Millwood, Wash., to Dallas, Texas, found not unduly prejudicial but unreasonable as compared with lower rates contemporaneously in effect from producing points in Ontario, Canada, and in Minnesota, Wisconsin, Michigan, Indiana, and Maine to Texas, Louisiana, Arizona, California, and Oregon, for comparable distances, and to extent they exceeded those found reasonable in Wortham-Carter Publishing Co., 102 I. C. 729. Reparation awarded. West-Cullum Paper Co. v. A. T. & S. F., 112 I. C. C. 641.

(5r) Rate on coke from Brookwood, Dolcito Junction, and Bradford, Ala., located in Birmingham district, to Collinsville, Okla., found unreasonable as compared with rates to other destinations for comparable distances and to extent it exceeded rate to Tulsa, Okla., the Tulsa rate being subsequently voluntarily established by carriers to Collinsville. Reparation awarded. Oil Well Improvement Co. v. A. T. & S. F., 112 I. C. C. 705.

(5s) Sixth-class rate on woven wire fencing from Fairfield, Ala., to Americus, Ga., found unreasonable, but not unduly prejudicial as compared with lower rates contemporaneously maintained to Macon and Atlanta, Ga., farther distant points, or with commodity rates from the Birmingham district to eastern destinations, Ohio River crossings, Virginia and Tennessee cities, and to extent they exceeded the special-iron basis subsequently established. Reparation awarded. Sheffield Co. v. B. S., 112 I. C. C. 729.

(5t) Local and joint class rates between points in Arizona, on the one hand, and points in California, New Mexico, and El Paso, Texas, on the other hand, found unreasonable. Rates assailed are materially higher than those prescribed in 21 I. C. C. 640, and 74 I. C. C. 207, for application in the Pacific Northwest and at present in effect throughout the northern half of the Mountain Pacific group. Operating and transportation conditions in territory here under consideration compare favorably with those in much of the territory in which the lower rates apply. Temporary scale of distance rates prescribed which will accord the Pacific Southwest substantially same scale of rates as now applies in the Pacific Northwest. Arizona Corp. Commission v. A. E., 113 I. C. C. 52.

(5u) Combination rate applicable on wheat from St. Francis, Kans., to Kansas City, Mo., there stored and reforwarded to Wausau, Wis., found unreasonable as compared with rates from St. Francis to points beyond Kansas City for comparable distances, and to extent it exceeded a lower rate contemporaneously in effect from St. Francis to South Omaha, and from St. Francis to Wausau over a route other than route of movement. Reparation awarded. Hodgson-Davis Grain Co. v. C. B. & Q., 113 I. C. C. 234.

(5v) Rates on green or green salted hides, pelts, skins, grease, and tallow, in straight or mixed carloads, from Norfolk, Nebr., to Chicago, Ill., and points taking the same rates, found unreasonable as compared with lower rates contemporaneously accorded competing cities in Kansas, Nebraska, Iowa, Minnesota, and the Dakotas. No transportation conditions justify the charging of a relatively higher basis of rates from points in Nebraska, such as Norfolk, west of Nebraska differential territory, than from points within that territory, and fact that carriers apply differential basis from certain Nebraska points and a higher combination basis from other points explains or accounts for difference in rates but affords no justification therefor. Reparation awarded. Robinson v. A. T. & S. F. Ry., 113 I. C. C. 280.

(5w) Rates on canned sirup from Montgomery, Ala., to Tampa, Fla., found unreasonable as compared with lower rates contemporaneously in effect from New Orleans, Memphis, and Nashville, to same destinations. Alabama-Georgia Syrup Co. v. A. C. L., 113 I. C. C. 283.

(5x) Proposed general revision of rates on potatoes, increases predominating, from points in Wisconsin and elsewhere in western trunk-line territory to destinations in southeastern Missouri, found not justified. While proposed rates are shown to be reasonable as compared with rates in other territories, the reverse is true when compared with lower rates, distance considered, not only to farther distant destinations in Arkansas but also to intermediate destinations in southeastern Missouri where observance of the fourth section requires maintenance of the rates to the Arkansas destinations. Also when compared with rates from same territory of origin to destinations in southwestern Missouri and Kansas. Potatoes to Missouri, 113 I. C. C. 289.

(5y) Rates on grain from points in northern Illinois and southern Wisconsin on certain lines of the Illinois Central and C., B. & Q. railroads to Chicago, Ill., district, and on feed in reverse direction, found not unreasonable or unduly prejudicial as compared with rates on those commodities from same origin points to other Illinois, Missouri, Indiana, Kentucky, and Ohio destinations. Disadvantage of Chicago district is primarily one of location, shippers there located seeking to market feed against the flow of ingredients, in competition with manufacturers shipping with it. Moreover, rates assailed are for most part local rates, and under circumstances of this case their reasonableness may not be tested by comparisons with proportional rates, and fact that local rates on feed lower than on grain are maintained to a few points is not convincing that same basis should be extended to all points. Chicago Board of Trade v. C., B. & Q., 113 I. C. C. 295.

(5z) Upon investigation by commission on its own motion into and concerning the general basis of rates on fertilizer and fertilizer materials in southern territory, FOUND: That in view of characteristics of this traffic it is reasonably entitled to a relatively low basis of rates. Maximum reasonable rates based on a distance scale prescribed for uniform application over standard lines, and certain so-called short or weak lines accorded arbitraries or a percentage over such prescribed standard line rates. Fertilizers between Southern Points, 113 I. C. C. 389.

(6a) Rates on lumber, egg-case material, box lumber, and shooks, from Caruthersville, Mo., to points in Iowa, South Dakota, Minnesota, Wisconsin, and Illinois, found unreasonable and unduly prejudicial in comparison with rates contemporaneously maintained from Cairo to same destinations. Similar rates to Kansas and Nebraska destinations found not unreasonable or otherwise unlawful as compared with those from Memphis, average distances and rates from Caruthersville and Memphis appearing to be substantially the same. Reasonable and nonprejudicial rates, Caruthersville differentially over Cairo, prescribed and reparation awarded. Dillman Egg Case Co. v. A., T. & S. F., 113 I. C. C. 447.

(6b) Millinocket and East Millinocket, Me.: Applicable combination

rates on newsprint paper from, to Providence, South Providence, and Pawtucket, R. I., found unreasonable as compared with lower rate on newsprint from Howland and Woodland, Me., to same destinations, and to extent they exceeded combinations composed of proportional commodity rate on printing paper to Northern Maine Junction plus the sixth-class rate beyond. Reparation awarded. Great Northern Paper Co. v. B. & A., 113 I. C. C. 463.

(6c) Rates on eggs from points in Oklahoma, Kansas, Missouri, and Nebraska, to Laredo, located in Texas differential territory, found not unreasonable, discriminatory, or unduly prejudicial as compared with rates contemporaneously maintained to Houston, San Antonio, Corpus Christi, and other destinations in Texas common-point territory. Present rates to Laredo were established as part of a general adjustment voluntarily made to meet rates to Brownsville and other points in the Rio Grande Valley and were found to be just and reasonable as maxima in 81 I. C. C. 703. Moreover, voluntary reduction of a rate is not of itself evidence of the unreasonableness of the rate so reduced, nor does record support a finding that Laredo is entitled to a rate adjustment different from that now accorded other points in differential territory. Sames, Moore & Co. v. A., T. & S. F., 113 I. C. C. 501.

(6d) Rates on grain and products from C. & E. I. R. R. stations, through Indianapolis, to Louisville, on traffic destined to southeastern points, and transit arrangements in connection therewith at Indianapolis, found not unreasonable or otherwise unlawful as compared with lower proportionals over same carrier to Princeton, Ind., and thence in connection with the Southern Ry. beyond. The proportionals are part of an equalization scheme whereby Louisville and Evansville, as gateways, are kept on a parity, were established primarily in interest of economical operation, and do not constitute a proper measure for rates through Indianapolis. Their cancellation would not benefit Indianapolis interests, whereas, their publication through that point would deprive the C. & E. I. of its long haul, which, in absence of a convincing showing of public interest and necessity, should not be required. Moreover, carriers show that rates assailed are low as compared with those from same origin points to destinations in Ohio and Michigan for similar distances. Indianapolis Board of Trade v. L. & N., 113 I. C. C. 508.

(6e) Rates on flaxseed from Montana and North Dakota points to Portland, Ore., found not unreasonable as compared with rates on wheat from and to same points or with equal rates maintained on these commodities between other points in same territory for comparable distances. Carriers show that from and to various points in this territory, for equal distances, flaxseed rates are in some instances higher and in others lower than to Portland. Moreover, in 107 I. C. C. 276, rates on grain and grain products, including flaxseed, and in some instances the rates here under attack, as a whole, were found not unreasonable or otherwise unlawful. Portland Linseed Oil Works v. G. N. Ry., 113 I. C. C. 528.

(6f) Rates on clay from certain points in Tennessee and Kentucky to Abingdon, Lincoln, Macomb, and Morton, Ill., found unreasonable as compared with rates to other points for comparable distances and to extent they exceeded lower rate subsequently established and equal to rate to Chicago. Reparation awarded. Abingdon Sanitary Mfg. Co. v. C. & N. W., 113 I. C. C. 556.

(6g) Rates on peaches and grapes from producing points in California to Hibbing, South Hibbing, Ely, Aurora, Virginia, Eveleth, Chisholm, and Gilbert, Minn., found unreasonable to extent they exceeded lower blanket rate contemporaneously in effect to Duluth. Reasonable rate prescribed for future and reparation awarded. Hansen-Peterson Co. v. A., T. & S. F., 113 I. C. C. 575.

(6h) Rates on cement from Security, Md., through the District of Columbia, to Maryland destinations served by Washington, Baltimore & Annapolis Electric R. R., and to stations on the old Annapolis Short Line, found not unreasonable. This electric line is what is known as a short line, essentially a suburban line, and rates from Security to its stations, here claimed to have been unreasonable, compare favorably with rates from complainant's immediate competitors located at Lehigh, York, and Union Bridge, Pa., and with rates on cement approved or prescribed by commission in former cases. Security Ce-

ment & Lime Co. v. B. & O., 113 I. C. C. 579.

(6i) Rates on bituminous coal from points in the Brazil-Clinton, Linton-Sullivan, Princeton, and Boonville groups in Indiana, to Hoopeston, Ill., found unreasonable as compared with rates from other Indiana and Illinois mines for comparable distances, rates from the Brazil-Clinton and Linton-Sullivan groups particularly being too high when tested by the Holmes & Hallowell scale prescribed in 69 I. C. C. 11, for application in a higher-rated territory. Reasonable rates prescribed for future and reparation awarded. Iliff-Bruff Chemical Co. v. C. & E. I., 113 I. C. C. 606.

(6j) Rates on coke from Appalachia, Stonega, and other producing points in Virginia and from Birmingham, Ala., to destinations in California found not unreasonable or unduly prejudicial as compared with rates from Chattanooga. Similar rates from Chattanooga found not unreasonable or discriminatory but following 104 I. C. C. 483, were unduly prejudicial to extent they exceeded the rates from the Birmingham district to the same destinations. Romann & Bush Pig Iron & Coke Co. v. I. R. R., 113 I. C. C. 622.

(6k) Rates to two competing points or groups may be within range of reasonableness and thus not in violation of section 1 of the act, but may be, nevertheless, improperly related and result in undue prejudice in violation of section 3. In such a case the Commission may, where warranted by the record, prescribe specific rates to one or both of the competing points in order to remove the undue prejudice. Ridenour Baker Mercantile Co. v. A., T. & S. F. Ry., 113 I. C. C. 629, 634.

(6l) Combination rates based on Suffolk, Va., and assessed on shipments of cotton moving from North Carolina points to Danville, Va., found unreasonable to extent they exceeded lower joint rates subsequently established and contemporaneously in effect during period of movement to Martinsville, Va., a farther distant point beyond Danville. Reparation awarded. Bradshaw-Robertson Cotton Co. v. A. C. L., 113 I. C. C. 661.

(6m) Rates on bituminous coal from points in southern Illinois and western Kentucky to points in southeastern Missouri and northeastern Arkansas found unreasonable as compared with rates to St. Louis, Crystal City, Ste. Genevieve, St. Marys, Cape Girardeau, Illmo, and Chaffee, Mo. Reasonable rates prescribed for future and reparation awarded. Scott County Milling Co. v. B. C. R. R., 113 I. C. C. 675.

(6n) Rates on evaporated milk from Pecatonica, Ill., to points in trunk-line territory, found not unreasonable, discriminatory, or unduly prejudicial as compared with lower rates from Wisconsin points to same destinations. Points in Wisconsin enjoying rates lower than Pecatonica are located near Lake Michigan, such rates are influenced by carferry routes, and compare favorably with rates assailed. Milk Producers Cooperative Co. v. B. & O., 113 I. C. C. 721.

(6o) Class rates on barrel shooks from Rahway, N. J., to New York Harbor, which entail lighterage service, found not unreasonable as compared with other rates from and to same points including lighterage, on various commodities differing in transportation and other characteristics, or with rates for comparable distances on lumber and articles taking same rates, including barrel shooks, which do not include such service. Assailed rates compare favorably with commodity rates for similar distances from a number of New Jersey points to destinations on Long Island and South Brooklyn over routes which entail movement by car float across the Harbor. Hamilton v. P. R. R., 113 I. C. C. 723.

(6p) Rate on slack coal from points in the Oak Hills district, Colo., on the Denver & Salt Lake R. R., to Superior, Nebr., found not unreasonable. Complainant relies on comparisons of rates to same destination from the Walsenburg and other districts, and seeks reparation on slack coal to a basis of rates lower than on lump coal. Little consideration, however, was given to difficulties under which the Moffat road labors, and complainant erroneously contended that an unfair relationship existed between the Oak Hills and the Walsenburg and other districts. Nebraska Cement Co. v. C., B. & Q., 113 I. C. C. 729.

(6q) Fourth class all-rail rate on sole leather from Bridesburg (Philadelphia), Pa., to Boston, found not unreasonable or otherwise unlawful as compared with lower commodity rate from competing

points in western Pennsylvania. Western Pennsylvania points from which lower commodity rate applies are west of the Harrisburg-Williamsport line of the Pennsylvania and in some instances are served by other carriers having more direct routes to Boston than the Pennsylvania affords. Continental Leather Co. v. P. R. R., 113 I. C. C. 745.

(6r) Rate on printed paper, l. c. l., from Cincinnati, Ohio, to Lynchburg, Va., found unreasonable to extent it exceeded third class, the basis found reasonable in official classification territory in 96 I. C. C. 280. Reasonable rate prescribed for future and reparation awarded. Lynchburg Chamber of Commerce v. N. & W., 115 I. C. C. 27.

(6s) Fifth class rate on pickles, in brine, from points in Ohio, Indiana, and Michigan, to Toledo, Ohio, found not unreasonable or discriminatory, but unduly prejudicial, in that competitive companies in Chicago district and certain Michigan cities were favored with a lower commodity rate. Transportation conditions throughout territory involved are substantially the same and with but few exceptions pickles move at the fifth-class rate. Where such conditions exist commission is not disposed to allow rates from a comparatively limited section to control general basis of rates applicable throughout that general territory in absence of a clear showing that such rates are too high. Harbauer Co. v. A. A. R. R., 115 I. C. C. 30.

(6t) Combination rates on automobiles from Detroit, Flint, and North Flint, Mich., and on plumbers' supplies from Noblesville, Ind., to Birmingham, Ala., found not unreasonable as compared with lower joint rates subsequently established, or with rates to south Atlantic and Gulf ports. Rates from Ohio River to south Atlantic and Gulf ports are subnormal, being induced by competition over which rail lines have no control. For many years the prevailing basis for rate making to points south of the Ohio River has been the combinations on the crossings and joint through rates subsequently established were constructed on that basis. Moreover, rates assailed to Birmingham compare favorably with those to such inland points as Atlanta, Gainesville, Macon, and Rome, Ga., and Montgomery, Alabama City, and Tuscaloosa, Ala. Birmingham Traffic Bureau v. Director General, 115 I. C. C. 33.

(6u) Applicable rates on common brick from Nashville, Tenn., to Morehead, Ky., found unreasonable to extent they exceeded lower rates contemporaneously in effect in the opposite direction, no transportation conditions justifying a higher rate from Nashville to Morehead than from Morehead to Nashville. Reasonable rate prescribed for the future and reparation awarded. Bush & Co. v. L. & N., 115 I. C. C. 45.

(6v) Rates on fresh meats and packing-house products, in straight or mixed carloads, from Chicago, Milwaukee, and South St. Paul, to Houghton, Hancock, and Calumet, Mich., found unreasonable as compared with blanket rates contemporaneously maintained on like traffic from same points of origin to other various destinations in same general territory. Reasonable rates for future prescribed and reparation awarded. Armour & Co. v. C., M. & St. P., 115 I. C. C. 68.

(6w) Full combinations of locals to and from junction points on bituminous coal from West Frankfort, West Frankfort mine No. 18, Christopher, Christopher mine No. 20, Johnston City, and Buckner, Ill., to points in Indiana on the Big Four, found unreasonable and unduly prejudicial to extent they exceeded lower joint rates contemporaneously maintained from competing mines located in so-called Harrisburg group in southern Illinois to same Indiana destinations. Reasonable and nonprejudicial rates prescribed for future. Old Ben Coal Corp. v. C., C., C. & St. L., 115 I. C. C. 84.

(6x) Shippers are entitled to move their products to any market at reasonable and nonprejudicial rates and commission has repeatedly condemned action of carriers in adjusting rates so as to impede or stifle movement of commodities in any given direction. Old Ben Coal Corp. v. C., C., C. & St. L., 115 I. C. C. 84, 87.

(6y) Combination rates on crude rubber from New York terminals, and on reclaimed rubber from points in c. f. a. territory, to Omaha, Nebr., found not unreasonable or otherwise unlawful as compared with rates to Akron, Ohio. Complainant's allegation of unreasonableness rests upon a showing that rates to Omaha yield ton-mile earnings higher than rates to Akron, but that fact alone does not establish unreasonableness of Omaha rate. The Mississippi River combination basis of constructing through rates has been in effect for many years, and has in numerous cases received ap-

proval of commission. Nebraska Tire & Rubber Co. v. B. & O., 115 I. C. C. 99.

(6z) Rate on pine lumber from Bonneau, S. C., to Chatham, Va., found not unreasonable or unduly prejudicial as compared with rate contemporaneously in effect from Charleston, S. C. to same destination. Lynchburg Traffic Bureau v. A. C. L., 115 I. C. C. 121.

(7a) Rate on pine lumber from Jalapa, S. C., to Danville, Va., found unreasonable to extent it exceeded lower rate contemporaneously in effect from Jalapa and Newberry to Lynchburg, Va. Reasonable rate prescribed for future and reparation awarded. Lynchburg Traffic Bureau v. A. C. L., 115 I. C. C. 121.

(7b) Combination rate on lime from Woodville, Ohio, to Fulton Station, Baltimore, Md., on the Western Maryland Ry., found unreasonable and unduly prejudicial for the future to extent it exceeded lower rate contemporaneously in effect from same point of origin to deliveries in Baltimore on the Pennsylvania R. R., and from other Ohio points to Fulton Station. Woodville Lime Products Co. v. P. R. R., 115 I. C. C. 131.

(7c) Second-class rate on peaches from Timberville and Markham, Va., to Jacksonville, Fla., found not unreasonable, discriminatory, or unduly prejudicial as compared with lower rate contemporaneously in effect to Palatka, Fla., a farther distant point beyond Jacksonville, or with lower rates from St. Louis and Cincinnati to Jacksonville. The Cincinnati and St. Louis rates are shown to be subnormal and depressed and rates assailed compare favorably with those in effect for comparable distances from Timberville to various destinations in Georgia, Alabama and Tennessee. Toney Bros. v. S. Ry., 115 I. C. C. 203.

(7d) Combination rates on oak railroad ties from Crocker, Mo., to Lyons, Iowa, found unreasonable to extent they exceeded lower rate contemporaneously in effect to Savanna, a farther distant point. Reparation awarded. Abeles & Taussig Lbr. & Tie Co. v. C., M. & St. P., 115 I. C. C. 205.

(7e) Combination rate on crushed rock from Dresser Junction, Wis., to Minnehaha Falls, Minn., outside the switching district but within the city limits of Minneapolis, Minn., found unreasonable as compared with lower rates contemporaneously in effect from point of origin to various delivery points within the Minneapolis switching limits and to extent it exceeded lower joint rate subsequently established. Reparation awarded. Board of Park Commrs. v. C., M. & St. P., 115 I. C. C. 211.

(7f) Group rate on phosphate rock from producing points in Florida to Roanoke, Ala., found not unreasonable as compared with rates from Florida to other grouped points in same general territory or with rate subsequently established when the Roanoke rate was reduced for purpose of placing that point on a parity with points in the Atlantic-La Grange group. Phosphate Rock from Florida, 115 I. C. C. 229.

(7g) Joint rates assessed on shipments of cement from Coplay, Saylor, and Hokendauqua, Pa., located in the Lehigh cement district, to Riverhead, Long Island, N. Y., found unreasonable as compared with lower rates contemporaneously maintained to various points in same general territory and to various points in New England by way of New York lighterage points, and to extent they exceeded lower rates subsequently established. Reparation awarded. Awixa Corp. v. L. I. R. R., 115 I. C. C. 245.

(7h) Sixth-class rate assessed and lower commodity rate subsequently established on scrap iron from Burnham, Pa., to Cumberland, Md., found unreasonable as compared with rates for considerably greater hauls, with lower commodity rate in effect between points in immediate territory of this movement for comparable distances, and to extent it exceeded rate contemporaneously in effect from Burnham, Milroy, and Lewiston, Pa., to State Line, Pa., which lower rate was also in effect in the reverse direction from Cumberland to Burnham. Reasonable rate prescribed and reparation awarded. Cohen & Son v. P. R. R., 115 I. C. C. 307.

(7i) Joint rate on wet wood pulp from Port Arthur, Ontario, Canada, to Wisconsin Rapids and Biron, Wis., found not unreasonable as compared with rates contemporaneously in effect on same commodity from the same and various other points of origin to same and various other destinations in same general territory for comparable distances. Consolidated Water Power Co. v. C. N. Rys., 115 I. C. C. 310.

(7j) Rates on dried fruits, in sacks, from points in groups 1 and 3 in California, to Ogden and Salt Lake City, Utah,

found not unreasonable as compared with rates contemporaneously in effect to Denver, Colo., and Butte, Mont., but rates on dried fruits, in boxes, to and from same points, found unreasonable to extent they exceeded lower rates voluntarily established by carriers subsequent to movement here involved. Reparation awarded. Anderson-Taylor Co. v. A., T. & S. F., 115 I. C. C. 313.

(7k) Rate on silica sand from points in the Ottawa district in Illinois to Sandusky, Ohio, found not unreasonable. Judged by percentage relationships between silica-sand rates and sixth-class rates from the Ottawa district the rate on silica sand to Sandusky compares favorably with rates on same commodity to other points in Ohio, Indiana, and Michigan to which there is a substantial movement. Frohman Chemical Co. v. B. & O., 115 I. C. C. 322.

(7l) Commodity rates on iron and steel pull and sucker rods from Marion, Ind., to Oklahoma and Texas destinations found not unreasonable. Complainant compared assailed rates with lower rates on iron and steel articles to and from same points and contended that they should not exceed those on general run of iron and steel articles, particularly bar and structural iron and steel. However, rates under attack are lower than commodity rates on oil-well supplies, compare favorably, distance considered, with those on same commodity from St. Louis, Toledo, and Pittsburgh to Oklahoma and Texas destinations, and with rates approved by commission in cases heretofore decided. Marion Machine F. & S. Co. v. C., C., C. & St. L., 115 I. C. C. 327.

(7m) Rates assessed on box shooks from Albuquerque, N. Mex., and El Paso, Tex., to Curtiss and Kennard, Ariz., found not unduly prejudicial or discriminatory, but found unreasonable as compared with rates contemporaneously in effect on box shooks and various other commodities for as long or longer hauls in same general territory and to extent they exceeded rates prescribed in 80 I. C. C. 487 and 96 I. C. C. 203, for comparable distances on lumber and box shooks from Williams and Flagstaff to Nogales and Naco, Ariz., applicable on shipments into Mexico. Reasonable rates prescribed for future and reparation awarded. Apache Powder Co. v. A., T. & S. F., 115 I. C. C. 339.

(7n) Rate on coal from Hazard, Ky., to Valparaiso, Ind., in connection with the Grand Trunk, found not unreasonable or otherwise unlawful as compared with lower rate contemporaneously in effect over short-line routes to Valparaiso in connection with various other lines, and to a large destination group surrounding Valparaiso. Coovert & Young v. L. & N., 115 I. C. C. 349.

(7o) Sixth-class rate on crossties from Bedford and other points in Pennsylvania to Buffalo, N. Y., and related points, found unreasonable to extent it exceeded a commodity rate subsequently established from Everett, Pa., to Buffalo, and a lower rate applicable in reverse direction from Buffalo and related points to approximately 40 destinations of comparable distance in Pennsylvania and New Jersey, including Bedford and Everett. Reasonable rates prescribed for future, and reparation awarded. LaFayette Lbr. Co. v. P. R. R., 115 I. C. C. 445.

(7p) Rates on spelter by-products from Pittsburgh, Pa., to Trenton, N. J., found unreasonable to extent they exceeded lower rate contemporaneously in effect to farther distant points to which Trenton is intermediate, rates to farther distant points being published subject to rule 77 of Tariff Circular 18-A. Reparation awarded. Lissberger & Co. v. P. R. R., 115 I. C. C. 521.

(7q) Rates on spelter by-products from points in c. f. a. territory, and from western termini points, not including Pittsburgh, to Trenton, N. J., found not unreasonable or otherwise unlawful. Trenton takes rates 2 cents higher than to Philadelphia, Palmerton, and Phillipsburg, this basis being in accordance with the general group adjustment between c. f. a. and eastern trunk-line territories which has obtained for many years. In the adjustment of class and commodity rates from Pittsburgh and points west thereof, Philadelphia, Palmerton, and Phlilipsburg are located in Philadelphia group, to which rates are generally based on a differential of 2 cents under New York group, in which Trenton is located, and commission has hitherto refused to disturb this adjustment. See 23 I. C. C. 195, 198; 23 I. C. C. 684, 686. Lissberger & Co. v. P. R. R., 115 I. C. C. 521.

(7r) Sixth-class rate charged on refuse sand from Detroit, Mich., to Indianapolis, Ind., found unreasonable to extent it exceeded a lower commodity rate con-

temporaneously in effect from Detroit to Cincinnati, Ohio. Reasonable rate prescribed for future and reparation awarded. American Radiator Co. v. D. & T. S. L. R. R., 115 I. C. C. 529.

(7s) Following 91 I. C. C. 654, rates on slack wooden barrels from Kansas City, Kans.-Mo., to Enid and Tulsa, Okla., found not unreasonable as compared with lower rates from points of origin in Texas to Oklahoma destinations. Hauber Cooperage Co. v. A., T. & S. F., 115 I. C. C. 533.

(7t) Rates on potatoes from Virginia points to Jacksonville, Fla., found unreasonable as compared with lower rates contemporaneously in effect from various points of origin to Jacksonville for comparable distances. Reasonable rates prescribed for future and reparation awarded. Nooney & Co. v. P. R. R., 115 I. C. C., 547.

(7u) Rates on built-up native wood from Louisville, Ky., to Harriman, Tenn., found unreasonable to extent they exceeded rates contemporaneously in effect to Knoxville, Chattanooga, and Cleveland, Tenn. more distant points. Carriers failed to show that rates to more distant points were unreasonably low or that such rates would not have been compensatory if applied to Harriman. Moreover, fact that but few shipments moved between Louisville and Harriman as compared with those to points beyond is not sufficient grounds to deny shippers reasonable rates. Dame Furniture Co. v. C., N. O. & T. P., 115 I. C. C. 566.

(7v) Rates on bituminous coal from various points in Alabama coal field to Columbus, Ga., found not unreasonable or otherwise unlawful as compared with lower rates contemporaneously maintained to Girard, Ala., to which Columbus is intermediate over some routes. While the situation here involved creates departures from long-and-short-haul provision of section 4 of the act, such departures were protected by appropriate applications and were subsequently removed by reducing Columbus rates to the Girard basis. Complainant introduced comparisons showing lower rates to Tennessee and Mississippi points for comparable distances but failed to show anything regarding transportation conditions. Carriers, on the other hand, showed that coal rates from Alabama mines are part of an extensive group adjustment; also that assailed rates apply to numerous destinations in Georgia, Tennessee, and Alabama, for comparable distances. Mayo v. S. Ry., 115 I. C. C. 595.

(7w) Rates on potatoes from points in the Carolinas on Atlantic Coast Line R. R., to Kalamazoo, Jackson, Battle Creek, and Sturgis, Mich., found unreasonable and unduly prejudicial to extent they exceed corresponding rates contemporaneously in effect to Grand Rapids, Mich. Distance scale of rates prescribed for future and reparation denied on past shipments because the evidence on which the adjustment prescribed is based is general in character and savors of a general readjustment. Taylor Produce Co. v. A. C. L., 115 I. C. C. 633.

(7x) Rates on naval stores (rosin and turpentine) from Louisiana and Texas producing points to destinations in c. f. a. territory found unreasonable and unduly prejudicial; and to points in western trunk-line territory found unreasonable; as compared with rates contemporaneously maintained from competing producing points in southeastern and Mississippi Valley territories. Reasonable and nonprejudicial basis of rates prescribed and reparation denied. Turpentine & Rosin Producers Asso. v. A. & V., 115 I. C. C. 667.

(7y) Rate on grain from Tab, Ind., to Cincinnati, Ohio, and Louisville, Ky., found unreasonable to extent it exceeded lower rate contemporaneously in effect from various contiguous Indiana points to same destinations. Reasonable rate prescribed and reparation awarded. Indianapolis Board of Trade v. C., C., C. & St. L., 115 I. C. C. 681.

(7z) Applicable combination rates on muriate of potash from Salduro, Utah, to Chicago Heights, Ill., a Group D point, found not unreasonable as compared with lower rates contemporaneously in effect to St. Louis, Mo., a Group E point. Complainant showed that same rates applied to both groups on a number of commodities and that prior to and subsequent to movement equal rates applied to both groups on potash. Carriers, on the other hand, contend that rates established were depressed and were made to meet competition with imported fertilizer materials from Atlantic ports, and showed that on a number of commodities the rates between Salt Lake City and Chicago are higher than those to or from St. Louis. Armour Fertilizer Works v. W. P. R. R., 115 I. C. C. 684.

(8a) Rates on agricultural limestone from Buffalo, N. Y., to Troy and Canton, Pa., found not unreasonable or otherwise unlawful. Rates assailed compare favorably with those on same and related commodities for similar distances on carrier's lines. Fact that lower rates are maintained from Buffalo to competitive destinations by nonparticipating carriers not serving Troy or Canton does not establish discrimination or prejudice, as undue prejudice or preference does not exist as between shippers or communities unless same carriers serve them or participate in their traffic. Moreover, carrier showed that to meet rates applicable over competing lines would create prejudice against lime-producing districts served by it; also that rates assailed compare favorably with those prescribed in 85 I. C. C. 341. Case & Sons v. P. R. R., 115 I. C. C. 694.

(8b) Sixth-class rates on wood pulp from Delano Junction, N. Y., and Great Works, Me., to Housatonic, Mass., found unreasonable as compared with lower commodity rates for comparable distances in same territory and to a number of destinations in trunkline and c. f. a. territories. Reasonable rates prescribed for future and reparation awarded. Rising Paper Co. v. N. Y., N. H. & H., 115 I. C. C. 699.

(8c) Rates on oak staves and headings found not unreasonable or otherwise unlawful as compared with contemporaneous rates on rough and dressed lumber. Staves and lumber do not constitute such "like traffic" that a different charge for their contemporaneous transportation is violative of section 2 of the act. See 50 I. C. C. 229. A history of cooperage stock and lumber rates shows that no rigid rate relationship has been maintained between them. Therefore lumber rates are not determinative of reasonableness of rates on cooperage stock. Chess-Wymond Co. v. A. & V., 115 I. C. C. 703.

(8d) Rate on newsprint paper from Millinocket, Me., to Lynchburg, Va., found not unreasonable, discriminatory or unduly prejudicial as compared with rates to Atlanta, Ga., Memphis and Chattanooga, Tenn., and New Orleans, La. Rates to alleged preferred points are shown to be depressed, having been established to meet water competition, and are therefore not a fair measure of reasonableness of the rates to Lynchburg. Moreover, the Lynchburg rate compares favorably, distance considered, with rates from other paper producing points to destinations in the same general territory. Lynchburg Chamber of Commerce v. B. & A. R. R., 115 I. C. C. 715.

(8e) Rates on brick machinery from Lancaster, Pa., to Deacon, Va., found not unreasonable or unduly prejudicial as compared with lower rates contemporaneously in effect to Lynchburg, Va., a farther distant point. Rates to Deacon are governed by the official classification, whereas those to Lynchburg are governed by the southern classification. The fourth-section departure is protected by an appropriate application and in view of a pending general investigation covering class rates within and between southern and eastern territories no attempt will be made here to adjust the disparity brought about by the application of rates governed by the different classifications as above described. Lynchburg Chamber of Commerce v. B. & O., 115 I. C. C. 721.

(8f) Rates on small-arms ammunition l. c. l. from New York and Baltimore to Lynchburg, Va., found not unreasonable or unduly prejudicial as compared with lower rates contemporaneously maintained to farther distant points immediately east and west of Lynchburg. Rates to Lynchburg on this commodity are governed by the southern classification whereas rates to the alleged preferred points are governed by the official classification and although lower rates would apply if the official classification governed on this traffic moving to Lynchburg the record shows that on other commodities lower rates would apply if governed by the southern classification. The fourth-section departures instanced are protected by appropriate applications and in view of a general investigation covering class rates within and between southern and eastern territories, no attempt will be made here to adjust the disparity brought about by the application of rates governed by the different classifications as above described. Lynchburg Chamber of Commerce v. B. & O., 115 I. C. C. 721.

(8g) Milling-in-transit rates on alfalfa meal from points in Idaho to Memphis, Tenn., found not unreasonable or unduly prejudicial as compared with lower rates from Colorado points to same destination. Earnings under rates attacked compare favorably, distance considered, with those from Colorado points

and are considerably lower than those on other agricultural products from and to same and other points. Fact that rate assailed was not contemporaneously reduced with corresponding rate to St. Louis, does not alone establish unreasonableness or unlawfulness of rate to Memphis. Bailey v. O. S. L., 115 I. C. C. 745.

(8h) Rates on brick and hollow building tile from Vale, Mo., a point outside Kansas City switching district, to Kansas City, Mo.-Kans., found not unreasonable or unduly prejudicial as compared with other rates on same and related products for comparable distances to same destination from points both within and without the district, or as compared with distance rates for similar hauls in effect on intrastate and interstate traffic in Kansas, Nebraska, Missouri, Texas, Arkansas, Illinois, and Iowa. Kansas City Brick Co. v. C., R. I. & P., 115 I. C. C. 750.

(8i) Applicable third-class l. c. l. rate under official classification on printing paper from Erie, Pa., to Lynchburg, Va., found not unreasonable or unduly prejudicial as compared with lower fourth-class rates contemporaneously in effect under southern classification to Danville and South Boston, Va., farther distant points. Rate assailed compares favorably with corresponding rates between other points in official classification territory and at time of shipment rates to alleged preferred points were protected by appropriate fourth-section applications. While complainant meets competition with paper dealers at latter points for business "in common territory," no damage was shown by reason of any undue prejudice which may have existed in past, the fourth-section departures having since been removed. Lynchburg Chamber of Commerce v. P. R. R., 118 I. C. C. 11.

(8j) Rates on green salted hides from certain points in Mississippi and Alabama to Winchester, Mass., found unreasonable as compared with lower rates contemporaneously maintained from numerous other points in southern and other territories to Winchester for comparable distances. Reasonable rates prescribed for future and reparation awarded. Beggs & Cobb v. A. & V., 118 I. C. C. 13.

(8k) Rates on barytes from Cartersville, Ga., to various eastern destinations, found not unreasonable or otherwise unlawful as compared with lower rates from Sweetwater, Tenn., to same destinations. Present rates from Sweetwater were established to enable shippers at that point to compete with shippers at Cartersville; distances from Cartersville over short-line routes to eastern destinations are substantially greater than from Sweetwater; moreover, the commission has approved higher rates on this traffic from Cartersville than from Sweetwater in 43 I. C. C. 334, 50 I. C. C. 429, and 59 I. C. C. 173. Thompson, Weinman & Co. v. A. C. Ry., 118 I. C. C. 21.

(8l) Rates on green salted hides from Meridian, Miss., to Portville, N. Y., found unreasonable, such rates being shown to be out of line, distance considered, with rates contemporaneously applicable from and to near-by points of origin and destination, as well as with rates between points in same rate territories for comparable distances. Reasonable rate prescribed for future and reparation awarded. Northwestern Leather Co. Trust v. M. & O., 118 I. C. C. 37.

(8m) Class rates on candy and confectionery, c. l. and l. c. l., from Salt Lake City, Utah, to destinations on Mississippi and Missouri Rivers, and to St. Paul, Minn., and Chicago, Ill., rate territories, found unreasonable and unduly prejudicial to extent they exceeded lower commodity rates contemporaneously applicable from San Francisco, Calif., to same destinations. Reparation awarded. McDonald Chocolate Co. v. B. E. R. R., 118 I. C. C. 45.

(8n) Rates on bituminous coal from Spadra and Greenwood groups in western Arkansas, and Oolagah and McAlester groups in eastern Oklahoma, to Wichita and Hutchinson, Kans., found not unreasonable as compared with those from same territories to Kansas City, Mo.-Kans., prescribed in 89 I. C. C. 73; 113 I. C. C. 161. Rates assailed compare favorably, distance and earnings considered, with those in same general region; from origin groups to Kansas points and from Illinois points to Missouri and Arkansas; also with single-line and joint-line intrastate scales in Kansas, Missouri, Oklahoma, and Arkansas. Moreover, while rates are apparently not related throughout as they should be, a readjustment to basis sought would make no provision for many producing points and might disrupt present groups. Bunte v. C., R. I. P., 118 I. C. C. 66.

(8o) Rate on stone from Carthage,

Mo., to Wichita, Kans., found not unreasonable or unduly prejudicial. Assailed rate compares favorably with rates on rough or finished stone from Carthage to destinations in eastern and southern Kansas for similar hauls; also with those found reasonable or approved by commission in various cases for hauls of substantially similar distances. Cuthbert Cut Stone Co. v. St. L.-S. F., 118 I. C. C. 69.

(8p) Rates on coal from Clinchfield, Dante, and Clinchco, Va., to Toledo and Toledo dock, Ohio, for transshipment by vessel, found unduly prejudicial to extent rate from Clinchco exceeds rate contemporaneously maintained on lake-cargo coal from Big Sandy district to same destinations, and those from Dante and Clinchfield exceed a differential of 15 judicial rate relationship prescribed for future. Clinchfield Coal Corp. v. C., C. & O., 118 I. C. C. 79.

(8q) Rates on compressed cotton over rail-water-and-rail routes from Opelousas and Bunkie, La., to destinations in New England and New York found unreasonable to extent they exceeded rates contemporaneously maintained on like traffic from Shreveport and Alexandria, La., to same destinations. Reasonable rates for future prescribed and reparation awarded. Manget Bros. Co. v. A. C., 118 I. C. C. 85.

(8r) Rates on hay from points in South Dakota to destinations in Iowa, Nebraska, Illinois, Wisconsin, and Minnesota found unreasonable in their relation to rates on various other commodities and with rates on hay from producing points in States located in same general territory to same destinations. Reasonable distance basis of rates prescribed for future. South Dakota R. R. Commrs. v. C. & N. W., 118 I. C. C. 139.

(8s) Rates on coal from Herrin, Ill., to Bannister, Ashley, North Star, and Ithaca, Mich., found not unreasonable as compared with rates from southern Illinois coal fields to same general destination territory. Comparisons based upon distance alone are insufficient to establish unreasonableness of rates charged. See 64 I. C. C. 78. Crerar Clinch Coal Co. v. A. A. R. R., 118 I. C. C. 171.

(8t) Upon reargument, former report 92 I. C. C. 722, wherein it was found that class rates from western trunk-line, c. f. a., and trunk-line territories, and rates on various commodities from same territories and from Ohio River crossings and New Orleans, to Virginia, are not unreasonable or unduly prejudicial in their relation to rates to Duluth, Minn., affirmed. Rates assailed do not compare unfavorably with those from and to other points in same territory as Virginia, for comparable distances, and notwithstanding fact that rates to Virginia are made on a combination basis Virginia derives benefit of depressed rates to Duluth and its growth has not been retarded by rate situation. Moreover, the commission can not condemn through rates as unreasonable merely because they are constructed upon combination. Virginia Chamber of Commerce v. A. A. R. R., 118 I. C. C. 195.

(8u) All-rail rates on newsprint paper from Berlin, N. H., to Birmingham, Ala., which exceeded or exceed by more than 1 per cent per 100 pounds the all-rail rates contemporaneously maintained to Nashville, and rail-water-and-rail rates which exceeded or exceed similar rates contemporaneously maintained to Memphis and Nashville, found unreasonable and to subject Birmingham to undue prejudice. Reparation awarded and undue prejudice ordered removed. Birmingham News Co. v. A., B. & A., 118 I. C. C. 205.

(8v) Rates on bale ties and woven and barbed wire fencing from Sterling, Ill., to Montgomery, Ala., found unreasonable and unduly prejudicial as compared with rates contemporaneously in effect to Mobile and Pensacola, farther distant competing points, and to extent they exceeded rates subsequently established when Montgomery was placed upon a rate parity with the latter-named points. Teague Hardware Co. v. C., B. & Q., 118 I. C. C. 221.

(8w) Rate on cereal beverages from St. Louis, Mo., to Atlanta, Ga., found not unreasonable or unduly prejudicial as compared with rates contemporaneously in effect to Montgomery, Ala., Augusta, Macon and Savannah, Ga. Rate assailed compares favorably with corresponding rates from Milwaukee, Pittsburgh, and Chicago, and with general level of rates from St. Louis to southeastern destinations. Complainant does not meet competition with dealers at Montgomery, and although Augusta, Macon, and Savannah are able to compete with complainant in same general territory, under group basis of rates maintained in the Southeast the nearest point in the group is always

prejudiced. It does not follow, however, that such prejudice is undue as it must appear that nearest point is injured by adjustment. Bradley & Woertz v. I. C., 118 I. C. C. 233.

(8x) Relationship between interstate rates on hay from points in Texas differential territory and New Mexico, to points in southern Arkansas and northern Louisiana, and intrastate rates applying from Texas differential points to Texarkana, Tex., found unduly prejudicial to interstate shippers, unduly preferential of shippers at Texarkana, and unjustly discriminatory against interstate commerce. Arkansas Jobbers & Mfrs. Asso. v. A., T. & S. F., 118 I. C. C. 238.

(8y) Rates on sugar from Utah and Idaho points to Texas common points found not unreasonable in their relation to rates from New Orleans and points in Colorado to same destinations. The New Orleans rates upon which the Utah-Idaho rates are based are depressed due to competitive influences and disparity in distance from Utah and Idaho origins is practically three times in excess of mileage from New Orleans. Utah-Idaho Sugar Co. v. C., R. I. & P., 118 I. C. C. 256.

(8z) Rates on sugar from Utah and Idaho to Missouri, Arkansas, and Oklahoma destinations, found not unreasonable as compared with rates from farther distant California points of origin. Utah-Idaho Sugar Co. v. C., R. I. & P., 118 I. C. C. 256.

(9a) Sixth-class rate applicable on lumber and assessed on logs from Adrian, Mich., to Hicksville, Ohio, found unreasonable to extent it exceeded a lower rate contemporaneously in effect from Adrian to other destinations in same general territory as Hicksville, such lower rate being equivalent to 74 per cent of contemporaneous sixth-class rate. Reparation awarded. Crook Son & Co. v. W. Ry., 118 I. C. C. 285.

(9b) Rates on sulphuric acid from El Segundo and Nadeau, Calif., and points taking same rates, to Curtiss, Ariz., found unreasonable and unduly prejudicial as compared with rates contemporaneously in effect to Bacchus, Utah, Robert, Calif., and other competing points. Reasonable rate prescribed for future and reparation awarded. Apache Powder Co. v. A., T. & S. F., 118 I. C. C. 457.

(9c) Rate on sawdust from Los Angeles, Calif., and points taking same rates, to Curtiss, Ariz., equal to the rates on lumber, found unreasonable as compared with rates on various commodities of higher value and with rate prescribed on sawdust in 115 I. C. C. 339, from Albuquerque, N. Mex., and El Paso, Tex., to Curtiss and Kennard, Ariz. Reasonable rate prescribed for future and reparation awarded. Apache Powder Co. v. A., T. & S. F., 118 I. C. C. 457.

(9d) Fifth-class rates, minimum 36,000 pounds, approved in 48 I. C. C. 515 and applied on wet rag pulp from Franklin, Ohio, to points in official classification territory, found unreasonable as compared with rates and minimum weights contemporaneously in effect on wood pulp, cottonseed-hull shavings pulp, linen pulp, and straw pulp, used in manufacture of paper, and with which rag pulp comes into competition, and to extent they exceeded sixth class, minimum 50,000 pounds. Reasonable rates and minimum weight prescribed for future. Cheney Pulp & Paper Co. v. A., C. & Y., 118 I. C. C. 477.

(9e) Sixth-class rate applicable on lumber and assessed on logs from Arcola, Ind., to Montpelier, Ohio, found unreasonable to extent it exceeded a lower log rate equal to 65 per cent of sixth class contemporaneously in effect from and to points in c. f. a. territory for like distances and found reasonable as maxima in 85 I. C. C. 533. Reparation awarded. Liberty Cooperage & Lbr. Co. v. P. R. R., 118 I. C. C. 505.

(9f) Combination rate on asphalt from Richmond, Calif., to Delta, Colo., found unreasonable as compared with lower rates, contemporaneously in effect to destinations in the Denver group and to extent it exceeded a lower rate subsequently established when a proportional rate of 10 cents was made effective from Grand Junction to Delta on shipments originating beyond. Reparation awarded. Strange-Maguire Paving Co. v. A., T. & S. F., 118 I. C. C. 509.

(9g) Class A rate applicable on a sporadic shipment of coffin material from Jackson, Miss., to New Orleans, La., found not unreasonable as compared with lower rate from Maryville, Tenn., to same destination, or with commodity rate established from Jackson subsequent to movement. The subsequently established rate was accorded with expectation of a regular movement which never developed,

whereas it is shown that there is a free movement under the rate from Maryville. Considering the sporadic character of shipment here involved, coupled with a lack of evidence to indicate that coffin stock is improperly classified, the commission does not consider class A rate as unduly high. Jackson Traffic Bureau v. I. C., 118 I. C. C. 515.

(9h) Fifth-class rate on refined petroleum oil from Reno, Pa., to Rockford, Ill., found unreasonable and unlawful. A lower commodity rate was contemporaneously in effect applicable via Reno from Foxburg, Pa., a farther distant point in contravention of section 4 of the act. However, had the Rockford rate been construed upon basis generally applicable between contiguous points of origin and destination, the subsequently established rate would have applied. Smith Oil & Refining Co. v. C., M. & St. P., 118 I. C. C. 527.

(9i) Rates on sand from Lawrence, Kans., to destinations within a radius of 150 miles east of Kansas City, Mo., found unreasonable and unduly prejudicial to extent they exceed by more than 20 cents per ton rates from Turner, Muncie, Grinter, Sirridge, and Armourdale, Kans., competing points accorded Kansas City basis of rates. Reasonable and nonprejudicial rates prescribed for future. Jackman & Jackman v. A., T. & S. F., 118 I. C. C. 547.

(9j) Rate on sand from Lawrence, Kans., to Kansas City, Mo.-Kans., found unreasonable and unduly prejudicial to extent it exceeds by more than 1 cent per 100 pounds the rate from points within Kansas City switching limits and Muncie and Grinter, Kans., to points in Kansas City switching district. Taking into consideration low grade of sand and keen competition in its sale, the difference in rate from Lawrence is too high as compared with those from Kansas City district points. Reasonable rate prescribed for future. Jackman & Jackman v. A., T. & S. F., 118 I. C. C. 560.

(9k) Rate on wrought-iron pipe from Bowling Green, Ky., to Florence, Ala., found unreasonable to extent it exceeded a lower rate contemporaneously in effect in the reverse direction; from Memphis, Tenn., to Decatur, Ala.; Chattanooga, Tenn., to Hopkinsville, Ky., and Cincinnati, Ohio; Sheffield and Florence, Ala., to Louisville, Ky.; and from Knoxville, Tenn., to Cincinnati, Ohio; and as compared with other rates to and from various other points in southern territory for comparable distances. Reasonable rate for the future prescribed and reparation awarded. Nashville Machine & Supply Co. v. L. & N., 118 I. C. C. 577.

(9l) Rates on charcoal from Gaskins Siding, Fla., to Amsterdam and Wataga, Ga., found unreasonable and unduly prejudicial to extent they exceeded lower rate upon which basis reparation was awarded in 95 I. C. C. 463 on similar shipments from Savannah, Ga., to Havanna, Fla., such lower rate having been subsequently established from Gaskins Siding to Amsterdam and Wataga. Although there is no evidence as to similarity of transportation conditions of these movements, the destinations are very near each other and there is no justification for the great difference between rates assailed and those found reasonable in cited case. Reparation awarded. American Sumatra Tobacco Co. v. A. C. L., 118 I. C. C. 583.

(9m) Joint rates on pipe from Youngstown, Ohio, to Tioga and other Louisiana points found unreasonable as compared with lower rates contemporaneously in effect between various points in same general territory for comparable distances and to extent they exceeded lower distance rate approved in 77 I. C. C. 473, for general application in this territory, which rate was subsequently established to the more distant point of Alexandria. Reparation awarded. Hope Engineering & Supply Co. v. M. P., 118 I. C. C. 598.

(9n) Rates on automobiles from Lansing and Detroit, Mich., and Springfield, Ohio, to Santa Fe, N. Mex., found not unreasonable or otherwise unlawful as compared with lower rates contemporaneously in effect to Columbus, N. Mex. Complainant contended that lower rate was applicable to Santa Fe as that point was intermediate to Columbus under an appropriate tariff provision which provided for application of Columbus rate as maximum to intermediate points. However, for a shipment to pass through Santa Fe over A., T. & S. F. would require an out-of-line haul, except when routed via the New Mexico Central and lower rate is not applicable over that route. Moreover, carriers showed that Columbus rate was on an improper and depressed basis and has since been increased to a parity with rate assailed. Thomas Motor Co. v. A., T. & S. F., 118 I. C. C. 631.

(9o) Rates on sugar from New Orleans to Keokuk, Iowa, found not unreasonable or unduly prejudicial as compared with lower rates contemporaneously in effect to competitive Illinois points directly intermediate to Chicago. While Chicago rate applies via Keokuk, this route is used only in exceptional cases, whereas Illinois points are on reasonably direct routes from New Orleans to Chicago and take the Chicago rate basis to avoid fourth-section departures. In 81 I. C. C. 448, the commission indicated that the Chicago rate is a less-than-reasonable maximum rate, and carriers herein intend to place the Illinois points on a rate parity with Keokuk. Rate to latter compares favorably with rates to other Mississippi River gateways in Iowa, as well as with rates to destinations westward from the river in Iowa and Nebraska to and including Missouri River gateways. See also 88 I. C. C. 46. Keokuk Shippers' Asso. v. A., T. & S. F., 118 I. C. C. 683.

(9p) Combination rates on gasoline from Texas and Oklahoma points to Bradford, Pa., found not unreasonable as compared with lower rates to Buffalo, N. Y. Although Bradford is directly intermediate to Buffalo over the Buffalo, Rochester and Pittsburgh, the average distance to Bradford over all routes is a few miles in excess of that to Buffalo. Beyond river crossings specific rates are published to destinations in c. f. a. territory in which Buffalo is located, while rates to destinations in trunk-line territory are made on basing points, Bradford taking the Rochester base rate. Carriers show that rates to Rochester group have always been higher than those to Buffalo group and that adjustment is one of long standing which should not be disturbed. Kendall Refining Co. v. A. & V., 118 I. C. C. 689.

(9q) Fifth-class rate assessed on printing paper from Kansas City, Mo., to Wichita, Kans., found unreasonable as compared with lower rate contemporaneously in effect from St. Louis, Mo., to Wichita, and from Kansas City to Ponca City, Okla., and to extent it exceeded a lower rate subsequently established in order to conform to rates resulting from commission's findings in Minnesota & Ontario Paper Co., 66 I. C. C. 571. Reparation awarded. Western Newspaper Union v. A., T. & S. F., 118 I. C. C. 692.

(9r) Applicable rates on yellow pine lumber from Elba, Ala., and Richton, Miss., to Booneville, Ind., found not unreasonable as compared with rates to Ohio River crossings and other destinations in c. f. a. territory. Carriers instanced rates from and to other points for comparable distances in same general territory in order to show that rates charged are not unreasonable, showed that origin points here considered are embraced within yellow-pine blanket, and that any reduction in the Elba and Richton rates would disrupt the rate relationships from southeastern and Mississippi Valley territory. The blanket system of rate making when applied to limited areas containing natural resources has been approved by commission and where it is sought to disrupt an existing adjustment a comprehensive record should be developed. Record in instant case is limited and does not warrant a readjustment of lumber rates from this territory. Standard Lbr. Co. v. A. C. L., 118 I. C. C. 703, 705, 706.

(9s) Rate on dried beans from Colorado points to Florence, Sheffield, and Tuscumbia, Ala., in southeastern territory, found not unreasonable or otherwise unlawful as compared with rate to Memphis, Tenn., Corinth, Miss., and other Mississippi Valley points. Carriers show that Mississippi Valley rates are low and depressed due to maintenance of port rates to intermediate points and point out that rates from Memphis and Ohio River crossings to Florence group do not compare unfavorably with rates in general to the Southeast, nor with rates from trunk-line and c. f. a. territories. Moreover, commission has previously recognized that level of rates in Mississippi Valley territory is lower than in southeastern territory. See 87 I. C. C. 547. Florence Chamber of Commerce v. A., T. & S. F., 118 I. C. C. 710.

(9t) Fifth-class rates on vinegar from New York points to mid-western destinations, found not unreasonable or otherwise unlawful as compared with rates from Pacific coast to same destination territory. Vinegar is manufactured at low cost on Pacific coast as compared with similar costs in New York territory and New York producers also suffer from disadvantage of buying their barrel material from Pacific coast points. While complainant contended that an increase in Pacific coast rate would remove the prejudice here involved, the evidence shows that its principal competition is encountered from producers located in

destination territory, and any increase in Pacific coast rates would be of little avail to complainant. American Cider Vinegar Mfrs.' Asso. v. N. Y. C., 118 I. C. C. 721.

(9u) Rates on grain and products from points in Missouri, Kansas, Nebraska, the Dakotas, Minnesota, Iowa, Wisconsin, Illinois, and Indiana to Montgomery, Ala., found unreasonable and unduly prejudicial as compared with rates contemporaneously maintained to Meridian, Miss., Mobile, Ala., and Pensacola, Fla., Mississippi Valley points. Reasonable and nonprejudicial rates prescribed for future and reparation awarded. Capital Grain & Feed Co. v. I. C., 118 I. C. C. 732.

(9v) Proportional or reshipping and local rates on grain, and products from Ohio and Mississippi River crossings to Nashville, Tenn., found unreasonable and unduly prejudicial in their relation to corresponding rates from same crossings to Memphis. Reasonable and nonprejudicial rates prescribed for future and reparation denied. Nashville Traffic Bureau v. L. & N., 118 I. C. C. 748.

(9w) Local and proportional or reshipping rates on grain and products from Memphis, Tenn., to Birmingham, Ala., found unreasonable as compared with rates to Meridian, Miss., and other points in Mississippi Valley territory. Reasonable rates prescribed for future and reparation denied. Birmingham Traffic Bureau v. St. L.-S. F., 118 I. C. C. 756.

(9x) The act condemns the exaction of unreasonable rates and makes no distinction between relative unreasonableness and unreasonableness per se. Nelson Fuel Co. v. C. & O. Ry., 120 I. C. C. 723, 725.

(9y) Rates on wet wood pulp from Lockport, N. Y., to Wabash, Ind., found not unreasonable or otherwise unlawful as compared with those from Erie, Pa., to Marion and Muncie, Ind., alleged competing points. With few exceptions rates on wood pulp in c. f. a. territory are on same basis as rates assailed and rates to Marion and Muncie were, subsequent to hearing in instant case, placed on a parity with rates attacked. Moreover, fact that car earnings on certain other unrelated commodities are lower, does not of itself tend to show unreasonableness of rates attacked. United Paperboard Co. v. C. & E. R. R., 120 I. C. C. 27.

(9z) Rates on hardwood lumber from Mississippi points to Loudon and Harriman, Tenn., found not unreasonable as compared with those contemporaneously in effect in same general territory or in other territories. Carriers showed that earnings compare favorably with those which accrue under rates on lumber or lumber articles prescribed in 83 I. C. C. 271 and other cited cases, and fact that rates assailed reflect voluntary reductions is not sufficient in and of itself to indicate that prior rates were unreasonable. Jackson Traffic Bureau v. I. C., 120 I. C. C. 33.

(10a) Fact that there is a difference in rates as between two commodities which ordinarily take same rates is not of itself sufficient to prove the higher rates unreasonable. Jackson Traffic Bureau v. I. C., 120 I. C. C. 33, 34.

(10b) Following 96 I. C. C. 682, fifth-class rates on steel castings from Attica, Ind., to St. Louis, Mo., Chicago, Peoria, Streator, and Mount Vernon, Ill., found unreasonable and unduly prejudicial as compared with rates from various competing points in Illinois, Indiana, and Missouri. Distance scale of rates prescribed for future and reparation awarded. Nat'l. Car Coupler Co. v. A., T. & S. F., 120 I. C. C. 37.

(10c) Fifth-class rates on printed waxed wrapping paper from Nashua, N. H., to Westchester Avenue, New York, N. Y., and Flatbush Avenue, Brooklyn, found unreasonable as compared with lower sixth-class rates contemporaneously in effect from points generally in trunk-line and c. f. a. territories to stations on Long Island R. R., including Flatbush Avenue, and from same point of origin to stations on New York Central except New York and Brooklyn. Reasonable rates prescribed for future and reparation awarded. Ward Baking Co. v. B. & M., 120 I. C. C. 47.

(10d) Combination rate on farm wagons from Fort Smith, Ark., to Fredericksburg, located in Texas Differential territory on the Fredericksburg & Northern R. R., found unreasonable to extent it exceeded a lower joint rate contemporaneously in effect via routes other than route of movement, such lower joint rate also applying to Kerrville, situated in same territory on the San Antonio & Aransas Pass Ry., approximately same distance from junction point on which the combination was based as is Fredericksburg. Route over which ship-

ment moved constitutes the most practicable and reasonable route and no justification appears for maintenance of a higher rate to Fredericksburg than to Kerrville. Reasonable rate prescribed for future and reparation awarded. Deere Plow Co. v. St. L.-S. F., 120 I. C. C. 67.

(10e) Rates on bituminous coal from Arkansas and Oklahoma mines to Kansas City, Leavenworth, and Atchison, Kans., and St. Joseph, Mo., lower than to Lawrence and Topeka, Kans., found not unduly prejudicial. There is no competition in Lawrence or Topeka with coal from Kansas City or other Missouri River points named. Moreover, the sale price of coal in Kansas City and other points alleged to be unduly preferred is affected not only by freight rates from southwestern mines but also by freight rates from competitive Illinois mines, as well as from other sources of production. Albert Silk Coal Co. v. A., T. & S. F., 120 I. C. C. 69, 72, 73.

(10f) Rate on green coffee from New Orleans, La., to Salina, Kans., found unreasonable as compared with lower rate approved by commission for application from New Orleans to Oklahoma City, Okla., and to extent it exceeded rate subsequently established. Such lower rate would have been in effect at time of movement had it not been suspended in an I. & S. proceeding, order in which was vacated prior to hearing, resulting in lower rate eventually becoming effective. Reparation awarded. Lee Mercantile Co. v. C., R. I. & G., 120 I. C. C. 90.

(10g) Rate on rough granite in blocks from Salida, Colo., to Keokuk, Iowa, found not unreasonable or otherwise unlawful as compared with lower rate contemporaneously in effect from Mountain Park, Okla., to same destination. Hauls from latter point are through level country whereas route of movement traverses a mountainous territory where operating conditions are unusual and difficult. Cameron, Joyce & Schneider v. D. & R. G. W., 120 I. C. C. 129.

(10h) Rate on lumber from Virginia, Minn., to Grafton, Wis., found not unreasonable or otherwise unlawful as compared with lower rates contemporaneously in effect from Virginia to points in Wisconsin farther distant than Grafton; also from other Minnesota points north of Virginia to Grafton. Carriers pointed out that at time of movement numerous fourth-section departures occurred in this territory because of maintenance of depressed rates to Chicago and other Lake Michigan ports. Complainant failed to show damage by reason of such fourth-section departures, and a violation of long-and-short-haul clause of section 4 does not alone establish unreasonableness or form a basis for reparation. Moreover, rates assailed compare favorably with corresponding rates from and to various points for comparable distances. Virginia & Rainy Lake Co. v. D., W. & P., 120 I. C. C. 131.

(10i) Class rates between Kansas City, Mo., Omaha, Nebr., and St. Paul and Minneapolis, Minn., on one hand and Fulton and Mayfield, Ky., on other found unreasonable and unduly prejudicial in favor of Ohio River crossings to extent they exceed corresponding rates contemporaneously maintained from or to Cairo or Metropolis by more than specified amounts herein prescribed. Mayfield Chamber of Commerce v. A. & W., 120 I. C. C. 137, 144.

(10j) Commodity rates between official classification territory and western trunk-line territory, on one hand, and Fulton and Mayfield, Ky., on other, not shown unreasonable, but found unduly prejudicial to extent that differences between these rates on the one hand, and corresponding commodity rates to or from Paducah, Cairo, and Metropolis, on the other, will be greater than differences in rates from and to same points on the classes to which respective commodities belong in official classification when to or from points in official territory; and in western classification when to or from points in western trunk-line territory. Nonprejudicial basis of rates prescribed. Mayfield Chamber of Commerce v. A. & W., 120 I. C. C. 137, 145.

(10k) Rate on zinc ore from Henryetta, Okla., to Caney, Kans., found unreasonable as compared with lower rates contemporaneously in effect from same origin point to various competing smelting points in western territory involving longer hauls, and to extent it exceeded lower commodity rate subsequently established. Reparation awarded. Weir Smelting Co. v. A., T. & S. F., 120 I. C. C. 155.

(10l) Applicable rate on lemons from New York, N. Y., to Nashville, Tenn., over various routes, found unreasonable to extent it exceeded lower rate contem-

poraneously in effect over longer routes through the Virginia gateways. Hill Grocery Co. v. L. V., 120 I. C. C. 161.

(10m) Sixth-class rates and minimum weights on spelter from Trenton, N. J., to Atlanta, Birmingham, and Chattanooga, and points grouped therewith, found unreasonable as compared with lower commodity rates taking a higher minimum contemporaneously in effect from spelter-producing points in eastern Pennsylvania relatively close to Trenton to same destinations; also with those from and to various other points for comparable distances. Reasonable rates and minimum weights prescribed for future. Federated Metals Corp. v. P. R. R., 120 I. C. C. 181.

(10n) Rates on logs, except walnut, cherry, and cedar, from points on Atlantic Coast Line in South Carolina south of Charleston to Savannah, Ga., found unreasonable as compared with lower rates under distance scales in effect in same general territory and to extent they exceed rates prescribed by the State public service commission for intrastate application in Alabama. Reasonable Maximum scale of rates prescribed for future. Southern Cotton Oil Co. v. A. C. L., 120 I. C. C. 190.

(10o) Rates on cranberries from points in Massachusetts, New Jersey, and Wisconsin, to Hutchinson, Wichita, and Anthony, Kans., found not unreasonable or otherwise unlawful as compared with lower rates contemporaneously in effect to Kansas City, St. Joseph, and Omaha. Complainants contend that, distance considered, they are denied benefit of their location, and that under present adjustment they can not compete in surrounding territory with jobbers at Missouri River points. Carriers show, however, that rates assailed are in harmony with rates to other interior Kansas destinations. The rate differences here encountered are results of a long-standing adjustment and no substantial change in transportation conditions warrants a departure therefrom. Moreover, volume of this traffic does not warrant establishment of commodity rates. Anthony Produce Co. v. B. & A., 120 I. C. C. 224.

(10p) Sixth-class rate on lumber from Masten and Laquin, Pa., situated on the Susquehanna & New York R. R., to destinations in New England, found not unreasonable as compared with lower commodity rate contemporaneously applicable from points on other short lines located in same general origin territory. Formerly equal rates applied from points on all these short lines, but due to general increases under the Fifteen Per Cent Case, 45 I. C. C. 303, this equalization was disrupted and subsequently restored. However, disruption of rate adjustment caused by general advances and subsequent establishment of rate sought afford no basis for award of reparation. Moreover, commission has recognized that lumber is rated sixth class in official classification and generally moves intraterritorially on class rates. Central Pennsylvania Lbr. Co. v. S. & N. Y., 120 I. C. C. 239.

(10q) Rates on potatoes and vegetables from Colorado, Idaho, Montana, Nebraska, Wyoming, and Utah, to points in southern Arkansas, and Louisiana, found unduly prejudicial to such destination points and shippers there located and unduly preferential of Little Rock, Pine Bluff, and Helena, points in northern Arkansas, and Memphis, Tenn., and shippers there located, to extent they exceed contemporaneous rates to latter points by more than 8 cents from points in Utah, Idaho, and Montana. See also 80 I. C. C. 620. Arkansas Jobbers & Mfrs. Asso. v. C., R. I. & P., 120 I. C. C. 245.

(10r) Finding in prior report, 113 I. C. C. 343, that joint rates on newsprint paper from Espanola, Ontario, Canada, to destinations in Wisconsin, Minnesota, Illinois, Missouri, Iowa, and Nebraska are, and for future will be, in so far as transportation takes place within United States, unreasonable and unduly prejudicial to extent they exceed or may exceed by more than 4 cents per 100 pounds the rates contemporaneously applicable from Sault Ste. Marie, Ontario, to same destinations, affirmed on reconsideration. Spanish River Pulp & Paper Mills v. A. & W., 120 I. C. C. 251.

(10s) Rate on radiators from Camp Meade, Md., to Trenton, found unreasonable as compared with lower rate contemporaneously in effect via a route other than route of movement and to extent it exceeded lower rate in effect to Princeton, N. J., to which Trenton is intermediate, which lower rate was subsequently established via route of movement from Camp Meade to Trenton. Reparation awarded. Camp Meade Salvage Co. v. B. & O., 120 I. C. C. 273.

(10t) Rates on coal from Appalachia

and Dante districts in Virginia to destinations in the Carolinas and Georgia, and rates from Harlan County district in Kentucky to same destinations, found not unduly prejudicial. Like rates to Jacksonville, Fla., and points basing thereon, found unduly prejudicial to Appalachia and Dante districts to extent that the rate therefrom to Jacksonville exceeds rate from Harlan County district Group 4 to Jacksonville. Virginia Coal Operators' Asso. v. A. & R., 120 I. C. C. 283.

(10u) Rates on refined petroleum from Oklahoma Group 3 points to destinations on the Missouri & North Arkansas Ry., in Arkansas, found unreasonable as compared with rates contemporaneously in effect from Texas and Arkansas points to same destinations, with other rates on this commodity in same general territory, and to extent they exceeded rates subsequently established. Reparation awarded. Bear State Oil Co. v. A., T. & S. F., 120 I. C. C. 301.

(10v) Rates on iron or steel barrels or drums, used as containers in shipping mineral water, from Detroit, Mich., and Sharon, Pa., to Hot Springs, Ark., found not unreasonable as compared with lower rates from same origin points to destinations in southwestern Arkansas and in Louisiana on iron oil barrels, with lower rates on wooden barrels and on furniture from and to same points, or with lower rates established subsequent to movement. Rates to Hot Springs compare favorably with those to certain other Arkansas points, iron or steel barrels or drums yield less earnings than do several other commodities of heavier loading, movement is light, and subsequently established rates were in the nature of a general readjustment involving both increases and reductions. Mountain Valley Springs Co. v. C., R. I. & P., 120 I. C. C. 313.

(10w) Sixth-class rates on commercial fertilizers between points in c. f. a. territory, found not unreasonable or otherwise unlawful in the past as compared with rates in the South and West, but for future found unreasonable to extent they exceed distance rates herein prescribed. As volume of movement is substantial and increasing and use of fertilizers is an adjunct to successful farming, rates thereon should be more on a parity with those prescribed in 113 I. C. C. 389 in southern territory. However, on evidence presented, the commission is not convinced that sixth-class rate produces rates which might be condemned as exceeding the limits of maximum reasonableness if evidence covering conditions in c. f. a. territory in general was fully presented, and scale prescribed is, therefore, without prejudice to any future findings which may be made on a more comprehensive record. Ohio Farm Bureau Federation v. A. & W., 120 I. C. C. 361.

(10x) Fifth-class rates on iron and steel articles from Pittsburgh, Pa., and points taking the same rates to Jamestown and Falconer, N. Y., found unreasonable and unduly prejudicial as compared with lower so-called short-haul commodity rates contemporaneously maintained from and to various other points for comparable distances. Reasonable and nonprejudicial rates prescribed for the future and reparation awarded. Jamestown Chamber of Commerce v. P. R. R., 120 I. C. C. 372.

(10y) Rates on sugar from Yonkers and Brooklyn, N. Y., to Lynchburg, Va., found unreasonable as compared with rates between other points for comparable distances and to extent they exceeded lower rate subsequently established. For a time, lower rates were in effect from points of origin to Lone Jack and South Boston, Va., farther distant points. Subsequently rates to South Boston were increased and those to Lynchburg reduced, thus removing fourth-section departures. Although evidence of a departure from long-and-short-haul provision of fourth section of the act does not establish unreasonableness of the intermediate rate, it is evidence tending in that direction, particularly when, as here, it is accompanied by subsequent establishment of the lower rate. Reparation awarded. See also 104 I. C. C. 293. Lynchburg Chamber of Commerce v. P. R. R., 120 I. C. C. 392.

(10z) Rates on cottonseed products from Tiptonville, Tenn., a branch line point, to northern and eastern destinations found not unreasonable but unduly prejudicial to extent they exceeded or may exceed lower rates contemporaneously maintained from Dyersburg, Tenn., a competing main-line point. Reparation awarded and undue prejudice ordered removed. Gannaway & Rice v. I. C., 120 I. C. C. 400.

(11a) Rate on burlap bags from Jersey City, N. J., to Baltimore, Md., found unreasonable to extent it exceeded lower

rate contemporaneously in effect to Norfolk, Va., a farther distant point, which lower rate was subsequently established to Baltimore. Reparation awarded. Riegel Sack Co. v. C. R. R. Co. of N. J., 120 I. C. C. 405.

(11b) Combination rates on curbing from Granite Hill, Ga., to St. Petersburg, Fla., found not unreasonable, discriminatory, or unduly prejudicial as compared with lower rates contemporaneously in effect to Tampa, Fla. Because of Florida's peculiar location, there is practically no overhead traffic and carriers have been permitted to make rates to and from Florida points on Jacksonville combination. Beyond Jacksonville, rates are on a distance basis, and while rates to stations intermediate between Jacksonville and Tampa are higher than to Tampa, rates to latter point are protected by appropriate fourth-section applications and are said to be depressed because of water competition which has been actual in the past. Moreover, earnings under rates assailed compare favorably with those for comparable distances from Granite Hill to Alabama and Mississippi destinations, and from points in Georgia and South Carolina to same and other destinations in southern and middle Atlantic States. Georgia Quincy Granite Co. v. A. C. L., 120 I. C. C. 408.

(11c) Joint rates on scrap car wheels from Windsor, Ontario, Canada, to Michigan City, Ind., and Pullman, Ill., found unreasonable and unduly prejudicial, in so far as the transportation takes place within United States, to extent they exceeded or may exceed 72 and 55 cents, respectively, higher than corresponding rates from Detroit, Mich. Reparation awarded. Hyman-Michaels Co. v. B. & O., 120 I. C. C. 417.

(11d) Combination rate charged on coal from La Follette. Tenn., moving through Benton Harbor, Mich., to Milwaukee, Wis., reconsigned to Hawkeye, Iowa, found unreasonable to extent it exceeded a lower rate contemporaneously maintained on like traffic moving through Toledo, Ohio. Benton Harbor and Toledo are in same general territory, the distances over both routes are practically equal, and rates through the two gateways should be same. Reparation awarded. Reeves Coal & Dock Co. v. L. & N., 120 I. C. C. 428.

(11e) Findings in original report, 104 I. C. C. 408, that rates on rosin to Burlington, Ontario, Canada, from south Atlantic and Gulf ports and points taking same rates were not unduly prejudicial or unduly preferential; that rates from Gulf ports and points taking same rates were not unreasonable; and that rates from south Atlantic ports and points taking same rates were unreasonable to extent they exceeded rates contemporaneously in effect from Gulf ports to same destinations, affirmed. Vera Chemical Co. v. A. C., 120 I. C. C. 434.

(11f) Rates on sugar from New Orleans and points taking same rates to Marshall and Jefferson, Tex., found unreasonable in past to extent they exceeded present rates. Present rates found just and reasonable maximum rates for future, but unduly prejudicial to extent they exceed those contemporaneously in effect to Shreveport by more than 3 cents from Marshall and 4 cents from Jefferson. Marshall and Jefferson v. T. & P., 120 I. C. C. 455.

(11g) A finding of the commission made many years ago and designed primarily to place certain points upon a proper relationship, should not be accepted ipso facto as proving intrinsic unreasonableness in same rates subsequently attacked for sole purpose of reparation. Marshall and Jefferson v. T. & P., 120 I. C. C. 455, 458.

(11h) Fifth-class rates on dried seed peas, minimum 60,000 pounds, from Grace, Idaho, to Smithfield, Utah, found unreasonable as compared with lower commodity rates contemporaneously in effect on canned goods and green peas from and to same points; also with lower rates for comparable distances from Idaho to Utah points on various other commodities. The usual minimum for commodity rates on dried peas in this territory is 40,000 pounds and no good reason appears for a higher minimum in connection with commodity rates from Grace to Smithfield. Reasonable rate and minimum weight prescribed for future and reparation awarded. Morgan Canning Co. v. O. S. L., 120 I. C. C. 466.

(11i) Applicable rates on cotton-compress parts or pieces weighing less than 2,000 pounds from Houston and Winona, Miss., to Russellville, Little Rock, and Earle, Ark., found not unreasonable, but applicable rates on castings or forgings weighing 2,000 pounds or more each found unreasonable to extent they exceeded rates contemporaneously in effect from New Orleans, Jackson, and Meri-

dian to same destinations. Reparation awarded. Russellville Compress Co. v. G., M. & N., 120 I. C. C. 481.

(11j) Ratings and rates in official, southern, and western classifications on sandwich spread found unreasonable to extent they exceeded second class, l. c. l., in all three classifications, and fifth class in official and western classifications, and sixth class in southern classification, in carloads, subject to a 36,000-pound minimum. Reasonable ratings and rates prescribed for future and reparation awarded on shipments moving from Cleveland, Ohio, to various destinations. Sar-A-Lee Co. v. A., C. & Y., 120 I. C. C. 512.

(11k) Rates on bituminous coal from Elkville, Ill., to destinations in Missouri, Iowa, Kansas, Arkansas, Colorado, Montana, Nebraska, Oklahoma, South Dakota, and Wyoming found unreasonable and unduly prejudicial to extent they exceed corresponding rates from Dowell, Ill., and other points in so-called DuQuoin group. Except for slightly greater distance, transportation and other conditions from Elkville are substantially similar to those applying from the DuQuoin group, and Elkville should be included therein rather than in the southern Illinois group. Reasonable and nonprejudicial rates prescribed for future. Black Servant Coal Co. v. I. C., 120 I. C. C. 604.

(11l) Sixth-class rates on cement roofing slabs, reinforced with metal, from Wampum, Pa., to Toronto, Ontario, Canada, found unreasonable to extent they exceeded 75 per cent of sixth class, which lower basis was contemporaneously in effect from Chicago and other producing points to destinations in c. f. a. territory, and from Chicago to Sarnia, Windsor, and Toronto, Ontario, Canada for comparable hauls. Reparation awarded. American Cement Tile Mfg. Co. v. P. R. R., 120 I. C. C. 611.

(11m) Rates on agricultural limestone from West Stockbridge, Mass., to points in eastern New York found unreasonable and unduly prejudicial as compared with rates contemporaneously maintained from Buffalo. Reasonable and nonprejudicial rates and relationships prescribed for future and reparation denied, no shipments having moved under the rates found unreasonable and other evidence of damage being too uncertain and speculative to afford a sufficient basis for an award. Grangers Mfg. Co. v. N. Y. C., 120 I. C. C. 648.

(11n) Rate on eggs from Brownwood and Killeen, Tex., to Philadelphia, Pa., found unreasonable to extent it exceeded lower rate contemporaneously in effect from and to same points via routes other than route of movement, which lower rate also applied from other Texas points to Philadelphia for comparable distances. Reparation awarded. Sheaffer & Marvel v. B. & O., 120 I. C. C. 673.

(11o) Rate on scrap iron from East Radford, Va., to Brackenridge and Pittsburgh, Pa., and Steubenville, Ohio, found unreasonable to extent it exceeded Virginia cities basis of rates contemporaneously in effect from Hopewell and other Virginia points, and subsequently made applicable from East Radford. Reparation awarded. Dreifus Co. v. P. R. R., 120 I. C. C. 680.

(11p) Sixth-class rate on sawdust from Clarksburg, W. Va., to Newark, N. J., found unreasonable as compared with lower commodity rates contemporaneously in effect from points surrounding Clarksburg to same destination; between other points in same territory for similar distances; and to extent it exceeded rate subsequently established. Reparation awarded. Maloney v. B. & O., 120 I. C. C. 705.

(11q) Rate on lumber from Breckenridge, Tex., to Kaw, Okla., found unreasonable to extent it exceeded a lower rate contemporaneously in effect from numerous points in central Texas to Kaw for comparable distances. Reasonable rate prescribed for future and reparation awarded. Gulf Production Co. v. W. F. & S., 120 I. C. C. 709.

(11r) Rates on liquid tanning (quebracho) extract from Brooklyn, N. Y., to Winchester and Peabody, Mass., found not unreasonable as compared with lower rates on same commodity or on dried or solid extract from and to various other points. Carriers point out that fifth-class rates charged are on basis prescribed in 49 I. C. C. 421. Moreover, rate charged is approximately equal to that found reasonable by commission on liquid tanning extract from Mariners Harbor, N. Y., to Millville, Pa., for a distance considerably less than that here involved. Beggs & Cobb v. B. & M., 120 I. C. C. 711.

(11s) Line-haul rate, plus switching charge, on crushed stone from points on Chicago, North Shore & Milwaukee Ry., within the Racine, Wis., switching limits, to Chicago and other Illinois points found

not unreasonable as compared with rates on other articles moving between numerous points in same territory for comparable distances, or with rates on gravel from Fontana, Wis., a similarly situated short-line point, to Chicago. Carriers show that sand and gravel rates are depressed due to competitive conditions, and cite decisions in which higher rates have been prescribed in various sections of the country. Assailed rates do not appear unreasonable, and also apply from a group including North Milwaukee and Waukesha, Wis., competing points, to Chicago. Moreover, in 118 I. C. C. 633, present rate from Racine to Chicago, which does not include absorption of switching charges, was found not unreasonable. Racine Crushed Stone Co. v. C., M. & St. P., 120 I. C. C. 717.

(11t) The act condemns exaction of unreasonable rates and makes no distinction as between relative unreasonableness and unreasonableness per se. Nelson Fuel Co. v. C. & O., 120 I. C. C. 723, 725, 726.

(11u) Rate on green and green-salted hides and pelts, and tallow, in straight and mixed carloads from Wenatchee, Wash., to Portland, Oreg., found unreasonable as compared with lower rates from various other Washington and Idaho points to same destination. Similar rates from Billings, Butte, and Missoula, Mont., found out of line and their readjustment required. Reparation awarded and reasonable rate for future prescribed from Wenatchee. Bissinger & Co. v. G. N., 120 I. C. C. 745.

(11v) The maintenance of a higher rate to one point than to a few others to which it is closely related does not necessarily indicate that the higher rate is unreasonable, especially when, as here, the general conditions of transportation are substantially dissimilar. Consolidated Rendering Co. v. N. Y., N. H. & H. R. R., 123 I. C. C. 98, 100.

(11w) Each packing house is entitled to a reasonable rate upon its products to various markets of consumption, and these rates, again, should be fairly adjusted with reference to one another. Allied Packers v. B. & O. R. R., 123 I. C. C. 115, 117.

(11xy) Rate on cabbage from St. Elmo, Ala., to, Lima, Ohio, found unreasonable to extent it exceeded lower rate contemporaneously in effect to Akron, Canton, Cleveland, Sandusky, and Toledo, Ohio, and Detroit, Mich., farther distant points, which lower rate was subsequently made applicable to Lima. No justification exists for charging a higher rate to Lima than to farther distant points and presumption that this higher rate was unreasonable was not adequately rebutted. Reparation awarded. Cardosi & Co. v. B. & O., 122 I. C. C. 1.

(11z) Rates on tankage and dried blood, from, El Paso, Tex., to Los Angeles, Calif., and points taking same rates, found not unreasonable or unduly prejudicial as compared with lower rates contemporaneously maintained from Salt Lake City, Utah, to same destination, or with rates from and to various points in same general territory for comparable distances. Peyton Packing Co. v. A. & S., 122 I. C. C. 3, 10, 11.

(12a) Rate on soap stock from El Paso, Tex., San Francisco, Calif., found not unreasonable as compared with lower rate contemporaneously in effect to Chicago, Ill., but rates on soap stock to Los Angeles, and on inedible tallow to both San Francisco and Los Angeles found unreasonable and reasonable specific rates, in harmony with scale prescribed in 100 I. C. C. 4, for application on packing-house products, prescribed for future. Peyton Packing Co. v. A. & S., 122 I. C. C. 3, 11, 12.

(12b) Rate on edible tallow from El Paso, Tex., to Los Angeles, Calif., found unreasonable as compared with lower rates contemporaneously in effect from Utah points to the same destination, with rates from and to various points for comparable distances, and to extent it exceeded rate on packing-house products for similar distances under the scale prescribed in 100 I. C. C. 4. Reasonable rate prescribed for future. Peyton Packing Co. v. A. & S., 122 I. C. C. 3, 12, 13.

(12c) Fifth-class rate on graders' outfits with livestock in carloads, and first-class rate on excess livestock in less than carloads, from Hazlehurst, Miss., to Hartselle, Ala., found unreasonable as compared with rates contemporaneously applicable between points in contiguous territory wherein transportation conditions are similar, and to extent they exceeded lower first-class and fifth-class rates subsequently established, which lower rates the commission found reasonable as maxima in 61 I. C. C. 308, from New Orleans, Mobile, and Pensacola, to Nashville. Reparation award-

ed. Jones Construction Co. v. L. & N., 122 I. C. C. 18.

(12d) Fifth-class rates assessed on petroleum products from Bayonne and Tremley Point, N. J., to Fresh Pond, N. Y., all Group A points, found unreasonable as compared with commodity rates from various refining points to destinations in eastern trunk-line and New England territories; as compared with commodity rates contemporaneously in effect from Point Breeze, a Philadelphia group point, to Fresh Pond, established in compliance with commission's findings in Transcontinental Oil Co., 89 I. C. C. 738; and to extent it exceeded lower rate subsequently made effective to all Group A points, some of which involve a materially longer haul than to Fresh Pond. Reparation awarded. Transcontinental Oil Co. v. C. R. R. Co. of N. J., 122 I. C. C. 61.

(12e) Sixth-class rate on printing paper from Newburgh and Salisbury Mills, N. Y., to Montclair, N. J., found unreasonable as compared with lower corresponding rates contemporaneously in effect to Newark, Nutley, Rutherford, and Belleville, N. J., points in the general vicinity of Montclair. Reparation awarded. Holden Paper Co. v. E. R. R., 122 I. C. C. 130.

(12f) Commodity rates on cowpeas from various points in South Carolina to New Orleans, found unreasonable to extent they exceeded lower class D rates contemporaneously in effect. In 10 I. C. C. 281, the commission recognized propriety of class D ratings on this commodity in southern territory; moreover, the situation here presented is an abnormality requiring special justification. See 29 I. C. C. 18 and 101 I. C. C. 424. Reasonable rates prescribed for future and reparation awarded. Gay, Sullivan & Co. v. A. G. S., 122 I. C. C. 201.

(12g) Rates on window glass from, Fort Smith, Ark., and Okmulgee, Okla., and on rough-rolled glass from Okmulgee to destinations in Texas, found not unreasonable, discriminatory, or unduly prejudicial as compared with those contemporaneously in effect from Shreveport, La., a competing point, to same destinations; except that such rates are unduly prejudicial to Fort Smith and Okmulgee and unduly preferential of Shreveport, to extent that rates from Fort Smith and Okmulgee to Gainesville exceed 6 cents less than the contemporaneous rates from Shreveport, and to extent that rates from Fort Smith and Okmulgee to Sweetwater and San Antonio exceed 4 and 5 cents, respectively, higher than the contemporaneous rates from Shreveport. Nonprejudicial bases of rates prescribed. Harding Glass Co. v. A., T. & S. F., 122 I. C. C. 217.

(12h) Rate on box board from Denver, Colo., to Oklahoma City, Okla., found not unreasonable as compared with rates contemporaneously in effect from same point to Kansas City, St. Louis, and Chicago and from two last-named points and St. Paul and Fox River group in Wisconsin to Oklahoma City. Complainant sought same rate on its traffic as that in effect from St. Louis to Oklahoma City, but difference in distance in favor of St. Louis does not warrant a parity in rates. Moreover, rates prescribed on paper and paper articles from Fox River and related northern groups to destinations in Oklahoma and other States, were subsequently made applicable from Denver, and carriers urge that because of this fact complainant has enjoyed a commodity rate substantially lower than class rates previously maintained. Oklahoma Paper Co. v. M. K. T., 122 I. C. C. 229.

(12i) Rates on fluorspar from Mesilla Park, N. Mex., to Torrance, Calif., found unreasonable to extent it exceeded a lower rate contemporaneously in effect to San Francisco involving a greater haul. Reparation awarded. Llewellyn Iron Works v. A., T. & S. F., 122 I. C. C. 232.

(12j) Rates from more sparsely settled and less well-developed western portions of the Dakotas may properly be higher, relatively, than rates from the eastern portions. Grain and Products, 122 I. C. C. 235, 267.

(12k) Rates on grain from points in Indiana on the Chicago, Indianapolis & Louisville Ry. to Chicago, when reshipped over lake or lake-and-rail lines, found not unreasonable or otherwise unlawful because lower than rates on similar traffic from same origin points to Indianapolis. Complainant contended that assailed rates are unduly low as a result of which traffic is diverted by way of Chicago instead of moving by way of Indianapolis. However, local rates to Chicago are upon a much higher level than rates assailed and evidence of shippers is to effect that the bulk of their grain moves to interior destinations and

Ohio River markets and that greater quantities of grain are shipped to Indianapolis than to Chicago the latter market being desirable principally for off-grade grain. Indianapolis Board of Trade v. C., I. & L., 122 I. C. C. 289.

(12l) Rate on linseed oil from Fredonia, Kans., to Kansas City, Mo., found unreasonable as compared with rates from Chicago, Des Moines, Minneapolis, St. Louis, and Omaha, to same destination; from and to other points for comparable distances; and to extent it exceeded rate constructed in accordance with distance scale prescribed in 98 I. C. C. 183, on vegetable oils between points in the Southwest and from Oklahoma and other southwestern States to Kansas City and points in western trunk-line territory. Reasonable rate prescribed for future and reparation awarded. Fredonia Linseed Oil Works v. A., T. & S F., 122 I. C. C. 291.

(12m) Rates on fresh berries, preserved in sugar, in barrels, from Seattle and Tacoma, Wash., Portland, East Portland, Salem, and Eugene, Oreg., to Los Angeles Calif., found unreasonable as compared with rates on canned and fresh fruit from and to the same points, on the same commodities, including green vegetables, from various points to Los Angeles, and on citrus fruits from Los Angeles to various destinations for comparable distances. Reparation awarded. North Ontario Packing Co. v. O. W. R. R. & Nav. Co., 122 I. C. C. 360.

(12n) Rates on furniture from Fort Smith Ark., to Florence, Sheffield and Tuscumbia, Ala., found not unreasonable or discriminatory as compared with lower rates to Birmingham, Ala., from Florence to Ft. Smith, or from Fort Smith to eastern seaboard cities, but unduly prejudicial to extent that rate to Florence exceeds that contemporaneously maintained to Birmingham. Rates assailed compare favorably with those prescribed in 100 I. C. C. 127 and 112 I. C. C. 302, for comparable distances, and considering fact that a portion of the haul from compared points is through territory taking a lower level of rates comparisons indicate that rates assailed are not unduly high. Undue prejudice ordered removed and reparation denied. Florence Chamber of Commerce v. L. & N., 122 I. C. C. 367.

(12o) Rate on crushed marble, in sacks, from Gantt's Quarry, Ala., to Biloxi, Miss., found unreasonable as compared with lower rates on crushed stone and crushed marble from and to points in same general territory for comparable distances, and to extent it exceeded rate contemporaneously in effect on crushed marble from Moretti, Ala., to Gulfport, Miss., minimum 90 per cent of marked capacity of car, except when loaded to full visible capacity, the distance from Moretti to Gulfport approximating that from Gantt's Quarry to Biloxi. Reparation awarded. Dagostin & Angelini Bros. v. L. & N., 122 I. C. C. 385.

(12p) Proportional rates on grain and products from Mississippi River gateways and points west thereof to intermediate destinations on the Gulf & Ship Island R. R., higher than to farther distant points, found not unreasonable or otherwise unlawful. Higher rates to intermediate points were permitted to meet rates of trunk-line competitors at junction points by fourth-section order. Moreover, carriers show that rates to points on the Gulf & Ship Island compare favorably with rates from same points to destinations in Mississippi and Louisiana on the New Orleans Great Northern, Mississippi Central, and Gulf, Mobile & Northern, and are on a lower level than rates to the Southeast. Jackson Traffic Bureau v. A. & V., 122 I. C. C. 387, 388, 389.

(12q) Class artes on wrapping paper and paper articles from Cincinnati, Ohio, to destinations in Missouri, Kansas, Iowa, Nebraska, and Colorado, found unreasonable and unduly prejudicial as compared with lower commodity rates contemporaneously in effect from Fox River group prescribed in 66 I. C. C. 571, to same destinations. However, as practice of basing interterritorial rates on a combination of factors to and from the Mississippi River has been in effect for many years and rates assailed, judged as combination rates, do not produce excessive earnings, they were not unreasonable in the past and no damage has been shown as a result of undue prejudice which may have existed. Reasonable and nonprejudicial rates prescribed for future. Fox Paper Co. v. A., T. & S. F., 122 I. C. C. 399.

(12r) Class rate on wood pulp from Philadelphia and Baltimore to Fort Edward, N. Y., found not unreasonable as compared with lower commodity rates from certain Philadelphia piers, New York, and Boston to same destination, or with commodity rates in effect generally

from Philadelphia and Baltimore to various New York and Canadian destinations. While carriers subsequently established a commodity rate lower than that charged, assailed rate compares favorably with rates approved by commission on this commodity in 104 I. C. C. 327 and other cases. International Paper Co. v. B. & O., 122 I. C. C. 440.

(12s) Rates on anthracite coal from points in Pennsylvania and West Virginia to West Roxbury and Bemis (Watertown), points outside the Boston switching district, and Roxbury, Boylston Street, and Forest Hills, Mass., points within the district intermediate to Boston found not unreasonable or unduly prejudicial to West Roxbury as compared with lower rates to Boston, but unduly prejudicial to Roxbury, Boylston Street and Forest Hills. Rates to Bemis found unduly prejudicial to extent they exceed rates contemporaneously in effect to other stations in Watertown. Lower rates to Boston are protected by fourth-section orders and are shown to be depressed by water competition, but no good reason appears for maintaining higher rates to Bemis than to other stations in Watertown. Whittemore's Sons v. N. Y., N. H. & H., 122 I. C. C. 451.

(12t) Rate on bituminous-coal screenings from Harrisburg, Ill., to Sioux City, Iowa, found unreasonable as compared with lower rates from mines in Harrisburg district to destinations in Missouri Nebraska, North Dakota, South Dakota and Minnesota for comparable distances and to extent it exceeded a lower rate contemporaneously in effect from southern Illinois Mines to Sioux City over various routes, which lower rate was subsequently established from Harrisburg to Sioux City via route of movement. Reparation awarded. Saline Coal Corp., v. C., M. & St. P., 122 I. C. C. 467.

(12u) Rate on fresh meats, in mixed carloads with packinghouse products from Jacksonville, Ill., to Detroit, Mich. found not unreasonable but unduly prejudicial to extent it exceeded a lower rate contemporaneously in effect from St Louis, Mo. While Jacksonville is not intermediate to St. Louis, it is nearer to Detroit. However, rate assailed was based on distance scale prescribed in 45 I. C. C. 254 and record does not warrant a finding that such rate was unreasonable. Powers-Begg & Co. v. W. Ry., 122 I. C. C. 476.

(12v) Rates on linseed oil from Portland, Oreg., to Spokane, Tacoma, and Seattle, Wash., and to San Francisco, Paraffin, Berkeley, and Los Angeles, Calif., found not unreasonable or otherwise unlawful as compared with rates on creosote oil, coconut oil, cottonseed oil, cooking oils, and various other commodities, from Chicago, Milwaukee, and Minneapolis, to the same west coast destinations. While the compared rates are lower than those on linseed oil, no showing was made as to competition or any movement from and to points specified. Moreover, rates assailed compare favorably with those approved by commission in 21 I. C. C. 640 and other cited cases. Portland Linseed Oil Works v. G. N., 122 I. C. C. 484.

(12w) Combination rates on lumber from points in Mississippi to Mariemont, Ohio, found unreasonable to extent they exceeded lower rate subsequently established. Rates assailed were based on Cincinnati, using factors of southern lines plus the local to Newtown, Ohio, applicable to Mariemont, an intermediate point, under proper tariff provision, and subject to combination rule. The rate subsequently established was a proportional rate from Cincinnati to Mariemont on shipments originating in the South and is reasonably aligned with rates on lumber from same origin territory to various Ohio points in vicinity of Mariemont. Reparation awarded on shipments moving prior to establishment of lower rate Stanley Lbr. Co. v. A. & V., 122 I. C. C. 506.

(12x) Rates on scrap copper and scrap brass, from points in official, southern, and western classification territories to East Liberty, Pittsburgh, Pa., found not unreasonable as compared with rates on like traffic between various points for comparable distances, except in so far as they exceeded those based on the general readjustment prescribed in 109 I. C. C. 351, modified in 118 I. C. C. 725. Reparation denied. Federated Metals Corp. v. B. & O., 122 I. C. C. 513.

(12y) Rates on prepared sizes of anthracite coal from Wyoming, Lehigh, and Schuylkill mines in Pennsylvania, to points in Albany-Utica-Syracuse group and other points taking same rates over one or more routes considered as a whole found unjust, unreasonable, and unduly prejudicial and preferential in relation of such rates to each other. Rates to Rochester, N. Y., found unreasonable to

extent they exceed those contemporaneously in effect via other routes for comparable distances; and rates to Carthage and Clayton, N. Y., found unreasonable to extent they exceed rates contemporaneously maintained to Buffalo and Watertown, N. Y. Just and reasonable rates prescribed for future and findings in 104 I. C. C. 514, reversed in so far as inconsistent with findings herein. Anthracite Coal Investigation, 122 I. C. C. 527.

(12z) Rates on grain and products from Ohio and Mississippi river crossings and Mount Vernon, Ind., to Florence Sheffield, and Tuscumbia, Ala., found unreasonable to extent they exceed rates found reasonable in 118 I. C. C. 732 and other cited cases, and unduly prejudicial to extent they exceed by more than 2 cents per 100 pounds the rates contemporaneously applied on like traffic to Corinth. Reasonable and nonprejudicial rates prescribed for future and reparation denied. Florence Chamber of Commerce v. I. C., 122 I. C. C. 653.

(13a) Rates prescribed to the Mississippi Valley were not designed as standards of reasonable maximum rates, but primarily to bring rates in harmony with fourth section, and at same time return to carriers substantially the same revenue as earned under adjustment theretofore maintained. Florence Chamber of Commerce v. I. C., 122 I. C. C. 653, 657 658.

(13b) Rate on gravel from Holliday, Kans., to St. Joseph, Mo., found unreasonable to extent it exceeded a lower rate contemporaneously in effect from various points in Kansas to points in Missouri for greater distances, which lower rate also applied from Holliday to St. Joseph over a route other than route of movement. Reasonable rate prescribed for future and reparation awarded Spencer Co. v. A., T. & S. F., 122 I. C. C. 689.

(13c) Although the question of relationship between rates on grain and rates on grain products has been presented frequently for commission's determination, it has never prescribed a fixed differential for universal application. The commission has been inclined rather to treat each case on its merits, recognizing the differences in conditions which prevail in various parts of the country. Accordingly, it has been held in some instances that there should be a substantial parity between rates on wheat and flour, in other cases differentials have been prescribed, and in others wheat and flour rates were prescribed on same basis. Ogden Grain Exchange v. A. & S., 122 I. C. C. 691, 714.

(13d) Rates on drag-line machinery from Dayton and Tippecanoe City, Ohio, to Tarke, Calif., found not unreasonable as compared with lower rate contemporaneously in effect from Memphis, Tenn., Owen, Wis., and Illinois points to Spokane, Wash. Smith Bros. v. B. & O., 122 I. C. C. 745.

(13e) Fifth-class rate on quebracho tanning extract from New York Harbor points to Ludlow, Pa., found unreasonable as compared with lower rates contemporaneously in effect from Boston, Mass., to points in vicinity of Ludlow, and to extent it exceeded a lower commodity rate contemporaneously in effect to Salamanca, N. Y., a farther distant point. Reasonable rate prescribed for future and reparation awarded. Curtis Leather Co. v. P. R. R., 123 I. C. C. 1.

(13f) Rates on coke and bituminous and anthracite coal from eastern points to Beaver Dam, Wis., found not unreasonable or unduly prejudicial because of factors from Milwaukee to Beaver Dam, or as compared with factors on same commodities from Milwaukee to various other eastern Wisconsin destinations. Factor assailed was established as outgrowth of a general revision of coal rates in Wisconsin with a view to harmonizing rates, and appears to be in line with the general level throughout that State. Through rates in issue are on a group basis both as to origins and destinations, and represent efforts of years towards balancing the delicate competitive situation obtaining among carriers, producers and distributors. Complainant's comparisons can not be taken as the measure of reasonableness in this wide territory, nor do exceptions which obtain at competitive Wisconsin points within a short distance of one or more docks show unreasonableness of rates to Beaver Dam. Beaver Dam Chamber of Commerce v. C., M. & St. P., 123 I. C. C. 5.

(13g) Rates on sheet iron or steel from points in Alabama, Indiana, Illinois, Kentucky, Missouri, Pennsylvania, the Virginias, and other interstate points in defined territories, to Houston, Tex., found not unreasonable as compared with rates on same and various other articles

from Pittsburgh to same destination. Rates assailed compare favorably, distance considered, with those found reasonable in 100 I. C. C. 173 and 93 I. C. C. 285, on iron and steel plates from St Louis to Dallas and Fort Worth, Tex., and on steel plates and sheet iron from Niles, Ohio, a point in the Pittsburgh district, to Mexia, Tex., respectively. Davis George Mfg. Co. v. A. G. S., 123 I. C. C. 10.

(13h) Third-class rates on printing and wrapping paper, l. c. l., from Niagara Falls, N. Y., to Lynchburg, Va., found not unreasonable or unduly prejudicial as compared with lower l. c. l. rates to Lone Jack, South Boston, and Danville, Va., to which Lynchburg is intermediate. Carriers showed that rates from Niagara Falls to Lynchburg compare favorably with corresponding rates between other points in that territory. Moreover fourth-section departures were protected by appropriate applications, and were subsequently removed by increasing the rates from the farther distant points to level of rates to Lynchburg. Lynchburg Traffic Bureau v. N. Y. C., 123 I. C. C. 15

(13i) Fifth-class rate on brass ingots from Chicago, Ill., to Sturgis, Mich., found not unreasonable as compared with lower commodity rate equal to sixth class subsequently established by carriers, under a general readjustment of rates in c. f. a. territory, which basis commission approved in 96 I. C. C. 351. In cited case the rate from Chicago to Sturgis was not directly involved, and revision suggested was in nature of a general readjustment which might require both increases and reductions. Complaint offered comparisons with a number of miscellaneous commodities for similar distances, but made no showing with respect to transportation, competitive, and other conditions attending their movement. Carriers, on the other hand, showed that when these shipments moved the general rate bases on brass ingots in c. f. a. territory was fifth class; also that the same bases of rates apply on numerous commodities, which move in substantially greater volume than brass ingots. Hartman Ingot Metal Co. v. C., B. & Q., 123 I. C. C. 20.

(13j) Combination rate on sporadic shipment of cane syrup from Inwood, Fla., to Columbus, Ga., found unreasonable as compared with lower rates between various points in same general territory for comparable distances, and to extent it exceeded a lower joint rate subsequently established. Reparation awarded. Hardaway-Cargill Co. v. L. & N., 123 I. C. C. 23.

(13k) Rate on cotton-factory products, l. c. l., from Mobile, Ala., via water-and-rail route to Rockland, Md., found unreasonable as compared with lower rate contemporaneously in effect over water-and-rail routes from Mobile to Baltimore, Md., Chester, Pa., and various points in New England, New York, New Jersey, and Pennsylvania, from various Mississippi and Tennessee points to Rockland, and to extent it exceeded the water-and-rail rate contemporaneously in effect from Meridian, Miss., to Rockland. Reasonable rate prescribed for future, and reparation awarded. Cotton Mills Products Co. v. Mallory S. S. Co. 123 I. C. C. 25.

(13l) Fourth-class l. c. l. and class D c. l. rates charged on shipments of casks, kegs, and cases containing empty bottles returned from points in Wisconsin and Michigan to Duluth, found unreasonable to extent they exceeded one-half of fourth-class rate subject to a fourth-class minimum charge contemporaneously in effect to St. Paul, Minneapolis, Chicago, and Milwaukee, which lower rate was subsequently established from and to points here involved, and were previously found reasonable by commission from various points to Duluth in 73 I. C. C. 637 and 95 I. C. C. 3. Reparation awarded. Fitger Co. v. D., S. S. & A., 123 I. C. C. 27.

(13m) Local rate on redwood lumber from Pittsburg, Calif., to Hayden, Ariz., originally moving from Casper, Calif., to Pittsburg by water, found not unreasonable, discriminatory, or unduly prejudicial, as compared with lower ex-water proportional rate from Pittsburg to Phoenix and other points more distant than Hayden, or with lower rate established to Hayden subsequent to movement. Such lower rates are on a low basis, having been established because of market and carrier competition, which is not reflected at Hayden, and subsequent reduction is not conclusive of unreasonableness of the higher rate. Redwood Mfg. Co. v. S. P. Co., 123 I. C. C. 30, 32.

(13n) Rates on metal beds from New Orleans to destinations in western Louisiana, Arkansas, Oklahoma, and Texas found not unreasonable or unduly prejudicial as compared with rates contemporaneously in effect from St. Louis, At-

lanta, Chicago, Kenosha, and New York to same destinations, except to extent that rates to Oklahoma exceed rates based on distance scale prescribed herein; that rates to Texas common points exceed Table 14 rate prescribed in 77 I. C. C. 473; and that rates to Texas differential territory exceed rates constructed in accordance with method prescribed, all subject to a minimum of 30,000 pounds. Reasonable rates prescribed for future. Crescent Bed Co. v. C., R. I. & P., 123 I. C. C. 41.

(13o) Applicable rate on potatoes from Pablo and Whitehall, Mont., to New Orleans, La., found not unreasonable as compared with lower rate contemporaneously in effect to Houston, Tex., a farther distant point. While subsequent to movement tariff naming lower rate was made subject to rule 77 of Tariff Circular 18-A, and such lower rate was made applicable from and to points here involved, neither the subsequent reduction nor the fourth-section violation, in and of themselves, establish unreasonableness of the rate to New Orleans. Moreover, carriers showed that higher rates contemporaneously applied on this traffic between various points in same general territory for comparable distances. Kohlman Bros. & Sugarman v. L. & N., 123 I. C. C. 56.

(13p) Applicable rate on cotton compresses, k. d., loose or in packages, charged on shipments of castings and forgoeings, constituting parts of a compress, from Meridian, Miss., to Blytheville, Ark., found not unreasonable. These shipments were tendered on separate bills of lading, and moved on different dates, none consisting of a complete compress. Distance considered, the rate charged compares favorably with those contemporaneously applicable between various points, and higher rates were found not unreasonable on commodities having like transportation characteristics in 45 I. C. C. 549 and 51 I. C. C. 138, between other points in same general territory for comparable distances. Blytheville Compress & Warehouse Co. v. M. & O., 123 I. C. C. 95.

(13q) Sixth-class rate on acid phosphate from Lowell, Mass., to East Windsor, Conn., found not unreasonable or otherwise unlawful as compared with lower commodity rate subsequently established, or with commodity rates contemporaneously in effect to Bridgeport, Hartford, and other Connecticut points, and from Carteret and Grasselli, N. J., to New England points for comparable distances. Maintenance of a higher rate to East Windsor than to the other points to which it is closely related does not necessarily indicate that higher rate is unreasonable as the general conditions of transportation are substantially dissimilar; nor is the subsequent reduction, of itself, sufficient to justify presumption that former rate was unreasonable. Consolidated Rendering Co. v. N. Y., N. H. & H., 123 I. C. C. 98.

(13rs) Rates on coal from Thompson, Utah, to destinations in Utah, Nevada, and California west of Castle Gate, Utah, during Federal control, found not unreasonable as compared with those from Castle Gate, and Rock Springs, Wyo., to same destinations, and from Montana points for comparable distances, except to destinations on Nevada Northern, Western Pacific, and Los Angeles & Salt Lake. The more favorable transportation conditions from Rock Springs was recognized in 89 I. C. C. 666, which tends to offset somewhat longer average distances from Castle Gate or Thompson; a differential of 10 cents in favor of Castle Gate can not be considered an unreasonable charge for the 94-mile haul from Thompson; and Montana coal rates are on a somewhat lower level than those in other western States. American Fuel Co. v. A., T. & S. F., 123 I. C. C. 101.

(13t) On further consideration, former report 118 I. C. C. 205, wherein rates on newsprint paper from Berlin, N. H., to Birmingham, Ala., were found unreasonable and unduly prejudicial in comparison with rates to Nashville and Memphis, modified in part and case reopened for further hearing with a view to establishment of an appropriate relationship between these points. Birmingham News Co. v. A., B. & A., 123 I. C. C. 133.

(13u) Rates on sand and gravel from Janesville, Afton, and Beloit, Wis., to complainant's plants located in the Mayfair and Weber districts in Chicago, Ill., found not unreasonable or discriminatory, but unduly prejudicial to extent they exceeded rates contemporaneously applicable on like traffic from same points of origin to so-called inner-zone destinations in Chicago switching district. Reparation denied. Chicago Fire Brick Co. v. C. & N. W., 123 I. C. C. 164.

(13v) Joint rates on shipments of bituminous coal during Federal control

from central and southern Illinois to Edgebrook, a point within Chicago switching district, and Morton Grove, a point immediately outside of that district, found not unreasonable, but combination rates based on Chicago, plus local rate beyond, found unreasonable as compared with lower rates contemporaneously in effect to near-by competing points both within and without the district. See also 73 I. C. C. 152. Reparation awarded. Chicago Coal Merchants Asso. v. Director General, 123 I. C. C. 169

(13w) In a general proceeding, where rates on practically all articles other than a few so-called basic commodities are in issue, the commission should, in fixing level of rates on any one article, have reasonable regard for relative transportation conditions of respective articles and prescribe rates on each commodity fairly related to those prescribed on others with similar characteristics. Consolidated Southwestern Cases, 123 I. C. C. 203, 304.

(13x) Rates to, from, and between points in Texas differential territory and to, from, and between points on the Rock Island line, Tyronne to Texahoma, Okla., inclusive, may properly be higher than rates for like distances in the Southwest. Consolidated Southwestern Cases, 123 I. C. C. 203, 389, 390.

(13y) Rates on brick and articles taking same rates from designated points in Ohio and West Virginia to Verona Brackenridge, and Tarentum, Pa., found in violation of fourth section of the act and unreasonable to extent they exceeded rates from the same origin points to Butler, a farther distant point. Reasonable rates prescribed for future, and reparation awarded. Globe Brick Co. v. P. R. R., 123 I. C. C. 498.

(13z) Rates on fertilizer from Philadelphia, Pa., to destinations on Long Island, N. Y., found unreasonable as compared with lower rates contemporaneously in effect from Baltimore to destinations in same groups for considerably greater distances; with rates on fertilizer in trunk-line territory generally; and to extent they exceeded rates subsequently established. Reparation awarded. Tunnell & Co. v. P. R. R., 123 I. C. C. 581.

(14a) Rate on lumber from Burks Falls, Ontario, Canada, to Pontiac, Mich. found not unreasonably as compared with rates contemporaneously in effect to Toledo, Detroit, and Chicago. While comparisons of distances and earnings show rates that are relatively lower than rate assailed, Toledo, Detroit, and Chicago are lake ports and failure to show conditions under which rates to those points were established impairs their probative value. Strable Lbr. & Salt Co. v. C. N. Ry., 123 I. C. C. 585.

(14b) Rate on clay from Calhoun Mo., to Pittsburg, Kans., found unreasonable as compared with lower rate from point of origin to Kansas City, Mo., for comparable distances over various routes; with single-line and joint-line distance rates for similar distances prescribed in 77 I. C. C. 473; and to extent it exceeded a lower rate subsequently established over route of movement. Pittsburg Clay Products Co. v. M.-K.-T., 123 I. C. C. 605.

(14c) Mere fact that rate assailed appears to be out of line with a few other rates to which it is closely related, is not of itself sufficient to afford basis for a finding of unreasonableness. City Coal Co. v. N. Y., N. H. & H., 123 I. C. C. 609, 611.

(14d) Rates on salt from mines in Kansas, Michigan, and Ohio, to Mason City, Ia., found unreasonable to extent they exceeded lower commodity rates prescribed in Salt Cases of 1923, 92 I. C. C. 388. In 74 I. C. C. 409, the commission explained that proposal to reduce rates to Des Moines, without corresponding reductions to Mason City, was obviously unjustifiable, and recommended that Mason City, and any other important salt-consuming point in northeastern and central Iowa, similarly situated, be given the same reduction. Complainants had a right to rely upon a prompt compliance with such recommendations which carriers failed to carry out until compelled to do so by order in the Salt Cases. Reparation awarded. Decker & Sons v. U. P. R. R., 123 I. C. C. 621.

(14e) Rates on cedar poles from Sand Point, Idaho, to Shingle Springs, Calif., found unreasonable as compared with lower rates contemporaneously in effect to San Jose, Stockton, Los Angeles, and Fresno, Calif., farther distant points; with those from San Pedro, Calif., to El Paso, Texas., and Colorado common points for comparable distances; and to extent they exceeded the contemporaneous aggregate of intermediate rates. While record indicates that factors making up the lower combination are in-

fluenced by water competition, it fails to convince that the combination is less than a reasonable maximum charge. Reasonable rates prescribed for future and reparation awarded. McFarland Co. v. G. N., 123 I. C. C. 631.

(14f) Rates on sulphur from Gulf Hill, Tex., to Curtiss and Kennard, Ariz. found unreasonable as compared with rates contemporaneously in effect from same point to San Francisco and from latter point to Ogden, Utah, and Curtiss. No reason appears why rates assailed should be relatively higher than those from San Francisco to Ogden and Curtiss, and rate constructed on that basis compares favorably, distance and earnings considered, with rate prescribed in 74 I. C. C. 641, from Gulf Hill to San Francisco and Los Angeles. Reasonable rate prescribed for future and reparation awarded. Apache Powder Co. v. A., T. & S. F., 123 I. C. C. 639.

(14g) Class rates on interstate traffic from Bluefield, W. Va., to destinations in West Virginia on the Virginia Ry., between Princeton and Oak Hill Junction, W. Va., found unreasonable and unduly prejudicial as compared with local distance rates contemporaneously maintained by Norfolk & Western and the Virginian; with joint rates from Charleston, W. Va., on the Chesapeake & Ohio to destinations on the Virginia; and to extent they exceed distance rates prescribed. Present disparity between rates here under consideration is clearly unwarranted, as transportation conditions throughout this territory are substantially the same. Reasonable and nonprejudicial distance rates prescribed for future. Bluefield Traffic Bureau v. N. & W., 123 I. C. C. 653.

(14h) Fifth-class rates on manufactured iron and steel articles from Youngstown, Newton Falls, and Niles Ohio, and points grouped therewith, to Buffalo and other western New York and northwestern Pennsylvania points, found unreasonable as compared with lower rates contemporaneously in effect between points in c. f. a. territory; from Pittsburgh district to St. Louis under distance scale prescribed in 96 I. C. C. 682; from Buffalo to destinations in Youngstown district; with aggregate of interduly prejudicial to extent they exceed ceeded distance rates prescribed, and unduly prejudicial to extent they exceed the contemporaneous rates from Buffalo to same destinations. Reasonable and nonprejudicial distance rates prescribed for future and reparation awarded. Concrete Steel Co. v. B. & O., 123 I. C. C. 677.

(14i) Third-class rate on electrolytic cells (electrolyzers) from Pittsburgh, Pa., to Seattle, Wash., found unreasonable as compared with lower rates contemporaneously applicable on machinery and electrical applicances, including batteries, fans, motors, generators and engines combined, carbonating machines, and various other articles, and to extent it exceeded lower commodity rate applicable on machinery and machines, n. o. s. Reasonable rate prescribed for future and waiver of undercharges authorized. Pacific Nitrogen Corp. v. C., B. & Q., 123 I. C. C. 717.

(14j) Commodity rates assessed on scrap iron from Fowler and Rensselaer, Ind., to Kewanee, Ill., and from Rensselaer to Gibson, Ind., over an interstate route, found not reasonable as compared with rates contemporaneously in effect from various other Illinois, Missouri, and Iowa points to same destinations for comparable distances. While some commodity rates are shown to be lower, record indicates that rates in general in c. f. a. territory are on a much higher basis than those assailed. Moreover, rate to Gibson is lower than that prescribed in 98 I. C. C. 533, from Rensselaer to Benton Harbor, Mich., and latter rate compares favorably with rates fixed by the Indiana Public Service Commission. Karnowsky v. C., B. & Q., 123 I. C. C. 749.

(14k) Fifth-class rate on structural steel from Denison, Tex., to Henryetta, Okla., based on the short single-line distance over a route other than route of movement, FOUND unreasonable as compared with lower rates contemporaneously in effect for similar distances between various points in same general territory based on the distance scale prescribed in 77 I. C. C. 473, and to extent it exceeded joint-line rate under that scale for the distance shipments actually moved. Reparation awarded. Okmulgee County Commrs. v. M.-K.-T., 126 I. C. C. 1.

(14l) Rates on bituminous coal from mines in Pennsylvania and West Virginia to points in the Warren district in Pennsylvania, which is included in the Buffalo, N. Y., rate group, FOUND not unreasonable or unduly prejudicial as compared with those from same points to Buffalo

rate group as a whole. Buffalo group adjustment is not maintained solely with respect to Pittsburgh district and any reduction in rates to Warren district would require similar reductions throughout a large portion of the group. Rates are not out of line with those for similar hauls from other Pennsylvania groups to points in the East and in view of delicacy of coal rate adjustment in this territory and long-continued maintenance of the Buffalo group, evidence is not sufficient to require a disruption of that group. National Petroleum Asso. v. B. & O., 126 I. C. C. 11.

(14m) Rates on iron and steel tank material from points in Pennsylvania, Ohio, Illinois, Indiana and from Kansas City, Kans., to destinations in Kansas, Oklahoma, Indiana and Texas. FOUND unreasonable to extent they exceeded those contemporaneously applicable on iron or steel pipe. Rates on tank material are same as those on pipe from Chicago territory to western trunk-line and lower Mississippi River points, from c. f. a. territory to points in Colorado, Wyoming, Montana, California, Oregon, and Washington, and from Pittsburgh territory to trunk-line points and no sufficient reason appears for a difference in rates on these commodities between points under consideration. See 100 I. C. C. 245. Reasonable basis of rates prescribed and reparation awarded. Sinclair Crude Oil Co. v. A., T. & S. F., 126 I. C. C. 73.

(14n) Second-class rate on furniture frames from Chicago, to Burlington, Iowa, FOUND unreasonable to extent it exceeded lower commodity rate contemporaneously in effect from Chicago to New London, Iowa, a farther distant point to which Burlington is directly intermediate. Lower rate was subject to Rule 77 of Tariff Circular 18-A and commission has consistently held that publication of rates subject to that rule is a substantial compliance with long-and-short-haul provision of fourth section of the act, and affords an adequate basis for an award of reparation on shipments moving to intermediate points at charges higher than those to farther distant points. Reparation awarded. Burlington Shippers Asso. v. C., B. & Q., 126 I. C. C. 179.

(14o) Rates on grain and products from points on specified lines in Idaho, Montana, Oregon, Utah, Wyoming, and Colorado, to north Pacific coast and California terminals, FOUND not unreasonable as compared with rates from various points in California, Colorado, Idaho, Kansas, Montana, Minnesota, Nebraska, Oklahoma, and Texas, except from and to points shown in appendix. Reasonable rates prescribed between latter points, and carriers required to maintain relationships in present rates to Portland, Oreg., on the one hand and other north Pacific coast points on the other. Ogden Grain Exchange v. A. E. R. R. Co., 126 I. C. C. 255.

(14p) Rates on grain and products from all origin points on specified lines in Idaho, Montana, Oregon, Utah, Wyoming, and Colorado, to destinations in interior California, the Imperial Valley, and Arizona, FOUND unreasonable as compared with rates on same commodities from various points in California, Colorado, Idaho, Kansas, Montana, Minnesota, Nebraska, Oklahoma, and Texas. Reasonable bases of rates prescribed. Ogden Grain Exchange v. A. E. R. R. Co., 126 I. C. C. 255.

(14q) Upon a consideration of unusually favorable circumstances and conditions surrounding movement of lake-cargo coal; the relatively lower rates from southern districts; the decided change in relative tonnage shipped from Pittsburgh and Ohio districts and the southern districts, respectively; the present depressed condition of coal-mining industry in Pittsburgh and Ohio districts; the changed conditions since decision regarding those rates issued in 101 I. C. C. 513; and fact that cost of the service warrants a substantial rate reduction, HELD: That bituminous coal rates from mines in Pennsylvania, Ohio, and West Virginia in the Pittsburgh, Ohio No. 8, and Cambridge districts to lower Lake Erie ports for transshipment by vessel are unreasonable but not unduly prejudicial. Rates on like traffic from mines in the Fairmont district of West Virginia found not unreasonable or unduly prejudicial. Reasonable rates prescribed for future and former report, 101 I. C. C. 513, modified in part. Lake Cargo Coal Rates, 1925, 126 I. C. C. 309.

(14r) Commission's findings in former report 118 I. C. C. 85, were confined to rates on compressed cotton. However, except that uncompressed cotton is compressed by and at expense of carriers, circumstances surrounding its movement and that of compressed cotton

are identical. Accordingly, original report modified and rates on uncompressed cotton moving rail-water-and-rail from Opelousas and Bunkie, La., to destinations in New England and New York, FOUND unreasonable to extent they exceeded rates contemporaneously maintained from Shreveport and Alexandria, La., to same destinations. Reasonable rates prescribed for future and reparation awarded. Manget Bros. Co. v. A. C. R. R. 126 I. C. C. 403.

(14s) Rates on crushed stone from Thornton, Ill., to destinations in northern Indiana and southwestern Michigan FOUND unreasonable as compared with contemporaneously intrastate rates from various Michigan competing points; with those to other Illinois destinations for comparable distances; and with lower rates to Elkhart, Ind., and Niles, Mich., points less distant than Kalamazoo, Mich. As rates beyond Elkhart and Niles rise abruptly, traffic from Thornton to farther distant territory is practically excluded. However, while Illinois and Michigan are generally lower than corresponding interstate rates, they should be properly aligned with corresponding interstate rates to Niles and Elkhart, Reasonable basis of rates prescribed for and leess-distant Indiana destinations. future. Brownell Improvement Co. v. B. & O. C. T., 126 I. C. C. 414.

(14t) Rates on scrap copper and scrap brass from New York, N. Y., to New England destinations FOUND not to have been unreasonable, discriminatory, or unduly prejudicial in the past, but for the future found unreasonable to extent they exceed the contemporaneous sixth-class rates from and to same points, and unduly prejudicial to extent the exceed rates contemporaneously maintained from Pittsburgh and Cleveland group points to same destinations. Six-class basis will provide uniformity in rating of scrap copper and brass, and earnings thereunder appear adequate even for the generally higher rated New England territory. Reasonable and nonprejudicial rates prescribed for the future. Federated Metals Corp. v. N. Y., N. H. & H., 126 I. C. C. 439.

(14u) Rates on phosphate rock from Brewster, Bradley, Achan, and Prairie, Fla., to Gulport, Miss., found not unreasonable or otherwise unlawful as compared with lower rates contemporaneously in effect to New Orleans, La., to which Gulfport is directly intermediate and with which it comes into active competition. New Orleans rates were lower than rates generally in the Southeast, due to water competition; rates to Gulfport were neither inherently high nor unreasonable by comparison with rates other than those to New Orleans; and commission is not justified in condemning Gulfport rates by comparison alone with New Orleans rates. Moreover, above relationship of rates was protected by appropriate fourth-section applications. Gulfport Fertilizer Co. v. A. C. L., 126 I. C. C.463.

(14v) Rates on building and roofing material, from Chicago, Ill., and St. Louis, Mo., and points taking same rates, and from Lockland, Ohio, to Colorado common-point territory, FOUND not unreasonable. Contention that above rates should not exceed 95 percent of rates contemporaneously in effect on 95 I. C. C. 296. Rates on prepared roofing to destinations here involved range from 100 to 135.6 per cent of rates on newsprint paper. Moreover, present rates on building and roofing are on a comparable basis with rates on other building materials. Mountain States Roofing Co. v. A., T. & S. F., 126 I. C. C. 475.

(14w) Rates on crude phosphate rock, from Tilphosco and Brewster, Fla., to Meridian, Miss., FOUND unreasonable as compared with lower rates to various destinations in Alabama, Tennessee, and Georgia, for comparable distances, and to extent it exceeds distance rate prescribed in 101 I. C. C. 165, for application on phosphate rock from Florida mines to Knoxville, Tenn. Reasonable rate prescribed for future and reparation awarded. Meridian Fertilizer Factory v. A. C. L. ,126 I. C. C. 478.

(14x) Rate on crude phosphate rock, from Tilphosco and Brewster, Fla., to Meridian, Miss., FOUND not unduly prejudicial as compared with lower rate to New Orleans, La., and Gulf Ports, for greater distances. Carriers show that rate to the Gulf ports is depressed by reason of water competition, much phosphate rock being transported in tramp steamers which maintain no regular rates. Moreover, in 101 I. C. C. 165, the influence of water competition over these rates was recognized by commission and record in instant case sub-

stantiates the view there expressed. Meridian Fertilizer Factory v. A. C. L., 126 I. C. C. 478.

(14y) Rates on sand and gravel from Muscatine, Iowa, to destinations in central Illinois, FOUND unreasonable and unduly prejudicial as compared with rates on crushed stone under distance scale prescribed in 49 I. C. C. 681, from Birdsboro and Devault, Pa., and Port Deposit, Md., to various eastern destinations; with rates on chert, clay, sand and gravel prescribed in 122 I. C. C. 133 for application in the Southeast; and to extent they do exceed by more than 10 cents per ton rates contemporaneously maintained on crushed stone, prescribed in 89 I. C. C. 110, from Buffalo and Linwood, competing Iowa points with which Muscatine is grouped to same destinations. Reasonable and nonprejudicial rates required for future. Automatic Gravel Products Co. v. C., R. I. & P., 126 I. C. C. 487.

(14z) Rate on coarse grain from Aberdeen and contiguous territory in South Dakota to points in Montana Idaho, Washington, and Oregon, FOUND not unreasonable as compared with those contemporaneously in effect from Minneapolis and Sioux City. Rate assailed is lower than rate found reasonable in 57 I. C. C. 629 and other cited cases, from same points to Pacific coast destinations and except for reductions by carriers would be considerably higher. Moreover, carriers show that it compares favorably with many other rates for corresponding distances applicable on corn or coarse grain in western territory and lower than rate on numerous other commodities of considerable less value between same points. Aberdeen Commercial Club v. C. P. R. R., 126 I. C. C. 498.

(15a) Rates on tannery fleshings from various points in Virginia, West Virginia, North Carolina, Tennessee, and Kentucky, to West Williamsport, Pa., FOUND unreasonable as compared with lower rates from same points of origin to Gowanda, N. Y., and Springdale, Pa. Reasonable rates prescribed for future and reparation awarded. Keystone Glue Co. v. S. Ry. Co., 126 I. C. C. 507.

(15b) Rate on pig iron from Birmingham, Ala., and points taking same rate to Nashville, Tenn., FOUND unreasonable as compared with lower rates contemporaneously in effect to Chattanooga, Tenn., and other destinations in Tennessee, Alabama, and Georgia, with which Nashville comes into competition, and to extent it exceeded rate subsequently established over route of movement. Present rate found not unreasonable or otherwise unlawful. Reparation awarded. Allen Mfg. Co. v. A. G. S., 126 I. C. C. 515.

(15c) Local rate on crude petroleum oil from certain Kentucky points to Owensboro, Ky., for movement by pipe line to Lawrenceville, Ill., FOUND not unreasonable, unduly prejudicial, or otherwise unlawful, as compared with local rates contemporaneously in effect from same and various other points to Evansville, Ind., and Louisville, Ky.; or with proportional rates to Evansville and Louisville, and to Jeffersonville and New Albany, Ind., more distant points. If proportional rates had been established to Owensboro for application in connection with the pipe line, no reason appears why they should have been higher than those to Louisville and Evansville. However, local rates assessed appear not to have exceeded maximum reasonable rates for services performed. Indian Refining Co. v. L. & N. R. R., 126 I. C. C. 543.

(15d) Rates charged on steel rails, angle bars, and similar articles from O. N. Junction, Fla., a point situated beyond the switching limits of Palatka, Fla., to Jacksonville and Key West, Fla., for export to Cuba, FOUND unreasonable to extent they exceeded rates maintained for comparable distances between other points in Florida. Reparation awarded. Hyman-Michaels Co. v. A. C. L., 126 I. C. C. 547.

(15e) Combination rates on potatoes from Pungo, Pleasant Ridge, Creeds, Fentress, and Hickory Ground, Va., and Elizabeth City and Barnett's Creek, N. C., to destinations in New York, FOUND unreasonable but not otherwise unlawful as compared with lower joint commodity rates contemporaneously in effect from the same and various other points on carrier's lines to New York points and to eastern and c. f. a. territory destinations. Reasonable rates prescribed for future and reparation awarded. Caruso, Rinella, Battaglia Co. v. N. S. R. R., 126 I. C. C. 555.

(15f) L. c. l. rating on chocolate and chocolate coating in official, southern and western classifications FOUND not discriminatory or unduly prejudicial, but c. l. rating in official and western classi-

fications FOUND unreasonable as compared with rating on coffee and other comparable commodities, and to extent it exceeds fourth class, minimum 36,000 pounds. Reasonable rating prescribed for future. Cocoa & Chocolate Mfrs. Asso. v. A. & V. Ry., 126 I. C. C. 561.

(15g) Rate on newsprint paper from Carthage, N. Y., to Newark, via National Junction, N. J., FOUND not unreasonable, discriminatory, or unduly prejudicial as compared with lower rate contemporaneously in effect to New York, or from Glens Falls, N. Y., to New York over another route also applicable to Newark, and subsequently established via route of movement. Rate from Glens Falls was established to avoid fourth-section departures because of fact that Newark is intermediate to New York. However, rate to Newark, except on traffic via National Junction, is the same as rate assailed in connection with all other delivering carriers, and mere fact that carriers voluntarily reduced the latter rate does not establish unreasonableness of the rate so reduced. Newark Call Printing & Publishing Co. v. C. R. R. of N. J., 126 I. C. C. 569.

(15h) Upon contention that rate on newsprint paper from Carthage, N. Y., to Newark, N. J., should be no higher than to New York, complainant showed that class rates to New York and Newark from Syracuse, N. Y., and points west thereof, are the same and urges that a like relationship should apply from Carthage which is farther distant from New York and Newark than Syracuse. HELD: Carthage is not west of Syracuse and class rates therefrom have always been on a higher basis to Newark than to New York. Moreover, rate on newsprint paper from Carthage and other points in nothern New York have been on a higher basis to Newark than to New York because Newark was considered as being in the Philadelphia rate group and traffic destined thereto moved through Philadelphia rate-group points. Newark Call Printing & Publishing Co. v. C. R. R. of N. J., 126 I. C. C. 569, 570, 571.

(15i) Upon further hearing, rates on sand and gravel from Montgomery, Ala., to La Grange, Ga., FOUND not unreasonable as compared with those contemporaneously in effect from Birmingham. While rates from latter district were lower for like distances than between various other points in the Southeast, carriers point out that rates assailed were lower than those between points in the Southeast other than to the Birmingham and Atlanta groups and compare favorably with those prescribed in 83 I. C. C. 436. Moreover, a scale of maximum interstate rates on sand and gravel for application in this general territory was prescribed in 122 I. C. C. 133, and in accordance therewith, finding in former report 85 I. C. C. 184 reversed. Roquemore Gravel Co. v. A. & W. P., 126 I. C. C. 575.

(15j) The commission should not require the maintenance of a definite relationship between the rates on specific commodities on a showing that such commodities meet competitively in a relatively limited number of uses. Federated Metals Corp. v. C. R. R. Co. of N. J., 126 I. C. C. 703, 711.

(15k) Rates on tin cans from Chicago to North Prairie, Wis., FOUND unreasonable as compared with rate contemporaneously in effect to Waukesha, Wis., a slightly less distant point and to extent it exceeded rate contemporaneously applicable via another route. Reparation awarded. Nelson v. C., M. & St. P., 126 I. C. C. 713.

(15l) Rates on cottonseed from points in Louisiana on the Vicksburg, Shreveport & Pacific, Louisiana & Arkansas, and Missouri Pacific railroads, and from points in Arkansas on the Missouri Pacific, to Jackson and Newton, FOUND unreasonable in their relation to the rates contemporaneously maintained to Vicksburg. Reasonable maximum rates prescribed for the future and reparation awarded. Findings in 96 I. C. C. 333, modified. Tallulah Cotton Oil Co. v. A. & V. Ry., 126 I. C. C. 723.

(15m) Rates on steel rods, in straight lengths and coils, from Pittsburgh and Johnstown, Pa., Youngstown, Ohio, and Buffalo and North Tonawanda, N. Y., to Pawtucket and Valley Falls, R. I., FOUND not unreasonable as compared with those contemporaneously in effect to other New England destinations for comparable distances. Standard Nut & Bolt Co. v. N. Y., N. H. & H., 126 I. C. C. 731.

(15n) Rate on wrapping paper from Bastrop, La., to Dallas and Wichita Falls, Tex., FOUND not unreasonable as compared with rates to Dallas from Kansas City, St. Louis, and Chicago for comparable distances, or with lower rate con-

temporaneously in effect from Elizabeth, La., to Dallas, subsequently established over route of movement. Latter rate was not applicable via Bastrop, whereas rate assailed applied from Bastrop, New Orleans, and other Louisiana points grouped therewith to all Texas common points, and record contains no evidence of improper grouping. Moreover, in considering the reasonableness of group rates, comparisons of rates and distances between selected points can not be regarded as controlling. Dallas Paper Co. v. A. & L. M., 126 I. C. C. 739.

(15o) Rate on waste paper from Boston, Mass., to Thomson, N. Y., established pursuant to decision in 81 I. C. C. 591, FOUND unreasonable as compared with lower rate contemporaneously in effect to various New York destinations, and to extent it exceeded lower rate contemporaneously in effect to Trionda, N. Y. While record clearly shows that rate assailed is now too high, it does not indicate that it should be found unreasonable for period extending back two years from date of filing of the complaint. Accordingly reasonable rate prescribed for the future and reparation awarded only back to date of filing of the complaint. United Paperboard Co., v. B. & A. R. R., 126 I. C. C. 751.

(15p) Rates on strawberries from various Tennessee points to Battle Creek, Detroit, and Kalamazoo, Mich., and rate on peaches from Sale Creek, Rathburn, and Harriman, Tenn., to Detroit, Mich., found not unreasonable as compared with rates contemporaneously in effect from Huntsville and Chase, Ala., to Detroit and Grand Rapids, Mich. While Tennessee points are intermediate to the Alabama points, carriers showed that minimum charge per car was lower from the Tennessee points and urge that any improper relationship existing between rates should be established by increasing rates from Alabama. Rates assailed compare favorably with those applying between many other points for comparable distances and are lower than those points in official territory for like distances. Lewis Co. v. C., N. O. & T. P., 128 I. C. C. 3.

(15q) Combination rates on lime, ground limestone, and crushed stone from Woodville, Ohio, to stations in Maryland on the Washington, Baltimore & Annapolis Electric R. R. and the Hagerstown & Frederick Ry., under tariff providing that combination rule would apply only where all issues publishing the factors made reference to the combination-rule tariff, found unreasonable as compared with rates found reasonable in 112 I. C. C. 7, and in 104 I. C. C. 293 from Gibsonburg, Ohio, near Woodville, to Rivermont, Va., for comparable distances, and to extent they exceeded rates constructed in accordance with combination basis previously in effect. Reparation awarded. Washington Building Lime Co. v. B. & O., 128 I. C. C. 9, 16, 18.

(15r) Fourth-class rate on storage batteries from Kansas City and Centropolis, Mo., to Dallas, Tex., found not unreasonable as compared with lower commodity rate contemporaneously in effect from St. Paul, Minn., to Dallas. The commodity rate was published from St. Paul to Deming, N. Mex., and held as maximum at Dallas, because of fourth-section difficulties. National Lead Battery Co. v. M. P., 128 I. C. C. 39.

(15s) Rates on potatoes from points in Idaho, Colorado, Nebraska, and Utah, to Nashville, Tenn., found not unreasonable or otherwise unlawful as compared with rates to other points in same general territory for comparable distances, or publish rates in accordance with rates hereto, and to points not named in apwith lower rates contemporaneously in effect to New Orleans, a more distant point, The fourth-section departure was protected by an appropriate application and exhibits submitted by carriers support contention that rates charged are reasonable. Comlainant based case entirely upon comparison of the New Orleans and Nashville rates, but such comparison is of little value inasmuch as rates to New Orleans and other Gulf ports are depressed by water competition. Boyle Comm. Co. v. C., B. & Q., 128 I. C. C. 51.

(15t) Rates on casing-head gasoline from Delaware, Okla., to Los Angeles, Avon and Martinez, Calif., found unreasonable to extent they exceeded blanket rates contemporaneously in effect between same points. Blanket rates apply generally from midcontinent oil field to California, but combination rate was assessed due to failure of one participating carrier to become a party to blanket rate until subsequent to movement. Reparation awarded. Henderson Co. v. A., T. & S. F., 128 I. C. C. 59.

(15u) Rates on automobiles from Pontiac and Detroit, Mich., to Dodge City, Kans., found not unreasonable or otherwise unlawful as compared with lower

rate contemporaneously in effect from points in c. f. a. territory, including Pontiac and Detroit, to Tyrone, Okla., or with lower rates subsequently established. Latter rates were established to meet carrier competition, similar adjustment being made in all class rates on all commodities handled on a competitive basis. Moreover, a voluntary reduction in rates does not prove former rates unreasonable or afford a basis for reparation, and carriers may voluntarily equalize commercial or geographical disadvantages in many instances in which the commission could not require such equalization. See 22 U. S. 42. Gum Motor Co. v. A., T. & S. F., 128 I. C. C. 61.

(15v) Rates on cement from Ada, Okla., and points in the Kansas gas belt to Texas destinations in Scale III and Scale IV territories, and from Portland and Concrete, Colo., to said Scale IV territory, found unreasonable, and rates from Kansas gas-belt points found unduly prejudicial as compared with those from Ada, Bonner Springs, Kans., Sugar Creek, Mo., and Portland and Concrete, Colo. Reasonable and nonprejudicial distance rates prescribed for interstate application, which will remove the undue prejudice in relationship of interstate and intrastate rates within Texas. Adjustment of intrastate rates left to State authorities and carriers. Oklahoma Portland Cement Co. v. D. & R. G. W., 128 I. C. C. 63.

(15w) Fifth-class rates on denatured alcohol from New Orleans, and points taking same rates, to Oklahoma City and other destinations in Oklahoma, found unreasonable as compared with lower rates contemporaneously in effect to St. Louis, Kansas City, and Chicago; to destinations in Texas and Arkansas for comparable distances; and to extent they exceeded maximum reasonable fifth-class rates prescribed in 123 I. C. C. 203, for application between same points. Reasonable rates prescribed for future and reparation awarded. Oklahoma Traffic Asso. v. A. & V., 128 I. C. C. 89.

(15x) Rate on crude infusorial earth from Lovelock, Nev., to Chicago, Ill., found not discriminatory or unduly prejudicial, but unreasonable as compared with lower rate, distance considered, on crude, processed or finished infusorial earth, contemporaneously in effect from Lompoc, Calif., a competing producing point to Chicago, or to New York Piers, N. Y., and other Atlantic seaboard points. Reasonable rate prescribed for future. Hylonite Products Co. v. A., T. & S. F., 128 I. C. C. 135.

(15y) Rates on coke breeze or coke dust from Martins Ferry, Ohio, to Moundsville, W. Va., found not unreasonable, but rates from Steubenville, Ohio, to same destination found unreasonable as compared with rates contemporaneously maintained between various Pennsylvania and Ohio points for comparable distances and to extent they exceeded rates prescribed in 102 I. C. C. 601 from Pittsburgh to Moundsville. Rates from Martins Ferry are same as those on bituminous coal which, according to carriers, are usually lower than those on the by-product coke. However, rates from Steubenville were higher for the single-line haul than for joint-line hauls instanced by complainant for comparison. See 89 I. C. C. 749. Reasonable rate prescribed for future and reparation awarded. United Zinc Smelting Corp. v. P. R. R., 128 I. C. C. 139.

(15z) Rates on iron and steel rails and reinforcement concrete bars from Huntington, W. Va., to certain points in Kentucky, Tennessee, and Virginia, found unreasonable as compared with lower rates for comparable distances from Pittsburgh, Pa., Newark, Ohio, and Birmingham, Ala., competitive points, and to extent that rates on the rails over specific routes exceeded those subsequently established from Huntington to Johnson City, Tenn., plus prescribed distance rate factors beyond, and rates on bars and rails to destinations involved to extent they exceeded specific base rates, plus prescribed distance factors beyond Winchester, Ky. Reasonable rates prescribed for future and reparation awarded. West Virginia Rail Co. v. C. & O., 128 I. C. C. 153.

(16a) Rates on rough and polished marble from Marble, Colo., to Clifford Spur, Calif., a point within the Los Angeles city limits, found unreasonable as compared with lower rate contemporaneously in effect from Redstone and Carbondale, Colo., to Los Angeles, Anaheim, Fullerton, San Pedro, Long Beach, and San Diego, Calif., more distant points, and to extent they exceeded lower rate subsequently established from Redstone to Glendale, Calif., a point beyond Los Angeles to which Clifford Spur is intermediate, plus local rate on marble from Marble to Redstone. Reparation awarded. Clifford Co. v. C. R. & S. J., 128 I. C. C. 182.

(16b) Rates on blank wall paper from Thomson, N. Y., to destinations in c. f. a. territory, found not unreasonable or unduly prejudicial as compared with those contemporaneously in effect from Watertown, N. Y., in the Ogdensburg, N. Y., group; Brunswick, Me., in the Boston group; and Appleton, Wis., in the Fox River, Wis., group; but rates on newsprint paper between same points found unreasonable to extent they exceed rates contemporaneously maintained on blank wall paper. Earnings under rates on wall paper to Chicago and Joliet, Ill., destinations in which complainant is particularly interested, do not appear excessive. However, rates on newsprint paper and blank wall paper from Glens Falls and Warrensburg, N. Y., are the same, and in 38 I. C. C. 120 it was stated that rates on blank wall paper should be no lower than rates on newsprint paper. Reasonable rates prescribed for future. Iroquois Pulp & Paper Co. v. A. A. R. R., 128 I. C. C. 187.

(16c) Third-class rates on store and office fixtures from Columbus, Ga., to Paducah, Ky., Memphis, Tenn., and New Orleans, La., found not unreasonable or unduly prejudicial as compared with those from Atlanta, Louisville, St. Louis, and Chicago, or with lower commodity rate subsequently established. Carriers stated that latter were temporary rates published at Complainant's request, pending readjustment of rates in both directions on a reasonable basis; were made with relation to rates from Atlanta; and should not be used as a basis for condemning rates charged. Moreover, earnings under rates assailed can not be regarded as high when value, character, and light loading of this furniture is considered, nor can it be said that it is a commodity which would call for commodity rates, and since record consists wholly of rate and distance comparisons, a finding of undue prejudice is not warranted. Nat'l. Show Case Co. v. S. A. L., 128 I. C. C. 193.

(16d) Fifth-class rates on window glass from Hartford City, Ind., to destinations in western trunk-line territory found not unreasonable or unduly prejudicial as compared with rates from southwestern points to destinations in western trunk-line and c. f. a. territories, or from Hartford City to c. f. a. southwestern and southern territories. The compared rates were generally upon the fifth-class basis. Carriers urge that rates from the southwest are unduly low and that observance of those rates as a basis for adjustment of rates from Hartford City would result in a general disruption of the basis in effect from points in c. f. a. territory. The disturbance of the class-rate adjustment applicable to the numerous destinations involved is not warranted upon the present record, nor is it shown to what extent, if any, carriers handling complainant's traffic, control rates from the Southwest. American Window Glass Co. v. A., T. & S. F., 128 I. C. C. 222.

(16e) Rates on cabbage and potatoes from lower Rio Grande Valley of Texas to Cincinnati, Ohio, found unreasonable and unduly prejudicial as compared with rates from same points of origin to certain destinations in Illinois, Wisconsin, and Indiana, from various other points to Cincinnati for comparable distances, and to extent they exceeded lower rates contemporaneously in effect to Chicago. Reasonable rates prescribed for future and reparation awarded. Leonard, Crosset & Riley v. A., T. & S. F., 128 I. C. C. 225.

(16f) Rates on face brick from Wooster, Ohio to eastern points found not unreasonable as compared with lower rates contemporaneously in effect from Canton and Massillon, Ohio, competing producing points, but unduly prejudicial to extent they exceed those from the latter points. Rates assailed are generally based upon a percentage of Chicago-New York rates prescribed in 68 I. C. C. 213, although the percentage bases are not rigidly observed. Since carriers have accorded same rates from all three points to destinations in all directions in a large expanse of surrounding territory it is unjust to subject Wooster to a disadvantage to more distant destinations in the East. Nonprejudicial basis of rates prescribed for future. Medal Brick & Tile Co. v. B. & O., 128 I. C. C. 241.

(16g) Rate on rosin dross from Jacksonville, Fla., to Pensacola, Fla., over an interstate route, found unreasonable as compared with rates contemporaneously in effect on rosin from Jacksonville to many destinations in Alabama and Tennessee for comparable distances, and to extent it exceeded a lower rate contemporaneously in effect over an intrastate route and subsequently established over route of movement. Reparation awarded. Western Paper Makers Chemical Co. v. A. C. L., 128 I. C. C. 244.

(16h) Rate on talc from Emeryville,

N. Y., to Dallas Tex., found not unreasonable as compared with lower rates on ground limestone from Memphis, Tenn., to Dallas; and from Buffalo, N. Y., to Dallas, Big Springs, and San Angelo. Talc and ground limestone are rated class C and E respectively in western classification, and while both are used as a filler in the manufacture of paint, talc is used in the better grades. Carrier showed that rate assailed is used as maximum to Texas common-point territory. Moreover, rate assailed compares favorably with rail-and-water rate maintained between Emeryville and Dallas. Sewall Paint & Glass Co. v. C., C., C. & St. L., 128 I. C. C. 247.

(16i) Rate on crushed stone and chatts from Webb City and Oronogo Junction, Mo., to Arcadia, Kans., found unreasonable as compared with lower rates contemporaneously in effect from and to other points in same general territory for like and greater distances and to extent it exceeded rate prescribed in 77 I. C. C. 473, 592, 605, for distances similar to those involved. Reparation awarded. Ziegler Bros. v. St. L.-S. F., 128 I. C. C. 257.

(16j) Rates on bituminous coal from mines in Illinois and Indiana to points in Illinois, Indiana, Michigan, Wisconsin, Minnesota, North Dakota, South Dakota, Nebraska, and Iowa, found not unreasonable by relationship between rates from said mines in Illinois and Indiana, on the one hand, and mines in western Kentucky, on the other, found unduly prejudicial to Illinois and Indiana mines due to maintenance of unreasonably low rates from western Kentucky mines. Prejudice should be removed by increasing rates from latter mines in amount of 10 cents per net ton to all destinations in States named to which existing differential of the western Kentucky over the southern Illinois group is 25 cents per net ton. See 89 I. C. C. 170; 263 U. S. 515. Illinois-Indiana Coal Cases, 128 I. C. C. 265.

(16k) Rates on bituminous coal from the Danville, Brazil-Clinton, and Linton-Sullivan groups in Illinois and Indiana to points in Chicago switching district, found unreasonable as compared with lower rates contemporaneously maintained from Western Kentucky group to East St. Louis for a longer haul under less favorable conditions, including movement across the Ohio River and to Louisville, Ky., for a similar haul; and with rates from mine groups in Pennsylvania, southern West Virginia, eastern Kentucky, and Tennessee to Lake Erie ports for comparable distances. Reasonable rates prescribed for future. Illinois-Indiana Coal Cases, 128 I. C. C. 265.

(16l) Rates on bituminous coal from producing points in Illinois, Indiana, and western Kentucky to Hannibal, Mo., and Mississippi River cities in Iowa and to Linwood, Mason City, Council Bluffs, Sioux City, and Buffalo, Iowa, and on fine coal from southern Illinois group to Cedar Rapids, found not unreasonable or otherwise unlawful. Rates to Mason City and Sioux City compare favorably with those prescribed in 89 I. C. C. 73; 89 I. C. C. 170; from Illinois points to Sioux City and from Arkansas-Oklahoma group to Sioux City respectively, for hauls of similar length, and in view of fact that market competition is stronger at Kansas City, rates to that point may properly be lower than those to Council Bluffs. Iowa R. R. Commissioners v. A. & S., 128 I. C. C. 293.

(16m) All-rail and river-and-rail rates on refined sugar from Louisiana refining points to Shreveport or Monroe, La., to extent they are lower, distance considered, than corresponding contemporaneous rates maintained on interstate traffic from same points to Wilmot, Texarkana, and Hope, Ark., or from Sugarland or Texas City, Tex., to Shreveport, found to result in undue preference and advantage of competing shippers in intrastate commerce at said Louisiana points, in undue prejudice and disadvantage to Arkansas and Texas points, and in unjust discrimination against interstate commerce. Manner of removing undue prejudice and discrimination prescribed. Sugar Between Louisiana and Texas Points, 128 I. C. C. 309.

(16n) Suspended schedules filed in purported compliance with findings in original report 100 I. C. C. 110, wherein relationships between rates on certain commodities in export, import, and coastwise movement from points in Kansas, Oklahoma, and Texas to Galveston and New Orleans and ports taking same rates, were found unduly prejudicial and ordered removed by establishment of differentials prescribed, found not justified, without prejudice to filing of new schedules conforming with findings herein. Galveston Commercial Asso. v. G., H. & S. A., 128 I. C. C. 349, 392, 393.

(16o) Rates on petroleum and products in export and coastwise movement from refining points in north-central Texas to New Orleans and Galveston and points taking same rates found not unreasonable as compared with those from extensive groups in various portions of Southwest for domestic and foreign consumption, nor unduly prejudicial as compared with those from Shreveport-El Dorado groups in northern Louisiana and southern Arkansas. Earnings under rates assailed are considerably below those under rates for similar distances from mid-continent groups to western trunk-line and Illinois destinations found reasonable in 112 I. C. C. 421, and a reduction in rates from any one important group under present extensively grouped and highly competitive adjustment should be made cautiously and only for strongest reasons. Galveston Commercial Asso. v. G., H. & S. A., 128 I. C. C. 349, 393, 396.

(16p) Upon further consideration, finding in former report 118 I. C. C. 689, that rates on gasoline from certain points in Texas and Oklahoma to Bradford, Pa., were not unreasonable as compared with those to Buffalo, N. Y., reversed and rates to Bradford found unreasonable to extent they exceeded those to Buffalo. Car-mile and ton-mile earnings to Bradford exceed those to Buffalo. As transportation conditions are equal and considering the principle that ton-mile earnings should ordinarily decrease as distance increases, earnings under rates assailed appear too high as compared with those under rates prescribed in 96 I. C. C. 485 and other cited cases, from Oklahoma points to various destinations for comparable distances. Reasonable rates prescribed for future and reparation awarded. Kendall Refining Co. v. A. & V., 128 I. C. C. 427.

(16q) Rates on furniture from Memphis, Tenn., to points in trunk-line and New England territories, found not unreasonable or unduly prejudicial, except that l. c. l. commodity rate on mattresses will be unreasonable to extent it exceeds first-class rate contemporaneously in effect. Other rates assailed are relatively lower than those previously found reasonable from c. f. a. territory manfacturing points to destination in trunk-line territory and also lower than corresponding rates in reverse direction, and on the whole compare favorably with corresponding rates to eastern port cities from Atlanta, Ga., and Chattanooga, Tenn., competing points. Reasonable rates on mattresses prescribed for future. Memphis Freight Bureau v. A. G. S., 128 I. C. C. 445.

(16r) Sixth-class rate on imported wood pulp from Boston, Mass., to Fort Edward, N. Y., found unreasonable as compared with lower commodity rate contemporaneously in effect; with those to various points in c. f. a. territory for comparable distances; with blanket rates extending from points on the Hudson River to Buffalo and Niagara Falls; and to extent it exceeded distance-scale rates on like traffic from Wilmington, Del., to points in New England territory prescribed in 122 I. C. C. 543. Reasonable rates prescribed for future and reparation awarded. International Paper Co. v. B. & M., 128 I. C. C. 466.

(16s) Proposed rates on articles in uniform brick list from points in Illinois, Indiana, Missouri, and Iowa to destinations in Wisconsin, Michigan, Minnesota, and North Dakota, found not justified. While rates proposed to Wisconsin and Minnesota are not unreasonably high but are in some instances lower than between points in c. f. a. territory, from points in that territory to Chicago and Peoria, and from Chicago to various destinations in Iowa, Nebraska, and Missouri for comparable distances, record fails to warrant proposed rates higher to Michigan than to Wisconsin. Moreover, an increase is proposed from Chicago to Duluth, while no change is proposed to St. Paul, and proposed differential from St. Louis, Mo., over Chicago to the Twin Cities is also out of line with other present and proposed differential relationships. Western Brick Co. v. N. Y. C., 128 I. C. C. 479.

(16t) Sixth-class l. c. l. rates on bar iron from Knoxville, Tenn., to points in Georgia, found not unreasonable but unduly prejudicial as compared with lower l. c. l. commodity rates contemporaneously maintained from Birmingham, Ala. Rates assailed compare favorably with those from Memphis, Nashville, and Chattanooga, Tenn., and Louisville, Ky., to Georgia points and are relatively lower than those prescribed in 100 I .C. C. 513 and other cited cases. Practically all shipments were sold on basis of Birmingham prices plus rate from Birmingham, but since no loss of business is alleged and proof of damage is insufficient, reparation is denied. Knoxville Iron Co. v. L. & N., 128 I. C. C. 513.

(16u) Rates on calcium arsenate from Middleport, N. Y., to Minden and Shreveport, La., found not unreasonable as compared with lower rate contemporaneously in effect to numerous Texas points, including a point beyond Shereveport, to which basis rate to Shreveport was subsequently reduced. No showing was made as to reasonableness of compared rates, and they were not applicable over route of movement. Carriers showed that rate to Shreveport over route of movement was reduced to meet competition over other routes, and urged that because of the higher average value and lower weight, rates on calcium arsenate should exceed the average of all commodities on which they are required to make annual reports to the commission. Moline George Co. v. N. Y. C., 128 I. C. C. 517.

(16v) Combination rates on grain and products from Oklahoma points to destinations in Louisiana west of the Mississippi River, including points on west bank thereof, and to Mississippi River crossings in Mississippi and Louisiana on east bank thereof, found unreasonable as compared with rates contemporaneously in effect from Kansas City, Mo., and Council Bluffs, Iowa, and to extent they exceed through rates based on those prescribed in Consolidated Southwestern Cases, 123 I. C. C. 203. Reasonable joint through rates prescribed for future. Oklahoma Millers' League v. A. & M., 128 I. C. C. 523.

(16w) Rates on creosote oil from Indianapolis, Ind., to Louisville, Ky., Cincinnati, Ohio, St. Louis, Mo., East St. Louis, Granite City, Madison and Chicago, Ill., and points in Chicago switching district, found unreasonable but not unduly prejudicial as compared with lower rates contemporaneously in effect from Birmingham, St. Louis and Chicago switching district, competitive producing points, to same destinations. Movement from Birmingham to Cincinnati, Louisville and St. Louis, is, for most part, in southern territory, and while rates in southern and Illinois territories are lower percentage of class rates than those in c. f. a. territory, from which complainant's shipments move, since transportation conditions throughout that territory are substantially similar to those in Illinois territory, and conditions in southern territory are such as to warrant a higher level of rates, no reason appears for the wide differences in existing percentages between the various territories. Reasonable rates prescribed for future. Republic Creosoting Co. v. A. G. S., 128 I. C. C. 547.

(16x) Rates on ground poultry manure from Kenton, Ohio to Meridian and Hattiesburg, Miss., found unreasonable as compared with lower rates contemporaneously in effect over route of movement to Mobile, Ala., via Meridian, and to New Orleans, via Hattiesburg. While carriers had no record that complainant requested prior to movement establishment of rates to Meridian and Hattiesburg not in excess of rates to the more distant points, in compliance with rule 77 of Tariff Circular 18-A, failure on part of a shipper to request prior to shipment a rate to which he is entitled under the rule, through ignorance of the rule or otherwise, is not a reason for saying that he is not entitled to reparation. See 81 I. C. C. 659. Reparation awarded. Fosse & Co. v. E. R. R., 128 I. C. C. 553.

(16y) Sixth-class rate on china clay from Philadelphia to Newton Falls, N. Y. found unreasonable as compared with lower rates contemporaneously in effect between points in c. f. a. territory; between points in c. f. a. territory and Canadian points; from Philadelphia and Mount Holly Spring, Pa., to numerous destinations in New York for comparable distances; and to extent it exceeded lower commodity rate subsequently established. Reparation awarded. Newton Falls Paper Co. v. R. Co., 128 I. C. C. 563.

(16z) Rate on box shooks from Bend, Ore., to Port Arthur, Tex., found not unreasonable as compared with lower rate prescribed in 78 I. C. C. 746 on lumber products, including box shooks from the North Pacific Coast group, including Bend, to group points including Port Arthur, established subsequent to movement herein. Upon further hearing in 104 I. C. C. 695, reparation was denied upon the theory that where, as here, readjustment of rates is required throughout an extensive territory involving both increases and reductions and affecting shippers at many points, substantial justice would not be advanced by awarding reparation. Moreover, issues and contentions similar to those here presented were advanced in 100 I. C. C. 319, in which reparation was denied. Shelvin-Hixon Co. v. O.-W. R. & N., 128 I. C. C. 565.

(17a) Combination rate on dried fruit from Suisun, Calif., to Phoenix, Ariz.,

found unreasonable as compared with lower rate contemporaneously in effect over another route; with lower rates to Albuquerque and Deming, N. Mex., and from other California, Oregon, and Washington points to Arizona and New Mexico destinations for greater distances; and to extent it exceeded lower joint commodity rate subsequently established. Reparation awarded. California Packing Corp. v. S. P., 128 I. C. C. 631.

(17b) Rates on pine lumber from points in Oregon, Idaho, and Montana to Bayport, Minn., found not unreasonable or unduly prejudicial as compared with lower rates contemporaneously in effect to St. Paul. Outside of irregularities in the construction and filing of tariffs,complainants showed that rates to Bayport exceeded those to St. Paul; that it sold frames in competition with dealers at that point and Minneapolis, made from lumber from same origin points; and that carriers conceded error in publishing rates assailed and sought authority to make reparation. However, consent of carriers to an award of reparation is not proof of unreasonableness of rates charged; mere fact that rates assailed exceeded those to St. Paul has little probative force as evidence of unreasonableness; not is competition with dealers in St. Paul and Minneapolis, standing alone, proof of undue prejudice. Moreover, a subsequent increase in rates to St. Paul would seem to indicate that those rates were out of line. Anderson Lbr. Co. v. N. P., 128 I. C. C. 633.

(17c) Rate on fresh peaches from Palisade, Colo., to Syracuse, N. Y., found not unreasonable or otherwise unlawful as compared with those from Georgia points to Syracuse or from California points. Distance considered, rate attacked is on a relatively lower basis than those from Georgia, and as it is blanketed from Colorado to the Pacific coast, the alleged violation of long-and-short-haul provision of section 4 is without merit. Caruso, Rinella, Battaglia Co. v. D. & R. G. W., 128 I. C. C. 687.

(17d) Combination rate on printing presses from Vancouver, British Columbia, to a point taking Group K rates, found not unreasonable as compared with Group A rates contemporaneously maintained from Pacific coast terminals to New York. Earnings under latter rates as well as those under rates from various producing points to Orlando, compare favorably with those under rates assailed for comparable distances. Duplex Printing Press Co. v. B. C. E., 128 I. C. C. 692.

(17e) First-class rates on black powder, moving interstate from Oriental siding, Fairchance, Pa., to destinations on the Western Maryland Railway, found not unreasonable or discriminatory but unduly prejudicial as compared with lower second-class rates contemporaneously maintained from Youngstown, Ohio. ircumstances and cinditions surrounding transportation from Youngstown and Fairchance to trunk-line destinations are similar and no justification appears for maintaining a higher classification rating from Fairchance than from Youngstown. Undue prejudice ordered removed. Du Pont De Nemours & Co. v. B. & O., 128 I. C. C. 705.

(17f) Rates on dry tanning extract from Nashville, Tenn., to Kitchener, Ontario, Canada, found not unreasonable or otherwise unlawful, but rates on liquid tanning extract to Milwaukee, Wis., found unreasonable to extent they exceeded rate subsequently established and unduly prejudicial as compared with rates contemporaneously maintained from Lynchburg, Va., and Harriman and Chattanooga, Tenn., competitive points, and rates on dry tanning extract to Huntsville, Ontario, Canada, found unreasonable and unduly prejudicial to extent they exceeded those contemporaneously applicable from Chattanooga. Nashville is directly intermediate to Chattanooga on traffic to all three destinations, but while rates to Milwaukee and Kitchener conform to the fourth section, departure therefrom still exists in rates to Huntsville. Reparation awarded. Tennessee Extract Corp. v. L. & N., 128 I. C. C. 709.

(17g) Sixth-class rate on scrap iron from Pedricktown, N. J., to Catasaqua, Pa., found unreasonable as compared with lower rates on same commodity between other points in same territory, and to extent it exceeded lower commodity rate subsequently established. Reparation awarded. Davies & Thomas Co. v. C. R. R. Co. of N. J., 128 I. C. C. 241.

(17ga) Rates on brick and clay products included in uniform brick list from Perla and Ft. Smith Ark., to points in Alabama, Florida, Georgia, Kentucky, Mississippi, and Tennessee, except points on the Mississippi Rvier found unreasonable as compared with

lower rates constructed under distance scales prescribed in 107 I. C. C. 681; 88 I. C. C. 543; 68 I. C. C. 213, for application in Southeast, official classification territory, and under uniform brick list, respectively, and to extent they exceed 12 per cent of first-class (column 100) all-rail rates approved or prescribed between Perla and Fort Smith, on the one hand, and points in said States on the other, in Consolidated Southwestern Cases, 123 I. C. C. 203. Reasonable rates prescribed for future. Acme Brick Co. v. A. & V., 128 I. C. C. 715.

(17h) Rates on pig iron from producing points in Virginia to destinations in Maryland, Pennsylvania, Delaware, New Jersey, New York, and New England states, found unreasonable as compared with those contemporaneously in effect from competitive furnaces in Pennsylvania and Maryland. Earnings under rates assailed are high as compared with those from Pennsylvania producing points, and while it was pointed out in Low Moor Iron Case, 30 I. C. C. 615, 618, that a relatively higher rate structure prevails in southern territory than in territory north of Ohio and Potomac rivers, history of rates and record in instant case are persuasive that transportation conditions have so changed as to be substantially the same as from furnaces in Pennsylvania and Maryland and accordingly Virginia furnaces should be accorded the same level of rates. Reasonable rates prescribed for future. Virginia Pig Iron Asso. v. C. & O., 128 I. C. C. 737.

(17i) Rates on building material from Jackson, Miss., to Forsythe, Tenn., found unreasonable as compared with lower rates, unrestricted as to routing, contemporaneously in effect from Vicksburg, Miss., to Memphis and Forsythe, over some of which routes Forsythe is intermediate to Memphis. Reasonable rate prescribed for future and reparation awarded. Jackson Traffic Bureau v. A. & V., 128 I. C. C. 744.

(17j) Rate on bituminous coal from mines in Clearfield, Meyersdale and Cumberland-Piedmont districts of Pennsylvania, Maryland, and West Virginia, to Black Tom Pier, Jersey City, N. J., found not unreasonable but unduly prejudicial, except as maintained by the Pennsylvania, to extent it excedeed lower transshipment rates contemporaneously in effect to its competitors operating from piers on both sides of complainant. While latter is clearly at a rate disadvantage it does not follow that transshipment rate is reasonable maximum or that rate assailed is more than reasonable maximum. However, same rate to complainant applicable under substantially similar transportation circumstances and conditions can not be withheld merely because volume of business handled does not overtax piers on which its competitors operate, for complainant is entitled to share in the business on an equal basis. Undue prejudice ordered removed. Harbor Coaling Corp. v. B. & O., 128 I. C. C. 747.

(17k) The mere fact that a rate under attack appears to be out of line with other rates to which it is ordinarily closely related does not necessarily prove that the rate assailed has been unreasonable in the past. It may be that the comparative rates are too low. But in determining a reasonable level for the future, the relationship which the different commodities should bear to each other may properly be given consideration. Furthermore, there has been offered here no justification for joint rates that exceed the combination of rates in effect over the route of movement. Jackson v. M. C. Ry., 129 I. C. C. 235, 240.

(17l) The act condemns the exaction of unreasonable rates and makes no distinction as between relative unreasonableness and unreasonableness per se. In the absence of such distinction defendants contentions as to "relative" unreasonableness are without merit. Washington Publishers Asso. v. B. & O. R. R., 129 I. C. C. 360, 361.

(17m) The mere fact that the rates assailed were out of line with the rate to certain other points does not in itself warrant a finding of unreasonableness. Montello Granite Co. v. M. St. P. & S. S. M. Ry., 129 I. C. C. 427, 428.

(17n) The mere showing that the rate assailed is out of line with a few other rates to which it is closely related is not sufficient to warrant a finding that the assailed rate was unreasonable. Dallas Paper Co. v. T. & N. O. Ry., 132 I. C. C. 591, 592.

(17o) A mere showing that the rates assailed are out of line with a few other rates to which it is closely related is not sufficient to warrant a finding that they were unreasonable. Such a showing may as well indicate that the compared rates were too low, as that the rates assailed were too high. Peabody Lumber Co. v. Pennsylvania R. R., 132 I. C. C. 741.

(17p) Rates on newsprint and wrapping paper from Camas, Wash., and West Linn and Lebanon, Oreg., to Oregon, California, Nevada, Montana, Wyoming, Colorado, Arizona, and Texas, found not unreasonable or unduly prejudicial as compared with rates contemporaneously in effect from competitive producing points in Fox River territory in Wisconsin and Atlantic Seaboard territory. While complainants base their claim upon disruption of rate relationships which they allege formerly existed between Fox River and Pacific Northwest territories, examination of rates indicates no definite or constant rate relationship over a period of years and carriers show that transportation conditions are not similar. Moreover, disregarding all elements but distance, rate to Texas common points from Camas and West Linn is only 13.5 per cent greater than from Stevens Point, Wis., for a 100 per cent longer haul. Crown Willamette Paper Co. v. W. T. Co., 129 I. C. C. 79.

(17q) Sixth-class rates on crushed stone moving interstate from Security, Md., to Best Gate, Md., found unreasonable as compared with those under distance scale prescribed in 49 I. C. C. 681; 100 I. C. C. 411, from Pennsylvania and Maryland points to destinations in Maryland, New York, New Jersey, Delaware, Virginia, and District of Columbia, and to extent they exceeded lower commodity rates subsequently established. Reparation awarded. North American Cement Corp. v. W. M., 129 I. C. C. 90.

(17r) Rates on wall plaster from Hanover, Mont., to western and central portions of North Dakota and South Dakota, found unreasonable as compared with rates contemporaneously in effect from competing points in Loveland, Colo., Laramie, Wyo., and St. Paul, Minn., and from South Dakota points to destinations in North Dakota, for comparable distances; and unreasonable and unduly prejudicial as compared with intrastate rates from Piedmont and Black Hawk, S. Dak., to various South Dakota destinations. While distance rates herein prescribed will not completely remove existing undue prejudice and preference between intrastate and interstate rates in South Dakota, no order will at present be entered with respect thereto but carriers and State authorities will be given opportunity to adjust their rates so as to remove balance thereof. Reasonable and nonprejudicial basis of rates prescribed for future. Three Forks Portland Cement Co. v. C., B. & Q., 129 I. C. C. 107.

(17s) Rates on Portland cement and plaster in mixed carloads from Hanover, Mont., to western and central portions of North Dakota and South Dakota, found not unreasonable but unduly prejudicial to extent that charges thereunder exceed those which would accrue under mixing rules similar to those contemporaneously maintained from Steelton, Minn., and Des Moines and Gilmore City, Iowa. Mixtures from Hanover move under rates subject to 50,000-pound minimum, whereas from preferred points cement moves at c. l. rate and actual weight subject to 50,000-pound minimum, and plaster at actual weight and c. l. rate subject to lowest minimum. No order entered but carriers expected to provide for mixing rules in revising rates. Three Forks Portland Cement Co. v. C., B. & Q., 129 I. C. C. 107, 118.

(17t) Rates on strawboard from various producing points in Ohio, Indiana, Michigan, Illinois, and Iowa to Texas common points and to San Francisco and Petaluma, Calif., found not unreasonable nor unduly prejudicial as compared with contemporaneous rates on building and roofing paper, fuller's earth, and various other commodities to Texas common points, or with rates on agricultural implements, water heaters, and other commodities to California destinations. Comparisons are of little value because neither volume of movement nor values of commodities are shown. Moreover, assailed rates to Texas compare favorably with those prescribed in 91 I. C. C. 589, from Peoria, Ill., to San Antonio, Tex., and in 85 I. C. C. 470, it was stated that earnings under rates to south Pacific coast same as those here attacked seemed fair and reasonable. United Paperboard Co. v. A. & R., 129 I. C. C. 131.

(17u) Rates on canned goods in straight or mixed carloads from Mobile, Ala., to destinations in Georgia, Mississippi, Tennessee, Kentucky, Missouri, Ohio, and Illinois, and from New Orleans to Nashville, Tenn., found unreasonable as compared with those prescribed in 77 I. C. C. 473; 123 I. C. C. 203; with lower rates contemporaneously maintained from Neely, Ala., a point within

Mobile switching limits to same destinations; and to extent they exceed class 7 rates approved in 113 I. C. C. 200, applicable between same points. Reasonable rates prescribed for future. Mobile Chamber of Commerce v. A. & V., 129 I. C. C. 147.

(17v) Rates on anthracite coal from anthracite region of Pennsylvania to destinations within the district of metropolitan Boston, but outside Boston switching district, found not unreasonable as compared with lower rates to Boston and destinations within or just outside the switching district, but unduly prejudicial to extent they exceeded the contemporaneous rates to adjacent points in metropolitan Boston outside the switching limits but not on tidewater, where distances are not greater than those to complainants' plants. Fourth-section situation is protected by an order. Undue prejudice ordered removed and reparation denied. Chadwick Coal Yard Co. v. N. Y., N. H. & H., 129 I. C. C. 165.

(17w) Rates on limestone containing 2.5 per cent or more of asphalt, broken, crushed, or ground from Margerum and Colrock, Ala., to destinations in southern territory, except Florida, found unreasonable and unduly prejudicial as compared with rates on similar asphalt rock from Oklahoma and Texas to Mississipi River points and west thereof and with those on sandstone asphaltic rock produced at Kyrock, Ky., competitive products; with rates prescribed in 96 I. C. C. 319 on crushed asphalt rock from Dougherty, Okla., to Kansas City, Mo.-Kans.; and to extent they exceeded distance rates herein prescribed. Reasonable maximum rates prescribed for future and reparation denied. Colbert Limerock Asphalt Co. v. A. C., 129 I. C. C. 177.

(17x) Rates on scrap brass and brass ingots from Pittsburgh, Pa. to Newark and Jersey City, N. J., and Baltimore, Md., found unreasonable to extent they exceeded lower rates contemporaneously in effect from 60 per cent territory west of Pittsburgh to same destinations. Reparation awarded. S. Hausman & Sons Co. v. P. R. R., 129 I. C. C. 233.

(17y) Combination rates on relaying rails from Bellwood and Hartford, Ala., to Hellams, S. C. found unreasonable as compared with joint-line rate named in fourth-section committee's distance scale subsequently used by southern trunk lines, in revising rates on these commodities; with lower rates between other points in same general territory for similar distances; and to extent they exceeded single-line distance rates plus 60-cent differential, contemporaneously in effect, differential being basis employed in making rates to points on so-called weak or short lines on shipments of iron and steel articles from Birmingham, Ala. Reparation awarded. Rinehart & Dennis Co. v. C. of G., 129 I. C. C. 247.

(17z) Rates on lumber from Maine points to destinations in New England found not unreasonable. Assailed rates were prescribed in 43 I. C. C. 641, and, subjected to general increase and reductions, are lower than those under distance scale prescribed in 49 I. C. C. 421, for application in New England. Woodstock Lbr. Co. v. B. & A., 129 I. C. C. 255.

(18a) Rate on oil-well machinery from Mobile, Ala., to Tulsa, Okla., found not unreasonable as compared with lower rate contemporaneously in effect to Coffeyville, Kans., over another route, to which, complainant contended, Tulsa was intermediate. However, route sought was considerably longer than route of movement and tariff was not described as applying between Oklahoma points. Sinclair Oil & Gas Co. v. M. & O., 129 I. C. C. 281.

(18b) Fifth-class rate on soy, soja, or soya beans from Bloomington, Ill., to Fort Smith, Ark., found unreasonable as compared with lower rate contemporaneously in effect from Norfolk, Va., to Atlanta, Ga., and Athens, Tenn., for similar distances; and to extent it exceeded lower rate subsesquentiv BpsBH ceeded lower rate subsequently established in reverse direction. Class rates are the same in both directions, and carriers failed to show why rate assailed should exceed that in reverse direction. Reparation awarded and reasonable rate for future prescribed. Binding-Stephens Seed Co. v. A., T. & S. F., 129 I. C. C. 291.

(18c) Fourth-class rate on empty tin cans from Baltimore, Md., to Bushwick station, Brooklyn, N. Y., found unreasonable to extent it exceeded lower commodity rate contemporaneously in effect to certain New York and Brooklyn stations, and subsequently established to

Bushwick. Carriers long have maintained lower commodity rates on like traffic from Baltimore to permit manufacturers there to compete with manufacturers in and around New York City. Reparation awarded. Metal Package Corp. v. B. & O., 129 I. C. C. 301.

(18d) Rate on lumber from Luverne, Ala., to Sarasota, Fla. found not unreasonable as compared with lower rates under distance scale for comparable hauls. Scale referred to was not scaled up to length of haul here involved and did not cover the shipment. Moreover, rate assailed compares favorably with rates between various points in same general territory for comparable distance and is lower than rate constructed on basis prescribed in Southern Class Rate Investigation, 100 I. C. C. 513; 109 I. C. C. 300; 113 I. C. C. 200. Aycock--Holley Lbr. Co. v. A. C. L., 129 I. C. C. 306.

(18e) Combination rates on lumber and other forest products from points in Oregon and Washington to destinations on Minneapolis, St Paul and Sault Ste. Marie, in Minnesota, Montana, North Dakota, and South Dakota found not unreasonable nor discriminatory but maintenance of lower joint rates from other points generally in the coast group to same destinations found unduly prejudicial. Undue prejudice ordered removed. West Coast Lumberman's Asso. v. C., M. & St. P., 129 I. C. C. 363.

(18f) Rates on fresh meat and packing-house products in straight or mixed carloads from Moultrie, Ga., to Baltimore, Md., Washington, D. C., and North Carolina, South Carolina, and Virginia destinations; rates on green salted hides to St. Louis, Mo., Somerville, Mass and Endicott, N. Y., found unreasonable as compared with those from southeastern points to same destinations; and rates on grease to Chicago found unreasonable to extent they exceeded rates subsequently established. Reparation awarded. Swift & Co. v. G. & F., 129 I. C. C. 407 .

(18g) Rates on automobiles, c. l., from Lansing and North Flint, Mich., to Santa Fe, N. Mex. found not unreasonable or otherwise unlawful as compared with lower rates contemporaneously in effect to Columbus, N. Mex. Contention that as Santa Fe was intermediate to Columbus, lower rate applied under an intermediate rule which provided for application of Columbus rate as maximum to intermediate points, not sustained. Shipment was routed over A., T. & S. F., and Santa Fe is not intermediate to Columbus over that route. See 118 I. C. C. 411. Mirabel Motor Co. v. M. C., 129 I. C. C. 411.

(18h) Rates on rough granite from Bradford and Westerly, R. I., to Montello, Wis. found not unreasonable, unduly prejudicial, or otherwise unlawful, as compared with lower rate contemporaneously in effect on stone or granite, dressed, axed, or hammered, to Burlington and Keokuk, Iowa, and St. Louis, Mo. Latter points alleged to be preferred are not served by Soo Line which serves Montello, and mere fact that rates assailed were out of line with rates to certain other points does not in itself warrant a finding of unreasonableness. Moreover, earnings under assailed rates compared favorably with corresponding earnings under rate sought. Montello Granite Co. v. M., St. P. & S. S. M., 129 I. C. C. 427.

(18i) Fifth-class rates on pig lead, red lead, and litharge from Joplin, Mo., to Oklahoma City, Okla., found unreasonable but not unduly prejudicial as compared with lower commodity rates from Joplin to various points in western territory, including St. Louis, Mo., East St. Louis, Ill., and Kansas City, Mo., and with distance rates prescribed in Consolidated Southwestern Cases 123 I. C. C. 203. Competitive situation prevents lower rates from Joplin to St. Louis, East St. Louis, and Kansas City from being basis of undue prejudice. Reasonable rates prescribed for future and reparation awarded. Oklahoma Traffic Asso. v. St. L.-S. F., 129 I. C. C. 461.

(18j) Combination rates on refined petroleum products from Augusta, Topeka, and El Dorado, Kans., to St. Francis, Kans., and intermediate points in Kansas and Nebraska, via Superior, Nebr., found unreasonable as compared with joint rates in effect over longer routes via Kansas City and other Missouri River points; and via Kansas City or St. Joseph, Mo., unreasonable as compared with rates from Kansas City to points in Kansas, with intrastate rates in Kansas, with rates between points in Oklahoma and Kansas, and from points in Group 2. Reasonable rates prescribed and reparation awarded. White Eagle Oil & Refining Co. v. C., B. & Q., 129 I. C. C. 467.

(18k) Rates on coke from Troy, N. Y., to destinations in New England territory found unreasonable as compared

with contemporaneous rates under Seaboard distance scale prescribed in 62 I. C. C. 317, 327, or rates of same level from points in New Jersey, Rhode Island, and Massachusetts to same destinations; and to extent they exceeded distance rates based on shortest routes over which carload traffic can be moved without transfer of lading, subject to minimum weights as herein provided. See 113 I. C. C. 200. Reasonable rates prescribed for future and reparation awarded. Hudson Valley Coke & Products Corp. v. N. Y., N. H. & H., 129 I. C. C. 472.

(18l) Rates on wrapping paper from Richmond, Va., to Harlem River, N. Y., found unreasonable as compared with rates between various points in same tances and to extent they exceed a lower general territory for comparable dis- River, which rate is subject to rule 77 rate from Covington, Va., to Harlem of Tariff Circular 18-A, unrestricted as to routing and therefore applicable via Richmond. Reasonable rate prescribed for future and reparation awarded. Albemarle Paper Mfg. Co. v. R., F. & P., 129 I. C. C. 502.

(18m) Rates on bituminous lump coal from Zeigler, Ill., to Logan and Woodbine, Iowa, found not unreasonable or otherwise unlawful. While contemporaneously, a lower rate applied from Southern Illinois district to Omaha, Nebr., and ouncil Bluffs, Iowa, to which Logan and Woodbine are directly intermediate, and was subsequently established by other carriers to intermediate points, in cluding Logan and Woodbine, this departure from fourth section was protected by fourth-section order. However, rate assailed compares favorably with contemporaneous rates to Sioux City and other Iowa points and with those prescribed in 89 I. C. C. 170, from southern Illinois district to Sioux City for comparable hauls. Bowman Lbr. Co. v. I. C., 129 I. C. C. 507.

(18n) Rates on apples from St. Joseph, Mo and related points in Missouri and Kansas to destinations in Nebraska, Iowa, Minnesota, North Dakota, and South Dakota, found unreasonable as compared with lower rates contemporaneously in effect from St. Louis and Hannibal, Mo., Alton and Quincy, Ill., and various other points in same general territory, and to extent they exceed those ascertained by use of the Kansas-Missouri scale prescribed in Consolidated Southwestern Cases, 123 I. C. C. 203; and unduly prejudicial to extent they exceed the contemporaneous rates from St. Louis, Alton, Hannibal, Quincy, and related points, or to extent their relation with rates to those points is less favorable than that which now exists. Reasonable and nonprejudicial rates prescribed for future. Hunt Bros. Fruit Co. v. A. & W., 129 I. C. C. 579.

(18o) All-rail and water-and-rail rates on sugar from San Francisco and Crockett, Calif., to Missoula, Mont., found unreasonable as compared with lower rates, distance considered, contemporaneously in effect from San Francisco to Utah, Colorado and various other points; and rates from Portland, Oreg., Seattle and Tacoma, Wash., to Missoula, found unreasonable and unduly prejudicial to extent they exceed corresponding rates from Seattle, Tacoma, and Portland to Spokane, Wash., by more than 20 cents per 100 pounds. Reasonable rates prescribed for future and reparation awarded. M'Clintock-Trunkey Co. v. McCormick S. S. Co., 129 I. C. C. 591.

(18p) Fourth-class rate, minimum 30,000 pounds, on shipments of varnish weighing less than 33,000 pounds, found not unreasonable as compared with fifth-class rate, minimum 36,000 pounds, contemporaneously applicable on paint. Under an intermediate clause a lower commodity rate on varnish minimum 40,000 pounds, would have been applicable to shipments had not an alternative rule provided for application of rate and minimum producing lowest charge. Transportation qualities of paint and varnish are not shown to be similar and fourth-class rate was prescribed on paint, between the same points, in 123 I C. C. 203. Peaslee-Gaulbert Co. v. S. Ry., 129 I C. C. 611.

(18q) Fifth-class rate on imported benzol from Eagle Pass, Tex., to Ivorydale, Ohio, a point within Cincinnati switching district, found unreasonable as compared with lower commodity rates contemporaneously in effect from near-by Texas producing points to Cincinnati and other northern markets; with rates on gasoline to Cincinnati; and to extent it exceeded lower combination consisting of lower commodity rate from Eagle Pass to St. Louis, subsequently established plus a contemporaneous commodity rate St. Louis to Cincinnati. Reparation awarded. Caldwell & Taylor v. C., R. I. & G., 129 I. C. C. 626.

(18r) Rates on sash, doors, and related articles from Clinton, Dubuque, Muscatine, and Davenport, Iowa, and Rock Island, Ill., to points in c. f. a. territory except to Michigan points, including western termini of eastern trunk lines and points taking same rates or arbitraries higher, except Buffalo, N. Y., found unreasonable and unduly prejudicial to extent they exceed present rates to Oshkosh, Wis; and rates from same origin points to Buffalo, N. Y., Bay City and Grand Rapids, Mich., found unreasonable and unduly prejudicial as compared with those from Oshkosh, with those from Pacific coast points, and with those prescribed or approved in 58 I. C. C. 105, and other cited cases. Reasonable rates prescribed for future. Farley & Loetscher Mfg. Co. v. A., C. & Y., 129 I. C. C. 645.

(18s) Rates on beets and carrots with "clipped tops," in straight or mixed carloads, from points in lower Rio Grande Valley of Texas to destinations east of the Mississippi River and north of Ohio River, found not unduly prejudicial but unreasonable as compared with rates between the same and various other points for comparable distances, and to extent that factors or arbitraries east of Mississippi River exceeded rates contemporaneously applicable on same commodities "without tops." Reasonable rates prescribed for future and reparation awarded. Carfiel & Morris v. N. Y. C., 129 I. C. C. 658.

(18t) Sixth-class rates on grain and products from Illinois and Indiana points on Wabash Ry. to Indianapolis, Ind., and through that point to Louisville, Ky., and to points in eastern trunkline and New England territories, including western termini of eastern trunk lines and points taking same rates or rates based thereon, found not unreasonable or otherwise unlawful as compared with lower commodity rates from points on various other lines to or via Indianapolis to same destination, or to eastern destinations over routes other than through Indianapolis. Mere maintenance of lower rates over above comparative routes does not of itself establish unreasonableness of rates assailed. Indianapolis Board of Trade v. B. & O., 129 I. C. C. 675.

(18u) Contention that circumstances do not justify higher joint rates prescribed on shipments to Boston of wool grown in Nebraska and Kansas, which commodity is on a competitive basis and has a lower value than wool grown in Missouri and Iowa and shipped at lower rates. FOUND: Rates on wool from various western points of production to Boston are available to all Boston dealers alike and there is no evidence of undue prejudice from the situation disclosed. Boston Wool Trade Asso. v. A., T. & S. F., 129 I. C. C. 681, 686.

(18v) Rates on tomatoes from Fruitland, Gibson, and Humbolt, Tenn., to Hutchinson, Kans. found not unreasonable in past but for future found unreasonable and unduly prejudicial as compared with lower rates contemporaneously in effect to Kansas City, Mo., and Topeka, Kans., for comparable distances, and to extent they exceed rates prescribed in Consolidated Southwestern Case, 123 I. C. C. 203. No order entered but carriers expected to establish rates in conformity with findings herein at time they comply with rates prescribed in case cited. Former report 104 I. C. C. 745, modified. Grovier-Starr Produce Co. v. C., R. I. & P., 129 I. C. C. 711.

§ 32. Standard for Carriers.

See Branch Lines §2; Evidence §55, §56.

(a) Upon investigation by commission on its own motion into and concerning the general basis of rates on fertilizer and fertilizer materials in southern territory, FOUND: That in view of the characteristics of this traffic it is reasonably entitled to a relatively low basis of rates. Maximum reasonable rates based on a distance scale prescribed for uniform application over standard lines, and certain so-called short or weak lines accorded arbitraries or a percentage over such prescribed standard-line rates. Fertilizers between Southern Points, 113 I. C. C. 389.

(b) In determining just and reasonable rates consideration must be given to density of traffic and yield of carriers in a sparsely populated section of the country, as well as to share of transportation charges borne by a particular commodity when compared with other commodities. Sames, Moore & Co. v. A., T. & S. F., 113 I. C. C. 501, 506.

§32½. Subsequent Reduction.

See Commodity Rates §4; Evidence §64; Reparation §16.

(a) Rate on sand from Lipe, Tenn.,

to Sheffield, Ala., found unreasonable to extent it exceeded rate subsequently established which conforms with rates for similar distances under scales approved by Commission in various cases. Present rate found not unreasonable. Reparation awarded. Florence Chamber of Commerce v. N., C. & St. L., 104 I. C. C. 393.

(b) Rates on sporadic shipments of fruit-wrapping paper from Los Angeles to Ordway and Rocky Ford, Colo., found unreasonable as compared with rates from paper-producing points in Washington, Oregon, Wisconsin, and Minnesota to same destinations, and to extent they exceeded lower rate subsequently established. Reparation awarded. Crown Willamette Paper Co. v. U. P. R. R., 104 I. C. C. 399.

(c) Rates on steel tanks, k. d., from South Chicago, Ill., Indiana Harbor, Ind., and Youngstown, Ohio, to Galveston, Tex., for export to Mexico, fabricated in transit at Iola, Kans., found not unreasonable due to lower export rates between same cation in transit at Kansas City, such origin and destination points with fabrilower through rates being subsequently established through Iola. Earnings under rates assailed are materially lower than those under numerous rates on same and analogous commodities from other iron and steel producing points for comparable distances, many of which were approved or prescribed by commission. United Iron Works v. Director General, 104 I. C. C. 449.

(d) Voluntary reductions in rates afford no basis for condemning previously existing adjustment. Therefore, mere proposals submitted in a general investigation can not be considered as having any material bearing on propriety of rates in effect. Wilson & Co. v. C. & O., 104 I. C. C. 641, 643.

(e) Fact that a rate was subsequently reduced in compliance with decisions of commission embracing general readjustments, involving both increases and reductions, does not of itself demonstrate unreasonableness of higher rates. Commission declines to give retroactive effect to such rates as a basis for an award of reparation. Cairo Cotton Oil Mill v. M. & O., 107 I. C. C. 299.

(f) Rate on cypress, ash, and maple lumber from Gable, S. C., to Cincinnati, Ohio, found unreasonable to extent it exceeded lower rate established subsequent to movements here involved. Reparation awarded. Gulf Red Cypress Co. v. Alcolu R. R., 107 I. C. C. 397.

(g) Rate on paper boxes, knocked down flat, from Chicago to Dallas found unreasonable to extent it exceeded lower rate established subsequent to movements here involved on basis of rates prescribed in 66 I. C. C. 571. Reparation awarded. Chicago Carton Co. v. C., B. & Q., 107 I. C. C. 586.

(h) While the subsequent reduction of a rate does not show the prior rate to be unreasonable neither does it act as a bar to reparation when former rate was clearly unreasonable. Knoxville Iron Co. v. L. & N. 107 I. C. C. 627, 634.

(i) Rates on bar iron from Knoxville, Tenn., to stations on Ohio & Kentucky Ry., a short-line carrier, found unreasonable as compared with rates from Pittsburgh and other points to same destinations, with rates between other points for comparable distances, and to extent they exceeded lower rate subsequently established. Reparation awarded. Knoxville Iron Co. v. L. & N., 107 I. C. C. 627, 633, 634.

(j) Rate on slack coal from Rock Springs district of Wyoming to Sugarton and Cornish, Utah found unreasonable to extent it exceeded lower rate established subsequent to movements here involved. Reparation awarded. Amalgamated Sugar Co. v. U. P., 107 I. C. C. 635.

(k) Rate on crude petroleum from points in Arkansas to Texas City Tex., found not unreasonable or unduly prejudicial as compared with lower rate to other Gulf ports which lower rate was subsequently made applicable to Texas City. Rate charged was in substance an emergency rate established to enable an overproduction of crude oil to be used, and its subsequent reduction does not establish that it was unreasonable prior thereto. While complainant was at a disadvantage during period of movement as compared with other ports there is no showing that the disadvantage was undue or that it suffered damage. Swiftsure Petroleum Co. v. M. P. 107 I. C. C. 637.

(l) The subsequent reduction of a rate by carrier does not, of itself, establish that rate formerly in effect was unreasonable. Swiftsure Petroleum Co. v. M. P., 107 I. C. C. 637, 638.

(m) Rate on grapefruit from Bowling

Green, Fla., to Wausau, Wis., found unreasonable to extent it exceeded lower joint rate contemporaneously in effect to Duluth and Albert Lea, Minn., Eau Claire, Wis., and other points in same territory, which lower rate was established to Wausau subsequent to movement here involved. Reparation awarded. Murphy v. A. C. L., 107 I. C. C. 651.

(n) Contention that subsequent reduction of a rate does not show prior rate to be unreasonable, sustained. Murphy v. A. C. L., 107 I. C. C. 651, 652.

(o) Upon further hearing, rate on wrapping paper from Madison, Me., to New Hope, Pa., found unreasonable to extent that proportional rate comprising factor to Brunswick, Me., exceeded lower proportional rate from Enfield, Howland, Montague, and Lincoln, Me., farther distant points, which lower rate was established from Madison subsequent to movements here involved. Reparation awarded. To this extent former report, 88 I. C. C. 593, reversed. Universal Paper Bag Co. v. M. C., 107 I. C. C. 661.

(p) Class D rate on manganese ore from Phillipsburg, Mont., to Portland, Oreg., found unreasonable to extent it exceeded lower commodity rate contemporaneously in effect to Tacoma, Wash., and subsequently established to Portland. Complainant was promised lower rate, but it could not be made available for these shipments because of delays incident to formality of tariff publication, complainant being required to move its traffic before such lower rate could be made effective. Reparation awarded. Humphreys v. Director General, 109 I. C. C. 157.

(q) Mere fact that as a result of general readjustment in rates certain rates from a given point were reduced does not warrant a finding that higher rates were unreasonable. South River Lbr. Co. v. N. & W., 109 I. C. C. 173, 175.

(r) Rates on fuel and crude oil from Smackover, Ark., to Lincoln, Nebr., found unreasonable to extent it exceeded lower rate contemporaneously in effect to Omaha, Nebr., and Council Bluffs, Iowa, which lower rate was subsequently established to Lincoln. Lincoln is usually accorded same rates on oil from Smackover as Omaha and related points, the relationship being recognized in 36 I. C. C. 109. Lincoln Traction Co. v. M. P., 109 I. C. C. 653.

(s) Mere fact that a rate has been reduced does not establish unreasonableness of former rate. Knoxville Traffic Bureau v. A. C. L., 109 I. C. C. 705, 709.

(t) Rates on paper and paper articles from Urbana, Ohio, and St. Louis, Mo., to Dallas, El Paso, and San Antonio, Tex., found unreasonable to extent they exceed rates subsequently established, in conformity with those prescribed in the Paper case, 66 I. C. C. 571. Reparation awarded. Graham Paper Co. v. C., R. I. & P., 112 I. C. C. 51.

(u) Class rates on asphalt found unreasonable in past as compared with lower commodity rates applying on cement and petroleum road oil, and to extent they exceeded lower rate subsequently established. Present rate found not unreasonable since transportation, commercial, and other qualities of the three commodities are not so similar as to warrant prescription of same rates for all of them, or a fixed relationship between them. Reparation awarded. Warren Brothers Co. v. S. P., 112 I. C. C. 87.

(v) An offer of carriers to reduce a rate does not of itself establish that rates in effect were or are unreasonable. Standard Pipe Line Co. v. T. & P., 112 I. C. C. 186, 187.

(w) The voluntary reduction of a rate by carrier is not of itself sufficient to establish unreasonableness of former rate, and in absence of proof of damage, fact that carriers have charged a higher rate to an intermediate than to a more distant point is not sufficient to entitle shipper to an award of reparation for a violation of section 4. Dees v. M. & O., 112 I. C. C. 397, 398.

(x) The unreasonableness of a rate is not established, nor it is admitted, by a subsequent voluntary reduction. Bunte Bros. v. C. & N. W., 112 I. C. C. 557, 558.

(y) The subsequent reduction of a rate does not of itself establish unreasonableness. Dow Chemical Co. v. P. M., 112 I. C. C. 559, 560.

(z) Rate assessed on crude and fuel oils from El Dorado, Norphlet, and Smackover, Ark., to Alexandria, La., found not unreasonable. Complainant relies upon fact that subsequent to movement carriers reduced rate on refined oils, arriving at rate sought by deducting 6.5c, the differential applied by commission on fuel and other low-

grade oils under refined oils. Rate charged was equivalent to the single-line maximum distance scale rate on crude and fuel oils prescribed in 58 I. C. C. 610 for a less distance, and carrier further supports the reasonableness of rate charged by numerous rate comparisons on low-grade oils throughout Oklahoma, Kansas, and other States, prescribed or approved by the commission, as well as other rates under which these oils move from various Kansas and Oklahoma points to destinations in western Missouri. Alexandria Refining Co. v. M. P., 112 I. C. C. 613.

(aa) The voluntary reduction of a rate by a carrier does not in itself constitute sufficient proof of the unreasonableness of former rate. Alexandria Refining Co. v. M. P., 112 I. C. C. 613, 614.

(bb) Voluntary reduction of a rate is not of itself evidence of unreasonableness of the rate so reduced. Sames, Moore & Co. v. A., T. & S. F., 113 I. C. C. 501, 507.

(cc) Rates on sugar from points in Nebraska, Colorado, Kansas, Utah, and Idaho, to Oklahoma destinations, found unreasonable to extent they exceed rates 7.5c per 100 pounds less than present rates. Oklahoma Traffic Asso. v. A. G. S., 113 I. C. C. 635.

(dd) Combination rates based on Suffolk, Va., and assessed on shipments of cotton moving from North Carolina points to Danville, Va., found unreasonable to extent they exceeded lower joint rates subsequently established and contemporaneously in effect during period of movement to Martinsville, Va., a farther distant point beyond Danville. Reparation awarded. Bradshaw-Roberson Cotton Co. v. A. C. L., 113 I. C. C. 661.

(ee) Rates on bituminous coal from points in southern Illinois and western Kentucky to points in southeastern Missouri and northeastern Arkansas found unreasonable as compared with rates to St. Louis, Crystal City, Ste. Genevieve, St. Marys, Cape Girardeau, Illmo, and Chaffee, Mo. Reasonable rates prescribed for future and reparation awarded. Scott County Milling Co. v. B. C. R. R., 113 I. C. C. 675.

(ff) Rates on wheat from points in Missouri, milled at Jefferson City, and resulting flour reshipped to destinations in Arkansas found not unreasonable as compared with lower rates subsequently established. Carriers published these lower rates in conformity with commission's suggestion in 80 I. C. C. 620, wherein an extensive readjustment in rates on grain and products was prescribed in this general territory. The commission had consistently denied reparation in cases where general readjustments have been made in extensive territories, resulting in both increases and reductions, See 87 I. C. C. 451, 468; moreover, the mere reduction of a rate is insufficient to prove that higher rate formerly charged was unreasonable. See 85 I. C. C. 449. Dulle Milling Co. v. M. P., 113 I. C. C. 742.

(gg) Complainant alleged that due to misrouting the shipper was compelled to pay a rate on a car of lumber shipped Oct. 17, 1924, from Orangeburg, S. C., to Leesburg, Va., which was unreasonable and in violation of the fourth section. Shipment moved Southern to Alexandria, Va., W. & O. D. beyond, charged 38c. Other than a subsequent reduction there is nothing to show that the rate charged was unreasonable, and there is no evidence of a violation of the fourth section. HELD: Shipment not misrouted, rate charged not unreasonable or otherwise unlawful, complaint dismissed. Lynchburg Traffic Bureau v. Southern Ry., 118 I. C. C. 523.

(hh) Rates on paper strawboard and boxboard, from New Haven and Windsor Locks, Conn., to Ridgefield, N. J., found unreasonable to extent they exceeded lower rates subsequently established. Reparation awarded. Lowe Paper Co. v. C. N. E., 115 I. C. C. 189.

(ii) Combination rates on coal from Wilder and Davidson, Tenn., via Cincinnati to Peoria, Ill., thence reconsigned to points in Iowa, found not unreasonable as compared with lower joint rates contemporaneously in effect from and to same origin and destination points via Louisville, Ky. Considering earnings yielded under rates assessed it can not be said that they exceeded a maximum reasonable basis, nor is the fact that they were reduced to the joint-rate basis shortly after shipments moved sufficient to defeat this conclusion. Fentress Coal Co. v. T. C. Ry., 115 I. C. C. 286.

(jj) Rates on dried fruits, in sacks, from points in groups 1 and 3 in California, to Ogden and Salt Lake City, Utah, found not unreasonable as com-

pared with rates contemporaneously in effect to Denver, Colo., and Butte, Mont., but rates on dried fruits, in boxes, to and from same points, found unreasonable to extent they exceeded lower rates voluntarily established by carriers subsequent to movements here involved. Reparation awarded. Anderson-Taylor Co. v. A., T. & S. F., 115 I. C. C. 313.

(kk) Rate on iron beds from Kenosha, Wis., to Meridian, Miss., found not unreasonable as compared with lower rate subsequently established, or with lower rates for greater distances from points in Pennsylvania and Michigan to Mississippi and Louisiana destinations where water competition influences the rate level. Rate assailed did not exceed general level of rates contemporaneously applicable on iron beds from points in c. f. a. territory to Mississippi Valley and southeastern destinations for comparable distances. Hulett & Son v. C. & N. W., 115 I. C. C. 399.

(ll) Sixth-class rate on crossties from Bedford and other points in Pennsylvania to Buffalo, N. Y., and related points, found unreasonable to extent it exceeded a commodity rate subsequently established from Everett, Pa., to Buffalo, and a lower rate applicable in reverse direction from Buffalo and related points to approximately 40 destinations of comparable distance in Pennsylvania and New Jersey, including Bedford and Everett. Reasonable rates prescribed for future, and reparation awarded. LaFayette Lbr. Co. v. P. R. R., 115 I. C. C. 445.

(mm) Based upon light traffic density and unfavorable operating and financial conditions, joint distance commodity rate assessed on petroleum crude oil from Texon, Tex., to Texas City, Tex., for coastwise movement, found not unreasonable because it exceeded lower rate subsequently established, such lower rate being literally forced upon carrier to meet pipe-line competition. Kay County Gas Co. v. G., C. & S. F., 115 I. C. C. 736.

(nn) Voluntary reduction of rate by carrier is no criterion per se of its previous unreasonableness. Kay County Gas Co. v. G., C. & S. F., 115 I. C. C. 736, 737.

(oo) Fact that rates on same commodity to two different destinations are not contemporaneously reduced does not alone render rate not reduced unreasonable or otherwise unlawful. Bailey v. O. S. L., 115 I. C. C. 745, 747.

(pp) Subsequent reduction of rates does not, in itself, carry the presumption that rates formerly in effect were unreasonable. Crook Son & Co. v. N. Y. C., 118 I. C. C. 512, 514.

(qq) Following 96 I. C. C. 136, rates on gasoline and naphtha, from Beckett, Wilson, Bristow, Okmulgee, and Tulsa, Okla., to Blue Creek, W. Va., found unreasonable in their relation to rates to Charleston, W. Va., no warrant being found for the spread in the rates maintained between these two destinations. Reasonable rate prescribed for future and reparation awarded. Transcontinental Oil Co. v. B. & O., 118 I. C. C. 518.

(rr) Mere fact that rates charged reflect voluntary reductions is not sufficient in and of itself to indicate that prior rates were unreasonable. Jackson Traffic Bureau v. I. C., 120 I. C. C. 33, 36.

(ss) Sixth-class rate applicable on hollow building brick and hollow building tile from Haviland, Ohio, to Fort Wayne, Ind., found unreasonable to extent it exceeded lower commodity rate prescribed in General Brick Case, 68 I. C. C. 213, and established subsequent to movement between points here involved. Reparation awarded. Haviland Clay Works Co. v. C. N. R. R., 120 I. C. C. 241.

(tt) Complainant attacked combination rate charged on fluorspar, carloads, shipped during July, August and Sept., 1922 from Mesila Park, N. M., to Torrance, Calif., as unreasonable and unduly prejudicial to extent it exceeded a rate of $8 subsequently established. Mesila Park is on the Santa Fe 41 miles north of El Paso, Tex. Torrance is on the P. E., 18 miles west of Los Angeles, Calif. Shipments moved Santa Fe to Los Angeles and P. E., beyond, 1,071 miles, charged commodity rate of $10.125 to Los Angeles and class D rate of $1.20 beyond. Fluorspar is rated class D. The rate of $10.125 also applied to San Francisco, 295 miles greater than to Los Angeles. HELD, rate attacked unreasonable to extent it exceeded $10.125, reparation awarded. Llewellyn Iron Works v. A., T. & S. F. Ry., 122 I. C. C. 232.

(uu) The reduction of a rate is not of itself sufficient to justify the presumption that the former rate was unreasonable. Consolidated Rendering Co. v. N. Y., N. H. & H. R. R., 123 I. C. C. 98, 100.

(uua) Voluntary reduction of a rate by carriers is evidence to be considered

along with other proof that rate previously in effect was unreasonable. Biegel Sack Co. v. C. R. R. Co. of N. J., 122 I. C. C. 78, 80.

(uub) Rate on bituminous-coal screenings from Harrisburg, Ill., to Sioux City, Ia., found unreasonable to extent it exceeded a lower rate contemporaneously in effect from southern Illinois mines to Sioux City over various routes, which lower rate was subsequently established from Harrisburg to Sioux City via route of movement. Reparation awarded. Saline Coal Corp. v. C., M. & St. P., 122 I. C. C. 467.

(uuc) Combination rates on lumber from points in Mississippi to Mariemont, Ohio, found unreasonable to extent they exceeded lower rate subsequently established. Rates assailed were based on Cincinnati using factors of southern lines plus the local to Newtown, Ohio, applicable to Mariemont, an intermediate point, under proper tariff provision, and subject to combination rule. The rate subsequently established was a proportional rate from Cincinnati to Mariemont on shipments originating in the South and is reasonably aligned with rates on lumber from same origin territory to various Ohio points in vicinity of Mariemont. Reparation awarded on shipments moving prior to establishment of lower rate. Stanley Lbr. Co. v. A. & V., 122 I. C. C. 506.

(uud) Subsequent reduction of a rate is not conclusive of unreasonableness of higher rate formerly in effect. Redwood Mfg. Co. v. S. P. Co., 123 I. C. C. 30, 32.

(vv) Local rate on redwood lumber from Pittsburg, Calif., to Hayden, Ariz., originally moving from Casper, Calif., to Pittsburg by water, found not unreasonable, discriminatory, or unduly prejudicial, as compared with lower ex-water proportional rate from Pittsburg to Phoenix and other points more distant than Hayden, or with lower rate established to Hayden subsequent to movement. Such lower rates are on a low basis, having been established because of market and carrier competition, which is not reflected at Hayden, and subsequent reduction is not conclusive of unreasonableness of the higher rate. Redwood Mfg. Co. v. S. P. Co., 123 I. C. C. 30, 32.

(ww) The subsequent reduction of a rate in and of itself does not justify an award of reparation. Kohlman Bros. & Sugarman v. L. & N., 123 I. C. C. 56, 58.

(xx) Sixth-class rate on acid phosphate from Lowell, Mass., to East Windsor, Conn., found not unreasonable or otherwise unlawful as compared with lower commodity rate subsequently established, or with commodity rates contemporaneously in effect to Bridgeport, Hartford, and other Connecticut points, and from Carteret and Grasselli, N. J., to New England points for comparable distances. Maintenance of a higher rate to East Windsor than to the other points to which it is closely related does not necessarily indicate that higher rate is unreasonable as the general conditions of transportation are substantially dissimilar; nor is the subsequent reduction, of itself, sufficient to justify presumption that former rate was unreasonable. Consolidated Rendering Co. v. N. Y., N. H. & H., 123 I. C. C. 98.

(yyzz) Mere fact that one incident of a general readjustment was reduction of a rate from a given point does not prove that former rate was unreasonable. See 58 I. C. C. 46. Manget Bros. v. G. R. R., 123 I. C. C. 532, 534.

(3a) Voluntary reduction of a rate creates no presumption that former rate was unreasonable. Newark Call Printing & Publishing Co. v. C. R. R. of N. J., 126 I. C. C. 569, 571.

(3b) Upon contention that subsequent reduction of a rate is not indicative of the unreasonableness of the prior rate, HELD: While this contention is ordinarily correct it can not be sustained where rates assailed are higher than those on analogous articles which are higher rated, sold at higher prices, and no more desirable from a transportation standpoint. Chicago Granatine Mfg. Co. v. I. C. R. R., 126 I. C. C. 572.

(3c) Reduction of a rate is not of itself sufficient to show that the prior rate was unreasonable. Nat'l. Show Case Co. v. S. A. L., 128 I. C. C. 193, 197.

(3d) Reduction of a rate does not prove that rate formerly charged was unreasonable. See 107 I. C. C. 147. Vickers Petroleum Co. v. M. P., 128 I. C. C. 205.

(3e) Rate on gasoline from Potwin, Kans., to Westwego and St. Rose, La., for export, found not unreasonable as compared with lower rate contemporaneously in effect to same points from Arkansas

City, and other Kansas producing points, and subsequently established from Potwin. Reduction of a rate does not prove that rate formerly charged was unreasonable. See 107 I. C. C. 147. Vickers Petroleum Co. v. M. P., 128 I. C. C. 205.

(3f) Neither voluntary reduction of a rate by carrier nor maintenance of a lower rate over another route between same points is sufficient to establish unreasonableness of a higher rate. Western Paper Makers Chemical Co. v. A. C. L., 128 I. C. C. 244, 245.

(3g) Subsequent reduction of a rate does not prove that rate previously assessed was unreasonable. United States Potters' Asso. v. A., C. & Y., 128 I. C. C. 249, 254.

(3h) Rates on peanuts from Petersburg and Suffolk, Va., to Enid, Okla., found unreasonable to extent they exceeded lower rate subsequently established, which lower rate was same as that prescribed in 100 I. C. C. 307, from same points to McAlester, Shawnee, and Oklahoma City, Okla. While traffic and transportation conditions are substantially the same to Oklahoma City as to Enid, latter is slightly more distant. However, southwestern lines generally observe rates to Texas points as maxima to Oklahoma destinations and rates prescribed in cited case conform with that practice. Reparation awarded. Alton Mercantile Co. v. A., T. & S. F., 128 I. C. C. 721.

(3i) Complainant alleged that the rate of $1.45 assessed on a carload of structural steel shipped Jan. 10, 1925, from Indiana Harbor, Ind., to Blythe, Calif., fabricated in transit at Jacksonville, Ill., and forwarded from the latter point on June 24, 1925, was unreasonable to extent it exceeded $1 subsequently established. Shipment moved I. H. B., C. B. & Q. via Jacksonville to Kansas City, Mo., thence Santa Fe. Charged $1 to Cadiz., and 45c beyond, and subsequently the $1 was established to points on the Ripley Branch, including Blythe. HELD, rate attacked not unreasonable, complaint dismissed. Illinois Steel Bridge Co. v. A. T. & S. F. Ry., 129 I. C. C. 87.

(3j) Class rates on muriatic, sulphuric, and nitric acids, from Kansas City, Mo.-Kans., Grasselli, Ind., and Hegewisch, Ill., to Omaha, Nebr., found not unreasonable as compared with lower commodity rates subsequently established. Bruce & Co. v. C. & N. W., 129 I. C.C. 435.

(3k) Subsequent reduction of a rate does not, in itself, establish unreasonableness of former rate. Bruce & Co. v. C. & N. W., 129 I. C. C. 435, 437.

§36. Ton-mile Revenue.

See Supra §11, §20; Evidence §36, §58.

(a) Ton-mile earnings yielded by coal rates found reasonable by commission in a proceeding wherein the relationship was controlling factor, can not be accepted as criteria for coal rates in general. Fentress Coal Co. v. T. C. Ry., 115 I. C. C. 286, 287.

§ 38. Value of Commodity.

See Classification §11; Evidence §61.

(a) Rate on tin-plate scrap found unreasonable and reasonable rate for future prescribed. While rate on this commodity is equal to that on scrap iron and billets, revenues on the latter are materially greater because of heavier car loadings. Scrap tin plate is a refuse of little intrinsic value and can move only under a rate relatively low as compared with articles usually classed as junk. See also 21 I. C. C. 93. Reparation awarded. Metal Thermit Corp. v. C. R. R. of N. J., 112 I. C. C. 523.

(b) Rates on anthracite silt from Scranton and other Pennsylvania mines to Buffalo, N. Y., and Erie, Pa., for transshipment by lake to interstate destinations, found unreasonable. Washed silt is of extremely low value at the mines and although used to some extent for other purposes, it has value as a domestic fuel only when manufactured into briquets. Furthermore, transshipment rates which contemplate a movement beyond ports may reasonably be somewhat lower than those applicable on local traffic. Reparation awarded. Stott Briquet Co. v. P. R. R., 113 I. C. C. 693.

(c) Value is an essential factor in determining reasonableness of a rate, but is only one of the elements to be considered. Southern Mirror Co. v. S. Ry., 115 I. C. C. 590, 594.

(d) Value of a commodity is only one element to be considered in determining reasonableness of rates, for transportation cost to carrier is not less because of value of article transported. Due consideration must also be given to transportation conditions surrounding hand-

ling of traffic. However, commission can not disregard the value of service to shippers; that is, what rates the commodity can bear without curtailing the movement. Lignite Coal from North Dakota, 126 I. C. C. 243, 247.

§ 39. Value of Service.

See Evidence §62.

(a) Upon investigation by commission on its own motion into and concerning the general basis of rates on fertilizer and fertilizer materials in southern territory, FOUND: That in view of characteristics of this traffic it is reasonably entitled to a relatively low basis of rates. Maximum reasonable rates based on a distance scale prescribed for uniform application over standard lines, and certain so-called short or weak lines accorded arbitraries or a percentage over such prescribed standard line rates. Fertilizers between Southern Points, 113 I. C. C. 389.

(b) The commission has repeatedly condemned the action of carriers in adjusting rates so as to impede or stifle the movement of commodities in any given direction. Old Ben Coal Corp. v. C. C. C. & St. L. Ry., 115 I. C. C. 84, 87.

§40. Volume of Traffic.

See Evidence §63.

(a) While volume of movement is an important element to be considered in arriving at a reasonable rate, an excessive rate can not be justified merely on account of fact that movements thereunder are infrequent. Orford Soap Co. v. B. & M. R. R., 107 I. C. C. 338, 339.

(b) While volume of movement is an important element to be considered in arriving at a reasonable rate, an excessive rate can not be justified merely on account of fact that movements thereunder are infrequent. Barr & Dougherty v. G. N., 109 I. C. C. 487, 489.

(c) Fact that but relatively few shipments of a commodity move between certain points is not sufficient grounds to deny shippers reasonable rates. Dame Furniture Co. v. C., N. O. & T. P., 115 I. C. C. 566, 568.

REBATES

See Absorption of Charges §5½ (a); Allowance VII; Common Carrier; Crimes VI; Evidence §48.

RECEIVERS

(a) Operating company conducted business for a holding and selling company, for which latter company a receiver was appointed. Shipments were consigned to operating company and charges paid by holding and selling company prior to receivership, and by receiver thereafter. Complaint filed on behalf of receiver. Upon contention that since holding and selling company is not a party to complaint, shipments on which it paid charges prior to receivership are not properly covered by complaint, HELD: Receiver, upon appointment, became entitled to custody and control of all property of holding and selling company and it became his duty to secure all available assets. Complaint was properly filed on his behalf, as receiver, for the holding and selling company, and as such he is entitled to reparation due on all shipments delivered during statutory period. Columbia Steel Co. v. B. & O., 109 I. C. C. 46, 49.

(b) Complaint was filed by a corporation which ultimately became bankrupt and reparation statement under Rule V of the Rules of Practice was prepared and submitted by its receivers. Upon contention that commission can not legally award reparation to the corporation, which no longer exists. HELD: It being well settled that reparation claims are assignable reparation awarded to receivers who were vested with full power to take into possession all property and assets of the defunct corporation, including this claim for reparation. Wertheim Coal & Coke Co. v. L. V., 112 I. C. C. 513, 515.

(c) Upon contention of receiver of a carrier named as a party defendant that an order for reparation should not be issued against him on shipments made prior to date of receivership. HELD: Awards of reparation are not dependent upon solvency or insolvency of carriers concerned, but if a through rate, joint or combination, is found unreasonable and reparation is awarded, the order entered may run against carriers collectively that participated in transportation. See also 89 I. C. C. 125. Hansen-Peterson Co. v. A., T. & S. F., 113 I. C. C. 575, 577.

(d) One defendant carrier in the hands of a receiver was operated at a considerable loss during period covered

by complaint alleging unreasonable rates. Upon contention of receivers that it would be inequitable for them to be required to further reduce their capital assets by turning a portion thereof over to a complainant for exaction of unreasonable rates, HELD: Contention has no support in law. While financial condition of carrier may be taken into consideration in determining reasonable rates, such carrier is not relieved of any liability for damages because of fact that it was operating at a loss at time damages were sustained. Continental Sugar Co. v. N. Y. C., 115 I. C. C. 124, 125.

(da) That unreasonable freight charges unlawfully exacted had been commingled with other moneys of railroad and used HELD not to preclude holding that as to such moneys railroad was trustee ex maleficio for benefit of shipper, it being shown that railroad or its receiver at all times held funds in excess of shipper's claim. Spiller v. St. Louis & S. H. R. Co., 14 Fed (2d) 284.

(db) A trusteeship ex maleficio, while ordinarily arising out of fraud or deceit, may arise out of duress or other unconscionable manner of obtaining property. Spiller v. St. Louis & S. H. R. Co., 14 Fed. (2d) 284.

(dc) Shippers, having obtained judgments on claims for unlawful freight exactions and thereafter intervened in receivership suit against carrier, HELD not entitled to preferred claims for attorney fees. Spiller v. St. Louis & S. F. R. Co., 14 Fed. (2d) 284.

(de) Shippers, having obtained judgment on claims for illegal freight exactions and thereafter intervened in receivership suit against railroad, HELD not entitled to priority under rules giving preference to claims for operating expenses. Spiller v. St. Louis & S. F. R. Co., 14 Fed. (2d) 284.

(e) "Arise," as used in decree for sale of railroad's property subject to unpresented claims "which may arise after the entry of this decree," HELD to mean to appear, to become, to present itself, and not synonymous with "accrue," nor used in the sense of "originating." Spiller v. St. Louis & S. H. R. Co., 14 Fed. (2d) 284.

(f) Shipper, intervening and asserting claims in receivership suit against railroad after final decree and sale of railroad's property, HELD bound by prior orders and decrees in suit. Spiller v. St. Louis & S. H. R. Co., 14 Fed. (2d) 284.

(g) Where decree directing receiver's sale of railroad property required purchasers to take subject to any unpaid claims of creditors, "which shall have been or shall be admitted * * * or adjudged * * * to be prior in lien or superior in equity to the refunding mortgage, * * * " and subject to unpresented claims "which may arise after the entry of this decree." HELD, purchasers took subject to claims of shippers, who intervened before confirmation of sale, asserting claims for reparations then being litigated at law. Spiller v. St. Louis & S. F. R. Co., 14 Fed. (2d) 284.

(h) Insolvent carrier was purchased by a trustee at foreclosure sale, and receiver ordered to continue operation for account of trustee who should be responsible for any deficit resulting from such operation. At time order discharging receiver was issued no record was made of claims for reparation and defendant carrier urges therefore that an award of reparation should not be made. FOUND: Awards of reparation are not dependent upon solvency or insolvency of carriers concerned. They require payment of sum found due and run against all defendant carriers. See 40 I. C. C. 501; 62 I. C. C. 60. Mobile Chamber of Commerce v. M. S., B. & P., 129 I. C. C. 419, 422, 423.

(i) Insolvent carrier was purchased by a trustee at forclosure sale, and receiver ordered to continue operation for account of trustee who should be responsible for any deficit resulting from such operation. At time order discharging receiver was issued no record was made of claims for reparation and defendant carrier urges therefore that an award of reparation should not be made. FOUND: Awards of reparation solvency of carriers concerned. They reare not dependent upon solvency or inquire payment of sum found due and run against all defendant carriers. See 40 I. C. C. 501; 62 I. C. C. 60. Mobile Chamber of Commerce v. M. S. B. & P., 129 I. C. C. 419, 422, 433.

(j) Rating base value of tramway company furnishes no proper or legal value, since the former is bottomed on criterion on which to bottom actual present value of lands plus present stable cost of constructing plant, less depreciation for use, and plus a fair allowance for going value, intangible element, and working capital. Temmer

v. Denver Tramway Co., 18 Fed. (2d.) 226.

(k) In determining solvency of tramway company at time of reorganization elements, and working capital. Temmer for purpose of decididng whether provision for unsecured creditors was fair, rating base "value" determined in action to increase rate of fares is not conclusive, since actual value or fair and reasonable market value is not value taken into account in such valuation. Temmer v. Denver Tramway Co., 18 Fed. (2d.) 226.

(l) Receiver cannot, by his acts as such, in bringing action to increase fares of tramway company pending receivership, estop other parties litigant in pais as his very office makes him impotent to do so. Temmer v. Denver Trimway Co., 18 Fed. (2d.) 226.

II. DISCRIMINATION.

See Discrimination.

§2. In General.

(a) Proposal of Wabash Ry. and Grand Trunk Ry. system to cancel free diversion or reconsignment of anthracite coal at Detroit, Milwaukee Junction, West Detroit, and Port Huron, Mich., found not justified. Such free service is accorded by various lines at other points in c. f. a. territory and carriers failed in their proof to establish affirmatively that proposed schedules, if allowed to become effective, would not result in undue prejudice to consignees of anthracite coal at Detroit and undue preference of competitors at Chicago and other distributing points who would continue to enjoy free reconsignment. Diversion and Reconsignment of Anthracite Coal, 112 I. C. C. 374.

(b) Mere inference that conditions surrounding certain shipments on which reconsignment charges are assessed are similar to those surrounding other shipments on which lower charges apply, is not sufficient to sustain a finding of undue prejudice and discrimination. Toberman, Mackey & Co. v. C., C. & O., 118 I. C. C. 565, 566.

III. REASONABLENESS OF CHARGES.

§3. In General.

See Facilities and Privileges §15 (3i); Reasonableness of Rates.

(a) Complainant alleged in substance that the refusal of defendant at Cincinnati, O., to reconsign to Syracuse, N. Y., as first requested by him, a carload of yellow pine lumber shipped Jan. 23, 1920, from Sweetwater, Ala., to Cincinnati and ultimately reconsigned from that point to Detroit, Mich., resulted in collection of charges of $5 for reconsignment, $6 for demurrage, and $20 for storage at Cincinnati that were unjust, unreasonable and in excess of those applicable. The real issue is whether it was the duty of defendants agent under the law to have complied with the first request for reconsignment to Syracuse. By letter of Jan. 26, 1920, complainant requested agent at Cincinnati to reconsign the shipment to Syracuse and specified routing over the N. Y. C. The agent received that request on Jan. 28, 1920, and upon arrival of the shipment at Cincinnati on Feb. 9, 1920, advised complainant by letter received the following day of the arrival of the car, that reconsignment

to Syracuse as requested would not be accepted because of an existing embargo, and asked that other disposition be given. On Feb. 13, 1920, complainant wired the agent to reconsign the shipment to Detroit, and it went forward to that point. Shipment moved A. & N., and Southern to Birmingham, Ala., thence Southern or A. G. S., to Chattanooga, Tenn., and C. N. O. & T. P., to Cincinnati. N. Y. C., serves Syracuse but not Cincinnati. The request for reconsignment to Syracuse was therefore incomplete as to routing, and the agent should have forwarded the shipment by any available route out of Cincinnati over which the lowest through rate consistent with N. Y. C., delivery applied. The tariff naming the joint rate authorized routing from Sweetwater to Syracuse through Cincinnati and through Hagerstown Junction, and N. & W., and other lines. HELD, refusal of agent to reconsign the shipment to Syracuse resulted in charges in excess of those applicable to the extent they exceeded $2 for reconsignment, reparation awarded. Thames v. Director General, 112 I. C. C. 677.

(b) Proposal of the Wabash Ry. and Grand Trunk Ry. system to cancel free diversion or reconsignment of anthracite coal at Detroit, Milwaukee Junction, West Detroit, and Port Huron, Mich., found not justified. Such free service is accorded by various lines at other points in c. f. a. territory and carriers have failed in their proof to establish affirmatively that proposed schedules, if allowed to become effective, would not result in undue prejudice to consignees of anthracite coal at Detroit and undue preference of their competitors at Chicago and other distributing points who would continue to enjoy free reconsignment. Diversion and Reconsignment of Anthracite Coal, 112 I. C. C. 374.

(c) Reconsignment charges in addition to rates to and from point of reconsignment, assessed on shipments of lumber, found unreasonable. In 89 I. C. C. 236 and 91 I. C. C. 615 similar findings were made. In case here involved there was no delivery, actual or constructive, prior to second movement, whereas in cited cases there was a delivery. However, in both cited and instant cases the line-haul charges collected were same as though there had been two separate and distinct shipments. The record shows no service in addition to that performed under the separate line-haul rates which would justify a charge for reconsignment any more than it would if cars had been actually or constructively delivered. Reparation awarded. Wilgus v. P. R. R., 113 I. C. C. 617.

(d) The collection of a reconsignment charge on lumber in addition to the assessment of the full local charges to and from the point of reconsignment is unreasonable. Brown Hoisting Machinery Co. v. Pennsylvania R. R., 115 I. C. C. 218, 219.

(e) Shipment of scrap iron from Buttonwood, Pa., originally consigned to Burnham, Pa., was refused by consignee and reconsigned under new bill of lading by consignor to Cumberland, Md. Reconsignment charge assessed in addition to local rates to and beyond reforwarding point found unreasonable. Discontinuance of such charge required for future and reparation awarded. See also 101 I. C. C. 389 and cases there cited. Cohen & Son v. P. R. R., 115 I. C. C. 307.

(f) Governing tariff provided for application of rates to and from point of reconsignment, plus reconsignment charges, if no through rate applied via point of reconsignment. Carrier's agent assessed local rates to and from reforwarding point on shipments of barley moving from points in South Dakota and Minnesota to Minneapolis, thence reforwarded to Milwaukee, apparently regarding the movement from Minneapolis as new shipments rather than reconsignments. HELD: In absence of documentary evidence that written notice of reconsignment was given by shipper and received by carrier's agent, the failure of carrier to assess a reconsignment charge was proper. Zimmerman v. Director General, 115 I. C. C. 407.

(g) Upon contention that combination rates on shipments of potatoes from Sidney, Mich., to Philadelphia, Pa., reconsigned at Old Forge, Pa., were inapplicable and unreasonable to extent they exceeded lower joint rate contemporaneously in effect from origin to final destination over another route, plus a backhaul charge, HELD: Governing reconsignment tariff provided for the application of through rate plus certain distance rates for detours or back hauls not to exceed 300 miles, but a back haul of more than 480 miles would have been necessary in instant case. Reconsignment at Old Forge did not, therefore, come within such provision. Miller v.

P. M. Ry., 115 I. C. C. 461, 462, 463.

(h) Rates plus reconsignment or switching charges applicable on lime from Woodville, Ohio, to stations on Western Maryland in Baltimore, Md., east of Walbrook station, found unreasonable and unduly prejudicial to extent they exceeded rates without the addition of such charges contemporaneously maintained to Walbrook and other destinations in Baltimore. Reparation awarded. Washington Bldg. Lime Co. v. P. R. R., 115 I. C. C. 618.

(i) Complainant alleged that a reconsignment charge of $6.30 assessed on a car of yellow pine lumber shipped August 29, 1925 from Meridian, Miss., to Hobart, Ind., reconsigned at the latter point to another consignee at Chicago, Ill., was unreasonable. Shipment moved M. & O., C. & E. I., and Pennsylvania to Hobart, placed for delivery but refused, whereupon it was sold f. o. b. Chicago and forwarded to the new consignee at that point for delivery by the C. B. & Q. Paid rates to and beyond Hobart, plus reconsigning and other charges. HELD, reconsignment charge unreasonable, reparation awarded. Usher Bros. v. M. & O. R. R., 120 I. C. C. 159.

(j) Complainant attacked rates charged on eight cars of potatoes from Wisconsin and South Dakota to Illinois, Indiana and Iowa in Nov. and Dec., 1920 and March and Sept., 1921 as unreasonable. Shipments were originally billed to Chicago and after arrival and placement on public team tracks they were reconsigned to other destinations. Charged combination on Chicago plus reconsignment charge. HELD, assessment of reconsignment charge in addition to combination rates unreasonable, reparation awarded. Earl Bros. v. C., M. & St. P. Ry., 120 I. C. C. 299.

(k) Lumber from Meridian, Miss., to Hobart, Ind., placed for unloading but refused by consignee, was subsequently reconsigned to Chicago. Reconsignment charges were assessed under tariff rule which provided that if a car is placed for unloading at original destination and is reforwarded without being unloaded to a point outside the switching limits it will be subject to published rates to and from point of reconsignment plus reconsignment charge. HELD: In 89 I. C. C. 236 and other cited cases, reconsignment charges assessed under a similar rule were found unreasonable. Reparation awarded. Usher Bros. v. M. & O., 120 I. C. C. 159.

(l) Complainant alleged that the rules and regulations governing the diversion and reconsignment at Sioux City and other Missouri River markets of livestock originating north and west of Sioux City and billed to said markets or to markets beyond are discriminatory against livestock traffic and the Missouri River markets in that they prohibit the reconsignment therefrom, at the through rates applicable from the points of origin, of shipments billed to points beyond on which a change in ownership occurs at the Missouri River markets, and of shipments consigned to such markets after delivery thereat whether there is a change in ownership or not, in violation of sections 1, 2, 3, and 13 of the act. What complainant here seeks seems to be more in the nature of a transit or marketing, rather than a reconsignment, arrangement. The origin territory is in Nebraska and South Dakota on the C., M. & St. P., C., B. & Q., and C. & N. W. None of the defendants maintains arrangements similar to those sought. Under the present rules, if the purchaser wishes to try two markets, he can obtain the benefit of the through rate by billing his shipment to the more distant market and stopping it at the intermediate market. This does not seem to be an unreasonable requirement. The commission has frequently found that it is not unreasonable to apply the combination of locals on a shipment which has been placed for unloading at the original destination and is subsequently reforwarded to a different destination. This is doubly true where the shipment has been unloaded by the shipper and is subsequently reforwarded by him or another to a different destination. There appears on this record no warrant for according to livestock any different treatment in this respect from that accorded to other commodities. The commission has never found that a change in ownership alone would justify application of the combination of locals instead of the through rate. Defendants herein now publish a similar rule in their general reconsignment tariffs, and livestock is not excepted from its application. The commission sees no reason in granting the privilege of a change in ownership under the reconsignment rules and withholding it under the transit arrangements attacked. The Milwaukee and Northwestern apply the same rules at Omaha and Sioux City on all livestock

whether originating on their lines or elsewhere. They can not be found guilty of undue prejudice. The record does not show whether the Burlington accords different treatment to livestock from the southwest stopped to test markets competitive with Sioux City or Omaha from that which it accords at Sioux City and Omaha to livestock from the origin territory here considered. It does show that this defendant accords more advantageous treatment to livestock originating at points on its line west of Sioux City when stopped in transit at Omaha than when stopped in transit at Sioux City. HELD, the rules and regulations attacked applicable on shipments of livestock originating north and west of Sioux City, under which the published rate to and from Sioux City or Omaha, as the case may be, are applicable (a) on livestock billed to Sioux City or Omaha, there unloaded, and subsequently reforwarded to a destination beyond either by the original shipper or by a different owner, and (b) on livestock billed to a point beyond, unloaded at Sioux City or Omaha, there sold, and reforwarded to a destination beyond, are not unreasonable or unduly prejudicial, except (1) that in providing for the collection of a reconsignment charge in addition to the rates to and from Sioux City or Omaha, as the case may be, and in prohibiting the application of the through rate because of change in ownership, they are unreasonable, and (2) that the maintenance by the Burlington of transit arrangements as hereinbefore described at Omaha, while contemporaneously denying like transit arrangements at Sioux City, subjects Sioux City to undue prejudice and unduly prefers Omaha. Sioux City Livestock Exchange v. C. & N. W. Ry., 122 I. C. C. 177.

(m) Complainant alleged that the charges on one tank car of refined petroleum oil, shipped Jan. 8, 1924 from Wichita Falls, Tex., to Westwego, La., were unreasonable to extent they exceeded 24.5 c, plus a reconsignment charge of $6.30. Shipment was orginally consigned to Houston, Tex., and placed on a private track there for inspection and delivery. It was refused and immediately reconsigned to Westwego. It moved over the MKT to Houston, thence over GCL and T & P. In Chestnutt Lumber Co. v. Director General, 89 I. C. C. 236, the Commission found that the assessment, in addition to the rates to and from the point of reshipment, of the reconsignment charge was unreasonable. The rate of 24.5c did not apply in connection with the GCL, over which complainant specifically routed the shipment. The transportation conditions over the various routes are not shown to be similar to those over the route traversed, and the volume of movement or the conditions under which the rate was established from such other points have not been shown. HELD, applicable rates unreasonable to extent they included a reconsignment charge of $6.30 per car, undercharge waived, complaint dismissed. Miller Petroleum Co. v. B. S. L. & W. Ry., 126 I. C. C. 21.

(n) Complainant alleged assessment of reconsignment charges of $18.90 per car on two cars of scrap iron shipped Aug. 30 and Sept. 3, 1924 from Jersey City, N. J., to Syracuse, N. Y., thence reconsigned to Wilkes-Barre, Pa., as unreasonable. Both shipments were consigned to complainants at Syracuse and were routed D. L. & W. delivery. First car moved Jersey Central and D. L. & W. arriving at Syracuse Sept. 3, 1924. Notice of arrival was sent by defendant at 9 a. m. that day, and the car placed on a hold track awaiting delivery instructions. Subsequent to 7 a. m. on Sept. 5 complainants ordered delivery to the Halcomb Steel Co., and on Sept. 6 the car was placed on the private sidetrack of that company. On Sept. 9, the steel company rejected the shipment, whereupon the car was again placed on the hold track awaiting further disposition orders. On Sept. 12 complainants ordered it forwarded to themselves at Wilkes-Barre and furnished a new bill of lading to cover the movement. The car was forwarded Sept. 13 and charges based on local rate from Jersey City to Syracuse, local rate Syracuse to Wilkes-Barre, two reconsignment charges of $6.30 each accruing at Syracuse and demurrage charges at Wilkes-Barre. Second car arrived at Syracuse Sept. 7, and pursuant to reconsignment order received before its arrival, was placed on the private track of the steel Company, Sept. 8. On Sept. 11, the steel company also rejected the car whereupon complainants, on Sept. 12, ordered it reforwarded to themselves at Wilkes-Barre and furnished a new bill of lading to cover the movement. One reconsignment charge of $6.30 was assessed on this car. HELD, $6.30 for first reconsignment on first car not unreasonable but charges attacked covering reconsignment of the shipments from Syracuse were unreason-

able, reparation awarded. Cohen & Son v. D., L. & W. R. R., 128 I. C. C. 727.

(o) Shipments of scrap iron from Jersey City, N. J., to Syracuse, N. Y., placed for unloading, but refused by consignee, were subsequently reconsigned to Wilkes-Barre, Pa. Reconsignment charges were collected at final destination under tariff rules which provided (1) that if car has been placed for unloading at original destination and is reforwarded without being unloaded to a point outside the switching limits, or (2) where delivery is accepted and a new bill of lading issued on basis of local rates to and from reforwarding point, charges to that point are collected at final destination, it will be subject to publishtd raetes to and consignment charge. HELD, In 89 I. C. from points of reconsignment plus re-C. 236; 113 I. C. C. 617, reconsignment charges collected under a rule similar in charges, were found unreasonable. Repall respects, except as to advancement of awarded. Cohen & Son v. D., L. & W., 128 I. C. C. 727.

(p) Contention of carrier that in view of the additional bookkeeping and clerical work incident to the advancement of freight charges and the assumption of risk of being unable to collect charges at final destination, assessment of reconsignment charges in addition to local rates on reconsignment shipments can not be said to be unreasonable, not sustained. Cohen & Son v. D., L. & W., 128 I. C. C. 727, 729.

(q) The record shows no service in addition to that performed under the separate line haul rate which would justify a charge for reconsignment any more than it would if the car had been actually or constructively delivered. Cohen & Son v. D., L. & W. R. R., 128 I. C. C. 727, 730.

§ 3½. Duty of Carrier to Afford.

(a) Complainant attacked charges on one car of yellow pine lumber shipped July 17, 1923, from Douglas, Ga., to Grafton, W. Va., and diverted to Norfolk, Va., as unreasonable and unlawful. Shipment originated at Purvis, Ga., on July 13, 1923, and was milled in transit at Douglas, both points being on the G. & F. There is no question as to transit charges. On July 17, 1923, the transited lumber was forwarded from Douglas, consigned to Grafton, routed G. & F. to Augusta, Southern, Potomac Yards, c/o B. & O. On the afternoon of July 23, 1923, the consignor instructed the agent of the G. & F. at Douglas to divert the car to Norfolk. This diversion order was unrestricted. The Southern did not comply with the tariff provision until July 31 or seven days after adequate instructions had been furnished to it. The record is sufficiently clear to warrant the conclusion that had the request for diversion been promptly transmitted by the Southern to the B. & O. at Potomac Yard, the shipment could have been diverted at that point to Norfolk. HELD: Reparation awarded due to failure of Southern to transmit promptly the diversion instructions to the B. & O., reparation awarded. Huber v. G. & F. Ry., 118 I. C. C. 282.

IV. TARIFFS AND PUBLICATION.

See Tariffs.

§4. Necessity of Publishing.

(a) Shipment of potatoes was delivered to initial carrier consigned to shipper's order, notify consignee at Niagara Falls, N. Y., and routed "Suspension Bridge and N. Y. C." Consignee tendered bill of lading to agent of the Erie at Buffalo with instructions to reconsign to Old Forge, Pa., where it was apparently placed for unloading, but refused by consignee and original consignor so advised. Thereupon, shipment was further reconsigned to Philadelphia, Pa., where it was apparently promptly placed on public delivery track. Combination rates, plus reconsignment charges at Suspension Bridge and Old Forge were collected. Upon contention that reconsignment charges were inapplicable, HELD: Governing tariff provided no charge for reconsignment where a shipment had been placed for unloading and reconsignment charge assessed at Old Forge was, therefore, inapplicable. Reparation awarded. Miller v. P. M. Ry., 115 I. C. C. 461, 463.

§4½. Embargoed Destination.

See Embargoes.

(a) Prior to arrival at original destination shipper requested diversion to embargoed point but was advised that request could not be accomplished without permit. Necessary permit was obtained and shipment was forwarded as requested but at a combination to and from reconsignment point. Tariff permitted reconsignment or diversion to embargoed points where shipments move

under permits, and also provided that where car is placed for unloading and is reforwarded without being unloaded, published rates to and from point of reconsignment will apply. Carriers assert that permit clause has reference to shipments moving from points of origin under permits and that since shipments here was not so made combination was properly applied. FOUND: Application of permit clause not being so restricted and in absence of showing that shipment was actually placed for unloading at reconsignment point, it was subject to application of a lower through rate. Reparation awarded for overcharges. Prairie Oil & Gas Co. v. M. V., 104 I. C. C. 252.

(b) Refusal of Director General, due to an embargo, to reconsign to Syracuse, N. Y., a carload of lumber shipped from Sweetwater, Ala., to Cincinnati, Ohio, necessitating ultimate reconsignment to Detroit, Mich., found to have resulted in collection of reconsignment, demurrage, and storage charges that were unreasonable and inapplicable. Shipment was tendered for transportation without complete routing instructions and while an embargo did exist over certain routes, others over which no embargo existed were open via which shipment could have moved from Cincinnati to Syracuse which would have been consistent with routing instructions given. Reparation awarded. Thames v. Director General, 112 I. C. C. 677.

(c) Complainant attacked rates charged on six cars of potatoes forwarded in December, 1922, and January, 1923, from Maine and New Brunswick, Can., to Providence, R. I., as unjust, unreasonable and unduly prejudicial. It was impossible to ship them to Providence because of an embargo. Complainant ordered them billed to Worcester, an interchange point of the B. & M. and New Haven, and pressed the carriers for the removal of the embargo, hoping in that way to get the shipments into Providence. Five of the shipments arrived in Worcester prior to the date the embargo was removed, were reconsigned to Providence after its removal and were assessed combinations over Worcester. HELD: Rate attacked not unreasonable or otherwise unlawful, complaint dismissed. Providence Fruit & Produce Exchange v. B. & M. R. R., 115 I. C. C. 135.

(d) Complainant alleged combination rates to and from New Haven, Conn., inapplicable on four cars of lumber, two of which were shipped from Denkman, La., one from D'Lo, Miss., and one from Hopkins, Ga., to New Haven, between Jan. 31 and Feb. 10, 1923, and thence forwarded as follows: one to Waltham, Mass., one to Lynn, Mass., one to Providence, R. I., and one to Bemis, Mass. All of the cars were routed via Harlem River-N. Y., N. H. & H., and were consigned to complainants at New Haven. At the time the shipments moved from points of origin, there was an embargo in effect by the New Haven against all freight from its connections at Harlem River and certain other points for all consignees at all points on or via its rails. There were exceptions to this embargo which permitted carloads of freight to move "for final delivery to consignees at stations Harlem River-to New Haven, inclusive from all connections at Harlem River." The New Havens reconsignment tariff provided that "orders for diversion or reconsignment will not be accepted under these rules at or to a station or to a point of delivery against which an embargo is in force. Shipments made under authorized permits are not subject to this condition." No permits were issued in this case. After arrival at New Haven cars were reconsigned, refused because of embargo, and new bills of lading tendered, charges being paid to New Haven, charges collected at combination on New Haven. The carrier had the right to refuse to reconsign to the embargoed points. HELD, charges assessed legally applicable, complaint dismissed. Philbrick Co. v. N. Y., N. H. & H. R. R., 123 I. C. C. 197.

(e) Complainant alleged rates charged on 14 cars of steel from Johnstown, Duquesne, and Beaver Falls, Pa., Canton and Youngstown, O., and Buffalo, N. Y., to Providence, R. I., and on one car of steel from Beaver Falls to Watuppa, Mass., between Feb. 5 and April 17, 1923 were inapplicable, unreasonable, unjustly discriminatory and unduly prejudicial. At the time these shipments moved the New Haven had embargoed carload and less carload freight, with certain exceptions not including steel unless moved under a permit, from all connections. The embargo notice provided that freight moved to the excepted points would not be subject to diversion, reconsignment or reshipment. Complainant was cognizant of this situation and had no permits covering these ship-

ments but, anticipating that it might later procure permits or by other means effect movement to final destinations, it billed to Worcester, Mass., over the B. & A., five cars intended for Providence, and to New Haven, Conn., eight cars intended for Providence and one car intended for Watuppa. It was able promptly to reship the cars from Worcester upon payment of the charges which had accrued up to that point. Local rates to and from Worcester and New Haven were charged. The joint rates from points of origin to Providence and Watuppa were in each instance the same as the rates charged to Worcester and New Haven. The reconsigning rule was rendered inoperative by the provisions of the embargo notice. HELD, rates attacked applicable and not unreasonable or otherwise unlawful, complaint dismissed. Congdon & Carpenter Co. v. N. Y., N. H. & H. R. R., 123 I. C. C. 721.

(f) Lumber consigned to New Haven, Conn., for reconsignment beyond was routed "via Harlem River, N. Y., N. H. & H.," Reconsignment was refused at New Haven because of embargo on shipments via Harlem River for all points on lines of New Haven. Complainants thereupon paid charges up to New Haven and tendered new bills of lading for movement beyond for which local rates were collected. Upon contention that accepting new bills of lading nullified the embargo and, in effect, waived its provisions, HELD: No permits having been issued for movement beyond New Haven carrier rightfully refused to reconsign to embargoed points. However, as local shipments from New Haven were not embargoed new bills of lading could be accepted upon payment of freight charges to New Haven. In no other way short of waiting until embargo was lifted could shipments have moved out of New Haven without unloading cars. Charges assessed were therefore applicable. Philbrick Co. v. N. Y., N. H. & H., 123 I. C. C. 197.

(g) Certain destinations were embargoed except as to shipments moving under permits, the embargo notice excepting shipments to various points for final delivery but specifically prohibiting reconsignment therefrom to points against which the embargo was placed. Shipments here were billed without permits to the unembargoed points and forwarded therefrom to the embargoed destinations as reshipments, local rates being charged. Upon contention that by permitting shipments to so move lower joint rates were made applicable and that acceptance of shipments at reshipping points constituted a waiver of the embargo, HELD: Only by use of the reconsigning rule could these movements become through traffic. Here the reconsigning rule was rendered inoperative by provisions of the embargo and charges assessed were therefore applicable. Congdon & Carpenter Co. v. N. Y., N. H. & H., 123 I. C. C. 721.

§5. Construction In General.

(a) Shipment from Spirit Lake, Iowa, to Bloomington, Ill., reconsigned to Black Rock (Buffalo), N. Y., was tendered unrouted. From Spirit Lake to Bloomington carrier forwarded shipment via La Salle, Ill., whereas a lower rate applied via Peoria. From Spirit Lake to Black Rock a through rate applied via Peoria. Upon contention that because shipment, Spirit Lake to Bloomington, was local, carrier could not be charged with knowledge that it would be reconsigned, and that reparation should only be awarded for difference between rate charged through La Salle and rate applicable through Peoria to Bloomington, HELD: Had carrier routed shipment through Peoria complainant would have been entitled to lower rates effective over that route, and fact that carrier could not forsee further transportation from Bloomington to Black Rock can not deprive complainant of all incidents of transportation and charge effective over route the shipment should have moved. Shipment found misrouted and reparation awarded. Bloomington Asso. of Commerce v. C., R. I. P., 109 I. C. C. 191.

(b) Shipment tendered Southern Ry. at Boonville, Ind., bill of lading specifying Big Four delivery, Elkhart, Ind. Upon arrival reconsignment to South Bend ordered, shipment moving thereto via N. Y. C. Reconsignment rules not providing for reconsignment at through rate via route of movement, combination to and from Elkhart was charged. Complainant instanced fact that Big Four is part of N. Y. C. system and referred to lower through rates from Boonville to South Bend over five different routes with Southern as initial and N. Y. C. as terminal lines; also to lower rates from Boonville to Elkhart and from Illinois points to South Bend and La Porte over various routes for comparable distances. FOUND: Since shipment moved from Boonville to

Elkhart over lowest available route carriers can not be held for misrouting because complainant was unable to effect reconsignment, of which carriers had no notice prior to order therefor, at through rate available over other routes. Nor does record show public need for establishment of another route from Boonville to Elkhart. Combination assessed found not unreasonable. Russell v. N. Y. C., 109 I. C. C. 193.

(c) Interstate rate and reconsignment charge collected for the intrastate movement, Tulsa to Okmulgee, Okla., of fabricated iron and steel tank material, k. d., originating at Parkersburg, W. Va., found legally assessed. Common carriers are under legal obligation to apply their lawful rates and charges, which places upon them duty of determining, in first instance, the essential character of the commerce. When it is considered that on day shipment arrived at Tulsa from interstate point of origin, and before placed for unloading, complainant surrendered original billing, which was unnecessary except to effect reconsignment, and directed movement to another point to which reconsignment was authorized, the presumption is strong that carriers properly considered character of the shipment to be interstate. Parkersburg Rig & Reel Co. v. St. L.-S. F., 109 I. C. C. 235.

(d) Shipments of tobacco moved from points in Virginia and North Carolina to Richmond, where delivery was accepted by consignee, who took charge thereof, paid incoming charges thereon, and without unloading, and without the carrier or its agent acting for it, arranged for further transportation to Norfolk, for export. Reconsignment charges in addition to rates to and from point of reshipment were assessed in accordance with applicable tariff rules. HELD: While there was no intention to move tobacco beyond Richmond until after its arrival at that point, the inbound and outbound hauls were wholly unrelated and movements beyond Richmond were reshipments. Following Chestnutt Lumber Co., 89 I. C. C. 236 and other cited cases, the assessment of reconsignment charges in connection with such shipments was unreasonable. Reparation awarded. Taylor Co. v. S. Ry. Co., 109 I. C. C. 431.

(e) During an acute car shortage the American Ry. Asso. issued an order requiring certain carriers, including defendant, to discontinue local loading of western-owned cars and to move such cars toward western junctions for delivery to owning lines. Defendant's agent construed this order as prohibiting either the eastbound movement of western-line equipment after arrival at original destination or its reconsignment or diversion in transit. Upon contention that defendant's refusal to permit reconsignment or diversion of western-owned cars when under load consigned to complainant resulted in assessment of unreasonable demurrage charges, HELD: A carrier may not arbitrarily set aside its tariff provisions without due notice in proper form. However, while defendant's agents misconstrued the order, complainant was unable to point out any car on which reconsignment was requested and refused and on which demurrage accrued. Assessment of demurrage charges found not unreasonable. Lexington Elevator & Mill Co. v. B. & O., 109 I. C. C. 542.

(f) Reconsignment charges in addition to rates to and from point of reconsignment, assessed on shipments of lumber, found unreasonable. In 89 I. C. C. 236 and 91 I. C. C. 615, similar findings were made. In case here involved there was no delivery, actual or constructive, prior to second movement, whereas in cited cases there was a delivery. However, in both cited and instant cases the line-haul charges collected were same as though there had been two separate and distinct shipments. The record shows no service in addition to that performed under the separate line-haul rates which would justify a charge for reconsignment any more than it would if cars had been actually or constructively delivered. Reparation awarded. Wilgus v. P. R. R., 113 I. C. C. 617.

(g) Peaches from Harriman, Tenn., a joint-agency station, were originally consigned to Potomac Yard, Va., and New York, bills of lading being made out on forms of either the Southern or the C., N. O. & T. P. Ry. Latter road, a part of the Southern system, does not reach Potomac Yard or form part of any direct route to that point, consequently, all shipments were forwarded via the Southern's direct route to Potomac Yard, thence reconsigned to Pittsburgh. A lower rate to Pittsburgh existed via a longer route through Cincinnati in connection with the C., N. O. & T. P., and shipper alleged misrouting upon theory that agent at Harriman should have so routed

shipments. HELD: Cars moved toward originally intended destinations over the direct route, which is over the Southern's eastern lines. Use of the C., N. O. & T. P. lading forms being merely accidental and reconsignment instructions not being given until after cars reached Potomac Yard, if shipper desired movement over longer route instructions to that effect should have been inserted in bills of lading. Gentile Bros. Co. v. S. Ry., 113 I. C. C. 670.

(h) Combination rates and demurrage charges assessed on shipments of lumber originally moving from Eutaw, Ala., to Louisville and Cincinnati, shipment to latter point being reconsigned to Latty, Ohio, and all subsequently reconsigned to Nicetown Station, Philadelphia, found inapplicable. Carriers contended that cars were accepted at Louisville and Latty only as new shipments subject to local rates to and from those points upon theory that shipments could not have been reconsigned because of a tariff rule which prohibited reconsignment to embargoed points. Such rule, however, placed a limitation only on reconsignments "to a station or point of delivery" against which an embargo has been placed and here no embargo was in effect against points above outlined, including Nicetown Station. Moreover, circumstances under which shipments were handled and reshipped did not change their essential character as through reconsigned shipments and lower joint rates were applicable thereon. See also 51 I. C. C. 174; 92 I. C. C. 469. Reparation awarded. Elledge v. Director General, 113 I. C. C. 704.

(i) Complainant attacked combination rate charged on two cars of wrought iron pipe shipped September 11 and 18, 1919, from Chester, Pa., to Billings, Okla., and diverted to Beggs, Okla., as unreasonable and inapplicable. Allegation of unreasonableness is barred. Shipments were routed over Pennsylvania to Philadelphia, Southern Steamship Co. to Houston, Tex., for C. R. I. & P. delivery at Billings. The shipments moved from Houston on October 27, 1919, over G. C. & S. F. to Ardmore, Okla., Rock Island to Billings. On October 1, 1919, prior to the movement of the shipments from Houston, complainant requested an agent at Okahoma City to divert the cars to Beggs, Okla., a local point on the Frisco. The diversion was not accomplished. Upon arrival at Billings the cars were reconsigned to Beggs and moved over the direct route via Enid, Okla., in connection with the Frisco. Charged 74c to Billings and 45c beyond. HELD: Rate attacked applicable, complaint dismissed. Tidal Osage Oil Co. v. Director General, 115 I. C. C. 237.

(j) Complainant alleged assessment of a reconsignment charged of $2.70 per car on shipments of various commodities at Monroe, Mich., and destined to its various plants within the switching limits there during the two years prior to the filing of the complaint was, and is, unjust, unreasonable and unlawful in violation of sections 1 and 6. Complainant's plants are in three groups, designated North Side, South Side and West Side. All are within the switching limits of Monroe and are served only by defendant. All traffic for Monroe on defendant's line is taken first to Warner yard, where the trains are broken up and the cars switched to the different deliveries. Warner yard is within the switching limits of Monroe 0.5 miles from North Side, 1.3 miles from South Side and 2.25 miles from West Side. Except to one or two consignees no deliveries are made at Warner yard, but defendant maintains a public team track at its freight station, about 0.5 miles south of that yard. Upon arrival of complainant's shipments at Warner yard the cars are placed on the storage tracks and a switching list is made up. This is telephoned to complainant's office usually within 35 minutes after the arrival of the train and within 30 minutes reply instructions are generally given. Prior to July, 1923, complainant had its shipments billed merely to the Consolidated Paper Co. at Monroe, but since that date it has had most of its cars consigned to the particular group of plants where it desired delivery to be made. Under this latter procedure the reconsignment charge is only made in case the billing fails to specify the group of plants at which delivery is desired and instructions are given after the arrival of the train at Warner yard, or where the delivery instructions are changed to show a different group after the arrival of the shipment at Warner yard. Complainant's contention that Warner yard is not a terminal yard within the meaning of the tariff can not be sustained, and, bearing in mind that the purpose of the reconsignment rule is to induce the original

billing of freight direct to the point of unloading, rule 11 must be considered as applicable in the circumstances here under review. HELD: Reconsignment charges attacked applicable and reasonable, complaint dismissed. Consolidated Paper Co. v. N. Y. C. R. R., 115 I. C. C. 579.

(k) Complainant alleged defendant's failure properly to divert a car of cucumbers, shipped June 6, 1923, from Allendale, S. C., to Pittsburgh, Pa., and diverted en route to New York was in violation of sections 1 and 15. Shipment was originally consigned to Pittsburgh, routed C. & W., C. C. C. & O., C. & O., B. & O., and Pa. R. R. 21st St. On June 7, about 5 P. M., complainant placed instructions with defendant's agent at Allendale for diversion of the shipment to New York, Pennsylvania delivery, Pier 29. The telegraph office at Allendale had closed for the day and the request was filed in the customary manner. Diversion orders are handled by defendant's general freight agent at Augusta, Ga. On the morning of June 8 the telegraph lines between Allendale and Augusta were busy handling messages concerning peach trains and other matters so that these instructions did not reach Augusta until 2 P. M. On the evening of June 7 the car had passed through Augusta and had been delivered at Spartanburg, S. C., to the C. C. & O. On June 8 it moved through St. Paul, Va., and was delivered at Elkhorn City, Ky., to the C. & O. On June 9 the latter carrier located and diverted the shipment and delivered it to Huntington, W. Va., to the B. & O. It arrived at New York for Pennsylvania delivery on June 14. No routing instructions, except specification of delivery, were given by the shipper when diversion was requested and defendant fulfilled its obligation of forwarding the shipment over the lowest rated route known to it. HELD: No violation of the act, complaint dismissed. Johnston v. C. & W. C. Ry., 118 I. C. C. 19.

(l) Complainant attacked the reconsignment charge assessed at St. Paul, Va., by the C. C. & O. on 12 cars of hay shipped during May and June, 1924, as inapplicable, unreasonable and unduly prejudicial. Shipments originated at points in Ohio and Indiana and were originally billed to St. Paul. After arrival at that point complainant requested that they be reconsigned to various Georgia and Florida destinations. Reconsignment charge $5.85. The higher charges resulted from complainant's failure to comply with the provisions of rule 9 with respect to placing the reconsignment orders and are not attributable to any neglect on the part of defendant. HELD: Reconsignment charge applicable and not unreasonable or otherwise unlawful, complaint dismissed. Toberman Mackey & Co. v. C. C. & O. Ry., 118 I. C. C. 565.

(m) Governing tariff provided for application of rates to and from point of reconsignment, plus reconsignment charges, if no through rate applied via point of reconsignment. Carrier's agent assessed local rates to and from reforwarding point on shipments of barley moving from points in South Dakota and Minnesota to Minneapolis, thence reforwarded to Milwaukee, apparently regarding the movement from Minneapolis as new shipments rather than reconsignments. HELD: In absence of documentary evidence that written notice of reconsignment was given by shipper and received by carrier's agent, the failure of carrier to assess a reconsignment charge was proper. Zimmerman v. Director General, 115 I. C. C. 407.

(n) Shipments intended for various plants within switching limits of Monroe, Mich., were upon arrival placed by delivering carrier in its Warner Yard, and later, upon instructions, switched to particular plants at which delivery was desired. Governing reconsignment tariff permitted a single change in designated place of delivery without charge if order therefor be received prior to arrival of car. Upon contention that designation of particular deliveries desired, after arrival, does not constitute reconsignment; that Warner Yard, not being a terminal yard because not possessing facilities for effecting delivery of traffic, can not be considered as a destination; and that shippers are therefore entitled to specify the particular sidetracks at which they desire cars to be spotted, HELD: Purpose of reconsignment rule is to induce billing direct to point of unloading, and since here the delivery orders were not furnished until after arrival of cars, reconsignment charges assessed were both applicable and reasonable. Consolidated Paper Co. v. N. Y. C., 115 I. C. C. 579.

(o) Following 101 I. C. C. 389, and other prior cases, assessment of a reconsignment charge in addition to rates to and from point of reshipment on ship-

ments placed for unloading and subsequently reconsigned, found unreasonable. Reparation awarded. Lynchburg Chamber of Commerce v. S. Ry., 115 I. C. C. 625.

(p) Failure of Southern Ry., in conformity with tariff provision in effect at time of shipment and after adequate instructions had been furnished it, to promptly transmit a diversion order to its connection, resulting in shipment moving through to originally billed destination from which it had to be forwarded, found to have resulted in damage to complainant measured by difference between charges collected and those which would have accrued at applicable rate from origin to ultimate destination via point at which diversion should have been affected, plus applicable charge for reconsignment. Reparation awarded. Huber v. G. & F., 118 I. C. C. 282.

(q) Reconsignment charges assessed on shipments of hay reconsigned from St. Paul, Va., to various Georgia and Florida destinations found applicable and not unreasonable or otherwise unlawful. Tariff under which charges were assessed provided lower charges where reconsignment was requested before arrival of shipment at billed destination but shipper failed to comply therewith, its reconsignment instructions being given after arrival. Moreover, conditions surrounding assessment of lower charges are not shown and mere inference that they were similar to those surrounding shipments here involved is not sufficient to sustain a finding of undue prejudice or discrimination. Toberman, Mackey & Co. v. C., C. & O., 118 I. C. C. 565.

(r) Upon arrival of shipment of lumber at Detroit, Mich., reconsigned from Marine, Ill., delivery was requested to the Greeley Coal & Lbr. Co., but no room being available on tracks of that company, shipment was constructively placed and due notice thereof furnished. Later shipment was refused and in accordance with instructions was delivered to F. M. Pauli Co., who accepted it and paid all charges thereon. Upon contention that reconsignment charge made for attempted movement to the Greeley Company was without tariff authority, HELD: Such charge was applicable under governing reconsignment tariff which provided for its assessment where, as here, a single change is made in name of consignee subsequent to 24 hours after arrival of car at destination. Milne Lbr. Co. v. M. C., 118 I. C. C. 580.

(s) Reconsignment charges collected on a shipment of coal originally billed from Vanwood, W. Va., to Elkhart, Ind., reconsigned to New Paris, Ind., found inapplicable. Governing tariff specifically provided for assessment of a lower charge where, as here, reconsignment instructions are placed prior to arrival of shipments. Refund of overcharges directed. Russell v. C., C., C. & St. L., 120 I. C. C. 243.

(t) Assessment of reconsignment charge in addition to local rates on potatoes from Oldham, S. Dak., originally billed to Chicago and reforwarded after placement to various points, found unreasonable. See also 89 I. C. C. 236; 91 I. C. C. 615. Reparation awarded. Earl Bros. v. C., M. & St. P., 120 I. C. C. 299.

(u) Shipment of lumber from Charleston, S. C., to Boston, Mass., moved as routed by shipper. Certain routes were embargoed but not route of movement, and upon request for diversion of shipment to Armory, Mass., complainant was notified that same could not be effected on shipments moving under permits. Shipment moved through to Boston where demurrage accrued. HELD: As shipment moved via an unembargoed route over which no permit was necessary and delivering carrier at Boston was in possession of diversion instructions prior to arrival of car, a reconsignment charge less than that assessed was applicable, and demurrage assessed was illegal, due to erroneous detention at Boston. Reparation awarded. National-American Wholesale Lumber Assn. v. A. C. L. R. R., 120 I. C. C. 665.

(v) The responsibility for reconsignment rules rests solely with the carrier on whose lines they apply. Sioux City Live Stock Exchange v. C. & N. W., 122 I. C. C. 177, 186.

(w) Lumber from White Sulphur, W. Va., to Harrisburg, Pa., ordered reconsigned to Hershey, Pa., by letter addressed to agent of Norfolk & Western who referred it to agent of Western Maryland at Hagerstown Junction, Md., was held by latter carrier at Harrisburg beyond free time and demurrage and storage charges accrued. Upon contention that detention of car and handling of request amounted to negligence on part of Western Maryland, HELD:

Carrier's reconsigning tariff provided that request for reconsignment must be made or confirmed in writing to its general freight agent at Baltimore, and under doctrine laid down in 266 U. S. 92, tariff regulations could not be waived by acceptance of reconsignment order by its agent at Hagerstown Junction. As request was not made in accordance with tariff provisions no duty was placed upon carrier to reconsign shipment and storage and demurrage charges assessed were therefore applicable. Shreiner Lbr Co. v. Director General, 123 I. C. C. 551.

(wa) Charges collected on caterpillar tractors and parts from Stockton, Calif., to Dallas, Tex., based on rate from Stockton to Dallas, plus reconsignment charges at San Antonio and stop-over charge at Houston, where shipment was partially unloaded, found inapplicable. While governing tariff authorized reconsignment at San Antonio, it did not authorize stop-over at Houston, and movement therefrom must be treated as a reshipment. Refund of overcharges directed. Holt Co. of Texas v. S. P., 128 I. C. C. 555.

(x) Complainant alleged the charges collected for reconsignment of various cars of scrap iron shipped between April 1, 1924 and April 12, 1926 from New York, New Jersey and New Hampshire to Allentown, Pa., were unreasonable. Shipment from Harrison was originally consigned to Bethlehem, Pa., but was diverted in transit to Harrisburg, Pa. After placement on the consignees private track it was reconsigned to Steelton, Pa. It was there placed for delivery and refused by consignee thence reconsigned to complainant at Allentown. Charged sum of the local rates from Harrison to Harrisburg, Harrisburg to Steelton, and Steelton to Allentown, reconsignment charges at Allentown of $6.30 for the reforwarding from Harrisburg and $6.30 for the reforwarding from Steelton. Shipment from Trenton was originally consigned to Bethlehem there placed for delivery and refused by consignee, whereupon it was reconsigned to complainant at Allentown. Charged local rates to and beyond Bethlehem, plus demurrage and reconsignment charge of $6.30. Shipment from Binghamton, N. Y., and Trenton were originally consigned to Bethlehem, after placement on private tracks of consignee at that place the shipments were rejected and subsequently reconsigned to complainant at Allentown, charged sum of local rates to and beyond Bethelehem, reconsignment charge of $6.30 on each shipment. Complainants assail only the reconsignment charges. In Chestnutt Lumber Co. v. Director General 89 I. C. C. 236 the Commission found that the socalled reconsignment charge was inapplicable on shipments the lading of which was changed in whole or in part at the original destination. HELD, reconsignment charges inapplicable to shipments which were partly unloaded at original destination, and unreasonable as applied to shipments which moved to final destination with bulk unbroken, reparation awarded. Sofransey v. Reading Co., 129 I. C. C. 617.

§ 6. Retroactive Application.

See Facilities and Privileges §19.

(a) The commission has repeatedly found that a reconsignment arrangement can not be applied retroactively. Providence Fruit & Produce Exchange v. B. & M. R. R., 115 I. C. C. 135, 136.

(b) Combination rates charged on potatoes from points in Maine to Worcester, Mass., and reconsigned to Providence, R. I., found not unreasonable or otherwise unlawful. Applicable tariff at time of movement restricted through rates to perishable freight diverted before arrival at original billed destination, but carriers subsequently removed restriction by permitting reconsignment at through rate after arrival at Worcester. Complainant pointed out that nonperishable freight could be reconsigned at through rate after placement at Worcester; also that potatoes could be stored at Boston or Providence and subsequently forwarded at through rate to New York. These facts, however, are insufficient to warrant an award of reparation; moreover, reconsignment arrangements can not be applied retroactively. See 83 I. C. C. 388. Providence Fruit & Produce Exchange v. B. & M., 115 I. C. C. 135.

§6½. Rules and Regulations.

(a) Shipment of grapes from Portland, N. Y., originally consigned to and accepted by complainant at Memphis, Tenn., was subsequently reshipped to New Orleans on a separate bill of lading. Upon contention that shipment was entitled to reconsignment privilege at Memphis and that lower joint rate con-

temporaneously in effect from Portland to New Orleans was applicable, HELD: Original billing called for delivery at Memphis and there being no intention to reconsign the car prior to its arrival at that point, subsequent movement to New Orleans constituted a new contract of carriage. The car was therefore reshipped from Memphis and not reconsigned and combination rate to and from Memphis assessed was applicable. Canale & Co. v. Director General, 115 I. C. C. 415.

(b) Charges collected under reconsignment rule on tank-car load of petroleum from Wichita Falls, Tex., to Houston, Tex., placed on private sidetrack at that point for inspection and delivery, but refused and thence reconsigned to Westwego, La., FOUND unreasonable. Rule provided that cars placed for unloading at original billed destination and reforwarded without being unloaded were subject to published rates and from point of reconsignment plus recosignment charge. However, in 89 I. C. C. 236, charges assessed under a similar rule were found unreasonable, and in 89 I. C. C. 241, charges assessed on petroleum in tank cars under substantially similar circumstances as here involved were found unreasonable and a rule prescribed which provided for assessment of charges at the through rate from origin to second billed destination, plus usual reforwarding or reconsignment charge, which rule was established by carriers here subsequent to movement under consideration. Miller Petroleum Co. v. B., S. L. & W., 126 I. C. C. 21.

§6½a. Road Haul Rates Applicable.

See Tariffs §18.

(a) Rate assessed on shipments of fuel oil moving from Tulsa, Okla., to St. Catharines, Ontario, reconsigned to Pittsburgh and again to Woodlawn, Pa., over a circuitous route, found illegal. Contemporaneously, a lower unrestricted rate applied via a more direct route and all carriers participating in movement were parties to tariff naming such lower rate. Reparation awarded. Kyoleum Co. v. Director General, 104 I. C. C. 1.

(b) Negligence on part of originating carrier who failed to accord diversion request prompt attention resulting in shipment going through to originally billed destination and necessitating reforwarding therefrom at combination rate higher than a joint rate contemporaneously in effect between origin and final destination, found to have resulted in collection of unreasonable charges. Had such carrier fulfilled its obligation car could have been intercepted in ample time to protect joint rate. Reparation awarded. Newsome Feed & Grain Co. v. C., C., C. & St. L., 104 I. C. C. 269.

(c) Rates assessed on shipments of saw logs from Tobin's Siding and Ramsay, Mich., to Sheboygan, Wis., thence reconsigned to Wausau, Wis., found inapplicable and unreasonable to extent that factor from points of origin to reconsignment point exceeded lower contemporaneous rate on "Saw Logs and Bolts for Manufacture—Products to be reshipped," logs having been manufactured at Wausau and products reshipped. By virtue of reconsigning tariff, haul from Sheboygan to Wausau became part of a through movement, and it follows logically that all conditions attaching to factor from Sheboygan to Wausau attached likewise to rate for through movement. Reparation awarded. Oelhafen-Mondeau Co. v. C. & N. W., 104 I. C. C. 295.

(d) Shipments of coal were originally billed from Clinton to South Bend, Ind. Upon request of shipper as to their whereabouts and upon information from carrier that they were at Kankakee, Ill., diversion to Chicago was ordered. Carrier's information, however, was erroneous, the shipments having moved through to original destination, from which they were back-hauled to Momence and diverted. Charges assessed, based on the rate from Clinton to Chicago, plus out-of-line charges for the haul Momence to South Bend and return, found not unreasonable, it being shown that such charges were less than those which would have accrued had diversion not been effected, and the shipments moved as originally intended from Clinton to South Bend. Eagle Coal & Mining Co. v. C. & E. I. Ry., 107 I. C. C. 607.

(e) After shipment had received one reconsignment, complainant directed further reconsignment but was advised by carrier that same could not be effected at through rate. Thereafter, complainant in prolonged correspondence insisted upon reconsignment at through rate and in one letter directed that shipment be not held pending reply. Carrier, however, continued to request disposition orders and finally upon directions from complainant desired delivery was effected. Governing tariff permitted only one

change in destination and provided that any subsequent change necessitating movement would be treated as a reshipment. FOUND: Combination to and from second reconsignment point was legally applicable but demurrage and track-storage charges assessed on and after date of receipt by carrier of the letter directing that delivery be not withheld were illegal. Reparation awarded. Milne Lbr. Co. v. C. & N. W., 107 I. C. C. 653.

(f) Interstate rate and reconsignment charge collected for the intrastate movement, Tulsa to Okmulgee, Okla., of fabricated iron and steel tank material k. d., originating at Parkersburg, W. Va., found legally assessed. Common carriers are under legal obligation to apply their lawful rates and charges, which places upon them duty of determining, in first instance, the essential character of the commerce. When it is considered that on day shipment arrived at Tulsa from interstate point of origin, and before placed for unloading, complainant surrendered original billing, which was unnecessary except to effect reconsignment, and directed movement to another point to which reconsignment was authorized, the presumption is strong that carriers properly considered character of the shipment to be interstate. Parkersburg Rig & Reel Co. v. St. L. S. F., 109 I. C. C. 235.

(g) Shipments of tobacco moved from points in Virginia to Richmond, where delivery was accepted by consignee, who took charge thereof, paid incoming charges thereon, and without unloading, and without carrier or its agents acting for it, arranged for further transportation to Norfolk, for export. Reconsignment charges in addition to rates to and from point of reshipment were assessed in accordance with applicable tariff rules. HELD: Movements to Richmond are not within commission's Jurisdiction because intrastate in character. See 204 U. S. 403. On other hand, reconsignment charges assessed because of movement beyond that point and incidental to it, are so subject. Taylor Co. v. S. Ry. Co., 109 I. C. C. 431, 433.

(h) Complainant attacked combination rate charged on one car of fresh tomatoes shipped on May 9, 1922 from Palmetto, Fla., to Norfolk, Va., and there reconsigned to New York, as unjust, unreasonable and illegal in violation of sections 1 and 6. It was originally consigned to Norfolk and moved S. A. L., to Portsmouth, Va., where it was delivered to the Belt line which switched it to the N. & W. The latter placed it for unloading in Norfolk. It was rejected by the consignee and the consignor then directed the Seaboard to reconsign it to New York but specified no routing. The N. & W., under instructions from the Seaboard, delivered the car to the Belt Line, which switched it to the Pennsylvania. The governing tariff provided for the application of rates to and beyond the reconsignment point when the rate from original to final destination did not apply through the reconsignment point. Apparently it was intended to assess charges at the combination on Norfolk, composed of 62 and 29 c., to and beyond that point, but it is not clear from the record whether they were so assessed. It was clearly the duty of the Seaboard to forward the car through Richmond if a cheaper rate applied over that route. It is not shown, however, that a cheaper combination could be made over that route, and under a reasonable construction of rule 6 the joint rate was likewise inapplicable. That rule undoubtedly contemplated the back hauling of shipments on the part of the Seaboard only when necessary to meet the through rates applicable over other lines through the reconsigning point. There was no such competitive route through Norfolk. Nor is there any evidence that it was an unreasonable rule. HELD: Shipment not misrouted and combination of 91 c. based on Norfolk applicable and not unreasonable, complaint dismissed. Olivitt Bros. v. N. & P. B. L. R. R., 113 I. C. C. 262.

(i) Complainant attacked charges collected on two cars of lumber shipped in Sept. 1923, from Grayburg, Tex., to St. Louis, Mo., and reconsigned from East St. Louis, Ill., as unreasonable and in excess of those applicable. Shipments moved from Grayburg on Sept. 21 and 24, 1923, consigned to complainant at East St. Louis. They were routed by the consignor over T. & N. O., and Frisco. While enroute these instructions were changed by the initial carrier to show C. & E. I. as the delivering carrier at East St. Louis. The shipments arrived at St. Louis over the Frisco and notice of the arrival of one of the cars and apparently also of the other was mailed to complainant at St. Louis by the latter carrier on Oct. 1, 1923. This notice was returned to the Frisco with the notation "car billed to East St. Louis; deliver accord-

ingly; this is not accepted as notice." The Frisco thereupon turned over the cars to the Terminal for delivery to the C. & E. I. at East St. Louis to which latter carrier they were delivered accordingly and placed by it in its hold yards in the East St. Louis switching district. On Oct. 4 and 5, 1923, the C. & E. I. advised complainant that the cars were being held at the yards referred to and asked for disposition orders. The Frisco does not reach East St. Louis and the rate of 29.5 c. did not apply there over the Frisco to St. Louis and Terminal beyond, the line over whose rails it does livery, but applied only on shipments delivered by the latter to certain other carriers at that place, including the C. & E. I. Shipments not misrouted, but they were overcharged to extent the charges collected for switching from St. Louis to the C. & E. I. at East St. Louis. HELD: Transportation charges not unreasonable but illegal to extent that those to East St. Louis exceed charges based on 29.5 c., reparation awarded, complaint dismissed. Milne Lumber Co. v. S. L. S. F. Ry., 113 I. C. C. 369.

(j) Shipment arrived at New London, Conn., and reconsignment to Boston ordered. On following day complainant by telegraph requested "Boston & Maine auction delivery" but shipment having gone forward, arrived at Boston and was placed on tracks of the New Haven where no delivery was made or attempted. Subsequently it was shipped to auction tracks. Upon contention that interstate character of shipment terminated when it was placed on the New Haven's tracks. FOUND: Since character of the shipment was interstate from time it left Peshastin, Wash., the point of origin, intrastate switching charge collected for the movement from the New Haven's tracks to the auction track was inapplicable. Applicable interstate tariff provided a lower charge and for its absorption by the New Haven. Reparation awarded. Gwin, White & Price v. N. Y., N. H. & H., 112 I. C. C. 707.

(k) Shipments of tomatoes from Palmetto, Fla., to Norfolk, Va., reconsigned to New York without routing instructions. Governing tariff provided for combination rates where no joint rates applied through reconsigning point. Joint rate applied from Palmetto to New York via Richmond, Va., but use of this route entailed a back haul. Upon contention that shipment was misrouted and that applicable rate was joint rate in effect via Richmond. HELD: While it was carrier's duty to forward car through Richmond if a cheaper rate applied over that route, it is not shown that a cheaper combination could have been made. Joint rate was inapplicable, inasmuch as reconsignment rule of governing tariff contemplated back hauling of shipments only when necessary to meet through rates of other carriers, and there was no such competitive route through Norfolk. Shipment therefore was not misrouted and combination based on Norfolk was applicable. Olivitt Bros. v. P. B. L. R. R., 113 I. C. C. 262.

(l) Combination rate charged on lumber moving from Philadelphia, Pa., to Erie station in Paterson, N. J., there refused by consignee and reconsigned to Broadway station on the New York, Susquehanna & Western R. R., in the same city, based on rates to and from reconsignment point, found not unreasonable. While a lower through rate applied from Philadelphia to these two stations in connection with the Erie and the New York, Susquehanna & Western, separately, under complete routes, such lower rate was not applicable over the Erie as an intermediate carrier through Erie station to Broadway station. Complainant here seeks two possible deliveries at Paterson under a single rate and to direct carrier to publish such through rate over that route would be to compel the Susquehanna to short haul itself. Wilgus v. P. R. R., 113 I. C. C. 617.

(m) Combination rates and demurrage charges assessed on shipments of lumber originally moving from Eutaw, Ala., to Louisville and Cincinnati, shipment to latter point being reconsigned to Latty, Ohio, and all subsequently reconsigned to Nicetown Station, Philadelphia, found inapplicable. Carriers contended that cars were accepted at Louisville and Latty only as new shipments subject to local rates to and from those points upon theory that shipments could not have been reconsigned because of a tariff rule which prohibited reconsignment to embargoed points. Such rule, however, placed a limitation only on reconsignments "to a station or point of delivery" against which an embargo has been placed and here no embargo was in effect against points above outlined, including Nicetown Station. Moreover, circumstances under which shipments were handled and reshipped did not change

their essential character as through reconsigned shipments and the lower joint rates were applicable thereon. See also 51 I. C. C. 174; 92 I. C. C. 469. Reparation awarded. Elledge v. Director General, 113 I. C. C. 704.

(n) Complainant attacked charges on two cars of yellow pine lumber from Eutaw, Ala., reconsigned to Nicetown station, Philadelphia, Pa., as unreasonable and illegal. First shipment left Eutaw March 11, 1918, and moved in C. & E. I. car 60110. The second moved April 15, 1918, in Southern 28035. Car 60110 was consigned to complainant at Louisville, Ky., and arrived there on March 18, 1918. On March 12 he instructed the agent of the Southern at Louisville to notify C. F. Felin & Co., consignee at Philadelphia, of its arrival and to accept disposition from that firm. This was done and on March 20 the consignee wired the Southern at Louisville to reconsign the car to it at Nicetown station, Philadelphia, P. & R., delivery. It was informed that the car could not be reconsigned as the joint rate would not apply because of existing embargoes. It therefore wired the agent at Louisville on April 2 that the car could be forwarded on basis of the Louisville combination. This was done on April 3. Car 28035 was consigned to Cincinnati, O., and arrived there on April 20, 1918. On April 24 complainant wired the C. N. O. & T. P. at that point to reconsign the car to Latty, O. The car was reconsigned and on April 30 the consignee was notified of its arrival at Latty on that date. On May 4 complainant wired the C. N., at Latty to reconsign the car to consignee at Nicetown station, Philadelphia, P. & R. delivery. A joint rate of 27c was in effect from Eutaw to Philadelphia applicable over the routes of movement on the dates shipments left Eutaw. The applicable reconsignment tariffs provided for reconsignment at Louisville and Latty at the joint rate from point of origin to final destination, with a reconsigning charge of $5 per car if the order for reconsignment was given after arrival of a shipment at destination and before being placed for delivery. The rule places a limitation only on reconsignment to a station or point of delivery against which an embargo has been placed. No embargo existed against Nicetown station, Philadelphia, as a point of delivery on the dates the shipments originated. The circumstances under which the shipments were handled at and reshipped from Louisville and Latty did not change their essential character as through shipments reconsigned at those points and the joint rate of 27c was applicable. HELD: Charges inapplicable to extent they exceeded 27c, plus demurrage charge of $3 and reconsignment charge of $5 on car 60110 and demurrage charges of $15 and reconsignment charges of $10 on car 28035, reparation awarded. Elledge v. Director General, 113 I. C. C. 704.

(o) Complainant attacked rate and reconsignment charge assessed on a car of scrap iron, reforwarded February 25, 1924, from Burnham, Pa., to Cumberland, Md., as unjust and unreasonable and in violation of the fourth section. Shipment was originally consigned by complainants from Buttonwood to Burnham. It was refused by the original consignee whereupon complainants reforwarded it to Cumberland. A reconsignment charge of $6.30 and sixth class rate of $5.10 beyond Burnham was collected. Rate sought $2.52. The fourth section is supported by a showing that the $5.10 rate exceeded the combination of $3.91 composed of $2.52 from Burnham to State Line, Pa., plus $1.39 beyond. HELD: Rate applicable and subsequently established unreasonable to extent it exceeded $2.52 and assessment of a reconsignment charge unreasonable, reparation awarded. Cohen & Son v. P. R. R., 115 I. C. C. 307.

(p) Complainant attacked failure of defendants to comply with diversion instructions compelled it to pay unreasonable and/or unlawful rates on a car of yellow pine lumber shipped August 31, 1922, from Camden, Ala., to Pottsville, Pa., and ordered diverted to Tamaqua, Pa. Shipment was made to complainant to itself at Pottsville without routing instructions and moved L. & N. to Montgomery, Ala., W. Ry. of A. and A. & W. P. to Atlanta, Ga., Ga. R. R. to Augusta, Ga., A. C. L. to Richmond, Va., R. F. & P. to Potomac Yard, Va., Pennsylvania to Harrisburg, Pa., and P. & P. beyond. The contention is that the failure of the Pennsylvania to effect diversion while the shipment was in its possession or to transmit the order to the Reading in time for that carrier to have diverted the shipment prior to its arrival at Pottsville. The Pennsylvania admits liability for the demurrage at Pottsville, but denies all other liability on the ground that

it made every reasonable and logical effort to comply with complainant's order. HELD: Rates and charges collected not unreasonable and not unlawful to extent of demurrage charges for which Pennsylvania is liable, reparation awarded. Stuckey Odom Lumber Co. v. L. & N. R. R., 115 I. C. C. 403.

(q) Following 113 I. C. C. 617, reconsignment charges assessed in addition to full local rates to and from point of reconsignment, on shipments of hoisting machinery and paint, from Cleveland, Ohio, to Long Island City, N. Y., for lighterage delivery, found unreasonable. Reparation awarded. Brown Hoisting Machinery Co. v. P. R. R., 115 I. C. C. 218.

(r) Complainant alleged that charges on one car of pine lumber, shipped Nov. 15, 1922 from Charleston, S. C., to Boston, Mass., and reconsigned to Armory, Mass., were and are unreasonable. Shipment was tendered to A. C. L., consigned to complainant at Boston, the bill of lading specifying routing A. C. L., N. Y., N. H. & H. R. R., D. E. L. Y. It moved over A. C. L. to Pinners Point, Va., Pennsylvania to Jersey City, car float to Sixtieth St., New York, N. Y. C., to Chatham, N. Y., B. & A., to Boston, where it was turned over to the New Haven for delivery to the consignee on or about Dec. 3. The shipment remained at Boston until on or about Dec. 13, when it was reforwarded to Armory over the New Haven on a new bill of lading consigning it to complainants for delivery to the Hampden Lumber Co. Charged 77 cents made up of 60.5 cents to Boston and 16.5 cents beyond. There was nothing in the tariff naming the joint rate of 42 cents from point of origin to final destination that would have precluded complainants from routing the shipment through Boston if it had been billed to the final destination in the first instance. HELD, shipment overcharged to extent it exceeded 42 cents plus reconsignment charge of $2.70, reparation awarded. National American Wholesale Lumber Asso. v. A. C. L. R. R., 120 I. C. C. 665.

(s) Shipments originally routed by complainant were delayed en route because of congestion. Service Order No. 22 of commission provided for disregard by carriers of shipper's routing instructions and forwarding of shipments over routes which would expedite movement and prevent congestion, the rate designated by shipper in billing to be protected unless lower rate applied via route of movement. Complainant requested diversion under that order, shipments so moved, and rate over route of movement was assessed. HELD: Situation here is similar to a case where shipper's routing instructions and rate are inconsistent, under circumstances of which carrier's duty is to inquire as to which instruction shall govern. See Conf. Ruling 474 (c). Carrier here accepted diversion request subject to service order and it was incumbent upon it to have notified complainant if its intention was not to protect the rate specified in original billing. Having failed therein the applicable rate was that in effect over route named in billing. Reparation awarded. Selden-Breck Const. Co. v. C., M. & St. P., 120 I. C. C. 134.

(t) Combination rate was assessed on cotton linters moving from Cooper, Tex., to Pittsburgh, Pa., and reconsigned to Newburgh, N. Y. Contemporaneously a lower combination rate via Marion, Ind., was in effect. Upon contention of carriers that as factor to Pittsburgh was a joint rate, under Conference Ruling 220 (g), they could not lawfully protect any lower combination of locals, HELD: Had final destination been Pittsburgh, this contention would be sound, but under reconsignment theory this was a through shipment from Cooper to Newburgh, and since applicable tariff did not require application of the joint rate to reconsignment point plus the rate beyond, and there was no joint rate in effect from Cooper to Newburgh, the lowest combination which made on Marion, was applicable. Reparation awarded. Fraser v. B. & O., 120 I. C. C. 675.

(u) Collection of reconsignment charges in addition to rates to and from Sioux City, Iowa, or Omaha, Nebr., on livestock originating north and west of Sioux City, stopped in transit to try the market, and subsequently reforwarded to destinations beyond, either by original shipper or by a different owner, found unreasonable. A change in ownership alone does not justify application of combination of locals instead of through rate. In 89 I. C. C. 236, and other cases the commission found that assessment in addition to the rates to and from original destination of any reconsignment charge was unreasonable. Moreover, reconsignment rules for general application providing for a change in name of consignor were approved in the Reconsignment Case, 47 I. C. C. 590, and there is no rea-

son for granting the privilege of a change in ownership under the reconsignment rules and withholding it under the transit arrangements. Sioux City Live Stock Exchange v. C. & N. W., 122 I. C. C. 177.

(v) Complainant alleged that charges on one car of grapes shipped August 31, 1923 from Reedley, Calif., to Croxton, N. J., thence reconsigned to Scranton Pa., were unreasonable and illegal, and in violation of section four. Shipment moved Santa Fe, Wabash, T. St. L. & W. and Erie to Croxton, whence it was reconsigned to Scranton. Delivery was made at Scranton on or after Sept. 22 1925 and charges collected on commodity rate of $1.73 to Croxton and second class rate of 56.5c from Croxton to Scranton plus reconsigning charge of $6.30 per car. The eastbound movement via the Erie was over that carriers main line through Susquehanna and Lackawaxen, Pa. The movement from Croxton was over Erie via Lackawaxen to Johnson Jct, Pa. thence D. & H. to Scranton. The $1.73 rate was applicable to both Scranton and Croxton. This rate was unrestricted as to routing and was applicable from Reedley to Scranton via Susquehanna and Carbondale, Pa., or via Lackawaxen and Johnson Jct. The distance from Susquehanna to Croxton over route movement is 189 miles, and from Croxton to Lackawaxen and Scranton the distances are 107 and 159 miles, respectively. At the time of the movement the Erie governing reconsignments and diversions at Croxton provided that, to points on the direct route covered by through rates from point of shipment to ultimate destination, reconsignment would be made at the through rate plus $6.30 per car, but that if such reconsignment entailed either a detour or back haul over lines comprising the Erie system, a stated charge would be made for the additional mileage in addition to the reconsignment charge of $6.30 per car. 292 miles, which is the additional haul resulting from the reconsignment, should be used in computing the charge for additional mileage under the detour or back haul provisions of the tariff HELD, 56.5c charged for that portion of the haul from Croxton to Scranton inapplicable; through rate from Reedley to Scranton of $1.73 plus $6.30 reconsignment, and 9.5c per 100 pounds for additional detour mileage was applicable, reparation awarded. California Table Fruit Co. v. A. T. & S. F. Ry., 126 I. C. C. 700.

(w) Shipment of hay from Manhattan, Kans., to Birmingham, Ala., was upon refusal at that point reconsigned to Jasper, Ala., a point intermediate to Birmingham. Combination rate to Birmingham plus local rate back to Jasper was assessed. Contemporaneously a lower combination rate unrestricted as to routing applied via Memphis to Jasper. HELD: Contention that Memphis rate was applicable through Jasper to Birmingham and back to Jasper is founded upon an unreasonable construction of the tariff. Manifestly a rate from one point to another does not contemplate movement beyond destination and back again. Combination rate based on Birmingham was, therefore applicable. Arnold & Co. v. S. Ry., 126 I. C. C. 141.

(x) Charges on grapes from Reedley, Calif., to Croxton, N. J., reconsigned to Scranton, Pa., assessed on basis of through rate to Croxton plus second-class rate to Scranton, FOUND inapplicable. The through rate applied both to Scranton and Croxton and governing tariff provided that to points on direct route reconsignment would be made at through rate plus reconsignment charge except on shipments involving a back haul, in which event charges would be computed on a mileage basis, plus reconsignment charge, for back hauls not exceeding 300 miles. Here, movement involved a backhaul exceeding 300 miles and class rate was assessed. However, as the through rate was unrestricted as to routing and shipments could have moved via a route involving a back haul less than 300 miles, charges based on mileage over the shorter route should have been assessed. Reparation awarded. California Table Fruit Co. v. A., T. & S. F., 126 I. C. C. 700.

(y) Where shipper, on requesting diversion of shipment, did not specify route, but merely asked diversion and delivery on basis of through rate, it was entitled to have shipment moved by cheapest available route and at lowest rate that applied thereto. W. L. Shepherd Lumber Co. v. Atlantic Coast Line R. Co., (Ala., 1927) 112 So. 323.

(z) Shipment of oats from Porum, Okla., to Oakland, Calif., there stored and subsequently reconsigned to McCloud, Calif., found to have been improperly billed from the transit point and charges not collected in accordance with complainant's instructions, thereby

depriving him of a portion of inbound rate provided by tariff. Tariff rule provided that if dealer desired consignee to pay rate from transit point to destination refund of proportion of charges to transit point would be made. Carrier's agent at Oakland was instructed to collect charges from consignee at McCloud on basis of full local rate from Oakland to McCloud. Instead charges were collected on basis of division of the through rate from Porum to McCloud, which was contrary to instructions and served to defeat the rule. Reparation awarded. Albers Bros. Milling Co. v. A., T. & S. F., 128 I. C. C. 53.

(aa) On coal routed by shipper from Annabelle, W. Va., to Goshen, Ind., complainant was quoted a joint rate. Shipment was diverted en route to Benton Harbor, Mich., and since joint rate did not apply over that route, higher combination rate was assessed. Upon contention that as lower joint rate applies over other routes from points in the Annabelle group to group in which Benton Harbor is included, it should also apply over route of movement, HELD: Agent at point of origin was not advised that shipment was to be reconsigned, or as to final destination, and since it moved as routed, it was not misrouted. Moreover, earnings under rate charged do not indicate that it exceeded a maximum reasonable basis and failure to take advantage of lower rate over restricted routes does not establish unreasonableness of rate charged or necessity for additional routes. Sellers v. C., C., C. & St. L., 128 I. C. C. 263.

(bb) Lumber from Cottondale, Fla., to Gastonia, N. C., reconsigned to Union, S. C., was assessed combination rates. Contemporaneously lower joint through rates, unrestricted as to routing, permitted movement to Union through Gastonia. Upon contention that had shipment been originally consigned to Union it would have moved over a more direct route not involving the extra haul, and that through rates were not applicable under reconsigning rule providing that no reverse or extra haul would be performed at through rates, HELD: Contention is untenable. Tariff did not prohibit movement via Gastonia and fact that shipment traveled over this route because of a reconsigning order does not deprive shipper of benefit of joint rates. If it had been carriers' purpose to restrict application of joint rate they should have done so by clear and unequivocal language. See 100 I. C. C. 357. Moreover, rates assessed under a similar situation in 83 I. C. C. 512, were found inapplicable. Reparation awarded. Thames v. S. Ry., 128 I. C. C. 508.

(cc) Apples from Wenatchee, Wash., to New York, ordered diverted in transit to Philadelphia, moved to Jersey City, where diversion was effected. Joint commodity rate to Jersey City and local rate beyond was assessed. Complainant contended that joint rate applied from origin to final destination, but carriers insisted that under governing tariff the through rate could not be protected unless diversion was made at a point on direct line. FOUND: Tariff provision would not have prevented routing shipment through Jersey City if it had been originally consigned to Philadelphia and within meaning of tariff movement from Jersey City to Philadelphia is not out of route. Moreover, in 96 I. C. C. 229, on a shipment from Pacific coast billed to New York and reconsigned at Croxton, N. J., to Philadelphia, the through rate was held applicable. Had carriers here desired to restrict application of through rate they should have done so in clear and unequivocal language. See 47 I. C. C. 59, 61. Refund of overcharges directed. Northwestern Fruit Exchange v. G. N., 128 I. C. C. 538.

(dd) If it was the intention of defendants to restrict the application of the through rate to particular routes and the diversion and reconsignment privileges to particular points or routes, they should have so provided by clear and unequivocal language. Northwestern Fruit Exchange v. G. N. Ry., 128 I. C. C. 538, 540.

(ee) Complainant alleged rate charged on three cars of petroleum fuel oil, shipped May 1, 1923 from Grandfield, Okla., originally destined to Granite City, Ill., and diverted to East Chicago, Ind. was unreasonable. Shipments were tendered Rock Island at Grandfield, and routed by the shipper to Granite City over Rock Island to Oklahoma City, Okla., Frisco to St. Louis, Mo., and Terminal beyond. On May 3, complainant advised a representative of the Rock Island at Tulsa, Okla., that the shipments had been routed Rock Island, Terminal delivery at Granite City, and asked that they be diverted to East Chicago, Ind., over the Rock Island, Penn-

sylvania delivery. The Rock Island placed the diversion orders with its representatives at Hutchinson, Kas., and Kansas City, Mo., through which junctions the shipments would have moved, if they had been routed in accordance with the advice given in connection with complainants diversion instructions. The Rock Island subsequently ascertained that the shipments were delivered on May 5, 1923 to the Frisco at Oklahoma City. It then instructed the Frisco to divert the shipments to East Chicago, which was done. They moved from Oklahoma City over the Frisco to St. Louis, thence C. & E. I. and E. J. & E. to destination I. H. B. delivery. There were no joint rates over the route of movement or over any other route in connection with the Frisco to East Chicago. There was in effect a joint rate of 29.5c via the Rock Island from both Oklahoma City and Grandfield to East Chicago, charged Granite City combination. The record shows the Rock Island made a diligent effort to locate the shipments before they were delivered to its connections and the failure to divert the shipments was not the result of negligence on the part of its employees. The route over the shipments were diverted was not inconsistent with the original routing, or contrary to tariff regulations. HELD, shipments not misrouted, shipment overcharged, reparation awarded. Barnsdall Refineries v. C., R. I. & P. Ry., 129 I. C. C. 443.

(ff) Complainant alleged that the rate charged on a car of yellow pine lumber, shipped Aug. 28, 1922 from Woodbury, Ga., to East St. Louis, Ill., and reconsigned to Buffalo, N. Y., was inapplicable. Shipment originated on the M. & B. and was consigned to East St. Louis routed "M. & B., Sou. Chattanooga, N. C. & St. L., Paducah, C. B. & Q. Ry. delivery". It was reconsigned to Buffalo, charged 56c, authority not shown, plus reconsignment charge of $2.25. Complainant contends that at the time the shipment moved a 42c rate was in effect from point of origin to Buffalo without restriction as to routing, and shows that at the time the reconsignment was ordered it directed that such a rate should be protected. It does not show the route over which the shipment moved. Misrouting was not alleged, that issue being barred by statute before the complaint was filed. HELD, complaint dismissed. Milne Lumber Co. v. N. Y. C. R. R., 129 I. C. C. 457.

(gg) Complainant alleged combination commodity rates charged on three cars of coal shipped May 24, 1923 from Boonville, Ind., to Elkhart, Ind., and reconsigned to South Bend, Ind., were unreasonable and unduly prejudicial. Shipments moved Southern to Louisville, Ky., and Big Four to Elkhart. They were reconsigned en route to South Bend, and moved over N. Y. C. to Elkhart and 15 miles beyond. Defendants reconsignment rules did not provide for reconsignment at the joint rate over the route of movement, and charges were collected at rates of $2.08 to Elkhart and $1.11 beyond. Applicable rate from Elkhart to South Bend was $1.01, overcharged 10c per ton. HELD, applicable rates not unreasonable or otherwise unlawful, complaint dismissed. Russell the coal man v. C., C., C. & St. L. Ry., 132 I. C. C. 25.

(hh) Complainant alleged commodity rate charged on a car of lumber from Kurthwood, La., to Omaha, Neb., May 18, 1925 was inapplicable and unreasonable. Shipment was originally consigned to Marine, Ill. No routing specified by complainants. While shipment was on the I. C. complainant instructed that defendant to reconsign it to Omaha and to protect "lowest through rate". Shipment was reconsigned by I. C. at East St. Louis, Ill. It moved R. R. & G., to Le Compte, La., C., R. I. & P. to Memphis, I. C. to Omaha, charged 44.5c applicable over route traversed, plus a reconsignment charge of $2.70 which is not assailed. A joint rate of 38.5c the lowest through rate was not applicable over a route embracing the I. C. except on traffic received by that carrier at Council Bluffs, Ia., but complainants were not so notified. The reconsignment instructions were not to protect a joint rate or any specific rate, but the "lowest thru published rate". Such instructions obviously meant the lowest through rate applicable over the route traversed from point of origin to the point at which the shipment was reconsigned. The instruction was not sufficient to operate as a notice to defendants that complainants wanted a rate which was not applicable over the route traversed to East St. Louis. HELD, defendants were not under a duty to notify complainants that the 38.5c rate was not applicable, complaint dismissed. Lehr Lumber Co. v. R. R. & G. Ry., 132 I. C. C. 335.

(ii) Complainant alleged class rate charged on a car of automobiles shipped

Oct. 15, 1923 from Flint, Mich., to Marlin, Tex., and reconsigned to Brownwood, Tex., were unreasonable and inapplicable. Shipment consigned to complainant notify Primm Chevrolet Co. at Marlin. Routed by complainant "G. T., R. I., M. K. T., S. P." and rate of $2.845 inserted in the bill of lading. Shipment moved G. T. W. to Chicago, Rock Island to Kansas City, Mo., M. K. T., to Denison, Tex., H. & T. C. to Marlin. Oct. 25, 1923 complainant states he telephoned the G. T. agent at Flint to divert the shipment to Brownwood rerouting it G. T., R. I., M. K. T., St. L. S. F., and St. L. S. F. & T. and requesting the joint thru rate of $2.845 be protected. Charged first class rate of $2.845 to Waco and first class $1.11 beyond. The $2.845 rate was applicable from Flint to Marlin over the route specified in the bill of lading, as corrected, which is the route over which the shipment moved and to Brownwood over the route specified in complainants letter of confirmation of the telephone order, but it was not applicable over the route shipment moved to ultimate destination. Defendants point out that the $2.845 rate was not applicable to Brownwood over any route beyond the point where the car was located at the time the reconsignment order was received; that defendants were not obligated to so notify complainant under the applicable tariff rules; and that it was impossible to reconsign the car to Brownwood over any route that would afford protection of the joint through rate, or to move the car via the route named in the letter of confirmation. The situation here presented is different from that in which the carrier was able at the time the reconsignment order was given to divert the shipment to the route over which the lower rate named in the order applied. If the Commission accepts complainants contention that the protection of the rate named in the order was a condition precedent to reconsignment and that defendants were obligated to notify complainant that such rate could not be protected, it follows that the forwarding of the shipment to Brownwood was unauthorized. The shipment could have been refused at that point and the defendants compelled to return it to Marlin without expense. Instead, by accepting the shipment at Brownwood the failure to observe this condition was waived. The fact that the shipment was accepted without notice that the $2.845 rate had not been protected, does not relieve the responsible party of its liability to pay the applicable charges. HELD, charges assailed were applicable, not unreasonable, complaint dismissed. Chevrolet Motor Co. v. C., R. I. & P. Ry., 132 I. C. C. 337.

(jj) Upon further hearing the finding in former report, 104 I. C. C. 734, that rates on a shipment of tomatoes from Gibson, Tenn., to Youngstown, Ohio, were unreasonable to extent they exceeded lower rates in effect to Pittsburgh, Pa., rate points, and the award of reparation, affirmed. Original record indicated that shipment moved over L. & N. to the Ohio River, and the B. & O. beyond. Further evidence, however, showed that shipment moved to Cleveland over the L. & N., and the C., C., C. & St. L., and was thence reconsigned to Youngstown. Upon contention that as rate to Pittsburgh rate points does not apply through Cleveland, and as the C., C., C. & St. L. was not a party defendant, the commission's order for reparation can not run against that carrire, FOUND: Rate to Pittsburgh rate points was unrestricted as to routing and was applicable over same line and route shipment moved through Youngstown. Moreover, as the C., C., C. & St. L. was a party to joint rate beyond the river, it was not essential that it be a party defendant, the liability of carriers parties to a rate being joint and several. Coulbourn Fruit Co. v. B. & O., 129 I. C. C. 441

(kk) Shipments of fuel oil from Granite City, Ill., and diverted to East Granfield, Okla., originally destined to Chicago, Rock Island & Pacific; St. Chicago, Ind., were tendered routed Louis-San Francisco; Merchant Bridge Terminal delivery. In requesting diversion to East Chicago, complainant erroneously advised agent of Rock Island at Tulsa, Okla., that shipments had been routed over that line, Merchant Bridge Terminal delivery, and before actual routing could be ascertained shipment had been delivered to the Frisco. Thereupon, in conformity with its tariff rules, the Rock Island placed diversion instructions with the Frisco. FOUND: Initial shipments before delivery was made to carrier made diligent efforts to locate its connections and failure to divert was not result of negligence on part of its employees. Moreover, route over which shipments were diverted was not inconsistent with original routing or contrary to tariff regulations, and ship-

ments were not misrouted. Barnsdall Refineries v. C R. I. & P., 129 I. C. C. 443.

(ll) On shipments of lumber originating at Woodbury, Ga, consigned to St. Louis, Mo., and reconsigned to Buffalo, N. Y., complainant contended that reconsignment instructions directed that a lower unrestricted rate in effect from origin point to Buffalo be protected. Complainant failed, however, to show route over which shipment moved. FOUND: Applicability of a rate to a given shipment depends upon whether or not such shipment moved over lines of carriers parties to tariff naming the rate, and in absence of such information the commission is unable to determine applicable rate. Milne Lbr. Co. v. N. Y. C., 129 I. C. C. 457.

(mm) Shipments of scrap iron from various points, originally consigned to Bethlehem, Pa., but there refused, and in a few instances partially unloaded, were subsequently reconsigned to Allentown, Pa. Rates were assessed under tariff rule providing that cars placed for unloading at original billed destination but reforwarded therefrom without being unloaded, to a point outside switching limits, would be subject to published rates to and from reconsignment point plus reconsignment charge. FOUND: In 89 I. C. C. 236, so-called reconsignment charge was found inapplicable on shipments the lading of which was changed in whole or in part at original destination, and in 91 I. C. C. 615, and other cited cases, reconsignment charges provided under a similar rule were found unreasonable. Principles announced in those cases are applicable here Reparation awarded. Sofransey Co. v. R. Co., 129 I. C. C. 617.

(nn) Carload of peaches from North Mountain, W Va., originally consigned to Cincinnati, Ohio, but diverted. without routing instructions to Pittsburgh, was routed by carrier over lowest rates routes, via Everson, Pa. Subsequently shipment was reconsigned to Toledo, Ohio, and combination rates to and from Pittsburgh, plus reconsignment charge, were assessed. Lower joint rate from origin to final destination, sought by complainant, was restricted, precluding its use via Everson, over which route shipment moved, but defendant had no knowledge that Pittsburgh was not final destination of shipment and and can not be charged with misrouting. Rates assessed found applicable and not unreasonable, but reconsignment charge found unreasonable and its discontinuance required. Purse Bros. v. B. & O., 129 I. C. C. 727.

V. PROCEDURE AND REPARATION.

See Procedure Before Commission; Reparation.

§ 7. In General.

(a) Complainant, under section 6 of the act, alleged that charges collected on a car of watermelons shipped July 21, 1921, from Oliver, Ga., to Kansas City, Mo., and forwarded to Rock Island, Ill., were illegal. Shipment moved C. of Ga., N. C. & St. L., L. & N. through St. Louis, M. P. to Kansas City, the original destination, thence back over the Rock Island to Rock Island. Charged combination over Kansas City, rate requested through rate of 76c to Rock Island direct. Defendants deny any knowledge of reconsignment. Under the circumstances it was incumbent upon complainant to prove that the tariff provision requiring that the "request for reconsignment must be made or confirmed in writing" had been complied with. Lack of proof on this question precludes any determination by the commission that the charges attacked were illegal. There is no proof that complainant paid the charges or is the real party in interest, the freight bill and bill of lading are not in evidence, there is no testimony with respect to the date of arrival or departure from Kansas City, or that any request for reconsignment was ever made. HELD: Charges not illegal, complaint dismissed. Ward Bros. v. C. of Ga., 118 I. C. C. 183.

§9. Jurisdiction Of Commission.

See Interstate Commerce Commission I; Jurisdiction of Commission.

(a) Shipments of tobacco moved from points in Virginia to Richmond, where delivery was accepted by consignee, who took charge thereof, paid incoming charges thereon, and without unloading, and without carrier or its agent acting for it, arranged for further transportation to Norfolk, for export. Reconsignment charges in addition to rates to and from point of reshipment were assessed in accordance with applicable tariff rules. HELD: Movements to Richmond not within commission's jurisdiction because intrastate in character. See 204 U. S. 403. On other hand reconsignment charges, assessed

because of movement beyond that point and incidental to it, are so subject. Taylor Co., v. S. Ry. Co. 109 I. C. C. 431, 433.

§10. Damages and Reparation.

See Loss and Damage; Reparation.

(a) Complainant sought reparation on a shipment of cucumbers, alleging that failure of carrier to properly divert en route resulted in their deterioration and consequent decline in value; also that manner in which its diversion order was handled was prima facie evidence of negligence and indicated a lack of system in handling of such orders. HELD: The commission may award reparation only for violations of the act, not here shown, and claims for loss and damage, and measure of damages applicable thereto are cognizable only in courts. Here the carrier fulfilled its obligation by forwarding shipment over lowest rated route known to it, no routing instructions having been furnished by shipper when diversion was requested. Johnston v. C. & W. C., 118 I. C. C. 19.

(b) Failure of Southern Ry., in conformity with tariff provision in effect at time of shipment and after adequate instructions had been furnished it, to promptly transmit a diversion order to its connection, resulting in shipment moving through to originally billed destination from which it had to be reforwarded, found to have resulted in damage to complainant measured by difference between charges collected and those which would have accrued at applicable rate from origin to ultimate destination via point at which diversion should have been effected, plus applicable charge for reconsignment. Reparation awarded. Huber v. G. & F., 118 I. C. C. 282.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. Jurisdiction Of Commission.

See Interstate Commerce Commission I; Jurisdiction of Commission.

(a) To deny reduced rating on a specific commodity to small jobbers and communities solely because to do so would enable them to compete on more nearly equal terms with jobbers in large centers of population would be in contravention of one of the primary purposes of the act. Congoleum-Nairn v. C. & N. W. 109 I. C. C. 447, 449.

(b) Section 15a of the act does not affect commission's authority to require reductions in particular rates which are found unreasonable. Oklahoma Traffic Assn. v. A. G. S. R. R., 113 I. C. C. 635, 644.

(c) Plainly the commission is justified in condemning a rate on the ground that it is unreasonably low, where it is shown that it will cause loss rather than gain to the publishing road or roads and will thus impose a burden upon other traffic. In suspension proceedings, in view of the burden of proof, it is justified in condemning a proposed rate, protested as too low, if the carriers which sponsor it do not sufficiently show that it will cause gain rather than loss. But

the authority goes further. It is justified in condemning the proposed rate as too low if the evidence warrants the conclusion that it will, because of its lowness, tend to precipitate changes in rate structure or in traffic which will be harmful to the public interest, having in mind its responsibility for railroad earnings in general under section 15 a. Ex-Lake Iron Ore from Chicago to Granite City, 123 I. C. C. 503, 504.

II. LEGALITY OF REDUCED RATES.

See Legality of Rates.

§2½. In General.

(a) Commission does not desire to interfere with the initiative of railroad managements in reduction of rates, unless compelling reasons affecting public interest so require. Ex-Lake Iron Ore from Chicago to Granite City, 123 I. C. C. 503, 504.

(b) Commission is justified in condemning a rate on ground that it is unreasonably low, where it is shown that it will cause loss rather than gain to publishing roads and thus impose a burden upon other traffic. In suspension proceedings, it is justified in condemning a proposed rate, protested as too low if carriers sponsoring it do not show that it will cause gain rather than loss, or if evidence warrants conclusion that because of its lowness, it will tend to precipitate changes in rate structure or in traffic which will be harmful to public interest, having in mind commission's responsibility for railroad earnings in general under section 15a. Ex-Lake Iron Ore from Chicago to Granite City, 123 I. C. C. 503, 504.

§3. Charitable Institutions Fairs or Emergency.

(a) Upon complainant's contention that taxpayers, where books are furnished free to students, or purchasers wherethey are not furnished free, would derive benefit of any reduction in rates, and that such reduction would be desirable in the public interest, FOUND: That while carriers are permitted to haul traffic for State governments free or at reduced rates, the commission may not require them to maintain rates, because of interest of taxpayers and purchasers of schoolbooks, lower than may be required in absence of that interest. American Book Co. v. A. A. R. R., 129 I. C. C. 372, 374.

§4. Government or Municipal Shipments.

(a) Under Act July 27, 1866, §§ 11, 18, 14, Stat. 297, 299, and in view of appropriation acts for army transportation for years 1916, 1917 (Act March 4, 1915, 38 Stat. 1076, 1077; Act. Aug. 29, 1916, 39 Stat. 633, 634), requiring land grant railroads to transport troops, munitions of war, and property of the United States at rates not exceeding 50 per cent. of those paid by private shippers for same kind of service, where land grant railroad, before transportation of military impedimenta, filed with Interstate Commerce Commission a special tariff applicable thereto, there being no tariff available to the public at large including such items, HELD such railroad was not entitled to recover for transportation service on basis of such special tariff, in absence of express agreement or proof that contracting officers had knowledge of it when the shipments were made. Southern Pac. Co. v. United States, 47 Sup. Ct. 123.

(b) War Department, making shipments of military impedimenta, HELD not chargeable as matter of law with knowledge of special tariff previously filed by carrier without authorization. Southern Pac. Co. v. United States, 47 Sup. Ct. 123, 124.

(c) Railroad, seeking to recover for transportation of military impedimenta on basis of reasonable value, HELD to have burden of establishing such value. Southern Pac. Co., v. United States, 47 Sup. Ct. 123, 124.

(d) While the carriers are permitted to haul traffic for the state governments free or at reduced rates, the Commission may not require them to maintain rates, because of the interest of taxpayers and the purchasers of school books, lower than may be required in the absence of that interest. American Book Co. v. A. A. R. R., 129 I. C. C. 372, 374.

§4½. Reasonableness and Discrimination.

See Discrimination; Reasonableness of Rates; Restricted Rates (b); Through Routes and Joint Rates §24 (b).

(a) Proposed reduced rates on pig iron from southern producing points to St. Louis and Kansas City, Ohio River crossings, and related and intermediate

points, found justified. Proposed rates, while not upon a reasonable maximum basis, are not less than reasonable minimum rates and will not throw a burden upon other traffic. Moreover, such rates will compare favorably with rates on like traffic from northern producing points to same destination and will not result in any undue prejudice. Pig Iron from Southern Points, 104 I. C. C. 27.

(b) Proposed establishment of a specific commodity rate on wagon skeins from Chattanooga to Montgomery lower than applicable class rate now in effect, found justified. Wagon Parts to Southern destinations, 104 I. C. C. 179.

(c) Proposal to reduce rates on grain, seed, and products from points in Colorado, Wyoming, Kansas, Oklahoma, and Missouri to points in Louisiana west of Mississippi River, and restrict routing in connection therewith through Arkansas but not through Texas, found justified as to carriers not operating routes through Texas but unlawful with respect to carriers operating such Texas routes which are as short as, or shorter than, those operated by them through Arkansas. Transportation conditions do not warrant proposed restriction, which would also result in violation of section 3 of the act. Proposed reductions will restore rate basis previously in effect from origin territory, will remove many fourth-section departures, and harmonize an existing maladjustment of rates in destination territory. Grain and Products from Western States, 104 I. C. C. 272.

(d) Proposal to reduce rates on grain, seed and products from points in Colorado, Wyoming, Kansas, Arkansas, Oklahoma, and Missouri to points in Louisana west of Mississsippi River, found justified. Proposed reductions will, among other things, restore rate basis previously in effect from origin territory. Grain and Products from Western States, 104 I. C. C. 272, 275.

(e) Louisiana points: Proposal to reduce rates on grain, seed, and products from points in Colorado, Wyoming, Kansas, Arkansas, Oklahoma, and Missouri to points in Louisiana west of Mississippi River found justified. Proposed reductions will, among other things, remove many existing departures from long-and-short-haul provision of section 4 of the act. Grain and Products from Western States, 104 I. C. C. 272, 275.

(f) In original report, 101 I. C. C. 363, 374, commission provided for reduction of higher rates on anthracite coal from Pennsylvania mines to destinations in upper New York State over longer joint line routes to level of those applicable over single line routes between same points. Upon showing by carriers that single-line rates were prescribed in 35 I. C. C. 220 for single line hauls only, that those rates would not be reasonable maxima for joint-line hauls, and that a reduction of the joint-line rates to one-line basis would result in a serious and unwarranted loss in revenue, a difference of 13 cents between single and joint-line routes, approved. Such difference found not unreasonable or great enough to place retail coal dealer served by joint routes under any serious handicap in competing with dealer served by single line at same point. Moreover, where not unduly circuitous, it is desirable that all routes be maintained. Anthracite Coal Investigation, 104 I. C. C. 514.

(g) Proposal to decrease minimum weight on salt from eastern shipping points except Groups B and C rate points to destinations in Arizona, California, Mexico, Nevada, New Mexico, Oregon, and Utah, found justified. Proposed decrease will remove handicap of shippers west of Chicago in marketing their salt in competition with salt produced in Utah and California, and result in less damage to shipments in transit. Minimum Weight on Salt, 104 I. C. C. 631.

(h) Proposed reductions in domestic rates on crude petroleum from the El Dorado-Smackover field in Arkansas to Texas ports, found justified. There is little, if any movement under present rates and carriers would sustain no reduction in revenues of consequence if reduced rates are permitted to become effective. Petroleum from Arkansas, 104 I. C. C. 651.

(i) Establishment of reduced rate on crude petroleum from El Dorado, Ark., district to Houston, Tex., pursuant to 104 I. C. C. 651, found to remove undue prejudice and preference existing by reason of maintenance of lower rate from same district to New Orleans. Reasonableness of reduced rate to Houston not impeached. United Central Oil Corp. v. M. P., 107 I. C. C. 1.

(j) Proposal to reduce rates over certain lines on coal from points in south-

ern Illinois, Murphysboro, Centralia, and Du Quoin districts to St. Louis and nearby points in Missouri, with a view to securing a lower differential over the Belleville, Ill. group, by restoring rates previously in effect and thus restore proper relationship to intrastate rate to East St. Louis, found not justified. Proposed reduction would ultimately effect a corresponding reduction from other origin groups to this destination territory and this in turn might lead to reductions from those groups to other destination territories. Coal from Southern Illinois, 107 I. C. C. 415.

(k) Authority to establish reduced rates on certain commodities from eastern defined territories, Groups D to J, inclusive, to Pacific coast terminals, without observing long-and-short-haul clause of section 4 of the act, based on market competition and a desire to place Mid-Western manufacturers on a rate equality with eastern competitors who enjoy cheaper water transportation by reason of their location near Atlantic seaboard denied. Section 500 of transportation act, 1920, declares it to be the policy of Congress to foster and preserve in full vigor both rail and water transportation. While rates proposed are reasonably compensatory traffic diverted from water routes would inappreciably effect net revenues of rail lines, they would be disproportionate to losses the water lines would suffer, and might impair latter's ability to maintain their present standard of service. Commodity Rates to Pacific Coast Terminals, 107 I. C. C. 421.

(l) To deny reduced rating on a specific commodity to small jobbers and communities solely because to do so would enable them to compete on more nearly equal terms with jobbers in large centers of population would be in contravention of one of the primary purposes of the act. Congoleum-Nairn v. C. & N. W., 109 I. C. C. 447, 449.

(m) Proposed reduced charge for handling, storage, and wharfage of imported fertilizer and fertilizer materials at Pensacola, Fla., and Mobile, Ala., in order to meet charge on potash salts at Pensacola and on all fertilizer materials at Gulfport, Miss., found not justified. While the situation presents a maladjustment injurious to Mobile, commission can not permit its partial correction even for a temporary period by establishment of a charge which record clearly shows to be below a reasonable minimum. Handling, Storage, and Wharfage of Fertilizer, 109 I. C. C. 609.

(n) Respondents proposed reduced rates and an increased minimum weight on sewer pipe wall coping and flue lining from Fort Dodge, and other Iowa points to destinations in northern Illinois, southern Wisconsin, southeastern Minnesota. At present class E rates apply on sewer pipe, carloads from Iowa to these points. Rates proposed are commodity rates lower than class E rates, and to Chicago district, northern Illinois, and southeastern Minnesota are 2 c. lower than the present rates, to southern Wisconsin 3 c. lower. The rates to Minnesota were reduced to permit Iowa manufacturers to compete at destinations in that state with manufacturers at Red Wing, Minn. HELD, rates found justified. Sewer pipe and related articles, 113 I. C. C. 239.

(o) Rock Island, proposed to reduce its carload rates on grain and grain products from Nebraska, Iowa, Illinois, Missouri, Kansas and Arkansas to Louisiana, and on alfalfa feed, brewers grain from Oklahoma points to the same destinations, proposing to restrict the routing in connection with the reduced rates so that they would not apply over routes through Texas. Respondent maintains routes through both Texas and Arkansas. Traffic and transportation conditions are substantially similar in Oklahoma, Arkansas, Louisiana and Texas. The routes through Texas as to this traffic are generally shorter than those through Arkansas. M. P., now maintains rates which do not apply through Texas from the general territory under consideration, and from some points common to both it and respondent, on a parity with those which respondent seeks to establish over the routes through Arkansas. The M. P., operates no routes through Texas. HELD, proposed schedule not justified without prejudice to the filing of new schedules establishing the proposed reduced rates applicable over routes through both Arkansas and Texas. Grain and grain products to Louisiana, 113 I. C. C. 259.

(p) Earnings of carriers in western district, as a whole, not shown to have been such as to warrant any general downward revision of rates on products of agriculture, or of other industries subject to depression. Revenues in Western District, 113 I. C. C. 3, 39.

(q) Local and joint class rates be-

tween points in Arizona, on the one hand, and points in California, New Mexico, and El Paso, Tex., on the other hand, found unreasonable. Rates assailed are materially higher than those prescribed in 21 I. C. C. 640, and 74 I. C. C. 207, for application in the Pacific Northwest and at present in effect throughout the northern half of the Mountain-Pacific group. Operating and transportation conditions in territory here under consideration compare favorably with those in much of the territory in which the lower rates apply. Temporary scale of distance rates prescribed which will accord the Pacific Southwest substantially same scale of rates as now applies in the Pacific Northwest. Arizona Corp. Commission v. A. E. Ry., 113 I. C. C. 52.

(r) Rates on fresh meats and packing-house products, c. l. and l. c. l., from Pueblo, Colo., to points in New Mexico found unreasonable and unduly prejudicial as compared with rates on like traffic from El Paso and Fort Worth, Tex., Oklahoma City, Okla., Wichita, Kans., and Cactus, Ariz., to same destinations. Reasonable scale of distance rates based on the so-called Cactus-El Paso scale laid down in 81 I. C. C. 115 and 100 I. C. C. 4, for application in same general territory for like distances prescribed and reparation awarded. Nuckolls Packing Co. v. A., T. & S. F., 113 I. C. C. 229.

(s) Proposed reduced rates and increased minimum weight on sewer pipe, wall coping, and flue lining, from Fort Dodge and other Iowa producing points to destinations in Illinois, Wisconsin, and Minnesota, found justified. Proposed rates are commodity rates lower than the class rates at present applicable and are for the avowed purpose of enabling manufacturers in Iowa to compete with manufacturers located at various producing points in same general territory. Evidence submitted points out disadvantages Iowa manufacturers are under in marketing their products and shows that proposed rates are not too low as compared with rates from other producing points. Sewer Pipe and Related Articles, 113 I. C. C. 239.

(t) Proposal to reduce rates on grain and products from points in Nebraska, Iowa, Illinois, Missouri, Kansas, Oklahoma, and Arkansas, to Louisiana, routed through Arkansas, and to restrict routing so that such reduced rates will not apply over routes through Texas, found not justified. In 104 I. C. C. 272, commission found such restriction of routing not justified by transportation conditions and that resulting disadvantages to Texas mills would be unlawful in violation of section 3 of the act. No evidence has been submitted in present record to warrant a different conclusion. Grain and Products to Louisiana, 113 I. C. C. 259.

(u) Proposed reduced rates on coal from Springfield and Riverton, Ill., to Keokuk, Iowa, Hannibal, Mo., and other destinations, found not justified. The failure to make reductions apply uniformly from all mines in Springfield district would result in splitting that district into two groups for which there has been no justification. Moreover, attempt of carriers to establish lower rates from Springfield and Riverton would, if successful, destroy the differential relationship between the Illinois producing groups prescribed in The Illinois Coal Cases, 1920, 62 I. C. C. 741, which decision contemplated establishment of the differential basis therein prescribed to destinations in eastern Iowa, including Keokuk. Bituminous Coal from Illinois, 112 I. C. C. 369.

(v) Proposed reduced rates on car trucks without journal bearings from points in c. f. a. and trunk-line territories to Atlantic seaboard for export, designed for purpose of stimulating traffic and aiding American manufacturers in meeting keen foreign market competition, found not unreasonable. Schedules, however, found not justified, since proposed rate from Pittsburgh district to New York would result in undue prejudice to Athenia and Lodi, N. J. Car Trucks to Atlantic Seaboard, 112 I. C. C. 583.

(w) Section 15a of the act does not affect commission's authority to require reductions in particular rates which are found unreasonable. Oklahoma Traffic Assn. v. A. G. S. R. R., 113 I. C. C. 635, 644.

(x) Proposed reduced proportional rates on grain and products from Kansas City, Mo., to Beaumont and Port Arthur, Tex., and New Orleans, La., and points taking New Orleans rates, for export, designed solely to augment traffic on line of Kansas City Southern Ry., found not justified. While proposed rates do not

seem violative of either sections 1 or 3 of the act applying the usual standards, approval of schedules will inevitably lead to a disruption of grain-rate structure, have marked effects upon distribution and marketing, the extent of which commission can not adequately foresee, and must of necessity impair the revenues of carriers and their ability to render satisfactory service. See also 69 I. C. C. 589, 611. Grain and Products, 115 I. C. C. 153.

(y) Respondents, I. C., C. & E. I., and Wabash, proposed to reduce their rate on ex lake iron ore, in carloads, from Chicago, Ill., to Granite City, Ill. The primary question presented for determination is whether the proposed rates fall short of being reasonable minimum rates. Each case must be judged upon its own particular facts, and a rate which may appear unduly low under one set of circumstances may not so appear under another set of circumstances. Here the record clearly justifies the conclusion that in view of the present heavy movement of empty coal cars over the routes in question from Chicago to Granite City, and in view of the fact that the traffic to which the proposed rate is to apply is well adapted to movement in trainload quantities and probably will so move, the proposed rate will be financially advantageous to respondents HELD, proposed rates justified. Ex Lake Ore from Chicago to Granite City, 120 I. C. C. 75.

(z) Proposed reduced rates on ex-lake iron ore from Chicago to Granite City, Ill., found justified. Carriers showed that they carry a large volume of coal from mines near Granite City to Chicago with a practically complete empty-return movement due to present rate proving too high to attract the ore traffic. The rate proposed, which is not less than a reasonable minimum, will enable a furnace at Granite City to share in ore movement by lake and enable it to increase its output in competition with rival plants located in Chicago district and elsewhere. Rail carriers will not be deprived of any important traffic and the extremely low all-rail rates now in effect offset the probability of a rate war. Moreover, rail-lake-and-rail route to Granite City is a natural one possessed of marked economic advantages, and its increased utilization seems clearly in public interest. Ex-Lake Iron Ore from Chicago to Granite City, 120 I. C. C. 75.

(aa) Upon contention of shipper that evidence tending to prove that traffic under proposed reduced rates will move in trainloads should be given no weight because it is commission's policy not to permit establishment of rates applicable only to trainloads, HELD: Principle referred to does not apply to a case which deals with rates per carload. However, fact that traffic to which the carload rate will apply will in all probability move in trainload quantities is pertinent in considering whether rate will burden other traffic. Ex-Lake Iron Ore from Chicago & Granite City, 120 I. C. C. 75, 81.

(bb) Where there is no showing that like rate advantages are withheld from competing shippers under similar circumstances and conditions, fact that a single shipper will be sole user of a proposed reduced rate does not constitute a violation of section 3 of the act. Ex-Lake Iron Ore from Chicago & Granite City, 120 I. C. C. 75, 81, 82.

(cc) Respondents M. & St. L. and Soo Line, proposed domestic proportional rate, representing reductions, over their respective lines and their eastern rail connections from Minneapolis and Duluth, Minn., and a few points grouped therewith, to points in trunk line and New England territories on grain and grain products, in carloads, originating at points in Montana, North Dakota, northwestern Minnesota and a few points in South Dakota. The proposal represents an effort on the part of respondents to secure some of the traffic that is now moving from the affected territory over rail-lake-routes through Duluth and Buffalo, N. Y. The rates from the affected territory to Minneapolis and Duluth are generally on a parity and over all rail lines the same is true of the present rates beyond. However, from Duluth to Buffalo relatively low cargo steamer rates are available on grain, which added to the ex-lake rates on grain or its products from Buffalo to the destination territory make through rates that are less than the all rail rates. It follows that these lake-rail rates, when added to the inbound rail rates to Duluth, make lower through rates from the affected territory to the east than are made on the Minneapolis or Duluth combination over all rail routes. What respondents mainly seek is a curtailment of the movement of grain from the fields directly through

Duluth and over the lake-rail lines, coupled with a corresponding increase in the movement of grain direct to Minneapolis and thence out over all rail lines, either as grain or its products. The proposed rates are to apply only on traffic from points where the inbound rates to Minneapolis are not less than those from the same points to Duluth, except that some additional reductions, are proposed in order to avoid departures from the fourth section. The present all rail rates from Minneapolis and Duluth are proportionals to and from such points as Milwaukee, Wis., and Chicago and Peoria, Ill., and are equal through those gateways. Those applicable through Sault Ste Marie, Mich., are the same in amounts but are published as joint rates. The proposed rates are joint rates 6c lower than the combinations. Joint lake-rail rates 4c lower than the all rail rates apply on these commodities from Minneapolis to the destination territory in connection with the package steamers of the Great Lakes Transit Corporation. The package steamers do not handle cargo grain. Respondents admit that the proposed rates are less than reasonable maxima, and there is no evidence to the contrary, but they seek to show that they are reasonable minimum rates, that they would add something to their net revenues and would not burden other traffic. The proposed joint rates are limited to apply only on traffic from points in the affected territory. They would not apply on traffic from certain intermediate points just west of Minneapolis. The rates from these points, made on the Minneapolis-Peoria combination, would exceed those from the points farther west made by use of the proposed joint rates as factors east of Minneapolis, but departures from the long and short haul provision would be avoided by an appropriate tariff provision which is part of the suspended schedules. On traffic to eastern destinations the eastern lines, parties to the proposed rates, serve as participating carriers not only Minneapolis but all of the competing western mills and grain markets. They owe a like duty to each of these communities. They may not unduly prefer Minneapolis to the undue prejudice of the others. Minneapolis already has relatively more favorable rates than these competing western markets, and those proposed would increase the preference. The Commission is not convinced that there is such a difference in conditions as would justify the proposed preference of Minneapolis. The rates proposed by the Soo would apply through Canada in connection with the C. P. and only to Boston rate points, reached by the eastern connections of that line. Clearly the Commission has jurisdiction to prohibit such eastern connections from joining in an unlawful rate even though part of the transportation is within Canada. It is not clear that a reduction to Boston rate points alone would not also result in undue preference of those destinations. Approval of the proposed rates would lead directly to a disruption of the grain rate structure, have marked effects on marketing and distribution, and of necessity impair the revenues of the carriers and their ability to render satisfactory service. That there would be any substantial benefit to respondents, Minneapolis, to the producers of wheat, is doubtful. Competition would undoubtedly force other carriers serving Minneapolis to meet the proposed rates and respondents could not hope to secure any substantially greater share of the traffic than they do under the present rates, unless as a reward of forcing these reductions. Corresponding reductions from competing communities would follow and Minneapolis would be in no better relative position than now. The farmers could hardly gain from the reduction. The Minneapolis interests claim that the reduction is necessary in order that they may maintain their position in the milling industry, and accordingly it is not probable that any part of the reduction would be passed back to the farmer. It is the rates to the primary markets rather than the rates from the primary markets that are of most importance to the farmer. HELD, proposed schedules not justified. Grain and grain products to eastern points, 122 I. C. C. 551.

(dd) Respondents proposed to reduce their rates on vegetable stearine, other than coconut, in carloads and less carloads, from New York, Philadelphia and Baltimore rate points to Virginia cities and points taking same rates. There are no commodity rates. In southern classification, coconut stearine is rated second class. It would be unduly prejudicial to maintain higher rates on coconut stearine than those on palm kernel, palm and mixed stearines. HELD, establishment of proposed rates on palm kernel, palm and mixed stearines, while maintaining higher rates on coconut

stearine, would result in undue prejudice. Schedules not justified. Vegetable stearine from New York to Virginia cities, 123 I. C. C. 151.

(ee) In 120 I. C. C. 75, division 4 found that a proposed reduced rate on ex-lake iron ore, in carloads, from Chicago, Ill., to Granite City, Ill., by respondents, I. C., C. & E. I., and Wabash had been justified. Reduced rate is a rate of $1.20, applicable on iron ore originating in the iron ranges of northern Michigan, Wisconsin, and Minnesota and brought to Chicago by lake. It superseded a rate of $1.40 under which there had been practically no movement. The purpose of the reduction was to make movement possible. The mere fact that the ton mile yield of the $1.20 rate is materially below average ton mile costs of the I. C., is obviously not proof that it is a noncompensatory rate, but it does furnish reason for careful examination of the affirmative evidence. Line haul movement in solid train loads does not necessarily imply either a single consignor or a single consignee. The fact that the traffic to which the $1.20 carload rate will apply will in all probability move largely in train load quantities, is clearly pertinent in considering whether the rates will cause gain or loss to respondents. HELD, $1.20 rate not unlawful under section 3, schedules justified. Ex-Lake iron ore from Chicago to Granite City, 123 I. C. C. 503.

(ff) Respondents, C. & O. and N. & W., proposed reduced rates on bituminous coal, in carloads, from mines on their lines in Virginia, West Virginia and Kentucky to Cincinnati, O., and destinations in the Cincinnati district on both sides of the Ohio river. The reduced rates were not proposed because respondents considered the present rates too high but only for the purpose of removing an advantage in rates of 10c per ton which mines in certain districts on the L. & N. have at present over mines in these districts on respondents lines. The rate adjustment which would be changed by the suspended schedules is limited, and it is not altogether clear that protestants apprehension that the lower rates would spread over a considerable territory is well founded. Each of the carriers, respondent and protestant, moves coal over its own rails from mines thereon to Cincinnati. Neither respondent participates in that haul from mines on the lines of a protestant. Respondents in reducing their own rates would work no undue prejudice, within the meaning of section 3, to mines on the L. & N. or B. & O. or to those carriers, and it is not even intimated by protestants that the proposed rates would be less than minimum reasonable rates. HELD, suspended schedules justified. Coal to Cincinnati, 123 I. C. C. 561.

(gg) Proposed reduced proportional rates from Minneapolis and Duluth, Minn., and points grouped therewith, applicable over the Minneapolis & St. Louis and Soo Line, respectively, and their eastern rail connections, to points in trunk-line and New England territories, on grain and products originating in Montana, the Dakotas, and northwestern Minnesota, designed by above-named carriers in an effort to secure some of the traffic now moving via rail-lake-rail routes through Duluth and Buffalo N. Y., found not justified. Such rates would lead directly to a disruption of the grain-rate structure, have marked effects on marketing and distribution, and of necessity impair revenues of carriers and their ability to render satisfactory service. Moreover, Minneapolis already has more favorable rates than competing western markets, and rates proposed would increase the preference. Grain and Products to Eastern Points, 122 I. C. C. 551.

(hh) Proposed reduced rates on vegetable stearine, other than coconut, by establishment of any-quantity rates, from New York, Philadelphia, and Baltimore rate points to Virginia cities and points taking same rates, found not justified. Establishment of proposed rates on palmkernel, palm, and mixed stearines, while contemporaneously maintaining higher rates on coconut stearine, would result in undue prejudice. See 98 I. C. C. 331; 120 I. C. C. 169. Vegetable Stearine from New York Rate Points, 123 I. C. C. 151.

(ii) Finding in original report 120 I. C. C. 75, justifying reduced rate on ex-lake iron ore from Chicago to Granite City, Ill., affirmed on reargument. Proposed rate is not unreasonably low as compared with other ex-lake rates from Lake Erie ports to Ohio and Kentucky points, and evidence indicates that ore will move in solid trainloads thus eliminating the large empty-return movement under former rate and insuring carriers a source of gain rather than loss. Moreover, it will not precipitate changes in

rate structures that will be harmful to public interest, nor is it unlawful under section 3, as alleged, but on the other hand will open up to Granite City markets heretofore inaccessible, will leave all-rail routes in possession of substantial rate advantages, and will open for use lake routes which have marked natural economic advantages for ore transportation. Ex-Lake Iron Ore from Chicago to Granite City, 123 I. C. C. 503.

(jj) Commission is justified in condemning a rate on ground that it is unreasonably low, where it is shown that it will cause loss rather than gain to publishing roads and thus impose a burden upon other traffic. In suspension proceedings, it is justified in condemning a proposed rate, protested as too low, if carriers sponsoring it do not show that it will cause gain rather than loss, or because of its lowness, it will tend to precipitate changes in rate structure or in traffic which will be harmful to public interest, having in mind commission's responsibility for railroad earnings in general under section 15a. Ex-Lake Iron Ore from Chicago to Granite City, 123 I. C. C. 503, 504.

(kk) Proposed reduced rates on bituminous coal from mines on Chespeake & Ohio and Norfolk & Western in Virginia, West Virginia and Kentucky, to Cincinnati, in order to remove an advantage of 10 cents per ton which mines in adjacent districts on L. & N. enjoy, found justified. Present rate scheme has never been approved by commission or by carriers, but has been tolerated because of relatively unimportant tonnage which moved originally from mines on L. & N. to Cincinnati. Moreover, carriers in reducing their own rates would work no undue prejudice, within meaning of section 3; carriers do not intimate that proposed rates would be less than minimum reasonable rates; and narrow scope of adjustment obviates any necessity for exercise of commission's restraining powers under section 15a of the act. Coal to Cincinnati, 123 I. C. C. 561.

(ll) Rates on sulphur from Bryanmound, Tex., refined in transit at Freeport, Tex., thence reforwarded to Fresno, Livny, and Los Angeles, Calif., found unreasonable to extent they exceeded lower rates prescribed in 74 I. C. C. 641, for application on sulphur from Bryanmound and origin points in same general territory to south Pacific coast points when accorded transit at Lake Charles, La., and Texarkana, which rates were subsequently made applicable on traffic accorded transit at Freeport. Reparation awarded. Stauffer Chemical Co., v. H. & B. V., 123 I. C. C. 657.

(mm) Rules governing free transportation of attendants with race horses, polo mounts, and show horses, in carloads, moving by express, FOUND unreasonable to extent they accord transportation to fewer attendants than herein prescribed based on kind and number of horses per car. Express Company's proposal to restrict number of attendants to two per car in all instances, FOUND not justified. Record indicates that race horses being nervous, temperamental, and highly susceptible to disease, require a greater number of attendants per car than either polo or show horses which are more tractable and of more even temperament. Moreover, as record shows that two and one attendants per aisle, respectively, are usually sent with and are necessary for proper care of race horses and other horses, this number should be transported without charge in addition to minimum rates per car. Reasonable rules prescribed for future. Horse Asso. of America v. Amer. Ry. Exp. Co. 126 I. C. C. 103.

(nn) Upon complaint seeking reduction in rate on grain from Aberdeen and contiguous territory in South Dakota within westbound transcontinental Group F, to points in Montana, Idaho, Washington, and Oregon, so as to permit complainants to transit grain at Aberdeen which now moves to Minneapolis and Sioux City from various points in Group F for transit, thence reforwarded to north Pacific coast points at same rate as applies from Aberdeen, HELD: Record establishes that existing adjustment is a benefit rather than a disadvantage to South Dakota shippers and is advisable in view of investigations of terminal elevators at Minneapolis. Moreover, present group adjustment has been in effect for many years and to accord this particular section of Group F a lower rate than applies from remainder of that group would result in undue preference to shippers in that territory and eventually lead to demands for similar reductions from points generally in the group. Aberdeen Commercial Club v. C. P. R. R. 126 I. C. C. 498.

(oo) Rates on lumber from points in Maine to destinations in New England, found reasonable in 43 I. C. C. 641, but

reduced by carriers to allow lumber interests to compete with Pacific coast shipments via Panama Canal, were subsequently increased to former level. Upon contention that such increase was in violation of section 4 (2) of the act, FOUND: Purpose of section 4 (2) is to prevent carriers from increasing rates after water competition has been eliminated by reduced rates. Here, voluntary reduction was not to destroy competition but to preserve it, but since it has continued undiminshed, restoration of rates to former basis does not fall within prohibition contained in that section. See 249 U. S. 557. Moreover, in 85 I. C. C. 270, commission stated it would not adjust rates from competing producing territories in order to equalize manufacturing costs. Woodstock Lbr. Co. v. B. & A., 129 I. C. C. 255.

(pp) Second-class l. c. l. rates on returned empty wooden bobbins from Massachusetts points on the Boston & Maine Railroad to Skowhegan, Me., found not unreasonable or otherwise unlawful as compared with third-class rates contemporaneously maintained in same territory on returned empty wooden spools and with second-class rates on textile spools in official territory. Maine Spinning Co. v. B. & M., 129 I. C. C. 266.

§5. Returned, Old Shipments or emigrant movables.

See Evidence §12 (3s); Through Routes and Joint Rates §15 (l).

(a) Rates on carload shipments of newsprint-paper winding cores, returned, from various points in eastern and c. f. a. territories to destinations in New York and New England States, found unreasonable to extent they exceeded contemporaneous sixth-class rates from and to same points. Record affords no basis for condemning level of rates applicable to l. c. l. shipments. Reasonable c. l. rates prescribed for future and reparation awarded. Washington Publishers' Asso. v. A. C. & H. B., 104 I. C. C. 4.

(b) Upon contention that shipments of returned newsprint-paper winding cores were not in fact returned shipments because title to cores had passed from mill owners, and movement after resale was separate and distinct from initial movement. FOUND: Provisions of contracts under which cores are sold to newsprint-paper users who in turn resell them to paper manufacturers are designed largely to facilitate bookkeeping and insure return of the cores. Inherent nature of such shipments rather than technical distinction raised should be regarded as controlling. Washington Publishers' Asso. v. A. C. & H. B.,104 I. C. C. 4, 8.

(c) Repeated use of returned empty containers or kindred articles employed in connection with initial movement is in interest of conservation and of commerce, and, as to articles of this nature, including newsprint-paper winding cores, the "returned" element may properly be taken into consideration, together with other factors, in determining reasonableness of rates thereon. Washington Publishers' Asso. v. A. C. & H. B., 104 I. C. C. 4, 8.

(d) Fifth-class rates assessed on worn-out and discarded boiler flues and tubes found applicable and not unreasonable. Complainant contends for scrap-iron rates upon theory that commodity shipped is merely scrap iron "reclaimed" under "another process equivalent to remelting," and that it should not be penalized because it reconditions and manufactures this material into gates and fences. However, scrap-iron rates are generally restricted to apply on scraps or pieces having value for remelting purposes only, the tariffs as a police measure also often requiring iron to be broken at point of origin so that it can not be put to any other use. Tubes and flues here shipped did not meet these requirements. Iowa Gate Co. v. B. & O., 104 I. C. C. 169.

(e) Shipments of salvaged miscellaneous iron and steel machinery parts billed as "salvaged government material" were assessed fifth-class rate on second-hand iron and steel machinery and parts. Complainant contends for lower scrap-iron rate, but offered no evidence to identify alleged sales of scrap iron with material involved other than copies of invoice dated five months and more than a year after delivery of shipments, upon which tonnage shown does not correspond with that shipped. FOUND: In absence of positive evidence that description of goods upon face of bills of lading and freight bills was erroneous, charges assessed not shown to have been illegal. Washington Salvage Co. v. P. R. R., 104 I. C. C. 291.

(f) Rate on "scrap or pieces of iron or steel having value for remelting purposes only" found not applicable to shipments of obsolete lathe parts. In instant

case the lathe parts were in no case broken up, and, therefore, did not come within the term "scraps or pieces" as used in tariff description. McCabe Lathe & Machinery Corp. v. N. Y., N. H. & H., 107 I. C. C. 311.

(g) Tariff rule provided for free return transportation of articles transported for exhibition at expositions and fairs held under public auspices. Polo ponies moved from Wichita, Kans., to Riverside, Calif., and Colorado Springs, Colo., where they were used in polo tournaments, then returned to Wichita. Carrier demanded applicable rates for such return movement, arguing that a polo tournament is not "an exposition or fair held under public auspices" whereas shipper contends that a polo game is an "exhibition" of the ponies corresponding to the riding of saddle horses or driving of coach horses at fairs. FOUND: View that a polo tournament is merely an exhibition of ponies accords to their riders a role quite below that played by them. Such a tournament is a series of games testing the skill of both riders and ponies, in which the former are the dominant factor. Rates assailed for return movement found applicable. Vickers v. A., T. & S. F., 107 I. C. C. 575.

(h) Rates and minimum weight applicable on returned empty iron or steel drums, c. l. and l. c. l., between points within official classification territory, found not unreasonable or otherwise unlawful, as compared with other rates and minimum weights in the same and other territories on same and other returned empty containers. Commission has recognized that in many instances rates for return movement of these commodities are upon less than a reasonable maximum basis. Western Paper Makers' Chem. Co. v. A. A. R. R., 109 I. C. C. 133.

(i) Commission has recognized that in many instances the rates provided by carriers for movement of returned empty used packages and containers were upon less than a maximum reasonable basis and has approved cancellation of exceptionally low rates on these commodities. See 54 I. C. C. 1. Western Paper Makers' Chem. Co. v. A. A. R. R., 109 I. C. C. 133, 136.

(j) Volume of traffic between points in official classification territory found not to warrant establishment of rates on returned empty iron or steel drums on other than class basis. On the contrary, class basis appears peculiarly appropriate for this traffic, involving, as it does, shipments from numerous points scattered throughout this territory but with no considerable volume from any one point. Western Paper Makers' Chem. Co. v. A. A. R. R., 109 I. C. C. 133, 136, 137, 138.

(k) Minimum weight on returned empty used iron or steel drums found not unreasonable as compared with minimum weights on same commodity new. The old drums are frequently painted, accumulate more or less dirt and rust in use, and not infrequently contain a small quantity of original contents, features tending to produce variations in weight justifying higher minimum weights on the old drums than on the new. Western Paper Makers' Chem Co. v. A. A. R. R., 109 I. C. C. 133, 138.

(l) Upon complaint seeking a lower rating on worn-out or burned-out electric automobile armatures than on new ones, HELD: The general rule in classifying is that used or secondhand articles will be given lower ratings than new articles of same kind only when old articles have no value except as junk. Departures from this rule are in cases of return shipments of various articles, such as bags or other containers used in connection with shipments. Old automobile electric armatures clearly are more than junk, and no justification appears for giving them the junk rating. Oklahoma Traffic Asso. v. A. & R. R. R., 109 I. C. C. 457, 461.

(m) Class rates on empty bottles, l. c. l., returned from points in West Virginia to Tazewell, Va., found unreasonable as compared with rates accorded other Virginia and West Virginia points. Reasonable distance scale of rates prescribed for future. Was-Cott Corp. v. K., G. J. & E., 109 I. C. C. 468.

(n) Shipments of ambulance axles purchased from the Government after manufacture of army ambulances was virtually discontinued were billed as "scrap iron." Carrier's inspector at point of origin classified shipments as "vehicle axles," and after further inspection at destination charges were collected at rates on "billets," into which the axles were manufactured. Tariff carrying the scrap-iron rate provided for its application on "scraps or pieces of iron or steel having value for remelting purposes only." HELD: Following Alaska Junk Co., 98 I. C. C. 551, rates on "vehicle axles"

were legally applicable, since the words "value for remelting purposes only" define nature of the articles and do not make the rate to be applied dependent upon use to which the commodity is put, and iron or steel articles having a recognized commercial value other than that of the elementary metal from which manufactured do not properly come within description of scrap. Southern Steel & Rolling Mill v. L. & N., 109 I. C. C. 539.

(o) Complainant attacked sixth class rates charged on worn out auto truck rims with solid rubber tires attached, carloads, from points on the New Haven in New York, Connecticutt, Rhode Island and Massachusetts to plant of complainant at Jersey City, N. J., as unreasonable, unjustly discriminatory and unduly prejudicial. The rims with tires attached are rated sixth class and was established following 68 I. C. C. 748. Worn out rims with tires attached do not require expeditious service or high grade equipment, are not susceptible to damage to any appreciable extent, and there is an outbound movement of the salvaged scrap rubber and of the products manufactured from the rims. Shipments are transported on car floats owned and operated by the New Haven and follow the same route to the end of Manhattan Island. They are handled over the float bridge of the Jersey Central which is opposite the Fulton terminal in Jersey City thence they are switched by the latter carrier to complainant plant. HELD, rate attacked unreasonable to extent they exceed the rates on scrap iron. Ames & Co. v. N. Y., N. H. & H. R. R., 112 I. C. C. 624.

(p) Rates on l. c. l. shipment of household goods and second-hand trailer from Bozeman, Mont., to Alameda, Calif., found applicable and not unreasonable. Commodity rate assessed on household goods was listed under item "Household Goods, taking 1st class rating under heading 'Household Goods or Emigrant Movables,'" complainant contending that it was also applicable on trailers which were included under general description "Emigrant Movables." There was no single description covering "Household Goods or Emigrant Movables" but each item was listed separately, household goods being included under both items. Trailers, however, were covered only by item "Emigrant Movables," but rate thereunder was not applicable to l. c. l. shipments. The commodity rate was therefore applicable on household goods but not on the trailer, a first-class rate being properly applied on latter. Desch v. N. P., 115 I. C. C. 401.

(q) Fourth-class rate on l. c. l. shipments of empty iron or steel acetylene gas cylinders returned from Butte, Mont., to Seattle, Wash., found unreasonable to extent it exceeded one-half of fourth-class rate, any quantity, subsequently established on this and various other kinds of empty returned containers from Seattle and other Pacific coast points to various destinations in western territory. Reparation awarded. Sherman & Reed v. C., M. & St. P., 118 I. C. C. 56.

(r) Rates on old secondhand barrels from Cynthiana and Poindexter, Ky., to Rochester and Syracuse, N. Y., found not unreasonable or otherwise unlawful as compared with lower rates contemporaneously in effect from Lexington and Winchester, Ky., to which Cynthiana and Poindexter are intermediate. The fourth-section departures were protected by an appropriate application, considered and disposed of in 100 I. C. C. 513, and orders entered in cited case will result in correction of the situation presented. Carriers showed that because of light loading of barrels, the earnings on shipments here considered were low; also that rates charged compare favorably with rates in general on old secondhand barrels from points in interior Kentucky, other than Lexington and Winchester, to territory north of the Ohio River. Liberty Cooperage & Lbr. Co. v. L. & N., 120 I. C. C. 379.

(s) Complainant attacked class rates charged on carload and less carload shipments of second-hand empty containers returned from points in Wisconsin and Michigan to Duluth, Minn., were unreasonable, unjustly discriminatory, unduly prejudicial and in violation of section four. Shipments were unrouted and some moved over Mineral Range to Houghton, Mich., thence D. S. S. & A. to Duluth. Charged forth class, less carloads and class D carloads. Prior to Dec. 30, 1919 returned empty secondhand containers were rated one-half of fourth class in the western classification. On that date the rating was raised to fourth class for less carloads and class D for carloads. On March 22, 1922 the South Shore established specific carload commodity rates, equivalent to one-half of fourth class rates, to apply on empty containers from and to certain points. On Nov 15, 1922 the South Shore pub-

lished rates on the basis of one-half of fourth class to apply on returned empty containers, any quantity, and this basis is still in effect. HELD, charges attacked unreasonable to the extent they exceeded charge which would have accrued at one-half of fourth class rate, subject to fourth class minimum charge, reparation awarded. Fitger Co. v. D. S. S. & A. Ry., 123 I. C. C. 27.

(t) Complainant attacked first class rate of 66.5c charged on old worn out engraved copper rolls, returned for reengraving, in less carloads, from Northumberland, Pa., to New York, N. Y., as unreasonable. Distance hauled 214 miles. The rating attacked has been applicable on engraved or etched copper rolls, whether old or new, for 14 years. No loss or damage claims have been presented on these shipments. On the evidence presented the principal if not the only question raised is whether the old engraved rolls shall have a lower rating than the newly engraved rolls. HELD, neither the rate assailed nor the classification rating applicable are unreasonable, complaint dismissed. Sunbury Converting Works v. D. L. & W. R. R., 123 I. C. C. 89.

(u) The Commission is not prepared to lay down the principle that old or second hand articles must be treated differently from new or that value is the controlling element in making rates. Such of these articles or parts as are in fact scrap are entitled to the scrap rate, but if they have any value as the articles which they originally purported to be, the Commission does not feel that it can require carriers to transport them at other than the regular tariff rates applicable to the new or originally transported article. Sunbury Converting Works v. D. L. & W. R. R., 123 I. C. C. 89, 92.

(v) Fourth-class l. c. l. and class D. c. l. rates charged on shipments of casks, kegs and cases containing empty bottles returned from points in Wisconsin and Michigan to Duluth, found unreasonable to extent they exceeded one-half of fourth-class rate subject to a fourth-class minimum charge contemporaneously in effect to St. Paul, Minneapolis, Chicago, and Milwaukee, which lower rate subsequently established from and to points here involved and were previously found reasonable by commission from various points to Duluth in 73 I. C. C. 637 and 95 I. C. C. 3. Reparation awarded. Fitger Co. v. D., S. S. & A., 123 I. C. C. 27.

(w) Rating and rate on engraved copper rolls returned for reengraving, l. c. l., found not unreasonable as compared with ratings and rates on new copper rolls, copper rivets, and other articles, or with commodities taking lower ratings and rates when worn-out than when new. Comparisons submitted by complainant, since unsupported by evidence concerning classification characteristics of these commodities, can not be given much probative value. On the other hand, evidence of carriers on that point indicates, as to some of the articles at least, that the new and old forms are practically distinct commodities. Moreover the policy has been followed in numerous cases that old or secondhand articles must not be treated differently from new. See 23 I. C. C. 432, 437. Sunbury Converting Works v. D., L. & W., 123 I. C. C. 89.

(x) Second-class rate applicable on reels in less than carloads charged on an l. c. l. shipment of wire-steel reels returned from Torrance, Calif., to Niles, Mich., found not unreasonable or otherwise unlawful. A lower c. l. commodity rate was in effect on second-hand reels or spools but complainant could not profitably use this rate as it was not feasible for it to accumulate a carload. Reference is made to lower l. c. l. rates on typewriters and lawn mowers from and to these points, also for returned shipments of iron and steel blocks and card-decking racks but latter named commodities are used to facilitate packing and loading westbound c. l. shipments of automobiles. Here the shipments were sporadic, the plant of complainant at Torrance has been closed for more than a year, and further shipments are unlikely. Manifestly, establishment of a commodity rate or an exception to usual classification for an l. c. l. movement under such circumstances would not be justified. Thomas Traffic Co. v. P. E. Ry., 123 I. C. C. 535.

(y) Complainant sought rates on shipments of iron and steel articles, applicable on "scraps and pieces of iron and steel which have value solely for remelting purposes" upon contention that articles had no commercial value; there was no demand for them in their original form, and they were actually remelted. HELD: To come within description contended for, articles must be reduced to

fragments, scraps or pieces so as to render them useless for any purpose other than remelting, for it is the nature of articles shipped, not price at which it is sold, use to which it is put, or commercial demand, that determines whether rate on scrap iron and steel applies. See 98 I. C. C. 551 and other cited cases. Here evidence indicated that articles were transported in their original form, and were described individually in bills of lading. Charges collected on that basis were therefore applicable, not unreasonable or otherwise unlawful. Hyman-Michaels Co. v. N. & W., 126 I. C. C. 195.

(z) Charges on returned empty containers are not and never have been based upon the cost of service. National Asso. Ice Cream Mfrs. v. Express Co., 128 I. C. C. 143, 145.

(aa) Joint rate on secondhand dredging machinery from Iron Mountain, Mont., to Baker, Oreg., found not unreasonable as compared with lower rate previously in effect from Montana points to Portland, Spokane, and Seattle, nor with lower rate on secondhand sugar-making machinery from Sunnyside and Yakima, Wash., to Chinook, Mont. Lower rates were established to take care of specific movements, and were merely paper rates as no other traffic moved thereunder. Class A rate is the normal and reasonable rate for sporadic movements of this character, whereas rate charged was but a percentage of the Class A basis. Sweet Bros. v. N. P., 128 I. C. C. 543.

§6. Company Material.

See Advanced Rates §9½; Discrimination §6.

(a) Shipment of wrought-iron scrap from Etowah, Tenn., to Cleves, Ohio, purchased under contract f. o. b. Cincinnati, from L. & N. R. R., then under Federal control and sold by complainant, f. o. b. Cleves, was assessed the rate Etowah to Cleves. FOUND: As material was purchased from railroad administration on price basis delivered at Cincinnati, charges collected in excess of that named in effective tariff for transportation from Cincinnati to Cleves were assessed in violation of section 6 (7) of the act. Reparation awarded. Hyman-Michaels Co. v. Director General, 128 I. C. C. 689.

§6½. To Encourage Markets or Meet Competition.

See Market Competition.

(a) Respondents proposed to reduce to 90c the all rail rate on canned goods, including fruits, vegetables, milk and fish, carloads, minimum 60,000 pounds, from Pacific coast points to eastern defined territories, Groups B to J inclusive, Group N and portions of Group M. Present rate is $1.05 to whole of eastern defined territories, Groups A to N, except Colorado common points, to which it is 98c. Certain of the figures are estimates and others are drawn from different sources, but there seems to be no doubt that the all rail lines have not kept pace with the intercoastal lines. Nevertheless, it is not altogether clear, contrary to what respondents would have the Commission believe, that the spread between the transcontinental and intercoastal rates is wholly responsible. Consideration of the record leads to the belief that at the present rate of $1.05 the transcontinental carriers are laboring under a disadvantage in competing with the intercoastal lines for the traffic in Pacific coast canned goods, but it indicates also that the proposed rate is lower than necessary to meet the competition in a reasonable degree. HELD, suspended schedules not justified, without prejudice to the filing of a rate of 98c. Canned goods from Pacific coast, 132 I. C. C. 520.

§6½a. Restricted Routes.

See Restricted Rates.

(a) Proposal to reduce rates on grain and products from points in Nebraska, Iowa, Illinois, Missouri, Kansas, Oklahoma, and Arkansas to Louisiana, routed through Arkansas, and to restrict routing so that such reduced rates will not apply over routes through Texas, found not justified. In 104 I. C. C. 272, commission found such restriction of routing not justified by transportation conditions and that resulting disadvantages to Texas mills would be unlawful in violation of section 3 of the act. No evidence has been submitted in present record to warrant a different conclusion. Grain and Products to Louisiana, 113 I. C. C. 259.

III. TARIFFS AND CONSTRUCTION.

See Tariffs.

§7. In General.

(a) Scrap steel rails from Detroit to

Kenosha, Wis., purchased "f. o. b. Chicago" moved under through bills of lading at joint rates. Upon complaint alleging overcharges due to failure of director general to refund charges down to basis of lowest published rate from Chicago to Kenosha, upon theory that movements from Detroit to f. o. b. point was separate and distinct from those beyond. HELD: Complainant would have been entitled to lowest rate from Chicago to Kenosha had shipments originated at Chicago or had billing indicated that rails were "company material" entitled to free transportation to that point. However, shipments originated at Detroit, moved on through bills of lading correctly describing commodity without indicating that it was company material. Moreover, through movements were intended by consignor and nothing indicates that movement to Chicago was to be a nonrevenue haul or that transportation should begin there. Claim arises out of terms of contract of sale Oshkosh. The shipments to Grand tion. Joint rate assessed found applicable. Briggs & Turivas v. Director General, 112 I. C. C. 313.

(b) Fifth-class rate was assessed on secondhand wire rope. Contemporaneously a lower rate applied on "junk, consisting of * * * Old Rope." Upon contention that rope shipped was of more value than ordinary junk; was intended to be used further; and that rate assessed was therefore applicable, HELD: Item covered old rope without restriction. It apparently was not contemplated that articles included in the item could not be put to further use as such articles as old tierces and barrels are listed. If carriers intended to limit application of rates they should have done so by proper tariff provision. Moreover, in 88 I. C. C. 217 it was held that old rails were entitled to rate under heading "Scrap Iron and Scrap Steel," although they were to be further used. Reparation awarded. Zimmerman-Wells-Brown Co. v. Director General, 122 I. C. C. 199.

CROSS REFERENCES

See Allowances §8 (3⅛); Cars and Car Supply §9⅝, §9⅞ (3); Precooling; Perishable Freight; Protective Service; Top Icing.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. Jurisdiction Of Commission.

See Interstate Commerce Commission I; Jurisdiction of Commission.

(a) Refrigerator cars in which vegetables and fruits are shipped are largely owned by private corporations. However, rail carriers own the stock in these companies and control their policy. Commission's control over these cars is through rules and regulations of carriers hauling them. Protective Service Rules on Perishable Freight, 104 I. C. C. 79.

§1½. Private Refrigerator Lines.

(a) Refrigerator car companies are not common carriers subject to the interstate commerce act. Refrigeration Charges on Vegetables, 120 I. C. C. 555, 557.

(b) Defendants question jurisdiction of the Commission to consider the reasonableness of the refrigeration charges assailed, to prescribe reasonable charges for the future, or to award reparation on the ground that the charges applies in part to transportation without the ter-

ritorial boundaries of the United States. In numerous cases the Commission has considered joint rates between Canada and the United States, found them unreasonable, and awarded reparation against the United States lines defendant for the full amount of the damages sustained. Simpson v. G. T. W. Ry., 129 I. C. C. 430, 431.

II. DUTY TO FURNISH.

§2. In General.

(a) Carriers are required to furnish refrigeration service to shippers at a reasonable cost. Doughty v. A. C. L., 123 I. C. C. 522, 524.

§3. Incidental Services and Charges.

See Additional Charges and Services; Special Rates and Services; Switch Tracks and Switching §5; Transportation.

(a) Freight charges assessed by rail carriers for hauling ice in bunkers of express refrigerator cars from an ice plant to point of loading perishable produce for express shipment, found properly collected and not unlawful. Complainant contended that since it did not make out or authorize bills of lading charges were illegally assessed; that carriers' tariff does not provide similar charge for ice in bunkers antecedent to movement of perishable produce by freight; and that charges were therefore unduly prejudicial to express shippers. However, carriers' failure to publish special rates for ice in bunkers can not impair the validity of customary rates which are published to apply on ice moving in any equipment. Moreover, fact that rules governing express refrigeration are not so favorable as freight-service rules does not constitute undue prejudice in view of difference in service afforded. Allen & Co. v. B., C. & A., 122 I. C. C. 351.

§3½. Icing and Re-icing.

See Top Icing.

(a) Charge of $50 per car for icing shipments of grapes moving from points in Canada to Boston, found not unreasonable. No evidence was introduced tending to show that charge was unreasonable, complainant's case being based solely upon assumption that cars needed only a few dollars' worth of ice upon arrival at icing point. Consignors however were at fault in indicating on bills of lading that cars were to be iced in transit to full capacity at all regular icing stations. Had they noted instead that cars were not to be re-iced the applicable charges would have amounted to but $10 per car. Kingman Co. v. C. V. Ry., 104 I. C. C. 445.

(b) Rule in exceptions to official classification provided for absorption by carriers of icing and re-icing charges. Territorial application of this rule was restricted to points on lines of originating and issuing carriers for which tariff is published, the Wabash being only carrier so named. Upon contention that under the rule charges for icing in transit of shipments of dressed poultry were in excess of published tariff rates. HELD: Restriction of above rule is clear. Individual tariffs of carriers performing icing service provided for separate charges for icing and there is general provision in exceptions to official classification for application of tariffs of individual carriers in respect of miscellaneous charges, including icing. Charges, with exception of those assessed by Wabash, found applicable. Charges by Wabash found inapplicable and reparation awarded. Schweitzer Co. v. Director General, 109 I. C. C. 663.

(c) Upon contention that assessment of commodity rates on top-ice in lettuce crates was unjustly discriminatory and unduly prejudicial to shippers of vegetables and unduly preferential of shippers of packing-house products, fresh meats, and analogous commodities, in that tariffs provide for free transportation of ice and salt for preservation of latter commodities, HELD: Vegetables are not sold in competition with fresh meats and fish and transportation conditions surrounding the two are dissimilar. Moreover, mere showing that a practice exists with respect to transportation of ice with shipments of certain commodities which differs from that applicable to transportation of ice with lettuce, is not sufficient to establish unjust discrimination or undue prejudice. Hulsey-Bessent Co. v. D. & R. G. W., 118 I. C. C. 707, 709.

(d) Proposed increased refrigeration charges on vegetables, except cabbages and tomatoes, from points in Louisiana and Mississippi to destinations in all other States and in Canada, found not justified. Carriers submitted evidence and data on cost and quantity of ice in bunkers cost of hauling ice in bunkers, cost of repairing and maintaining refrigeration devices, cost of switching to

and from icing stations, and cost of supervision. While cost may exceed the aggregate charge, the cost studies submitted by carriers do not prove that fact, contain many infirmities, and are not persuasive. Refrigeration Charges on Vegetables, 120 I. C. C. 555.

(e) Complainant alleged that reicing charges on an interstate carload shipment of oranges at Potomac Yard, Va., were unjust and unreasonable, and that rule 225 of Dearborn's tariff I. C. C. 1 is unjust and unreasonable. Shipment moved from Nacatee, Fla., March 25, 1925 destined to Waycross, Ga. On the same day it was diverted to Potomac Yard. After its arrival there, the shipment was diverted on April 2, 1925 to Rochester, N. Y. The original bills of lading bore notations "under full refrigeration" and "reice at all regular stations." For reicing the car at Potomac Yard defendants assessed a charge of $4.05. The fact relied upon by complainant namely, the bunker capacity of the car as stated in the tariffs, does not alter the fact that the car was delivered at Potomac Yard with the requirement amount of ice and the further fact that 1,800 pounds were furnished at that point. The erroneous statement in the tariff, however, should be corrected immediately. Complainant further contends that rule 225 should provide that cars arriving at regular reicing stations will be reiced immediately on arrival at carriers expense, even though bunkers are three-fourths or more full of ice. The record is insufficient to warrant any change in this tariff rule upon the ground of unreasonableness. HELD, charge assessed applicable, complaint dismissed. Chase & Co. v. C. H. & N. Ry., 122 I. C. C. 383.

(f) Freight charges assessed by rail carriers for hauling ice in bunkers of express refrigerator cars from an ice plant to point of loading perishable produce for express shipment, found properly collected and not unlawful. Complainant contended that since it did not make out or authorize bills of lading charges were illegally assessed; that carriers' tariffs do not provide similar charge for ice in bunkers antecedent to movement of perishable produce by freight; and that charges were therefore unduly prejudicial to express shippers. However, carriers' failure to publish special rates for ice in bunkers can not impair the validity of customary rates which are published to apply on ice moving in any equipment. Moreover, fact that rules governing express refrigeration are not so favorable as freight-service rules does not constitute undue prejudice in view of difference in service afforded. Allen & Co. v. B. C. & A., 122 I. C. C. 351.

(g) Complainant contended that express company failed or refused to furnish information to shippers relative to icing and re-icing charges on express shipments, and showed in certain cases that expense bills rendered at destination were not properly itemized. HELD: While consignee is entitled to this information as a matter of right, there is no provision of law which obliges the express company to furnish it to a party other than the one paying express charges. Allen & Co. v. B., C. & A., 122 I. C. C. 351, 358.

(h) Re-icing charges assessed at Potomac Yard, Va., on vegetables from Wilmington and Rocky Point, N. C., consigned to Potomac Yard and diverted to Philadelphia, found applicable and not unreasonable. Tariff rule provided for re-icing when cars were stopped on shipper's orders at intermediate points between origin and destination, or while held at original or diverted destination and later forwarded. Here no diversion orders were received until after shipments arrived at Potomac Yard, and cars were re-iced in accordance with tariff regulations. While in instant case shipments moved on regular schedule often cars require re-icing before forwarding instructions are received, and it is not unreasonable to make an additional charge for such service. Moreover, assessment of charges could have been avoided had shipments been billed to final destination or diversion orders furnished prior to arrival of shipments at Potomac Yard. Doughty v. A. C. L., 123 I. C. C. 522.

III. REASONABLENESS OF CHARGES.

§4. In General.

See Commodity Rates §2½ (i); Reasonableness of Rates.

(a) Icing and Re-icing: Charge of $50 per car for icing shipment of grapes moving from points in Canada to Boston found not unreasonable. No evidence was introduced tending to show that charge was unreasonable, complainant's

case being based solely upon assumption that cars needed only a few dollar's worth of ice upon arrival at icing point. Consignors, however, were at fault in indicating on bills of lading that cars were to be iced in transit to full capacity at all regular icing stations. Had they noted instead that cars were not to be re-iced the applicable charges would have amounted to but $10 per car. Kingman Co. v. C. V. Ry., 104 I. C. C. 445.

(b) Stated refrigeration charges on melons from Maricopa County, Ariz., to Texas common points, Denver, and points east thereof, found not unreasonable but unduly prejudicial to extent they exceed contemporaneous stated refrigeration charges from points in Bakerfield district in California to same destinations by more than $10 per car. Maricopa County Farm Bureau v. A. & S., 109 I. C. C. 472.

(c) Cost of supervision, cost of ice, cost of transporting ice, repairs to bunkers, and cost of switching at re-icing stations are all items of expense that may properly be considered in determining cost of performing a refrigeration service, 56 I. C. C. 449, 527, to which should also be added a certain element of risk which the carrier must assume in rendering the service, 20 I. C. C. 106, and a fair profit upon the transaction, 214 U. S. 299. Maricopa County Farm Bureau v. A. & S., 109 I. C. C. 472, 474, 475.

(d) Tariff rules covering icing charges provided that such charges would be in addition to freight charges, but individual tariff of carrier performing icing service provided that such charges would be borne by carrier. Following 77 I. C. C. 678, wherein commission found that where a tariff contains conflicting provisions the one according lowest rates or charges shall govern, charges assessed for icing in transit of shipments of dressed poultry from Chicago to New York found inapplicable and illegal. Reparation awarded. Schweitzer Co. v. Director General, 109 I. C. C. 663, 665, 666.

(e) Complainant attacked refrigeration charges on spinach, carloads, from Texas to eastern destinations as unreasonable for the standard refrigeration service rendered, and to the extent they exceed charges which would accrue under a modified cost of ice basis particularly during the winter season, Dec. 15 to March 15 inclusive. Destinations are in Trunk line territory. Stated refrigeration charges are $95 to New York, Jersey City and Philadelphia, $100 to Boston, and $90 to the other destinations. It does not appear that the service required on this traffic under a modified cost of ice basis during any season of the year would be substantially less than that required under standard refrigeration. HELD: charges attacked not unreasonable, complaint dismissed. Miller v. I. G. N. Ry., 112 I. C. C. 538.

(f) Refrigeration charges on spinach from certain Texas points to eastern destinations found not unreasonable. Carriers offered evidence tending to show that charges assailed were not in excess of cost of the service plus a reasonable profit, the method used in such cost studies being the same as those described in 20 I. C. C. 106 and 56 I. C. C. 452. Moreover, icing under standard refrigeration is performed at numerous points along the route, and cost is affected more by number of icings than by aggregate amount of ice furnished. Nor does it appear that service required on this traffic under a modified cost-of-ice basis during any season of the year would be substantially less than that required under standard refrigeration. Miller v. I. & G. N., 112 I. C. C. 538.

(g) Expense for refrigeration, for special terminal service for reconsignment and for inspection should not be covered by line haul rates. Gugenheim Goldsmith Co. v. G. H. & S. A. Ry., 113 I. C. C. 459, 462.

(h) Complainant attacked refrigeration charges on three cars of peaches shipped in Oct., 1924, from Burt and Lockport, N. Y., to Grand Rapids, Mich., and Oshkosh, Wis., as unreasonable and unjustly discriminatory. Two shipments originated at Lockport and one at Burt, and all were originally consigned to Cleveland, O., under standard refrigeration. After arrival at Cleveland each car was reiced and afterwards reconsigned to Chicago, Ill. After arrival there each car was re-iced and later again reconsigned, two to Grand Rapids and one to of defendant's line from Chicago to des- Rapids were back hauled over a portion tination. Defendant collected $4 per ton for the ice furnished while cars were held for reconsignment orders, and stated refrigeration charges per car of $60 to Oshkosh and $45 from Chicago to Grand Rapids. The applicable stated refrigeration charges per car were: From points of origin to Cleveland, $50; Chicago, $60; Grand Rapids, $55; Oshkosh,

$65. Chicago to Grand Rapids, $45 per car. HELD: The present record is meager and affords no basis for finding that the applicable charges were unreasonable or otherwise unlawful, complaint dismissed. Graham v. N. Y. C. R. R., 115 I. C. C. 325.

(i) Proposed charges for use of refrigerator cars in Southeastern States, for transportation of fruits, vegetables, and other perishable freight, l. c. l., covered by one bill of lading, from one consignor to one consignee at one destination, minimum weight 12,000 pounds, any deficit in weight to be charged for on basis of highest-rated article in shipment, found justified. Present rates for handling of l. c. l. shipments of perishable products have been in effect for many years and do not contemplate transportation in refrigerator equipment. The use of refrigerator equipment for such traffic constitutes a new service, the charges for which carriers have justified. Charges on Refrigerator Equipment, 115 I. C. C. 198.

(j) Where a tariff rule providing for assessment of stated refrigeration charges is silent with respect to question of back hauls, such rule is subject to same interpretation to which the commission would resort in the case of a rate from and to certain points which is not restricted as to routing. In such cases commission's repeated ruling has been that although all carriers participating in movement are parties to tariffs the through rates will not apply where there has been a back haul. Graham v. N. Y. C., 115 I. C. C. 325.

(k) Respondents proposed to increase refrigeration charges on carload shipments of vegetables, other than cabbage and tomatoes, from Mississippi and Louisiana to destinations in all other states and Canada. Present charges for refrigeration of vegetables, except as modified in 98 I. C. C. 55, followed 56 I. C. C. 449. They are so-called stated refrigeration charges under which the carriers undertake for a specified amount per car to provide complete refrigeration service from point of origin to groups of destination. The proposed schedules would effect increases of $10 per car from all points in Mississippi, $5 per car from Louisiana groups A and B, and $10 per car from Louisiana group C. If the suspended schedules become effective tomatoes and cabbages will take the same refrigeration charges from Louisiana as other vegetables and from Mississippi $10 per car less than other vegetables. The cost of ice is the largest single item entering into the cost of the refrigeration service here considered. There appears to be no doubt that an average of slightly more than 9,000 pounds of ice was placed in the bunkers of the cars used for test purposes. But it does not follow that 9,000 pounds may properly be used as one of the bases upon which to calculate the cost of service under service conditions as distinguished from test conditions. No evidence of the out of pocket cost of hauling the ice was submitted by respondents. They have not justified their estimates of average ice haulage cost. Inasmuch as numerous witnesses agreed that the principal cost of repairs to bunkers was the general deterioration caused by the carriage and melting of ice, rather than by the dropping of the ice onto the grates, it seems obvious that the same fixed cost may not fairly be used as a factor in hauls of widely varying lengths. Respondents have fairly well supported the use of a figure of 35 cents for cost of switching to and from icing stations. Respondents have elected to rest their justification of the proposed increased refrigeration charges upon a showing that the present charges are less than the sum of the cost elements considered. That showing is not persuasive. The cost may exceed the aggregate charge but they have not proved it, and suspended schedules not justified. Refrigeration Charges on Vegetables, 120 I. C. C. 555.

(l) Proposed increased refrigeration charges on vegetables, except cabbages and tomatoes, from points in Louisiana and Mississippi to destinations in all other States and in Canada, found not justified. Carriers submitted evidence and data on cost and quantity of ice in bunkers, cost of hauling ice in bunkers, cost of repairing and maintaining refrigeration devices, cost of switching to and from icing stations, and cost of supervision. While cost may exceed the aggregate charge, the cost studies submitted by carriers do not prove that fact, contain many infirmities, and are not persuasive. Refrigeration Charges on Vegetables, 120 I. C. C. 555.

(m) Shippers in protesting proposed increases in refrigeration charges on vegetables conceded that much of the distress in the industry is direct result of labor, climatic, and market conditions for which carriers can not be held re-

sponsible, but insist that just such conditions as these fall peculiarly within the purview of the Hoch-Smith resolution. HELD, that whatever condition of the vegetable-growing industry, there is no warrant in law for requiring carriers to furnish refrigeration service at charges which are less than compensatory. Refrigeration Charges on Vegetables, 120 I. C. C. 555, 560, 561.

(n) The burden of justifying proposed increased refrigeration charges rests upon carriers. Refrigeration Charges on Vegetables, 120 I. C. C. 555, 562.

(o) Where tariff provided carload rates for strawberries shipped in refrigerated cars, shipper paying carload rate transportation, though not loading car to maximum, must pay flat rate icing charges thereon. Allen v. New York, P. & N. R. Co., 15 Fed. (2d) 532.

(p) Complainant alleged that the refrigeration charges exacted on 22 cars of tomatoes from Port Huron, Mich., originating at points in Mississippi, to Toronto and Montreal, Can., were unreasonable. At Port Huron they were placed under refrigeration for the purpose of checking the ripening process and to prevent deterioration. Refrigeration charges of $55 and $65 per car to Toronto and Montreal, respectively, were collected. HELD, charges assailed not unreasonable, complaint dismissed. Simpson Co. v. G. T. W. Ry., 129 I. C. C. 430.

(q) Complainant alleged that the rate applicable on two cars of watermelons shipped from Stanton and Williston, Fla., to Sacramento, Calif., on May 15, and 29, 1922 was unreasonable. Class C of $2 was applicable. On Jan. 1, 1922 prior to the movement the carriers made a country wide reduction of 10% in the class and commodity rates applicable on farm products, including watermelons. Through error the supplement to the tariff publishing the rate assailed contained a clause limiting the reduction to distance class rates and through commodity rates. On June 1, 1922 subsequent to the movement, the clause was eliminated and the class C rate applicable on watermelons became $1.80. HELD, rate assailed was unreasonable to extent it exceeded $1.80, undercharges waived, complaint dismissed. Shafton Co. v. S. P. Co., 132 I. C. C. 715.

(r) Refrigeration charges on tomatoes from Port Huron, Mich originating at Mississippi points, to Toronto and Montreal, Canada, found not unreasonable. Port Huron is the nearest point to destination in a group designated in refrigeration tariff as Group B, which embraces all points in southern peninsula of Michigan. Complainant's contention that because their shipments moved to Port Huron under ventilation they should receive special consideration in the form of lower refrigeration charge, not sustained. Refrigeration could have been had from any point in above group, but complainant elected to take service only from Port Huron, and if they did not desire full refrigeration from that point they had option of moving shipments at actual cost of ice plus charge of $7.50 per car. Moreover, in 56 I. C. C. 449, commission approved present grouping, and record here does not justify disturbing adjustment there authorized. Simpson Co. v. G. T. W., 129 I. C. C. 430.

(s) Refrigeration charges on beets and carrots with "clipped tops" in straight or mixed carloads, from points in lower Rio Grande Valley of Texas to destinations east of Mississippi River and north of Ohio River, found not unreasonable, discriminatory, nor unduly prejudicial as compared with charges on fruits and vegetables from same and various other points. Evidence including carrier's cost study, analyzed in Appendix 2 of record, does not warrant a disturbance of charges. Carfiel & Morris v. N. Y. C., 129 I. C. C. 658, 663, 667.

IV. TARIFFS AND PUBLICATION.

See Tariffs.

§4¾. In General.

(a) Complainant's order for refrigerator cars stated "Shipments to move under full tank refrigeration," no other instructions being given. Car furnished was iced for loading and was forwarded under standard refrigeration, being reiced at four points en route. Contention that because no instructions were given other than to furnish a car iced for loading, shipment should have started with bunkers loaded and moved without further icing en route, not sustained, the applicable tariff providing that when shipments are received from shipper without instructions as to character of service desired, shipments would be handled under full tank refrigeration. Johnston v. A. C. L., 118 I. C. C. 1.

(b) Shipper ordered a half-tank refrigerator car but on date order was placed no car of this type was available. Carrier furnished a full-tank car which was accepted, loaded, and forwarded, bills of lading bearing notation "Full tanks ice." HELD: Under applicable tariffs and circumstances of this case shipper had option of either accepting the full-tank car, or waiting until a car of type ordered became available, but having elected to follow former course, the published tariff charge covering full-tank refrigeration assessed was applicable. Moreover, record fails to establish that carrier received reasonable advance notice, to which it was entitled under its tariffs, of type of car desired. Chase & Co. v. A. C. L., 118 I. C. C. 289.

§6. Construction in General.

(a) Tariff rules covering icing charges provided that such charges would be in addition to freight charges, but individual tariff of carrier performing icing service provided that such charges would be borne by carrier. Following 77 I. C. C. 678, wherein commission found that where a tariff contains conflicting provisions the one according lowest rates or charges shall govern, charges assessed for icing in transit of shipments of dressed poultry from Chicago to New York found inapplicable and illegal. Reparation awarded. Schweitzer Co. v. Director General, 109 I. C. C. 663, 665, 666.

(b) Complainant alleged that by reason of erroneous classification and refrigeration charges assessed on cars of cantaloupes, made prior to June 20, 1923, from Heber, Calif., to interstate destinations in United States and Canada, were unjust, unreasonable, discriminatory and unlawful. Perishable Protective tariff carries in item 1130 a list of perishable commodities. Over the list appears the following: "Perishable commodities are articles which are susceptible to deterioration or decay, and/or which may be protected by refrigeration, icing, ventilation or against cold, including." The list includes both cantaloupes and melons. HELD: classification of cantaloupes as melons was not in error and charges attacked not unlawful. HELD: complaint dismissed. Brown v. C. R. I. & P. Ry., 112 I. C. C. 545.

(c) Shipment was routed for Erie delivery in New York City without any particular point being specified. Upon arrival at Croxton, N. J., the point at which such shipments destined to New York are held, consignee was notified and car ordered to Duane Street, New York. Due to congestion at that station, carrier requested and consignee acquiesced in elimination of shipment from its order. Car remained on hand and subsequently an order for Duane Street delivery was received and executed. Demurrage and extra refrigeration charges for the hold period during which shipment awaited disposition orders found applicable under tariffs providing for their assessment under above circumstances. Northwestern Fruit Exchange v. E. R. R., 112 I. C. C. 29.

(d) On plums originally billed from Sanborn, N. Y., to Lockport, N. Y., instructions were given carrier to initially ice only. Upon arrival car was reconsigned to Philadelphia with instructions to furnish full standard refrigeration. Separate refrigeration charges were assessed for the two movements. Upon contention that proper charges were for standard refrigeration for the entire movement, which shipper would have been entitled to had request therefor been originally made, FOUND: As there was no such request, shipper entered into separate contracts for refrigeration services in connection with the two movements, and tariff rules did not provide for cancellation of charges for original movement and application of standard charges from original origin point to ultimate destination, the charges collected were applicable and not unreasonable. Rinelli v. N. Y. C., 112 I. C. C. 111.

(e) Tariff item carried a list of perishable commodities in which was included both cantaloupes and melon. Another item showed tables of perishable commodities, one column being cluded both cantaloupes and melons. headed "Melons, all kinds." By supplement the first item was amended, in so far as it applied to cantaloupes, by a note making reference to item "Melons, all kinds," the latter being subsequently amended by listing the varieties of of melons, cantaloupes being named separately. HELD: There being no evidence that prior to filing of this complaint any question was raised as to application of charges on basis of those provided for "Melons, all kinds," the classification of cantaloupes as melons was not in error and refrigeration charges assessed accordingly on ship-

ments moving from Heber, Calif., to interstate destinations and to Canadian points were not unlawful. Brown v. C., R. I. & P., 112 I. C. C. 545.

(f) The refrigeration tariff is subject to the same interpretation to which the commission would resort in a case of a rate from and to certain points which is not restricted as to routing. In such cases the commission has repeatedly found that although all the carriers participating in the movement are parties to the tariffs the through rates will not apply where there has been a back haul. Graham v. N. Y. C. R. R., 115 I. C. C. 325, 326.

(g) Complainant alleged that by reason of defendant's error proper refrigeration instructions were not given on a car of cucumbers shipped July 2, 1924, from Mount Olive, N. C., to Chicago, Ill., with the result that he paid refrigeration charges in the amount of $80 in violation of sections 1 and 7 of the act. On July 1, 1924, agent of complainant placed an order with defendants' agent at Mount Olive for five refrigerator cars for loading "shipments to move under full tank refrigeration." N. P. car 93648 containing 10,600 pounds of ice was one of the cars so placed. The car was loaded with cucumbers and consigned to Chicago. No further instructions were given as to icing and the car was forwarded under standard refrigeration, and was re-iced at four points enroute to Chicago. The proper tariff charge of $80 was assessed. The reasonableness of this charge is not assailed. Complainant contends that the shipment was improperly forwarded under refrigeration because no instructions were given other than to furnish a car iced for loading. Complainant intended that the car should start with the bunkers loaded with ice and move without further icing en route. Tariff provided that when shipments were received from the shipper without instructions as to the character of service desired but with ice in tanks or bunkers of car the shipment would be handled under refrigeration. HELD: Applicable charges not unreasonable, complaint dismissed. Johnston v. A. C. L. R. R., 118 I. C. C. 1.

(h) Where a tariff rule providing for assessment of stated refrigeration charges is silent with respect to question of back hauls, such rule is subject to same interpretation to which the commission would resort in case of a rate from and to certain points which is not restricted as to routing. In such cases commission's repeated ruling has been that although all carriers participating in movement are parties to tariffs the through rates will not apply where there has been a back haul. Graham v. N. Y. C., 115 I. C. C. 325.

(i) Complainant alleged that the refrigeration charges on several hundred cars of cantaloupes shipped between March 1, 1920 and June 20, 1923 from Arizona and California to destinations in United States and Canada were inapplicable in violation of section 6. Complainants rest their case that cantaloupes are not melons within the meaning of the tariff, and that the charges are applicable because cantaloupes are "perishable freight n. o. i. b. n. No attack is made against the reasonableness of the refrigeration charges as such. Because cantaloupes and melons sometimes are frequently shown separately in freight tariffs does not establish that cantaloupes are not melons within the meaning of the tariff. Cantaloupes, although frequently referred to by that name, are commercially classified under the term melons and that a cantaloupe would be generally understood to be a kind of melon, and being in fact a variety of muskmelon, it can not reasonably be asserted that they are not melons. HELD, classification of cantaloupes as melons are not in error, and charges attacked not unlawful, complaint dismissed. Di Giorgio Fruit Co. v. A. E. R. R., 128 I. C. C. 31.

§6½. Rules.

(a) Protective tariff rule governing l. c. l. shipments provided that carriers would furnish refrigerator cars when aggregate weight of shipments was not less than 15,000 pounds, with no charge for refrigeration service unless specifically provided for in separate tariffs. Upon contention that shipments of strawberries were l. c. l. shipments entitled to benefits of the rule. FOUND: As each crate was not marked as required by classification to obtain benefit of l. c. l. rate, cars used were ordered for c. l. shipments, shipping orders signed by or for shipper showed minimum weights applicable to c. l. shipments, and bore notations having application only to c. l. traffic under the protective tariff, the stated refrigeration charges applicable thereto were legally assessed. Allen & Co. v. P. R. R., 107 I. C. C. 18.

(b) Proposal to amend rule in perishable protective tariff by excepting free refrigeration service on l. c. l. shipments of fruits and vegetables moving between points in Illinois classification territory, designed for purpose of preventing shippers from billing at existing l. c. l. commodity rates and obtaining transportation and refrigeration service at a lower total charge than would result from shipping under another rule, which provides for l. c. l. refrigeration service at l. c. l. rates, plus stated c. l. refrigeration charge, or, in the case of heavier shipments, than would result from using c. l. rates and stated refrigeration charges, found not justified. While proposed amendment would offset low line-haul rates, resort to charges for special services is not a proper means of maintaining a parity in freight rates. Refrigeration of L. C. L. Perishable Freight, 107 I. C. C. 179.

(c) Rule in exceptions to official classifications provided for absorption by carriers of icing and re-icing charges. Territorial application of this rule was restricted to points on lines of originating and issuing carriers for which tariff is published, the Wabash being only carrier so named. Upon contention that under the rule charges for icing in transit of shipments of dressed poultry were in excess of published tariff rates. HELD: Restriction of above rule is clear. Individual tariffs of carriers performing icing service provided for separate charges for icing, and there is general provision in exceptions to official classification for application of tariffs of individual carriers in respect of miscellaneous charges, including icing. Charges, with exception of those assessed by Wabash, found applicable. Charges by Wabash found inapplicable and reparation awarded. Schweitzer Co. v. Director General, 109 I. C. C. 663.

II. CONSTRUCTION AND APPLICATION.

§1½. In General.

(a) Following Crown Overall Mfg. Co., 100 I. C. C. 471, wherein commission made a distinction between rates on which a declaration of value was required as the released value, which is forbidden under section 20 of the act, and those where declaration required is actual value of shipment, in which underlying principle is that articles covered by different groups of valuations are in fact so different from a transportation standpoint as to constitute in effect different commodities, shipments of sheep and hogs moving from South Omaha, Sioux City, and certain other Iowa points to Kansas City and Wichita, on which charges were collected based upon actual values declared by shippers, found not to have been overcharged. Cudahy Packing Co. v. Director General, 104 I. C. C. 705.

(b) Shipper instructed initial carrier's agent to enter released valuation notation on bill of lading covering shipment of dining-room furniture, but such agent, through error, failed to make the notation, and charges applicable on shipments

not made with a declared or released value were assessed. HELD: When carrier knows that shipper wishes to ship at released rates it is its duty to make necessary entry in bill of lading, and if it does not do so any higher rate collected on shipment is unreasonable. Reparation awarded. Baker & Co. v. C., M. & St. P., 109 I. C. C. 399.

(c) Following Crown Overall Mfg. Co., 100 I. C. C. 471, wherein commission differentiated between rates based on actual value and rates dependent upon declared or released value, and wherein it was found that rates based on actual value were not prohibited by Cummins amendment, complaints alleging solely that commodity rates lower than class rates should have been applied on shipments of granite, the values of which were not shown in the billing, regardless of the value of commodity, because tariff provision restricting application of commodity rates to shipments of a maximum value per 100 pounds was void under Cummins amendment, found to be without merit. Sherger & Sons v. B. & M.. 109 I. C. C. 555.

(d) On l. c. l. shipments of glass lighting bowls, lamp globes and shades, class rates based on actual value were assessed. Contemporaneously there were in effect lower commodity rates based upon released value. Complainant admits that value of commodities shipped exceeded value upon which lower rates were contingent, but claims that restriction as to value, not having been authorized by commission, was void, and that commodity rates were applicable despite that fact. HELD: Following Crown Overall Mfg. Co., 100 I. C. C. 471 class rates were applicable. Thomas Day Co. v. Director General, 112 I. C. C. 749.

(e) Complainant attacked fifth class rates charged on 21 cars of dressed granite from Waterbury, Montpelier, Barre and Northfield, Vt., to Michigan, Ohio and Indiana destinations as unreasonable and inapplicable. No evidence was introduced as to unreasonableness. Shipments consisted of dressed granite, boxed. The commodity rates were subject to the condition that the actual value of the commodity should not exceed $2.25 per 100 pounds, and be so certified by the consignor in the bills of lading. The bills of lading showed the value of the commodity to be in excess of $2.25 per 100 pounds or bore no notation as to value whatever. HELD: Shipments not overcharged, complaints dismissed. Carr v. Director General, 118 I. C. C. 569.

(f) Tariff provided a fifth-class rate on animal hoofs and horns, in packages or in bulk, whereas under certain classification exceptions a lower sixth-class rating was provided on "fertilizer material, consisting of the following articles having value only as a fertilizing ingredient, viz: * * * hoofs or horns." Upon contention that restriction "having value only as a fertilizer ingredient" brings in a monetary consideration, and that since commission did not authorize the restriction as to value, sixth-class rates were applicable, and shipments were therefore overcharged, HELD: The restriction of sixth-class rates to hoofs and horns having value only as a fertilizing ingredient manifestly does not make provision of section 20 (11) of the act applicable and fifth-class rates were legally assessed. Tomkins-Summer Co. v. B. & O., 115 I. C. C. 24.

(g) Charges collected on newsprint paper moving from Sault Ste. Marie, Ontario, Canada, to Dallas, Tex., based on actual-value rates plus switching charge at point of origin, found applicable. Complainant contended for lower released rates via route of movement, or lower combination also based on released rates via a different route, insisting that rates based on released value not having been authorized by commission were void under section 20 of the act. However, in 100 I. C. C. 471, commission held that actual-value rates may fairly be distinguished from released rates, and as value in instant case was not declared and authority for publication of released rates had been duly granted, the applicable rate was the rate assessed. Western Newspaper Union v. Director General, 115 I. C. C. 105.

(h) Following 63 I. C. C. 234, and other cited cases, actual-value rates charged on certain shipments of dressed granite found to have been legally assessed. While lower rates contemporaneously applied they were subject to the condition that actual value of commodity should not exceed a certain amount, and that such fact be so specified by consignor in bills of lading. Here bills of lading either showed the value to be in excess of that upon which lower rate was contingent, or bore no notation as to value whatever. Moreover, carriers may

lawfully distinguish between actual-value rates and released rates, and rates based on actual differences in value, the purpose of which is to determine character of commodity shipped, do not violate the Cummins amendment to section 20 of the act. Carr v. Director General, 118 I. C. C. 569.

(i) Released rates afford shipper a choice of two rates, under the higher of which unlimited carrier's liability attaches and under the lower of which the shipper, in consideration of reduced rate, by fair and reasonable agreement declares or agrees that for purpose of claim in case of loss or damage the value of his shipment is a certain amount, or not in excess of a certain amount. Actual-value rates, on the other hand, are published on commodities upon which ranges in value are so wide that articles covered by different groups of valuations are in fact different commodities. In other words, released rates limit carrier's liability, whereas actual-value rates designates the commodity. Carr v. Director General, 118 I. C. C. 569, 571.

(j) The principle underlying rates based on the actual value of the commodity shipped is that the articles covered by the different groups of valuations are in fact so different as to constitute in effect different commodities. Bourgoin & Co. v. M. & W. R. R. R., 123 I. C. C. 545, 546.

(k) First Cummins amendment, which abolished the system of released rates based on agreed valuations, did not abrogate actual-value rates and such rates were continued in effect even on ordinary livestock. See 265 U. S. 265; 39 I. C. C. 79. Second Cummins amendment provided that provisions of first amendment declaring limitations of liability to be unlawful should not apply to baggage or property, except ordinary livestock, concerning which the commission should authorize or require carriers to maintain released rates. If actual-value rates did not act as limitations upon shipper's right of recovery prior to enactment of second amendment, neither did they operate as limitations after that enactment. Cudahy Packing Co. v. Director General, 126 I. C. C. 674, 675.

(l) There is a clear distinction between rates where a declaration of value is required as a released value, and those where the declaration required is the actual value of the shipment, principle underlying latter rates being that articles covered by the different groups of valuation are in fact so different from a transportation standpoint as to constitute in effect different commodities. In actual-value rates there is no holding forth by carrier of an offer to transport goods of higher values at lower rates in consideration of release by shipper of carrier's liability, and value declared is not given as a measure of carrier's liability, but as a part of necessary description of goods. See 100 I. C. C. 471. Cudahy Packing Co., v. Director General, 126 I. C. C. 674, 675.

(m) Fifth-class rates on granite monuments and pieces of axed, lettered, and rock-faced granite from Barre, Vt., to New Castle and Greensburg, Ind., found not unreasonable or otherwise unlawful as compared with lower commodity rates contemporaneously in effect on granite not carved, lettered, polished or traced; with those on granite "carved, lettered, polished, or traced" when declared value does not exceed $2.25 per 100 pounds; or with lower commodity rates on marble for comparable distances. Here, declared value exceeded $2.25 and in 47 I. C. C. 91, the fifth-class rating on natural stone, sawed more than four sides, chiseled, dressed, hammered, or sand rubbed, carved, lettered, polished, or traced, was found justified. Dillie v. C. V., 128 I. C. C. 641.

(n) On granite monuments and pieces of axed, lettered, and rock-faced granite, bill of lading showed actual value as exceeding $2.25 per 100 pounds and fifth-class rate was assessed. Contemporaneously a lower commodity rate applied on granite "carved, lettered, polished, or traced" when declared value did not exceed $2.25 per 100 pounds. Upon contention that no value in excess of $2.25 rate charged was reasonable, but that complainants could have secured lower rate by proper release, FOUND: Tariff statement that value must be declared in writing by shipper "for purpose of enabling carriers to apply the proper rate," is not clear and is likely to mislead a cautious shipper to belief that rates are based upon actual value. Tariff should, therefore, be amended so as to avoid all ambiguity and should provide for form of release contained in uniform bill of lading as provided in 64 I. C. C. 357. Dillie v. C. V., 128 I. C. C. 641, 642.

(o) In Bloom & Co. v. Director General, 80 I. C. C. 283, division 1 found that the fifth class rates charged for the

haul east of Chicago, Ill., or the Mississippi river on shipments of dressed granite and granite monuments, in carloads, from Barre and South Ryegate, Vt., to Omaha, Neb., and Douglas and Casper, Wyo., were inapplicable, and that the applicable rates were certain commodity rates to which void limitations were attached; also, that the through rate of $17.40 per net ton charged on one car of hammered and chiseled granite from Mount Airy, N. C., to Lander, Wyo., was inapplicable, and that the applicable rate was $16.43 per net ton but that this latter rate was not unreasonable. The commodity rates were not released rates but actual value rates and not mere limitations of liability and that restrictions in connection therewith were not void, but that, with the exception hereinafter stated, it has not been shown that complainants shipments were of a value entitling them to the lower commodity rates, and with that exception, that the fifth class rates were applicable. The purpose of the restriction published in connection with the actual value commodity rates sought by complainant was not to limit the carriers liability, but to designate definitely the commodity shipped. HELD, factors to Chicago not unreasonable, complaint dismissed. Bloom & Co. v. Director General, 132 I. C. C. 127.

§2. Duty to Inform Shipper.

(a) Complainant attacked class rate of 61c charged on a car of granite monument bases shipped June 7, 1922 from Hardwick, Vt., to Lafayette, Ind., as unreasonable and illegal. Fifth class rate charged. Same tariff also carried a commodity rate of 34c on stone or granite, nos blocks, slabs, or pieces, rough quarried, chiseled, dressed, hammered, sawed, or otherwise finished, except carved, lettered, polished or traced, published subject to the limitation that the shipper shall declare in writing that the value of the property did not exceed $2.25c per 100 pounds. The value of the shipment was not declared by the consignor nor is it shown that he declined to declare its value. Complainant insists that where a rate is dependent upon a declared value the duty rests upon the carrier to call that fact to the shippers attention and to secure his signature to a proper bill of lading. This the carriers agent failed to do. HELD, rate attacked unreasonable to extent it exceeded 34c, reparation awarded. Lafayette Granite Co. v. B. & M. R. R., 123 I. C. C. 543.

(b) Whenever a shipment is tendered a carrier upon which its tariffs provide for the application of alternative rates dependent upon the value thereof, the duty rests upon the agent of the carrier to call attention of the shipper to the different rates and secure his signature to a proper bill of lading. Lafayette Granite Co. v. B. & M. R. R., 123 I. C. C. 543, 544.

III. LEGALITY AND CREATION.

See Legality of Rates

§4. In General.

(a) On l. c. l. shipments of glass lighting bowls, lamp globes, and shades, class rates based on actual value were assessed. Contemporaneously there were in effect lower commodity rates based upon released value. Complainant admits that value of commodities shipped exceeded value upon which lower rates were contingent, but claims that restriction as to value, not having been authorized by the commission, was void, and that commodity rates were applicable despite that fact. HELD: Following Crown Overall Mfg. Co., 100 I. C. C. 471, class rates were applicable. Thomas Day Co. v. Director General, 112 I. C. C. 749.

(b) A rate proposal which would make the rate dependent upon the method used in manufacturing the commodity rather than on the nature of the commodity is unlawful. Cotton linters from southwest, 118 I. C. C. 419, 434.

(c) The purpose of maintaining released rates was that the shipper might have a choice of two rates, under the higher of which unlimited carriers liability attaches and under the lower of which the shipper. in consideration of the reduced rate, by fair and reasonable agreement declares and agrees that for the purpose of claim in case of loss or damage the value of his shipment is a certain amount, or not in excess of a certain amount. Actual value rates, on the other hand, are published on commodities on which the ranges in values are so wide that articles covered by the different groups of valuations are in fact different commodities. In other words, released rates limit the carrier's liability, whereas actual value rate designates the commodity. Rates based

on actual differences in value the purpose of which is to determine the character of the commodity shipped, do not violate the so-called Cummins amendment to section 20. Carr v. Director General, 118 I. C. C. 569.

(d) Rates charged on shipments of ordinary livestock which were higher than those applicable if standard or basic rates had been declared by consignor found unlawful and void under the second Cummins amendment to section 20 of the act. The effect of that amendment was to render unlawful and void all attempted limitations of liability for loss, damage, or injury to ordinary livestock transported, whatever the form of attempted limitation. Accordingly, rates here which were based on values declared by shippers and which were not required by tariffs to be actual values were in effect attempted limitations of carrier's liability. See 69 I. C. C. 235 and other cited cases. Reparation awarded. Armour & Co. v. Director General, 120 I. C. C. 587.

(e) Upon contention that assessment of equal rates on rough and dressed granite, is unreasonable, discriminatory, unduly prejudicial to complainant and unduly preferential of competitive shippers of dressed granite, since latter is of greater value than rough granite, HELD: Rate assailed is subject to declaration of value by shipper and complainant's competitors can not lawfully apply that rate on dressed granite if its value exceeds the value fixed by the tariff. Bourgoin & Co. v. M. & W. R., 123 I. C. C. 545.

(f) Carrier may regulate extent of its liability according to different freight rates. Lawrence Leather Co. v. Norton Lilly & Co., 15 Fed. (2d) 101.

(g) Under section 20 (11) of the act, all limitations of liability for actual loss, damage or injury in respect to livestock are prohibited. Bedding Charges for Livestock, 128 I. C. C. 167, 176.

IV. REASONABLENESS.

See Any Quality Rates I (t); Reasonableness of Rates.

§5. In General.

(a) Following Crown Overall Mfg. Co., 100 I. C. C. 471, wherein commission made a distinction between rates on which a declaration of value was required as the released value, which is forbidden under section 20 of the act, and those where declaration required is actual value of shipment, in which the underlying principle is that articles covered by different groups of valuations are in fact so different from a transportation standpoint as to constitute in effect different commodities, shipments of sheep and hogs moving from South Omaha, Sioux City, and certain other Iowa points to Kansas City and Wichita, on which charges were collected based upon actual values declared by shippers, found not to have been overcharged. Cudahy Packing Co. v. Director General, 104 I. C. C. 705.

(b) Upon complaint seeking, establishment of released express rates on gold and silver coin and bullion, paper currency, and securities from, to, and between interstate points. FOUND: If such rates were established it would still be necessary to provide same protective service against loss and theft at present accorded this traffic, because some shipments would be made on basis of full valuation. Moreover, taking into account shipments that would be made at released rates, revenues would be far less than cost of maintaining service, and the handling of money in this manner would tend to lessen care now given by employees to prevent loss of packages through negligence or robbery. N. Y. Federal Reserve Bank v. Am. Rv. Exp. Co., 107 I. C. C. 4, 17.

(c) On l. c. l. shipments of glass lighting bowls, lamp globes, and shades, class rates based on actual value were assessed. Contemporaneously there were in effect lower commodity rates based upon released value. Complainant admits that value of commodities shipped exceeded value upon which lower rates were contingent, but claims that restriction as to value, not having been authorized by commission, was void, and that commodity rates were applicable despite that fact. HELD: Following Crown Overall Mfg. Co., 100 I. C. C. 471, class rates were applicable. Thomas Day Co. v. Director General, 112 I. C. C. 749.

(d) Complainant attacked commodity rate charged on rough granite, carloads, from Groton and Barre, Vt., and Milford, N. H., to Elmwood, Ill., as unreasonable, unjustly discriminatory and unduly prejudicial. Between Oct. 16, 1923 and Nov. 17, 1924, 14 shipments moved. Charged 33.5c. A rate of 34c was applicable between Oct. 16 and Dec. 25, 1923 on stone or granite, nos in blocks, slabs, etc., value not to exceed $2.25 per 100 pounds, to be declared by the shipper in

writing for the purpose of enabling the carrier to apply the proper rate. On and after Dec. 26, 1923 the applicable rate was 33.5c. On granite the value of which exceeds $2.25 per 100 pounds, complainant's competitors can not lawfully avail themselves of the rate accorded complainant on rough granite which does not exceed that value. HELD, rates attacked not unreasonable or otherwise unlawful, complaint dismissed. Bourgoin & Co. v. M. & W. R. R. R., 123 I. C. C. 545.

(e) Fifth-class rate assessed on granite monument bases, found unreasonable to extent it exceeded lower commodity rate contemporaneously in effect and published in same tariff subject to shipper's declaration of value in writing. In conformity with principle announced in 33 I. C. C. 370, 39 I. C. C. 483, duty rested upon carrier's agent to advise complainant of alternative rates and secure his signature to a proper bill of lading. This the agent failed to do. Reparation awarded. Lafayette Granite Co. v. B. & M., 123 I. C. C. 543.

(f) Upon contention that assessment of equal rates on rough and dressed granite, is unreasonable, discriminatory unduly prejudicial to complainant and unduly preferential of competitive shippers of dressed granite, since latter is of greater value than rough granite, HELD: Rate assailed is subject to declaration of value by shipper and complainant's competitors can not lawfully apply that rate on dressed granite, if its value exceeds the value fixed by the tariff. Bourgoin & Co. v. M. & W. R., 123 I. C. C. 545.

(g) Principle underlying rates based on actual value of the commodity is that articles covered by different groups of valuations are in fact so different as to constitute in effect different commodities. See 100 I. C. C. 471. Bourgoin & Co. v. M. & W. R., 123 I. C. C. 545, 546.

(h) Upon complaint seeking same rate on enameled iron bathtubs whether released or unreleased as to value, HELD: Record shows that claims for loss or damage do not amount to more than 2 per cent of the gross revenue for transportation of tubs and that enameled iron bathtubs are sufficiently uniform in value to enable carriers to estimate their liability with reasonable certainty. There is, therefore, no necessity for maintenance of released rates on this commodity. Fisher Supply Co. v. A. & V., 128 I. C. C. 215, 220.

V. LIMITATION OF LIABILITY.

See Loss and Damage §9.

§6. Effect In General.

(a) Following Crown Overall Mfg. Co., 100 I. C. C. 471, wherein commission made a distinction between rates on which a declaration of value was required as released value, which is forbidden under section 20 of the act, and those where declaration required is actual value of shipment, in which the underlying principle is that articles covered by different groups of valuations are in fact so different from a transportation standpoint as to constitute in effect different commodities, shipments of sheep and hogs moving from South Omaha, Sioux City, and certain other Iowa points to Kansas City and Wichita, on which charges were collected based upon actual values declared by shippers, found not to have been overcharged. Cudahy Packing Co. v. Director General, 104 I. C. C. 705.

(b) Rates graded according to actual value do not operate as a limitation upon the shipper's right to recover for actual loss, damage or injury to the property transported, in violation of section 20 of the act, and actual value rates may be fairly distinguished from released rates. Western Newspaper Union v. Director General, 115 I. C. C. 106, 107.

(c) On granite monuments and pieces of axed, lettered, and rock-faced granite, bill of lading showed actual value as exceeding $2.25 per 100 pounds and fifth-class rate was assessed. Contemporaneously a lower commodity rate applied on granite "carved, lettered, polished, or traced" when declared value did not exceed $2.25 per 100 pounds. Upon contention that no value in excess of $2.25 rate charged was reasonable, but that complainants could have secured lower rate by proper release, FOUND: Tariff statement that value must be declared in writing by shipper "for purpose of enabling carriers to apply the proper rate," is not clear and is likely to mislead a cautious shipper to belief that rates are based upon actual value. Tariff should, therefore, be amended so as to avoid all ambiguity and should provide for form of release contained in uniform bill of lading as provided in 64 I. C. C. 357. Dillie v. C. V., 128 I. C. C. 641, 642.

(d) Rates graded according to actual value do not operate as a limitation upon

the shippers right to recover the actual loss, damage, or injury to the property transported, and actual value rates may be fairly distinguished from released rates. Bloom & Co. v. Director General, 132 I. C. C. 127, 128.

I. JURISDICTION OF COMMISSION.

See Interstate Commerce Commission I; Jurisdiction of Commission.

§½. In General.

(a) The commission's jurisdiction is limited to damage awards capable of definite ascertainment, it having no power to award punitive or exemplary damages. Crosby v. St. L.-S. F., 112 I. C. C. 239, 243.

(b) Claims for refund of transportation charges upon a "commercial transaction" or under terms of contract of sale are not subject to commission's jurisdiction, the basis of sale being a thing apart from the transportation. Such claims are for a court of law if refunds can not be voluntarily obtained from carriers. Briggs & Turivas v. Director General, 112 I. C. C. 313, 315.

(c) Carriers objected to introduction of evidence on question of damages contending that claims for reparation are barred under section 16 of the act for the reason that in the original and sup-

plemental decision handed down by commission reparation was denied, and that when a subsequent decision was rendered in which reparation was awarded the statutory two-year period had expired. HELD: A similar contention was raised and overruled in 293 Fed. 639, wherein the court found that it is the filing of a complaint within two years after cause of action accrues that gives commission jurisdiction to award reparation, such jurisdiction continuing until commission has determined whether reparation will be allowed even though more than two years may pass before a decision is rendered and before detailed proofs of the quantum of damages are submitted. South Carolina Cotton Mfrs. Asso. v. C., C. & O., 112 I. C. C. 683, 684.

(d) Claim for reparation on shipments made during period of Federal control, found without commission's jurisdiction because complainant did not specifically pray for reparation as required by section 206 (c) of transportation act of 1920. Original report, 88 I. C. C. 569, affirmed. Hungerford Smith Grape Juice Co. v. A. G. S., 118 I. C. C. 169.

(e) Failure of a complaint to allege a violation of section 6, or that charges were inapplicable, does not affect jurisdiction of commission to determine applicable charges. See 102 I. C. C. 355, 357. Western Bridge & Construction Co. v. St. L.-S. F., 118 I. C. C. 607.

(f) Fact that transportation charges have not been paid by a shipper does not deprive commission of its jurisdiction to pass upon lawfulness of such charges. Western Bridge & Construction Co. v. St. L.-S. F., 118 I. C. C. 607, 608.

(g) The commission has no jurisdiction to award punitive or exemplary authority on intrastate traffic which moved during the guaranty period, to approve after August 31, 1920, an award of reparation made by State damages. See 112 I. C. C. 239. Harden v. Pullman Co., 120 I. C. C. 359, 360.

(h) The commission has jurisdiction March 1 to August 31, 1920, whether such authority was actually exercised during the guaranty period or thereafter. The phrase "prior to September 1, 1920," as used in section 208 (a) of the transportation act, 1920, is not to be construed as prescribing a time limitation within which commission was authorized to act, but as fixing the period as to which its approval was necessary to a reduction in rates whether made during the guaranty period by naming lower rates for future, or accomplished after expiration of the period by way of reparation on shipments which moved during the period. Reparation on Intrastate Traffic, 122 I. C. C. 443.

(i) Subject to certain exceptions, the commission's jurisdiction over intrastate rates terminated with termination of Federal control, February 29, 1920. On that date jurisdiction passed to State authorities, subject to the limitation that no rates should be reduced prior to September 1, 1920, unless approved by commission. The commission, therefore, was and is without power to require rate reductions or award reparation on intrastate shipments moving during the guaranty period and the only order it can lawfully make as to such shipments is one of a permissive character. Accordingly conference ruling of March 13 1922, and previous decisions holding that section 208 (a) of the transportation act 1920, does not authorize commission to award reparation on intrastate shipments which moved during the guaranty period adhered to. Reparation on Intrastate Traffic, 122 I. C. C. 443.

(j) Under Transportation Act 1920, § 206 (c), the Interstate Commerce Commission could not award reparation to shipper of goods from eastern points to San Francisco and Seattle for export, who were required to pay the domestic rate rather than the lower export rate, because they had not complied with regulations promulgated by the carrier for obtaining the lower rate, there being no complaint of the rates, as such, and no finding that the regulations, the object of which was to prevent congestion at ports, were unreasonable, but the general necessity for and propriety of them being conceded, and the Commission being merely of the opinion that the application of the regulations to the particular shipments would work injustice, as they did not contribute to congestion any more than if there had been compliance with the regulations; the published tariffs, of which the regulations are part, being binding on the Commission, unless found to be unreasonable. Mellon, Director General of Railroads, v. Erb, 13 Fed. (2d.) 752.

§1. Necessity of and Primary Action by Commission.

(a) Where reparation is sought on

the basis of an existing published rate being unjust and unreasonable, the fact that it is so unjust and unreasonable must first be passed on and established by Interstate Commerce Commission. Jeanneret v. Chicago, B. & Q. R. Co., 17 Fed. (2d.) 978.

§3. Power to Award Tort Damages.

(a) Upon contention that statement that rates assailed "appear not unduly high" was equivalent to a finding that they were not unreasonable, since word "unreasonable" means too high in ordinary sense, and reparation therefore must have been awarded as a penalty or "smart money" for failure to eliminate from tariffs departures from fourth section, FOUND: Commission has no authority to make an award of reparation in order to penalize carriers, as penalties or fines provided for violation of the act are enforceable in court and accrue to the Government. Reparation may be awarded only when complainants have been damaged either by payment of excessive charges or by undue prejudice or other unlawful discrimination, in which latter case special damage must be proved under decisions of Supreme Court. Hudson Mule Co. v. L. & N., 129 I. C. C. 365, 371.

II. RIGHT TO RECOVER.

§3a. In General.

(a) That carrier has used money, paid in advance, in payment of his own obligations does not defeat claim of shipper for his money back on failure to perform. Hunter v. Lauderdale Cotton Mills, (Ala., 1927) 112 So. 215.

§3½. Extent Of Recovery.

(a) Complainant having paid rates in excess of a maximum reasonable basis, its right to reparation is not affected by the proportion of business it was able to do in comparison with its competitors. Nuckolls Packing Co. v. A. T. & S. F. Ry., 113 I. C. C. 229, 232.

(b) As to reparation, it is unnecessary to trace the transaction beyond the initial step, viz., the payment. Lowe Paper Co. v. C. N. E. R. R., 115 I. C. C. 189, 192.

(c) The question for determination is whether the rates attacked were unreasonable in the past to the extent of affording a basis for reparation. The date on which the complaint was filed is not controlling. Cooperative Oil & Paint Co. v. Director General, 122 I. C. C. 227, 228.

(d) The charging of an excessive and unreasonable freight is ipso facto unlawful. Spiller v. St. Louis & S. F. R. Co., 14 Fed. (2d) 284.

(e) The courts generally hold, that, although loss of profit of an established business may be taken into account in an award of damages where they are susceptible of proof, anticipated profits of a new business are too speculative to form the basis of such an award because of absence of provable data from which to estimate them. See 111 Fed. 96, 97. Carnes v. A., T. & S. F., 129 I. C. C. 341, 348.

(f) Reparation on shipments of sugar from San Francisco and Crockett, Calif., limited to period subsequent to filing of complaint because rates charged were on no higher basis than those found reasonable between same points in 48 I. C. C. 657. See also 113 I. C. C. 454. M'Clintock-Trunkey Co. v. McCormick S. S. Co., 129 I. C. C..591, 606.

§6. Parties Entitled to Recover.

See Infra §19; Association: Parties; Procedure Before Commission V.

(a) Complainant's name did not appear in any shipping record, as consignor, consignee, or otherwise. Informal complaint, however, was filed in its behalf and affidavits were furnished showing that while freight charges were paid in first instance by another party, they were charged back to complainant. FOUND: Fact that complainant is a stranger to transportation record does not bar its recovery of reparation where carrier was duly notified of allegations it was required to meet and of party claiming to be damaged. Kyoleum Co. v. Director General, 104 I. C. C. 1, 3.

(b) Freight charges were prepaid by consignor who executed assignment in favor of complainant. FOUND: Consignor found party damaged by reason of exaction of unreasonable rates but reparation awarded to complainant as assignee. Cairo Syrup Co. v. I. H. B., 104 I. C. C. 487, 489.

(c) Shipments were sold f. o. b. point of origin, purchaser being apprised of rate to destination. It is practice of consignor to reimburse consignee, upon his claim, for freight charges paid in excess

of a certain rate. FOUND: In instances where consignor has paid excess charges, it is the party damaged by collection of unreasonable rates and entitled to reparation in amount of such excess. In instances where consignor has not so reimbursed consignee, damage has been to consignee. Rocbond Co. v. A., T. & S. F., 104 I. C. C. 517, 519.

(d) Complainant, the consignor, filed intervening petition purporting to be on behalf of consignees who paid unreasonable freight charges. Consignor was not definitely authorized to file such petition, and did so without consulting consignees, stating that such authorization was not obtained because it guaranteed rates which consignees were to pay. HELD: Filing of reparation claim on behalf of consignees can not be regarded as having been authorized. Rocbond Co. v. A., T. & S. F., 104 I. C. C. 517, 519, 520.

(e) Reparation for exaction of unreasonable rates awarded complainant who succeeded to all assets and liabilities of consignees who paid unreasonable freight charges. Coulbourn Fruit Co. v. B. & O., 104 I. C. C. 734, 737.

(f) Consignee is party entitled to reparation for exaction of unreasonable rates (1) where consignor prepays freight charges and invoices consignee for such charges and for Pittsburgh-plus price of commodity less amount so prepaid, both stated separately in invoice; (2) where consignor does not prepay freight charges, but invoices consignee for Pittsburgh-plus price less amount of freight charges payable, and consignee pays those charges to carrier; and (3) where consignor does not prepay freight charges but invoices consignee for Pittsburgh-plus price and consignee pays carrier freight charges and deducts them from invoice price in remitting to consignor. See 100 I. C. C. 173. Canton Bridge Co. v. B. & O., 107 I. C. C. 141, 144, 145.

(g) Consignees are not entitled to reparation in cases of exaction of unreasonable rates by carriers where consignor prepays freight charges and invoices said consignees for Pittsburgh-plus price of commodity, but not for freight charges so prepaid. See 100 I. C. C. 173. Canton Bridge Co. v. B. & O., 107 I. C. C. 141, 145.

(h) Complainant purchased shipments on a delivered basis and under terms of contract agreed to stand all freight charges in excess of those accruing at a certain rate. Freight charges were paid by consignee who deducted them from invoice price of goods in settlement with complainant. FOUND: Under the circumstances complainant paid and bore illegal charges herein found to have been collected by carriers and is party entitled to reparation. Bowers & Co. v. Director General, 107 I. C. C. 305, 306, 307.

(i) Under arrangement between consignor and consignee, each shared equally in freight charges and profits on shipments. Freight charges were paid to carrier by consignee who filed informal complaint seeking full amount of reparation, consignors not being mentioned therein. Relationship between parties was first disclosed in formal complaint subsequently filed. FOUND: Consignee, in filing informal complaint, acted as agent for undisclosed parties and while informal proceeding could not inure to benefit of consignors because not made parties until formal complaint was filed which was after expiration of the statutory period, from nature of arrangement it was consignee's duty to protect interests of both itself and consignors. Under circumstances, filing of informal complaint by consignee tolled the statute for consignors. Werner v. Director General, 107 I. C. C. 363, 364, 366.

(j) Charges were paid in part by consignor direct and remainder by consignor's agent for its account and by consignee, who was reimbursed therefor by consignor. HELD: Consignor is only party entitled to reparation. Finding in original report, 81 I. C. C. 169, reversed. Mitsui & Co. v. Director General, 107 I. C. C. 469.

(k) Operating company conducted business for a holding and selling company, for which latter company a receiver was appointed. Shipments were consigned to operating company and charges paid by holding and selling company prior to receivership, and by receiver thereafter. Complaint filed on behalf of receiver. Upon contention that since holding and selling company is not a party to complaint, shipments on which it paid charges prior to receivership are not properly covered by complaint. HELD: Receiver, upon appointment, became entitled to custody and control of all property of holding and selling company, and it became his duty to secure all available assets. Complaint was properly filed on his behalf as receiver for the holding and selling company, and as such

he is entitled to reparation due on all shipments delivered during statutory period. Columbia Steel Co. v. B. & O., 109 I. C. C. 46, 49.

(l) Upon contention that complainants were not damaged in instances where shipments were sold on basis of the Pittsburgh price plus rates from Pittsburgh regardless of where shipments originated, their contracts being adjusted so that amount of freight charges paid did not affect them, HELD: Reasonableness of freight rates paid by a shipper is not controlled by agreements shipper may have with another; the commission being only concerned with who paid and/or bore freight charges as such. Columbia Steel Co. v. B. & O., 109 I. C. C. 46, 49.

(m) Reasonableness of freight rates paid by a shipper is not controlled by agreements shipper may have with another; the commission being only concerned with those who paid and/or bore freight charges as such. Columbia Steel Co. v. B. & O., 109 I. C. C. 46, 49.

(n) Complaint filed on behalf of receiver of complainant firm. Upon objection to testimony of witnesses, on the ground that they were not authorized to represent receiver. HELD: Such authorization is unnecessary. Columbia Steel Co. v. B. & O., 109 I. C. C. 46, 50.

(o) Upon contention that complainant who paid freight charges was not damaged because cost of commodity, under contract between complainant and a State, was based upon a rate higher than that found reasonable. HELD: Complainant was in contractual relation with defendant carriers, and if rate was unreasonable complainant suffered damage when it paid such rate, no further proof of damage being necessary. See Darnell-Taenzer case, 245 U. S. 531. Raleigh Chamber of Commerce v. N. S., 109 I. C. C. 52, 54.

(p) Contention that, because of change in complainant's name, it is not a proper complainant in respect of shipments which moved prior to date of such change, not sustained. An authorized change in name of a corporation does not affect its rights or lessen or add to its obligations. See 141 U. S. 520. Copperweld Steel Co. v. B. & O., 109 I. C. C. 99.

(q) Assignment of claims for reparation against director general due to exaction of unreasonable rates found not void within the meaning and purpose of section 3477 of Revised Statutes of United States, which prohibits assignment of claims against the United States. See 256 U. S. 655; 68 I. C. C. 507. Humphreys v. Director General, 109 I. C. C. 157, 159.

(r) Complainants introduced in evidence a list of shipments which named points of origin and destinations, date on which shipments were made, car numbers, weights, charges alleged to have been paid, and amount of reparation alleged to be due. Such list was checked by representatives of carriers, who also at the hearing identified shipments embraced therein. HELD: Such action on part of carriers amounts to an admission that such shipments as were identified by its check were made. Butters Lbr. Co. v. A. C. L., 109 I. C. C. 224, 225.

(s) Consignor sold shipment on a delivered basis. Complainant (the consignee), who merely acted as agent for consignor, filed both informal and formal complaint. Difference between rate collected from complainant on delivery and rate found applicable was paid by consignor. HELD: That consignor is proper party entitled to reparation. Central Commercial Co. v. A., T. & S. F., 109 I. C. C. 639, 640.

(t) Upon contention that assignment of a claim for reparation against director general was null and void under section 3477 of Revised Statutes of the United States. HELD: Where one corporation takes over assets of another by merger, absorbing corporation may enforce claims of merged corporation against United States and such assignments do not fall within prohibition of the statute cited. See 256 U. S. 655. Schweitzer Co. v. Director General, 109 I. C. C. 663, 664.

(u) It is beyond the jurisdiction of the Commission to allow an offset of undercharges on subsequent shipments against the claims for reparation. It is well settled that reparation claims are assignable. Wertheim Coal & Coke Co. v. L. V. R. R., 112 I. C. C. 513, 515.

(v) Complaint was filed by a corporation which ultimately became bankrupt and reparation statement under Rule V of the Rules of Practice was prepared and submitted by its receivers. Upon contention that commission can not legally award reparation to the corporation, which no longer exists, HELD: It being well settled that reparation

claims are assignable, reparation awarded to receivers, who were vested with full power to take into possession all property and assets of the defunct corporation, including this claim for reparation. Wertheim Coal & Coke Co. v. L. V., 112 I. C. C. 513, 515.

(w) Reparation awarded to successor in interest to one of the parties complainant who made shipments and paid and bore unreasonable charges thereon. Wilgus v. P. R. R., 113 I. C. C. 617, 621.

(x) By bill of sale consignor conveyed to complainant all of its property therein described, including suits and claims, and assets owned by it but not carried on its books at any figure. Reparation for exaction of unreasonable rates on shipments moving during period embraced in bill of sale awarded to complainant as successor in interest of consignor who paid unreasonable freight charges. Armour & Co. v. C., M. & St. P., 115 I. C. C. 68, 75.

(y) Beets were purchased by complainant under contracts made with growers which contained no provision as to freight charges. All freight bills were paid by complainant, but in fixing contract price paid to growers, freight charges, among other costs, were taken into consideration. Relying upon Sloss-Sheffield case, 269 U. S. 217, carriers contended that growers of beets in reality bore freight charges and that the transactions were equivalent to purchases f. o. b. destination. HELD: Under provisions of contracts made with growers before beets were grown, complainant acquired title thereto from the time they began to grow and therefore was under obligation to pay and did pay and bear freight charges, as such, there being no provision to the contrary. Complainant therefore found to be properly entitled to reparation for exaction of unreasonable rates. Continental Sugar Co. v. N. Y. C., 115 I. C. C. 124.

(z) Beets were purchased by complainant under contracts made with growers which contained no provision as to freight charges. All freight bills were paid by complainant, but in fixing contract price paid to growers freight charges, among other costs, were taken into consideration. Relying upon Sloss-Sheffield case, 269 U. S. 217, carriers contended that growers of beets in reality bore freight charges and that the transactions were equivalent to purchases f. o. b. destination. HELD: Under provisions of contracts made with growers before beets were grown, compainant acquired title thereto from the time they began to grow and therefore was under obligation to pay, and did pay, and bear freight charges, as such, there being no provision to the contrary. Complainant therefore found to be properly entitled to reparation for exaction of unreasonable rates. Continental Sugar Co. v. N. Y. C., 115 I. C. C. 124, 125.

(aa) Because complainant deducted freight charges from shippers invoice, carriers question whether complainant can be said to have paid and borne unreasonable freight charges. HELD: It is unnecessary to trace the transaction beyond the initial step; viz, the payment. See 88 I. C. C. 492. Lowe Paper Co. v. C. N. E. Ry., 115 I. C. C. 189, 192.

(bb) Upon contention that no reparation can be awarded complainant because shipments were purchased f. o. b. destination, and while freight charges were paid by complainants in first instance, they were deducted from invoice price of commodity, so that complainants were not damaged, HELD: Similar contention was overruled in 88 I. C. C. 492. Jackson Traffic Bureau v. A. & V., 118 I. C. C. 27, 28.

(cc) Shipments were consigned to predecessor company, and upon complaint seeking reparation for exaction of unreasonable rates, both that company and its successor in interest were named as parties complainant. HELD, that predecessor company paid and bore unreasonable charges but successor in interest is entitled to reparation. Northwestern Leather Co. Trust v. M. & O., 118 I. C. C. 37, 42.

(dd) Complainant contracted to manufacture a commodity for a specific sum of money f. o. b. destination. Contract provided that in event of revision of freight rate prior to time materials were shipped, freight allowance was to be adjusted accordingly. Complainant subsequently filed claim for reparation and four years after date of shipment the buyer authorized complainant to act as its agent. Carrier contended that under circumstances reparation could not be awarded. HELD, neither carrier nor commission had knowledge of sales contract and are therefore not concerned with it. Moreover, the latter must deal with freight charges as such and not as part of the price of a commodity. See

269 U. S. 217. Duluth Boiler Works v. A., T. & S. F., 118 I. C. C. 161, 164.

(ee) The fact that complainants paid the freight charges to the carriers would in itself be sufficient to support an award of reparation under section 1. Mississippi Railroad Commission v. A. & V. Ry., 120 I. C. C. 569, 572.

(ff) Mere change in name of complainant does not affect its right to recover an award of reparation for exaction of unreasonable rates. Seaboard Rice Milling Co. v. A., T. & S. F., 120 I. C. C. 263.

(gg) Informal complaint seasonably filed named Armour & Co., an Illinois corporation, as a party complainant. Formal complaint filed within time required by Rule III (g) of Rules of Practice named additional complainants said to be subsidiaries of Armour & Co. HELD, fact that additional parties were subsidiaries of complainant named in informal complaint did not ipso facto entitle them to bring an action in their own name for damages suffered by the former, and not having filed their claims within time provided by statute they are accordingly barred. Armour & Co. v. Director General, 120 I. C. C. 587.

(hh) In a situation where the portion of a through rate which was unreasonable is easily and certainly ascertainable it is no defense to an award of reparation that the parties who paid and bore the reasonable portion of the through rate are not before commission and that complainants who bore unreasonable portion are without assignments from them. Nelson Fuel Co. v. C. & O., 120 I. C. C. 723, 726.

(ii) Regardless of complainants status as successor to the rights of its subsidiary, the record affirmatively shows that the freight charges on all of these shipments were paid by complainant in the first instance, and under 88 I. C. C. 492, it is not necessary to inquire beyond this point in order to entitle complainant to an award of reparation. Texas Co. v. C. B. & Q. R. R., 122 I. C. C. 109, 112.

(jj) The fact that one corporation had transferred its assets to another before it filed a formal complaint would not, in the absence of a conflicting claim, affect its right to reparation for any damage it suffered because of a violation of the act. North Ontario Packing Co. v. O. W. R. R. & N. Co., 122 I. C. C. 360, 365.

(kk) Although the Omaha Box Co., the real party in interest, was not named as complainant within the period prescribed by law, nevertheless the Commission holds that a sufficient cause of action was set up in the filing of the informal complaint, and the fact that either through mistake of fact or law, the wrong party was named does not act as a bar to the rights of the real party in the same proceeding. American Smelting & Refining Co. v. Director General, 123 I. C. C. 136, 138.

(ll) Reparation awarded to complainants, successors in interest to parties who paid and bore unreasonable freight charges. Jones Construction Co. v. L. & N., 122 I. C. C. 18, 20.

(mm) Amendment to complaint showed that a corporation not a party to the complaint ultimately bore unreasonable freight charges, and, upon its dissolution, complainant succeeded to all its assets and liabilities. HELD: Regardless of complainant's status as successor in interest, where, as here, the record affirmatively shows that freight charges were paid by complainant in the first instance, under decision of commission in 88 I. C. C. 492, it is not necessary to inquire beyond this point in order to entitle complainant to an award of reparation. Texas Co. v. C., B. & Q., 122 I. C. C. 109, 112.

(nn) While informal complaints were pending, all assets of complainant which paid and bore charges were transferred to its successor in interest, and complainant then filed formal complaint. Successor was not made a party complainant until date of oral hearing. Upon contention that as complainant no longer had any interest in reparation when formal complaint was filed, claims on shipments delivered more than two years prior to date successor become a party complainant were barred, HELD: Transfer of assets would not in absence of a conflicting claim affect complainant's right to reparation for damage suffered because of violation of the act. See 93 I. C. C. 547. Fact that successor's claim was not made until more than two years after delivery of shipments is immaterial, as informal complaint was seasonably filed and successor's claim depends upon that filing and transfer of assets and not upon date on which its claim was filed. Reparation awarded. North Ontario Packing Co. v. O. W. R. R. & Nav. Co., 122 I. C. C. 360, 365.

(oo) Reparation awarded to complainants, successors in interest to parties who paid and bore unreasonable freight charges. Northwestern Leather Co. Trust v. M. & O., 122 I. C. C. 517, 519.

(pp) Complainant found to have been damaged due to exaction of unreasonable rates but reparation awarded to its successor in interest. Kohlman Bros. & Sugarman v. L. & N., 123 I. C. C. 56, 58.

(qq) Informal complaint seasonably filed failed to name as a party complainant the real party in interest, such party, however, being named in the formal complaint subsequently filed. HELD: Although such real party was not named within period prescribed by law, a sufficient cause of action was set up in the filing of informal complaint and fact that either through a mistake of fact or law, the wrong party was named does not act as a bar to the rights of real party in same proceeding. See 101 Fed. 171. American Smelting & Refining Co. v. Director General, 123 I. C. C. 136, 138.

(rr) In accordance with Rule III (s) of Rules of Practice, reparation awarded upon a new complaint to complainants and interveners not parties to the proceeding prescribing reasonable rates to basis of which reparation is sought, upon showing of good cause and unusual circumstances. Decker & Sons v. U. P. 123 I. C. C. 621, 622, 623.

(ss) It is not necessary to go beyond the first step in determining whether complainant was entitled to reparation and that the first step was taken by complainant when it paid the freight charges. Walrath & Sherwood Lumber Co. v. C. & N. W. Ry., 126 I. C. C. 97, 102.

(tt) The commission can not attempt to go beyond transportation charges as such to determine equities of parties under sales contracts. Sinclair Crude Oil Co., v. A., T. & S. F., 126 I. C. C. 73, 80.

(uu) Reparation awarded complainants under assignments to them of all rights to reparation from consignors of shipments. Statements describing shipments indicated no other interested shippers, and each assignment gave as consideration $1 and other good and valuable consideration. Assignments were executed and acknowledged by a notary public and from weight of evidence appear to be valid. Sinclair Crude Oil Co. v. A., T. & S. F., 126 I. C. C. 73, 80.

(vv) Upon contention that complainant who paid freight charges was not damaged because all such charges were later charged back to shippers, HELD: In determining an award of reparation it is not necessary for the commission to go beyond the first step, which step was taken by complainant when it paid the freight charges. See 88 I. C. C. 492; 245 U. S. 531. Walrath & Sherwood Lbr. Co. v. C. & N. W., 126 I. C. C. 97, 101, 102.

(ww) Upon further hearing, additional defendant carriers objected to being made parties to amended complaint, contending that in being brought into the case after considerable testimony had been taken they were denied a full hearing in contemplation of law and that no valid order could, therefore, be entered against them, HELD: This contention is without merit since substantially all previous evidence was reintroduced at further hearing, and complainants made it plain that they did not rely upon original record as to such carriers. Maritime Asso., Boston Chamber of Commerce v. A. A. R. R. 126 I. C. C. 199, 202.

(xx) Upon contention that complainant was not entitled to reparation because freight charges were included in selling price, HELD: Complainant paid and bore the freight charges as such, and, if rates were unreasonable, no further proof of damage is necessary. See 245 U. S. 531. Caruso, Rinella, Battaglia Co. v. N. S. R. R. 126 I. C. C. 555, 560.

(yy) Assignment of corporation's claim against Director General of Railroads on reparation award to another corporation, into which assignor merged, was not violative of Rev. St. § 3477 (Comp. St. § 6383), relative to assignments of claims against the United States, in view of Federal Control Act, § 10 (Comp. St. 1918, Comp. St. Ann. Supp. 1919, §3115¾j), notwithstanding action was brought under Transportation Act, § 206 (Comp. St. Ann. Supp. 1923, § 10071¼cc), after termination of federal control, since Federal Control Act and Transportation Act must be construed together. Empire Refining Co. v. Davis, Director General, 6 Fed. (2d.) 305.

(zz) Under Federal Control Act. (Comp. St. §§ 3115¾a-3115¾p), claim

for reparation is enforceable against Director General of Railroads, as against contention that he is branch of government and not liable, and that he cannot advance funds due from another. World Pub. Co., v. Davis, Agent. Tulsa Paper Co., v. Same. Democrat Printing Co., v. Same, 16 Fed. (2d) 130.

(3a) Where plaintiff purchased shipment of sand and gravel from original consignor f. o. b. shipping point and resold shipment f. o. b. destination to consignee, who paid freight charge and deducted same from purchase price, plaintiff is real party paying overcharge and does not require assignments from its consignee to recover overcharges. Norfolk Southern R. Co. v. Freeman Supply Corporation, (Va., 1926) 133 S. E. 817.

(3b) Assignment by consignee to consignor of claim for overcharge in freight paid by former in consideration of its deduction of freight charge from purchase price need not be under seal. Norfolk Southern R. Co. v. Freeman Supply Corporation, (Va., 1926) 133 S. E. 817.

(3c) Where goods were sold f. o. b. destination, with provision that buyer should be liable for or get benefit of any rise or decline in published freight rates, fact that holding of Interstate Commerce Commission that rate was excessive under Interstate Commerce Act, (§ 1 Comp. St. § 8563) amounted to a decline in rates which inured to benefit of buyer, HELD not to preclude seller, on theory that it had sustained no loss, from recovering in suit under section 16 (Comp. St. § 8584), on reparation order of Commission. Louisville & N. R. Co. v. Sloss-Sheffield Steel & Iron Co., 46 Sup. Ct. 73.

(3d) Shipments were purchased f. o. b. origin point, freight allowed, but freight charges were paid at destination by complainant and amounts deducted from consignors' invoices. HELD: Essentially, shipments were purchased f. o. b. destination, and freight charges, in which consignors have a proprietary interest, were but part of the delivery purchase price. However, complainants paid freight charges, as such, in first instance, and therefore are within the contemplation of finding in 88 I. C. C. 492 and entitled to reparation. Oklahoma Traffic Asso. v. A. & V., 128 I. C. C. 89, 93.

(3e) Reparation awarded complainant who showed that companies to whom shipments were consigned were merely trade names and that on all shipments made or received under those names, it paid and bore the freight charges. Nebraska Bridge Supply & Lbr. Co. v. A. G. S., 128 I. C. C. 94, 96.

(3f) Complainant showed that it paid unreasonable charges on its shipments. Upon contention of carriers that it is not clearly shown that such complainant also bore those charges, HELD: A shipper is damaged when he pays unreasonable transportation charges and it is unnecessary for him to go beyond the first step in order to be entitled to an award of reparation. See 88 I. C. C. 492. Davies & Thomas Co. v. C. R. R. Co. of N. J., 128 I. C. C. 241, 242.

(3g) Reparation was denied consignee upon his complaint because it did not appear that he, as complainant, paid the unreasonable freight charges. Subsequently consignor filed complaint herein seeking reparation on same shipments. Upon contention that complainant in present case entered no objection to claim set forth in prior case and was therefore estopped from asserting claim for reparation, HELD: Contention is without merit. Complainant's failure to intervene in former proceeding does not constitute estoppel. Reparation awarded. McKeesport Tin Plate Co. v. A. A. R. R., 128 I. C. C. 259.

(3h) Upon contention that complainant had adduced no evidence in support of its claim for reparation, HELD: Complainant showed that it made certain shipments and paid unreasonable freight charges thereon. A further showing is unnecessary to establish complainant's right to reparation. McKeesport Tin Plate Co. v. A. A. R. R., 128 I. C. C. 259, 260.

(3i) Following 88 I. C. C. 492, reparation awarded complainant who paid the unreasonable freight charges although its witnesses had no personal knowledge as to whether it also bore those charges. Virginian Gasoline & Oil Co. v. B. & O., 128 I. C. C. 621, 626.

(3j) Possession of paid freight bills coupled with witness's knowledge of customary method of payment and his personal investigation of particular claims involved is sufficient to support a finding that complainants paid and bore the charges under review. Bakeries Service Corp. v. B. & M., 128 I. C. C. 695, 696.

(3k) Upon contention that on shipments sold f. o. b. destination, price thus including freight charges, consignee and not consignor, the complainant, is entitled to reparation, FOUND: Where a shipper has paid a rate afterwards declared to be unreasonable he may recover damages in amount of difference between excessive rate and rate declared to be reasonable without proof of actual injury. See 249 Fed. 677. Party who pays the unreasonable rate is damaged. See 55 I. C. C. 469, 481, and other cited cases. Reparation awarded. Jackson v. M. C., 129 I. C. C. 235, 240.

(3l) Upon further hearing, reparation awarded on l c. l. shipments made subsequent to previous hearing, upon complainant's showing that it paid and bore freight charges thereon at rates found unreasonable in original report 107 I. C. C. 101, and upon which carrier objected to proof in affidavit form submitted in accordance with Rule V of Rules of Practice. Hill v. A., T. & S. F., 129 I. C. C. 323.

(3m) On further hearing in former reports 98 I. C. C. 339 and 102 I. C. C. 662, reparation awarded complainants and interveners upon showing that they paid and bore unreasonable freight charges. Although carriers contend that reparation should not be awarded because finding of unreasonableness was absed on relative unreasonableness and not ureasonableness per se, and that proceedings involved increases and reductions in rates under which circumstances reparation is not ordinarily awarded, here only one destination is involved and findings required reductions in all cases, and in 120 I. C. C. 723 it is said that the act condemns exaction of unreasonable rates and makes no distinction between relative unreasonableness and unreasonableness per se. Washington Publishers' Asso. v. B. & O., 129 I. C. C. 360.

(3n) Fact that rate for transportation is taken into account tosome extent in determining the price paid producer does not affect complainant's found to be due, where considerations other than rate also enter into price right to any reparation that may be paid. Beatrice Creamery Co. v. C., M. & St. P., 129 I. C. C. 375, 376.

(3o) Following 88 I. C C. 492, reparation awarded complainant who paid the unreasonable freight charges on shipments in question but deducted amount thereof from invoice price and therefore did not bear the freight charges as such. Oklahoma Traffic Asso. v. St. L.-S. F., 129 I. C. C. 461, 466.

(3p) Filing of informal complaint in which name of complainant differed with that shown in formal complaint, found sufficient to stay the statute, as the two complainants named are parties to both complaints. Baldwin Hardware Co. v. Director General, 129 I. C. C. 708, 709.

(3q) Complainant seeking reparation dismissed, upon showing that parties in interest are same as those who were awarded reparaton in original proceeding that evidence introduced in same as that in original case except as corrected and amplified; and upon conclusion that complaint was brought primarily with a view to securing reparation in larger measure than was accorded in original case. Southwestern Horse & Mule Asso. v. A., T. & S. F., 129 I. C. C. 730

(3r) Reparation order of Interstate Commerce Commission HELD sufficient under Transportation Act 1920, § 206, subd. (a) to support action against Director General of Railroads, though it did not name him as agent of any particular carrier. Ferd Brenner Lumber Co. v. Davis, Director General of Railoads, 9 Fed. (2d.) 960.

§7. Statute Of Limitations.

See Infra §7a; Claims I.

(a) Original petition in intervention did not seek reparation but an amended petition included such claim. Date of filing of amended petition governs with respect to limitation period. Becker, Moore & Co. v. N. Y. C., 104 I. C. C. 11, 12, 15.

(b) Overcharge claim barred prior to June 7, 1924, found not to have been revived by amendment to section 16 (3) of the act, passed on that date, which extended limitation period for filing such claims with commission. See conference ruling of July 28, 1925. Saxony Mills v. M. P., 107 I. C. C. 649.

(c) Informal filing of a claim for reparation by a copartnership, of which complainant named in formal proceeding was a member, found to stay statute of limitations in favor of such complainant, who operated the business alone, under another trade name, immediately prior to partnership. Humphreys v. Director General, 109 I. C. C. 157, 159, 160.

(d) Claim for reparation for unreasonableness found barred by statute of limitations because not filed within two years from date of delivery or tender of delivery as provided by section 16 of the act. Gentile Co, v. Am. Ry. Ex. Co., 109 I. C. C. 171.

(e) Objection of carriers to inclusion in complaint of claims for reparation on shipments moving subsequent to filing thereof, to destinations not specifically named therein, on ground that it would unduly broaden the issue, sustained with respect to allegations under section 1 of the act but not under section 6. Chevrolet Motor Co. v. B. & O., 109 I. C. C. 184, 185.

(f) Claim for reparation due to exaction of alleged unreasonable and otherwise unlawful charges found barred by statute of limitations because filed more than two years after delivery of shipments and more than 90 days after institution of suit by carrier in the courts for collection of undercharges. Latham-Bradshaw Cotton Co. v. B. R., 109 I. C. C. 593.

(g) Action in the courts for collection of undercharges was begun on August 8, 1924. Complaint before commission alleging unreasonable and otherwise unlawful charges was filed November 6. HELD: As under section 16 the limitation period is extended 90 days from time action is begun by carrier for recovery of undercharges, the date on which such action is begun counts as first day and 90 days thereafter would permit filing of complaint not later than November 5. Applying principle laid down in 39 I. C. C. 171, and other cited cases, wherein date on which shipment is delivered is included in ascertaining whether a complaint seeking reparation has been filed within the two-year statutory period provided by the act, complaint here found to have been filed one day late and barred. Latham-Bradshaw Cotton Co. v. B. R., 109 I. C. C. 593, 594.

(h) The amendment of June 7, 1924, to section 16 of the act which provides for an extension of period of limitation to 90 days after collection of charges in respect of transportation service is limited to instances where collection is made without carrier beginning an action in the courts for collection of undercharges. If such action is begun, complaint before commission must be filed within 90 days from institution of such suit, and not from date of payment of charges by shipper to carrier. Latham-Bradshaw Cotton Co. v. B. R., 109 I. C. C. 593, 594, 595.

(i) Claim for reparation for unreasonable rates exacted on shipments moving prior to Federal control, filed with commission more than one year after Federal control terminated, found barred under section 206 (c) of transportation act, 1920. Ross & Fitch v. Director General, 109 I. C. C. 724.

(j) The Commission has only such jurisdiction as is specifically conferred upon it by statute. The two years provision of the act sets a limit to its powers, as distinguished from a rule of law for its guidance in reaching conclusions. Pfister & Vogel Leather Co. v. Erie R. R., 112 I. C. C. 659, 660.

(k) It is the filing of a complaint within two years after the cause of action accrues that gives the Commission jurisdiction to award reparation. And no good reason is perceived why that jurisdiction should not be held to continue when the complaint demands reparation until the Commission has determined whether reparation will be allowed although more than two years may pass before a decision is rendered and before detailed proofs of the quantum of damages are submitted. South Carolina Mfrs. Asso. v. C. C. & O. Ry., 112 I. C. C. 683, 684.

(l) The Supreme Court has held that section 206 of the transportation act, 1920, which provides that the period of federal control shall not be computed as a part of the period of limitation in claims for reparation for causes of action arising prior to federal control, may not be construed retroactively to create liability. United Chem. & Organic Products Co. v. Director General, 112 I. C. C. 687, 689.

(m) Claims for reparation in respect of overcharges on shipments delivered during Federal control, charges on which were paid to director general during that period, found to constitute claims against Federal Government, and are subject, not to limitations imposed under section 16 (3) of interstate commerce act, but to those imposed under section 206 (c) of transportation act, 1920. Period of limitation provided in latter statute extinguishes claims not filed "within two years and six months after termination of Federal control," and since claims here were not filed until more than four years

subsequent thereto, they are barred. Krauss Bros. Lbr. Co. v. Director General, 112 I. C. C. 117, 118.

(n) Carriers objected to introduction of evidence on question of damages, contending that claims for reparation are barred under section 16 of the act for the reason that in the original and supplemental decision handed down by commission reparation was denied, and that when a subsequent decision was rendered in which reparation was awarded the statutory two-year period had expired. HELD: A similar contention was raised and overruled in 293 Fed. 639, wherein the court found that it is the filing of a complaint within two years after cause of action accrues that gives commission jurisdiction to award reparation, such jurisdiction continuing until commission has determined whether reparation will be allowed even though more than two years may pass before a decision is rendered and before detailed proofs of the quantum of damages are submitted. South Carolina Cotton Mfrs. Assn. v. C., C. & O., 112 I. C. C. 683, 684.

(o) Complaint filed by an association for and in behalf of its members failed to name one member as a party complainant. Such member filed an intervening petition but same was not received by commission until after expiration of statutory period of limitation. HELD: As to shipments on which reparation is claimed by this particular member statute of limitations was not tolled by the complaint as filed by association. See 27 I. C. C. 302. South Carolina Cotton Mfrs. Assn. v. C., C. & O., 112 1. C. C. 683, 686.

(p) Complaint alleging overcharges was not resubmitted on the informal docket or formal complaint filed until after expiration of the six months' period after notification that the claim failed of informal adjustment as provided in Rule III (g) of the Rules of Practice. HELD: Barred and not revived by the amendment of June 7, 1924, to section 16 of the act, because barred at or prior to that date. See 107 I. C. C. 649. Dillon v. C., C., C. & St. L. Ry., 112 I. C. C. 745.

(q) Claim for reparation found barred by statute of limitations, all shipments having been delivered more than two years prior to enactment of the amendment of June 7, 1924, to section 16 of the act. That amendment extended time for filing certain claims but did not operate to revive claims which were previously barred. See conference ruling of July 28, 1925. Maloney Tank Mfg. Co. v. B. & O., 113 I. C. C. 379.

(r) Claim for reparation due to exaction of alleged inapplicable and illegal charges, which was barred at or prior to June 7, 1924, the date of the passage of the amendment of section 16 (3) of the act which extended the limitation period for filing such claims with the commission, not considered. See conference ruling of the commission adopted July 28, 1925. Gulf Naval Stores Supply Co. v. L. & N., 113 I. C. C. 551.

(s) Complaint alleged overcharges, while tacitly admitting that charges were correctly computed under existing published rates. It contained no specific allegation of a violation of the act; stated indefinitely origin territory; did not name as defendants any other than delivering line; and statement of shipments named, neither commodities shipped, charges paid, nor routes of movement. HELD, cumulative effect of these defects warrants finding that such complaint was insufficient to stay limitation provisions of the act. Bartling Grain Co. v. M. P., 115 I. C. C. 441, 442.

(t) Complaint seeking reparation was returned to complainant and attention called to vital omissions therein. Subsequently such complaint was refiled. HELD, that statute of limitations must be computed from date of refiling and all shipments made more than two years prior thereto are barred. Bartling Grain Co. v. M. P., 115 I. C. C. 441, 442.

(u) Formal complaint was received by commission within the two-year statutory period provided in the act, but was returned for correction and subsequently refiled after statute of limitations had expired. HELD, that the original filing stopped the running of the statute and complaint as subsequently filed with corrections, is not barred. Lynchburg Chamber of Commerce v. S. Ry., 115 I. C. C. 625, 626.

(v) Claims for reparation which were not filed formally within six months after notification that claim failed of informal adjustment as provided by Rule III (g) of Rules of Practice, or within two years after cause of action accrued

as required by the statute, found barred. Seaboard Live Stock Traffic Bureau v. A., C. & Y., 115 I. C. C. 687, 688.

(w) Claim for reparation on shipments made during period of Federal control, found without commission's jurisdiction because complainant did not specifically pray for reparation as required by section 206 (c) of transportation act of 1920. Original report, 88 I. C. C. 569, affirmed. Hungerford Smith Grape Juice Co. v. A. G. S., 118 I. C. C. 169.

(x) Claim for reparation on shipments moving prior to Federal control found barred by statute of limitations in effect when cause of action accrued. While section 206 (f) of transportation act provided a new statute of limitations, complainant's right to file the claim expired prior to passage thereof and that act could not revive claim because lapse of time not only barred the remedy but also destroyed carrier's liability. See 268 U. S. 633. Original report, 88 I. C. C. 569, affirmed. Hungerford Smith Grape Juice Co. v. A. G. S., 118 I. C. C. 169, 170.

(y) More than two years after, but within three years from date of delivery of shipments, carriers collected undercharges, and 15 days thereafter complaint alleging unreasonableness and overcharges was filed. HELD, prior to collection of undercharges complainant had no ground for complaint. However, by paragraph 3 (d) of section 16 of the act, the intent of Congress was not to permit carriers to collect undercharges under above circumstances and at same time deny shippers the right to challenge reasonableness of rate so collected. Instead, paragraph 3 (d) provides that regardless of whether undercharges are collected by carrier in two years or three years, shipper may file his complaint within 90 days after such charges are paid. Accordingly, here allegations of neither unreasonableness nor overcharges are barred. Crerar Clinch Coal Co. v. A. A. R. R., 118 I. C. C. 171, 172, 173.

(z) From the language of section 16 and its history, it is clear that Congress did not intend to permit carriers to collect undercharges after two years and within three years from accrual of a cause of action and yet deny shippers the right to challenge reasonableness of rate thus collected. Instead, Congress intended, and by paragraph 3 (d) has provided, that regardless of whether undercharges are collected in two years or three years the shipper may file his complaint within 90 days after such charges are paid. Crerar Clinch Coal Co. v. A. A. R. R., 118 I. C. C. 171, 173.

(aa) Prior to amendment of June 7, 1924, to section 16 of the act, a shipper clearly had right to file complaint alleging unreasonableness of a rate which carrier sought by action in court to collect in whole or in part after two years and within three years from the time cause of action accrued. The amendment (Par. 3-d) should not be construed as taking away this right on shipments delivered prior to amendment's passage but on which undercharges are paid subsequent thereto. Its purpose, among other things, was to make certain that the right existed not only where action was brought by carrier to collect undercharges but where, without such action, the undercharges were paid. Crerar Clinch Coal Co. v. A. A. R. R., 118 I. C. C., 171, 173.

(bb) Following Danzer case, 268 U. S. 633, claims for reparation on shipments moving prior to Federal control which were barred under two-year limitation provision of section 16 of interstate commerce act prior to passage of transportation act, 1920, can not be revived. Eshelman & Sons v. Director General, 118 I. C. C. 441, 451.

(cc) Claim for reparation alleging unreasonableness, found barred by statute of limitations, shipments having been delivered more than two years prior to filing of informal complaint. Smith Oil & Refining Co. v. C., M. & St. P., 118 I. C. C. 527.

(dd) Complainant in its complaint erroneously referred to a shipment as moving from and to specified points, whereas in fact it moved in reverse direction. Shipment was fully described by car number, initials, date of movement, and weight of contents. Amended complaint was offered at hearing to correct this error and was allowed by presiding examiner over objection of carriers. HELD, under the circumstances, complaint as amended considered on its merits. Bender Iron & Supply Co. v. K. C. S., 118 I. C. C. 661, 662.

(ee) An award of reparation on intrastate traffic which moved during the guaranty period, March 1 to August 31, 1920, is, in effect, a reduction of a rate prior to September 1, 1920, within the meaning of section 208 (a) of the trans-

portation act, 1920, regardless of the date on which decision making the award was rendered. See 271 U. S. 124. Reparation on Intrastate Traffic, 122 I. C. C. 443, 447.

(ff) Record indicated that car was unloaded more than two years prior to filing of original complaint. Complainant, however, relied upon date of expense bill subsequently issued to show that complaint was seasonably filed. HELD: Date of rendition of an expense bill is not necessarily determinative of date a shipment was delivered or tendered for delivery. Delivery date here deemed to have been date car was unloaded and claim for reparation considered barred. Crystal Springs Mfg. Co. v. I. C., 126 I. C. C. 4, 5.

(gg) Complaint was returned for correction and upon return the corrected copy was stamped as filed. Upon contention that date shown by commission's stamp on copies served upon defendant carriers was more than two years after date of delivery of shipment, or after the asserted cause of action accrued and complaint was therefore barred by the statute, HELD: Date upon which a complaint is received, although subsequently returned for correction and stamped as filed on a later date, is date that tolls the statute. See 102 I. C. C. 252. Crystal Springs Mfg. Co. v. I. C. 126 I. C. C. 4, 5.

(hh) Following Danzer case, 268 U. S. 633, certain reparation claims barred under two-year limitation provision of section 16 of the interstate commerce act, found not revived by provisions of section 206 (f) of transportation act, 1920. Western Newspaper Union v. Director General, 126 I. C. C. 437, 438.

(ii) The statute of limitation applicable to actions on penalties and fines does not apply to an application for reparation on account of discriminatory rates. The law permitting such application and reparation thereon is remedial only. Missouri, K. & T. Ry. Co. v. Dewey Portland Cement Co., (Okla., 1925) 242 Pac. 257.

(jj) Many of the shipments were delivered two years or more prior to the amendment of June 7, 1924, to section 16 of the act, and claims on such shipments are barred. Di Giorgio Fruit Co. v. A. E. R. R., 128 I. C. C. 31.

(kk) Claim for reparation found barred by statute of limitations, shipments having been delivered more than two years prior to amendment of June 7, 1924, to section 16 of the act. See 109 I. C. C. 170. Di Giorgio Fruit Co. v. A. E. R. R., 128 I. C. C. 31.

(ll) Complaint filed more than two years but less than three years after delivery of shipments sought refund of allowance provided by tariff for "drayage and ferriage in lieu of lighterage." Upon contention that complaint was not properly within section 6 of the act, but constituted a claim for damages resulting from carrier's failure to comply with its lawfully published tariff, and was therefore barred by statute of limitations, citing 69 I. C. C. 59 and other cases, HELD: Cases cited are not in point. Complaint is clearly within section 6, being in effect a complaint seeking refund of overcharges, and having been filed within the three-year period prescribed by section 16 of the act is therefore not barred. Taub v. L. V., 128 I. C. C. 105.

(mm) Allegation of unreasonableness included in formal complaint filed more than two years after shipment moved, found barred by the statute, informal complaints seasonably filed having alleged only that rates charged were inapplicable. Chevrolet Motor Co. v. A., T. & S. F., 128 I. C. C. 638.

(nn) Formal complaint alleging both unreasonableness and overcharge on Federal-control shipment was filed within six months after complainant was advised that complaint was not susceptible of informal adjustment. Informal complaint, however, involved an alleged overcharge only and issue of unreasonableness, since not presented within one year after termination of Federal control, found barred. Kinnison Bros. v. Director General, 128 I. C. C. 703.

(oo) Complaint filed within statutory period but twice returned for correction was not resubmitted until almost five years afttr receipt of original complaint. Upon contention that complainant's failure to prosecute the claim amounts to abandonment thereof and complain should therefore be dismissed under doctrine of laches, FOUND: Abandonment as reconized by the commission occurs when a formal complaint is not filed within the six-months' period following notification to parties of termination of informal pro-

ceedings. Here, receipt of original complaint constituted a filing thereof, although no complaint was docketed and served until almost five years thereafter. Circumstances of case do not warrant dismissal on grounds alleged. See 92 I. C. C. 63, 66. Peters Mill Co. v. Director General, 129 I C. C. 331.

(pp) Formal claims for reparation not having been filed within statutory period provided by interstate commerce act, nor within six months after complainant was advised that they were not susceptible of informal adjustment, in accordance with provisions of Rule III (g) of Rules of Practice, although informal resubmission was sought during six-months period, found barred by statute of limitations Columbus Bolt Works. v. P. R. R., 129 I. C. C. 512

(qq) Claim for reparation, on ground of misrouting shipments moving during Federal control, not having been filed within one year after termination of Federal control, found barred by statute of limitations. Dyersburg Milling Co. v. Director General, 129 I. C. C. 739.

§7a. When Limitation Runs.

See Supra §7a; Claims I.

(a) Where question for determination is whether rates assailed were unreasonable in the past to extent of affording a basis for reparation, date on which complaint was filed is not controlling. Cooperative Oil & Paint Co. v. Director General, 122 I. C. C. 227, 228.

(b) The commission has jurisdiction to approve after August 31, 1920, an award of reparation made by State authority on intrastate traffic which moved during the guaranty period, March 1 to August 31, 1920, whether such authority was actually exercised during the guaranty period or thereafter. The phrase "prior to September 1, 1920," as used in section 208 (a) of the transportation act, 1920, is not to be construed as prescribing a time limitation within which commission was authorized to act, but as fixing the period as to which its approval was necessary to a reduction in rates whether made during the guaranty period by naming lower rates for future, or accomplished after expiration of the period by way of reparation on shipments which moved during that period. Reparation on Intrastate Traffic, 122 I. C. C. 443.

(c) An award of reparation on intrastate traffic which moved during the guaranty period, March 1 to August 31, 1920, is, in effect, a reduction of a rate prior to September 1 1920, within the meaning of section 208 (a) of the transportation act, 1920, regardless of the date on which decision making the award was rendered. See 271 U. S. 124. Reparation on Intrastate Traffic, 122 I. C. C. 443, 447.

(d) The date of rendition of an expense bill is not necessarily determinative of the date a shipment described therein was delivered or tendered for delivery. Crystal Springs Mfg. Co. v. I. C. R. R., 126 I. C. C. 4, 5.

III. CIRCUMSTANCES DETERMINING RIGHT.

§7½. In General.

(a) Existence of lower rate from a more distant point on same line or route is not in and of itself sufficient to justify an award of reparation by reason of exaction of higher rates from an intermediate point or points. See 50 I. C. C. 719. Ohio Farm Bureau Federation v. N. Y. C., 104 I. C. C. 490, 492.

(b) Reparation will be awarded for past unreasonableness where shippers support their case wholly upon a finding of unreasonableness in a former proceeding, irrespective of fact that they were not parties to the case in which unreasonableness was found. When commission reaches a conclusion regarding a certain rate that conclusion will be adhered to in subsequent proceedings, unless new facts are brought to its attention, conditions have undergone a material change, or the commission proceeded on a misconception or misapprehension. See 43 I. C. C. 366. Moreover, a finding of past unreasonableness inures to benefit of every person who has paid the unjust rate, provided he initiates his claim within the statutory period. See 236 U. S. 662. Bell & Zoller Mining Co. v. I. C.. 109 I. C. C. 484.

(c) Where shipper has paid rates in excess of maximum reasonable basis, its right to reparation is not affected by the proportion of business it was able to do in comparison with its competitors. Nuckolls Packing Co. v. A., T. & S. F., 113 I. C. C. 229, 232.

(d) Upon further consideration, finding in 85 I. C. C. 365, awarding reparation for exaction of an unreasonable through rate on coal shipped during Fed-

eral control from Shamokin, Pa., to Detroit, Mich., reversed. No joint rate was in effect and a combination based on Black Rock, N. Y., was assessed, the unreasonableness therein being due to factor beyond Black Rock of a nonfederally controlled line which was not made a party defendant. While in 40 I. C. C. 501, commission found that its reparation order for unreasonable through combinations runs against carriers, collectively, who participated in the transportation, in instant case one participating carrier was omitted as a party defendant. Also, while in 91 I. C. C. 571, where combination rate was found unreasonable and one participating carrier omitted as a defendant, commission prorated the reparation by determining reasonableness of factors separately, here the Shamokin-Black Rock factor was not unreasonable. McFadden v. Director General, 113 I. C. C. 387.

(e) Subsequent to hearing and prior to issuance of commission's decision in which certain class rates on high explosives were found unreasonable, carrier published specific commodity rates. Upon supplemental petition of complainant seeking reparation on shipments made subsequent to hearing and on which charges were assessed at specific commodity rates. HELD, change made by carriers in nature of the rates during pendency of proceeding had effect of removing them from application of finding of unreasonableness of the class rates and on such shipments there is no basis for an award of reparation. United States v. Director General, 118 I. C. C. 677.

(f) Fact that movement subsequent to establishment of a reasonable rate prescribed by commission is not as great as anticipated by shipper does not warrant denial of reparation on shipments which actually moved prior to date rate was established. Chicago Heights Mfrs. Asso. v. P. R. R., 120 I. C. C. 739, 740.

(g) The primary purpose of second clause of section 208 (a) of transportation act was to protect the United States from liability on its guaranty to the carriers of the standard return, and this it sought to do by prohibiting any reduction of rates, fares, or charges without consent of commission. See 270 U. S. 466. When it comes to awards of reparation after expiration of the guaranty perion upon intrastate traffic which moved during that period there is equal necessity for review by commission to the end that revenues of carriers may not be unduly reduced and at same time that awards of reparation in meritorious cases may be granted. Reparation on Intrastate Traffic, 122 I. C. C. 443, 447, 448.

(h) Complainant did not specifically ask for reparation on shipments moving subsequent to filing of complaint but did allege that rates "were and are unjust and unreasonable," and prayed for reasonable rates for future and for "reparation for unlawful charges hereinbefore alleged, such sum as in view of evidence to be adduced herein the commission shall determine that complainants are entitled to." At time of original hearing, complainants had uncut timber and were operating their mill. It would be doing less of violence to consider that shipments made during pendency of this proceeding are within scope of pleadings than to assume that complainants did not intend to ask for full relief, or to deny them that relief for want of use of particular words. Moreover, carrier has not been misled to its disadvantage and an award of reparation under circumstances would be in accord with similar finding in 21 I. C. C. 45. Reparation awarded. Burns & Knapp v. B. S. & K. R., 126 I. C. C. 410, 411, 412.

(i) In original report reparation was awarded on shipments of hogs moving during Federal control, carriers having failed to cancel reference to combination rule in connection with rates established by Director General in General Order No. 28, thereby eliminating a portion of increase contemplated in that order. Upon further hearing complainants sought reparation on shipments moving subsequent to Federal control. However, record in former report indicates that complainants recognized the injustice of taking advantage of carriers' inadvertence in order to secure transportation at a subnormal rate during transitional period following Federal control, and intended to have this complaint dismissed. HELD: Complainants' conduct under circumstances was in legal contemplation a voluntary dismissal of its complaint. Former report 104 I. C. C. 607, awarding reparation on shipments during Federal control affirmed. North Packing & Provision Co. v. Director General 128 I. C. C. 306.

(j) The Commission has no authority

to make an award of reparation in order to penalize the carriers, as the penalties or fines provided for violation of the act are enforceable in court and accrue to the Government, and reparation may be awarded only when complainants have been damaged either by the payment of an excessive charge or by undue prejudice or other unlawful discrimination, in which latter case special damage must be proved under the decisions of the Supreme Court. Hudson Mule Co. v. L. & N. R. R., 129 I. C. C. 365, 371.

(k) The commission has frequently found that rule 77 of Tariff Circular 18-A is a substantial compliance with the fourth section of the act and awarded reparatio non shipments moving from or to intermediate points under rates that were higher than those from or to more distant points where rates from or to latter points were subject to rule 77 and the less distant points were intermediate over route traffic moved. Woodward Auto Co. v. C., M. & St. P., 129 I. C. C. 613, 615.

§8. Erroneous Publication Or Quotation

See Erroneous Rates.

(a) Misquotation of a rate by carrier's representative affords no basis for an award of reparation. Fess v. C., H. & G. L., 104 I. C. C. 262.

(b) The mere misquotation of a rate does not justify an award of reparation, for every shipper is presumed to know the rate applicable on his shipment, which must be collected. Bowman Dairy Co. v. Am. Ry. Ex. Co., 118 I. C. C. 529.

(cd) While the misquotation of a rate by a carriers agent is not a basis for the assessment of a lower charge than that applicable under the published traiffs, or for an award of reparation, the Commission has found that where there is a uniform minimum for cars of all lengths, the carrier is not required to furnish a car of any specified length, but is under the duty of establishing a minimum weight that can reasonably be loaded into a car of the size furnished. Folly Town Co. v. Erie R. R., 120 I. C. C. 157.

(e) Misquotation of a rate by carrier's agent is not a basis for assessment of a lower charge than that applicable under published tariffs, or for an award of reparation. See 55 I. C. C. 17. Folly Town Co. v. E. R. R., 120 I. C. C. 157, 158.

(f) Shippers and carriers are alike charged with knowledge of the lawfully published rate and tariff provisions, and the misquotation of a rate by the agent or employee of the carrier is not a sufficient basis for an award of reparation. Newsome Feed & Grain Co. v. P. & L. E. R. R., 122 I. C. C. 329, 330.

(g) In original report reparation was awarded on shipment of hogs moving during Federal control, carriers having failed to cancel reference to combination rule in connection with rates established by Director General in General Order No. 28, thereby eliminating a portion of increase contemplated in that order. Upon further hearing complainants sought reparation on shipments moving subsequent to Federal control. However, record in former report indicates that complainants recognized the injustice of taking advantage of carriers' inadvertence in order to secure transportation at a subnormal rate during transitional period following Federal control, and intended to have this complaint dismissed. HELD: Complainants' conduct under circumstances was in legal contemplation a voluntary dismissal of its complaint. Former report 104 I. C. C. 607, awarding reparation on shipments during Federal control, affirmed. North Packing & Provision Co. v. Director General, 128 I. C. C. 306.

§8½. Previous Action Of Commission.

See Previous Decision of Commission; Reasonableness of Rates §26½.

(a) Upon further hearing, carriers having declined to approve reparation statements submitted in accordance with Rule V of the Rules of Practice, amount of reparation due complainants under decisions in 48 I. C. C. 475, and 55 I. C. C. 595, determined, such complainants having submitted proof and evidence that shipments were made, and that unreasonable charges exacted were paid, by them. Butters Lbr. Co. v. A. C. L., 109 I. C. C. 224.

(b) Reparation will be awarded for past unreasonableness where shippers support their case wholly upon a finding of unreasonableness in a former proceeding, irrespective of fact that they were not parties to the case in which unreasonableness was found. When commission reaches a conclusion regarding a certain rate that conclusion will be adhered to in subsequent proceedings, unless new facts are brought to its attention,

conditions have undergone a material change, or the commission proceeded on a misconception or misapprehension. See 43 I. C. C. 366. Moreover, a finding of past unreasonableness inures to benefit of every person who has paid the unjust rate, provided he initiates his claim within the statutory period. See 236 U. S. 662. Bell & Zoller Mining Co. v. I. C., 109 I. C. C. 484.

(c) Due to fact that records relating to shipments in question were not in all instances available, upon further hearing and submission of satisfactory proof as to paying and bearing of freight charges, reparation awarded for exaction of unreasonable rates on shipments of packinghouse products moving from Ottumwa, Iowa, to Memphis, Tenn., to basis of rates found reasonable in Morrell & Co., 81 I. C. C. 200, wherein commission found such rates unreasonable to extent they exceeded fifth class. Morrell & Co. v. C., B. & Q., 109 I. C. C. 613.

(d) In 62 I. C. C. 211, the Commission found rates on anthracite coal, carloads from Lehigh and Wyoming regions of Pennsylvania to Jersey City, N. J., between 1906 and 1911 unreasonable to extent they exceeded $1.45 and $1.35 per long ton on prepared and smaller sizes. Reparation awarded. HELD, reparation awarded. Wertheim Coal & Coke Co. v. L. V. R. R., 112 I. C. C. 513.

(e) Complainant attacked commodity rate charged on 17 cars of newsprint paper shipped between May 27, 1921 and June 27, 1922 from Millwood, Wash., to Dallas, Tex., as unreasonable and unduly prejudicial. Millwood is on the Spokane International about 7 miles northeast of Spokane, Wash. Distances moved ranging from 2,377 to 2,720 miles, distance over the short line route through Spokane, Billings, Mont., and Denver, Colo., 2,122 miles. HELD, following 102 I. C. C. 729, reparation awarded to basis of $1.12. West Cullum Paper Co. v. A. T. & S. F. Ry., 112 I. C. C. 641.

(f) Previous reports in 37 I. C. C. 652, 53 I. C. C. 741, 57 I. C. C. 584, 64 I. C. C. 633 and 85 I. C. C. 131. Complainant attacked rates on bituminous coal, carloads, from C. C. & O., and V. & S. W., in Virginia to Spartanburg and other points in S. C., as unreasonable. HELD, reparation awarded. South Carolina Cotton Mfrs. Asso. v. C. C. & O. Ry., 112 I. C. C. 683.

(g) In 85 I. C. C. 365, the Commission found the commodity rates on anthracite coal, carloads, from Pennsylvania to Detroit, Mich., during the period of federal control as unreasonable and awarded reparation. The factor of the rate from Shamokin to Black Rock does not appear to have been unreasonable. The Grand Trunk is not a party to the complaint. HELD, complaint dismissed. McFadden v. Director General, 113 I. C. C. 387.

(h) Upon further hearing reparation awarded for exaction of unreasonable rates on shipments of bituminous coal from mines on the C., C. & O. and Virginia & S. W. Railways in Virginia to Spartanburg and other points in South Carolina taking same or related rates. Former reports, 37 I. C. C. 652; 53 I. C. C. 741; 57 I. C. C. 584; 64 I. C. C. 633; and 85 I. C. C. 131. South Carolina Cotton Mfrs. Assn. v. C., C. & O., 112 I. C. C. 683.

(i) Complainant sought reparation on shipments of zinc ore moving from certain Kansas and Oklahoma points to Van Buren, Ark., based upon finding in 93 I. C. C. 119, wherein it was found that rates from the Joplin field to South Ft. Smith, Ark., were unduly prejudicial in favor of competitors operating zinc smelters at East St. Louis and other points in Illinois and Indiana. As proof of damage complainant relied upon comparisons of rates assailed with rates to competing points, and with testimony that service and commodities were the same, and that spelter was manufactured by smelters at those points under practically same conditions and sold on East St. Louis market basis regardless of point of production. HELD: Character of proof submitted, not being in conformity with the rule laid down by Supreme Court in 230 U. S. 184, and by commission in 55 I. C. C. 703, and a long line of other decisions, reparation denied. Falcon Zinc Co. v. N. E. O. R. R., 113 I. C. C. 265.

(j) Upon further consideration, finding in 85 I. C. C. 365, awarding reparation for exaction of an unreasonable through rate on coal shipped during Federal control from Shamokin, Pa., to Detroit, Mich., reversed. No joint rate was in effect and a combination based on Black Rock, N. Y., was assessed, the unreasonableness therein being due to factor beyond Black Rock of a nonfederally

controlled line which was not made a party defendant. While in 40 I. C. C. 501, the commission found that its reparation order for unreasonable through combination runs against carriers, collectively, who participated in the transportation, in instant case one participating carrier was omitted as a party defendant. Also, while in 91 I. C. C. 571, where combination rate was found unreasonable and one participating carrier omitted as a defendant, commission prorated the reparation by determining reasonableness of factors separately, here the Shamokin-Black Rock factor was not unreasonable. McFadden v. Director General, 113 I. C. C. 387.

(k) In 101 I. C. C. 196, division 3 found rates on bananas, and cocoanuts, carloads, from New Orleans, La., and subports taking the same rates, and Gulfport, Miss., to Oklahoma and to Arkansas City, Kas., and to Texas common point territory unreasonable and prescribed reasonable rates and awarded reparation. HELD: Original finding affirmed, except rates not unreasonable prior to September 25, 1922. Dawson Produce Co. v. A. & V. Ry., 113 I. C. C. 454.

(l) Complainant attacked commodity rates charged on 600 cars of salt made between November 1, 1921, and June 30, 1922, and between November 5, 1922, and July 27, 1923, from Burmester, Utah, to Idaho, Montana, Oregon and Washington as unreasonable and unduly prejudicial. Prayer is for reparation based on prescribed rates in 78 I. C. C. 659, wherein distance rates were prescribed from Saltair Junction and Crystal Junction, Utah. Rates were published in accordance with that order July 28, 1923. The carriers voluntarily made them applicable from other salt producing points in Utah, including Burmeste, a local point on the W. P. HELD: Rates attacked unreasonable to extent they exceed the distance rates prescribed in 78 I. C. C. 659 for the distance from Burmester, reparation awarded. Morton Salt Co. v. B. A. & P. Ry., 113 I. C. C. 548.

(m) Rate on sand from Sandusky, Ohio, to Pittsburgh, Pa., found not unreasonable as applied to past shipments, but unreasonable for future to extent it exceeded rate for like distances under the distance scale prescribed in 104 I. C. C. 717 for application from points in western Pennsylvania to points in Ohio. Rates prescribed in cited case forming basis of a general readjustment, a finding that rates applicable prior thereto were unreasonable to extent they exceeded the rates under new basis, and that damages were accordingly sustained, is not warranted. Moreover, reparation will not ordinarily be awarded to basis of a finding resulting in a widespread readjustment of rates. Accordingly, reparation denied in instant case, but reasonable rate prescribed for future. Booth & Flinn v. P. R. R., 113 I. C. C. 613.

(n) Complainant attacked commodity rates charged on bituminous coal, carloads, shipped from January 12, 1923, to June 4, 1924, from Kansas, Missouri, Arkansas and Oklahoma to Kansas City, Mo.-Kas., Independence, Mo., and related points as unreasonable. In 89 I. C. C. 73 the commission prescribed rates to these points. HELD: Rates attacked not unjust or unreasonable, reparation denied. Beatty Coal Co. v. A. V. I. U. Ry., 115 I. C. C. 8.

(o) In 91 I. C. C. 677 the commission found the attacked rates on sugar beets, carloads, between points in Ohio and Michigan unjust and unreasonable and prescribed a reasonable basis of rates. HELD: Reparation awarded. Continental Sugar Co. v. N. Y. C. R. R., 115 I. C. C. 124.

(p) Complainant attacked commodity rate of 61c charged on 28 cars of cottonseed shipped from Memphis, Tenn., to Eagle Pass, Tex., between November 20, 1922, and January 23, 1924, as unreasonable. The distance over route of movement is 887 miles, the rate charged being the Texas common point rate of 45.5c plus differential of 15.5c. In 98 I. C. C. 183 the commission prescribed a reasonable maximum rate on cottonseed between points in the southwest. They were published September 15, 1925, and the rate for that distance would be 52c. HELD: Rate attacked unreasonable to extent it exceeded the rate published in pursuance to 98 I. C. C. 183, reparation awarded. Russell Hickle Seed Co. v. M. P. R. R., 115 I. C. C. 253.

(q) Complainant sought reparation on numerous cars of wheat, corn, bran, and products thereof from numerous points in Nebraska, Idaho, Colorado and Wyoming to numerous destinations, and alleged the applicable rates were unreasonable to extent they exceeded those

which were later published on December 27, 1921, and January 7, 1922, in compliance with 64 I. C. C. 85. HELD: Following 100 I. C. C. 319, reparation denied for lack of proof of alleged unreasonableness of the particular rates attacked, complaint dismissed. Bartling Grain Co. v. M. P. R. R., 115 I. C. C. 441.

(r) Complainant attacked as unreasonable and unduly prejudicial rates, which usually are combinations on the Ohio or Mississippi river crossings, maintained by defendants on shelled peanuts, carloads, from Alabama, Florida, Georgia, South Carolina, and Tennessee to Chicago, Ill., Milwaukee, Wis., Canton and Cleveland, O., South Bend, Ind., Dubuque, Ia., and St. Louis, Mo. In 101 I. C. C. 138, Division 2 found rates to St. Louis not unjust, unreasonable or otherwise unlawful, and rates to other points unreasonable to extent that the factors north of Ohio River might exceed to Chicago 27c, Milwaukee 30c, Canton 26c, Cleveland 26c, South Bend 27c and Dubuque 32.5c, reparation denied. HELD: Original report affirmed and rate attacked from Nashville, Tenn., to Chicago unreasonable to extent it exceeded 58.5c. Reparation awarded since November 19, 1923, the date complaint was filed. United Fig & Date Co. v. A. C. L. R. R., 115 I. C. C. 643.

(s) Case was submitted based on 68 I. C. C. 522. Complainant attacked rates charged on 20 cars of linseed oil shipped from New York and Philadelphia, Pa., to Cleveland, and Chicago, between April 8, 1922, and September 28, 1923, as unreasonable and unduly prejudicial to extent it exceeded rates on cottonseed oil. Charged fifth class of 54.5c from Philadelphia to Chicago, 38c Philadelphia to Cleveland and 40c from New York to Cleveland. HELD: Rates attacked unreasonable to extent they exceeded rates on cottonseed oil, reparation awarded. Glidden Co. v. C. R. R. of N. J., 118 I. C. C. 59.

(t) In 88 I. C. C. 569 the commission found rates on grape juice, in glass, in carloads, from Ohio river crossings to destinations in the southeast on traffic originating at Lawton, Mich., were found unreasonable to extent they exceeded 90 per cent of fifth class. HELD: Reparation awarded. Smith Grape Juice Co. v. A. G. S. R. R., 118 I. C. C. 169.

(u) In 83 I. C. C. 712, affirmed 102 I. C. C. 502, the commission found commodity rates on anthracite birds eye coal from groups A, B and C mines on the D. & H. in Pennsylvania to Thomson, N. Y., unreasonable to the extent they exceeded $2.30 per long ton prior to August 26, 1920, $3.22 from that date to June 30, 1922, and $2.90 thereafter, and rates from the same mines to Ondawa, N. Y., on and after February 1, 1922, unreasonable to extent they exceeded rates found reasonable to Thomson, reparation awarded. HELD: Reparation awarded to intervenor. United Paperboard Co. v. G. & J. Ry., 118 I. C. C. 175.

(v) Complainant attacked rates charged on iron and steel pipe and tank material, carloads, shipped between October 4, 1922, and November 7, 1923, from Louisiana to Arkansas as unreasonable and unduly prejudicial to extent they exceeded distance scale of rates prescribed in 77 I. C. C. 473. Fifth class rates charged. HELD: Rates attacked unreasonable to extent they exceeded those prescribed in 77 I. C. C. 473, reparation awarded. Standard Oil Co. v. T. & P. Ry., 118 I. C. C. 627.

(w) In 80 I. C. C. 143 the commission found combination class rates charged on interstate shipments to and from Lake Denmark and Picatinny, N. J., as unreasonable to extent they exceeded certain components as prescribed therein. HELD: Reparation awarded. United States v. Director General, 118 I. C. C. 677.

(x) In 113 I. C. C. 459, the commission found the rate on bananas and cocoanuts in straight or mixed carloads, from New Orleans, La., to San Antonio, Tex., unreasonable on and after September 15, 1923, to extent it exceeded 97.5c but not unreasonable prior to that date. In 101 I. C. C. 196 and 113 I. C. C. 454 the commission found the rates from New Orleans and Gulfport, Miss., to 24 points in Oklahoma, one point in Kansas and seven points in Texas unreasonable on and after September 25, 1922. HELD: Reparation awarded on and after September 25, 1922, to extent it exceeded 97.5c, reparation awarded. Gugenheim Goldsmith Co. v. G. H. & S. A. Ry., 118 I. C. C. 681.

(y) Complainant attacked rates charged on nine cars of oil well outfits and supplies between April 2 and September 6, 1923, from Oil City, Caddo,

Mansfield and Marion, La., to Smackover and Louann, Ark., as unreasonable. Shipments moved entirely within territory covered by the decision in 77 I. C. C. 473. Class A rates were charged. HELD: Rates attacked unreasonable to extent they exceed those prescribed in 77 I. C. C. 473, reparation awarded. Texas Co. v. K. C. S. Ry., 118 I. C. C. 713.

(z) Complainant attacked rates on wrought iron or steel pipe, carloads, between Texas and Oklahoma as unreasonable. Petrolia and Dallas, the Texas points of origin, are in Texas common point territory. Rates sought are on scale prescribed in 77 I. C. C. 473. HELD: Rates attacked unreasonable to extent they exceed those prescribed in 77 I. C. C. 473, reparation awarded. Lone Star Gas Co. v. C. R. I. & P. Ry., 118 I. C. C. 717.

(aa) Complainant attacked rate of 53.5c charged on iron and steel pipe, carloads, between May 27, 1924, and July 9, 1925, from Ranger, Tex., to Ada., Bristow, Bying, Paden and Seminole, Okla., and from Jefferson, Okla., to Ranger as unreasonable. Reparation is desired to basis prescribed in 77 I. C. C. 473. HELD: Rates attacked unreasonable to extent they exceed those prescribed in 77 I. C. C. 473, reparation awarded. Texas Pacific Coal & Oil Co. v. A. T. & S. F. Ry., 118 I. C. C. 719.

(bb) Upon complaint alleging that rates on shipments of bituminous coal from mines in Kansas, Missouri, Oklahoma, and Arkansas, to Kansas City, Mo.-Kans., Independence, Mo., and related points, were unreasonable in past to extent they exceeded rates prescribed for future in 89 I. C. C. 73. FOUND, rates assailed compare favorably with various rates between other points, and with those prescribed by commission on various low-grade commodities, for comparable distances. Moreover, prescribed rates were in the nature of a general readjustment, following which reparation is not ordinarily awarded. Beatty Coal Co. v. A. V. I., 115 I. C. C. 8.

(cc) Reparation on shipments of grain and products moving between date of decision in the Grain case, 64 I. C. C. 85, and the final date on which reduced rates prescribed therein were required to be established, denied for lack of proof of unreasonableness of particular rates assailed. Sole reliance was placed upon cited case and contention that burden of proof rested upon carriers. Only evidence submitted was a history of rates and certain transportation documents there being an entire lack of tests ordinarily employed in measuring reasonableness of rates. Moreover, the commission's findings did "not become binding until ordered into effect" and "the rates were not prescribed as reasonable on shipments moving prior to the date on which they were ordered into effect, any more than on shipments moving the day after the decision was rendered." See also 100 I. C. C. 319. Bartling Grain Co. v. M. P., 115 I. C. C. 441.

(dd) Complainant contended that rates and ratings assessed on automobile horns were unreasonable to extent they exceeded lower rates and ratings subsequently established in conformity with commission's decision in 78 I. C. C. 313, and sought reparation to that basis, citing cases wherein commission awarded reparation in connection with reductions in classification ratings. HELD, assailed ratings had been maintained for many years and subsequent reductions applied throughout a large territory affecting shippers at many points. Under such circumstances, commission has frequently denied reparation. See 37 I. C. C. 81, and other cited cases. Heinze Electric Co. v. B. & M., 118 I. C. C. 77.

(ee) Upon further hearing, reparation awarded intervener on anthracite bird's-eye coal shipments from Groups A, B, and C mines in Pennsylvania, to Ondawa, N. Y., upon showing that it paid and bore charges and was damaged to extent of difference between charges paid and those that would have accrued at rates found reasonable in previous report 83 I. C. C. 712 and 102 I. C. C. 502. United Paperboard Co. v. G. & J. Ry., 118 I. C. C. 175.

(ff) Upon complaint seeking reparation on shipments of fertilizer and fertilizer materials from Jackson, Miss., to Arkansas and Louisiana destinations, predicated upon findings in Jackson Traffic Bureau, 102 I. C. C. 129, wherein reparation was not sought. HELD, considering fact that case relied upon was part of the Memphis-Southwestern rate adjustment prescribed in 55 I. C. C. 515, and other cases, it can not be said that rates prior thereto were unreasonable merely because they were not on a distance basis. Furthermore, Rule III (s) of Rules of Practice provides that "Except under unusual circumstances, and

for good cause shown, reparation will not be awarded upon a complaint in which it is not specifically prayed for, or upon a new complaint by or for same complainant which is based upon any finding in original proceeding." Jackson Traffic Bureau v. A. & V., 118 I. C. C. 217.

(gg) Carrier failed to establish rates prescribed in 80 I. C. C. 143, until subsequent to date ordered. Complainant filed supplemental petition seeking reparation on shipments made between date rates were found unreasonable and date on which carrier established prescribed rates. Upon contention of carrier that as commission had no evidence as to rates in effect during the interim, it could not make a lawful finding as to reasonableness of those rates. HELD, this contention is without merit. Section 15 of the act specifically empowers commission that whenever after full hearing, it is of opinion that a rate is or will be unreasonable, to determine and prescribe what will be reasonable future rate, and until that rate is established higher rate applied continues to be unreasonable to extent found. Reparation awarded. United States v. Director General, 118 I. C. C. 677.

(hh) On further hearing, reparation awarded complainant on interstate shipments moving subsequent to date of second hearing to and from Lake Denmark and Picatinny, N. J., and on which charges were paid at class rates found unreasonable in original report, 80 I. C. C. 143. United States v. Director General, 118 I. C. C. 677.

(ii) In 89 I. C. C. 170, the Commission found the carload rates on anthracite and bituminous coal from Lake Superior docks to Sioux City, Ia., were unreasonable and unduly prejudicial. The rates from the Lake Superior docks to Sioux City at the time of the original decision were $3.59 on bituminous coal and $3.89 on anthracite coal. The short route distance was 408 miles from Duluth. Commission prescribed $3.35 and $3.53, respectively. The rates on lump coal to Sioux City at the time of the original decision were $3.71 from the northern Illinois district, $4.18 from the Springfield group, $4.30 from the Belleville group, $4.48 from the Southern Illinois district. HELD, rates attacked during the reparation period unreasonable to extent they exceeded from Lake Superior $3.92 and $3.72 prior to July 1, 1922 and on and after that date $3.35 and $3.53; on lump coal from northern Illinois and Fulton-Peoria districts $3.83, from the Springfield group $4.28, $4.50 from Belleville and Centralia groups, $4.61 from the southern Illinois and Duquoin groups prior to July 1, 1922 and $3.45, $3.85, $4.05, and $4.15 subsequently, reparation awarded. Sioux City Chamber of Commerce v. C. B. & Q. Ry., 120 I. C. C. 7.

(jj) In 101 I. C. C. 621, division 4 found that the sixth class rates of $5.10 per long ton on scrap iron, carloads, during Nov. 1921 from Dunbar, W. Va., to Weirton, W. Va., over an interstate route, as unreasonable to extent it exceeded $3.92 per long ton. HELD, reparation awarded. Hilb & Bauer v. N. Y. C. R. R., 120 I. C. C. 421.

(kk) In 83 I. C. C. 737 the Commission found rates on coal in carloads, from mines on the Greenbrier & Eastern R. R. to destinations unreasonable to extent they exceed the group rates maintained from branch line points on the C. & O. in the New River district in West Virginia to the same destinations. In 96 I. C. C. 124, on rehearing, the Commission found the rates unreasonable and unduly prejudicial to the extent they exceeded the New River district rates. HELD, reparation awarded. Nelson Fuel Co. v. C. & O. Ry., 120 I. C. C. 723.

(ll) Complainant attacked class rates charged on eight cars of manganese steel scrap shipped between June 11 and Aug. 28, 1924 from New Castle, Del., to Chicago Heights, Ill., as unreasonable to extent they exceeded $6, prescribed in 92 I. C. C. 194. HELD, rate attacked unreasonable to extent it exceeded $6, reparation awarded. Chicago Heights Mfrs. Asso. v. P. R. R., 120 I. C. C. 739.

(mm) Rates on anthracite and bituminous coal from Lake Superior docks and on bituminous lump coal from various Illinois groups to Sioux City, Iowa, found unreasonable prior to establishment of rates prescribed by commission in the Lake Dock Coal Cases, 89 I. C. C. 170. Sioux City Chamber of Commerce v. B. & O., 120 I. C. C. 7.

(nn) Carriers resisted an award of reparation to basis of rates prescribed in another proceeding by citing previous expressions of commission to effect that reparation will not ordinarily be awarded where a general adjustment is made resulting in both increases and reductions.

HELD, where shippers have been charged rates very much above the general level in same immediate territory, and in making sales have absorbed the difference between its rates and those of its competitors, it has clearly been damaged by such an adjustment to extent that its rates were above the somewhat higher level prescribed. Nat'l. Car Coupler Co. v. A., T. & S. F., 120 I. C. C. 37, 38.

(oo) Original report, finding that rates "are and for the future will be unreasonable" was reopened upon petition of carriers. Thereafter, complainants were permitted to amend their complaint with an allegation of damages. Report on further hearing reiterated the original finding and in addition awarded reparation. Upon contention that wording of commission's reports did not cover unreasonableness in past, HELD: while the word "were" was omitted from finding of unreasonableness in report awarding reparation, the question of past unreasonableness entered into the proceeding when amended complaint was filed. Evidence, upon which original report, later affirmed, was made, being presented some months prior to beginning of reparation period, and second report making provision for proof in affidavit form as to shipments moving subsequent to date of second hearing, shows inconsistency of any attempt to construe the finding as operative only on and after the date of decision in second report. Nelson Fuel Co. v. C. & O., 120 I. C. C. 723.

(pp) Complainant attacked commodity rates charged on cars of gasoline shipped from Casper, Wyo., to Ogden, Price, Provo, and Salt Lake City, Utah, between Nov. 20, 1923 and Dec. 21, 1924 as unjust and unreasonable. Charged to Ogden and Salt Lake City 83.5c and to Provo and Price 96.5c. Reparation is sought to basis of 66c found reasonable from Casper to Ogden, Salt Lake City and Provo in 92 I. C. C. 376 which were established Dec. 22, 1924. HELD, rate attacked to Salt Lake City and Provo unreasonable to extent they exceeded 66c, to Price unreasonable to extent it exceeded 78c and to Ogden via the D. & R. G. W. not unreasonable, reparation awarded. Texas Co. v. C. B. & Q. R. R., 122 I. C. C. 109.

(qq) Complainant attacked commodity rates charged on numerous cars of petroleum products, including gasoline and lubricating oil, shipped between Feb. and Dec. 22, 1924 from Casper, Wyo., Florence & Minnequa, Colo., Richmond and El Segundo, Calif., to various points in Utah, including Ogden, Price and Salt Lake City and to De Beque, Colo., as unreasonable. Charged from Casper of 83.5c to Salt Lake City and 96.5c to Price and De Beque; 67.5c from Florence to Salt Lake City, Price; 85c from Richmond and El Segundo to Salt Lake City and Ogden; and 74.5c from Minnequa to Castle Gate, Utah. HELD, following 122 I. C. C. 109, rate attacked from Florence to the destinations named unreasonable to extent it exceeded 60c, reparation awarded. Continental Oil Co. v. A. T. & S. F. Ry., 122 I. C. C. 335.

(rr) Complainant attacked fifth class rate of 18c charged on tank cars of crude glycerine shipped from Milwaukee, Wis., to U. S. Yards, Chicago, Ill., between Dec. 30, 1923 and July 23, 1924 as unjust and unreasonable. Effective Oct. 28, 1924 a commodity rate of 13c was established. HELD, rate attacked unreasonable to extent it exceeded 13c, reparation awarded. Armour & Co. v. C. M. & St. P. Ry., 122 I. C. C. 380.

(ss) Complainant attacked commodity rates charged on 92 cars of wooden doors shipped between May 20, 1922 and Nov. 9, 1923 from Hoquiam, Wash., to trunk line and New England territories as unreasonable. Hoquiam is about 57 miles west of Centralia, Wash. The rates charged exceeded by various amounts the rates found reasonable in 78 I. C. C. 495, from north Pacific coast territory to the destinations here considered. HELD, rates attacked unreasonable to extent they exceeded rates prescribed in 78 I. C. C. 495, reparation awarded. American Door & Mfg. Co. v. B. & O. R. R., 122 I. C. C. 471.

(tt) In 118 I. C. C. 37, the Commission found the rate charged on green salted hides, in carloads, from Meridian, Miss., to Portville, N. Y., prior to July 1, 1922 was unreasonable to extent it exceeded 75.5c, and subsequent thereto 38c. On Dec. 2, 1926 defendant petitioned for a modification of the order so as to prescribe a rate of 71c. In compliance with 104 I. C. C. 37 the carriers established a rate of 71c. HELD, rate attacked unreasonable to extent it exceeded 79c prior to July 1, 1922 and 71c thereafter, reparation awarded. Northwestern Leather Trust Co. v. M. & O. R. R., 122 I. C. C. 517.

(uu) In 115 I. C. C. 667, division 3 found that the rates on rosin and turpentine, from Louisiana and Texas producing points, to certain destinations in central territory were unreasonable and unduly prejudicial. The record does not support a finding that the rates attacked were unreasonable in the past. The finding of unreasonableness should have been confined to rates for the future. HELD, rates attacked not unreasonable in past, to Kansas City not unduly prejudicial but unreasonable for the future to extent they exceed rates of 36c on rosin and 56c on turpentine, and maximum reasonable and nonprejudicial rates for the future will be as prescribed in the original report. Turpentine & Rosin Producers Asso. v. A. & V. Ry., 122 I. C. C. 549.

(vv) Upon further hearing, finding in former report, 88 I. C. C. 747, that rates on roofing and paving material from St. Louis and Kansas City, Mo., Cleveland and Lockland, Ohio, and Chicago, Aurora, Madison, Marseilles, and East St. Louis, Ill., to Little Rock, Ark., were not unreasonable or otherwise unlawful, affirmed. Complainants point out that reparation has been awarded on commission's special docket covering claims on similar shipments. However, such awards were based upon admission of carriers that rates charged were unreasonable. There is no such admission in this case, record is more complete and fails to establish that rates charged were unreasonable. Cooperative Oil & Paint Co. v. Director General, 122 I. C. C. 227.

(ww) Reparation awarded in former report 96 I. C. C. 412, under finding of unreasonableness of combination rate on lepidolite ore from Embudo, N. Mex., to Wheeling, W. Va., held not to lower shipments which moved over a delivering line not named in the complaint, and over whose line combination rate was not found unreasonable. Opportunity to justify reasonableness of rate over its route was never afforded the delivering carrier, nor were defendant carriers put on notice that reparation was sought on shipments delivered by it. New Mexico Corp. Commission v. A., T. & S. F., 123 I. C. C. 675.

(xx) Complainant attacked fifth class rates charged on 12 shipments of structural steel carloads, from Denison, Tex., to Henryetta, Okla., during August 1924, as unreasonable. Denison is served by the M. K. T., Frisco and K. O. & G., Henryetta served by the Frisco and K. O. & G. Shipments were routed over M. K. T. and Frisco, 209.6 miles, charged fifth class rate of 50.5c based on short single line distance of 150.5 miles over the K. O. & G. Complainant is seeking reparation based on rate of 29c prescribed in Memphis Southwestern Inves-igation, 77 I. C. C. 473, on structural steel for single line distances of 160 and over 150 miles. The joint line scale was 36c. HELD, rate attacked unreasonable to extent it exceeded 36c, reparation awarded. Okmulgee County Commissioners v. M. K. T. Ry., 126 I. C. C. 1.

(yy) In a supplemental report, Burns & Knapp v. B. S. & K. R. Co., 74 I. C. C. 111, the Commission found complainants were entitled to reparation from that carrier, because of unreasonable rates on lumber from Sherman, Ky., to interstate destinations. Original report in 62 I. C. C. 345. HELD, reparation awarded. Burns & Knapp v. B. S. & K. R. Co., 126 I. C. C. 410.

(zz) In Western Newspaper Union v. Director General, 69 I. C. C. 523, the Commission found unreasonable the less carload rating in official classification, and the rates applicable in connection therewith, on stereotype plates, old, worn out, or scrap, broken or unbroken, shipped with type faces unprotected, and valuable only for remelting. HELD, reparation awarded. Western Newspaper Union v. Director General, 126 I. C. C. 437.

(3a) In original report, 118 I. C. C. 524, rates on cordwood from Twin and Crosby, Miss., to Braithwaite, La., were found unreasonable. Complaint alleged that five shipments involved originated at Crosby, but freight bills submitted in evidence indicated that two were shipped from Goodyear, Miss., and as rates from latter point were not assailed no consideration was given those shipments. Upon further consideration the two shipments eliminated from original report found to have originated at Crosby, Goodyear being the point from which they were waybilled. Reparation awarded. E-Z Opener Bag Co. v. P. R. V., 128 I. C. C. 48.

(3b) Complainant alleged rates charged on cordwood, carloads, from Twin and Crosby, Miss., shipped during May and Oct. 1923 to Braithwaite, La., were unreasonable. In E-Z Opener Bag

Co. v. P. R. V. R. R., 118 I. C. C. 524, the Commission found the rates charged unreasonable and awarded reparation. Shipments originated at Crosby and billing point was Goodyear. HELD, reparation awarded. E-Z Opener Bag Co. v. P. R. V. R. R., 128 I. C. C. 48.

(3c) Complainant attacked commodity rate of 42c charged on lubricating oil, in tank car loads, from Galena, Port Arthur, and West Port Arthur, Tex., to Topeka, Kas., as unreasonable and unduly prejudicial. In White Eagle Oil & Refining Co. v. A., T. & S. F. Ry., 122 I. C. C. 223, the Commission found the rate attacked since Sept. 15, 1925 unreasonable and unduly prejudicial to extent it exceeded 32c. Upon reconsideration, HELD, rate attacked not unreasonable on past shipments but for future unreasonable and unduly prejudicial to extent it exceeds 34c, reparation denied. White Eagle Oil & Refining Co. v. A., T. & S. F. Ry., 128 I. C. C. 55.

(3d) Upon further hearing, original report 95 I. C. C. 104, reversed in part, following 118 I. C. C. 725. Rates on scrap brass and copper from certain points in New York and New Jersey to East Liberty and Pittsburgh, Pa., found unreasonable with certain exceptions. Reparation awarded. Union Smelting & Refining Co. v. C. R. R. of N. J., 128 I. C. C. 129.

(3e) Complainant attacked commodity rates charged on numerous carloads of tin plate two years prior to August 24, 1925 from McKeesport, Pa., to New London, Wis., as unreasonable. Charged through rate of 54c. In Borden Co. v. A. A. R. R. Co. 100 I. C. C. 153, the Commission found these rates on and after July 1, 1922 unreasonable to extent they exceeded 51.5c via Manitowoc, Wis., and 51c via Kewanee, Wis. A rate not to exceed 51c via either Manitowoc or Kewanee was prescribed for the future. HELD, rate attacked unreasonable to extent it exceeded those found reasonable in Borden case, reparation awarded. McKeesport Tin Plate Co. v. A. A. R. R. Co., 128 I. C. C. 259.

(3f) In Kendall Refining Co. v. A. & V. Ry., 118 I. C. C. 689, the Commission found not unreasonable the rates on gasoline, in carloads, from Texas and Oklahoma to Bradford, Pa., and denied relief under the fourth section. From the Texas points to Bradford the rates assailed were 71.5c prior to May, 1924 and 70c thereafter. The corresponding rates to Buffalo, N. Y., were 65.5 and 64c. From Oklahoma to Bradford rate assailed 67c, to Buffalo 60.5c. HELD, rates attacked unreasonable to extent they exceed the rates to Buffalo, reparation awarded. Kendall Refining Co. v. A. & V. Ry., 128 I. C. C. 427.

(3g) Complainant attacked commodity rate of 83.5c charged on 16 cars of box shooks between Aug. 13 and Oct. 3, 1923 from Bend, Oreg., to Port Arthur, Tex., as unreasonable to extent it exceeded 79.5c. Complainants case is based primarily on West Coast Lumbermens Asso. v. A. & S. Ry., 78 I. C. C. 746. The rates prescribed in that case were established Oct. 5, 1923. The shipments on which complainant sought reparation moved during the period between Aug. 11, the effective date of the original order, and Oct. 5, 1923 the effective date of the amended order. Complainant introduced no evidence in support of its contention as to the unreasonableness of the rates attacked during that period. HELD, rates attacked not unreasonable, Complaint dismissed. Shelvin Hixon Co. v. O. W. R. R. & N. Co., 128 I. C. C. 565.

(3h) Following commission's decision in 122 I. C. C. 15, reparation denied on paving brick from Murphysboro, Ill., to Martin, Tenn., moving prior to establishment of rates in conformity with general readjustment of rates on brick prescribed in 88 I. C. C. 543. Revision ordered by commission in that case, to basis of which complainant here seeks reparation, affected a large territory and involved numerous increases as well as reductions, under the circumstances of which reparation has been consistently denied. Murphysboro Paving Brick Co. v. I. C. 128 I. C. C. 635.

(3i) Contention of carrier that reparation should be denied on shipments moving prior to change in classification rating, citing 88 I. C. C. 103, and other cases, not sustained. Ratings assailed in cases cited were not shown to have been unreasonable as applied to past shipments. Tennessee Furniture Corp. v. B. & O. C. T., 128 I. C. C. 701, 702.

(3j) In Hill v. A., T. & S. F. Ry., 107 I. C. C. 101, the Commission found the rates on fruits and vegetables, in carloads and less carloads, from California points to Prescott, Ariz., unreasonable and awarded reparation. HELD, reparation awarded. Hill v. A., T. & S. F. Ry., 129 I. C. C. 323.

(3k) Complainant alleged that commodity rates charged on common unglazed doors, in straight carloads, shipped between March 1, 1922 and Dec. 1, 1923 from Oregon and Washington to destinations in trunk line and New England territories were unreasonable. The rates charged were commodity rates from the points of origin to Mississippi river crossings and to Chicago, Ill., plus the fifth class rates beyond. These combination rates applied subsequent to Oct. 21, 1915. Prior to that date joint rates were in effect. In Anson Gilkey Hurd Co. v. S. P. Co. 78 I. C. C. 495, 513, decided Jan. 16, 1923, the combination rates were found unreasonable to the extent that they exceeded 115% of the lumber rates prior to Dec. 24, 1921 and subsequent thereto, to the extent that they exceeded 115% of the lumber rates "in effect between the same points on Dec. 23, 1921". Reparation was awarded. HELD, rates assailed unreasonable to the extent they exceeded the rates from and to the same points on the same commodity found reasonable in Anson Gilkey & Hurd Co. supra, reparation awarded. M & M Wood Working Co. v. O. W. R. R. & N. Co., 129 I. C. C. 329.

(3l) In Washington Publishers Asso. v. B. & O. R. R., 98 I. C. C. 329 and 102 I. C. C. 662, the Commission found the rates on newsprint paper, in carloads, from New England, New York and Canada to Washington, D. C., were unreasonable to extent they exceeded the rates to Baltimore, Md., by more than 2c per 100 pounds, and that the rates from Philadelphia, Pa., to Washington were unreasonable to the extent they exceeded the rates to Baltimore by more than 2c. HELD, reparation awarded. Washington Publishers Asso. v. B. & O. R. R., 129 I. C. C. 360.

(3m) In Coulbourn Fruit Co. v. B. & O. R. R., 104 I. C. C. 734, the Commission found that the rates on strawberries and tomatoes from Kentucky and Tennessee to Youngstown, O., were unreasonable and awarded reparation. Shipment originally moved to Cleveland, O., thence reconsigned to Youngstown, moving over the L. & M., to Cincinnati, O., Big Four to Cleveland, and B. & O. beyond, 753 miles, charged 75.5c to Cleveland and fourth class 24.5c beyond. The rate to Pittsburgh rate points was unrestricted as to routing, and was applicable over the same line and route this shipment moved through Youngstown. Pittsburgh is 72 miles beyond Youngstown. As the Big Four is a party to the joint rate beyond the river it is not essential that it be a party defendant. HELD, original finding affirmed that rate was unreasonable to extent it exceeded 81.5c, reparation awarded. Coulbourn Fruit Co. v. B. & O. R. R., 129 I. C. C. 441.

(3n) Complainant alleged joint rates on rags and waste paper, in carloads, from interstate points to Kingston, Pa., composed of rates to Latrobe, Pa., plus certain arbitraries, were inapplicable. Original report, 88 I. C. C. 535, and 96 I. C .C. 226. HELD, reparation awarded. Barrett Co, v. Director General, 132 I. C. C. 82.

(3o) Complainants alleged that the interstate rates on fresh meats and packing house products in less carloads or peddler car quantities, from El Paso, Tex., to Arizona, New Mexico and Texas were unreasonable. Original report 100 I. C. C. 4 HELD, reparation awarded Peyton Packing Co. v. A. E. R. R., 132 I. C. C. 149.

(3p) Complainant alleged fourth class rating on automobile bow sockets in official classification and fourth class rates were unreasonable to extent they exceeded fifth class ratings and rates. Original report, 109 I. C. C. 184. HELD, reparation awarded. Chevrolet Motor Co. v. B. & O. R. R., 132 I. C. C. 151.

(3q) In Tallulah Cotton Oil Co. v. A. & V. Ry., 126 I. C. C. 723, the Commission found that the rates on cottonseed, carloads, to Jackson and Newton, Miss., from the origin points involved, had been since Nov. 27, 1923, were, and for the future would be unreasonable, reparation awarded. Defendant M. P. points out that compliance with the order will create fourth section departures at several intermediate points. This was caused partly through misinformation as to the distance from the several points, and partly through lack of information as to an available route through Natchez. HELD, rates assailed unreasonable to extent they exceed rates ranging from 16.5c to 24.5c, reparation awarded. Tallulah Cotton Oil Co. v. A. & V. Ry., 132 I. C. C. 558.

(3r) Complainant alleged commodity rates charged on fresh meats and packing house products, in straight or mixed carloads, from Chicago, Ill., Mil-

waukee, Wis., and South St. Paul, Minn., to Houghton, Mich., were unreasonable. Evidence is confined to shipments from South St. Paul. Shipments moved C. St. P. M. & O. and D. S. S. & A., charged 72c on fresh meats and 38.5c on packing house products. In Armour & Company v. C., M. & St. P. Ry., 115 I. C. C. 68, Commission found that these rates were unreasonable to extent they exceeded 57.5c on fresh meats and 34.5c on packing house products. HELD, rates assailed unreasonable to extent they exceeded 57.5c and 34.5c reparation awarded. Weiber & Son v. C. M. & St. P. Ry., 132 I. C. C. 625.

(3s) Upon further hearing, the finding in former report, 104 I. C. C. 734, that rates on a shipment of tomatoes from Gibson, Tenn., to Youngstown, Ohio, were unreasonable to extent they exceeded lower rates in effect to Pittsburgh, Pa., rate points, and the award of reparation, affirmed. Original record indicated that shipment moved over L. & N. to the Ohio River, and the B. & O. beyond. Further evidence, however, showed that shipment moved to Cleveland over the L. & N. and the C., C., C. & St. L., and was thence reconsigned to Youngstown Upon contention that as rate to Pittsburgh rate points does not apply through Cleveland, and as the C., C., C. & St. L. was not a party defendant, the commission's order for reparation can not run against that carrier, FOUND: Rate to Pittsburgh rate points was unrestricted as to routing and was applicable over same line and route shipment moved through Youngstown. Moreoevr, as the C., C., C. & St. L. was a party to joint rate beyond the river, it was not essential that it be a party defendant, the liability of carriers parties to a rate being joint and several. Coulbourn Fruit Co. v. B. & O., 129 I. C. C. 441

(3t) Fourth-class rates on baking powder found not unreasonable or otherwise unlawful. Complainant contends that rate assailed was unreasonable to extent it exceeded fifth-class rate subsequently established following decision in 112 I. C. C. 645, in which fourth-class rating was found unreasonable to extent it exceeded fifth class, and as it was a party to that complaint it now seeks reparation on shipments which moved during the two years previous to date lower rate was established. However, in 20 I. C. C. 43, it was found that subsequent reduction of a rate is not of itself sufficient to justify an award of reparation. Moreover, no reparation was sought in first cited case and Rule III (s) of Rules of Practice provides that reparation will not be awarded upon a complaint in which it is not specifically prayed for or upon a new complaint by same complainant based upon finding in original proceeding. Royal Distributing Co. Inc. v. B. & O., 129 I. C. C. 749.

(3u) Report of Interstate Commerce Commission, after investigation on its own motion, finding that present rates of certain commodities would in future be unjust and unreasonable, HELD not definite adjudication that as of that date rates were unjust and unreasonable, so as to authorize action for recovery of charges between such time and date order was made effective, in view of Interstate Commerce Act, § 15, par. 1, and requiring Commission to make order changing rates, and in view of section 13, par. 2, as amended by Act Feb. 28, 1920, § 416 forbidding Commission in proceedings on its own motion to enter orders for payment of money. Jeanneret v. Chicago, B. & Q. R. Co., 17 Fed. (2d.) 978.

§10½. Necessity Of Showing Damage.

See Allowances VI; Discrimination §15, §17; Interstate Commerce Commission VI; Long and Short Hauls §13.

(a) A shipper is damaged when he pays unreasonable transportation charges, and it is not necessary to go beyond first step. See 88 I. C. C. 492, Albers Bros. Milling Co. v. Director General, 104 I. C. C. 330, 332.

(b) A carrier's failure to comply with certain tariff rules may make it liable to penalty provisions of the act, but such failure is not a sufficient basis for an award of reparation where evidence does not show that shipper was damaged thereby. Curtis v. Director General, 109 I. C. C. 378, 379.

(c) Before any party can recover damages under interstate commerce act he must allege and show not merely the wrong of carrier but that the wrong has in fact operated to his injury. See 230 U. S. 184, 206. Crosby v. St. L.-S. F., 112 I. C. C. 239, 243.

(d) Reparation awarded for undue prejudice where it was shown that complainant was compelled to shrink its

profits in meeting competition of competitors located at the preferred points. Foster Lbr. Co. v. V. & S., 112 I. C. C. 651, 654.

(e) Complainant sought reparation on shipments of zinc ore moving from certain Kansas and Oklahoma points to Van Buren, Ark., based upon finding in 93 I. C. C. 119, wherein it was found that rates from the Joplin field to South Ft. Smith, Ark., were unduly prejudicial in favor of competitors operating zinc smelters at East St. Louis and other points in Illinois and Indiana. As proof of damage complainant relied upon comparisons of rates assailed with rates to competing points; and with testimony that service and commodities were the same, and that spelter was manufactured by smelters at those points under practically same conditions and sold on East St. Louis market basis regardless of point of production. HELD: Character of proof submitted, not being in conformity with the rule laid down by Supreme Court in 230 U. S. 184, and by commission in 55 I. C. C. 703, and a long line of other decisions, reparation denied. Falcon Zinc Co. v. N. E. O. R. R., 113 I. C. C. 265.

(f) Complainant and intervener are not entitled to reparation unless the rating and rates which have prevailed in the past have resulted under all the circumstances in unreasonable charges. There is no proof that complainant or intervener was damaged by reason of any undue prejudice which may have existed. Best Foods v. C. R. R. of N. J., 120 I. C. C. 169, 174.

(g) On further hearing, reparation denied on stave shipments from Crowder, Miss., to interstate points, on account of alleged damage due to undue prejudice in favor of Batesville and Charleston, Miss., competing points shipping to same destinations. Complainant contended that because of lower rates from Charleston it was compelled to absorb excess freight charges to meet Charleston prices. However, it was not shown with reasonable certainty that complainant's sole competition was with Charleston, particularly on shipments to manufacturers using barrels for commodities not known to complainant; that profits were reduced because of lower Charleston rates; or that such rates were the only or proximate cause of injury alleged. Hollingshead Co. v. Director General, 120 I. C. C. 55.

(h) The fact that complainant's competitors were placed in a more favorable position does not of itself establish damage to complainants. Complainant's evidence shows neither the fact nor the amount of damage sustained by reason of any undue prejudice which may have existed. The burden of proof to establish the fact and amount of damage due to unjust discrimination or undue prejudice as the proximate cause is upon complainants. Whittemore's Sons v. N. Y. N. H. & H. R. R., 122 I. C. C. 451, 457.

(i) Where undue prejudice has been established and reparation is prayed not only the injury but the fact and amount of resulting damage must be proved. City Coal Co. v. N. Y. N. H. & H. R. R., 123 I. C. C. 609, 611.

(j) Upon further hearing, reparation awarded upon proof of damage sustained due to exaction of unreasonable rates on shipments of lumber from Sherman, Ky., to interstate destinations, carriers having refused to certify and file with commission complainant's statement prepared under Rule V of Rules of Practice. Former report 74 I. C. C. 111. Burns & Knapp v. B. S. & K. R. 126 I. C. C. 410.

(k) Under Interstate Commerce Act, §16 (Comp. St. 8584) recovery for excessive freight charges exacted in violation of section 1 (Comp. St. § 8563) can be had, without special proof of pecuniary loss, and measure of damages is amount of excess exacted. Louisville & N. R. Co. v. Sloss-Sheffield Steel & Iron Co., 46 Sup. Ct. 73.

(l) Under Interstate Commerce Act, § 16 (Comp. St. § 8584), the liability for exaction of excessive freight charges arises out of the wrongful exaction from the shipper, and not the unlawful receipt or unlawful enrichment of the carrier. Louisville & N. R. Co. v. Sloss-Sheffield Steel & Iron Co., 46 Sup. Ct. 73.

(m) The shipper is damaged when he pays the unreasonable transportation charges and it is unnecessary for him to go beyond this first step in order to be entitled to an award of reparation. Davies & Thomas v. C. R. R. of N. J., 128 I. C. C. 241, 242.

(n) Proof of damage in undue prejudice cases must be of such evidentiary facts as would be required to sustain such a recovery before a court of law. Knoxville Iron Co. v. L. & N. R. R., 128 I. C. C. 513, 514.

(o) Where a shipper has paid a rate afterwards declared to be unreasonable he may recover damages in the amount of the difference between the excessive rate and the rate declared to be just and reasonable without proof of actual injury. The party who pays the unreasonable rate is damaged. Jackson v. M. C. Ry., 129 I. C. C. 235, 240.

(p) The courts generally hold that, although loss of profits of an established business may be taken into account in an award of damages where they are susceptible of proof, anticipated profits of a new business are too speculative to form the basis of such an award because of absence of provable data from which to estimate them. Carnes v. A., T. & S. F. Ry., 129 I. C. C. 341, 348.

§11. Rate Via Competing Route.

See Evidence §47; Routing and Misrouting §5.

(a) Contention that existence over routes other than those of actual movement of rates lower than those charged over routes of movement does not warrant a finding of unreasonableness and award of reparation where shippers are advised of existence of such lower rates, not sustained. Shippers' knowledge of existence of lower rates over other routes can not deprive them of right to reasonable rates over routes of movement. Canton Bridge Co. v. B. & O., 107 I. C. C. 141, 144.

(b) Complainant attacked combination class rate of 92c charged on two tank cars of gasoline, shipped in July, 1924, from Los Angeles, Calif., to Reno, Nev., as unreasonable. Shipments moved 515 miles over Santa Fe to Stockton, thence 281 miles over W. P. to destination, applicable rate fifth class of 38.5c to Stockton and 53.5c beyond. There was contemporaneously in effect over the S. P. a fifth class rate of 84c applicable on gasoline, in tank cars, from and to these points. This rate was subsequently made effective over the route of movement. Distance via S. P. 595 miles. Defendants express a willingness to make reparation to the basis of the 84c rate because their rates were out of line with that of the S. P. HELD: Rate attacked unreasonable to extent it exceeded 84c, reparation awarded. Richfield Oil Co. v. A. T. & S. F. Ry., 118 I. C. C. 214.

§12. Readjustment Of Rates.

See Evidence §66; Relative Rates.

(a) Where a proceeding constitutes a general readjustment of rates involving both increases and reductions reparation will be denied. Cattle & Horse Raisers Asso. v. N. P., 104 I. C. C. 51, 64.

(b) In cases where a readjustment of rates is required throughout an extensive territory, involving both increases and reductions and affecting shippers at many points, substantial justice would not be advanced by awarding reparation. West Coast Lumbermen's Asso. v. A. & S., 104 I. C. C. 695, 702.

(c) Where reductions are established as a result of a general readjustment of rates, reparation will be denied. Chicago Fire Brick Co. v. A. & W., 107 I. C. C. 399, 407.

(d) Reparation is not regarded as proper and none will be awarded in cases involving a general adjustment under which certain rates are found unreasonably high, and others upon less than a maximum reasonable basis. Burlington Shippers' Asso. v. A., T. & S. F., 107 I. C. C. 694, 700.

(e) Where rates established by commission throughout an extensive territory result in a comprehensive readjustment of rates, including both increases and reductions, reparation will be denied. Southwestern Brick Cases, 107 I. C. C. 681, 700; Mason City Brick and Tile Co. v. Director General, 107 I. C. C. 702, 720.

(f) Where a comprehensive and systematic readjustment of rates is prescribed by commission within a large section of territory, claims for reparation will not ordinarily be allowed. Cook v. A., T. & S. F., 109 I. C. C. 493, 496.

(g) Reparation is not regarded as proper and none will be awarded in cases involving a general adjustment under which certain rates are found unreasonably high, and others upon less than a maximum reasonable basis. Burlington Shippers' Asso. v. A., T. & S. F., 109 I. C. C. 694, 700.

(h) Where readjustments of rates have been initiated by carriers, the exercise of their judgment in good faith and within reasonable limits should not be at peril of liability of reparation; and awarding of reparation by no means necessarily follows the reduction of a rate

by their voluntary action. See 58 I. C. C. 46. Western Paper Makers Chemical Co. v. G. & S. I., 112 I. C. C. 221, 222.

(i) Where findings of commission involve a general readjustment of rates, reparation should have no place. Standard Paint Co. v. Director General, 112 I. C. C. 589, 600.

(j) Contention that shipper is not entitled to reparation because rates in issue constitute part of a general readjustment of rates, not sustained. Commission's findings in instant case will produce only reductions; moreover, damages were awarded in the cases relied upon to establish the contention put forward. Nuckolls Packing Co. v. A. T. & S. F., 113 I. C. C. 229, 232.

(k) Reparation will not ordinarily be awarded to basis of a finding resulting in a widespread readjustment of rates. See 102 I. C. C. 753. Booth & Flinn v. P. R. R., 113 I. C. C. 613, 616.

(l) The commission has consistently denied reparation in cases where general readjustments have been made in extensive territories, resulting in both increases and reductions. See 87 I. C. C. 451, 468; moreover, the mere reduction of a rate is insufficient to prove that the higher rate formerly charged was unreasonable. 85 I. C. C. 449. Dulle Milling Co. v. M. P., 113 I. C. C. 742, 743.

(m) Reparation will not ordinarily be awarded to the basis of a finding made in a general investigation resulting in a widespread readjustment of rates causing both increases and decreases and where rates have been prescribed primarily to remove undue prejudice. Beatty Coal Co. v. A. V. I. U. Ry., 115 I. C. C. 8, 14.

(n) Reparation has been denied in a number of cases where the rates have been revised to the basis found reasonable in the original case primarily on the ground that that case resulted in a comprehensive and systematic readjustment in a large territory where both reductions and increases resulted. Iola Cement Mills Traffic Assn. v. A. V. I. Ry., 115 I. C. C. 49, 64.

(o) The commission has consistently denied reparation in cases where general readjustments have been made in extensive territories involving both increases and reductions. Iola Cement Mills Traffic Assn. v. A. V. I. Ry., 115 I. C. C. 49, 64.

(pqrs) Where commission's findings result in a general readjustment of rates reparation will be denied. Turpentine & Rosin Producers Asso. v. A. & V., 115 I. C. C. 667, 674.

(t) Upon complaint seeking reparation on shipments of sugar from points in Utah and Idaho to destinations in Minnesota, Wisconsin, South Dakota, Iowa, and Michigan, to basis subsequently established by carriers in compliance with commission's findings in Sugar Cases of 1922, 81 I. C. C. 448. HELD, the cited case constituted a general readjustment of rates, following which, reparation in the past is generally denied. Accordingly, similar action must be taken in instant case. Utah-Idaho Sugar Co. v. C., R. I. & P., 118 I. C. C. 256, 261, 262.

(u) Principle that reparation should not be awarded following a general rate readjustment effecting both increases and reductions has no application in instances where charges assessed on particular traffic exceed those found reasonable by such substantial amounts as to be intrinsically unreasonable under any adjustment. See 98 I. C. C. 581. Bender Iron & Supply Co. v. K. C. S., 118 I. C. C. 661, 666.

(v) Carriers objected to an award of reparation contending that rates prescribed by commission to basis of which reparation is sought constituted part of a general readjustment of rates. HELD, as this case might have been heard and decided independently of other cases with which it was consolidated, without any different result, it would be unjust to complainants for reparation to be denied, particularly because cases here were heard and decided together at request of carriers and over complainant's protest. Sioux City Chamber of Commerce v. B. & O., 120 I. C. C. 7, 16.

(w) Carriers resisted an award of reparation to basis of rates prescribed in another proceeding by citing previous expressions of commission to effect that reparation will not ordinarily be awarded where a general adjustment is made resulting in both increases and reductions. HELD, where shippers have been charged rates very much above the general level in same immediate territory, and in making sales have absorbed the difference between its rates and those of its competitors, it has clearly been damaged by such an adjustment to extent that its rates were above the somewhat

higher level prescribed. Nat'l. Car Coupler Co. v. A., T. & S. F., 120 I. C. C. 37, 38.

(x) Reparation will be denied where changes required or contemplated by commission's findings are portions of general rate readjustments involving both increases and reductions. Mayfield Chamber of Commerce v. A. & W., 120 I. C. C. 137, 145.

(y) Where the commission previously found proposed increased rates on a commodity justified, fact that 10 years later reductions were ordered in such rates upon a comprehensive record in a new proceeding carries with it no presumption that the earlier decision was erroneous. Under such circumstances claimants have no vested right to awards of reparation based upon theory that unreasonableness must have existed during a period extending from a date two years prior to the filing of their claims until reduced rates prescribed in latter proceeding became or may become effective. Morrell & Co. v. N. Y. C., 120 I. C. C. 537, 544.

(z) The revision ordered by the Commission affected a large territory and involved numerous increases as well as reductions. Under such circumstances the Commission has consistently denied reparation. Murphysboro Paving Brick Co. v. M. & O. R. R., 122 I. C. C. 15, 17.

(aa) The case dealt with general rate readjustments, in which the rates complained of were included. The Commission has frequently said that in such cases substantial justice would not be advanced by awarding reparation to those making such demands, and have denied reparation. Cooperative Oil & Paint Co. v. Director General, 122 I. C. C. 227, 228.

(bb) Rates on the bases approved will result in both increases and reductions. Under similar circumstances the Commission has repeatedly declined to award reparation. Federated Metals Corp. v. B. & O. R. R., 122 I. C. C. 513, 516.

(cc-ee) The usual and not unnatural selection in individual complaints of particular rates or a portion of a particular adjustment, with the view to their reduction and to reparation, should not be permitted to obscure the relations of those rates to the entire adjustment or the larger question of justice to all concerned. As often pointed out, in a general readjustment the carriers do not enjoy a compensating privilege of collecting additional amounts on shipments which have been made under such of the rates as are increased in the revision. The Commission is of opinion that in the circumstances here the relief accorded in respect of future rates meets all the requirements of substantial justice, and reparation is denied. Consolidated Southwestern Cases, 123 I. C. C. 203, 259.

(ff) Reparation denied on paving brick from Murphysboro, Ill., to Hickman, Ky., moving prior to establishment of rates in conformity with general readjustment of rates on brick prescribed in 88 I. C. C. 543. Revision ordered by commission in that case, to basis of which complainant here seeks reparation, affected a large territory and involved numerous increases as well as reductions, under the circumstances of which reparation has been consistently denied. Murphysboro Paving Brick Co. v. M. & O., 122 I. C. C. 15.

(gg) Carriers in contesting a claim for reparation cited cases in which commission refused to award reparation where a general readjustment of rates throughout an extensive territory was involved. HELD: Cases cited in which reparation was denied usually involved increases as well as decreases in rates. Same rule does not apply where a material reduction in every rate is made. Texas Co. v. C., B. & Q., 122 I. C. C. 109, 110, 111.

(hh) Where future rates are prescribed by commission and such rates result in a widespread readjustment of rates of long standing, a reasonable time must elapse between date of the decision and date when rates established pursuant thereto become effective. In such cases reparation on shipments moving between date of the decision and effective date of the order will be denied. Van Dyke Motor Co. v. M. P., 122 I. C. C. 411, 412.

(ii) The commission has repeatedly declined to award reparation following general rate adjustments involving both increases and reductions. Federated Metals Corp. v. B. & O., 122 I. C. C. 513.

(jj) The commission has repeatedly declined to award reparation following general rate adjustments involving increases and reductions. Federated Metals Corp. v. B. & O., 122 I. C. C. 513, 516, 517.

(kk) In prescribing a general readjustment of rates covering a wide territory, necessitating both increases and decreases, the commission will not award reparation. Turpentine & Rosin Producers Asso. v. A. & V., 122 I. C. C. 549.

(ll) Fact that rates are subjected to considerable reductions is in itself no sufficient ground for an award of reparation on past shipments where such rates are a part of a general readjustment involving important increases as well as reductions. But where general level of rates on a commodity is found to have been unreasonable, and practically all of assailed rates are reduced, situation presented is not in nature if a generally readjustment such as those in respect of which commission has consistently denied reparation, but is one in which an award of reparation is warranted. Parkersburg Rig & Reel Co. v. C., R. I. & P., 123 I. C. C. 79, 81.

(mm) It is commission's practice to deny reparation in cases where general readjustments have been made covering more or less extensive territories and with resulting increases and decreases in rates. The usual and not unnatural selection in individual complaints of particular rates or a portion of a particular adjustment, with the view to their reduction and to reparation, should not be permitted to obscure relations of those rates to entire adjustment or the larger question of justice to all concerned. In a general readjustment carriers do not enjoy a compensating privilege of collecting additional amounts on shipments which have been made under such rates as are increased in the revision. Consolidated Southwestern Cases, 123 I. C. C. 203, 259.

(nn) Upon contention of carriers that Memphis-Southwestern Investigation, 77 I. C. C. 473, constituted such a general readjustment of rates as to come within the rule generally followed of denying reparation in such cases, HELD: Issues in instant case are practically the same as those considered in a number of cases in which reparation has been awarded. See 92 I. C. C. 453 and other cited cases. Where scales prescribed in the general adjustment case were not used as a basis for reparation, particular circumstances warranted different conclusions. See 93 I. C. C. 667; 96 I. C. C. 81. Reparation awarded. Standard Oil Co. v. C., R. I. & P., 123 I. C. C. 669, 673.

(oo) Fact that a consolidated proceeding requiring a comprehensive readjustment of rates denied reparation on ground that compliance therewith resulted in both increases and reduction is not sufficient grounds to deny reparation in a subsequent proceeding dealing with same rates where compliance with findings and orders in the original proceedings, heard prior to the consolidated case, would have given complainant a lower rate at time of movement. Buffalo Brick Co., v. M. P. Ry., 126 I. C. C. 744, 746.

(pp) Reparation denied by reason of fact that proceeding in which it is sought involves a comprehensive readjustment of rates resulting in both increases and reductions. Oklahoma Portland Cement Co. v. D. & R. G. W., 128 I. C. C. 63, 84.

(qq) Commission's general practice of denying reparation when rates found unreasonable, and upon which particular shipments moved, are embraced in a general readjustment, involving both increases and reductions, does not apply in a case where the commodity involved was not embraced under the general readjustment; or where the particular class of rates within the region concerned under such readjustment results in reductions only, and the amounts by which the assailed rates exceed those prescribed as maxima for application to the traffic in question are too great to fall within the zone that lies between maximum and minimum reasonable rates. Oklahoma Traffic Asso. v. A. & V., 128 I. C. C. 89, 93.

(rr) It is the general practice of the Commission to deny reparation when the rates found unreasonable and upon which particular shipments moved were embraced in a general readjustment in which both increases and decreases have resulted from the findings. Oklahoma Traffic Asso. v. A. & V. Ry., 128 I. C. C. 89, 93.

(ss) Rate on box shooks from Bend, Oreg., to Port Arthur, Tex., found not unreasonable as compared with lower rate prescribed in 78 I. C. C. 746 on lumber products, including box shooks from the North Pacific Coast Group, including Bend, to group points including Port Arthur, established subsequent to movement herein. Upon further hearing in 104 I. C. C. 695, reparation was denied upon the theory that where, as here, readjustment of rates is required throughout an extensive territory involving both increases and reductions and affecting

shippers at many points, substantial justice would not be advanced by awarding reparation. Moreover, issues and contentions similar to those here presented were advanced in 100 I. C. C. 319, in which have denied reparation. Shelvin-Hixon Co. v. O. W. R. R. & N., Co. 128 I. C. C. 565.

(tt) In cases where a readjustment of rates is required throughout an extensive territory involving both increases and reductions and affecting shippers at many points substantial justice would not be advanced by awarding reparation, and have denied reparation. Shelvin Hixon Co. v. O.-W. R. R. & N. Co., 128 I. C. C. 565, 566.

(uu) Following commission's decision in 122 I. C. C. 15, reparation denied on paving brick from Murphysboro, Ill., to Martin, Tenn., moving prior to establishment of rates in conformity with general readjustment of rates on brick prescribed in 88 I. C. C. 543. Revision ordered by commission in that case, to basis of which complainant here seeks reparation, affected a large territory and involved numerous increases as well as reductions, under the circumstances of which reparation has been consistently denied. Murphysboro Paving Brick Co. v. I. C., 128 I. C. C. 635.

(vv) The Commission has frequently held that an order by it for the reduction of a classification rating of long standing does not create a right to an award of reparation on past shipments. Kalamazoo Vegetable Parchment Co. v. C. K. & S. Ry., 128 I. C. C. 675, 684.

(ww) The prescription of joint rates over a new route which will result in a wide spread adjustment of rates does not warrant an award of reparation on shipments made prior to the time that joint rates over the new route are required to be maintained. White Eagle Oil & Refining Co. v. C. B. & Q. R. R., 129 I. C. C. 467, 471.

(xx) As a general rule reparation is not awarded when a general readjustment reflects increases and reductions, but the rule does not apply when the rates charged exceed those found reasonable by such substantial amounts as to be unreasonable per se under any adjustment. Quanah Cotton Oil Co. v. A., T. & S. F. Ry., 132 I. C. C. 304, 309.

(yy) The principle that reparation should not be awarded following a general rate readjustment effecting both increases and reductions has no application in instances where the charges assessed on particular traffic exceed those found reasonable by such substantial amounts as to be intrinsically unreasonable under any adjustment. Nichols Wire, Sheet & Hardware Co. v. A., T. & S. F. Ry., 132 I. C. C. 347, 348.

(zz) As a general rule the Commission has denied reparation where such general readjustments, including both increases and reductions in rates, have been made in extensive territories. Southern Cement Rates, 132 I. C. C. 427, 467.

(3a) While as a general rule awards of reparation will not be made where the rates affected have been the subject of a general readjustment, this does not apply where the rates charged exceed those found reasonable by such substantial amounts as to be intrinsically unreasonable under any adjustment. Southeastern Sugar Investigation, 132 I. C. C. 477, 503.

(3b) The rates prescribed will result in both increases and reductions. In the case of such general readjustments of rates it is the usual practice of the Commission not to award reparation. Southeastern Sugar Investigation, 132 I. C. C. 477, 503.

(3c) The Commission has repeatedly found that reparation will not ordinarily be awarded to the basis of a finding made in a general investigation resulting in a widespread readjustment of rates causing both increases and decreases and where rates have been prescribed primarily to remove undue prejudice. Nebraska v. C. B. & Q. R. R., 132 I. C. C. 717, 720.

(3d) Complaint seeks reparation on shipments from Augusta and Topeka, Kans., to St. Francis, Kans., which moved via Kansas City, Mo., to basis of rates which may be found reasonable via Superior, Nebr. FOUND: Prescription of joint rates over a new route which will result in a widespread readjustment of rates does not warrant an award of reparation on shipments made prior to time that joint rates over the new route are required to be maintained. White Eagle Oil & Refining Co. v. C., B. & Q., 129 I. C. C. 467, 470.

§13a. State Shipments.

See State Rates and Regulation.

(a) Following Conference Ruling of March 13, 1922, and 74 I. C. C. 703 and

other cited cases, commission is without authority to award reparation, or to consent to an award of reparation made by a State commission, on intrastate shipments which moved during guaranty period following period of Federal control. Armour & Co. v. G. N., 104 I. C. C. 34.

(b) Commission's authority to pass upon unreasonableness of an intrastate rate and a prayer for reparation based thereon ceased with relinquishment of Federal control. See 74 I. C. C. 703 and other cases cited. Armour & Co. v. G. N., 104 I. C. C. 34, 36.

(c) Fact that a State commission has declared in a proceeding commenced subsequent to termination of so-called guaranty period following Federal control that certain intrastate rates collected during that period were unreasonable, and that commission is asked merely to approve that finding, does not enlarge limited jurisdiction conferred upon it by section 208 (a) of the transportation act, 1920, to review rates reduced by State commissions prior to termination of guaranty period, since commission's direct jurisdiction over reductions in intrastate rates was limited to action taken prior to such period. Under no provisions of transportation act or of interstate commerce act is commission given authority to review and approve a finding of a State commission made subsequent to said period and to order award of reparation based thereon. Armour & Co. v. G. N., 104 I. C. C. 34, 36.

(d) The commission has jurisdiction to approve after August 31, 1920, an award of reparation made by State authority on intrastate traffic which moved during the guaranty period, March 1 to August 31, 1920, whether such authority was actually exercised during the guaranty period or thereafter. The phrase "prior to September 1, 1920," as used in section 208 (a) of the transportation act, 1920, is not to be construed as prescribing a time limitation within which commission was authorized to act, but as fixing the period as to which its approval was necessary to a reduction in rates whether made during the guaranty period by naming lower rates for future, or accomplished after expiration of the period by way of reparation on shipments which rates terminated with termination of moved during that period. Reparation on Intrastate Traffic, 122 I. C. C. 443.

(e) Subject to certain exceptions, the commission's jurisdiction over intrastate Federal control, February 29, 1920. On that date jurisdiction passed to State authorities, subject to the limitation that no rates should be reduced prior to September 1, 1920, unless approved by commission. The commission, therefore, was, and is without power to require rate reductions or award reparation on intrastate shipments moving during the guaranty period and the only order it can lawfully make as to such shipments is one of a permissive character. Accordingly conference ruling of March 13, 1922, and previous decisions holding that section 208 (a) of the transportation act, 1920, does not authorize commission to award reparation on intrastate shipments which moved during the guaranty period, adhered to. Reparation on Intrastate Traffic, 122 I. C. C. 443.

(f) An award of reparation on intrastate traffic which moved during the guaranty period, March 1 to August 31, 1920, is, in effect, a reduction of a rate prior to September 1, 1920, within the meaning of section 208 (a) of the transportation act, 1920, regardless of the date on which decision making the award was rendered. Reparation on Intrastate Traffic, 122 I. C. C. 443, 447.

(g) The primary purpose of second clause of section 208 (a) of transportation act was to protect the United States from liability on its guaranty to the carriers of the standard return, and this it sought to do by prohibiting any reduction of rates, fares, or charges without consent of commission. See 270 U. S. 466. When it comes to awards of reparation after expiration of the guaranty period upon intrastate traffic which moved during that period, there is equal necessity for review by commission to the end that revenues of carriers may not be unduly reduced and at same time that awards of reparation in meritorious cases may be granted. Reparation on Intrastate Traffic, 122 I. C. C. 443, 447, 448.

§16. Voluntary or Subsequent Reduction.

See Evidence §64; Reasonableness of Rates §32½.

(a) Fact that a rate was subsequently reduced in compliance with decisions of commission embracing general readjustments, involving both increases and reductions, does not of itself demonstrate unreasonableness of higher rates. Com-

mission declines to give retroactive effect to such rates as a basis for an award of reparation. Cairo Cotton Oil Mill v. M. & O., 107 I. C. C. 299.

(b) While the subsequent reduction of a rate does not show the prior rate to be unreasonable, neither does it act as a bar to reparation when former rate was clearly unreasonable. Knoxville Iron Co. v. L. & N., 107 I. C. C. 627, 634.

(c) The voluntary reduction of a rate by a carrier is not of itself sufficient to justify an award of reparation on shipments moving prior to reduction and mere fact that rate under attack appears to be out of line with a few other related rates does not necessarily prove rate attacked unreasonable. Louisville Cooperage Co. v. L. & N., 112 I. C. C. 228, 229, 230.

(d) Rates on wheat from points in Missouri, milled at Jefferson City, and resulting flour reshipped to destinations in Arkansas found not unreasonable as compared with lower rates subsequently established. Carriers published these lower rates in conformity with commission's suggestion in 80 I. C. C. 620, wherein an extensive readjustment in rates on grain and products was prescribed in this general territory. The commission has consistently denied reparation in cases where general readjustments have been made in extensive territories, resulting in both increases and reductions, See 87 I. C. C. 451, 468; moreover, the mere reduction of a rate is insufficient to prove that higher rate formerly charged was unreasonable. See 85 I. C. C. 449. Dulle Milling Co. v. M. P., 113 I. C. C. 742.

(e) The mere reduction of a rate is insufficient to prove that the higher rate formerly charged was unreasonable. Dulle Milling Co. v. M. P. R. R., 113 I. C. C. 742, 743.

(f) The fact that the rates were reduced shortly after the shipments moved is not sufficient to award reparation. Fentress Coal Co. v. T. C. Ry., 115 I. C. C. 286, 288.

(g) The subsequent reductions applied throughout a large territory and affected at many points shippers who were not parties to the proceeding. Under like circumstances the commission has frequently denied reparation. Heinze Electric Co. v. B. & M. R. R., 118 I. C. C. 77, 78.

(h) Complainant attacked rates charged on iron pipe, carloads, from Louisiana to Arkansas between April 4 and November 21, 1923, are unreasonable. The issue is whether the fifth class rates charged on iron pipe from points of origin other than Shreveport and the class A rates on oil well supplies moving in 1923 were unreasonable and if so, whether reparation shall be awarded to the basis fixed by the commission in 77 I. C. C. 473. HELD: Rates attacked unreasonable to extent they exceeded the rates subsequently established as a result of 77 I. C. C. 473, reparation awarded. Bender Iron & Supply Co. v. K. C. S. Ry., 118 I. C. C. 661.

(i) Complainant attacked combination rates charged on five cars of envelopes from Waukegan, Ill., and West Carrollton, O., to Wichita, Kas., and from Kansas City, Mo., and Otsego, Mich., to Wichita as unreasonable and in violation of the fourth section. Charged combinations of rates basing on the Mississippi river. Defendants offered to make reparation on combination rate of 67.5c from Hamilton, O., to Wichita. A rate of $1.46 was assessed from West Carrollton to Wichita, combination rate being $1.17 to Oklahoma City to which Wichita is intermediate on November 15, 1923, the rate to Oklahoma City was reduced to $1.02 and defendants offer to make reparation on this basis. A rate of $1.295 was charged from Waukegan to Wichita, contemporaneous rate to Oklahoma City was 84c, to which defendants offer reparation. There appears to be no good reason why rates on envelopes to Wichita should not be 150 per cent of the rates on newsprint. Fifth class rate of 53.5c was charged from Kansas City and a rate of 44c was contemporaneously in effect from St. Louis, Mo., to Wichita and from Kansas City to Ponca City, Okla. The Kansas City-Wichita rate was reduced on March 10, 1923, to 34c. A combination rate of 71c was assessed from Otsego to Wichita, applicable rate was 92.5c and subsequent to movement a rate of 43.5c was established from the river resulting in a through rate of 70.7c. Rate charged from Kalamazoo to Wichita exceeded combination of 68.5c, to which defendant offers reparation. A rate of 80.5c was charged from Detroit to Oklahoma City, present rate is 82.5c exceeding the aggregate of intermedi-

ates. HELD: Reparation awarded. Western Newspaper Union v. A. T. & S. F. Ry., 118 I. C. C. 692.

(j) The fact that the rate sought was subsequently established affords no adequate basis for an award of reparation. Central Pennsylvania Lumber Co. v. S. & N. Y. R. R., 120 I. C. C. 239, 240.

(k) The subsequent reduction of rate in and of itself does not justify an award of reparation. Kohlman Bros. & Sugarman v. L. & N. R. R., 123 I. C. C. 56, 58.

(l) Complainant alleged commodity rates on sand and gravel, carloads, from Illinois and Wisconsin to the Mayfair and Weber plants of complainant in the Chicago switching district, were unreasonable, unjustly discriminatory and unduly prejudicial. Rates involved are those from Janesville, Afton, and Beloit, Wis., to Mayfair and Weber in the Chicago switching district. Shipments to Mayfair were transported between July 2, 1923 and Nov. 2, 1923, charged 3.75c reduced on the latter date to 3.25c. To Weber shipments were transported between July 1, 1922 and May 24, 1925, charged 3.75c, and effective May 25, 1925, rate of 3.25 was published, following 96 I. C. C. 325. When reduced rates were published July 1, 1922 the rates from the inner and outer producing zones to the Chicago inner zone were made 3 and 3.25c which were 0.25c less than was authorized in 64 I. C. C. 37. Rates charged not unreasonable or unjustly discriminatory but were unduly prejudicial to extent they exceeded rates to the inner zone, no damage being shown to have resulted from the undue prejudice found to exist, reparation preju- Chicago Fire Brick Co. v. C. & N. W. Ry., 123 I. C. C. 164.

(m) The reduction of rates does not of itself justify conclusion that preexisting rates were unreasonable or afford a basis for reparation. Gum Motor Co. v. A., T. & S. F., 128 I. C. C. 61, 62.

(n) The voluntary reduction of a rate is not of itself sufficient to justify an award of reparation on shipments moving prior to the reduction. See 112 I. C. C. 228; 20 I. C. C. C. 43. Peaslee-Gaulbert Co. v. C. & A. R. R., 128 I. C. C. 103, 104.

(o) The subsequent establishment of the lumber rate on the unfinished handles is not of itself a sufficient reason for awarding reparation to that basis on prior shipments. Oklahoma Traffic Asso. v. A., T. & S. F. Ry., 129 I. C. C. 403, 406.

(p) Complainant alleged that the rates charged from Moultrie, Ga. on numerous shipments of fresh meats and packing house products, in straight and mixed carloads to Baltimore, Md., Washington, D. C., and North Carolina, South Carolina and Virginia; on carload shipments of green salted hides to Somerville, Mass., St. Louis, Mo., Endicott and Gowanda, N. Y., and on carloads of grease to Chicago, Ill., between July 23, 1920 to March 31, 1922 were unreasonable. At the request of complainants rates lower than those assailed were established subsequent to the movement of the shipments here considered. Defendants expressed willingness to make refund to the basis sought. HELD, rates assailed on fresh meats and packing house products in straight and mixed carloads were unreasonable to the extent they exceeded the rates on packing house products in straight carloads by more than 15.5c; rates attacked on green salted hides to St. Louis, Mo., Somerville, Mass., and Endicott, N. Y., unreasonable to extent they exceeded 69.5c, 60, and 80c, respectively. Rates on green salted hides to Gowanda and on grease to Chicago unreasonable to the extent the rates to Ohio river crossings exceeded 53c on green salted hides and 51c prior to August 26, 1920 and 63.5c thereafter, on grease, reparation awarded. Swift & Co. v. G. & F. Ry., 129 I. C. C. 407.

(q) The subsequent reduction of a rate, whether by voluntary action of the carriers or by order of the Commission, is not of itself sufficient to justify an award of reparation. Royal Distributing Co. v. B. & O. R. R., 129 I. C. C. 749, 750.

(r) Subsequent reduction of a rate is not in itself sufficient reason for awardparation to that basis on prior shipping shipments Oklahoma Traffic Asso. v. A., T. & S. F., 129 I. C. C. 403, 406.

§17. Willingness Of Carrier to Pay.

(a) Unfulfilled promises of represen- of Commerce v. A. & V. Ry., 107 I. C. C. tatives of carriers that reduced rates would be made effective afford no justification for an award of reparation. See also 100 I. C. C. 319. Florence Chamber 84, 96.

(b) Complainant attacked commodity rate charged on one car of green coffee shipped from New Orleans, La., to Salina, Kas., on April 13, 1922 as unreasonable. Distance hauled 1,038 miles, charged at rate of 90c. A rate of 73.5c would have been in effect at time of

movement had it not been suspended in I. & S. 1485. The order in that case was vacated prior to hearing, and the 73.5c rate became effective. Defendants are willing that reparation be awarded. HELD, rate attacked unreasonable to extent it exceeded 73.5c, reparation awarded. Lee Mercantile Co. v. C. R. I. & G. Ry., 120 I. C. C. 90.

(c) Rates were found unreasonable but by agreement of parties presentation of proof with respect to complainants' right to reparation was deferred until after determination of lawfulness of rates. Therefore, case was set for further hearing upon question of reparation and method for computing it. Calif. Dressed Beef Co. v. A., T. & S. F., 128 I. C. C. 607, 619.

(d) Rates on pine lumber from points in Oregon, Idaho, and Montana to Bayport, Minn., found not unreasonable or unduly prejudicial as compared with lower rates contemporaneously in effect to St. Paul. Outside of irregularities in the construction and filing of tariffs, complainant showed that rates to Bayport exceeded those to St. Paul; that it sold frames in competition with dealers at that point and Minneapolis, made from lumber from same origin points; and that carriers conceded error in publishing rates assailed and sought authority to make reparation. However, consent of carriers to an award of reparation is not proof of unreasonableness of rates charged; mere fact that rates assailed exceeded those to St. Paul has little probative force as evidence of unreasonableness; nor is competition with dealers in St. Paul and Minneapolis, standing alone, proof of undue prejudice. Moreover, a subsequent increase in rates to St. Paul would seem to indicate that those rates were out of line. Andersen Lbr. Co. v. N. P., 128 I. C. C. 633.

(e) Consent of carriers to an award of reparation is not proof of the unreasonableness of the rates charged. Andersen Lbr. Co. v. N. P., 128 I. C. C. 633, 634.

IV. LIABILITY FOR REPARATION.

See Express Companies XII.

§17½. Interest Or Court Costs.

(a) Reparation for exaction of unreasonable rates awarded without interest, complainant having waived its claim therefor. Watab Paper Co. v. N. P., 107 I. C. C. 131, 134.

(bc) Upon contentionthat if reparation be awarded interest should not be included on ground that commission is without jurisdiction to award interest. FOUND: The commission's power to determine whether or not interest should be included in reparation awards was upheld in 295 Fed. 53. South Carolina Cotton Mfrs. Assn. v. C., C. & O., 112 I. C. C. 683, 685.

(d) Under Federal Control Act (Comp. St. §§ 3115¾a-3115¾p), interest allowed on reparation award by Interstate Commerce Commission is enforceable against Director General of Railroads. World Pub. Co., v. Davis, Agent, Tulsa Paper Co. v. Same. Democrat Printing Co., v. Same, 16 Fed. (2d) 130.

(e) In action to enforce reparation award, Director General of Railroads may be held liable for attorney's fees and costs, under Interstate Commerce Act, § 16 (Comp. St. § 8584.) World Pub. Co., v. Davis, Agent; Tulsa Paper Co., v. Same. Democrat Printing Co., v. Same, 16 Fed. (2d) 130, 131.

(f) Interstate Commerce Commission, in reparation order for excessive freight charges exacted in violation of Interstate Commerce Act, § 1 (Comp. St. § 8563) HELD to have properly awarded interest from date of exaction, and neither fact that validity of such claim for excess charges was disputed, nor that amount of recovery was uncertain, nor that carrier could not have legally made repayment of such excess charges, in view of Elkins Act (Comp. St. §§ 8597-8599), and Act June 29, 1906, until final award, liquidating amount, precluded such recovery. Louisville & N. R. Co. v. Sloss-Sheffield Steel & Iron Co., 46 Sup. Ct. 73.

(g) Where Interstate Commerce Commisison in reparation order, allowed interest on amounts illegally exacted as freight rates from date of exaction, and court, in action on such order, under Interstate Commerce Act, § 16 (Comp. St. § 8584), allowed interest from effective date of order, fact that such affirmance of judgment resulted in compound interest did not amount to error. Louisville & N. R. Co. v. Sloss-Sheffield Steel & Iron Co., 46 Sup. Ct. 73.

(h) Successful plaintiff in suit to restrain enforcement of interstate rates, and for accounting and refund or excess over intrastate rates improperly col-

lected, HELD entitled to interest on each excess payment from its date. Atlantic Coast Line R. Co. v. Standard Oil Co. of Kentucky, 16 Fed. (2d.) 441, 442.

§18. Measure of Reparation.

See Routing and Misrouting §9.

(a) The measure of damages is the market value, either wholesale or retail, at the agreed place of delivery. In the market value, whether it be wholesale or retail, a profit to the shipper or owner almost always inheres. If it did not the owner would not ship and transportation would practically cease. His inducement to pay or to agree to pay the freight is his profit, and when the carrier by loss in transit deprives him of it, he is entitled to recover it back. Burroughs Adding Machine Co. v. M. C. R. R., 120 I. C. C. 19, 20.

(b) Upon complainant's failure to give notice of his claim for special damages either in his complant or otherwise, together with other infirmities of record, proceeding assigned for further hearing to determine extent of such damage. Carnes v. A., T. & S. F., 129 I. C. C. 341, 348, 349.

§19. Parties to Make Refund.

See Overcharges (tt) (ww); Routing and Misrouting §19.

(a) Where shipments during Federal control, originate on a nonfederally controlled line and move to points on lines under Federal control, and illegal charges resulting from an unlawful act of the nonfederally controlled line are collected by the director general from shipper at destination, interline settlement with carrier not under Federal control having previously been made, the director general is proper party to be named as defendant and it is unnecessary to name nonfederally controlled line. Yellow Pine Co. of Philadelphia v. Director General, 104 I. C. C. 371.

(b) Shipment originating on nonfederally controlled line moved to a point on carrier under Federal control. Originating carrier billed illegal demurrage charges as advances and received settlement therefor in interline accounts, director general collecting such charges from shipper at destination. Complaint names as defendant only director general, who contends that because illegal charges were retained by originating carrier after interline settlement, at which time he was unaware of controversy regarding charges, there is no overcharge so far as he is concerned; that he can not be held liable for illegal charges accruing because of action of carrier not under Federal control; and, that proper party has not been named defendant. HELD: Shipper entitled to recover illegal charges from carrier who collects them, whose duty it is then to ascertain, and charge them back to, carrier responsible for their assessment. See also 17 I. C. C. 330. Yellow Pine Co. of Phila. v. Director General, 104 I. C. C. 371.

(c) At request of carriers and in order to facilitate agreement, commission apportioned the rate found reasonable by setting forth amount thereof due each participating carrier, but made no definite finding, and no order to that effect, commission not claiming any authority to so apportion the rate, no joint rate being prayed for, established, or prescribed for future. Watab Paper Co. v. N. P., 107 I. C. C. 131, 135.

(d) Shipment originated on nonfederally controlled line and moved to points on a line under Federal control, illegal charges being collected by director general who paid his portion of overcharges to initial carrier, who failed to refund them to shipper. Complaint seeking reparation for overcharges named, director general only as defendant. Upon contention that initial line is a necessary party and that complainant should be charged with laches in prosecution of its claim, not sustained. A carrier that has collected overcharge can not be excused from repayment of same because it has paid it to another carrier. Moreover, a shipper is entitled to recover illegal charges from carrier collecting them, whose duty it is to then ascertain and charge them back to carrier responsible for their assessment. See also 17 I. C. C. 330; 17 I. C. C. 508; and other cited cases. Bowers & Co. v. Director General, 107 I. C. C. 305, 307.

(e) Shipment originated on nonfederally controlled line and moved to point on a line under Federal control, illegal charges being collected by director general, who forwarded voucher covering his portion of overcharges to initial carrier, who failed to refund them to shipper. Contention by director general that payment of the voucher to initial carrier was payment to complainant, inasmuch as complainant, by letter, conferred authority upon initial carrier to act as its agent,

not accepted. Having filed an overcharge claim with initial line, the letter in question is considered only as a statement of basis of settlement which was then acceptable to complainant. Bowers & Co. v. Director General, 107 I. C. C. 305, 307.

(f) It is not necessary, in complaint alleging overcharges, to name all carriers participating in transportation, since collection of an overcharge is a tort for which they are all jointly and severally liable. Boston Brick Co. v. I. T. 107 I. C. C. 507.

(g) Remaining carriers are jointly and severally liable for any damage resulting from the assessment of an unreasonable joint rate. Bunte Bros. v. C. & N. W. Ry., 112 I. C. C. 557, 558.

(h) The participation by the initial carriers in the violation of the act by exacting the freight rates found to be unreasonable and excessive and sharing in such rates was enough to make such carriers liable for the full amount of damages sustained by the plaintiff in consequence of such violation. The liability enforced against the defendant resulted from its unlawful action in charging excessive and unreasonable rates. That liability is enforcible against the defendants though other parties to such rates which were joint rates were also liable and were not proceeded against. South Carolina Cotton Mfrs. Asso. v. C. C. & O. Ry., 112 I. C. C. 683, 685.

(i) If a through rate, joint or combination, is found unreasonable and reparation is awarded the order entered runs against the carriers, collectively, that participated in the transportation. In the present case, however, one of the carriers which participated in the transportation under a combination rate was not a party defendant. In 91 I. C. C. 571, where a combination rate was found unreasonable and one of the carriers participating in the transportation was not a party defendant, the Commission determined the reasonableness of the factors separately. McFadden v. Director General, 113 I. C. C. 387.

(j) Complaint was filed by a corporation which ultimately became bankrupt and reparation statement under Rule V of the Rules of Practice was prepared and submitted by its receivers. Upon contention that commission can not legally award reparation to the corporation, which no longer exists. HELD: It being well settled that reparation claims are assignable, reparation awarded to receivers who were vested with full power to take into possession all property and assets of the defunct corporation, including this claim for reparation. Wertheim Coal & Coke Co. v. L. V., 112 I. C. C. 513, 515.

(k) Upon further consideration, finding in 85 I. C. C. 365, awarding reparation for exaction of an unreasonable through rate on coal shipped during Federal control from Shamokin, Pa., to Detroit, Mich., reversed. No joint rate was in effect and a combination based on Black Rock, N. Y., was assessed, the unreasonableness therein being due to factor beyond Black Rock of a nonfederally controlled line which was not made a party defendant. While in 40 I. C. C. 501, the commission found that its reparation order for unreasonable through combinations runs against carriers, collectively, who participated in the transportation, in instant case one participating carrier was omitted as a party defendant. Also, while in 91 I. C. C. 571, where combination rate was found unreasonable and one participating carrier omitted as a defendant, commission prorated the reparation by determining reasonableness of factors separately, here the Shamokin-Black Rock factor was not unreasonable. McFadden v. Director General, 113 I. C. C. 387.

(l) Upon contention of receiver of a carrier named as a party defendant that an order for reparation should not be issued against him on shipments made prior to date of receivership, HELD: Awards of reparation are not dependent upon solvency or insolvency of carriers concerned, but if a through rate, joint or combination, is found unreasonable, and reparation is awarded, the order entered may run against carriers collectively that participated in transportation. See also 89 I. C. C. 125. Hansen-Peterson Co. v. A., T. & S. F., 113 I. C. C. 575, 577.

(m) While the financial condition of a carrier may be taken into consideration in the determination of reasonable rates, such carrier is not relieved of any liability for damages because of the fact that it was operating at a loss at the time that the damages were sustained. Continental Sugar Co. v. N. Y. C. R. R., 115 I. C. C. 124, 125.

(n) One defendant carrier in the hands of a receiver was operated at a considerable loss during period covered by complaint alleging unreasonable rates. Upon contention of receivers that it would be inequitable for them to be required to further reduce their capital assets by turning a portion threof over to a complainant for exaction of unreasonable rates. HELD, contention has no support in law. While financial condition of carrier may be taken into consideration in determining reasonable rates, such carrier is not relieved of any liability for damages because of fact that it was operating at a loss at time damages were sustained. Continental Sugar Co. v. N. Y. C., 115 I. C. C. 124, 125.

(o) Carrier originally under Federal control but subsequently relinquished contended that it was never a federally controlled line and could not lawfully refund charges collected without tariff authority on shipments moving during Federal control. Complaint was seasonably filed under section 206 (c) of transportation act, 1920, but carrier urges that this provision does not affect the period within which complaints could be filed against nonfederally controlled roads for violations of the interstate commerce act, and since complaint was not filed within two years after cause of action accrued, it is barred as to this carrier. HELD, possession and control exercised by director general over carriers taken over by him were complete, and he thereby undertook to perform transportation services for shippers through them and assumed full responsibility, so far as the interstate commerce act is concerned, for their wrongful acts. Superior Coal Co. v. Director General, 115 I. C. C. 710, 712, 713.

(p) Carrier submitted evidence designed to show that it is financially unable to pay reparation sought by complainant. HELD, an award of reparation following a finding that a complainant is entitled thereto, is not dependent upon financial condition of carrier. United States v. Director General, 118 I. C. C. 677, 679, 680.

(q) The rate in which this carrier participated was a joint rate and the liability of the participants is joint and several. An omission is not fatal, although no order can be entered against the carrier not named. Russellville Compress Co. v. G. M. & N. R. R., 120 I. C. C. 481, 482.

(r) It is well settled that where an unreasonable joint rate has been charged the liability of the carriers is joint and several. But in the case of a combination rate an entirely different situation is presented. In the present case two of the carriers had no control over any factor of the combination except that maintained by it, nor did either of these carriers contribute in any way to the injury resulting from any unreasonableness existing in the rate maintained by the third carrier. To find in such a case that carriers are jointly and severally liable would be to require two carriers to bear in part the injury done by the third carrier, where the former had no control over the action or rates of the latter. Midwest Refining Co. v. G. N. Ry., 122 I. C. C. 205, 207.

(s) Where an unreasonable rate has been collected, the liability of the parties is joint and several and the Commission may award reparation against one of the carriers which participated in the traffic even though other carriers which performed a part of the service are not made parties defendant. Armour & Co. v. C. M. & St. P. Ry., 122 I. C. C. 380, 381.

(t) In 96 I. C. C. 412, division 4 found that the combination rate of 68c charged on lepidolite ore, carloads, from Embudo, N. M., to Wheeling, W. Va., was unreasonable to extent it exceeded 51c minimum 80,000 pounds. Pennsylvania was not named as a defendant and the order did not include that line as a delivering carrier, but that carrier voluntarily joined with other carriers in the publication of the 51c rate over its route. HELD, reparation awarded on all shipments except those moving via the Pennsylvania. New Mexico Commission v. A. T. & S. F. Ry., 123 I. C. C. 675.

(u) Where an unreasonable rate has been collected, the liability of carriers is joint and several, and commission may award reparation against one of the carriers which participated in the traffic, even though other carriers which performed a part of the service are not made parties defendant. See 60 I. C. C. 595. Armour & Co. v. C., M. & St. P., 122 I. C. C. 380, 381.

(v) Where an unreasonable joint rate has been collected, the liability of parties to such action is joint and several and commission may award reparation against one of the carriers which

participated in the traffic even though other carriers which performed a part of the service are not made defendants. See 91 I. C. C. 571. Root Glass Co. v. E., I. & T. H., 123 I. C. C. 68, 70.

(w) Upon contention that commission has no jurisdiction to award reparation against a Canadian carrier for any portion of transportation which takes place within Canada for the exaction of unreasonable rates, HELD: While in 52 I. C. C. 145 the commission found that railroads constituting a through route for traffic from points in Canada to points in the United States concurring in an unreasonably high through rate are jointly and severally liable, in such cases the reparation award runs against the United States carriers only. See 66 I. C. C. 627; 74 I. C. C. 733. Kroehler Mfg. Co. v. C. N. Ry., 123 I. C. C. 555, 556.

(x) Reparation awarded in former report 96 I. C. C. 412, under finding of unreasonableness of combination rate on lepidolite ore from Embudo, N. Mex., to Wheeling, W. Va., held not to cover shipments which moved over a delivering line not named in the complaint, and over whose line combination rate was not found unreasonable. Opportunity to justify reasonableness of rate over its route was never afforded the delivering carrier, nor were defendant carriers put on notice that reparation was sought on shipments delivered by it. New Mexico Corp. Commission v. A., T. & S. F., 123 I. C. C. 675.

(y) Every carrier who participates in infliction of excessive joint wrongful rates is liable in solido as joint tortfeasor. Louisville & N. R. Co. v. Sloss-Sheffield Steel & Iron Co., 46 Sup. Ct. 73.

(z) It is well settled that carriers participating in an unreasonable joint rate are jointly and severally liable for the unlawful assessment. Boston Wool Trade Asso. v. B. & A. R. R., 128 I. C. C. 185, 186.

(aa) Awards of reparation are not dependent upon the solvency or insolvency of the carriers concerned. They require payment of the sum found due and run against all defendants. Mobile Chamber of Commerce v. M. S. B. & P. Ry., 129 I. C. C. 419, 423.

(bb) The liability of the carriers parties to the joint rate is joint and several. Coulbourn Fruit Co. v. B. & O. R. R., 129 I. C. C. 441, 442.

(cc) Upon contention that complainant is entitled to reparation only from carriers who were defendants in former case in which distance scale was found reasonable for application on commodity involved, FOUND: Reparation was not awarded in that case because scale was for first time found reasonable for application on that commodity. However, in awarding reparation in a subsequent case it was stated that such an award would be merely in nature of a retroactive extension to complainants of a rate basis which, as a result of previous decision, its competitors had long enjoyed. Principle is equally applicable here. Reparation awarded. Texas Refining Co. v. C., R. I & G., 129 I. C. C. 304, 305.

(dd) Insolvent carrier was purchased by a trustee at foreclosure sale, and receiver ordered to continue operation for account of trustee who should be responsible for any deficit resulting from such operation. At time order discharging receiver was issued no record was made of claims for reparation and defendant carrier urges therefore be made. FOUND: Awards of reparation are not dependent upon solvency or that an award of reparation should not require payment of sum found due and insolvency of carriers concerned. They run against all defendant carriers. See 40 I. C. C. 501; 62 I. C. C. 60. Mobile Chamber of Cimmerce v. M. S., B. & P., 129 I. C. C. 419, 422, 423.

§20½. Undercharges or Overcharges.

See Overcharges; Undercharges.

(a) Contention that a shipper is not entitled to an award of reparation for exaction of unreasonable rates where such shipper owes the carrier unpaid transportation charges in an amount much larger than reparation claim not sustained, where such unpaid charges are shown to cover traffic which moved subsequent to reparation period. Moreover, it is beyond the commission's jurisdiction to allow an offset of undercharge on subsequent shipments against a claim for reparation for unreasonable rates exacted on shipments moving in the past. Wertheim Coal & Coke Co. v. L. V., 112 I. C. C. 513, 515.

§20½a. Destruction of Records.

See Accounting §7.

(a) Shipper delayed submission of its

reparation statement under Rule V of the Rules of Practice due, among other things, to its freight bills and other records having been destroyed, such statement having been prepared from records of companies from whom shipments were purchased. Certification thereof by carrier was rejected on ground that its records covering shipments also had been destroyed in accordance with the commission's regulations governing destruction of records. HELD: A complete chain of circumstances and a preponderance of the evidence point to ultimate fact that complainant not only received the shipments but that it paid and bore charges thereon, and since carrier was fully aware of the fact that reparation had been awarded complainant, under such circumstances it can not plead destruction of its records as a defense. Wertheim Coal & Coke Co. v. L. V., 112 I. C. C. 513.

V. PROCEDURE.

§20¾. In General.

See Procedure Before Commission.

(a) Shipper delayed submission of its reparation statement under Rule V of the Rules of Practice, due, among other things, to its freight bills and other records having been destroyed, such statements having been prepared from records of companies from whom shipments were purchased. Certification thereof by carrier was rejected on ground that its records covering shipments also had been destroyed in accordance with the commission's regulations governing destruction of records. HELD: A complete chain of circumstances and a preponderance of the evidence point to ultimate fact that complainant not only received the shipments but that it paid and bore charges thereon. Although commission's regulations permit of destruction of carrier records after a certain number of years they do not require it, and since carrier was fully aware of the fact that reparation had been awarded complainant, under such circumstances it can not plead destruction of its records as a defense. Wertheim Coal & Coke Co. v. L. V., 112 I. C. C. 513.

(b) Contention that reparation should be denied because petition for rehearing was not filed within 60 days after rendition of commission's report as required by rule 15 (e) of the Rules of Practice, not sustained, the record showing that rehearing petition was filed with- 60 days after service of report. South Carolina Cotton Mfgrs. Asso. v. C., C. & O., 112 I. C. C. 683, 685.

(c) Objection to the receiving of evidence tending to prove damages on shipments originating at points located on rails of carriers not named as defendants in complaint, sustained, the language of complaint not being sufficiently broad to cover shipments originating on those lines. South Carolina Cotton Mfrs. Asso. v. C., C. & O., 112 I. C. C. 683, 685.

(d) Complaint did not specifically ask for reparation on shipments moving subsequent to filing of complaint but did allege that rates "were and are unjust and unreasonable," and prayed for reasonable rates for future and for "reparation for unlawful charges hereinbefore alleged, such sum as in view of evidence to be adduced herein the commission shall determine that complainants are entitled to." At time of original hearing, complainants had uncut timber and were operating their mill. It would be doing less of violence to consider that shipments made during pendency of this proceeding are within scope of pleadings than to assume that complainants did not intend to ask for full relief, or to deny them that relief for want of use of particular words. Moreover, carrier has not been misled to its disadvantage and an award of reparation under circumstances would be in accord with similar finding in 21 I. C. C. 45. Reparation awarded. Burns & Knapp v. B. S. & K. R., 126 I. C. C. 410, 411, 412.

(e) Upon further hearing upon question of reparation, parties having been unable to agree upon Rule V statement, president and treasurer of complainant's company testified that complainant paid and bore charges and submitted a statement of shipments made, prepared by complainant's counsel. Contention of carriers that document was not competent evidence because not personally prepared by witness, not sustained. Reparation awarded. Boston Wool Trade Asso. v. B. & A., 128 I. C. C. 185.

(f) Upon complainant's failure to give notice of his claim for special damages either in his complaint or otherwise, together with other infirmities of record, proceeding assigned for further

hearing to determine extent of such damage. Carnes v. A., T. & S. F., 129 I. C. C. 341, 348, 349.

(g) Upon claim for reparation complainant relied upon decisions in 68 I. C. C. 559 and 74 I. C. C. 288, to effect that in absence of routing directions in tariff a joint rate is applicable over any route over lines of carriers parties to tariff, and if carriers desire to restrict application of such rates to particular routes they should do so in clear and unequivocal language. FOUND: That question presented in cases cited was with respect to applicability under an intermediate clause and not the reasonableness of rates under rule 77. Woodward Auto Co. v. C., M. & St. P., 129 I. C. C. 613, 615.

§21. Formal Proceedings.

See Cars and Car Supply VI; Claims.

(a) Except under unusual circumstances, and for good cause shown, reparation will not be awarded upon a complaint in which it not specifically prayed for, or upon a new complaint by or for the same complainant which is based upon any finding in the original proceeding. Jackson Traffic Bureau v. A. & V. Ry., 118 I. C. C. 217, 220.

(b) Complaint which did not specifically allege a violation of section 6 of the act, but stated that rates were "unreasonable and otherwise unlawful" and that complainant paid and bore "illegal excess charges" over and above those which were "just, proper and reasonable," held sufficient to cover overcharges. Crerar Clinch Coal Co. v. A. A. R. R., 118 I. C. C. 171, 172.

(c) Upon complaint seeking reparation on shipments of fertilizer and fertilizer materials from Jackson, Miss., to Arkansas and Louisiana destinations, predicated upon findings in Jackson Traffic Bureau, 102 I. C. C. 129, wherein reparation was not sought. HELD, considering fact that case relied upon was part of the Memphis-Southwestern rate adjustment prescribed in 55 I. C. C. 515, and other cases, it can not be said that rates prior thereto were unreasonable merely because they were not on a distance basis. Furthermore, rule III (s) of Rules and Practices provides that "Except under unusual circumstances, and for good cause shown, reparation will not be awarded upon a complaint in which it is not specifically prayed for, or upon a new complaint by or for same complainant which is based upon any finding in original proceeding." Jackson Traffic Bureau v. A. & V., 118 I. C. C. 217.

(d) Carrier sought dismissal of supplemental complaint on ground that reparation was not specifically prayed for in original complaint, citing Rule III (s) of Rules of Practice which provides that reparation will not be awarded upon a complaint in which it is not specifically prayed for, or upon a new complaint by or for same complainant which is based upon any finding in original proceeding. HELD, this rule has no application where, as here, prayer for reparation is not a new complaint but an amendment of one already filed. See 96 I. C. C. 124. Hollingshead Co. v. Director General, 120 I. C. C. 55, 56.

(e) Complainant's statement of facts under shortened procedure sought reparation to a basis lower than that specified in its complaint, and because of such variance carriers declined to handle the case further under such procedure and it was accordingly set for oral hearing. At the hearing complainant was granted leave to amend its complaint by asking for reparation to a lower basis, to which carriers objected on ground that they were unprepared to defend any rate lower than that specified in the complaint. HELD: That if any amendment was necessary carriers were not taken by surprise at the offer and their objection thereto was properly overruled. Luten Bridge Co. v. A. C. L., 123 I. C. C. 612.

(f) Except under unusual circumstances, and for good cause shown, reparation will not be awarded upon a complaint in which it is not specifically prayed for, or upon a new complaint by or for the same complainant which is based upon any finding in the original proceeding. Royal Distributing Co. v. B. & O. R. R., 129 I. C. C. 749, 750.

§22. Informal Proceedings.

See Claims II.

(a) Letters received by commission in the nature of inquiries can not be relied upon to toll the statute of limitations with respect to claims alleging unreasonableness of rates. Leach v. C., N. O. & T. P., 112 I. C. C. 38.

(b) Application for refund on special docket had been denied, as carrier did not submit a memorandum in support of

rates charged. Murphysboro Paving Brick Co. v. I. C., 128 I. C. C. 635.

(c) Formal complaint alleging both unreasonableness and overcharge on Federal-control shipments was filed within six months after complainant was advised that complaint was not susceptible of informal adjustment. Informal complaint however, involved an alleged overcharge only and issue of unreasonableness, since not presented within one year after termination of Federal control, found barred. Kinnison Bros. v. Director General, 128 I. C. C. 703.

§23. Court Pleadings and Procedure.

See Actions at Law; Allowances §14½; Courts; Procedure Before Commission.

(a) Until the Commission has, as an official body of technical experts, declared the existence of a right to reparation because of shipments of grain made after its finding and opinion and before the effective date of its subsequent order, and by some order fixed the right to such reparation, an action in court may not be maintained. Bartling Grain Co. v. M. P. R. R., 115 I. C. C. 441, 443.

(aa) Under Interstate Commerce Act, § 16 (3), as amended by Transportation Act of 1920 (Comp. St. Ann. Supp. 1923, §8584), providing that suit to enforce an award of damages by the Interstate Commerce Commission shall be filed "within one year from the date of the order," the date of the order is its "effective date," which is the time fixed by the Commission for payment of the award. Standard Oil Co. (Calif.) v. Davis, Director General of Railroads, as Agent, 6 Fed. (2d) 236.

(b) Failure of shippers, prosecuting claims for reparations before Interstate Commerce Commission and later before courts, under Interstate Commerce Act, § 16 (Comp. St. § 8584), to file such claims in pending receivership proceedings against railroad before expiration of time for filing claims fixed by interlocutory decree in such proceedings, HELD not laches, barring recovery on claims filed after favorable judgment in courts. Spiller v. St. Louis & S. F. R. Co., 14 Fed. (2d) 284.

(c) Shippers having obtained judgment for unlawful freight exactions by action under Interstate Commerce Act, § 16 (Comp. St. § 8584), and thereafter intervened in receivership suit against carrier, HELD not estopped to assert priority on theory of trusteeship ex maleficio of carrier, nor relegated to status of general unsecured creditor because section 16 provides for collecting "damages." Spiller v. St. Louis & S. F. R. Co., 14 Fed. (2d) 284.

(d) Shipper's right to reparation under Interstate Commerce Act, § 22, is not exclusive remedy, precluding recovery of illegal freight exactions, on theory of trusteeship ex maleficio (Comp. St. § 8595). Spiller v. St. Louis & S. F. R. Co., 14 Fed. (2d) 284.

(e) Where judgment dismissing complaint in action on reparation award of Interstate Commerce Commission is reversed for new trial, application for attorney's fees must be made to trial court on new trial. Swift & Co., v. New York Cent. R. Co., 16 Fed. (2d) 17.

(f) Reparation award of Interstate Commerce Commission, reciting that conclusions in other cases as to maximum ton-mile rates must be affirmed, HELD adequate finding of maximum rate, as required by Act to Regulate Commerce, § 1 (Comp. St. § 8563), and not a finding of prejudice or preference under section 3 (Comp. St. § 8565), which Commission had no authority to make, under Federal Control Act, § 10 (Comp. St. § 3115¾j), notwithstanding recital that rates were "relatively unreasonable." World Pub. Co., v. Davis, Agent; Tulsa Paper Co. v. Same. Democrat Printing Co., v. Same 16 Fed. (2d) 130.

(g) Where Director General made no objection to claims for reparation respecting shipments made after hearing before Interstate Commerce Commission, contained in statements made under Rules of Practice, rule 5, but certified statement as correct, he could not claim Commission's award was void as to such shipments. World Pub. Co., v. Davis, Agent; Tulsa Paper Co., v. Same. Democrat Printing Co., v. Same 16 Fed. (2d) 130.

(h) Where suit under Interstate Commerce Act, § 16, (Comp. St. § 8584), to recover excessive freight charges exacted in violation of section 1, (Comp. St. § 8563), was based on reparation order of Interstate Commerce Commission, which was entered on shipper's petition stating that certain items had been inadvertently included in prior computations, and praying that reduction be made in

prior order without notice to carrier, which had been heard in all proceedings culminating in prior order, HELD, suit was not based on order invalid as violative of due process clause (Const. U. S. Amend. 5), since, if order complained of was invalid, prior order remained in full force, and was sufficient to support suit, with later order having effect only of remittitur, and errors, if any, in ruling on admissibility of evidence adduced in support of order not grounds for reversal, in view of Act Feb. 26, 1919 (Comp. St. Ann. Supp. 1919, § 1246). Louisville & N. R. Co., v. Sloss-Sheffield Steel & Iron Co., 46 Sup. Ct. 73.

(i) In suit under Interstate Commerce Act, § 16 (Comp. St. § 8584), against railroad, based on reparation order of Interstate Commerce Commission, requiring return of freight charges exacted in violation of section 1 (Comp. St. § 8563), railroad company could not contend that such order was valid in so far as it annulled and set aside a prior reparation order for which it was a substitute, but invalid so far as it ordered reparation, because entered without notice. Louisville & N. R. Co. v. Sloss-Sheffield Steel & Iron Co., 46 Sup. Ct. 73.

(j) Prayer for reparations in shipper's original complaint HELD sufficient to authorize award of reparations for overcharges pending proceedings, as well as for losses suffered in the past, and recovery of damages on account of shipments between time of filing original complaint and time of filing of supplemental petition, approximately 3 years and 3 months later, for reparation on account of shipments made after filing of original complaint, not barred as to first 15 months by the 2-year statute of limitation contained in Interstate Commerce Act, § 16 (Comp. St. § 8584). Louisville & N. R. Co. v. Sloss-Sheffield Steel & Iron Co., 46 Sup. Ct. 73.

(k) Shipper's prayer for reparation in proceedings before Interstate Commerce Commission to recover excessive charges exacted, which included prayer for general relief, held sufficiently broad to justify relief against initial carrier as to rates over its lines to points on lines of connecting carriers, though delay for more than 2 years after filing of original complaint before making connecting carriers parties to proceedings, under Interstate Commerce Act. § 16 (Comp. St. 8584), precluded recovery as to them, save for a 2-year period preceding time when they were joined; the liability of connecting carriers for exacting excessive rates being joint and several. Louisville & N. R. Co. v. Sloss-Sheffield Steel & Iron Co., 46 Sup. Ct. 73.

(l) Although filing of claim for reparation within 2 years is a jurisdictional requirement, under Interstate Commerce Act, § 16 (Comp. St. § 8584), there is no rule imposing on Commission procedure so exacting as to make fatal mere failure to present within that time a detail of a statement of a claim, which under ordinary procedure could be supplied by amendment or bill of particulars, and hence petition praying that "rates and charges herein complained of be declared unjust, unreasonable, and discriminating for a period of at least two years preceding" filing of complaint, and that complainants "may have reparation to the extent of the difference between the rates and charges actually paid" and those found reasonable, was not too general to invoke jurisdiction of Commission under section 13 (Comp. St. § 8581). Louisville & N. R. Co. v. Sloss-Sheffield Steel & Iron Co., 46 Sup. Ct. 73.

§24. Intervening Petitions.

See Interveners.

(a) In accordance with Rule III (s) of Rules of Practice, reparation awarded upon a new complaint to complainants and interveners not parties to the proceeding prescribing reasonable rates to basis of which reparation is sought, upon showing of good cause and unusual circumstances. Decker & Sons v. U. P. R. R., 123 I. C. C. 621, 622, 623.

(b) Intervening petition seeking reparation, filed at hearing by parties newly come into the case, found to unduly broaden the issues presented by the complaint, within contemplation of Rule II (1) of Rules of Practice. Even though reparation was sought in original complaint, a separate wrong to a shipper other than complainant founded upon imposition of same unlawful freight rate wrong by an award of reparation must is a distinct issue, and redress of that depend upon competent evidence particularly relating thereto. To assume that carriers, had they been seasonably forewarned of the issue, would have been unable to develop evidence to controvert interveners' reparation claim would be to deny carriers their day in court, and this the commission may not do. However, objection of intervening petition

may be waived, failing in which interveners may petition for further hearing upon the issue of which carriers have now had abundant notice. Concrete Steel Co. v. B. & O., 123 I. C. C. 677, 678, 679.

(c) The Commission has on numerous occasions permitted intervening shippers to prove by affidavit that they paid and bore the charges on shipments as to which they sought reparation, although such permission of course is always subject to defendants objection. Kalamazoo Vegetable Parchment Co. v. C. K. & S. Ry., 128 I. C. C. 685.

(d) Petition of intervention filed after hearing but prior to oral argument by purchaser of complainant's business and property, asking to be accorded under original issues any relief which might otherwise have been accorded to its predecessor in interest on causes of action accruing subsequent to date of purchase, allowed at oral argument. Harbor Coaling Corp. v. B. & O., 128 I. C. C. 747, 748.

§25. Statements For Reparation.

See Evidence.

(a) Upon further hearing, carriers having declined to approve reparation statements submitted in accordance with Rule V of the Rules of Practice amount of reparation due complainants under decisions in 48 I. C. C. 475, and 55 I. C. C. 595, determined, such complainants having submitted proof and evidence that shipments were made, and that unreasonable charges exacted were paid, by them. Butters Lbr. Co. v. A. C. L., 109 I. C. C. 224.

(b) Due to long period of time which has elapsed since the hearings the commission found that it could not, with fairness to carriers, ask that they accept affidavit proof of shipments which may have moved after the hearings and up to effective date of reasonable rates prescribed for future. It was held that if such shipments have moved the commission will reopen cases for sole purpose of receiving evidence as to payment and bearing of freight charges. Associated Oil Co. v. A. E. R. R., 112 I. C. C. 350, 367, 368.

(c) Shipper delayed submission of its reparation statement under Rule V of the Rules of Practice due, among other things, to its freight bills and other records having been destroyed, such statement having been prepared from records of companies from whom shipments were purchased. Certification thereof by carrier was rejected on ground that its records covering shipments also had been destroyed in accordance with the Commission's regulations governing destruction of records. HELD, A complete chain of circumstances and a preponderance of the evidence point to ultimate fact that complainant not only received the shipments but that it paid and bore the charges thereon. Although commission's regulations permit of destruction of carrier records after a certain number of years they do not require it, and since carrier was fully aware of the fact that reparation had been awarded complainant, under such circumstances it can not plead destruction of its records as a defense. Wertheim Coal & Coke Co. v. L. V., 112 I. C. C. 513.

(d) Upon objection of carriers to proof in affidavit form submitted by shipper in conformity with Rule V of Rules of Practice, further hearing had and amount of reparation determined for the exaction of unreasonable rates found in the original report, 91 I. C. C. 677. Continental Sugar Co. v. N. Y. C., 115 I. C. C. 124.

(e) Complainant, an association, sought inclusion in reparation award of commission of those members who were parties to complaint but who failed to appear at hearing to prove fact of shipment and payment and bearing of freight charges, and expressed a willingness to establish such facts by presentation of receipted freight bills or affidavits. HELD, although commission has on numerous occasions permitted shippers to furnish proof by affidavit as to shipments moving subsequent to hearings such permission has at all times been subject to objections of carriers. While commission is not disposed to deny complainant members of the association who failed to appear an opportunity to do so, it does not feel justified, under the circumstances, in suggesting that carriers waive their right of cross-examination. Upon request therefore the case will be set for further hearing on the question of reparation. Jamestown Chamber of Commerce v. P. R. R., 120 I. C. C. 372, 377.

(f) Carriers objected to proof in affidavit form as to paying and bearing of

freight charges on shipments of scrap iron from Dunbar, W. Va., to Wierton, W. Va., via an interstate route, the rates on which were found unreasonable in 101 I. C. C. 621. Upon further hearing complainant showed that it sold the scrap iron f. o. b. destination, consignee deducting amount of freight charges from invoice price in remitting to the complainant. Complainant therefore found to have borne the charges and to be accordingly damaged by unreasonable rate collected. Reparation awarded. Hilb & Bauer v. N. Y. C., 120 I. C. C. 421.

(g) Upon further hearing, reparation awarded upon proof of damage sustained due to exaction of unreasonable rates on shipments of lumber from Sherman, Ky., to interstate destinations, carriers having refused to certify and file with commission complainant's statement prepared under Rule V of Rules of Practice. Former report 74 I. C. C. 111. Burns & Knapp v. B. S. & K. R., 126 I. C. C. 410.

(h) Upon further hearing, reparation awarded to complainant on l. c. l. shipments of sterotype plates, old, worn out, or scrap, broken or unbroken, shipped with type faces unprotected and valuable only for remelting, which were made both prior and subsequent to original hearing, carriers having objected to proof in affidavit form submitted in accordance with Rule V of Rules of Practice, complainant having shown that it paid and bore unreasonable charges on shipments in question. Original report, 69 I. C. C. 523. Western Newspaper union v. Director General 126 I. C. C. 437.

(i) Objection that one of places of origin involved was not named in complaint, nor in Interstate Commerce Commission's reports and that reparation order was therefore void as to it, could not be sustained, where shipments from such point were set forth in statement made under Rules of Practice, rule 5. World Pub. Co., v. Davis, Agent; Tulsa Paper Co. v. Same; Democrat Printing Co., v. Same, 16 Fed. (2d) 130.

(j) Upon further hearing, reparation awarded on l. c. l. shipments made subsequent to previous hearing, upon complainant's showing that it paid and bore freight charges thereon at rates found unreasonable in orignal report, 107 I. C. C. 101, and upon which carrier objected to proof in affidavit form submitted in accordance with Rule V of Rules of Practice. Hill v. A., T. & S. F., 129 I. C. C. 323.

REPORTS OF CARRIERS

See Accounting.

(a) Report of the commission in response to Senate Resolution No. 100 setting forth the number and nature of reports required to be made to it by the railways of the country; the number and nature of reports required by various utilities commissions and public service commissions; expense to the railways of preparing such reports; and, the number and nature of reports now being made, which can, in the commission's judgment, be dispensed with without detriment to the public interest. Carrier's Reports to Commission, 107 I. C. C. 741.

RESTRICTED RATES

See Absorption of Charges §3; Across-Lake Rates (a); Advanced Rates §5 (2) (m), §17 (x); Concentrating Rates and Privileges; Routing and Misrouting §6; State Rates and Regulation (t); Through Routes and Joint Rates §20a, §24, §25.

(a) Shipments of matches moving from Chico, Calif., to destinations in Washington were assessed a rate to Portland, Oreg., higher than proportional rate applicable over a route other than route of movement to St. Johns, situated within corporate and switching limits of Portland. Lower rate was restricted to destinations other than those here involved and carried a switching charge at Portland also restricted to switching service performed in connection with a line haul. There was no switching in connection with a line haul via route of movement, and an out-of-line haul would have resulted had traffic moved through St. Johns. FOUND: Rates assessed were not unreasonable or otherwise unlawful. Diamond Match Co. v. Director General, 104 I. C. C. 147.

(b) Proposal to reduce rates on grain, seed, and products from points in Colorado, Wyoming, Kansas, Arkansas, Oklahoma, and Missouri to points in Louisiana west of Mississippi River, and restrict routing in connection therewith through Arkansas but not through Texas, found justified as to carriers not operating routes through Texas, but unlawful with respect to carriers operating such Texas routes which are as short as, or shorter

than, those operated by them through Arkansas. Transportation conditions do not warrant proposed restriction, which would also result in violations of section 3 of the act. Grain and Products from Western States, 104 I. C. C. 272, 279.

(c) Applicable sixth-class rate on imported rough-quarried marble blocks from New York to Chicago, applying via standard all-rail routes, found not unjustly discriminatory, unduly prejudicial, or in violation of long-and-short-haul clause of section 4 of the act. While a lower commodity rate applies from Roxbury, Vt., and Lowell, Mass., competing points supplying domestic marble, such lower rate is not applicable through New York, being restricted to apply only over differential Canadian routes embracing carriers different than those involved in standard routes. Liquid Carbonic Co. v. C. & E. R. R., 104 I. C. C. 446.

(d) Proposal of Pennsylvania R. R., to restrict application of its rate on pulp wood from Washington, D. C., to Roaring Spring, Tyrone, Williamsburg, and Lock Haven, Pa., to shipments reaching Washington by water, and on such traffic originating locally at Washington to apply a higher rate in effect from Rossyln, Va., found not justified. West Virginia Pulp & Paper Co. v. B. & O., 104 I. C. C. 495.

(e) Proposal to restrict, throughout official classification territory, application of billet basis of rates to bolt, nail, rivet, or wire rods and chain iron or steel, in coils, so that it will apply on such commodities only when round in cross section, found not justified. Effect of proposed restriction would be to increase rates now effective on rods, in coils, which are not round in cross section. The distinction between round and not round does not reflect any substantial difference in material, stage or process of manufacture, value, or transportation characteristics other than volume of movement. Moreover, burden resting upon carriers to justify increase has not been borne, nor has it been made to appear that resulting difference in rate level would be free from undue prejudice as between round rods and rods of other shapes when shipped in coils. Iron and Steel Articles, 104 I. C. C. 616.

(f) Proposal to restrict routing of petroleum and products from Gulfport, Vicksburg, Natchez, Mobile, Pensacola, New Orleans, Baton Rouge, Mersea, and Port Chalmett, to certain points in Alabama, Tennessee, Kentucky, Ohio, Indiana, and Missouri, designed to avoid wasteful transportation, to secure to initial carrier the long haul to which it is entitled, and to eliminate fourth-section departures, found not justified. While there may be some justification for eliminating a few of the longer routes as contemplated, it is impossible upon the record to designate exact extent of such justification, it being shown that to most of the destinations many of proposed routes are longer than some of those it is proposed to close. Florence Chamber of Commerce v. A. & V., 107 I. C. C. 84.

(g) Proposal to restrict application of class rates from points in Indiana to Minneapolis, St. Paul, and Duluth, so as to eliminate cross-lake routes through Michigan, and thus remove existing departures from long-and-short-haul provisions of section 4 of the act, found not justified. The cross-lake routes which it is proposed to cancel are reasonably direct and move a substantial volume of traffic, and their continuance is also desirable for emergencies during periods of traffic congestion. Class Rates to Twin Cities, 107 I. C. C. 665.

(h) Proposal to restrict proportional rates on anthracite coal from Niagara frontier to East Burlington, Ill., via the New York, Chicago & St. Louis R. R. and its western connections, so as not to apply on traffic destined to Burlington, Iowa, found justified. Iowa R. R. Commrs. v. C. R. R. Co. of N. J., 109 I. C. C. 273.

(i) Tariff provision restricting application of joint rates and providing local or combination rates on iron and steel articles shipped from Pennsylvania and Ohio points, fabricated in transit at Parkersburg, W. Va., and reshipped to Kentucky points and to New Orleans, for export, found unreasonable and unduly prejudicial to extent they exceeded contemporaneous joint rates plus prevailing transit charges. Transit arrangements on joint rates tend to avoid maladjustments, and connecting lines can not dictate to the road that alone serves transit point the manner in which joint rates through that point shall be applied in conjunction with transit arrangements as long as they are not deprived of their long haul, especially where, as here, they perform no greater service on shipments fabricated in transit than they do on shipments not so

handled. Reasonable and nonprejudicial rates prescribed and reparation awarded. Parkersburg Rig & Reel Co. v. B. & O., 109 I. C. C. 569.

(j) Out-of-route charges collected on grain shipped from Ossian and Helmer, Ind., to Jonesville, Mich., there milled in transit and reshipped to other Michigan points, found illegal. Neither tariff publishing the joint through rates with provisions for milling in transit nor transit tariff carried any restrictions as to routing, and term "out-of-route" as carried in transit tariff is not defined. Rates between any given points, where no restrictions are made as to routing, apply over all routes of carriers parties to the tariff naming rates, where such routes are circuitous or not, if there be no back haul. Likewise transit arrangements applicable in connection with such rates, where no special restriction as to transit is contained in the tariff, are coextensive with routes over which the rates apply, provided routes are not employed which necessitate a back haul. Refund of overcharges directed. Jonesville Milling Co. v. N. Y. C., 109 I. C. C. 601.

(k) Shipment of carbide of calcium from Duluth, Minn., to Kingman, Ariz., was routed via short-line route through Denver over line of Union Pacific. A lower rate applied over various other routes, but tariff provision restricted its application in connection with Union Pacific by providing that "rates from or via points on the U. P. will not apply in connection with Santa Fe via junctions in Kansas, nor in connection with the Santa Fe via Denver * * *." Upon contention that phrase "in connection with the Santa Fe" was broad enough to cover transportation by that line anywhere en route, and phrase "via Denver" was broad enough to cover any interchange at Denver and did not limit first phrase to mean "in connection with Santa Fe at Denver," HELD: Inasmuch as delivery at destination could be made only by Santa Fe, effect of such construction would be to exclude Union Pacific entirely from the haul. Tariff, being ambiguous, construed against the framer and lower rate found applicable in connection with all workable lines, except Union Pacific. Reparation awarded. Central Commercial Co. v. A., T. & S. F., 109 I. C. C. 639.

(l) Respondents proposed to restrict application of the Deming, N. M., rates as maxima on grain and its products from Missouri, Kansas, Nebraska, Colorado, and other states to Texas, to traffic moving under the routing provided in transcontinental tariffs carrying rates to Deming from the same points of origin. The burden of justifying the proposed restriction was undertaken by the Frisco, M. P., and Santa Fe. So long as both the transcontinental and the southwestern lines tariffs were unrestricted as to routing the inconsistencies here proposed to be removed were not so marked. But later when the Deming tariffs were restricted in the transcontinental tariffs and the Deming rates, viewed as maxima to other destinations, were left unrestricted in the southwestern tariffs, a conflicting tariff situation resulted. Although it is true, that the lower rates would continue to apply through interior junctions, the fact remains that application of the Deming rate over the route through St. Joseph does not result in a haul which is unduly long as compared with that to many destinations now subject to the same rate. Moreover El Paso is in the extreme western edge of Texas. HELD, schedules not justified. Grain and related articles, 113 I. C. C. 195.

(m) Proposal to restrict application of rates on lumber between points in Florida, including Pensacola, so as to prevent use of such rates in constructing through interstate rates from or to points in that State, designed for purpose of restoring preexisting Jacksonville basis of rates, found not justified. Carriers' contention that Jacksonville combination should be applicable regardless of lower combinations based on Pensacola or other junction points is not sound and would result in unlawful charges to extent that Jacksonville combination would exceed lower aggregate of intermediates over same route. Lumber from or to Florida points, 112 I. C. C. 133.

(n) Proposal to cancel application of joint rates on grain and products from points in Utah and Idaho to destinations in the Southwest and Alabama and Mississippi, over routes through Texas, designed for supposed purpose of removing departures from long - and - short - haul provision of section 4 of the act, found not justified. There is in issue in a pending proceeding the reasonableness of rates to this destination territory as well as to points in Texas, where rates are now higher than to more distant

Louisiana points, and cancellation of joint rates over Texas routes, which are generally shorter than through States north thereof, would result in substantial rate increases which would seriously affect the ability of Texas mills to handle Idaho wheat. Grain and Products from Western Points, 112 I. C. C. 283.

(o) Proposal to restrict to intrastate traffic the applications of present rate upon rough undressed stone from St. Louis, Mo., to Carthage, Mo., now applicable upon both intrastate and interstate traffic, found justified. The present rate, originally applying on intrastate traffic only, became effective upon interstate traffic as result of an error in tariff publication and the proposed restriction will restore the situation which existed prior to the erroneous publication. Comparisons offered by carriers indicate that increased interstate rates are reasonable. Rough Stone from St. Louis, 112 I. C. C. 700.

(p) Carriers contended that there is a well-recognized exception to general condemnation by commission of restrictive rates in cases where combinations are supported by a general policy of carriers concerned in refusing to join in establishment of joint rates on coal to their local markets from points on other coal-carrying roads, citing in support thereof numerous cases in which commission found combination rates on that commodity not unreasonable or unduly prejudicial when maintained in accordance with such a policy. HELD, to merit commission's approval any such policy must be followed without discrimination between shippers similarly situated. Old Ben Coal Corp. v. C., C., C. & St. L., 115 I. C. C. 84, 87, 88.

(q) Mere fact that due to an oversight in routing restrictions of tariff a lower rate between two points applies over an unduly circuitous route, does not prove that higher rate by way of customary route is unreasonable. Desch v. N. P. Ry., 115 I. C. C. 401.

(r) Proposal of the Frisco to cancel proportional rates on grain and products from Omaha, South Omaha, Des Moines, Council Bluffs, and Kansas City, when from beyond, on traffic moving via East St. Louis to destinations in Arkansas on that portion of its line formerly operated by the Jonesboro, Lake City & Eastern Ry., designed to place these destinations on same rate basis mantained to other near-by stations on the Frisco system and to confine routing from these origins to its own line and to the Kansas City gateway, found not justified. If proposed rates are permitted, combinations from Omaha to Arkansas points involved on shipments moving beyond St. Louis or East St. Louis would be higher than on shipments moving beyond Kansas City, and grain operators at St. Louis would be prevented from competing with those at the Missouri River points. Moreover, no evidence was submitted to show that present rates are unduly low. Grain and Products to Arkansas, 115 I. C. C. 457.

(s) Shipments of refuse sand from Detroit, Mich., to Indianapolis, Ind., moved as routed by shipper. Applicable tariffs carried so-called intermediate clause, such clause via one of the routes being unrestricted in its application, whereas via the other route the clause contained phrase "on the same line." HELD, that on shipments moving via the unrestricted route the clause was applicable and lower rates provided thereunder applied. As to shipments moving over the other route the words "on the same line" in intermediate rule required that intermediate point be on line of same carrier as the more distant point to which a rate is published and since rails of delivering line did not reach the farther distant point the intermediate rule did not apply on shipments moving thereover. American Radiator Co. v. D. & T. S. L. R. R., 115 I. C. C. 529.

(t) On petroleum products from Gates and Port Arthur, Tex., to certain Colorado points, tariff rule provided that if rates and charges in an agency tariff applicable from same origin points to Lago, Utah, or Deming, N. Mex., respectively, made lower charges than those provided in another tariff, the lower rates to Lago or Deming respectively would apply. Upon contention that word "respectively" applied to routes and not to rates. HELD, while it may have been carrier's intention to restrict application of lower rate to their own lines, tariff must be construed in accordance with its language. Tariff publishing the rule contained no routing restrictions and made all destinations therein, with one exception, subject thereto; nor was there any restriction that particular destination points must be directly intermediate to points carrying lower rates and if it was desire of carriers to exclude application of the Deming rate to points on their lines they had it in their power to do so

by plain language. Here the tariff was doubtful or ambiguous and must be resolved against framers. Refund of overcharges directed. Texas Co. v. B., S. L. & W., 115 I. C. C. 572.

(u) Shipments of chairs from Winston-Salem, N. C., and blankets from Nashua, N. H., to Casper, Wyo., were tendered unrouted, charges being assessed based on Mississippi River combinations. Lower joint commodity rates contemporaneously applied to San Francisco, the tariff carrying an intermediate clause to effect that when no specific rates are provided for stations located directly intermediate to and on same line or route with stations to which rates are specifically provided, the applicable rate is that to the next more distant point. HELD, intermediate clause not being restricted as to routing so as to preclude movement via Casper and not requiring that unnamed destination point be located between two named points the lower rates under the rule were applicable to Casper over route of movement. Reparation awarded. Chamberlin Furniture Co. v. Director General, 115 I. C. C. 575.

(v) Proposal of L. & N. R. R. to restrict application over its own line of joint rates on slag from Birmingham, Ala., group points to Jacksonville, Fla., for local delivery and for beyond found not justified. Restriction is proposed because the L. & N. has been unable to arrange satisfactory divisions with Atlantic Coast Line which handles the traffic beyond Montgomery, Ala. While proposed restriction would merely make joint rates inapplicable, the record does not show what rates would apply or whether those rates would be reasonable. Slag from Birmingham, 115 I. C. C. 587.

(w) Proposal of carriers to restrict rates on class traffic and various commodities from Duluth, Minn., and several Michigan points to destinations on N. Y., N. H. & H., so as not to apply in connection with Grand Trunk by way of the Niagara frontier, found not in violation of the act. The route in question is by way of a boat line, a portion thereof being wholly in Canada. While proposed cancellation is outgrowth of a dispute between carriers over divisions, which affords no justification for increased rates, and although joint rates are now in effect over the route, the use of which is of material importance to shippers, the principle referred to has no application here, since commission has no authority either to require establishment of joint rates over this route or to prevent their cancellation. Elimination of G. T. Ry. from Certain Routes, 115 I. C. C. 609.

(x) Traffic from certain stations may move via either of two junctions, one of which constitutes normal route. Rates from such stations being unrestricted in their application, applied by way of junction which did not constitute normal route, and when so moving the traffic must pass through intermediate points taking higher rates. HELD, that situation involved a technical violation of long-and-short-haul provision of section 4 of the act because of unrestricted application of rates to the normal or customary route. Indianapolis Board of Trade v. C., C., C. & St. L., 115 I. C. C. 681, 682, 683.

(y) Proposal to eliminate routes via Montgomery, Ala., in connection with joint rates on cotton from L. & N. stations, Long View to Clanton, Ala., inclusive, to destinations in Virginia, the Carolinas, and Georgia, found not justified. While such routing restrictions are designed for purpose of obviating certain fourth-section violations and carriers attempted their justification principally on ground of circuity, no similar restriction is proposed from other points via highly circuitous routes on similar traffic moving via Birmingham. Moreover, to close routes via Montgomery would result in innumerable section 4 violations, as combination rates via that point would exceed joint rates from points on the Southern, west of Decatur, Birmingham, and Montgomery. Routing on Cotton, 120 I. C. C. 185.

(z) Proposed increased rates and routing restrictions on potatoes and cabbage, from points in Virginia on the Norfolk Southern to destinations in c. f. a. territory, for avowed purpose of correcting existing violations of long-and-short-haul provision of section 4 of the act, by which rate from points here involved are lower than rates in effect from Norfolk, found not justified. While comparison with rates in effect between various points for comparable distances indicate that proposed rates, in numerous instances, are reasonable, their establishment, without corresponding advances from competing points in North Carolina, would result in undue prejudice, and leave uncorrected many fourth-section violations in addition to creating

new ones at points where no such violations now exist. Vegetables from Virginia, 120 I. C. C. 319.

(aa) Proposal to restrict proportional commodity rate on horses and mules from Chicago to Ohio River crossings so that it will not apply on shipments routed over or in connection with the C., C., C & St. L. Ry., found not justified. This rate was originally established to meet a rate of the Illinois Central R. R., but the Big Four does not desire to meet competition of that carrier. No justification, however, was shown for higher second-class rates which would result on this traffic from both Chicago and intermediate points. Moreover, the record indicates that proposed restriction is only a temporary expedient, there now being under consideration an adjustment which if made effective, will either materially increase present rate or result in its cancellation over certain routes. Piecemeal revision of rates, however, is not desirable except in unusual circumstances not here present. Horses and Mules from Chicago, 120 I. C. C. 607.

(bb) Pennsylvania, respondent, proposed to restrict the commodity rates on dolomite and fluxing stone, in carloads, from and to points in central territory so as to limit their application to shipments in open top cars. The dolomite used by the glass industry is the residue after two crushings and screenings of limestone have removed, first, the stone of a size suitable for the manufacture of burnt lime, and second, the size suitable for furnaces in the steel industry. This residue is then dried and further screened. In the transportation of dolomite to the glass industry box cars are necessary as dirt and cinders from the locomotives render it unfit for use as a flux. The ordinary dirt or dust, aside from cinders, accumulating in a shipment of dolomite does not affect such use. The suspended schedules cover rates on both dolomite and fluxing stone from points other than Gibsonburg, but the record deals mainly with the rates on dolomite from Gibsonburg to Pittsburgh, Glassport, Washington and Charleroi. There is in effect a commodity rate of $1.66 on dolomite, in carloads, in either box cars or open top cars, from Gibsonburg to the stations named. The effect of the proposed restriction would be to cancel this rate on dolomite in box cars. There is also published a commodity rate of $2.02 per ton on agriculture limestone, in box cars from Gibsonburg. Dolomite is crushed limestone and falls within the general commodity description, agricultural limestone. If the suspended schedules become effective, the $2.02 rate apparently will apply on dolomite in box cars. Fluxing stone and dolomite move in great volume to furnaces in the Pittsburgh district and for that reason rates thereon have been made lower than those on crushed stone. The record is persuasive that the commodity rate on agricultural limestone will not be unreasonable for application on dolomite or fluxing stone in box cars. If respondent decides to make this rate applicable on those commodities in box cars the manner of publication should be clear and specific. As indicated, the tariff situation which would result if the suspended schedules were to become effective would leave room for doubt as to the proper application of the rate of $2.02. HELD, suspended schedules not justified, without prejudice to filing new schedules in conformity with the foregoing conclusions. Dolomite and Fluxing stone, 128 I. C. C. 23.

(cc) Respondents proposed certain restrictions in the application of the rule for constructing combination rates on various commodities, including lumber and other forest products, from southern territory to interstate points from and to which no joint through rates are in effect which would result in increases in rates. The schedules are subject to the combination rule and respondents propose to change them so they will be applicable only when the tariff of the connecting carrier also gives reference to the rule. Under the application of the combination rule, the present combination rates on lumber between certain points are lower than the joint rates between the same points over direct routes, although the joint rates are on the basis in effect throughout the general territory. It would seem inequitable to require carriers forming a route over which combination rates apply to continue a tariff provision under which they receive less for their service than carriers over whose lines joint rates are applicable, particularly when the entire shrinkage authorized by the combination rule falls upon one of the carriers. In such instances the increases in rates incident to the proposed amended reference to the combination rule appear justified. The suspended schedules would not be a step towards [illegible]mination of the obnoxious combination

rule but would merely tend to complicate an already confusing situation by adding an exception to the application of the rule. While the Commission is in sympathy with the efforts of respondents to remedy the inequitable tariff situation under which they are responsible on through traffic for the shrinkage in the local rates of their connections, it can not sanction a change in the tariffs which wou'd not only relieve respondents of the shrinkage of rate factors not published by them but in some instances would also avoid the proper reduction of their own local rates when used as factors of through rates. HELD, proposed schedules not justified, without prejudice to filing of other schedules which will relieve respondent of that portion of the shrinkage chargeable to their connections, but which will not void their responsibility for the portion which properly belongs to them. This does not mean that respondents must in every instance provide for the absorption of the exact amount of shrinkage chargeable to them. The requirements will be made of respondents in good faith publish rates which on the average will approximate that result. Combination rule on lumber, 129 I. C. C. 564.

(dd) Respondents proposed to restrict commodity rates on crude, crushed, crude fluxing, and crushed fluxing limestone, in carloads, from Pennsylvania, Maryland, Virginia and West Virginia to Pennsylvania, New York, New Jersey, Delaware and Maryland so as to limit their application to shipments in open top cars. Fluxing limestone is used by both steel and glass manufacturers in large quantities. It moves to steel industries in open top equipment, as the presence of dirt, cinders, and other foreign substances in the crude limestone does not destroy its usefulness in such industries. In the glass industry it is one of the important materials, constituting about 20% of the mixture required for the manufacture of window glass. It is used to fuse the materials and must contain a certain proportion of calcium carbide or carbonate of line. It is necessary that glass fluxing limestone move in box cars and be protected from water, dirt, and cinders, as any foreign substance renders it unfit for use as a flux, because of resulting bubbles in the glass, as well as discoloration. Should the suspended schedules become effective, sixth class rates would apply on shipments in box cars. Respondents contend that such a result was not the purpose of the suspended schedules but that it was intended to make the ground limestone rates apply on this commodity in box cars. Respondents are prepared to make the charge clear and specific in its terms so that, regardless of the name of this commodity or its description, rates not in excess of those on ground limestone will apply. The record is persuasive that commodity rates not in excess of the rates on ground limestone will not be unreasonable for application on fluxing limestone in box cars. HELD, suspended schedules not justified without prejudice to filing new schedules in conformity with the foregoing conclusions. Fluxing limestone, 129 I. C. C. 574.

RIVER CROSSINGS

See Blanket Rates §12½ (i); Bridges and Tolls; Evidence §52½; Proportional Rates; Rail-and-Water Rates (3h).

(a) Practice whereby east-side lines require west-side lines to bear expense of transferring across the river from East St. Louis, Ill., to St. Louis, Mo., interstate westbound freight moving under combination rates which are same on St. Louis as on East St. Louis, found unreasonable. Usual practice among rail carriers throughout the country is to divide switching expenses when services of an intermediate carrier are utilized in effecting an interchange of traffic, the switching charges being absorbed by carrier that delivers traffic to its connection. Moreover, there is a generally recognized obligation on part of all carriers on through traffic to make delivery on rails of connections, either direct or by bearing charges of intermediate switching line. Reasonable practice prescribed for future and reparation denied. C. R. I. & P. v. B. & O., 113 I. C. C. 681.

(b) Complainant attacked commodity rates on shelled peanuts, carloads, from Nashville, Tenn., to Chicago, Ill. In 115 I. C. C. 643 the Commission found them unreasonable. The combination of proportional rates through Evansville, Ind., as well as through Jeffersonville and New Albany, Ind., is 59.5c, made up of 28.5c rate for 156 mile haul south of Ohio river and 31c for 287 mile haul north thereof. HELD, rate since Nov. 19, 1923, unjust and unreasonable to extent it exceeded 52c, and defendants may continue the present method of publishing rates that break on the river by

establishing factors of 25 and 27c for hauls south and north of the Ohio river, respectively. United Fig & Date Co. v. A. C. L. R. R., 118 I. C. C. 475.

(c) Complainant attacked commodity rates on grain and grain products, carloads, from Missouri, Kansas, Nebraska, North Dakota, South Dakota, Minnesota, Iowa, Wisconsin, Illinois, Indiana, Kentucky and Tennessee to Montgomery, Ala., as unreasonable and unduly prejudicial as compared with rates to Meridian, Miss., Mobile, Ala., and Pensacola, Fla., and in violation of section four. Montgomery is located near the center of Alabama on the Alabama river and is served from the north and west by the L. & N. and M. & O. Meridian is almost due west of Montgomery and is served by the M. & O. Mobile is reached by the M. & O. and L. & N. and Pensacola by the L. & N. Montgomery and Pensacola are in what is generally termed southeastern territory and Meridian and Mobile in Mississippi valley territory. The general basis for rates on grain from the origin territory west of the Mississippi river and that east thereof and north of the Ohio river to territory south of the Ohio river is combination of local and proportional or reshipping rates on certain basing points, known as primary markets or reshipping points. To permit these markets to compete with each other on an equal basis, proportional or reshipping rates are generally so published as to equalize the through rates to consuming territories by way of the different markets. This equalization is accomplished through Louisville and Cincinnati by means of so-called shrinkage rates applied under transit arrangements in effect at those points. The rates on wheat and flour are somewhat higher than the rates on coarse grain from the territory west of the Mississippi to the river crossings. Complainant's attack is directed against the rates from the gateways to Montgomery as compared with those to Meridian, Mobile and Pensacola, considered as factors of through rates. Rates on grain and grain products from the river gateways are and for many years have been higher to Montgomery than to Mobile and Pensacola. The rates from Memphis, Cairo and Louisville to Montgomery are those applicable both on traffic originating at those points and on traffic from beyond, except that from Louisville a rate of 30c is applied as a shrinkage rate under transit arrangements in effect at that point, on traffic originating west of the Illinois-Indiana state line. The rate from St. Louis to Montgomery is a proportional rate, being 5c less than the local rate on coarse grain and 7c less than the local rate on flour from that point. The rates from Memphis and Cairo and the 33c rate from Louisville to Montgomery are the same as the class D rates from and to these points. The local rates on these commodities between points in the southeast are the class D rates or the equivalent thereof, the rates as a rule applying on any quantity. The rates from St. Louis to Montgomery and from all of the river gateways to Meridian, Mobile and Pensacola are lower than the class D rates from and to the same points. From the river gateways the carload rates are generally the same as the less carload rates to Montgomery, but somewhat lower than the less carload rates to Meridian, Mobile and Pensacola. The distances from the river gateways, with the exception of Evansville and Louisville, are substantially greater to Montgomery than to Meridian, and from all of the gateways are less to Montgomery than to Mobile and Pensacola. Defendants have been denied authority under the fourth section to maintain lower rates to Mobile and Pensacola than to intermediate points, and this record does not show that competitive conditions are now such as to compel the maintenance of lower rates on this traffic to those points than to Montgomery. Birmingham and Atlanta are the two largest cities in the southeast. The rates to Montgomery are relatively lower, distance considered, than those to Birmingham from all of the gateways and to Atlanta from the Ohio river gateways, and that from Memphis the rate to Montgomery is fairly well aligned with that to Atlanta. Transportation conditions under which traffic is handled from and through the river gateways to these three points are said to be substantially similar, except for the difference in the hauls. The mere fact that the general level of rates to the Mississippi valley is lower than that to the southeast is not in itself proof of the propriety of the resulting great disparity between the rates to that point here alleged to be prejudiced. It is not claimed that this difference in the rate levels is warranted by any substantial

dissimilarity in the transportation conditions. The record does not establish that the present rates to Meridian, Mobile and Pensacola are maximum reasonable rates and therefore a proper basis for the removal of any undue prejudice or disadvantage which may exist against Montgomery. The Commission is not convinced that the rates to Montgomery do not exceed the limit of reasonableness. Although they compare favorably with the rates on this traffic to other points in the southeast, this is not necessarily the conclusive test. HELD, rates attacked unreasonable to extent they exceed the rates to the river crossings, plus from Memphis 22c, from Cairo, Evansville and Louisville 28c; from St. Louis and Cincinnati 31c; unduly prejudicial to Montgomery and unduly preferential of Meridian, Mobile and Pensacola to extent they exceed by more than 2c the rates to Meridian 2c less than to Mobile and Pensacola. Capital Grain & Feed Co. v. I. C. R. R., 118 I. C. C. 732.

(d) On reconsideration, Ohio River combination rates on pianos from Hammond, Ind., and Steger and Oregon, Ill., to Birmingham, Ala., found not unreasonable or otherwise unlawful. Complainant contended for lower joint rate published in another tariff to Birmingham subject to an intermediate rule. Carriers, however, showed that such rule was intended to apply only to unindexed intermediate points in Mississippi Valley territory in which Birmingham is not located; also that Ohio River basis to Birmingham has been long maintained, and that lower rates are maintained to Mobile under appropriate fourth-section relief. Interpretation contended for is strained and unnatural, raises no reasonable doubt in its favor, and would break down long-standing adjustment by extending the Hammond-Mobile rate under Mississippi Valley bases to points east thereof as for south as the south Atlantic ports. Moreover, record is convincing that complainant was not misled to his damage by the intermediate rule. Original report, 101 I. C. C. 74, affirmed. Forbes & Sons Piano Co. v. A. G. S., 118 I. C. C. 185.

(e) In constructing interstate rates between points in the Southwest, in Texas and Oklahoma differential territories, and in portions of Kansas- Missouri territory, on the one hand, and Memphis, Vicksburg, Natchez, Angola, Baton Rouge, Harahan, and New Orleans, on the other, 4 cents in the case of Memphis and 6 cents in the case of other east-bank crossings authorized to be added as maximum bridge arbitraries or crossing allowances. Consolidated Southwestern Cases, 123 I. C. C. 203, 390, 391.

(f) Heavier traffic density as well as competition between numerous carriers between the Missouri and Mississippi Rivers have resulted in a generally lower basis of rates in that territory than west of the Missouri River. The effect which these influences has had upon the rate structure between the rivers and how it has affected rates from territory west of Missouri River are related in 14 I. C. C. 299 and other cited cases. Boston Wool Trade Asso. v. A., T. & S. F., 129 I. C. C. 681, 687.

CROSS REFERENCES

See Bills of Lading §9, §9½, §10; Branch Lines II, §5; Crimes §23; Embargoes; Evidence §47; Express Companies V; Live Stock Shipments (y); Reconsignment; Reparation §11; Restricted Rates (a); Tariffs §18; Through Routes and Joint Rates §6.

II. CARRIER'S DUTY TO TRANSPORT.

§1½. In General.

(a) Upon contention that shipments were misrouted, it being initial carrier's duty to forward over route taking lower combinations, inasmuch as shipments were not specifically routed by shipper, FOUND: Shipments contemplated by tariff as subject to application of lower combinations were those on which inbound billing to intermediate points was surrendered. Here shipments were billed through to destination with no inbound billing to surrender. It is no answer to say that surrender of freight bills in possession of carriers was unnecessary and impossible and that tariff restriction was, therefore, a nullity, since tariffs must be read in strict accordance with their terms. Shipments found not misrouted. Lewiston Elevator Co. v. C. G. W., 104 I. C. C. 473, 474, 475.

(b) The establishment of specific routes in the rate tariffs would prevent any unduly circuitous routing under transit arrangements. Transit on iron and steel, 115 I. C. C. 381, 384.

(c) Complainant attacked commodity rate of 281.5c charged on one less carload shipment of household goods and first class rate of 315c charged on one secondhand trailer shipped Feb. 18, 1925, from Bozeman, Mont., to Alameda, Calif., unreasonable and illegal to extent they exceeded 281.5c on actual weight of entire shipment. Shipment moved N. P. to Spokane, Wash., S. P. & S. to Portland, Ore., and S. P. beyond, 1,593 miles. The entire shipment was released to a value not exceeding 10c per pound. The mere fact that due to an oversight in the routing restrictions the lower rate from Grand Island, Neb., to Alameda applied over the very circuitous route via Bozeman does not prove that rates charged were unreasonable. The tariff has since been amended eliminating the application of the rate via Bozeman. HELD, rates charged applicable and not unreasonable, complaint dismissed. Desch v. N. P. Ry., 115 I. C. C. 401.

(d) Complainant attacked combination rate charged on a car of lumber shipped April 19, 1923, from Hogansville, Ga., to Norton, Va., as illegal. Shipment was delivered to A. & W. P., consigned to Norton, Va., and routed cheapest route. It moved A. & W. P. to Atlanta, Ga., thence L. & N. through Corbin, Ky., and Appalachia, Va., charged 37c made up of 6.5c to Atlanta, 18.5c Atlanta to Middlesborough, and 14c beyond, subject to the combination rule. The rate claimed of 21.5c from Atlanta is a proportional rate applicable to Norton for beyond. The word "beyond" implies a movement beyond Norton, whereas this shipment was consigned to and actually delivered at Norton. Appalachia is intermediate to and, from a transportation standpoint, not beyond Norton over the route traversed by the shipment and by way of which the proportional rate was published. Rule 5b has no application to a situation such as this. HELD, rate charged applicable, complaint dismissed. Pine & Cypress Mfg. Co. v. L. & N. R. R., 115 I. C. C. 557.

(e) Tariff defines an impracticable route as one through a point where roads do not cross each other at grade and where there are no connecting tracks to be used in interchange of traffic. An exception thereto, however, is specific in its provision that rates on livestock shall be based on short-line distances over practicable routes and does not require that rates themselves shall be applicable over routes which thus measure distances. Accordingly, rates on livestock from points in the Texas Panhandle on the Fort Worth & Denver City Ry., to El Paso, Tex., found properly based on distances over route of above-named line, the C. R. I. & P., and former El Paso & Southwestern. Original report 100 I. C. C. 4, affirmed. Peyton Packing Co. v. A. E. R. R., 118 I. C. C. 452.

(f) Complainant alleged that, be-

cause of misrouting, the charges on a car of canned goods shipped Oct. 17, 1923 from Westminister, Md., to Tampa, Fla., were unreasonable. Shipment was routed by shipper W. M. via Clyde Lines at N. Y. and moved over the W. M. to Gettysburg, Pa., P. & R. to Allentown, Pa., and Central N. J. to New York, lighterage. The Clyde Steamship Company does not operate between New York and Tampa. It is the practice of carriers to deliver shipments destined to Tampa routed "Clyde lines" to the Mallory Steamship Company, a corporation operating under the same management as the Clyde lines and handling the transportation business of the latter corporation between New York and Tampa. The shipment was loaded on a lighter and tendered to the Mallory lines. On Nov. 2, 1923 the Mallory lines refused to accept it on account of its damaged condition. On Nov. 7 the shipment was again tendered to the Mallory lines in damaged condition and again refused. On the occasion of each refusal the Mallory lines notified the Central that if the shipment were put in proper shipping condition it would be accepted by them. Complainant learned of the refusal of the Mallory lines to accept the shipment, and telegraphed to the Central "if you can not cooper so acceptable to Mallory, ship all rail Tampa, with understanding claim filed difference rate and other charges." Shipment forwarded by rail, charged 130.5c combination rate. Contemporaneously the rate via route shown in bill of lading was 27c to New York and 28c beyond. HELD, shipment misrouted, reparation awarded. Lewis Chitty Consolidated v. B. & O. R. R., 120 I. C. C. 384.

(gh) On strawberries from Plant City Fla., consigned to Jersey City, N. J., delivery was accepted at Manhattan Produce Yards, N. J., a point four miles short of billed destination. No claim for reparation was made for drayage charges incurred because of carrier's failure to complete delivery, but relying upon 69 I. C. C. 59, complaint alleged misrouting and sought damages resulting therefrom, in amount of difference in price at which strawberries were sold and price they might have brought if delivery had been made at Jersey City. HELD: Contention of misrouting not sustained. There was no deviation from route named in bill of lading, and transportation charges are same to Manhattan Produce Yards as to Jersey City. Situation here involves carrier's failure to complete a transportation service which it contracted to perform, and on which no violation of the act can be predicated. Complainant's remedy, therefore, if any, lies in the courts. Long v. A. C. L., 120 I. C. C. 601.

(i) A route to be legal must be available to all shippers and this requirement can not be waived by private agreement between carrier and a particular shipper. Racine Crushed Stone Co. v. C., M. & St. P., 120 I. C. C. 742, 744.

(j) It is not commission's province to require circuitous or more expensive routes to meet rates of shorter or less expensive routes. However, commission may, in fixing rates by any route, give consideration to rates of other routes and attempt to devise an adjustment which on the whole will provide reasonable rates and at the same time, as nearly as may be, permit various routes to engage in the traffic where they so d e s i r e. Consolidated Southwestern Cases, 123 I. C. C. 203, 374.

(k) It can not be found that shipments, routed by the shipper upon erroneous advice or confirmation as to rate by one of the carriers, were misrouted. Dreer v. L. A. & S. L. R. R., 126 I. C. C. 130, 132.

(l) If a shipper is in doubt about the rate he can tender the traffic to the carrier without routing instructions and thus be entitled to the lowest rate. Amicon Fruit Co. v. L. V. R. R., 128 I. C. C. 34, 36.

(m) The tariff provision does not charge its interpreter with knowledge of operating or other conditions which would eliminate any apparently reasonable and available route. New York Insulated Wire Co. v. N. Y., N. H. & H. R. R., 128 I. C. C. 698, 699.

§2. Accustomed or Natural Route.

(a) The real purpose of rule 5(b) of Tariff Circular 18-A was to relieve carriers from necessity of hauling a shipment from the junction point to a base point and back from the base point to junction point in order to permit application of the base-point combination. In other words, the rule obviates necessity of hauling a shipment via an unreasonable route. Birmingham Tariff Bureau v. Director General, 115 I. C. C. 33, 36.

(b) Bills of lading covering shipments of coal from Wilder and Davidson,

Tenn., forwarded via Cincinnati to Peoria, Ill., and there reconsigned to points in Iowa, showed Peoria as destination. Most of them specified routing via Cincinnati, and others apparently left it optional with carriers to forward via either Cincinnati or Louisville, rate to Peoria being same by either gateway. Contemporaneously joint rates via Louisville authorized reconsignment at Peoria, which lower rates were later made effective via Cincinnati. FOUND, as there was nothing on bills of lading to inform carrier's agent that cars were to be reconsigned beyond Peoria and rates were same via either route, shipments were not misrouted. Fentress Coal Co. v. T. C. Ry., 115 I. C. C. 286.

(c) Mere fact that due to an oversight in routing restrictions of tariff a lower rate between two points applies over an unduly circuitous route, does not prove that higher rate by way of customary route is unreasonable. Desch v. N. P. Ry., 115 I. C. C. 401.

(d) Charges on lumber from Camden, Ala., to Pottsville, Pa., ordered diverted to Tamaqua, Pa., found not unreasonable or unlawful. Shipment was delivered to carrier without routing instructions and while en route was ordered diverted, complainant contending that ample time was given carriers to effect diversion. Carriers used due diligence in attempting to locate shipment but incompleteness and indefiniteness of shipper's order and short notice given within which to locate car, together with fact that shipment moved over a different route than was anticipated, resulted in its moving forward to originally billed destination from which it was ultimately reconsigned. Stuckey-Odom Lbr. Co. v. L. & N., 115 I. C. C. 403.

(e) Distance rates on sand and gravel from Portsmouth, Ohio, to Williamson, W. Va., based on distance via a circuitous route, found unreasonable to extent they exceeded rates based on actual distance via a shorter and more desirable route. Shorter route is free from heavy grades and curves such as are encountered on circuitous route and no good reason appears why rates constructed on lower basis should not have been applied on shipments moving via shorter line. Reasonable rate prescribed and reparation awarded. Good Construction Co. v. N. & W., 115 I. C. C. 629.

(f) Notation by consignor in blank space intended for naming of route on a bill of lading of a specific carrier without specifying rate or junction point must be regarded as an expression of consignor's intention that the road so shown was to participate in a line haul. See also 19 I. C. C. 68, and other cited cases. Commersoila Lbr. Co. v. L. E. & W., 118 I. C. C. 499, 500.

(g) Complainant attacked charges on one car of lumber shipped on Jan. 25, 1923 from Quitman, Ga., to East New York and reconsigned to Ozone Park, N. Y., as unreasonable. Shipment was consigned to complainant at East New York, and was tendered to the South Georgia routed G. & F.-Sou-Charlotte, N. S.-Pa.-L. I. On Jan. 26, 1923 complainant wrote the agent of the L. I. at East New York giving delivery instructions on the shipment. On Feb. 5, 1923 complainant wired the agent of the L. I. to divert it to Ozone Park, on the L. I. Car moved South Georgia, Adel, Ga., G. & F. to Augusta, Ga., A. C. L. to Pinners Point, Va., Pennsylvania to New York and South Brooklyn to East New York. Delivery tendered on March 1, 1923 but refused, the consignee insisting that delivery should be made over the L. I. as shown in the bill of lading. Shipment was reconsigned to Ozone Park and delivery effected by the L. I. on April 23, 1923. Charged 43c to East New York plus $1.26 per ton beyond, plus $2.70 reconsigning and $2.13 demurrage. Had the shipment been forwarded for L. I. delivery over either the Southern or A. C. L. beyond Augusta, the 43c rate plus $2.70 for reconsignment would have applied to Ozone Park. HELD, A. C. L. misrouted shipment, reparation awarded. Underwood Lumber Corporation v. A. C. L. R. R., 120 I. C. C. 175.

(h) Complainant, after one month after the institution of court proceeding by defendants to collect outstanding undercharges, alleged that the additional charges sought to be collected on a car of apples shipped on Nov. 3, 1922 from White Salmon, Wash., to Phoenix, Ariz., were caused by the refusal of the S. P. & S. to allow complainant to designate the routing and by the designation of an impossible and circuitous routing by that carrier, that the charges collected at a rate of $1.83 and additional charges sought to be collected were unreasonable, unduly prejudicial and illegal. White Salmon is local to the S. P. & S., 75 miles east of Portland, Ore. Complainant filed

with agent at White Salmon Nov. 1, 1922 a written order for a refrigerator car to be used for a shipment of apples to Chicago over the S. P. & S., to Spokane and G. N. and its connection beyond. The S. P. & S. which is owned in equal amounts by the G. N., and N. P., owns no refrigerator equipment, its practice being to obtain refrigerator cars from the line over which they move beyond its rails. On Nov. 2, it furnished complainant with a G. N., refrigerator car for the movement to Chicago. Thereafter, however, complainant determined to forward the car, then either partly or wholly loaded, to Phoenix. On Nov. 3, its warehouse foreman tendered the S. P. & S., agent a bill of lading naming Phoenix as the destination and directing routing over the S. P. & S., to Portland and S. P., and Santa Fe beyond. Over this route the distance is 1,656 miles and rate $1.565. Relying upon the car service rules of the S. P. & S., which provided that the G. N., must participate in the movement of its cars when used for loading to point beyond its rails, the agent refused to execute the bill of lading unless it was changed to accord the G. N., a haul. The evidence is conflicting as to whether the agent required the insertion of the routing in the bill of lading which was finally executed or whether he merely explained to complainants warehouse foreman how the G. N., could be given a part of the haul, but however that may be, the shipment was finally accepted by the agent and moved out on a bill of lading specifying routing "SPS-GN-UP-SALT LAKE ROUTE-Santa Fe." Apparently it moved over S. P. & S.. to Spokane, G. N., to Butte, Mont., O. S. L., to Salt Lake City, L. A. & S. L., to Daggett, Calif., and Santa Fe beyond, 2,360 miles, applicable rate a combination of $3.30. HELD, rate assailed unreasonable to extent it exceeded $1.565, reparation awarded. Wuille & Co. v. S. P. & S. Ry., 123 I. C. C. 190.

(i) Charges on grapes from Reedley, Calif., to Croxton, N. J., reconsigned to Scranton, Pa., assessed on basis of through rate to Croxton plus second-class rate to Scranton, FOUND inapplicable. The through rate applied both to Scranton and Croxton and governing tariff provided that to points on direct route reconsignment would be made at through rate plus reconsignment charge except on shipments involving a back haul, in which event charges would be computed on a mileage basis, plus reconsignment charge, for back hauls not exceeding 300 miles. Here, movement involved a back haul exceeding 300 miles and class rate was assessed. However, as the through rate was unrestricted as to routing and shipments could have moved via a route involving a back haul less than 300 miles, charges based on mileage over the shorter route should have been assessed. Reparation awarded. California Table Fruit Co. v. A., T. & S. F., 126 I. C. C. 700.

(j) Shipments of rough quarried marble from Phenix, Mo., to Cleveland Ohio, routed "Best Route" and "Best Route for B. & O. Del.," moved via East St. Louis. Contemporaneously a lower rate applied via Chicago. Citing 16 I. C. C. 525, and contending that under Conf. Ruling 214 (g), carrier's agent could not reasonably be expected to know existence of the lower rate through Chicago, HELD: Rate beyond Chicago was published in separate tariffs of various carriers, Chicago was not an unnatural gateway for shipments involved, and agent at Phenix could therefore reasonably be charged with knowledge of that route. Moreover, "Best Route" implied the cheapest reasonable route and "Best Route for B. & O. Del.," required movement over cheapest route permitting B. & O. delivery. See 42 I. C. C. 719. Therefore carrier's failure to send shipments via Chicago resulted in misrouting. Reparation awarded. Norcross Marble Co. v. B. & O. R. R., 126 I. C. C. 741.

(k) It is not incumbent upon initial carrier to send a shipment tendered with complete routing over a route requiring the interposition of another carrier. See 42 I. C. C. 150. Norcross Marble Co. v. B. & O., 126 I. C. C. 741, 742.

(l) Complainant alleged that less carload shipments of various kinds of paper from Watertown, Brownsville and New Hartford, N. Y., to Lynchburg, Va., were misrouted. Those in 17465 were routed by N. Y. C., the initial carrier, and were transported via Newberry Jct., Pa., Pennsylvania, to Potomac Tfr., Va., R. F. & P. to Richmond, Va., and C. & O. to Lynchburg, and third class through rate of 95c was charged. The same rate was also in effect from Watertown and Brownsville with the Southern as delivering carrier. There was contemporaneously in effect a rate of 81c which applied N. Y. C. to Newberry Jct., Pennsylvania, to Harrisburg, Reading to

Shippensburg, W. M. to Hagerstown, Md., and N. & W. beyond. The 81c rate is made up of 68c to Lone Jack, Va., and 13c to Lynchburg. Lone Jack is a short distance south of Lynchburg and the rate to that point is governed by the southern classification, under which printing paper is rated fourth class. Rates to Lynchburg are governed by the official classification, printing paper being rated third class. Shipment in 16968 delivered at New Hartford to the D. L. & W., forwarded over D. L. & W. and connecting lines, including the C. & O. as delivering carrier, charged joint third class rate of 70c. Combination rate was 57c made up of fifth class of 46.5c to Lone Jack and 10.5c beyond, with routing N. Y. C. and connections to Hagerstown, Md., thence N. & W. to Lynchburg. Lone Jack is beyond Lynchburg over this route. Shipment in 16968 Sub. 1 was originally billed at printing paper, but changed to read at destination wrapping paper. Delivered to N. Y. C. at Watertown without routing instructions and was forwarded over that carrier, Pennsylvania, R. F. & P. and C. & O., charged third class of 95c, 62c rate applicable if shipment had been forwarded via Hagerstown, made up of 50.5c to Lone Jack and fifth class rate of 10.5c beyond. The second component of the lower combination through rate applied from an unimportant nonagency prepay station about 750 miles distant from point of origin. Even if the carriers agent could be expected to have had knowledge of the lower rate in each instance to Lone Jack it would not seem reasonable to expect him to have knowledge of the distant local rate referred to which caused the lower through charge. HELD: initial carriers not guilty of misrouting, complaints dismissed. Lynchburg Chamber of Commerce v. N. Y. C. R. R., 128 I. C. C. 159.

(m) Complainants alleged that unrouted shipments forwarded over a a route taking a third-class rate were misrouted because tariffs published a lower combination over another available route. Carriers rely upon 247 U. S. 477, which holds that the duty to route over cheapest route is not absolute but depends upon reasonableness of available routes. FOUND: While Conf. Ruling 214 (c) provides that duty of carrier's agent is to forward over cheapest route known to him, Conf. Ruling 214 (g) provides that there is a limit beyond which agents can not reasonably be expected to know as to terminal delivery. From a distance standpoint route used was a reasonable one. Moreover, one component of lower combination applied from an unimportant nonagency station 750 miles from point of origin and even if agent had knowledge of the lower rate it would not seem reasonable to expect him to have knowledge of the distant component producing the lower charge. Shipments were therefore not misrouted. Lynchburg Chamber of Commerce v. N. Y. C. 128 I. C. C. 159.

(n) On coal routed by shipper from Annabelle, W. Va., to Goshen, Ind., complainant was quoted a joint rate. Shipment was diverted en route to Benton Harbor, Mich., and since joint rate did not apply over that route, higher combination rate was assessed. Upon contention that as lower joint rate applies over other routes from points in the Annabelle group to group in which Benton Harbor is included, it should also apply over route of movement. HELD: Agent at point of origin was not advised that shipment was to be reconsigned, or as to final destination, and since it moved as routed, it was not misrouted. Moreover, earnings under rate charged do not indicate that it exceeded a maximum reasonable basis and failure to take advantage of lower rate over restricted routes does not establish unreasonableness of rate charged or necessity for additional routes. Sellers v. C., C., C. & St. L., 128 I. C. C. 263.

(o) Reference in a tariff to rule 77 of Tariff Circular 18-A is to be construed in the light of its terms, and does not charge its interpreter with knowledge of operating or other conditions which would eliminate any apparently reasonable and available route. See 81 I. C. C. 662 and 120 I. C. C. 316. New York Insulated Wire Co. v. N. Y., N. H. & H., 128 I. C. C. 698, 699.

(p) Shipments of anthracite coal from Pennsylvania points to Fort Snelling, Minn., moved via St. Paul to Minneapolis, thence to Fort Snelling. Charges were collected on basis of rate to Minneapolis. However, Fort Snelling was not named as a point to which that rate applied, and carriers sought to collect undercharges for local rate from Minneapolis to Fort Snelling. FOUND: While customary route between St. Paul and Minneapolis is via Minnesota Transfer, and shipments moved over

that route, they could have moved via Mendota, Minn., over which route Fort Snelling is intermediate to Minneapolis. Since Fort Snelling generally takes Minneapolis rate on coal from various other points, and that rate was subsequently established over route of movement, applicable rate was unreasonable to extent it exceeded rate to Minneapolis. Waiver of undercharges authorized. Hostler Coal & Lbr. Co. v. P. M., 128 I. C. C. 731.

(q) Defendants urge that the intermediate rule was published in a tariff of a distant line and that even though it were found to be applicable the agent should not be charged with knowledge that it was applicable and that by its use a lower combination would result over an unreasonable and impracticable route. HELD: shipment not misrouted. Pine & Cypress Mfg. Co. v. W. & L. R. R., 129 I. C. C. 321, 322.

(r) The fact that certain routes are desirable is not an indication that other routes are undesirable. White Eagle Oil & Refining Co. v. C. B. & Q. R. R., 129 I. C. C. 467, 468.

(s) In Conf. Ruling 214 G the Commission admonished the shippers to bear in mind that there is a limit beyond which an agent of a carrier could not reasonably be expected to have knowledge as to terminal deliveries or local rates at distant points and on lines of distant roads. The existence of joint rates via recognized gateways upon this traffic would make it unreasonable to require defendants agent to make inquiry as to whether or not a lower combination could be based upon a relatively obscure point beyond the gateways. Windsor Broom Co. v. C. R. R. of N. J., 129 I. C. C. 705, 706.

(t) First-class rate on passenger automobiles from Janesville, Wis., to Mason, City, Iowa, found applicable and not unreasonable or unduly prejudicial. Under a restricted tariff a lower joint commodity rate subject to rule 77 of Tariff Circular 18—A was contemporaneously in effect to Ames. Complaint contended that as Mason City was intermediate to Ames over a circuitous route and shipment moved in compliance with routing restriction the lower rate was applicable. FOUND: That publication of rule 77 does not warrant a finding of unreasonableness where, as in this case, point which is claimed to be intermediate to lower-rated point is intermediate only via excessively circuitous and unnatural routes over which no shipper could reasonably request transportation under provisions of section 1 (4) of the interstate commerce act. Woodward Auto Co. v. C., M. & St. P., 129 I. C. C. 613.

§2a. Commission Service Orders.

(a) Shipments originally routed by complainant were delayed en route because of congestion. Service Order No. 22 of commission provided for disregard by carriers of shipper's routing instructions and forwarding of shipments over routes which would expedite movement and prevent congestion, the rate designated by shipper in billing to be protected unless lower rate applied via route of movement. Complainant requested diversion under that order, shipments so moved, and rate over route of movement was assessed. HELD: Situation here is similar to a case where shipper's routing instructions and rate are inconsistent, under circumstances of which carrier's duty is to inquire as to which instruction shall govern. See Conf. Ruling 474 (c). Carrier here accepted diversion request subject to service order, and it was incumbent upon it to have notified complainant if its intention was not to protect the rate specified in original billing. Having failed therein, the applicable rate was that in effect over route named in billing. Reparation awarded. Seldon-Breck Const. Co. v. C., M. & St. P., 120 I. C. C. 134.

§3. Conflict in Billing Between Rate and Route.

See Bills of Lading §9 (1); Export Rates and Facilities II; Through Routes and Joint Rates III.

(a) Complainant attacked commodity rates charged on gas oil, in tank cars, from Electra and Iowa Park, Tex., to Kassel, La., as unreasonable. Iowa Park is 125 miles and Electra 141 miles northwest of Fort Worth, Tex. Charged 24.5c, rate sought 20.5c, shipper inserting the routes and a rate of 20.5c in the bill of lading. Kassel and Good Hope are two of many points in the New Orleans district that ordinarily take the New Orleans basis of rates, which is 20.5c. Present rate is 22c. When the shipments were tendered on bills of lading specifying the routing and also naming a rate which was applicable in con-

nection with the originating carrier but was inconsistent with the routing specified, it was the duty of the originating carrier to ascertain from the shipper whether the routing specified should be observed or whether the shipments should be forwarded over routes taking the rate named. This it failed to do. HELD, shipments misrouted, reparation awarded. Altitude Petroleum Co. v. Ft. W. & D. C., 118 I. C. C. 572.

(b) Where a shipper indicates a routing inconsistent with the rates specified in the shipping instructions, it is the duty of the carrier to inquire of the shipper which instruction shall govern, failing in which the shipper is entitled to recover the damages suffered. Selden Breck Construction Co. v. C. M. & St. P. Ry., 120 I. C. C. 134, 136.

(c) Shipments of soap and cleaning compounds from Manchester, Conn., to Cincinnati, Ohio, and St. Louis, Mo., were routed by complainant "O. Dom. c/o C. & O. (or N. & W.)" and connecting lines. Rates shown in bills of lading were not applicable over routes named and some of shipments moved before complainant was notified of conflict between route and rate. Charges were collected at applicable combination rates which were higher than rates shown in bills of lading. HELD: St. Louis and Cincinnati can not be said to be "distant points," or the Old Dominion, Chesapeake & Ohio or Norfolk & Western "distant roads" within the meaning of Conf. Ruling 214 (g), and shipments tendered before complainant was notified of conflict between route and rate were, therefore, misrouted. See Conf. Ruling 474 (c); 48 I. C. C. 423; 91 I. C. C. 723. Reparation awarded. Orford Soap Co. v. N. Y., N. H. & H., 122 I. C. C. 71.

(d) Under Interstate Commerce Act, § 7 (U. S. Comp. St. § 8563), Public Service Commission Law, § 33, and subd. 1, and Conference Rulings 214 (c), 474 (c), adopted by Interstate Commerce Commission, where bill of lading did not designate any route, but contained recital, "Freight $1.80 ton," and there were three available routes, two of which had $1.80 rate, while third had $1.30 rate, HELD, that bill of lading contemplated shipment by either of the two routes having $1.80 rate, and shipper was liable for such rate. Davis, Director General of Railroads v. Cayuga Operating Co., 216 N. Y. S. 186.

(e) Conference Ruling 474 (c), adopted by Interstate Commerce Commission to enforce Interstate Commerce Act, §7 (U. S. Comp. St. §8563), requiring carrier, when rate and route inserted in bill of lading by shipper do not coincide, to ascertain from shipper which shall control, necessarily implies that, if only one is given, it shall control, if sufficiently specific. Davis, Director General of Railroads v. Cayuga Operating Co., 216 N. Y. S. 186, 187.

(f) Where bill of lading, signed by shipper and railway, showed choice of particular route, both parties are bound by selection, under Interstate Commerce Act, § 15, as amended by Act. Cong. June 18, 1910, § 12 (U. S. Comp. St. § 8583), in absence of pleading or proof of fraud or mistake, and hence it is error to admit evidence relating to time required to move shipment by another route, or to give instruction that railroad was under duty to ship over most direct route available. Illinois Cent. R. Co. v. Luther, (Ky., 1926) 283 S. W. 1013.

(g) Where bill of lading, signed by shipper and railroad, showed choice of particular route, under Interstate Commerce Act, § 15, as amended by Act Cong. June 18, 1910, § 12 (U. S. Comp. St. § 8583), court should have instructed that shipment over such route was expressly agreed on. Illinois Cent. R. Co. v. Luther, (Ky., 1926) 283 S. W. 1013.

§3½. Conflict Between Billing and Shipping Ticket.

See Bills of Lading §9 (3).

(a) Complainant attacked combination rates charged on cars of soap and cleaning compounds from Manchester, Conn., to Cincinnati, O., and St. Louis, Mo., between Jan. 9 and March 12, 1924 were misrouted. Shipments were delivered with routing instructions "O. Dom, care C. & O. (or N. & W.) and connecting lines." The bills of ladings on the shipments to Cincinnati also contained a rate of 49c in some instances and 46c in other instances, and on the shipments to St. Louis a rate of 63c. Shipments moved New Haven to New York, Old Dominion Steamship Line to Norfolk, Va., C. & O. or N. & W. and connecting lines beyond. Charged 70c to Cincinnati and 87c to St. Louis. Applicable rates over defendants line and certain of its other connections were fifth class rates of 49c to Cincinnati and 66c to St. Louis. The 46c and 63c rates

named in certain of the bills of lading were not applicable over any route. There were no joint rates in effect from Manchester to Cincinnati and St. Louis in connection with the Old Dominion, but the higher class rates were made applicable by that line under its tariff which provided for the absorption of a portion of the charges of the rail carriers. This provision did not apply to the fifth class rates. Under the circumstances, St. Louis and Cincinnati can not be said to be "distant points" or the Old Dominion, C. & O. or N. & W. "distant roads" within the meaning of Conf. Ruling 214 g. Defendants agent misrouted the shipments which were tendered before he notified complainants representative of the conflict between the route and the rate. HELD, shipments tendered prior to Feb. 5, 1924 were misrouted and shipments tendered after that date were not misrouted reparation awarded on basis of 49c to Cincinnati and 66c to St. Louis. Orford Soap Co. v. N. Y. N. H. & H. R. R., 122 I. C. C. 71.

§3½a. Contracts For Routing.

(a) Existence of option contracts on shares of stock of a carrier, issued to shippers and conditioned upon the routing of traffic over the carrier's line, can have little weight in the consideration of whether or not the line of the carrier issuing the option contracts should be eliminated as an intermediate carrier in the routing of transcontinental traffic. The proper remedy for the practice of entering into such contracts, assuming it to be illegal, would be the elimination of the practice rather than of the carrier in the routes. Restrictions in Routing over S. L. & U., 122 I. C. C. 208, 209, 210.

§4. Direct and Cheapest Available Route.

(a) Rate assessed on shipments of fuel oil moving from Tulsa, Okla., to St. Catharines, Ont., reconsigned to Pittsburgh, and again to Woodlawn, Pa., over a circuitous route, found illegal. Contemporaneously a lower unrestricted rate applied via a more direct route and all carriers participating in movement were parties to tariff naming such lower rate. Reparation awarded. Kyoleum Co. v. Director General, 104 I. C. C. 1.

(b) Lumber from Aberdeen, Miss, to Chicago was routed "c/o C., M. & St. P." Originating line, the M. & O., changed routing instructions to "Wabash-C., M. & St. P. Dely." The Milwaukee, receiving no road haul, refused to accord the Chicago rate and demanded its applicable switching charge. Consignee declined, demurrage accrued, and shipment was reconsigned. Shipment could have been routed by M. & O. over available routes consistent with routing instructions over which the Milwaukee would have received a line haul and desired delivery made at Chicago rate. While governing tariff erroneously showed that consignee was located on a private track connecting with the Milwaukee such error did not relieve the M. & O. of its responsibility to observe routing instructions. See 23 I. C. C. 84 and 83 I. C. C. 490. The M. & O.'s error prevented proper delivery, and where a shipper is compelled to pay demurrage charges through fault of a carrier such charges must be refunded. See 41 I. C. C. 723 and 46 I. C. C. 365. Hector Lbr. Co. v. C., M. & St. P., 112 I. C. C. 418.

(c) On shipments of wheat moving from St Francis, Kans., to Kansas City, Mo., there stored in transit, and reforwarded to Wausau, Wis., delivering carrier only was specified in bill of lading. Initial carrier's act in forwarding shipments from transit point over a route taking a rate higher than that available over another route consistent with delivery instructions specified, found to have resulted in misrouting. Reparation awarded. Hodgson-Davis Grain Co. v. C., B. & Q., 113 I. C. C. 234.

(d) Shipments of tomatoes from Palmetto, Fla., to Norfolk, Va., reconsigned to New York without routing instructions. Governing tariff provided for combination rates where no joint rates applied through reconsigning point. Joint rate applied from Palmetto to New York via Richmond, Va., but use of this route entailed a back haul. Upon contention that shipment was misrouted and that applicable rate was joint rate in effect via Richmond, HELD: While it was carrier's duty to forward car through Richmond if a cheaper rate applied over that route, it is not shown that a cheaper combination could have been made. Joint rate was inapplicable inasmuch as reconsignment rule of governing tariff contemplated back hauling of shipments only when necessary to meet through rates of other carriers and there was no such competitive route through Norfolk. Shipment therefore was not misrouted and combination based on Norfolk was

applicable. Olivitt Bros. v. P. B. L. R. R., 113 I. C. C. 262.

(e) Rates on grain and products from C. & E. I. R. R. stations, through Indianapolis, to Louisville, on traffic destined to southeastern points, and transit arrangements in connection therewith at Indianapolis, found not unreasonable or otherwise unlawful as compared with lower proportionals over same carrier to Princeton, Ind., and thence in connection with the Southern Ry. beyond. The proportionals are part of an equalization scheme whereby Louisville and Evansville, as gateways, are kept on a parity, were established primarily in interest of economical operation, and do not constitute a proper measure for rates through Indianapolis. Their cancellation would not benefit Indianapolis interests, whereas their publication through that point would deprive the C. & E. I. R. R. of its long haul, which, in absence of a convincing showing of public interest and necessity, should not be required. Moreover, carriers show that rates assailed are low as compared with those from same origin points to destinations in Ohio and Michigan for similar distances. Indianapolis Board of Trade v. L. & N., 113 I. C. C. 508.

(f) Complainant attacked commodity rate of $1.15 charged on four cars of peaches shipped July 26 and 27, 1922, from Harriman, Tenn., to Potomac Yard, Va., and New York, N. Y., subsequently reconsigned to Pittsburgh, Pa., as unreasonable and unjustly discriminatory to extent it exceeds 76.5c. Harriman is a joint agency of defendant and C. N. O. & T. P. which is a part of the Southern system, and all four cars were delivered to defendants agent on bills of lading which did not specify either the rate or route of movement. The bills covering three of the cars were on forms of defendant while a C. N. O. & T. P. form was used for one of the cars shipped to Potomac Yard. The C. N. O. & T. P. does not reach Potomac Yard nor form a part of the direct route from Harriman to that point. Over its line in connection with the C. & O. from Lexington, Ky., to Charlottesville, Va., and defendants line beyond, thence Southern, the distance to Potomac Yard is 744 miles, or 98 miles longer than over defendant's line through Knoxville. The distance from Harriman to New York over defendant's line through Potomac Yard is 884 miles as contrasted with 1,015 miles over the C. N. O. & T. P. and connections via Cincinnati. All of the cars were routed by the agent at Harriman over defendant's line to Potomac Yard, the Pennsylvania being designated as the carrier beyond on the two cars destined to New York. While enroute the shipments were reconsigned to Pittsburgh the reconsignment being accomplished at Potomac Yard the movement from the latter point being over the Pennsylvania. Charged 45c to Knoxville and 70c to Pittsburgh. Complainant alleged misrouting, and that rate charged was unreasonable to extent it exceeded the joint through rate of 76.5c contemporaneously applicable from Harriman to Pittsburgh over C. N. O. & T. P. with routing through Cincinnati. Viewed from the standpoint of the original destinations of these shipments, any route to either destination which might be formed in connection with the C. N. O. & T. P. would be circuitous and involve short hauling the Southern considered as a system embracing the former carrier. It was well known to the shipper at the time that from an operating standpoint the C. N. O. & T. P. is a part of the Southern system, and if for any reason it was desired that this car, consisting of a highly perishable commodity, should move over defendant's considerably longer route through Cincinnati instructions to that effect should have been inserted in the space for routing provided in the bill of lading. HELD, shipments not misrouted, rate charged not unreasonable or otherwise unlawful, complaint dismissed. Gentile Bros. Co. v. Southern Ry., 113 I. C. C. 670.

(g) Peaches from Harriman, Tenn., a joint-agency station, were originally consigned to Potomac Yard, Va., and New York, bills of lading being made out on forms of either the Southern or the C., N. O. & T. P. Ry. Latter road, a part of the Southern system, does not reach Potomac Yard or form part of any direct route to that point, consequently, all shipments were forwarded via the Southern's direct route to Potomac Yard, thence reconsigned to Pittsburgh. A lower rate to Pittsburgh existed via a longer route through Cincinnati in connection with the C., N. O. & T. P., and shipper alleged misrouting upon theory that agent at Harriman should have so routed shipments. HELD: Cars moved toward originally intended destinations over the direct route, which is over the

Southern's eastern lines. Use of the C., N. O. & T. P. lading forms being merely accidental and reconsignment instructions not being given until after cars reached Potomac Yard, if shipper desired movement over longer route instructions to that effect should have been inserted in bills of lading. Gentile Bros. Co. v. S. Ry., 113 I. C. C. 670.

(h) In 83 I. C. C. 417 the Commission found the rates applicable over the route of movement on 25 cars of cement, shipped between June 26, 1918, and January 31, 1919, from Richard City, Tenn., to Miami, Daytona, Cocoanut Grove, West Palm Beach, and Canal Port, Fla., as not unreasonable but shipments misrouted. The rates charged and those which would have applied under defendant's interpretation of the tariffs, except for the misrouting, were combination rates based on Jacksonville, Fla., through which point all of the shipments moved; 23c to Daytona, 25.5c to West Palm Beach, Canal Port and Miami and 26c to Cocoanut Grove. Cement is shown in the tariff as taking a specific increase of 2c. It appears, therefore, that even though class rates were applied on the shipments for the movement south of Jacksonville, and that the class rates ordinarily were not included within the Washburn tariff combination rule which provided for single increases, these particular class L rates were nevertheless specifically included within the combination rule, and that such combination rate should have taken but one increase of 2c under G. O. 28. Therefore, the rates which would have been applicable except for the misrouting were 2c less than those charged. HELD, shipments misrouted, and complainant damaged to extent of Jacksonville combination in effect prior to June 25, 1918, plus 2c, reparation awarded. Dixie Portland Cement Co. v. Director General, 115 I. C. C. 111.

(i) Complainant attacked joint rates of 29.5c charged on one car of lumber shipped October 23, 1922, from Bonneau, S. C., to Chatham, Va., and 25.5c charged on one car of lumber shipped November 21, 1922, from Jalapa, S. C., to Danville, Va., as unreasonable and in violation of the fourth section. No. 16397. Bonneau is on the A. C. L., 38 miles north of Charleston, and 294 and 357 miles south of Emporia and Richmond, Va. Chatham is on the Southern, 17.6 miles north of Danville and 45.7 miles south of Lynchburg. Danville is 132 miles west of Emporia over the Southern. Shipment from Bonneau to Chatham was unrouted by complainant and moved A. C. L. via Emporia to Richmond, C. & O. to Lynchburg and Southern to Chatham, 554 miles. A combination rate of 24.5c composed of 6c to Charleston plus 18.5c beyond, 428 miles was in effect. HELD, shipment misrouted. No. 16397-1. Jalapa is 8 miles northwest of Newberry, S. C., Newberry is 43 miles northwest of Columbia. Shipment moved C. N. & L. to Columbia, thence Southern to Danville 304 miles, charged 5c to Newberry and 20.5c beyond. A rate of 20.5c to Lynchburg was applicable over C. N. & L. to Columbia, A. C. L. to Emporia and Southern beyond. HELD, rate attacked unreasonable to extent it exceeded 20.5c, reparation awarded. Traffic Bureau v. A. C. L. R. R., 115 I. C. C. 121.

(j) Complainant alleged charges collected on about 175 cars of crushed rock shipped between July, 1923, and July, 1924, from Dresser Junction, Wis., to Minnehaha Falls, Minn., as unreasonable. Shipments were tendered without routing instructions, moved over Soo to Minneapolis, switched by N. P., to C. M. & St. P. which effected delivery on its public team track. The distance over this route is 55 miles. Charged 5c plus $1.80 per car for the switching performed by the N. P., the 5c rate resulting from the application of the combination rule to factors of 3.5c to Minneapolic and 3c beyond. Complainants evidence was directed to the rate received by the Milwaukee for which is described as a simple operation. Effective August 31, 1925, a joint rate of 3.5c was established. Inasmuch as a rate of 5c without switching charge, applied by way of Minnesota Transfer, the shipments were misrouted. HELD, rate attacked unreasonable to extent it exceeded 3.5c, reparation awarded. Board of Park Commissioners v. C. M. & St. P. Ry., 115 I. C. C. 211.

(k) Complainant attacked combination rates on coal, in carloads shipped during April and May, 1923, from Wilder and Davidson, Tenn., to Peoria, Ill., and diverted to destinations on the M. & St. L. in Iowa as unreasonable and unduly prejudicial. All of complainants shipments moved through Cincinnati, Ohio, to Peoria, Ill., and were there reconsigned. Combination rates assessed. Complainants seek reparation to the

basis of joint rates applicable only via Louisville, Ky., and Peoria. The bills of lading of the shipments showed Peoria as the destination and various routings, some being incomplete. Most of them specified routing via Cincinnati, and others, although the billing was indefinite, apparently left it optional with defendants to send the cars via either Cincinnati or Louisville. The rate to Peoria was the same via either gateway. A short time before the period of movement defendants had published the joint rates via Louisville authorizing reconsignment at Peoria to meet like rates effect to this territory from mines on the L. & N. For some reason these joint rates were not made applicable at that time through Cincinnati, but were later made effective over this route on December 10, 1923. As there was nothing on the bills of lading to inform defendant's agent that the cars were to be reconsigned beyond Peoria and the rates were the same to that point via either gateway, defendants can not be held to have misrouted the shipments. HELD, rates attacked applicable and not unreasonable or otherwise unlawful complaint dismissed. Fentress Coal Co. v. T. C. Ry., 115 I. C. C. 286.

(l) Complainant attacked rate on a car of lumber shipped August 2, 1924, from Milledgeville, Ga., to Edenton, N. C., and there reconsigned to Arlington, Md., as unreasonable and inapplicable. Shipment moved Ga. R. R. to Augusta, Ga., A. C. L. to Wilson, N. C., N. S. through Edenton to Norfolk, Va., thence either C. & O. to Waynesboro, Va., N. & W. to Hagerstown, Md., and W. M. beyond, or C. & O. to Durbin, W. Va., and W. M. beyond. Applicable rate was 43.5c composed of 28.5c to and 18c beyond Norfolk, subject to the combination rule. The gravamen of the complaint is that shipment was misrouted to Edenton thereby depriving complainant of reconsignment to Arlington at a through rate of 35c named over certain routes through Edenton other than in connection with the A. C. L. as an intermediate carrier. Shipment was tendered to the Ga. R. R. with a bill of lading specifying the destination as Edenton and routing over the N. S. These two lines do not connect and the routing was incomplete. Having accepted the shipment without intermediate routing the duty rested upon the Georgia to forward it to Edenton over the cheapest reasonably available route in connection with the N. S. as the delivering line. The Georgia can not be held liable for misrouting because when it designated the intermediate routing it could not foresee the further transportation from Edenton to Arlington. HELD, applicable through rate was 43.5c and not unreasonable, complaint dismissed. Traffic Bureau, Chamber of Commerce v. Georgia R. R., 115 I. C. C. 419.

(m) Complainant attacked commodity rates charged on two cars of yellow pine lumber one shipped March 5, 1924, from Elba, Ala., and the other August 19, 1924, from Richton, Miss., to Booneville, Ind., as unreasonable and inapplicable. Shipment from Elba moved over A. C. L. to Montgomery, L. & N. to Louisville and Southern beyond 733 miles, charged through rate of 36c. Complainants routing instructions consisted of the notation "cheapest routing" on the bill of lading. Direct route from Elba to Booneville is A. C. L. to Montgomery L. & N. to Evansville and Southern beyond 614 miles, 36c rate applicable. Complainant contends that in view of the routing instructions the shipment should have been routed over A. C. L. to Montgomery, L. & N. to Evansville and E. S. & N. beyond, over which routes a combination rate of 34c applied subject to the combination rule. Shipment from Richton moved G. M. & N. to Jackson, Tenn., B. & N. W. to Bells, Tenn., L. & N. to Evansville and E. S. & N. beyond, charged 34c subject to combination rule. HELD, shipment from Elba misrouted, shipment from Richton overcharged to extent rate exceeded 33.5c, reparation awarded, rates attacked not unreasonable. Standard Lumber Co. v. A. C. L. R. R., 118 I. C. C. 703.

(n) Failure of carrier to forward shipments via cheapest reasonable route consistent with routing instructions found to have resulted in misrouting. Bush & Co. v. L. & N., 115 I. C. C. 45, 46.

(o) Failure of initial carrier to forward an unrouted shipment of lumber from Bonneau, S. C., to Chatham, Va., via cheapest available route, found to have resulted in misrouting. Reparation awarded. Lynchburg Traffic Bureau v. A. C. L., 115 I. C. C. 121.

(p) Shipment was tendered to originating line with bill of lading specifying destination and delivering line but no intermediate routing. Upon arrival at

original destination shipment was reconsigned. Upon contention that shipment was misrouted because it was carrier's duty to forward via another available route over which reconsignment could have been effected at a lower through rate. HELD, while duty rested upon initial carrier to forward shipment over cheapest reasonably available route in conformity with routing instructions given, it can not be held for misrouting because same rate applied over route of movement as over route contended for, and carrier when it designated intermediate routing, could not foresee the further transportation accomplished by reconsignment beyond originally billed destination. Lynchburg Chamber of Commerce v. G. R. R., 115 I. C. C. 419.

(q) Shipment of peaches from Powersville, Ga., to Jamestown, N. Y., was tendered with routing instructions "Georgia R. R.-A. C. L. R. R." and moved through Potomac Yard, Va. Contemporaneously a lower rate, unrestricted as to routing, applied via Cincinnati. Contention that shipment was misrouted because not forwarded via lower-rated route not sustained. The customary gateway to the North and East over coastal lines was and is Potomac Yard and if unusual or circuitous movement was desired, bill of lading should have borne necessary instructions. It would place an undue burden on carriers to require them to search tariffs for all possible cheaper routes in absence of routing restrictions. Moreover, under such circumstances shippers should not be permitted to disclaim all responsibility for routing of their shipments. Shipment found not misrouted. Miller v. C. of Ga., 115 I. C. C. 518.

(r) Bill of lading specified delivering carrier. Originating line reserved to itself entire line haul between origin and destination and merely accorded delivering road a switching movement at destination. A lower rate contemporaneously applied via route over which delivering carrier would have received a line haul. FOUND, shipments were misrouted, since it was duty of initial carrier to have so routed the car that delivery could have been effected at cheapest available cost to shipper. See also 21 I. C. C. 451 and other cited cases. Reparation awarded. Kanotex Refining Co. v. A., T. & S. F., 115 I. C. C. 559.

(s) Routing instructions on lumber forwarded from Elba, Ala., to Boonville, Ind., specified "cheapest route." A lower rate applied via a route other than that over which shipments moved. Citing 98 I. C. C. 451 and conference ruling 214 (g), carrier contended that as there was a joint rate in effect it was not duty of its agent to investigate all possible combinations to ascertain whether a lower rate applied over a different route, also that destination point being located on a suburban line comparatively unknown, the duty did not rest upon carrier to hunt up some unnatural connection. Here, however, suburban line operates its freight service by steam and files tariffs with commission. Rate to junction point of that line is named in same tariff pubishing the joint rate to Booneville, and official station list shows Booneville as located on suburban road. By exercise of due diligence the agent could have ascertained existence of the lower combination and originating carrier was, therefore, guilty of misrouting. Reparation awarded. Standard Lbr. Co. v. A. C. L., 118 I. C. C. 703.

(t) Complainant attacked rates charged on wheat, carloads, from Missouri, Kansas and Colorado milled in transit at Marshall, Mo., and on flour produced therefrom forwarded to Oklahoma City, Okla., as unjust, unreasonable, unduly prejudicial and inapplicable. No routing instructions were specified by the shipper in connection with the flour movement from Marshall to Oklahoma City. The shipments moved from Marshall back through Kansas City over the M. P., some of the cars being delivered to the M. K. T. at Wagoner, Okla., others to Ft. S. & W. at Fort Smith, Ark., which lines hauled them to destination. M. P. tariff I. C. C. A4614 in effect when the shipments moved, named a proportional rate of 29.5c from Kansas City to Oklahoma City on wheat, subject to transit under M. P. tariff I. C. C. A4510. Routing instructions were not specified in connection with the movement beyond Marshall and the M. P. admitted liability for misrouting because of failure to forward the shipments over the lower rated St. Louis route, and protected the combination rate of 54.5c from Leavenworth and Kansas City to Oklahoma City by making refund to that basis. The amount ultimately collected did not in any instance exceed the basis applicable over the routes of actual movements and the shipments were not

overcharged. It remains only to determine whether the 29.5c rate from Kansas City to Oklahoma City would have applied over the route through St. Louis. It is true that the tariff naming that rate did not restrict it so that it would apply only via junction points along the shortest system route. Under such circumstances the Commission has ordinarily found that the rate would apply via any junction point. But here we are dealing with a shipment which was stopped enroute and which could not be subject to any basis other than the straight combination of rates to and from the point of stoppage except by force of transit rules. HELD, charges attacked inapplicable, shipments misrouted, rates not unreasonable or otherwise unlawful, complaint dismissed. Victor Milling Co. v. M. P. R. R., 120 I. C. C. 335.

(u) Complainant alleged that, due to defendants failure to route over the cheapest available route consistent with routing instructions, various shipments of oil well supplies and iron pipe from Fruita, Colo., and Price, Utah, to Sunburst and Kremlin, Mont., during July and August, 1922 the rates applied were unreasonable. Price and Fruita are on the D. & R. G. W., 170 and 11 miles, west of Grand Jct., Colo. Shipments from Fruita were routed D. & R. G. W. to Ogden, Utah, U. P. to Butte, Mont., G. N. beyond. Those from Price were routed D. & R. G. W. to Salt Lake City, U. P. to Butte, and G. N. beyond. Shipments actually moved D. & R. G., Salt Lake City O. S. L., Butte, G. N. beyond. Charged on oil well supplies and iron pipe, points of origin to Ogden, 53.5c and 42.5c, Ogden to Helena, Mont., 78c Helena to Sunburst and Kremlin 55.5c and 56.5c. At time shipments moved a commodity rate of 65c on iron pipe and class A rate of $1.195 on oil well supplies from Pueblo, Colo., a point of the D. & R. G. W. east of Fruita and Price to Helena. These rates in connection with the factors beyond Helena would result in lower combination rates from Pueblo to Sunburst and Kremlin than those applied from Price and Fruita to the same destinations. The intermediate rule in the tariff required the unnamed intermediate points to be located between two stations on the line of the same carrier as the more distant points from which through rates were published. There are no points on the D. & R. G. W. west of Fruita and Price from which through rates are published to Helena. HELD, shipments not misrouted, complaint dismissed. Carter Oil Co. v. D. & R. G. W., 123 I. C. C. 596.

(v) Bills of lading covering shipment of lumber originally transported on transit bills of lading but rejected at destination, contained no routing instructions. Upon telephone request therefor, agent was advised to reverse routing shown in transit bills but agent returned shipment via a slightly different route over which same rate applied. Relying upon Conf. Ruling 214-c and 102 I. C. C. 693, complainant contended that as shipment was unrouted it was carrier's duty to forward via cheapest available route which was over a differential route through Canada. HELD: Since instructions were not literally followed, shipment was misrouted, but as same rate applied as over route specified, complainant was not damaged thereby. Moreover, to hold that shipment should have been returned via cheapest route would be to sanction a violation of instructions. Brooks Bros. v. N. Y., N. H. & H., 123 I. C. C. 607.

(w) Complainant attacked charges on five shipments of rough quarried marble from Phoenix, Mo., to Cleveland, O., in Sept. Nov. and Dec. 1924, as unreasonable and that shipments were misrouted. They moved over Frisco to East St. Louis and B. & O. beyond, charged 16c to East St. Louis and 29c beyond. A rate of $7.23 per ton was applicable through Chicago, Ill., composed of 21c to Chicago and $3.53 per ton beyond subject to the combination rule. Shipments were routed by shipper "best route for B. & O. del." The shipments should have been sent through Chicago and were misrouted. HELD: shipment misrouted, reparation awarded. Norcross Marble Co. v. B. & O. R. R., 126 I. C. C. 741.

(x) The direction to send shipments over the "best route" is to be given the same effect as if the shipments were not routed by the shipper at all, and therefore imposes upon the carrier the duty to send them over the cheapest reasonable route, to which the shipper would be entitled on shipments tendered unrouted. The direction "best route for B. & O. del" required the shipments to be sent over the cheapest route that would permit of B & O delivery, either by line haul or in switching service. Norcross Marble Co. v. B. & O. R. R., 126 I. C. C. 741, 742.

(y) Shipments of rough quarried

marble from Phenix, Mo., to Cleveland, Ohio, routed "Best Route" and "Best Route for B. & O. Del.," moved via East St. Louis. Contemporaneously a lower rate applied via Chicago. Citing 16 I. C. C. 525, and contending that under Conf. Ruling 214(g), carrier's agent could not reasonably be expected to know existence of the lower rate through Chicago, HELD: Rate beyond Chicago was published in separate tariffs of various carriers, Chicago was not an unnatural gateway for shipments involved, and agent at Phenix could therefore reasonably be charged with knowledge of that route. Moreover, "Best Route" implied the cheapest reasonable route and "Best Route for B. & O. Del." required movement over cheapest route permitting B. & O. delivery. See 42 I. C. C. 719. Therefore carrier's failure to send shipments via Chicago resulted in misrouting. Reparation awarded. Norcross Marble Co. v. B. & O., 126 I. C. C. 741.

(zaa) When there is no specific routing by shipper, it is the duty of carrier to ship by the cheapest and most available route and charge the lowest rate that has application to such shipment. W. L. Shepherd Lumber Co. v. Atlantic Coast Line R. Co., (Ala., 1927) 112 So. 323.

(bb) No obligation rests upon a carrier to hunt up unnatural connections or practically unknown gateways in order to determine the lowest possible combination rate for a given shipment. Amicon Fruit Co. v. L. V. R. R., 128 I. C. C. 34, 35.

(cc) Upon contention that where shipment is tendered without routing except as to delivering line and shipper makes no inquiry and exerts no effort to determine the cheapest route, his rights are reasonably and fully satisfied if shipment is transported over route taking the cheapest available joint rate, particularly where it is the only route commonly used and recognized, HELD: In 18 I. C. C. 190, it was stated that if shipper is in doubt about the rate he can tender the traffic to carrier without routing instructions and thus be entitled to lowest rate. Contention that existence of a joint rate is a guide in determining routing of shipments tendered without routing instructions and that agents should not be required to look up possible combination rates is without merit. See 40 I. C. C. 146, Amicon Fruit Co. v. L. V., 128 I. C. C. 34, 36.

(dd) The court stated that the duty of the carrier to ship over the cheaper route is not an absolute one; that the duty is upon the carrier only if other conditions are reasonably equal: and that the justification for resorting to a more expensive route may rest either upon the peculiar circumstances of a particular case or upon a general practice. Amicon Fruit Co. v. L. V. R. R., 128 I. C. C. 34, 37.

(ee) The duty of a carrier to forward a shipment over the cheapest possible route is not absolute, but its obligation depends upon the reasonableness of the possible routes available. Lynchburg Chamber of Commerce v. N. Y. C. R. R., 128 I. C. C. 159, 161.

(ff) In the absence of through routing by the shipper which the carrier is willing to observe, it is the duty of the agent of the carrier to route a shipment over the cheapest reasonable route known to him. Shippers must bear in mind that there is a limit beyond which an agent of a carrier could not reasonably be expected to know as to terminal delivery or local rates at distant points and on lines of distant roads to or with which he has no specific joint through routes. Consignors and consignees should cooperate with agents of carriers in avoiding misunderstandings and errors in routing and must expect to bear responsibility in connection therewith. Lynchburg Chamber of Commerce v. N. Y. C. R. R., 128 I. C. C. 159, 161.

(gg) There is an obvious distinction between cases in which it has been found that shipments moving by other than the short route were not forwarded "out-of-route" in the absence of a definition of the term and the present case where "out-of-route" is described in the tariff as a movement not on direct route between origin and destination. Michigan Bean Co. v. D., C. I. & M., 128 I. C. C. 207, 209.

(hh) Bill of lading specified "cheapest route." Carrier forwarded shipments via route taking a joint rate. Contemporaneously a lower combination rate treated by the combination rule was in effect over another route. Complainant contended that following 62 I. C. C. 643; 73 I. C. C. 551, the lower rate was applicable, whereas, carrier, citing Conf. Ruling 214 (g), contended that since a joint rate was in effect it would be unreasonable to require it to search out possible lower combinations. HELD:

In absence of specific routing, it was the duty of carrier's agent to send shipments over cheapest reasonable route, and since point upon which the lower combination made is an important gateway, it can not be fairly said that the route via that point is an unreasonable one. Shipments found misrouted and former report 118 I. C. C. 523 reversed. Lynchburg Chamber of Commerce v. S. Ry., 128 I. C. C. 497.

(ii) In original report, Lynchburg Traffic Bureau v. Southern Ry. 118 I. C. C. 523, Commission found that a carload of lumber shipped on Oct. 17, 1924, from Orangeburg, S. C., to Leesburg, Va., was not misrouted and that the rate charged was not unreasonable or otherwise unlawful, and dismissed the complaint. Shipment moved Southern to Alexandria, Va., and W. & O. D. beyond. Charged joint rate of 38c. Bill of lading specified "cheapest route." Contemporaneously there was published a combination rate composed of 18.5c Southern to Richmond, Va., 9.5c R. F. & P. to Alexandria, and 7.5c W. & O. D. beyond, first two factors being subject to the combination rule, or 34.5c through. In the original report the Commission found that the rate charged was also applicable over the route through Richmond. A further check of the tariffs disclosed that the joint rate was not applicable via Richmond. HELD: shipment misrouted, applicable rate 34.5c, reparation awarded. Lynchburg Traffic Bureau v. Southern Ry., 128 I. C. C. 497.

(jj) In the absence of specific routing, it is the duty of the agent to send the shipment over the cheapest reasonable route. Lynchburg Traffic Bureau v. Southern Ry., 128 I. C. C. 497, 498.

(kk) Fifth-class rate was charged on angles, channels, and beams, moving interstate from Indiana Harbor, Ind., to Indianapolis, Ind. A lower commodity rate contemporaneously applied to Raven, Ill., a point beyond Indianapolis, which rate complainant contended was applicable to Indianapolis by virtue of an intermediate clause in tariff. An examination of tariff, however, discloses that lower rate was contingent upon routing provided therein, and as no routing was provided from Indiana Harbor in connection with one of carriers over which shipment was routed, and tariff specifically provided that rates named therein would apply only when routing instructions were provided in tariff, the rate charged was applicable. Inland Steel Co. v. C. & O., 128 I. C. C. 551.

(ll) Complainant alleged commodity rate charged on one car of oil well machinery shipped Dec. 1, 1922, from Mobile, Ala., to Tulsa, Okla., as unreasonable and inapplicable. Shipment was tendered the M. & O. unrouted, and moved via that line to Memphis, Tenn., thence Rock Island to Hartford, Ark., and Midland Valley beyond, charged $1.465. There was contemporaneously published a class A rate of $1.16 from Mobile to Chetopa and Coffeyville, Kans., over M. & O. to St. Louis and M. K. Y. beyond. The tariff naming the $1.16 rate is not described as applying from or to points in Oklahoma. HELD: rate of $1.16 inapplicable, rate charged not unreasonable, complaint dismissed. Sinclair Oil & Gas Co. v. M. & O. R. R., 129 I. C. C. 281.

(mm) Complainant alleged combination rate of 19c charged on nine cars of wooden ties, shipped in March, April, May and June, 1924, from Seneca, Mo., to Picher, Okla., was inapplicable. Shipments were tendered to the Frisco, on bills of lading specifying routing "C/o Miami Mineral Belt" which carrier was the consignee. Moved Frisco to Quapaw, Okla., Miami Mineral Belt beyond, distance 49.1c miles, charged 19c based on Quapaw. Complainant contends that the shipment should have been routed over Frisco to Baxter, Kas., about 51 miles, and Miami Mineral Belt beyond, distance 57.9 miles, via which route claimed rate was 15c. The Commission has been unable to discover a lower through rate in effect between Seneca and Picher than that charged, shipment not misrouted nor overcharged, complaint dismissed. Goff v. St. L. S. F. Ry., 132 I. C. C. 314.

(nn) Shipments of fuel oil from Grandfield, Okla., originally destined to Granite City, Ill., and diverted to East Chicago, Ind., were tendered routed Chicago, Rock Island & Pacific; St. Louis-San Francisco; Merchant Bridge Terminal delivery. I nrequesting diversion to East Chicago; complainant erroneously advised agent of Rock Island at Tulsa, Okla., that shipments had been routed over that line, Merchant Bridge Terminal delivery, and before actual routing could be ascertained shipments had been delivered to the Frisco. There-

upon, in conformity with its tariff rules, the Rock Island placed diversion instructons with the Frisco FOUND: Initial carrier made diligent efforts to locate shipments before delivery was made to its connections and failure to divert was not result of negligence on part of its employees. Moreover, route over which shipments were diverted was not inconsistent with original routing or contrary to tariff regulations, and shipments were not misrouted. Barnsdall Refineries v. C., R. I. & P., 129 I. C. C. 443.

(oo) Unrouted shipments of stock cattle form New Castle, Tex., to Grand Summit, Kans., moved over the Witchita Falls & Southern; Missouri-Kansas-Texas of Texas; Missouri-Kansas-Texas; and Atchison, Topeka & Santa Fe. Complainant contends that shipments should have been routed over the Wichita Falls & Southern; Missouri-Kansas-Texas of Texas; Gulf, Colorado & Santa Fe, and A., T. & S. F., over which route lower rates applied. Defendant, on the other hand, maintains that the feeding and other charges in connection with latter route would have resulted in aggregate charges much greater than those collected. HELD: In absence of proof that total Charges over route of movement exceeded those over route claimed, allegation of misrouting not sustained. Live Stock Freight Bureau v. A., T. & S. F. 129 I. C. C. 721.

(pp) Carload of peaches from North Mountain, W Va., originally consigned to Cincinnati, Ohio, but diverted, without routing instructions, to Pittsburgh, was routed by carrier over lowest rates route, via Everson, Pa. Subsequently shipment was reconsigned to Toledo, Ohio, and combination rates to and from Pittsburgh, plus reconsignment charge, were assessed. Lower joint rate from origin to final destination, sought by complainant, was restricted, precluding its use via Everson, over which route shipment moved but defendant had no knowledge that Pittsburgh was not final destination of shipment and can not be charged with misrouting. Rates assessed found applicable and not unreasonable, but reconsignment charge found unreasonable and its discontinuance required. Purse Bros. v. B. & O., 129 I. C. C. 727.

(qq) Complainant contracted with shipper for alfalfa meal from Colorado points to be shipped to Dyersburg, Tenn., routed via East St. Louis, Ill., but upon tender of shipments shipper was advised to leave routing open because of congestion at St. Louis and the outstanding embargoes and shipments were forwarded over cheapest route via Memphis. Upon contention that shipments were misrouted as there was no transit rate applicable via Memphis, and charges to ultimate destinations were in excess of those which would have accrued had shipments moved via East St. Louis, FOUND: Record fails to show that carrier or shipper had information that shipments were to be mixed in transit or that ultimate destination was not Dyersburg. Unrouted bills of lading having been issued and accepted, shipments were not misrouted as carrier was lawfully bound to move them over cheapest route, which was via Memphis. Dyersburg Milling Co. v. Director General, 129 I .C. C. 739.

§4¼. Existence of Embargo.

See Embargoes.

(a) Where it is necessary to forward shipments over an indirect route on account of an embargo existing over direct route, shippers should not be debarred from reasonable rates over the accessible route. Orford Soap Co. v. B. & M. R. R., 107 I. C. C. 338.

(b) Initial carrier refused to accept shipments because of existing embargo of connecting lines and they were held at point of origin. On day embargo was canceled further request was made that shipments be accepted but carrier again refused, erroneously informing complainant that "connections advise positively no route open." Complainant thereupon forwarded shipments by a route involving a higher rate and additional reconsignment charges. HELD: As no embargo was in effect on date second request was made by shipper, initial line had no valid reason for refusing to accept shipments. Such refusal found unlawful and reparation awarded for additional reconsignment charges and difference between rate charged and that applicable over alleged embargoed route. Haviland v. A. N., 109 I. C. C. 253.

§4½. Interstate or Intrastate Route.

See Evidence §13 (6).

(a) Shipments of coal from Grants, Ala., to Florence, Ala., originally unrouted, were moved over an interstate route. Due to a strike at time of movement traffic over short-line intrastate route was delayed, so shipper gave instructions that cars be moved via L. & N. from Birmingham. Upon contention that such instructions did not constitute routing over interstate route, but that movement was expected via an intrastate route through Decatur, FOUND: Instructions constituted complete routing and shipments were therefore not misrouted. Moreover, had they moved via intrastate route through Decatur, charges would have exceeded those applicable via route of movement. Florence Chamber of Commerce v. C. of G., 104 I. C. C. 373, 374, 375.

(b) Complainant attacked as misrouted two cars of lumber shipped on August 9, 1923, from Trio, S. C., to Spartanburg, S. C., over an interstate route. They were delivered to the S. A. L. consigned to the C. C. & O. at Spartanburg with notation on the bills of lading calling for C. C. & O. delivery, charged 18.5c. Allegation of misrouting is predicated on the fact that there was a contemporaneous intrastate rate of $33 per car of 24,000 pounds, excess in proportion, equal to 13.75c per 100 pounds in effect from Trio over S. A. L. to Sumter, S. C., thence Southern through Columbia, S. C., to Spartanburg; and that under the bills of lading as issued, defendants should have forwarded the shipments over the lower rated route. It develops that the shipments moved over the original carrier to Bostic Jct., N. C., where delivery was made to the C. C. & O., the consignee, for movement beyond to Spartanburg. The fact that the originating carrier tendered the shipments short of billed destination to consignee, which tender was accepted and the shipments rebilled "deadhead" to another point, did not obligate the original consignor to pay charges in addition to those applicable under its contract of carriage. Nor did the act of the C. C. & O. in rebilling the shipments to Erwin deprive the complainant of the right, under the bill of lading as issued, to have its traffic forwarded over the cheapest reasonable available route, which in the instant case was the intrastate route over which a rate equivalent to 13.75c was applicable. HELD, shipments misrouted by the S. A. L., reparation awarded. Lynchburg Traffic Bureau v. S. A. L. Ry., 115 I. C. C. 537.

(c) Complainant alleged that a car of lumber shipped from Poston, N. C., to Spartanburg, S. C., August 30, 1924, was misrouted and that the charges collected were unreasonable and unlawful. Shipment was given to the initial carrier without routing instructions and moved interstate over S. A. L. to Bostic, N. C., and C. C. & O. beyond 263 miles, charged 18.5c. Defendants admit that the applicable charges were $83.58 per car of 24,000 pounds excess in proportion of $18 to Sumter, S. C., and $20.50 beyond. If the shipment had moved intrastate over S. A. L. to Columbia, S. C., thence Southern, 225 miles, the applicable charges would have been $71.66. HELD, applicable rate not unreasonable or otherwise unlawful but shipment misrouted by the S. A. L., reparation awarded. Lynchburg Chamber of Commerce v. S. A. L. Ry., 118 I. C. C. 287.

(d) Defendants were obligated to forward the shipment over the cheapest reasonable available route, which was the intrastate route. Having failed to do so the shipment was misrouted. Lynchburg Chamber of Commerce v. S. A. L. Ry., 118 I. C. C. 287, 288.

(e) Lumber was tendered to Seaboard Air Line at Trio, S. C., consigned to Spartanburg, S. C., with notation on bill of lading "C. C. & O. delivery." Originating carrier tendered shipments to consignee carrier short of billed destination, which tender was accepted, and shipments were rebilled "deadhead" to an interstate destination. Upon complaint alleging misrouting predicated upon fact that there was a lower intrastate rate in effect between origin and destination named in bill of lading and that shipments should have moved over lower-rated route. HELD, fact that originating carrier tendered shipments to consignee short of billed destination, and rebilled "deadhead," did not obligate consignor to pay charges in addition to those applicable under its contract of carriage. Nor did act of consignee carrier in rebilling deprive consignor of his right to have traffic forwarded over cheapest reasonable route. Shipments found misrouted and reparation awarded. Lynchburg Chamber of Commerce v. S. A. L., 115 I. C. C. 537.

(f) Lumber billed from Poston, S. C., to Spartanburg, S. C., was delivered to initial carrier unrouted and moved via an interstate route. A lower rate applicable via an intrastate route was contemporaneously in effect. HELD, that initial carrier was obligated to forward over cheapest reasonable available route, which was intrastate route, and having failed to do so shipment was misrouted. See also 57 I. C. C. 324. Reparation awarded. Lynchburg Chamber of Commerce v. S. A. L., 118 I. C. C. 287.

(g) In the absence of shipping instructions it is ordinarily the duty of the carrier to ship by the cheaper routes. But the duty is not an absolute one. The obligation of the carrier is to deal justly with the shipper, not to consider only his interest and disregard wholly its own and those of the general public. If, all things considered, it would be unreasonable to ship by the cheaper route, the carrier is not compelled to do so. The duty is upon the carrier to select the cheaper route only "if other conditions are reasonably equal". Resort to the more expensive route may be justified. And the justification may rest either upon the peculiar circumstances of a particular case, or upon a general practice. Whether the practice of the carrier of shipping over the interstate route was reasonable when a lower intrastate route was open to it, presents an administrative question, one of perhaps considerable complexity. Melson v. C. M. & St. P. Ry., 126 I. C. C. 713, 715.

§4½a. Intermediate Rule.

(a) No specific commodity rates were provided on hay from certain Illinois points to St. Louis, Mo., and charges were assessed on class-rate basis. At time of movement, commodity rates were in effect from farther distant point of origin in Illinois, tariff publishing such rates carrying the intermediate clause. Carriers contended that the intermediate clause has no application here because route through farther distant point is not one customarily used. HELD: Since tariff publishing the intermediate clause contains no routing restrictions and route via the farther distant point is not impracticable, the rates charged were inapplicable. Reparation awarded. Toberman Mackey Co. v. C., B. & Q., 122 I. C. C. 299.

(b) Sixth-class rate on lumber from Burks Falls, Ontario, Canada, to Pontiac, Mich., found inapplicable. Contemporaneously tariff carrying an intermediate rule published a lower joint commodity rate from Burks Falls to Owosso, Mich. As Pontiac is intermediate to Owosso over route of movement and as rate was unrestricted in its application, it was therefore applicable to Pontiac and shipments were overcharged. Refund of overcharges directed. Strable Lbr. & Salt Co. v. C. N. Ry., 123 I. C. C. 585.

(c) Shipments of iron pipe and oil-well supplies from Fruita, Colo., and Price, Utah, to Sunburst and Kremlin, Mont., routed Denver & Rio Grande Western via Ogden and Salt Lake City, Utah, respectively, Union Pacific and Great Northern beyond, found not misrouted. Contemporaneously tariff published a lower rate from Pueblo, Colo., a point east of Fruita and Price on the Denver & Rio Grande Western to Helena, Mont., and carried the intermediate rule which provided for application of rates to unnamed points directly intermediate to and on the same line with named stations. However, "on the same line" was interpreted to mean "on the same railroad" in 115 I. C. C. 529, and since there are no points on Denver & Rio Grande Western west of Fruita and Price from which through rates are published to Helena, the lower rate under the intermediate rule did not apply. Carter Oil Co. v. D. & R. G. W., 123 I. C. C. 596.

§5. Lower Rate Via Competing Line Or Route.

See Evidence §47; Reasonableness of Rates §27½.

(a) Contention that existence over routes other than those of actual movement of rates lower than those charged over routes of movement does not warrant a finding of unreasonableness and award of reparation where shippers are advised of existence of such lower rates, not sustained. Shippers' knowledge of existence of lower rates over other routes can not deprive them of right to reasonable rates over routes of movement. Canton Bridge Co. v. B. & O., 107 I. C. C. 141, 144.

(b) Shipments were tendered unrouted and carrier forwarded via a route taking combination rate higher than via another available route. FOUND: Shipments misrouted and reparation awarded. Dewey Bros. Co. v. H. V., 107 I. C. C. 303.

(c) Rate on potatoes from Almora, Minn., to Tinley Park, Ill., via Chicago, found not unreasonable as compared with lower blanket rate contemporaneously in effect over a route via Minneapolis. Thoeming & Co. v. M., St. P. & S. S. M., 107 I. C. C. 658.

(d) Rate charged on sand from Petersburg, Va., to Bunyon, N. C., found unreasonable to extent it exceeded lower contemporaneous rate on like traffic over a route other than route of movement, which lower rate was subsequently established over route of movement. Reparation awarded. Raleigh Chamber of Commerce v. N. S., 109 I. C. C. 52.

(e) Shipment from Spirit Lake, Iowa, to Bloomington, Ill., reconsigned to Black Rock (Buffalo), N. Y., was tendered unrouted. From Spirit Lake to Bloomington carrier forwarded shipment via La Salle, Ill., whereas a lower rate applied via Peoria. From Spirit Lake to Black Rock a through rate applied via Peoria. Upon contention that because shipment, Spirit Lake to Bloomington, was local, carrier could not be charged with knowledge that it would be reconsigned, and that reparation should only be awarded for difference between rate charged through La Salle and rate applicable through Peoria to Bloomington, HELD: Had carrier routed shipment through Peoria complainant would have been entitled to lower rates effective over that route, and fact that carrier could not foresee further transportation from Bloomington to Black Rock can not deprive complainant of all the incidents of transportation and charge effective over route the shipment should have moved. Shipment found misrouted and reparation awarded. Bloomington Asso. of Commerce v. C.. R. I. & P., 109 I. C. C. 191.

(f) Combination rate assessed on an unrouted sporadic shipment of rig irons and nails from Ranger, Tex., to Comanche, Okla., which moved over a route embracing three lines, found unreasonable to extent it exceeded a lower rate contemporaneously in effect via a slightly shorter two-line route. Notwithstanding that shipment was sporadic, complainant is entitled to have its traffic move at a rate that is not unreasonable. The joint rate applying over shorter route is by no means depressed and unquestionably would produce earnings sufficient to be applied over slightly longer three-line route. Reasonable rate prescribed for future and reparation awarded. Lone Star Gas Co. v. C., R. I. & P., 109 I. C. C. 258.

(g) Rate on manure from Harlem River, N. Y., to North Hatfield, Mass., via a route embracing the New York, New Haven & Hartford and Boston & Maine Railroads, found unreasonable to extent it exceeded lower rate contemporaneously in effect from and to the same points in connection with the New York Central and Boston & Maine. Reasonable rate for the future prescribed and reparation awarded. American Sumatra Tobacco Co. v. N. Y., N. H. & H., 109 I. C. C. 383.

(h) Shipment of carbide of calcium from Duluth, Minn., to Kingman, Ariz., was routed via short-line route through Denver over line of Union Pacific. A lower rate applied over various other routes, but tariff provision restricted its application in connection with the Union Pacific by providing that "rates from or via points on the U. P. will not apply in connection with the Santa Fe via junctions in Kansas, nor in connection with Santa Fe via Denver * * *." Upon contention that phrase "in connection with the Santa Fe" was broad enough to cover transportation by that line anywhere en route, and phrase "via Denver" was broad enough to cover any interchange at Denver and did not limit first phrase to mean "in connection with the Santa Fe at Denver," HELD: Inasmuch as delivery at destination could be made only by Santa Fe, effect of such construction would be to exclude Union Pacific entirely from the haul. Tariff, being ambiguous, construed against the framer and lower rate found applicable in connection with all workable lines, except Union Pacific. Reparation awarded. Central Commercial Co. v. A., T. & S. F., 109 I. C. C. 639.

(i) Shipment of clean rice from Galveston, Tex., to Bluefield, W. Va., found overcharged to extent that rate assessed exceeded a lower combination via Memphis, Tenn. While shipments did not move through Memphis lower combination via that point was applicable over routes under the tariffs. Refund of overcharges directed. See board Rice Milling Co. v. A. G. S., 109 I. C. C. 718.

(j) No presumption of unreasonableness attaches to the joint rate over the route of movement because a lower combination was and is in effect over another

route. Baker & Holmes v. I. C. R. R., 112 I. C. C. 407, 408.

(k) Shipments of ties from Bealeton, Culpeper, and Remington, Va., to Canton, Ohio, were moved via Potomac Yard, Va., and combination rates based on the latter named point were assessed. HELD: As these shipments could have moved via Orange at lower combinations they were accordingly misrouted. Reparation awarded. Lafayette Lbr. Co. v. S. Ry., 112 I. C. C. 341.

(l) Combination rate applicable on wheat from St. Francis, Kans., to Kansas City, Mo., there stored and reforwarded to Wausau, Wis., found unreasonable as compared with rates from St. Francis to points beyond Kansas City for comparable distances, and to extent it exceeded a lower rate contemporaneously in effect from St. Francis to South Omaha, and from St. Francis to Wausau over a route other than route of movement. Reparation awarded. Hodgson-Davis Grain Co. v. C., B. & Q., 113 I. C. C. 234.

(m) Shippers are not to be denied a reasonable rate over one route merely because a lower rate could have been secured by use of another route. Hodgson-Davis Grain Co. v. C. B. & Q., 113 I. C. C. 234, 236.

(n) Combination rate on alfalfa seed from Clayton, N. Mex., to Kansas City, Mo., via Trinidad, Colo., found unreasonable to extent it exceeded lower joint rate contemporaneously in effect via a longer route through Pueblo. Reparation awarded. Peppard Seed Co. v. A., T. & S. F., 113 I. C. C. 309.

(o) Fifth-class rate on petroleum products from Brunswick, Ga., to Richmond, Va., found unreasonable to extent it exceeded lower commodity rate subsequently established from same origin point to Richmond and Petersburg. Subsequently established rate found not unreasonable as compared with lower combination rate contemporaneously in effect via routes other than route of movement, carriers showing that such lower combination was depressed, and, distance considered, that subsequently established commodity rate compares favorably with other rates between points in southern territory. National Oil Co. v. S. A. L., 113 I. C. C. 371.

(p) Rate on peaches from Harriman, Tenn., to Pittsburgh, Pa., via a route through Potomac Yard, Va., found not unreasonable as compared with lower rate contemporaneously in effect via a much longer route through Cincinnati. Fact that a certain rate is in effect between two points over one route is not of itself proof of the unreasonableness of a higher rate over some other route especially where, as in this case, one route is substantially longer than the other. Gentile Bros. Co. v. S. Ry., 113 I. C. C. 670.

(q) Combination rates charged on grain and products from points in Colorado, Kansas, and Nebraska to destinations in Tennessee, Georgia, and Alabama, found legally assessed. Lower joint rates applied to Greenwood, Miss., and New Orleans, La., farther distant points, and while tariff provided for their application to directly intermediate points, it also carried complete routes, none of which operated through intermediate destinations here involved. Complainant here attempts to ignore such routes and construct unauthorized circuitous routes via which destinations would be intermediate to Greenwood and New Orleans. The naming of specific routes to the farther distant points, however, eliminated all other routes, and conclusion set forth in rule 4 (j) of Tariff Circular 18-A which provides that "When a tariff specifies routing the rates may not be applied via routes not specified," is controlling. Russell Grain Co. v. A. G. S. R. R., 113 I. C. C. 701.

(r) Accidents by which shipments move via either of two intermediate points, because like specific class rates are applicable over both routes, should not alone determine the measure of reasonable rates over two lines of same carrier between same points, where no difference in transportation conditions are shown, where difference in distance is slight, and where a lower combination is sometimes figured over the shorter route and sometimes over the longer route. Firestone Tire & Rubber Co. v. Director General, 113 I. C. C. 751, 755.

(s) Joint rate on pine lumber from Bonneau, S. C., to Chatham, Va., found not unreasonable as compared with lower combinations contemporaneously in effect via routes other than routes of movement. Lynchburg Traffic Bureau v. A. C. L., 115 I. C. C. 121.

(t) Combination rates on coal from Wilder and Davidson, Tenn., via Cincin-

nati to Peoria, Ill., thence reconsigned to points in Iowa, found not unreasonable as compared with lower joint rates contemporaneously in effect from and to same origin and destination points via Louisville, Ky. Considering earnings yielded under rates assessed it can not be said that they exceeded a maximum reasonable basis, nor is the fact that they were reduced to the joint-rate basis shortly after shipments moved sufficient to defeat this conclusion. Fentress Coal Co. v. T. C. Ry., 115 I. C. C. 286.

(u) Rate on coal from Hazard, Ky., to Valparaiso, Ind., in connection with the Grand Trunk, found not unreasonable or otherwise unlawful as compared with lower rates contemporaneously in effect over short-line routes to Valparaiso in connection with various other lines, and to a large destination group surrounding Valparaiso. Coovert & Young v. L. & N., 115 I. C. C. 349.

(v) Combination rates on anthracite coal from Rahn No. 11 Colliery, and Lansford Colliery, Pa., to Elkhart, Ind., reconsigned to Edwardsburg, Mich., found not unreasonable as compared with a lower combination contemporaneously in effect via a route other than route of movement, such lower rate being also applicable from these origin points to Chicago and numerous destinations in a large territory in northwestern Indiana and southern Michigan, but not via all junctions, the routing being restricted by carriers to secure to themselves the long haul. Rates sought applied over an available route but complainant elected to use a route 90 miles longer necessitating use of two additional carriers, in addition to securing benefit of a reconsigning service. Russell v. G. T. W., 118 I. C. C. 209.

(w) Rate on gasoline, in tank-car loads, from Los Angeles, Calif., to Reno, Nev., found unreasonable as compared with rates between other points for comparable and greater distances and to extent it exceeded a lower rate contemporaneously in effect from and to same points by way of a longer route and subsequently established via route of movement. Reparation awarded. Richfield Oil Co. v. A., T. & S. F. Ry., 118 I. C. C. 214.

(x) Rates on gas oil in tank-car loads from Iowa Park and Electra, Tex., to Kassel, La., found not unreasonable. While contemporaneously a lower rate applied via other available routes such lower rate is shown by carriers to be subnormal, having been established upon request of shippers to meet a similar rate published by Texas lines to Texas ports. Altitude Petroleum Co. v. F. W. & D. C., 118 I. C. C. 572.

(y) Where originating road and carrier named in shipper's routing instructions form a complete route between origin and destination and shipments are so moved, such originating line can not be charged with misrouting for failing to forward over another lower-rated route necessitating use of intervening lines of railroad. See 42 I. C. C. 150. Petroleum Products Co. v. G., H. & S. A., 120 I. C. C. 24, 25.

(z) On coal originally billed from Vanwood, W. Va., to Elkhart, Ind., shipper specified C. & O. and N. Y. C. routing. Upon arrival at originally billed destination it was reconsigned in accordance with instructions previously given, to New Paris, Ind. Through rate applicable via route of movement was assessed. HELD: Since a lower through rate applied between origin and ultimate destination via a more direct route, such lower rate, being unrestricted as to routing, was applicable via route of movement. Refund of overcharges directed. Russel v. C., C., C. & St. L., 120 I. C. C. 243.

(aa) Rates on coal from Straven and Aldrich, Ala., to Pensacola, Fla., moving over Southern Ry., to Birmingham and L. & N. beyond, found not unreasonable as compared with lower rate subsequently established and contemporaneously in effect via the Muscle Shoals, Birmingham & Pensacola R. R. The Muscle Shoals route was not in use at time of movement due to temporary cessation of operation. Carriers showed that rates to Pensacola are depressed, that existing routes afford adequate service, and that there is no necessity for establishing an additional route via Birmingham. Moreover, in 87 I. C. C. 126, the commission declined to require the L. & N. to open up its Birmingham route for traffic from Alabama Mines because it would result in short-hauling the Southern in some instances and force traffic through the congested terminals of the L. & N. at Birmingham and Montgomery, Pensacola Gas Co. v. L. & N., 122 I. C. C. 326.

(bb) On potatoes moving from Pablo and Whitehall, Mont., to New Orleans,

La., without routing instructions, carriers assessed a combination based on St. Paul, Minn. Contemporaneously a lower combination to and from Omaha, Nebr. was in effect. HELD: As it was not necessary, under rule 5 (b) of Tariff Circular 18—A, that shipments actually move through Omaha to make combination over that point applicable, they were accordingly overcharged. Reparation awarded. Kohlman Bros. & Sugarman v. L. & N., 123 I. C. C. 56.

(cc) Applicable rate on apples from White Salmon, Wash., to Phoenix, Ariz., moving by way of a circuitous route found unreasonable to extent it exceeded lower rate contemporaneously in effect over a more direct route. Shipper here originally directed routing via direct route, but carrier's agent refused to execute the bill of lading until it was changed to accord carrier furnishing refrigerator equipment a road haul. In this territory it is the practice of lines forming indirect routes to meet the rates in effect over short routes and rates lower than those here charged were in effect at time of movement between various points over various indirect routes for comparable distances. Wuille & Co. v. S., P. & S., 123 I. C. C. 190.

(dd) Commission does not apprehend that maintenance of higher rates over one route than over another will necessarily result in all o rmore of the traffic moving over lower-rated route, although it is self-evident that lower rates tend to attract traffic, other things being equal. Consolidated Southwestern Cases, 123 I. C. C. 203, 373.

(ee) Combination rate on nursery or florists' stock, including dormant rosebushes and other plants and bulbs, from Montebello, Calif., to Riverton, N. J., routed by shipper via a southerly route to prevent freezing, FOUND not unreasonable as compared with lower rates contemporaneously in effect via various other routes and formerly in effect over route of movement. Carriers showed that routing in question was canceled because of refusal of carriers in southeastern territory to participate in rates to points north of Potomac River and Virginia cities gateways; that to open route to Riverton would discriminate against other destinations north of the gateways; and that divisions accruing under divisions prescribed in 95 I. C. C. 385, are so low as not to warrant extension of transcontinental basis to points beyond lines of southeastern carriers north of the gateways. Moreover, earnings over route of movement indicate that rate charged was reasonably low. Dreer v. L. A. & S. L., 126 I. C. C. 130.

(ff) Combination rates on gluten feed from Roby, Ind., to Oneonta, Hobart, Stamford, Grand Gorge, and Bloomsville, N. Y., points on the Ulster & Delaware R. R., FOUND unreasonble to extent that rate to Oneonta, the junction point of the Delaware & Hudson and Ulster & Delaware, exceeded lower joint rates contemporaneously in effect via other routes a number of which involve greater hauls than over route of movement, and to extent that rates to points beyond exceeded the joint rates to Oneonta plus the locals of the Ulster & Delaware. Reparation awarded. American Maize Products Co. v. N. Y. C., 126 I. C. C. 137.

(gg) Shipments moved under joint rates. Complainant contended that as lower combination rates contemporaneously applied, shipments were misrouted. HELD: Lower rate sought was based on an unusual combination and in Conf. Ruling 214 (g), shippers were admonished to bear in mind that there is a limit beyond which agents could not reasonably be expected to have knowledge as to terminal deliveries, or local rates at distant points and on lines of distant roads. Here, existence of joint rates via recognized gateways would make it unreasonable to require carrier's agent to make inquiry as to whether or not a lower combination could be based upon a relatively obscure point beyond the gateways. See 98 I. C. C. 451. Shipments were, therefore, not misrouted. Hamburg Broom Works v. C. R. I. & P., 126 I. C. C. 171, 173.

(hh) Rate on newsprint paper from Carthage, N. Y., to Newark, N. J., via National Junction, N. J., FOUND not unreasonable, discriminatory, or unduly prejudicial as compared with lower rate contemporaneously in effect to New York, or from Glens Falls, N. Y., to New York over another route also applicable to Newark, and subsequently established via route of movement. Rate from Glens Falls was established to avoid fourth-section departures because of fact that Newark is intermediate to New York. However, rate to Newark, except on traffic via National Junction, is the same as rate assailed in connec-

tion with all other delivering carriers, and mere fact that carriers voluntarily reduced the latter rate does not establish unreasonableness of the rate so reduced. Newark Call Printing & Publishing Co. v. C. R. R. of N. J., 126 I. C. C. 569.

(ii) Complainant alleged that unrouted shipments forwarded over a route taking a third-class rate were misrouted because tariffs published a lower combination over another available route. Carriers rely upon 247 U. S. 477, which holds that the duty to route over cheapest route is not absolute but depends upon reasonableness of available routes. FOUND: While Conf. Ruling 214 (c) provides that duty of carrier's agent is to forward over cheapest route known to him, Conf. Ruling 214 (g) provides that there is a limit beyond which agents can not reasonably be expected to know as to terminal delivery. From a distance standpoint route used was a reasonable one. Moreover, one component of lower combination applied from an unimproved nonagency station 750 miles from point of origin and even if agent had knowledge of the lower rate it would not seem reasonable to expect him to have knowledge of the distant component producing the lower charge. Shipments were therefore not misrouted. Lynchburg Chamber of Commerce v. N. Y. C., 128 I. C. C. 159.

(jj) A shipper is not to be denied a reasonable rate merely because he could have secured a lower rate by use of another route. See 122 I. C. C. 689. California Packing Corp. v. S. P., 128 I. C. C. 631, 632.

(kk) Rates on building material from Jackson, Miss., to Forsythe, Tenn., found unreasonable as compared with lower rates, unrestricted as to routing, contemporaneously in effect from Vicksburg, Miss., to Memphis and Forsythe, over some of which routes Forsythe is intermediate to Memphis. Reasonable rate prescribed for future and reparation awarded. Jackson Traffic Bureau v. A. & V., 128 I. C. C. 744.

(ll) Shipments moved under joint through rates. Contemporaneously a lower combination rate was in effect, tariff governing one factor of which made reference to the combination rule which provides a specific method for constructing through rates made on combination. Citing Sligo Case, 62 I. C. C. 643, and other cases, complainant contended that lower combination rate should have been applied. FOUND: In accordance with Conf. Rulings 220 (g) and 443 the only lawful rate was the joint through rate assessed. Therefore, principle laid down in cases cited did not apply. North American Cement Corp. v. W. M., 129 I. C. C. 90, 91.

(mm) Combination rate on copper wire from Black Eagle, Mont., to Northport and Lexington, Nebr., and Topeka, Kans., found applicable. Lower joint rates sought were specifically restricted to routes via "Western Gateways" 9 and 10, "except as otherwise specifically provided" and shipper's routing instructions precluded use of these routes over which joint rate applied. Sinclair Pipe Line Co. v. G. N., 129 I. C. C. 251.

(nn) Shipment of oil-well machinery, tendered unrouted, moved from Mobile, Ala., to Tulsa, Okla., over Mobile & Ohio, Midland Valley delivery. Contemporaneously a lower rate applied over M. & O., M.-K.-T. delivery, to Chetopa and Coffeyville, Kans., points midway on the right and left sides of a triangle formed by the M.-K.-T., with Parsons, Kans., at the apex and Tulsa lying intermediate to Osage and Muskogee, Okla., on base line. Tariff carried an intermediate clause providing for rates to unnamed directly intermediate points. Upon contention that as Tulsa is unnamed in tariff and is intermediate to Coffeyville via Parsons and Chetopa, shipment was misrouted and charges collected inapplicable, FOUND: Tariff is not described as applying from or to Oklahoma points, and since only points directly between Coffeyville and Chetopa are those between Coffeyville and Parsons, and Parsons and Chetopa, shipment was not misrouted nor rates collected inapplicable. Sinclair Oil & Gas Co. v. M. & O., 129 I. C. C. 281.

(oo) Shipment of lumber from Logan, Ga., to Paintsville, Ky., found not misrouted. Complainant contended that, under an intermediate clause, a lower combination was in effect over an indirect route, but Logan was a nonagency station, and even if lower rate was applicable agent should not be charged with such knowledge. Conf. Rulings 91 and 214 (g) and 98 I. C. C. 451. Pine

& Cypress Mfg. Co. v. W. & L., 129 I. C. C. 321.

(pp) Upon reconsideration, maintenance of combination rates on rosin from points in the South and Southeast to Hamilton, Ontario, Canada, accorded transit at Ivorydale (Cincinnati), Ohio, higher than joint rates from more distant points over the same route, in the same direction, the shorter being included with the longer distance, when shipments are accorded transit at Latonia or Central Covington, Ky., found to contravene the long-and-short-haul provision of section 4 of the act. See 35 I. C. C. 27, and other cited cases. Moreover, such rates contravene the fourth section notwithstanding fact that such rates are joint rates from points within United States to Canadian destinations. See Conf. Ruling 447; 66 I. C. C. 627, and other cited cases. Former report 112 I. C. C. 381. Procter & Gamble Co. v. A. & V.. 129 I. C. C. 385.

(qq) Rates on automobiles, c. l., from Lansing and North Flint, Mich., to Santa Fe, N. Mex., found not unreasonable or otherwise unlawful as compared with lower rates contemporaneously in effect to Columbus, N. Mex. Contention that as Santa Fe was intermediate to Columbus, lower rate applied under an intermediate rule which provided for application of Columbus rate as maximum to intermediate points, not sustained. Shipment was routed over A., T. & S. F., and Santa Fe is not intermediate to Columbus over that route. See 118 I. C. C. 631. Mirabel Motor Co. v. M. C., 129 I. C. C. 411.

(rr) Rate on petroleum fuel oil from Grandfield, Okla., originally destined to Granite City, Ill., and diverted to East Chicago, Ind., found inapplicable. A lower combination, applicable under the combination rule, was contemporaneously in effect over route of movement. Reparation awarded. Barnsdall Refineries v. C., R. I. & P., 129 I. C. C. 443.

(ss) Shipments moved under joint rates via Chicago or St. Louis. Contemporaneously a lower combination was in effect via Memphis-Normal, Tenn., and complaint contends that shipments should have moved over that route. Carrier points out that Normal is a local point 7.4 miles from Memphis and that factor used in making combination is a local rate with which originating lines could not be expected to be familiar. HELD: In Conf. Ruling 214 (g) shippers were admonished to bear in mind that there is a limit beyond which agent of carrier can not be reasonably expected to have knowledge as to terminal deliveries or local rates. Moreover, existence of joint rates via recognized gateways makes it unreasonable to require carrier's agent to make inquiry as to whether or not a lower combination could be based upon a relatively obscure point beyond the gateways. See 98 I. C. C. 451. Winsdor Broom Co. v. C. R. R. Co. of N. J., 129 I. C. C. 705, 706.

§5½. Particular Junction or Terminal. See Junction Point Rates.

(a) Shipment of manure billed from Harlem River, N. Y., to North Hatfield, Mass., was delivered to the New Haven unrouted and moved over that road to Northampton, Mass., and the Boston & Maine beyond. North Hatfield is within the city limits of Hatfield. The latter point and Whatley are situated exclusively on the New Haven and serve the same community as North Hatfield. Upon contention that initial carrier misrouted the shipment by delivering it to the B. & M. at Northampton, HELD: Destination specified in bill of lading was North Hatfield, served exclusively by the B. & M., and initial carrier can not be presumed to know that shipper would have been satisfied with delivery at any other destination. Nor is there any indication that complainant intended shipment to be delivered at Whatley, a station to which the freight must be prepaid, here the shipment moving "collect." American Sumatra Tobacco Co. v. N. Y., N. H. & H., 109 I. C. C. 383.

(b) Complainant attacked commodity rate of 50 c. charged on a car of asphalt shingles and prepared roofing, shipped Dec. 26, 1923 from New Orleans, La., to Palatka, Fla., routed by complainant I. C., Frisco, A. B. & A., G. S. & F., as unreasonable and in violation of section four. Shipment moved as routed by I. C., to Aberdeen, Miss., the Frisco to Birmingham, Ala., A. B. & A., to Cordele, Ga., and G. S. & F., to destination. At time of movement there were in effect rates of 33 c. from New Orleans to Jacksonville and 6 c. beyond. The rate of 6 c. from Jacksonville to Palatka was applicable over G. S. & F., but only via Lake City, Fla., in connection with S. A. L.

from Jacksonville. The shipment did not move via Jacksonville and was not misrouted. HELD, rate attacked not unreasonable or otherwise unlawful, complaint dismissed. Baker & Holmes v. I. C. R. R., 112 I. C. C. 407.

(c) Complainant alleged it has been subjected to payment of demurrage and reconsignment charges by reason of the failure of defendants to follow routing instructions on a car of lumber shipped Oct. 29, 1923 from Aberdeen, Miss., to Chicago, Ill., and that said charges are unjust and unreasonable. Complainant delivered the shipment to the M. & O., at Aberdeen with routing instructions shown in the bill of lading "in care of the C. M. & St. P." There is no direct connection between the M. & O., and Milwaukee. M. & O., delivered the shipment to the Wabash at East St. Louis, Ill., on a transfer waybill with routing changed to read "Wabash-C. M. & St. P. dely." The Wabash hauled the shipment to Chicago and notified the consignee of its arrival. The consignee demanded delivery on the team tracks of the Milwaukee, but it was advised that the Milwaukee would not accept the shipment for such delivery except under the applicable switching rate of 6.5 c. as that line had not received a road haul on the shipment. The consignee declined to assume the obligation to pay these charges in excess of the Chicago rate and refused the shipment. The Wabash applied promptly to the complainant for disposition of the car and under constructions eventually received reconsigned it to another consignee at Chicago. Had the shipment been routed by the M. & O. over certain available routes which would have afforded the Milwaukee a line haul consistent with the routing instructions, the desired delivery could have been made at the Chicago rate. The error of the M. & O., prevented a proper delivery of the shipment. HELD, M. & O. misrouted the shipment, demurrage and reconsignment charges ordered refunded. Hector Lumber Co. v. C. M. & St. P. Ry., 112 I. C. C. 418.

(d) Complainant attacked freight, demurrage and reconsignment charges on a car of wheat bran and wheat shorts, originating at Wray, Col., and reshipped Nov. 20, 1924 from Kansas City, Mo., to Atlanta, Ga., as in violation of section 6. Shipments originated on the Burlington in Colorado and Kansas and moved to Atlanta, Ga., through the East St. Louis, Ill., gateway. Beyond East St. Louis the routing specified in the bills of lading was as follows: I. C., to Cairo, Ill., M. & O., to Corinth, Miss., Southern to Huntsville, Ala., and N. C. & St. L., to Atlanta. Shipments were actually delivered to the N. C. & St. L., defendant, at Chattanooga, Tenn. Complainant had routed the shipments as noted with the expectation of securing at Atlanta as an intermediate point the application of a rate of 50.5 c. published from the points of origin to Westwego Elevators, La. The balance of the route claimed to be open through Atlanta to Westwego Elevators was A. & W. P., and W. Ry. of Ala., to Selma, Ala., thence L. & N., to New Orleans. Shipments prepaid on basis of 50.5 c. Upon their arrival at Atlanta defendant demanded additional charges based on a through rate of 70 c., Ohio river combination on Cairo. Burlington tariff names rates on grain and grain products from the points of origin on complainants shipments to Westwego Elevators on the New Orleans basis, and designates the specific routes over which such rates will apply. The tariff also provides for the application of such rates at intermediate points on the N. C. & St. L. I. C., does not reach Westwego Elevators with its own rails, but switching charges of delivering line shall be absorbed by the I. C., and under such circumstances it was not necessary to name the switching line in the routing instructions. The routes to New Orleans through East St. Louis as described in the tariff are complete. There is therefore no authority for a route through Atlanta under the rates here concerned. HELD, routings to Westwego Elevators specified in the tariff were not made incomplete by the failure of defendants to name in connection therewith the switching line between that point and New Orleans, charges exacted not unlawful, complaint dismissed. Hogan Bros. v. C. B. & Q. R. R., 113 I. C. C. 223.

(e) Lumber from Aberdeen, Miss., to Chicago was routed "c/o C. M. & St. P." Originating line, the M. & O., changed routing instructions to "Wabash-C. M. & St. P. Dely." The Milwaukee, receiving no road haul, refused to accord the Chicago rate and demanded its applicable switching charge. Consignee declined, demurrage accrued, and shipment was reconsigned. Shipment could have been routed by M. & O. over available routes consistent with routing instructions over which the Milwaukee would have received a line haul and desired delivery

made at Chicago rate. While governing tariff erroneously showed that consignee was located on a private track connecting with the Milwaukee such error did not relieve the M. & O. of its responsibility to observe routing instructions. See 23 I. C. C. 84 and 83 I. C. C. 490. The M. & O.'s error prevented proper delivery and where a shipper is compelled to pay demurrage charges through fault of a carrier, such charges must be refunded. See 41 I. C. C. 723 and 46 I. C. C. 365. Hector Lbr. Co. v. C., M. & St. P., 112 I. C. C. 418.

(f) Routing instructions specifying points at which shipment was to be re-iced was inserted in bill of lading but no rate, and shipment so moved, a combination rate being assessed. Shipper contended for a lower joint rate and insisted that initial carrier could have routed the shipment through certain junctions via which a rate lower than that over route of movement would have been applicable; also that since it was not required to show on bill of lading points at which carriers should re-ice the shipment, therefore, carriers were not required to follow icing instructions given. HELD: Joint rate contended for was not applicable via route of movement and since no misrouting is alleged in the complaint any allegation with respect thereto is barred because not brought in issue within the statutory period provided for in the act. Combination assessed found applicable. Armour & Co. v. Director General, 113 I. C. C. 1.

(g) Shipments of wheat moving from St. Francis, Kans., to Kansas City, Mo., there stored and reforwarded to Wausau, Wis., were tendered to the C., B. & Q. at the storage point routed "C. & N. W. Delivery." Upon contention of complainant that shipments were misrouted because the Burlington failed to turn over shipments to the Missouri Pacific or Wabash at Kansas City, HELD: Having tendered shipments to the Burlington, that carrier was under no duty to surrender them to its competitors at that point. See 22 I. C. C. 349. Hodgson-Davis Grain Co. v. C., B. & Q., 113 I. C. C. 234, 235.

(h) Lumber from Grayburg, Tex., consigned to East St. Louis, Ill., was routed by consignor over the T. & N. O. and Frisco. While enroute initial carrier changed instructions to show C. & E. I. delivery. Shipment arrived at St. Louis on the Frisco's rails and arrival notice mailed complainant was returned with notation "car billed to East St. Louis; deliver accordingly; this is not accepted as notice." Desired delivery was then effected and shipment held in hold yards of C. & E. I. in East St. Louis. Shipper then requested reconsignment to a point situated in St. Louis on the Wabash, line haul, switching, demurrage, and reconsignment charges being collected for entire service performed. HELD: The Frisco's rails not reaching East St. Louis the rate charged applied thereto over that line only on shipments delivered by it to certain other carriers at that place, including the C. & E. I. Shipments therefore were not misrouted but were overcharged to extent of charges collected for switching from St. Louis to the C. & E. I. at East St. Louis. Refund of overcharges directed. Milne Lbr. Co. v. St. L.-S. F., 113 I. C. C. 369.

(i) Complainant attacked charges collected on five cars of hoisting machinery and paint from Cleveland, Ohio, to Long Island City, N. Y., on August 30 and September 2, 1914, as unreasonable and illegal. Complainant consigned the shipments to itself care of New Amsterdam Gas Co., Ravenswood station, Vernon and Webster Ave., Long Island City. This local address of the consignee is not a specific station on the tracks of any carrier, but is about one square from the water front within the free lighterage limits of New York Harbor. Shipments moved over Pennsylvania to Greenville Piers, N. J., and were there lightered by that carrier to Long Island City and turned over to the Long Island R. R. Upon arrival at that point the cars were placed for delivery by the Long Island upon its team track where complainant refused to accept them, insisting that the destination named by it in the bills of lading entitled it to lighterage delivery. After the lapse of several days the shipments were moved from the Long Islands team tracks via Greenville Piers to the delivery point desired by complainant. In order to entitle complainant to the through rate from Cleveland to lighterage delivery at Long Island City it was necessary for complainant to specify lighterage delivery upon the bills of lading and this complainant failed to do. HELD: charges collected applicable, except reconsignment charge of $6.30 per car unreasonable, reparation awarded. Brown Hoist-

ing Machinery Co. v. Pennsylvania R. R., 115 I. C. C. 218.

(j) Complainant attacked rate charged on a carload of fresh peaches shipped July 26, 1924, from Powersville, Ga., to Jamestown, N. Y., as unjust and unreasonable. Shipment was tendered to the C. of Ga. on bill of lading naming Jamestown as the destination and specifying routing Georgia R. R.-A. C. L. R. R. Defendants state that it moved over the C. of Ga. to Macon, Ga., Georgia R. R., to Augusta, Ga., A. C. L. to Richmond, Va., R. F. & P. to Potomac Yard, Pennsylvania to Elmira, N. Y., and Erie beyond 1,190 miles. Charged combination of $2, refund made to combination of $1.265 made on Macon. Although the 65.5c factor to Cincinnati was not restricted as to routing, and, therefore applied via Richmond, it appears that the customary gateway to the North and East on shipments moving over the coastal lines was and is Potomac Yard. Complainant was doubtless familiar with the practice in this respect; if he desired an unusual and circuitous movement he should have inserted the necessary instructions in the bill of lading. It would place an undue burden on the agents of carriers at origin points such as Powersville to require them to search the tariffs for all possible routes over which perishable freight might be forwarded at a cheaper rate because of the absence of routing restrictions in the tariffs. Under circumstances such as those described in the instant case, shippers should not be permitted to disclaim all responsibility for the routing of their shipments. HELD, shipment not misrouted and rates applicable not unreasonable, complaint dismissed. Miller v. C. of Ga. R. R., 115 I. C. C. 518.

(k) Complainant attacked combination rate charged on a car of kerosene from Arkansas City, Kas., to Des Moines, N. M., in October, 1924, as unreasonable. Shipment moved Santa Fe to destination where it was delivered to the C. & S. in switch movement. Charged 94.5c but applicable rate was 75c combination on Trinidad, Colo. The bill of lading covering the shipment provided for delivery by the C. & S. Defendant and that carrier joined in a rate of 46c which applied over defendants line to Pueblo, Colo.. and C. & S. beyond. Defendant should have routed the car so that delivery by the C. & S. could have been effected at the cheapest available cost to the shipper. HELD, shipment misrouted, reparation awarded. Kanotex Refining Co. v. A. T. & S. F. Ry., 115 I. C. C. 559.

(l) Complainant attacked charges of 12.5c per 100 pounds plus a reconsignment charge of $7 per car, assessed for switching at Elizabeth, N. J., on one car of lumber shipped June 10, 1922, from Johnston, S. C., to Elizabeth, as unreasonable. The car was consigned to J. D. Loizeaux Lumber Co., and delivery specified was National Biscuit Co. siding. The siding of that company is located on the C. R. R. of N. J. The applicable rate of 43.5c from Johnston to Elizabeth, plus a rate of 12.5c for transporting the car from the tracks of the Pennsylvania at Elizabeth to the siding of the National Biscuit Co., plus a reconsignment charge of $7 per car, were assessed. The car arrived at Elizabeth, was placed for delivery by the Pennsylvania at its freight station yard in Elizabeth, and the consignee was notified of its arrival. On June 24, 1922, consignee ordered the car reconsigned to National Biscuit Siding, C. R. R. of N. J., Elizabeth, N. J. All charges to follow. Under proper routing instructions the rate of 43.5c was applicable from Johnston to the siding of the National Biscuit Company on the C. R. R. of N. J. at Elizabeth. The mere designation of the siding of the National Biscuit Company without specifying the name of the carrier on whose rails the siding was located was not sufficient to insure delivery of the car at the rate of 43.5c. HELD, shipment not misrouted, rate attacked not unreasonable, reconsignment charge unreasonable, reparation awarded. Lynchburg Chamber of Commerce v. E. Ry., 115 I. C. C. 625.

(m) Shipments of machinery and paint from Cleveland, Ohio, to Long Island City, N. Y., intended for lighterage delivery were billed to local address of consignee, which was not a specific station on the tracks of any carrier, its location not being shown in any tariff or billing book. Tariff governing lighterage service contained specific provision to effect that "all shipments requiring lighterage delivery must be receipted to 'New York Lighterage' and billed to Greenville Piers or Manhattan Piers, N. J." Failure of complainant to specify lighterage delivery on bills of lading resulted in demurrage, storage, and other charges and subsequent reconsignment of

shipments. HELD: Extra expenses incurred as result of complainant's initial mistake found applicable and not unreasonable. Brown Hoisting Machinery Co. v. P. R. R., 115 I. C. C. 218.

(n) Consignees' plant at Valparaiso, Ind., is served by the Grand Trunk and cars arriving over other roads must be switched by that line. Coal from Hazard, Ky., moved under bill of lading which specified "GT 'route to protect lowest thru freight rate'" and moved over a route which accorded the Grand Trunk a line haul. Upon contention that shipment was misrouted because not forwarded via a route over which lower rate applied. HELD: Meaning of routing instructions was clear to consignees, having location of their particular plant in mind, but agent at point of origin could not be expected to know location of plant at destination. Moreover, when initials of a particular road appear in space provided on bill of lading for designation of route, this must be regarded as an expression of consignor's desire that such road should participate in movement as a line-haul carrier. See 19 I. C. C. 68. Shipment not misrouted. Coovert & Young v. L. & N., 115 I. C. C. 349.

(o) Shipment was tendered to originating line with bill of lading specifying destination and delivering line but no intermediate routing. Upon contention that shipment was misrouted because it was carriers' duty to forward via another available route over which reconsignment could have been effected at a lower through rate, HELD: While duty rested upon initial carrier to forward shipment over cheapest reasonable available route in conformity with routing instructions given, it can not be held for misrouting because same rate applied over route of movement as over route contended for, and carrier when it designated intermediate routing could not foresee the further transportation accomplished by reconsignment beyond originally billed destination. Lynchburg Chamber of Commerce v. G. R. R., 115 I. C. C. 419.

(p) Lumber was tendered to Seaboard Air Line at Trio, S. C., consigned to Spartanburg, S. C., with notation on bill of lading "C. C. & O. delivery." Originating carrier tendered shipments to consignee carrier short of billed destination, which tender was accepted, and shipments were rebilled "deadhead" to an interstate destination. Upon complaint alleging misrouting predicated upon fact that there was a lower intrastate rate in effect between origin and destination named in bill of lading and that shipments should have moved over lower-rated route, HELD: Fact that originating carrier tendered shipments to consignee short of billed destination, and rebilled "deadhead," did not obligate consignor to pay charges in addition to those applicable under its contract of carriage. Nor did act of consignee carrier in rebilling deprive consignor of his right to have traffic forwarded over cheapest reasonable route. Shipments found misrouted and reparation awarded. Lynchburg Chamber of Commerce v. S. A. L., 115 I. C. C. 537.

(q) Bill of lading specified delivering carrier. Originating line reserved to itself entire line haul between origin and destination and merely accorded delivering road a switching movement at destination. A lower rate contemporaneously applied via route over which delivering carrier would have received a line haul. FOUND: Shipments were misrouted, since it was duty of initial carrier to have so routed the car that delivery could have been effected at cheapest available cost to shipper. See also 21 I. C. C. 451 and other cited cases. Reparation awarded. Kanotex Refining Co. v. A., T. & S. F., 115 I. C. C. 559.

(r) On lumber from Johnston, S. C., to Elizabeth, N. J., routing instructions specified delivery "Nat'l Biscuit Co. siding." That siding is located on Central of N. J. Railroad. Shipment, however, arrived and was placed for delivery on rails of the Pennsylvania. Consignee subsequently ordered reconsignment to "Nat'l Biscuit Siding, Central N. J. Railroad at Elizabeth" and a charge in addition to the rate to Elizabeth was assessed for transportation from the Pennsylvania's tracks to siding of the biscuit company. HELD: Under proper routing the rate to Elizabeth was applicable to siding of the biscuit company but mere designation of siding in routing instructions without specifying the carrier's name on whose rails it was located was not sufficient to insure delivery at the Elizabeth rate. The shipment can not, therefore, be said to have been misrouted. See also 28 I. C. C. 703; 31 I. C. C. 550. Lynchburg Chamber of Commerce v. S. Ry., 115 I. C. C. 625.

(s) Routing instructions on apples from Chelan, Wash., to Chicago, diverted to Newark, N. J., specified Erie delivery. Diverting carrier's agent erroneously routed shipments for Lehigh Valley delivery. Upon complaint seeking damages for cartage, labor, and loss of sales value of part of shipments, containers of which were said to have been broken and contents damaged and frozen in transit, HELD: While shipments were misrouted, damages claimed were not shown to have been occasioned thereby. No claim was made that cartage would not have been necessary had Erie delivery been effected or whether cartage charge would have been greater or less than that paid for cartage from Lehigh Valley, nor was evidence introduced to show that containers were broken or contents frozen while in transit. Moreover, all facts on complainant's behalf were sworn to by his attorney, who had no actual knowledge of any of the transactions. Horel v. G. N., 120 I. C. C. 125.

(t) Routing instructions of shipper on lumber moving from Quitman, Ga., to East New York, N. Y., reconsigned to Ozone Park, N. Y., specified "Long Island delivery." Due to an embargo on delivering line, one of the connecting carriers named in routing instructions changed the waybill to read "South Brooklyn R. R. delivery," and shipment moved forward accordingly. Upon tender of delivery consignee refused shipment, insisting for delivery as shown in bill of lading, and this demand was compiled with. HELD: That the carrier inserting unauthorized routing in waybill was guilty of misrouting. Reparation awarded. Underwood Lbr. Corp. v. A. C. L., 120 I. C. C. 175.

(u) On watermelons moving from Daisy and Hagen, Ga., to Jacksonville Fla., bills of lading called for Atlantic Coast Line delivery. Originating carrier disregarded routing instructions and carried shipment through to destination and tendered delivery on its own rails: HELD: That failure to effect delivery specified in the bills of lading resulted in misrouting. Reparation awarded. G. W. Harp v. S. A. L., 122 I. C. C. 585.

(v) The Commission has admonished shippers to bear in mind that there is a limit beyond which an agent of a carrier could not reasonably be expected to have knowledge as to terminal deliveries, or local rates at distant points and on lines of distant roads. The existence of joint rates via recognized gateways upon this traffic would make it unreasonable to require defendants agent to make inquiry as to whether or not a lower combination could be based upon a relatively obscure point beyond the gateways. Hamburg Broom Works v. C. R. I. & P. Ry., 126 I. C. C. 171, 173.

(w) The shipment routed "via Penn. Ry., care of B. & O. for delivery to Norcross siding" comes within the principle accounted in Stebbins v. D. L. & W. Co., 42 I. C. C. 150, to the effect that it is not incumbent upon the initial carrier to send a shipment tendered with complete routing over a route requiring the interposition of another carrier or other carriers. Norcross Marble Co. v. B. & O. R. R., 126 I. C. C. 741, 742.

(x) Shipment of rough quarried marble from Phenix, Mo., to Cleveland, Ohio, routed "Via Penn. Ry. care of B. & O. for delivery to Norcross siding," moved via St. Louis-San Francisco to East St. Louis, and B. & O. beyond. Upon contention that shipment was misrouted since it did not move via the Pennsylvania, HELD: Shipment falls within principle announced in 42 I. C. C. 150, to effect that it is not incumbent upon initial carrier to send a shipment tendered with complete routing over a route requiring the interposition of another carrier. Therefore, this shipment while technically misrouted, nevertheless was forwarded through East St. Louis through which gateway it would have moved if direct interchange had been made with the Pennsylvania. Complainant therefore suffered no damage by reason of carrier's failure to route as specified. Norcross Marble Co. v. B. & O., 126 I. C. C. 741.

(y) Direction "Best Route for B. & O. Del." required shipments to be sent over the cheapest route that would permit of B. & O. delivery, either by line haul or in switching service. See 42 I. C. C. 719. Norcross Marble Co. v. B. & O., 126 I. C. C. 741, 742.

(z) Bill of lading covering cabbage from Cortland, N. Y., to Williamson, W. Va., specifying "N. & W. Del.," moved via Hagerstown, Md., N. & W. to destination. Contemporaneously a lower combination applied via Columbus, Ohio, and N. & W. through Kenova, W. Va., to Williamson. Relying upon Conf. Ruling 214 (g) and 26 I. C. C. 423,

carriers urge that Kenova route is not commercially known or used for transportation from Cortland to Williamson and that the only recognized route is that over which shipment moved. HELD: Conference ruling cited was not intended to relieve carriers' agents of duty to exercise reasonable care and diligence in securing information necessary for correct routing even though shipments are destined to points or distant roads with which no through rates are maintained. There is no indication that Cortland agent made any effort to ascertain which was cheapest route. Moreover, since carriers transport cabbage from Cortland to Kenova over a route which to Kenova is same as route sought, that route is apparently practical and not unreasonable and shipments were therefore misrouted. Reparation awarded. Amicon Fruit Co. v. L. V., 128 I. C. C. 34.

(aa) Where terminal delivery only is shown in a bill of lading it is carrier's duty to forward shipment over the cheapest reasonable route affording desired delivery. See 42 I. C. C. 719. Amicon Fruit Co. v. L. V., 128 I. C. C. 34, 35.

(bb) Shippers must bear in mind that there is a limit beyond which an agent of a carrier could not reasonably be expected to know as to terminal delivery or local rates at distant point and on lines of distant roads to or with which he has no specific joint through rates. Consignors and consignees should cooperate with agents of carriers in avoiding misunderstandings and errors in routing and must expect to bear some responsibility in connection therewith. This rule is not intended to relieve carriers' agents of the duty to exercise reasonable care and diligence in securing information necessary for the correct routing of shipments, even though the shipments are destined to points on distant roads with which no specific through rates are maintained. Amicon Fruit Co. v. L. V. R. R., 128 I. C. C. 34, 35.

(cc) Bill of lading covering agricultural implements from Syracuse, N. Y., to Williamson, W. Va., specifying "N. Y. C. care of N. & W.," moved to Hagerstown, Md., and N. & W. to destination. Contemporaneously a combination lower than joint rate assessed applied via Columbus, Ohio, and N. & W. through Kenova, W. Va., to Williamson. Carriers rely upon 247 U. S. 277, to support contention that initial carrier was not negligent in forwarding shipment over higher-rated route. In that case it was stated that duty of carrier to ship over the cheaper route is not an absolute one and that justification for more expensive route may rest upon peculiar circumstances of a particular case or upon a general practice. HELD: Decision in case cited is not controlling upon facts submitted and shipments were therefore misrouted. Reparation awarded. Amicon Fruit Co. v. L. V., 128 I. C. C. 34, 36, 37, 38.

(dd) Complainant alleged combination rate charged on a car of denatured alcohol from Philadelphia, Pa., on July 27, 1925, to its siding at Providence, R. I., was unjust, unreasonable and inapplicable. Shipment was consigned to complainant at Providence for "delivery on the N. Y., N. H. & H." Charged 32c to Providence and 11c to Auburn, R. I., plus reconsignment charge of $6.30 and $4 demurrage. Complainant's siding is on the New Haven within the corporate limits of Providence, and the tariff naming the 32c rate provided that it applied to private sidings connected with carriers parties to the tariff at which the particular traffic is usually delivered. Auburn is intermediate to and adjoins Providence. The switching limits of neither place were defined. HELD: legal rate was 32c, reparation awarded. Atlantic Refining Co. v. Pennsylvania R. R., 128 I. C. C. 43.

(ee) Complainant alleged that the misrouting of a car of lumber shipped Oct. 23, 1923, from Logan, Ga., to Paintsville, Ky., subjected it to payment of rates which were unreasonable and unlawful. Shipment moved from Logan over W. & L. to Washington, Ga., Ga. R. R., via Barnett, Ga., to Augusta, Ga., C. & W. C. to Spartanburg, S. C., C. C. & O. to Elkhorn City, Ky., and C. & O. to Paintsville, charged 45c. No routing instructions were given except that the C. & O. was indicated as the delivering carrier. Joint rates were not published from Logan to Paintsville. The rate assessed was a combination of locals. Complainant concedes that the rate charged was the correct rate over the route of movement. Logan is a nonagency station. The train conductor acts as agent when shipments originate at that point. HELD: Shipment not misrouted, complaint dismissed. Pine

& Cypress Mfg. Co. v. W. & L. R. R., 129 I. C. C. 321.

(ff) Complainant alleged charges collected on 14 cars of broom corn from Lindsay, Elk City and Oklahoma City, Okla., to Hamburg, Pa., in Oct., 1921, were unreasonable, unjustly discriminatory, unduly prejudicial and in violation of the fourth section. Cancellation of the joint rates assailed subsequent to the period of movement made effective lower combination of intermediate rates over the route of movement thereby removing the fourth section violations. Seven of the shipments originated at Lindsay, six at Elk City and one at Oklahoma City. They moved over the originating line, Rock Island to Chicago, Ill., or St. Louis, Mo., thence over various carriers beyond. No routing was specified by the shipper except "Pennsylvania delivery" and this for a few of the shipments only. Charged joint rate of $2.265 from Lindsay and Oklahoma City and $2.30 on five of the six shipments from Elk City. Joint rates were maintained on broom corn over certain routes from the origin territory to eastern territory, from Dec. 1919 to April, 1922. Prior and subsequent thereto rates on broom corn between those territories were made on combinations based on Ohio and Mississippi River crossings which were and are lower than the joint rates. Complainant contends that the shipments should have moved over the Memphis-Normal route and that it is entitled to reparation on the basis of misrouting. Pennsylvania delivery could have been accorded shipments moving over the latter route. There were contemporaneously published to Hamburg combinations based on Memphis, applicable over Rock Island to Memphis, thence I. C., M. & O. or N. C. & St. L., and connections. HELD, shipments misrouted by the Rock Island, reparation awarded. Windsor Broom Co. v. C. R. R. Co., of N. J., 129 I. C. C. 705.

(gg) The Commission has uniformly found that where terminal delivery only is shown in the bill of lading it is the duty of the carriers to forward the shipments to the destination named by the cheapest reasonable route affording the desired delivery. Windsor Broom Co. v. C. R. R. of N. J., 129 I. C. C. 705, 707.

(hh) The tariff provision, like all others, is to be construed in the light of its terms, and does not charge its interpreter with knowledge of operating or other conditions which would eliminate one of two apparently reasonable and available routes. To charge a shipper, or to charge the Commission with such knowledge, would nullify the effect of the tariff, as well as enforcement of rule 77. Smith & Sons Co. v. B. & M. R. R., 132 I. C. C. 596, 597.

(ii) Shipment of lumber from Logan, Ga., to Paintsville, Ky., found not misrouted. Complainant contended that, under an intermediate clause, a lower combination was in effect over an indirect route, but Logan was a nonagency station, and, even if lower rate was applicable, agent should not be charged with such knowledge. Conf. Rulings 91 and 214 (g) and 98 I. C. C. 451. Pine & Cypress Mfg. Co. v. W. & L., 129 I. C. C. 321.

(jj) Bill of lading covering shipment of peanuts from Samson, Ala., to Camden, N. J., showing routing "C of Ga.—S. A. L.—P. & N." but no rate, moved C. of Ga., S. A. L. to Richmond, Va., Richmond, Fredericksburg & Potomic to Potomac Yard, Va., and Pennsylvania beyond. Shipment was refused at destination and subsequently sold at auction. Upon contention that "P. & N." was the Philarelphia & Norfolk Steamship Line; that shipment was therefore misrouted and carrier liable for difference between contract price and auction price of peanuts, FOUND: As "P & N" are also initials of Piedmont & Northern which forms a workable route with other named carriers, routing specified did not put carriers on notice that rail-and-water route was desired. Therefore, while shipment was misrouted, record fails to show that complainant was damaged thereby. See Conf. Ruling 190. South Alabama Grocery Co. v. C. of G., 129 I. C. C. 327.

(kk) When shipments are delivered unrouted, no obligation rests upon carrier to participate only in a switch movement to a connecting line in order to protect the lowest rate, if in so doing it foregoes a line haul itself. Enochs Lbr. & Mfg. Co. v. I. C. 129 I. C. C. 505.

(ll) Shipments from Oklahoma points to Hamburg, Pa., routed "Pennsylvania delivery," moved over initial carrier to Chicago or St. Louis, thence over various carriers to destination, charges being collected at applicable joint rate. Contemporaneously, lower combinations

based on Memphis, Tenn., applied from origin points to destination and complainant seeks reparation on basis of misrouting. Upon contention by carrier that under the routing instructions "Pennsylvania delivery," originating line was obligated to deliver shipments directly to the Pennsylvania, FOUND: Commission has uniformly found that where terminal delivery only is shown in bill of lading it is duty of carrier to forward shipments by cheapest reasonable route affording desired delivery. See 42 I. C. C. 719. Shipments found misrouted and reparation awarded. Windsor Broom Co. v. C. R. R. Co., of N. J. 129 I. C. C. 705.

§6. Right Of Carrier to Route or Restrict Routes.

See Restricted Routes.

(a) Shipments of scrap iron from Superior, Wis., to Steelton, Minn., were delivered to carrier unrouted and forwarded via a two-line route at minimum class rate. Shipper constructed lower charges by combining switching tariffs embracing a three-line route. FOUND: Since switching tariff of one carrier applied only on cars having a "road haul," and movement over the three-line route is more in the nature of an intraterminal transfer than a road haul, lower charges were not applicable over route embracing three lines and shipments were not misrouted. Kaner v. C., St. P., M. & O., 104 I. C. C. 710.

(b) Proposal to restrict routing of petroleum and products from Gulfport, Vicksburg, Natchez, Mobile, Pensacola, New Orleans, Baton Rouge, Merea, and Port Chalmett, to certain points in Alabama, Tennessee, Kentucky, Ohio, Indiana, and Missouri, designed to avoid wasteful transportation, to secure to initial carrier the long haul to which it is entitled, and to eliminate fourth-section departures, found not justified. While there may be some justification for eliminating a few of the longer routes as contemplated, it is impossible upon the record to designate exact extent of such justification, it being shown that to most of the destinations many of proposed routes are longer than some of those it is proposed to close. Florence Chamber of Commerce v. A. & V., 107 I. C. C. 84.

(c) Unreasonably high rates may not be maintained in order to control routing of traffic. Arbogast & Bastian Co. v. L. V., 107 I. C. C. 105, 108.

(d) Proposal to restrict application of class rates from points in Indiana to Minneapolis, St. Paul, and Duluth, so as to eliminate cross-lake routes through Michigan, and thus remove existing departures from long-and-short-haul provision of section 4 of the act, found not justified. The cross-lake routes which it is proposed to cancel are reasonably direct and move a substantial volume of traffic, and their continuance is also desirable for emergencies during periods of traffic congestion. Class Rates to Twin Cities, 107 I. C. C. 665.

(e) It is the province of carriers to conduct commerce in channels demanded by the public. Public interest is not conserved by shutting out, through denial of a necessary transportation service, an important agricultural product from markets which it can reach over routes requiring less service than that over other routes primarily because one of the carriers on whose lines traffic originates does not reach those markets over routes which would give it a long haul. Montgomery Cotton Exchange v. S. A. L. 109 I. C. C. 579, 587.

(f) Having tendered the shipments to one carrier, that carrier was under no duty to surrender them to its competitors at that point. Hodgson Davis Grain Co. v. C. B. & Q. R. R., 113 I. C. C. 234, 235.

(g) Complainant attacked combination class rates, and alleged misrouting, on less carload of cotton duck shipped Dec. 22, 1922 from Gonzales, Tex., to Lancaster, Pa., as unjust and unreasonable. Shipment moved all rail route at a combination of $2.055 made up of an any quantity rate of 83.5 c. to East St. Louis, Ill., plus rule 25 class rate of $1.22 beyond. Complainant contended that the shipment should have moved over a rail water and rail route at a commodity rate of $1.295. The shipment moved over the cheapest reasonable all rail route. HELD, shipment not misrouted, complaint dismissed. Armstrong Cork Co. v. S. A. & A. P. Ry., 113 I. C. C. 269.

(h) While the commission is not prepared to say how many transcontinental routes should be maintained at the direct-line rate, it is evident that reasonable restrictions on routing are desirable in the interest of efficient operation. Revenues in Western District, 113 I. C. C. 3, 21.

(i) Proposed restriction to transcontinental routing of the application of the transcontinental Deming, N. Mex., rates as maxima on grain and related articles from defined territories to all destinations in Texas found not justified. Carriers merely referred to inconsistent routing provisions, their history and results, and some of the out-of-line hauls which are or may be made under present tariffs, but did not seriously attempt to justify reasonableness of resulting rates. While they should be permitted, even encouraged, to eliminate wasteful transportation, in seeking, as here, to disrupt a rate adjustment of long standing, they must show that resulting rates will be reasonable, and will not result in other violations of the act. This burden carriers have failed to sustain. Grain and Related Articles, 113 I. C. C. 195.

(j) Proposal to reduce rates on grain and products from points in Nebraska, Iowa, Illinois, Missouri, Kansas, Oklahoma, and Arkansas, to Louisiana, routed through Arkansas, and to restrict routing so that such reduced rates will not apply over routes through Texas, found not justified. In 104 I. C. C. 272, commission found such restriction of routing not justified by transportation conditions and that resulting disadvantages to Texas mills would be unlawful in violation of section 3 of the act. No evidence has been submitted in present record to warrant a different conclusion. Grain and Products to Louisiana, 113 I. C. C. 259.

(k) The different routes via which tariff applies may be shown, together with appropriate reference to the application of rates. When a tariff specifies routing the rates may not be applied via routes not specified. Russell Grain Co. v. A. G. S. R. R., 113 I. C. C. 699, 702.

(l) Respondents proposed routing restrictions under which the rates on cement from Chanute and Iola, Kas., Dewey, Okla., and other points in the Kansas gas belt would not apply over certain routes to destinations in Oklahoma on the Midland Valley and Rock Island. Under the proposed schedules rates to destinations on the Midland Valley would not apply over the M. P. via Greenwood, Ark., and rates to the destinations on the Rock Island would not apply in connections with the Frisco, via Mansfield, Ark., or in connection with the Midland Valley via Hartford Jct., Ark. The cement rates were established following 87 I. C. C. 451. Routing restrictions proposed would eliminate fourth section departures. Respondents do not show that, in general, the routes they propose to eliminate are excessively circuitous. Operating conditions are not shown to be such as to make these routes unnecessary or undesirable in the public interest. They are routes over which the rates to intermediate points in Arkansas are upon a higher level than the rates to points in Oklahoma, indicating that it is respondent's principal purpose to avoid the effects of the provisions of section four of the act rather than to eliminate routes which they would otherwise regard as unnecessary and undesirable. HELD, suspended schedules not justified. Cement to Arkansas and Oklahoma, 118 I. C. C. 657.

(m) On cottonseed meal from Greenwood, Miss., to Angola, La., a combination rate based on Baton Rouge, La., was assessed. A lower joint rate was contemporaneously in effect from Memphis to Angola via Baton Rouge, tariff publishing that rate containing an intermediate rule restricted to apply via direct available routes only. HELD: Application of the lower rate not being confined to a single direct route, but being applicable over all "direct available routes," and record not establishing that route through Greenwood was not an available direct route from Memphis to Angola, such lower joint rate was applicable from Greenwood and shipments were overcharged. Reparation awarded. Planters Oil Mill v. Y. & M. V., 115 I. C. C. 21.

(n) Carriers contended that there is a well-recognized exception to general condemnation by commission of restrictive rates in cases where combinations are supported by a general policy of carriers concerned in refusing to join in establishment of joint rates on coal to their local markets from points on other coal-carrying roads, citing in support thereof numerous cases in which commission found combination rates on that commodity not unreasonable or unduly prejudicial when maintained in accordance with such a policy. HELD: To merit commission's approval any such policy must be followed without discrimination between shippers similarly situated. Old Ben Coal Corp. v. C., C., C. & St. L., 115 I. C. C. 84, 87, 88.

(o) Proposed routing restrictions resulting in increased rates on livestock between points in Louisiana and Texas, on the one hand, and points in Kansas and Okahoma, on the other, found not justified. Carriers failed to show that the rates on livestock other than on stock cattle are not fairly remunerative, and the record is not comprehensive enough to warrant the commission in fixing a degree of circuity as a measure of a reasonably direct route. Livestock from La. and Tex. to Kans. and Okla., 115 I. C. C. 137.

(p) The financial status of a carrier is but one element in determining whether or not a railroad should be eliminated as an intermediate line in routing of traffic and is not necessarily controlling. Restrictions in routing over S. L. & U., 115 I. C. C. 357, 369.

(q) Shipments of barley from South Dakota and Minnesota, during Federal control, moved to Minneapolis, and were reforwarded to Milwaukee, combination rates being assessed. Concurrently, joint rates, restricted to apply only via Winona, Minn., and Wyeville, Wis., via the shortest available route, were in effect from original shipping points to Milwaukee. HELD: As shipments did not move through points through which lower joint rates applied, and no joint rates were applicable over route of movement, the combination of locals assessed was legally applied. Zimmerman v. Director General, 115 I. C. C. 407.

(r) Bill of lading specified delivering carrier. Originating line reserved to itself entire line haul between origin and destination and merely accorded delivering road a switching movement at destination. A lower rate contemporaneously applied via route over which delivering carrier would have received a line haul. FOUND: Shipments were misrouted, since it was duty of initial carrier to have so routed the car that delivery could have been effected at cheapest available cost to shipper. See also 21 I. C. C. 451 and other cited cases. Reparation awarded. Kanotex Refining Co. v. A., T. & S. F., 115 I. C. C. 559.

(s) Proposed restriction in routing of cement from points within Kansas gas belt and Dewey, Okla., to certain destinations in Oklahoma, which would result in the elimination of certain routes through Arkansas, found not justified. While proposed restrictions would correct existing fourth-section departures, routes involved are not shown to be excessively circuitous; on the contrary, to destinations near the Oklahoma-Arkansas lines they are, in many instances, shorter than other available routes. Moreover, operating conditions are not shown to be such as to make these routes unnecessary or undesirable in public interest, and the fact that they are routes over which rates to intermediate points in Arkansas are upon a higher level than rates to points in Oklahoma would indicate that carriers' principal purpose is to avoid effects of provisions of section 4 of the act, rather than to eliminate routes which they would otherwise regard as unnecessary and undesirable. Cement to Arkansas and Oklahoma, 118 I. C. C. 657.

(t) Respondents proposed (1) the elimination of routes via Montgomery, Ala., in connection with joint rates on cotton and related commodities originating at points on the L. & N., Longview, Ala., to Clanton, Ala., to destinations in North and South Carolina and Virginia and (2) certain restrictions in routing on cotton, in bales, from L. & N. stations north of Birmingham to destinations in Georgia. From the point of origin to the destinations here considered joint rates have been in effect via Montgomery for many years. Following 109 I. C. C. 579, respondent, effective Sept. 20, 1926 established transit at Montgomery on cotton originating at points on its line between Decatur, Ala., and Mobile, Ala. Long View and Clanton are 27 and 56 miles south of Birmingham and 70 and 41 miles north of Montgomery. It is the general practice to handle cotton originating between Birmingham and Montgomery via either of those points. By the schedules filed to become effective Sept. 29 respondents proposed to reestablish the routing via Montgomery from Lomax and Clanton. Attempted justification of the proposed routing restrictions on cotton moving from Long View to Clanton to Carolina mill points is based principally on the circuity of the routes via Montgomery and the resulting fourth section violations if the Montgomery routes are kept open. To Georgia they are sought to be justified on the ground of circuity. HELD, suspended schedules not justified. Routing on Cotton, 120 I. C. C. 185.

(u) Proposal to eliminate route via

Montgomery, Ala., in connection with joint rates on cotton from L. & N., stations, Long View to Clanton, Ala., inclusive, to destinations in Virginia, the Carolinas, and Georgia, found not justified. While such routing restrictions are designed for purpose of obviating certain fourth-section violations and carriers attempted their justification principally on ground of circuity, no similar restriction is proposed from other points via highly circuitous routes on similar traffic moving via Birmingham. Moreover, to close routes via Montgomery would result in innumerable section 4 violations, as combination rates via that point would exceed joint rates from points on the Southern, west of Decatur, applying via Decatur, Birmingham, and Montgomery. Routing on Cotton, 120 I. C. C. 185.

(v) Shipment of broomcorn moving under joint rates from Fairview, Okla., to Atco, N. J., found misrouted. Rates were restricted to apply via Chicago and Joliet, Ill., and via St. Louis or Memphis, in connection with the L. & N. or Southern to Cincinnati, thence over lines parties to the tariff. Route of movement included the Illinois Central, which was not a party to tariff publishing joint rates, and rates assessed were therefore inapplicable. Hamburg Broom Works v. C., R. I. & P., 126 I. C. C. 171.

(w) Proposal to restrict application of rates on coarse grain, basing on Vicksburg or Memphis, and moving from points in Texas to points in Mississippi and Alabama, to certain routes, FOUND not justified, except as to cancellation of routing via McGregor and Waco, Tex. Certain of the rates applying via these points short haul the Gulf, Colorado & Santa Fe, and it is proposed to correct this situation by routing traffic via Fort Worth, which would deprive Waco interests of opportunity to transit. However, this new route would not materially affect length of through haul and carriers are clearly within their rights under section 15 of the act. No justification was offered, however, for various other provisions of proposed schedules restricting rates to certain routes which would adversely affect the Memphis market. Grain and Grain Products, 126 I. C. C. 454.

(x) Complainant attacked combination rate charged on unfigured pine, gum and cypress veneer, in carloads, shipped since Sept. 5, 1924, from West Helena, Ark., to Jackson, Miss., as unreasonable and inapplicable. West Helena is 7 miles from Helena, Ark., and is on the M. P. and M. & N. A. Shipments were tendered to the M. P. unrouted and moved over its line to Memphis, Tenn., and thence I. C. to destination, charged 29.5c, applicable rate being 28.5c, made 11.5c and 17c to and from Memphis. Though the route through Helena was available, there was no obligation on the M. P. to switch these shipments to the Yazoo at that point and forego a line haul in order to protect the lowest rate. It was clearly entitled to a line haul, and as it forwarded the shipments over the cheapest route affording it such a haul, it can not be charged with misrouting. In order to have obtained the benefits of that route the shipper should have tendered the shipments to the M. P. for switching to the Yazoo, to which carrier it should have presented the bills of lading consigning them to Jackson. No sufficient evidence was offered tending to show that the applicable rate over the route of movement was unreasonable, and reparation should not be awarded for the purpose of equalizing the rate over that route with the lower rate over the Yazoo from Helena which the shipper could have used. HELD: Shipments not misrouted, applicable rate not unreasonable, complaint dismissed. Enochs Lumber & Mfg. Co. v. I. C. R. R., 129 I. C. C. 505.

(y) Respondents proposed to restrict the routing of livestock in carloads from Texas to Cincinnati, O., Louisville, Ky., Indianapolis, Ind., and intermediate points. At the present time joint rates on livestock in carloads from practically all points in Texas to these points apply, generally speaking, over all lines participating in the suspended schedules. As the rates from points in Texas are applicable at intermediate points the proposed schedules would result in the cancellation of joint rates to such of these intermediate points as are located on routes which respondents seek to eliminate. The proposed cancellation of routes would adversely affect the livestock industry. The inherent nature of the traffic demands a diversity of routes. Considerable damage would result from holding livestock in transit when certain routes are closed by reason of strikes, washouts, wrecks, and embargoes, or because of quarantine regulations imposed by the United States Bureau of Animal Indus-

try during epidemics such as the foot and mouth disease, and floods such as have just been experienced in the Mississippi valley. This is well known to and recognized by the carriers. Some of the routes sought to be cancelled are important, logical and workable routes, and in many instances are shorter than routes proposed in the suspended schedules. HELD: Proposed schedules not justified. Livestock from Texas, 132 I. C. C. 537.

(z) Proposed elimination of routes via Montgomery, Ala., in connection with joint rates on cotton originating at points in Alabama and Mississippi on the Southern and various other lines, and restriction of such routes so that the Southern will secure the long haul on traffic which it originates or receives from its connections, found justified, except where such restrictions will create unauthorized fourth-section violations. Elimination of routes via Montgomery will not retard movement of cotton from and to points considered; will not subject shippers to increased rates; nor otherwise injure the public interest, as rates now applicable via Montgomery also apply over routes to which traffic is proposed to be confined. Routing on Cotton, 129 I. C. C. 387.

(aa) When shipments are delivered unrouted, no obligation rests upon carrier to participate only in a switch movement to a connecting line in order to protect the lowest rate, if in so doing it foregoes a line haul itself. Enochs Lbr. & Mfg. Co. v. I. C., 129 I. C. C. 505.

(bb) Shipments tendered to Missouri Pacific unrouted moved under combination rates from West Helena, Ark., via Memphis, Tenn., to Jackson, Miss. Contemporaneously a lower rate applied via Helena, Ark., composed of carrier's switching charge to connections at that point plus line-haul rate beyond. Upon contention that shipments should have moved via Helena as it was the cheapest available route, FOUND: While that route was available, Missouri Pacific was under no obligation to switch shipments to the connecting line and forego a line haul itself in order to protect the lowest rate. To obtain the benefits of that route shipments should have been tendered to carrier for switching to connecting line to which line it should have presented bills of lading consigning shipments to Jackson. See 42 I. C. C. 317. As shipments moved over cheapest route affording originating carrier a line haul, it can not be charged with misrouting. Enochs Lbr. & Mfg. Co. v. I. C., 129 I. C. C. 505.

§6½. Rail-and-Water Route.

See Rail-and-Water Rates.

(a) Cotton gathered at Tennessee River landings by packet boat line was carried to Riverton, Tenn., and forwarded by rail to New Orleans under new bills of lading taken out by complainant for sole purpose of showing car numbers therein. Charges were prepaid at through rate shown in bills of lading, which also specified routing via Northern Alabama Ry. That carrier not concurring in packet company's tariff carrying through rate, additional charges were collected at destination. HELD: Nonconcurrence rendered a combination applicable. Moreover, shipments were through shipments and had packet company advised complainant that its tariff did not, as its title-page purported to do, apply via Riverton, complainant unquestionably would have directed rerouting. There being no intention to break continuity of movement, packing company's failure to refuse shipments or hold them pending settlement of conflict between rate and route specified in original bills of lading, resulted in misrouting. Reparation awarded against all carriers for overcharges and against packet company for misrouting. Florence Chamber of Commerce v. N. O. & N. E., 118 I. C. C. 228.

(b) Complainant alleged that a carload of shelled peanuts shipped by it from Samson, Ala., on March 10, 1924, to Camden, N. J., was misrouted. Shipment was tendered to the C. of Ga., on a bill of lading showing "C. of Ga.-S. A. L.-P. & N." and moved over the initial carrier to Athens, Ga., S. A. L. to Richmond, Va., R. F. & P. to Potomac Yard, Va., and the Pennsylvania beyond. No rate was inserted in the bill of lading. Complainant had contracted to sell the peanuts to the consignee for $2737.50 plus freight charges over the rail and water route, the peanuts to be delivered by the P. & N. Steamship Co. boat line. Upon arrival of the shipment at Camden, consignee refused to accept it and, after $143 demurrage had accrued, the

Pennsylvania sold it at auction for $2607.97, deducted from that sum the demurrage charges and $237, the latter representing freight charges at the rate of 79c and a weight of 30,000 pounds applicable over the route of movement and turned over the balance, $2227.97 to complainant. The tariff publishing the rates from Samson at the time of movement provided for participation of the boat line only in rates to Philadelphia. The list of participating carriers showed that "P. & N." meant the Piedmont Northern while "P. & N. S." meant the boat line. As the boat line was not a party to rates to Camden and the tariff showed that "P. & N." was the abbreviation for the Piedmont, which carrier formed a part of a workable route in connection with the other carriers named, it can not be fairly said that the routing specified put defendants on notice that a rail and water route was desired. There was therefore no obligation on their part to use such a route and the refund made on account of their failure to do so was improper. HELD: Shipment was misrouted in not being forwarded in connection with the Piedmont but that no damage resulted therefrom the complaint will be dismissed. South Alabama Grocery Co. v. C. of Ga. Ry., 129 I. C. C. 327.

(c) It is well settled that if a carrier desires his shipment to move over a rail and water route which is cheaper than the all rail route he must specify such routing. South Alabama Grocery Co. v. C. of Ga. Ry., 129 I. C. C. 327, 328.

§7. Shipper's Instructions.

See Bills of Lading §10; Through Routes and Joint Rates VI.

(a) Shipment tendered Southern Ry. at Boonville, Ind., bill of lading specifying Big Four delivery, Elkhart, Ind. Upon arrival reconsignment to South Bend ordered, shipment moving thereto via N. Y. C. Reconsignment rules not providing for reconsignment at through rate via route of movement, the combination to and from Elkhart was charged. Complainant instanced fact that Big Four is part of N. Y. C. system and referred to lower through rates from Boonville to South Bend over five different routes with Southern as initial and N. Y. C. as terminal lines; also to lower rates from Boonville to Elkhart and from Illinois points to South Bend and La Porte over various routes for comparable distances. FOUND: Since shipment moved from Boonville to Elkhart over lowest available route carriers can not be held for misrouting because complainant was unable to effect reconsignment, of which carriers had no notice prior to order therefor, at through rate available over other routes. Nor does record show public need for establishment of another route from Boonville to Elkhart. Combination assessed found not unreasonable. Russell v. N. Y. C., 109 I. C. C. 193.

(b) Carrier disregarded routing instructions and forwarded shipments over a route taking a rate lower than that specified in bill of lading: HELD: Shipments were misrouted, but no damage shown. Lynchburg Traffic Bureau v. E. R. R., 112 I. C. C. 59.

(c) Shipments moved in accordance with routing instructions furnished by shipper, and joint rate assessed. Contemporaneously a lower combination rate applied via another route. HELD: As shipments moved in accordance with instructions, no misrouting resulted. Baker & Holmes Co. v. I. C., 112 I. C. C. 407.

(d) Shipments moved in accordance with routing instructions furnished by shipper, and joint rate assessed. Contemporaneously a lower combination rate applied via another route. HELD: As shipments moved in accordance with instructions, no misrouting resulted and no presumption of unreasonableness attaches to a joint rate over a route of movement because a lower combination was and is in effect over another route. See 24 I. C. C. 626. Nor does fact that lower combination applies over another route constitute a fourth-section violation. Baker & Holmes Co. v. I. C., 112 I. C. C. 407.

(e) Bill of lading originally contained rail-and-water routing instructions but before shipment left point of origin consignor telephoned agent of initial line to change routing to "all rail." Contention that agent was not authorized to ship all-rail and that misrouting resulted not sustained as record warrants conclusion that such instructions were received, and shipment moved over cheapest reasonable all-rail route. Armstrong Cork Co. v. S. A. & A. P., 113 I. C. C. 269.

(f) Lumber from Grayburg, Tex., consigned to East St. Louis, Ill., was routed by consignor over the T. & N. O. and Frisco. While enroute initial car-

rier changed instructions to show C. & E. I. delivery. Shipment arrived at St. Louis on the Frisco's rails and arrival notice mailed complainant was returned with notation "car billed to East St. Louis; delivered accordingly; this is not accepted as notice." Desired delivery was then effected and shipment held in hold yards of C. & E. I. in East St. Louis. Shipper then requested reconsignment to a point situated in St. Louis on the Wabash; line haul, switching demurrage, and reconsignment charges being collected for entire service performed: HELD: The Frisco's rails not reaching East St. Louis the rate charged applied thereto over that line only on shipments delivered by it to certain other carriers at that place, including the C. & E. I. Shipments therefore were not misrouted but were overcharged to extent of charges collected for switching from St. Louis to the C. & E. I. at East St. Louis. Refund of overcharges directed. Milne Lbr. Co. v. St. L.-S. F., 113 I. C. C. 369.

(g) Complainant attacked rate of 32.5c charged on seven cars of staves shipped between October 28 and November 9, 1921, from Blytheville, Ark., originally destined to Jackson, Miss., and reconsigned in transit to Gulfport, Miss., as inapplicable and unreasonable. Blytheville is served by four rail carriers of which the Frisco and Jonesboro need be considered. Shipments were tendered the Jonesboro at Blytheville on bills of lading showing Jackson as the destination and routing instructions as follows: J. L. C. & E.-Frisco-I. C. at Memphis. Contrary to these routing instructions the shipments moved over the Jonesboro to Nettleton, Ark., thence M. P., to Memphis, Tenn. From Memphis movement was over I. C., and while on the lines of that carrier the shipments were reconsigned to Gulfport where delivery was taken and charged 25.5c. On October 29, 1924, defendants instituted court action for recovery of the difference between that rate and 32.5c. The notation J. L. C. & E. in the routing instructions on the bill of lading indicated clearly that a line haul over the Jonesboro was desired and that carrier was under no obligation to deliver the shipments to the Frisco at Blytheville. If the shipper desired the shipments handled in that manner it should have so specified in the routing instructions. Rate of 32.5c was composed of 13.5c to Memphis and 19c beyond. Initial carrier was guilty of misrouting in delivering the shipments to the M. P., at Nettleton instead of to the Frisco at Wilson or Luxora but complainant suffered no damage as the result of the misrouting for the reason that the rate of 32.5c applicable over the route traversed was also applicable over the route by which the shipments should have moved. HELD, rate attacked applicable, shipment misrouted but no damage, complaint dismissed. Hollingshead Co. v. J. L. C. & E. Ry., 115 I. C. C. 19.

(hi) Complainant alleged it was subjected to payment of reconsignment and switching charges by reason of the failure of defendants to route four cars of coal, shipped February 2, 1923, from Gascola, Pa., to Montreal, Can., in accordance with routing instructions, which charges were and are unjust and unreasonable. Shipments were routed Union R. R., B. & L. E., N. Y. C. and G. T. Union R. R. is a switching line whose charges are absorbed by the B. & L. E. The point of connection is at North Bessemer, Pa., where the latter road issues bills of lading. Over the route specified a combination on Huntington, Que., of $4.74 per long ton applied. A joint rate of $4.74 per long ton also was published by the B. & L. E. over another route with delivery by the C. P. Unaware of the $4.74 combination rate, the agent of the B. & L. E. asked the special agent of the Union to secure permission from the shipper to change the routing and substitute in the bill of lading the route over which the joint rate applied. The latter agent testifies he was so authorized. The changed routing was inserted in the waybilling and owing to the fact that the consignee was located on the G. T., it was necessary for the C. P. to reconsign the shipments. Without deciding whether under the circumstances of this case the changed routing did amount to a diversion or reconsignment under the rules of the tariff, it is sufficient to point out that the shipper originally specified in writing the desired routing, and that it is disputed whether any change therein was afterwards authorized by it. Defendants have failed to rebut the validity of the original instructions by producing any written evidence to contradict their terms. This could have been procured at any time after the shipments were forwarded and in its absence defendant must be held liable for added expense incurred by the change in routing. HELD, shipments misrouted by B.

& L. E., reparation awarded. Bixler Coal & Coke Co. v. B. & L. E. R., 115 I. C. C. 248.

(j) Complainant alleged rate of $3.25 per ton charged on one car of coal in March, 1924, from Hazard, Ky., to Valparaiso, Ind., as unjust, unreasonable and unduly prejudicial to extent it exceeded $3.09, and alleged shipment was misrouted. Shipment moved over L. & N. to Cincinnati, Big Four to Granger, Ind., and G. T. beyond, 521 miles. The routing specified in the bill of lading was "G. T. route to protect lowest through freight rate." It also carried the notation "loaded to full visible capacity." Complainant's plant at Valparaiso is served by the G. T. and cars arriving at Valparaiso over other lines have to be switched by the G. T. Contemporaneously there was in effect a rate of $3.09 per ton over shorter routes in connection with the Pennsylvania and other lines. The meaning of the routing specified in the bill of lading was clear to complainants, having the location of their particular plant in mind, but the agent at point of origin could not be expected to know the location of the original consignees or of complainant's plant at destination. Defendant's agents construed the initials "G. T." as requiring a line haul movement over the G. T. HELD, rate attacked not unreasonable or unduly prejudicial and shipment not misrouted, complaint dismissed. Coovert & Young v. L. & N. R. R., 115 I. C. C. 349.

(k) When the initials of a particular road appear in the space provided on the bill of lading for the designation of a route this must be regarded as an expression of the consignor's desire that the line specified should participate in the movement as a line haul carrier. Coovert & Young v. L. & N. R. R., 115 I. C. C. 349, 350.

(l) Complainant alleged due to misrouting unreasonable charges were exacted by defendants on five cars of potatoes shipped between Nov. 30 and Dec. 13, 1920, from Grace, Ida., to Los Angeles, Calif. They moved O. S. L. to Ogden, Utah, thence S. P. to destination, charged combination of $1.135 composed of 74c to San Francisco and 39.5c beyond. A through rate of 65.5c was applicable over the O. S. L. to Salt Lake City, Utah, and L. A. & S. L. beyond. Prior to the movement of these shipments, the agent of the O. S. L. advised complainant that the 65.5c rate was applicable on potatoes, in carloads, but nothing was said as to routing. Complainant advised the agent that he intended to ship five or six cars to Los Angeles. The potatoes were hauled to defendant's station at Grace and loaded into the cars by a laborer employed by complainant for that purpose. The bills of lading under which the cars moved were made out by defendant's agent and showed routing via Ogden and S. P. Complainant's employe who delivered the potatoes signed complainant's name to the bills of lading but did not know that they purported to route the shipments. They were not explained to him by the carrier's agent and he assumed that he was signing only receipts showing that the potatoes had been delivered to the carrier. On previous occasions this employe had signed complainant's name to bills of lading but they were freely explained to him. Defendant's agent who received and billed the potatoes assumed that the rate over the route of movement was 65.5c. It is admitted that the routing here shown was the result of an error on the part of the agent of the initial carrier and the evidence of record indicates that it was complainant's desire and the agent's intention to send the shipments over the route taking the 65.5c rate. The routing shown in the bills of lading, rather than the signing and acceptance thereof, was the proximate cause of the damage. HELD: Shipments misrouted, reparation awarded on 65.5c rate. Hubbard v. O. S. L. R. R., 118 I. C. C. 202.

(m) The notation by the consignor in the blank intended for the naming of the route on the bill of lading must be regarded as an expression of the consignor's intention that the road so shown was to participate in a line haul. Connersville Lumber Co. v. L. E. & W. Ry., 118 I. C. C. 499, 500.

(n) Failure of initial carrier to follow routing instructions given by shipper on staves forwarded from Blytheville, Ark., to Jackson, Miss., and reconsigned to Gulfport, Miss., found to have resulted in misrouting, but no damages found to have been suffered as a result thereof since rate applicable over the routes traversed was also applicable over route by which shipments should have moved. Hollingshead Co. v. J. L. C. & E., 115 I. C. C. 19.

(o) It is duty of carriers to strictly observe routing instructions of shippers and carriers are liable for any damages arising from their failure so to do. Hollingshead Co. v. J., L. C. & E., 115 I. C. C. 19, 20.

(p) Shipments of staves from Blytheville, Ark., to Gulfport, Miss., were routed "J. L. C. & E.-Frisco-Ill. Cent. at Memphis." A rate lower than that assessed applied from Blytheville on the Frisco to Gulfport, but tariffs provided that in order to be entitled thereto shipments tendered to the J. L. C. & E. must be turned over by that line to the Frisco at Blytheville. In other words, under routing governing lower rate the J. L. C. & E. was entitled to a switch movement only. Upon contention that under routing instructions given it was initial carrier's duty to turn these shipments over to the Frisco at Blytheville, HELD: Notation "JLC & E." in routing instructions indicated clearly that a line haul by that road was desired and that carrier was under no obligation to deliver shipment to the Frisco at Blytheville. If shipper desired shipments handled in manner contended for it should have so specified in routing instructions. See also 51 I. C. C. 183. Hollingshead Co. v. J. L. C. & E., 115 I. C. C. 19, 20.

(q) On shipments originating at a nonagency station and moving to a connection where bills of lading were executed, complete routing instructions were inserted on shipping cards or scale tickets. Agent at forwarding point, presumably with complainant's permission secured by telephone, substituted a different route in bills of lading. Consignee was not located on delivering line named in the changed routing and upon arrival of shipments at destination it became necessary to reconsign and switch them to consignee's plant which was situated on the delivering road specified in original instructions. HELD: Carriers having failed to rebut the validity of original written instructions by producing written evidence to contradict their terms, which could have been procurred at any time after shipments were forwarded, misrouting resulted and carrier whose agent changed routing instructions must be held liable for added expense of reconsignment and switching incurred by change in routing. Reparation awarded. Bixler Coal & Coke Co. v. B. & L. E., 115 I. C. C. 248.

(r) Shipper, being unacquainted with rate matters, consulted agents of carriers, was advised to insert routings shown in bills of lading, and shipments so moved. A lower rate contemporaneously applied via other routes. Upon contention that it was carriers' duty to inform their agents of these lower rates, and that their failure to do so resulted in misrouting, HELD: Shipper's lack of knowledge does not relieve it from responsibility of having routed shipments. A shipper is charged with knowledge of lawful rate, and misquotation or misinformation by carriers can not alter specific wording of tariffs. Moreover, carriers are required to strictly observe shipper's routing instructions and assess charges on basis of rates applicable over routes specified. Shipments, therefore, were not misrouted. Underwriters Salvage Co. v. L. & N., 115 I. C. C. 585.

(s) Fifth-class rate charged on a sporadic shipment of fire-damaged sugar specifically routed by shipper from Jacksonville, Fla., to New Orleans, La., found not unreasonable as compared with lower rate contemporaneously in effect over other routes. No evidence was introduced to show that commodity shipped was improperly classified, and fifth-class rating under which it moved should not be condemned merely because commodity rates applied over other routes. Underwriters Salvage Co. v. L. & N., 115 I. C. C. 585.

(t) Complainant sought reparation for loss and damage sustained due to deterioration, by reason of alleged failure of carrier to observe routing instructions on shipment of sweet peppers from Fort Myers, Fla., to Boston, reconsigned to Chicago. HELD: Evidence establishes that shipment moved in accordance with original instructions given, that no additional routing instructions were furnished at time reconsignment was requested and that it was handled through to ultimate destination in an expeditious manner. No misrouting can therefore be attributed to carriers, and claim for loss and damage not resulting therefrom presents a matter over which commission has no jurisdiction. Kingman v. A. C. L., 118 I. C. C. 31.

(u) Rates on coal from Herrin, Ill., to Bannister, Ashley, North Star, and Ithaca, Mich., found not unreasonable. Shipments moved according to shipper's routing instructions. Contemporaneous-

ly, lower rates existed via other routes and two years subsequent to movement similar rates were established over route of movement, but these rates were later withdrawn because found unremunerative. While complainant admitted error in routing, it contended that rates assessed under that routing were unreasonable. However, fact that lower rates exist over other routes is insufficient to establish unreasonableness of rates charged. See 64 I. C. C. 78. Crerar Clinch Coal Co. v. A. A. R. R., 118 I. C. C. 171.

(v) Section 15 of the act gives shippers right to designate in writing the route over which they wish their shipments to travel and, generally speaking, it is duty of carrier to transport shipments over route so designated. Hubbard v. O. S. L., 118 I. C. C. 202, 203.

(w) Rates on bituminous coal from Plymouth and Shrewsbury, W. Va., to Connersville and Newcastle, Ind., moving via route specified by shipper, found not unreasonable as compared with lower rates contemporaneously in effect over other routes. While lower rate contended for applied over all routes except route of movement, the higher rates apply over latter due to fact that they are circuitous; the higher rates therefore apply to intermediate points in a higher rated territory, and rates to such intermediate territory were found not unreasonable in 96 I. C. C. 178. Connersville Lbr. Co. v. L. E. & W., 118 I. C. C. 499.

(x) Notation by consignor in blank space intended for naming of route on a bill of lading of a specific carrier without specifying rate or junction point must be regarded as an expression of consignor's intention that the road so shown was to participate in a line haul. See also 19 I. C. C. 68, and other cited cases. Connersville Lbr. Co. v. L. E. & W., 118 I. C. C. 499, 500.

(y) Bill of lading tendered by shipper specified route and also named a rate which was applicable in connection with originating carrier but inconsistent with routing specified. Lower rates applied over routes other than route of movement. HELD, originating carrier having failed to ascertain from shipper whether routing should be observed or whether shipments should be forwarded over route taking rate named, shipments were accordingly misrouted. Reparation awarded. Altitude Petroleum Co. v. F. W. & D. C., 118 I. C. C. 572, 575, 576.

(z) Complainant alleged charges collected on four cars of building stone shipped between Aug. 18, and Sept. 2, 1922 from Bedford, Ind., to Oklahoma City, Okla., as unlawful and inapplicable. Two of the shipments were originally routed by the shipper C., M. & St. P., Big Four, Frisco; third was routed the same with the additional words, Frisco delivery and the fourth routed C., M. & St. P., Big Four. When the cars reached St. Louis, they were held in the terminal yards of the Frisco, due to a congestion of freight at that point. Complainant desired the cars to go forward as quickly as possible. From information it received it found that the cars could be forwarded over a route other than that named in the bills of lading, namely, over the Cotton Belt, to Brinkley, Ark., and thence Rock Island. Complainant requested the Frisco to divert the four cars to that route. Joint through rate of 42.5 cents was applicable via the routes shown in the bills of lading. Complainant's letter to the Frisco requested a rerouting under the provisions of service order No. 22. The carrier accepted the request without objection. Applicable rate 42.5 cents. HELD, reparation awarded on basis of 42.5 cents. Selden Breck Construction Co. v. C., M. & St. P. Ry., 120 I. C. C. 134.

(aa) It was the duty of the carrier to forward the shipment over the route designated by the shipper. Lewis Chitty Consolidated Co. v. B. & O. R. R., 120 I. C. C. 384, 385.

(bb) Complainant attacked combination charged on sand and gravel, carloads, shipped since March 1, 1924 from points near Beloit, Wis., to Beach and Waukegan, Ill., and Kenosha, Wis., as unreasonable. Shipments originated on the C., M. & St. P., and moved over that line to Rondout, Ill., were there switched to the E. J. & E., to tracks of the C., N. S. & M., and moved interstate over that line to destinations. Full combination of local rates to and from Rondout plus an interchange switching charge of $2.70 were assessed. Subsequently charges were refunded to basis of the combination rate subject to the combination rule plus the switching charge. Reparation sought is the amount of the latter charge of $2.70 per car. Routing specified by complainant provided via Interstate Sand & Gravel Company pit, Libertyville, Ill., care of North Shore Line or via the Liberty Lake

Gravel Company pit, Libertyville, Ill., care the North Shore Line. Instead of moving in this manner the shipments moved through Libertyville and were interchanged at Rondout, 3 miles farther east. Although conceding the interchanging might have been physically possible at Libertyville, defendants testify that various things make it impracticable. From the evidence it appears to be undisputed that the Milwaukee had only a limited use of the tracks at the Libertyville gravel pit and that defendant was refused the enlarged rights essential to its use as a point of interchange with the North Shore for shipments of other persons. The tracks at the Libertyville gravel pits were not shown in the tariff as a point of interchange between defendants. HELD, shipments not misrouted, charges attacked not unreasonable, complaint dismissed. Racine Crushed Stone Co. v. C., M. & St. P. Ry., 120 I. C. C. 742.

(cc) Shipment specifically routed rail-and-water was refused by water carrier because of damaged condition. Complainant, upon learning of refusal to transport, wired carrier, "if you can not cooper so acceptable * * * ship all rail * * * with understanding claim filed difference rate and other charges." Carrier, thereupon, diverted shipment to destination via all-rail route. HELD: It was carrier's duty to forward over route designated by shipper. Necessity for change in routing resulted from damaged condition, and telegram sent by complainant was intended merely to mitigate damages and did not order diversion or relieve carrier of duty of forwarding as routed. Shipment was therefore misrouted. Reparation awarded. Lewis-Chitty Consolidated v. B. & O., 120 I. C. C. 384.

(dd) Shipments of soap and cleaning compounds from Manchester, Conn., to Cincinnati, Ohio, and St. Louis, Mo., were routed by complainant "O. Dom, care of C. & O. (or N. W.)" and connecting lines. Rates shown in bills of lading were not applicable over routes named and some of shipments moved before complainant was notified of conflict between route and rate. Charges were collected at applicable combination rates which were higher than rates shown in bills of lading, HELD: St. Louis and Cincinnati can not be said to be "distant points," or the Old Dominion, Chesapeake & Ohio or Norfolk & Western "distant roads" within meaning of Conf. Ruling 214(g), and shipments tendered before complainant was notified of conflict between route and rates were, therefore, misrouted. See Conf. Ruling 474(c); 48 I. C . C. 423; 91 I. C. C. 723. Reparation awarded. Orford Soap Co. v. N. Y., N. H. & H., 122 I. C. C. 71.

(ee) Shipments moved over route designated by shipper. A rate lower than that applicable over route of movement applied via various routes. Upon contention that because, previous to movement, carrier quoted the lower rate but failed to advise complainant that it was restricted so as not to apply over route specified, it was unreasonable to charge the higher rate, HELD: Shippers and carriers alike are charged with knowledge of lawfully published rates and tariff provisions. Misquotations of a rate by the agent or employee of a carrier is not a sufficient basis for an award of reparation, nor does existence of a lower rate over a competing route, of itself, establish unreasonableness of rate over route of movement. Newsome Feed & Grain Co. v. P. & L. E., 122 I. C. C. 329.

(ff) Combination rates assessed on shipments of structural iron and steel, from St. Louis, Mo., Chicago, Ill., and Bethlehem, Pa., routed by shipper for fabrication in transit at Muskogee, Okla., and reforwarded to Casper, Illco, and Salt Creek, Wyo., found applicable and not unreasonable. While contemporaneously lower joint rates were in effect to Great Falls, Mont., and Spokane, Wash., they were restricted so as not to apply to destinations named, and lower joint rates in effect to Wyoming points were not applicable via Muskogee. Complainants routed shipments over extremely circuitous routes involving an out-of-line haul of at least 800 miles. Had they been forwarded over direct routes, lower rates could have been secured and wasteful transportation avoided. Tulsa Rig, Reel & Mfg. Co. v. M. K. T. R. R., 122 I. C. C. 405.

(gg) On watermelons moving from Daisy and Hagan, Ga., to Jacksonville, Fla., bills of lading called for Atlantic Coast Line delivery. Originating carrier disregarded routing instructions and carried shipment through to destination and tendered delivery on its own rails. HELD: That failure to effect delivery specified in the bills of lading resulted in misrouting. Reparation awarded. G. W. Harp v. S. A. L., 122 I. C. C. 585.

(hh) Under Interstate Commerce Commission ruling, No. 474, carrier may not recover undercharge, where shipper had designated route and rate, and shipment had been made over route charging higher rate than that designated. St. Louis-San Francisco Ry. Co. v. Republic Box Co., 12 Fed. (2d) 441.

(ii) Complainant attacked combination rate charged on one car of coal from Annabelle, W. Va., to Goshen, and reconsigned to Benton Harbor, Ind., as unreasonable, and that the restriction in routing in connection with the Big Four is unreasonable. Shipment was tendered Nov. 25, 1924, to the B. & O., routed "B. & O.-N. Y. C.", and moved over B. & O. to Sandusky, O., thence N. Y. C. to Goshen and under complainants reconsignment order, to Elkhart, Ind., and Big Four beyond, distance 512.5 miles. Sandusky is the usual interchange point between the B. & O. and N. Y. C. Before diverting the car to Benton Harbor complainant was informed by the agent of the N. Y. C. at Goshen that a joint rate of $3.25 would apply. That rate did not apply over the route of movement, applicable combination being $2.90 to Elkhart and $1.32 beyond. The rate sought applies over three different routes, and if shipment had been routed over one of these routes, it would have been reconsigned to Goshen at the joint rate. The agent at point of origin was not informed that complainant's shipment was to be reconsigned, or as to its destination. Defendants complied with the shipper's routing instructions and can not be found to have misrouted the shipment. Earnings under the rate charged do not indicate that it exceeded a maximum reasonable basis, and the failure of complainant to avail himself of a lower rate applicable over other routes does not establish the unreasonableness of the rate over the route of movement, or the necessity for additional routes in the future. HELD: Rate attacked not unreasonable, routing restriction not unreasonable, complaint dismissed. Sellers v. C., C., C. & St. L. Ry., 128 I. C. C. 263.

(jj) On coal routed by shipper from Annabelle, W. Va., to Goshen, Ind., complainant was quoted a joint rate. Shipment was diverted en route to Benton Harbor, Mich., and since joint rate did not apply via that route, higher combination rate was assessed. Upon contention that as lower joint rate applies over other routes from points in the Annabelle group to group in which Benton Harbor is included, it should also apply over route of movement. HELD: Agent at point of origin was not advised that shipment was to be reconsigned, or as to final destination, and since it moved as routed, it was not misrouted. Moreover, earnings under rate charged do not indicate that it exceeded a maximum reasonable basis and failure to take advantage of lower rate over restricted routes does not establish unreasonableness of rate charged or necessity for additional routes. Sellers v. C., C., C. & St. L., 128 I. C. C. 263.

(kk) If a shipper desires his shipment to move over a rail-and-water route, which is cheaper than the all rail route, he must specify such routing. See 68 I. C. C. 485; 83 I. C. C. 483. South Alabama Grocery Co. v. C. of G., 129 I. C. C. 327, 328.

§ 7½a. What Routes Open.

(a) On shipments destined to Atlanta, Ga., complainant with expectation of securing at Atlanta, as an intermediate point, the application of a rate published to Westwego Elevators, La., specified routing beyond East St. Louis gateway via Illinois Cent. R. R. Based upon fact that the Illinois Central does not reach Westwego Elevators with its own rails, complainant contended that routing instructions in tariff were incomplete and permitted any routing not specifically prohibited over lines parties thereto, provided the Illinois Central first be given a road haul. HELD: Routes to New Orleans, where Westwego Elevators are located, through East St. Louis, as described in tariff are complete, and since tariff also provided for absorption by Illinois Central of delivering line's switching charges the routings to Westwego Elevators specified in tariff were not made incomplete by failure to name in connection therewith the switching line between that point and New Orleans. Hogan Bros. v. C., B. & Q. R. R., 113 I. C. C. 223.

(b) Complainant took advantage of unrestricted combination rules published in local tariffs of intermediate short lines by routing shipments over unusual routes. Shipments could have been billed without intervention of intermediate short lines. Tariffs of originating and delivering carriers specifically pro-

hibited use of such rule and computation of rates by its use would require the intermediate roads to haul traffic for less than nothing. FOUND: Holding out principle laid down in the Sligo case, 62 I. C. C. 643; 73 I. C. C. 551, is not controlling. In no case applying that principle was a carrier required to protect a rate less than nothing or surrender all its earnings to connections; nor does the act permit or require transportation without any charge or at less than no charge. When, as here, such a result is sought to be accomplished it is to be condemned and the commission may intervene to prevent unwarranted dissipation of carrier revenues regardless of where the responsibility lies. Combination rules here produce a result unlawful per se and are of no effect. Standard Oil Co. v. A., T. & S. F., 113 I. C. C. 597.

(c) The commission has frequently found that where tariffs are silent as to routing the rates apply over all reasonably available routes of participating carriers. Miles Medical Co. v. B. & O. R. R., 118 I. C. C. 33, 35.

(d) In original report, 83 I. C. C. 417, cement from Richard City, Tenn., to certain Forida points was found misrouted but reparation was denied because rates charged were those which would have applied except for misrouting. Governing tariff to Jacksonville provided for application of single increases only to separately established commodity rates, and as class rates were charged beyond, increase under General Order No. 28 of director general was applied to both factors. However, Florida basing book, which governed factor beyond Jacksonville, listed cement as taking a specific increase and even though class rates were applied for movement south of that point, they were nevertheless specifically included within the combination rule and should have taken but a single increase. Reparation awarded in amount that charges paid exceeded those which would have applied by use of the rule. Dixie Portland Cement Co. v. Director General, 115 I. C. C. 111.

(e) Shipments of vegetable hampers were unrouted by shipper and moved from Wauchula, Fla., located on the Atlantic Coast Line to Meggetts and Nosbig, S. C. At time of shipment Seaboard Air Line tariff carried a combination rate lower than that charged via route of movement, subject to notation "applicable only via Seaboard Air Line as initial carrier and only on traffic originating at points south and west of Jacksonville." Upon contention that notation included points on all lines in Florida south and west of Jacksonville or on traffic turned over to Seaboard Air Line at that point, HELD: Given a reasonable construction such notation restricted the lower rate to traffic originating only on the S. A. L. south and west of Jacksonville and Wauchula not being located on that line the shipments were not misrouted. Wauchula Development Co. v. A. C. L., 115 I. C. C. 207.

(f) Refusal of carriers to accept and transport intrastate shipments tendered for transportation via a duly published unrestricted interstate route and compelling shipper to change routing in bills of lading to higher intrastate route found to viclate section 15 (8) of the act. Reparation awarded. Standard Oil Co. v. A. C. L. R. R., 115 I. C. C. 239.

(g) Shipments of refuse sand from Detroit, Mich., to Indianapolis, Ind., moved as routed by shipper. Applicable tariffs carried so-called intermediate clause, such clause via one of the routes being unrestricted in its application, whereas via the other route the clause contained phrase "on the same line." HELD: That on shipments moving via the unrestricted route the clause was applicable and lower rates provided thereunder applied. As to shipments moving over the other route the words "on the same line" in intermediate rule required that intermediate point be on line of same carrier as the more distant point to which a rate is published and since rails of delivering line did not reach the farther distant point the intermediate rule did not apply on shipments moving thereover. American Radiator Co. v. D. & T. S. L. R. R., 115 I. C. C. 529.

(h) Shipments of chairs from Winston-Salem, N. C., and blankets from Nashua, N. H., to Casper, Wyo., were tendered unrouted, charges being assessed based on Mississippi River combinations. Lower joint commodity rates contemporaneously applied to San Francisco, the tariff carrying an intermediate clause to effect that when no specific rates are provided for stations located directly intermediate to and on same line or route with stations to which rates are specifically provided, the applicable

rate is that to the more distant point. HELD: Intermediate clause not being restricted as to routing so as to preclude movement via Casper and not requiring that unnamed destination point be located between two named points, the lower rates under the rule were applicable to Casper over route of movement. Reparation awarded. Chamberlin Furniture Co. v. Director General, 115 I. C. C. 575.

(i) Tariff carried intermediate clause providing for application of rates from intermediate stations. Upon contention of carrier that over customary, natural, and logical route a certain point was not intermediate to stations from which rates were published and was therefore not entitled to published rates, HELD: Where tariffs are silent as to routing, the rates apply over all reasonably available routes of participating carriers, and on a haul approximating 900 miles it can not be said that an additional haul of 29 miles would constitute a route not reasonably available. Miles Medical Co. v. B. & O., 118 I. C. C. 33, 35.

(j) Complainant attacked charges assessed on a car of bituminous egg coal shipped from Vanwood, W. Va., to Elkhart and reconsigned to New Paris, Ind., as illegal. Shipment was tendered to the C. & O., consigned to Elkhart, with bill of lading routing C. & O. and N. Y .C. Shipment moved C. & O. to Cincinnati thence Big Four to Toledo, thence N. Y. C. to Elkhart. Upon arrival at Elkhart it was reconsigned to New Paris via Big Four charged rate of $5.68 plus $6.30 reconsigning charge. Shipment moved May 1, 1923. There was in effect a rate of $3.22 on coal from Vanwood to New Paris. The tariff publishing the rate of $3.22 from Vanwood to Elkhart and New Paris does not restrict the routing, and defendants are participating carriers therein. HELD, rate applicable $3.22, plus reconsignment charge of $2.70, overcharge to be refunded, complaint dismissed. Russell v. C., C., C. & St. L. Ry., 120 I. C. C. 243.

(k) Complainant attacked commodity rates charged on wheat, corn, oats and rye, carloads, between May 3 and Sept. 10, 1922 from North Dakota, South Dakota, and Minnesota, originally billed to Minneapolis, Minn., and reconsigned to Superior, Wis., as inapplicable. Shipments moved over G. N. Complainant paid through rates to Minneapolis and 6 cents on corn, oats and rye and 6.5 cents on wheat, beyond. The direct route to Superior from the several points of origin, except Litchfield and Rogers, Minn., is via Willmar and St. Cloud, Minn. The route traversed via Minneapolis is longer. The G. N. offers to refund overcharges on shipments from Litchfield and Rogers. The tariffs of the G. N. provided through commodity rates from points of origin to Superior and to Minneapolis. The through rates were higher to Superior than to Minneapolis, except that from Howes, N. D., the rates to both destinations were equal. Complainant contended that inasmuch as the G. N. published no tariff rule restricting routing to Superior it was authorized to ship over the long route at the through rate. A specific tariff rule restricting the rate to the short route was established on Sept. 25, 1923 after these shipments moved. The route from points of origin herein through Minneapolis to Superior was an open route, and in the absence of restricted routing it must be found that the through rates to Duluth applied over the route traversed. No. 16466 and sub. Nos. 1 to 5. From the points of origin here considered in Minnesota, North Dakota, and Montana the N. P., G. N., and Soo Line, each reaches Duluth, Minn., or Superior, Wis., or both, by a route through Minneapolis which is longer than its direct route. The tariff of each of these carriers naming rates on wheat to Duluth and Superior contains no routing restrictions. Each carrier publishes, from certain of these origin points, the same rate to Minneapolis as to Duluth and Superior. These complainants billed carload shipments of wheat to Minneapolis, surrendered inbound billing, meeting all tariff requirements in that respect, and reforwarded the cars to Duluth or Superior. Charged rate to Minneapolis plus 6.5 cents beyond. The tariff of the Soo Line contained a provision substantially similar to that of the N. P. The absence of routing restrictions and of any addition to that rate provided by tariff, such as the N. P. provided for in its rule 33, made the Duluth rate applicable over any open route designated by the shipper. HELD, reparation awarded. Delmar Co. v. G. N. Ry., 120 I. C. C. 530.

(l) On coal originally billed from Vanwood, W. Va., to Elkhart, Ind., shipper specified C. & O. and N. Y. C. rout-

ing. Upon arrival at originally billed destination it was reconsigned, in accordance with instructions previously given, to New Paris, Ind. Through rate applicable via route of movement was assessed HELD: Since a lower through rate applied between origin and ultimate destination via a more direct route, such lower rate, being unrestricted as to routing, was applicable via route of movement. Refund of overcharges directed. Russell v. C., C., C. & St. L., 120 I. C. C. 243.

(m) On gravel from Montgomery, Ala., to Milton, Fla., the exclusively used route of carriers is through Flomaton, Ala., and Pensacola, Fla. Over a slightly longer route through Duvall, Ala., Milton is intermediate to Pensacola. HELD: Applicable tariff, being subject to rule 77 of Tariff Circular 18-A and unrestricted as to routing, the Pensacola rate applied to Milton over either route. Reparation awarded. Lawrence Construction Co. v. L. & N., 120 I. C. C. 316.

(n) Shipments of wheat, unrouted by shipper and forwarded by carrier from points west of Kansas City, Mo., milled in transit at Marshall, Mo., and product, flour, back hauled through Kansas City for movement to Oklahoma City, Okla., found misrouted. A lower rate contemporaneously applied via St. Louis, Mo., and tariff naming such lower rate did not restrict its application via junction points along the shortest system route. Under such circumstances commission has ordinarily found that unrestricted rates apply via any junction point. It was therefore the duty of carrier to forward such unrouted shipments over the lower-rated route. Victor Milling Co. v. M. P., 120 I. C. C. 335.

(o) Charges on wheat from points west of Kansas City, Mo., milled in transit at Marshall, Mo., and the product, flour, forwarded to Oklahoma City, Okla., found inapplicable. Here, the movement involved a back haul through Kansas City, and charges assessed were based upon those published for out-of-direct line routes. Tariff provision, however, related solely to charges where out-of-line haul exceeded 150 miles, such charges not to be based on the round trip but only for distance from point of origin to transit point. Distances from origin points to Marshall being less than 150 miles, charges assessed were therefore inapplicable. Applicable charges found to be those in effect via an unrestricted route through St. Louis. Victor Milling Co. v. M. P., 120 I. C. C. 335.

(p) Where tariff names rates but does not restrict them via junction points along the shortest system route, under such circumstances commission has ordinarily found that such rate applies via any junction point. Victor Milling Co. v. M. P., 120 I. C. C. 335, 338.

(q) On grain moving from points in Montana, the Dakotas, and Minnesota, to Duluth, Minn., and Superior, Wis., via Minneapolis, Minn., charges were assessed on basis of through rates to Minneapolis, plus proportionals beyond. Lower local rates applied between origins and destinations by way of direct routes. HELD: That such lower rates, because unrestricted as to routing, were applicable also by way of the indirect route through Minneapolis, except where tariffs provided for an additional charge on shipments moving beyond that point. Reparation awarded. Delmar Co. v. G. N., 120 I. C. C. 530.

(r) Combination rate was assessed on shipment of lumber from Charleston, S. C., originally billed to Boston, Mass., and reconsigned to Armory, Mass. At time of movement an unrestricted lower joint rate applied from point of origin to final destination. HELD, If it was carrier's intention to restrict application of joint rate to any particular route and to likewise restrict reconsignment service in connection therewith, they should have done so in clear and unequivocal language. See 81 I. C. C. 495. There being nothing in tariff naming such lower joint rate from point of origin to final destination that would have precluded complainant from routing shipment through Boston if it had been billed to final destination in the first instance, such lower joint rate was applicable and shipment was overcharged. That there were no established divisions over route of movement is immaterial. See 59 I. C. C. 229. Reparation awarded. National-American Wholesale Lbr. Asso. v. A. C. L., 120 I. C. C. 665.

(s) Sand and gravel from Beloit, Wis., to Beach and Waukegan, Ill., and Kenosha, Wis., were routed via complainant's gravel pit, Libertyville, Ill., care of Chicago, North Shore & Milwaukee. Carrier moved shipments through Libertyville to Rondout, Ill., where they were interchanged with the North Shore, line-haul rates plus interchange switching charge being assessed. Complainant alleged misrouting, contending that switching charge would have been avoided had routing instructions been fol-

lowed. HELD: Originating carrier's use of the track at Libertyville was limited, that carrier having been refused its use as a common interchange point. To have allowed complainant free interchange switching at Libertyville while subjecting other shippers to switching charge at Rondout, would have given complainant an undue preference in violation of the act. Moreover, a route to be legal must be available to all shippers and this requirement can not be waived by private agreement between carrier and a particular shipper. Accordingly, shipments were not misrouted. Racine Crushed Stone Co. v. C., M. & St. P., 120 I. C. C. 742.

(t) Complainant attacked commodity rates charged on 64 cars of hay shipped between Jan. 1, 1923 and April 30, 1924 from Illinois to St. Louis, Mo., as unreasonable and in violation of section four. Commodity rates were not specifically provided from the points of origin and charges were assessed on a basis lower than class C, namely 17.5c from points in the western group and 15.5, 16.5 and 17.5c from the central group. At the time of movement commodity rates of 14.5c prior to Jan. 27, 1924 and 15.5c on and after that date were in effect from Cameron, Monmouth and Seehorn, Ill., to St. Louis. The origin groups in the western group are intermediate to Seehorn on traffic from Cameron and Monmouth. The tariff contains no routing restrictions and the route by way of Seehorn is not impracticable. Rate charged from the western group is inapplicable. The origin points in the central group are intermediate to St. Louis on traffic from Cameron and Monmouth. HELD, applicable rates from western group were those in effect from Cameron and Monmouth, rates charged from central group unreasonable to extent they exceeded rates from Cameron and Monmouth, reparation awarded. Toberman Mackey Co. v. C. B. & Q. R. R., 122 I. C. C. 299.

(u) On numerous occasions the Commission has found that if carriers desire to restrict the application of a joint rate to any particular route they should do so by clear and unequivocal language. Curtis Leather Co. v. P. R. R. R., 123 I. C. C. 1, 3.

(v) It is well settled that where no routing is provided in a tariff the rates therein will apply over all routes of the participating carriers. In construing doubtful or ambiguous tariffs the Commission has always resolved the doubt against the carriers publishing the tariffs. Finch Bros. v. C. St. P. M. & O. Ry., 123 I. C. C. 541, 542.

(w) No joint rates were in effect on lumber from Sulligent, Ala., to Wallins, Evarts, Baxter, Harlan, and Livingston, Ky., and combinations were accordingly assessed. Contemporaneously lower rates applied but were restricted in their application to specified routes. Upon contention that such lower rates were applicable to shipments have involved under an intermediate clause carried in the tariff, HELD, As intermediate rule was specifically restricted to apply via routes over which shipments did not move, they were not entitled to lower rates sought and those charged were applicable. Kentucky Lbr. Co. v. L. & N., 122 I. C. C. 119.

(x) Where no routing is provided in a tariff, rates therein apply over all routes of participating carriers. If carriers desire to restrict application of rates they have it in their power to do so by plain language. Finch Bros. v. C., St. P., M. & O., 123 I. C. C. 541, 542.

(y) The different routes via which tariff applies may be shown, together with appropriate reference to application of rates. When a tariff specifies routing the rates may not be applied via routes not specified. Russell Grain Co. v. A. G. S. R. R., 126 I. C. C. 405, 407.

(z) Complainant attacked rates charged on numerous carloads of tin cans shipped from Chicago, Ill., to North Prairie, Wis., from Nov. 28, 1922, to Nov. 19, 1924, as unreasonable and inapplicable. North Prairie is on the Madison southwest of Waukesha. Shipments were tendered unrouted and moved to destination through Milwaukee, Wis., and Waukesha a total distance of 115.7 miles, charged 25c. There was another available route from Chicago to North Prairie via Bardwell, Elkhorn, and Eagle, Wis., 114.8 miles, via which route North Prairie is directly intermediate to Waukesha, to which point a rate of 19.5c applied. The fact that, effective April 7, 1924, defendant restricted the application of the rates published in the governing tariff to the shortest route from point of origin to destination thus making the rate to North Prairie applicable only via the route through Bardwell and Elkhorn, clearly indicates that this route is not considered an impracticable

one, or one so uneconomical as to be not generally usable. And subsequently, on Nov. 20, 1924, the rate to North Prairie was reduced to 21.5c. HELD, from April 7 to Nov. 19, 1924, rate attacked unreasonable to extent it exceeded 21.5c, and prior to April 7, 1924 shipments were misrouted, reparation awarded. Nelson v. C. M. & St. P. Ry., 126 I. C. C. 713.

(aa) Shipments moved under joint rates. Complainant contended that as lower combination rates contemporaneously applied, shipments were misrouted HELD: Lower rate sought was based on an unusual combination and in Conf. Ruling 214(g), shippers were admonished to bear in mind that there is a limit beyond which agents could not reasonably be expected to have knowledge as to terminal deliveries, or local rates at distant points and on lines of distant roads. Here, existence of joint rates via recognized gateways would make it unreasonable to require carrier's agent to make inquiry as to whether or not a lower combination could be based upon a relatively obscure point beyond the gateways. See 98 I. C. C. 451. Shipments were, therefore, not misrouted. Hamburg Broom Works v. C., R. I. & P., 126 I. C. C. 171, 173.

(bb) Shipment of tin cans from Chicago to North Prairie, Wis., tendered unrouted moved via Waukesha, Wis. Contemporaneously a lower rate applied to Waukesha via Bardwell, Wis., over which route North Prairie is directly intermediate to Waukesha, and was applicable to North Prairie under an intermediate clause providing for application of rates to intermediate points. Upon contention that operating and other transportation conditions rendered it inadvisable and uneconomical to use the Bardwell route, and in accordance with statement in 247 U. S. 477 that carriers may resort to the more expensive route where in their opinion the cheaper route is unreasonable, that it was therefore justified in shipping via Waukesha, HELD: Fact that carrier subsequently restricted rates to shortest route thus making rate to North Prairie applicable only via Bardwell, clearly indicates that this route is not impracticable nor so uneconomical as to be not generally usable. Rate via Bardwell was therefore applicable and shipments were misrouted. Nelson v. C., M. & St. P. Ry., 126 I. C. C. 713.

(cc) Where tariff contained no restriction on routing to certain point, any reasonable routing to that point, though not the most direct is permissible. W. L. Shepherd Lumber Co. v. Atlantic Coast Line R. Co., (Ala., 1927) 112 So. 323.

(dd) On coal routed by shipper from Annabelle, W. Va., to Goshen, Ind., complainant was quoted a joint rate. Shipment was diverted en route to Benton Harbor, Mich., and since joint rate did not apply over that route, higher combination rate was assessed. Upon contention that as lower joint rate applies over other routes from points in the Annabelle group to group in which Benton Harbor is included, it should also apply over route of movement. HELD: Agent at point of origin was not advised that shipment was to be reconsigned, or as to final destination, and since it moved as routed, it was not misrouted. Moreover, earnings under rate charged do not indicate that it exceeded a miximum reasonable basis and failure to take advantage of lower rate over restricted routes does not establish unreasonableness of rate charged or necessity for additional routes. Sellers v. C., C., C. & St. L., 128 I. C. C. 263.

(ee) Lumber from Cottondale, Fla., to Gastonia, N. C., reconsigned to Union, S. C., was assessed combination rates. Contemporaneously lower joint through rates, unrestricted as to routing, permitted movement to Union through Gastonia. Upon contention that had shipment been originally consigned to Union it would have moved over a more direct route not involving the extra haul, and that through rates were not applicable under reconsigning rule providing that no reverse or extra haul would be performed at through rates. HELD: Contention is untenable. Tariff did not prohibit movement via Gastonia and fact that shipment traveled over this route because of a reconsigning order does not deprive shipper of benefit of joint rates. If it had been carriers' purpose to restrict application of joint rate they should have done so by clear and unequivocal language. See 100 I. C. C. 357. Moreover, rates assessed under a simlar situation in 83 I. C. C. 512, were found inapplicable. Reparation awarded. Thames v. S. Ry., 128 I. C. C. 508.

(ff) Complainant alleged rate charged on a carload of lumber shipped April 11, 1923, from Cottondale, Fla., to Union, S. C., as inapplicable. Shipment

moved A. & St. A. B. from Cottondale to Chester, S. C., C. & N. W. to Savannah, Ga., thence Southern through Spartanburg, S. C., to Union, distance 630 miles. Shipment was originally billed to Gastonia. After arrival at Gastonia the shipment was reconsigned to Union. Rate of 27.5c to Gastonia and 13.5c from Gastonia to Union were applied. There were and are in effect joint commodity rates on lumber from Cottondale of 27.5c to Gastonia and 27c to Union. These rates were unrestricted as to routing, and permitted shipments for Union to move through Gastonia. If the consignor had originally routed the shipment to Union via Gastonia the 27c rate would have been applicable. HELD: Rate applicable 27c, reparation awarded. Thames v. Southern Ry. Co., 128 I. C. C. 508.

(gg) Shipments of anthracite coal from Pennsylvania points to Fort Snelling, Minn., moved via St. Paul to Minneapolis, thence to Fort Snelling. Charges were collected on basis of rate to Minneapolis. However, Fort Snelling was not named as a point to which that rate applied, and carriers sought to collect undercharges for local rate from Minneapolis to Fort Snelling. FOUND: While customary route between St. Paul and Minneapolis is via Minnesota Transfer, and shipments moved over that route, they could have moved via Mendota, Minn., over which route Fort Snelling is intermediate to Minneapolis. Since Fort Snelling generally takes Minneapolis rate on coal from various other points, and that rate was subsequently established over route of movement, applicable rate was unreasonable to extent it exceeded rate to Minneapolis. Waiver of undercharges authorized. Hostler Coal & Lbr. Co. v. P. M., 128 I. C. C. 731.

(hh) Complainant alleged that the first class rate of 98c charged on passenger automobiles, in carloads, moving subsequent to Feb. 25, 1926, from Janesville, Wis., to Mason City, Ia., was inapplicable and unreasonable and unduly prejudicial. Janesville is on the C., M. & St. P. and C. & N. W. in southern Wisconsin, about 91 miles northwest of Chicago. Shipments moved from Janesville over the St. Paul via Prairie du Chien, Wis., and Calmar, Ia., to Mason City, 255 miles. Rate sought was applicable to Ames, Ia. Ames is on the Ft. D. D. M. & S., 13 miles north of Huxley, Ia. The short line in connection with the St. Paul from Janesville to Ames is 298 miles, through Beloit, Sabula, Delmar Jct., Atkins and Huxley. A shipment could move through Mason City, Spencer, Herndon and Huxley to Ames, 498 miles and over this route Mason City is intermediate to Ames. There are few stations west of Janesville, east of Aberdeen, S. D., on and north of the line of the St. Paul running through Huxley, on or south of the line running from La Crosse, Wis., to Aberdeen that are not between Janesville and Ames over some route of the St. Paul to Huxley, thence Ft. D. D. M. & S. The St. Paul on Feb. 1, 1926, established a joint commodity rate, subject to rule 77 of tariff circular 18-A and applicable from Janesville to Ames over the St. Paul to Huxley and Ft. D. D. M. & S. No other routing instructions were contained in the tariff. The only rate published to Mason City was the first class rate of 98c: HELD, Rate assessed applicable and not unreasonable or unduly prejudicial, complaint dismissed. Woodward Auto Co. v. C., M. & St. P. Ry., 129 I. C. C. 613.

III. LIABILITY FOR MISROUTING.

§7¾. In General.

(a) Bills of lading covering shipments of coal from Wilder and Davidson, Tenn., forwarded via Cincinnati to Peoria, Ill., and there reconsigned to points in Iowa, showed Peoria as destination. Most of them specified routing via Cincinnati, and others apparently left it optional with carriers to forward via either Cincinnati or Louisville, rate to Peoria being same by either gateway. Contemporaneously joint rates via Louisville authorized reconsignment at Peoria, which lower rates were later made effective via Cincinnati. FOUND: As there was nothing on bills of lading to inform carriers' agent that cars were to be reconsigned beyond Peoria and rates were same via either route, shipments were not misrouted. Fentress Coal Co. v. T. C. Ry., 115 I. C. C. 286.

(b) Mere fact that due to an oversight in routing restrictions of tariff a lower rate between two points applies over an unduly circuitous route, does not prove that higher rate by way of customary route is unreasonable. Desch v. N. P. Ry., 115 I. C. C. 401.

(c) Prior to movement carrier's agent quoted complainant a rate but said nothing as to routing. Upon delivery of potatoes for shipment by complainant's employee, the agent inadvertently in-

serted in bill of lading a route taking a higher rate than that quoted. Employee thinking they were receipts signed complainant's name to bills of lading not knowing they purported to route shipments and they moved in accordance with billing and applicable rates charged. HELD: Shipments were misrouted. While generally speaking it is carrier's duty to follow routing instructions of shipper, here routing shown was result of an error on part of carrier's agent whose intent was to route shipments via route taking lower rate. Routing shown in bill of lading, rather than signing and acceptance thereof, was, therefore, the proximate cause of damage. Reparation awarded. Hubbard v. O. S. L., 118 I. C. C. 202.

(d) Complainant alleged that due to misrouting of a car of internal combustion engines, shipped Dec. 12, 1923, from Mount Vernon, O., to Arab, Tex., and forwarded to Ranger, Tex., it was compelled to pay unreasonable charges. Shipment was routed by the shipper B. & O. St. Louis, C. & A. Kansas City, C. R. & P. Ft. Worth, T. & P. Eastland, E. W. F. & G. It moved over B. & O. to St. Louis, M. K. T. to Mangum, Tex., and E. W. F. & G. beyond having admittedly been misrouted by the originating carrier. It arrived at Arab at 8:45 p. m. on Dec. 28, 1923. On Dec. 29, at 10:45 a. m. complainant which had no notice of the misrouting, communicated with the agent of the C. R. I. & P. at Dallas, Tex., and ordered the car diverted to Ranger. The same day at about 1 p. m. complainant was notified by telephone that the shipment had arrived at Arab on Dec. 28. The records not clear as to the rate on which the shipment was forwarded to Ranger. Charged 1.44 and 26c to and beyond Arab. Complainant contends that had the shipment moved as routed it would not have arrived at Arab prior to Dec. 29, and that the order given on that date would therefore have effected its diversion in transit. When the shipment would have arrived had it moved as routed is problematical. Complainants right to divert the shipment was not dependent upon the receipt of notice at Arab, the destination named in the bill of lading. Delivery had been effected when complainants' attempt to divert the shipment was made. HELD, complainant not damaged by reason of the misrouting of the shipment by the originating carrier, complaint dismissed. Lone Star Gas Co. v. B. & O. R. R., 123 I. C. C. 553.

(e) Following previous decisions and informal rulings, shipments routed by shipper upon erroneous advice of carrier's representative that rate applicable over other routes obtained over route of movement, FOUND not to have been misrouted. Dreer v. L. A. & S. L., 126 I. C. C. 130.

§8a. Advice by carrier.

(a) Following previous decisions and informal rulings, shipments routed by shipper upon erroneous advice of carrier's representative that rate applicable over other routes obtained over route of movement, FOUND not to have been misrouted. Dreer v. L. A. & S. L., 126 I. C. C. 130.

§8½. Missing Transit or Other Privilege. See Facilities and Privileges §15.

(a) Complainant attacked rate charged on a car of cedar poles from Gemmell, Minn., to Pinconning, Mich., on March 30, 1922 as unreasonable, unduly prejudicial and inapplicable. Shipment was routed by complainant M. & I., N. P., Soo, D. S. S. & A., M. C., by which route the rate was 40.5 cents. The initial carrier disagreed with complainant as to tariff authority and held the shipment until the D. S. S. & A. was eliminated. The change in routing resulted in the application of a rate of 46 cents and the loss of a transit arrangement for storage and preservative treatment of the poles at Pinconning and forwarding therefrom at the rate from point of origin to final destination plus a $4 transit charge. The record contains no proof that the poles ever moved from Pinconning. There is no basis upon which to compute the amount of damage, if any, arising from the loss of the transit arrangement. HELD, shipment was misrouted by M. & I., reparation awarded. Page & Hill Co. v. M. & I. Ry., 120 I. C. C. 265.

(b) Initial carrier disagreed as to tariff authority for route designated by complainant and held shipment until routing was changed. Changed routing resulted in a higher rate, and complainant sought reparation to basis of rate over route originally designated plus additional charges alleged to have been incurred as a result of loss of a transit arrangement. HELD: As complainant failed to show proof of damage arising from loss of transit arrangement, there is no basis upon which to compute such

damage, if any. Accordingly, reparation awarded against initial carrier for misrouting only. Page & Hill Co. v. M. & I., 120 I. C. C. 265.

(c) Damages not shown to have resulted from misrouting a carload of internal-combustion engines shipped from Mount Vernon, Ohio, to Arab, Tex., and forwarded after arrival to Ranger, Tex. Shipment moved over a route shorter than that specified in bill of lading. On day following its arrival and delivery at Arab, complainant, having no notice of misrouting, requested diversion to Ranger, but was notified by telephone that shipment had already arrived at original destination. Complainant contended that had shipment moved as routed or had carrier notified it of misrouting prior to arrival at Arab, diversion could have been arranged for or effected and the through rate obtained. HELD: That complainant's right to divert was not dependent upon receipt of notice of misrouting, and carrier violated no duty by making delivery at Arab, the destination named in bill of lading. Lone Star Gas Co. v. B. & O., 123 I. C. C. 553.

(d) Complainant alleged that two cars of watermelons shipped July 22 and 23, 1925, from Sumter and Norman Park, Ga., to Potomac Yard, Va., were misbilled by defendants to Cameron Yard, Va., thus delaying delivery and causing deterioration and decrease in value of the commodity. Shipments were consigned to a commission merchant for diversion. Complainant was advised by consignee on July 26 that the cars were due to arrive July 27. Complainant about 11 A. M. July 27, inspected the shipments at a point near Alexandria, Va., which he believed was Cameron Yard. After inspection he agreed to purchase the shipments, and returned to Washington, soliciting orders for the watermelons to be delivered by him the next morning. Consignee gave instructions to the Southern at 5:45 P. M. July 27, to divert the cars to complainant at Washington, and delivery accordingly was made about 12:30 P. M. July 28. Complainant testifies that this was too late for him to make the agreed deliveries to his customers, and that most of his orders were therefore canceled. This complaint is brought to recover $215 the difference between the contemplated selling price and the amount realized. The cars were not held in Cameron Yard but north of the southern limits of Potomac Yard at the usual point of placement for inspection and diversion of cars billed to Potomac Yard over the Southern. Misrouting has not been established. HELD, complaint dismissed. Mossburg v. A. B. & A. Ry., 126 I. C. C. 447.

§ 9. **Measure of Damages.**

See Reparation §18.

(a) Damages due to misrouting are not overcharges above the legal tariff charges. Tidal Osage Oil Co. v. Director General, 115 I. C. C. 237, 238.

(b) Complainant alleged that it has sustained loss and damage, due to deterioration, in the sum of $1,271.75 by reason of the failure of the A. C. L., defendant, to observe routing instructions in connection with the diversion of one car of sweet peppers from Fort Myers, Fla., to Boston, Mass., and reconsigned at Waycross, Ga., to Chicago, Ill. Shipment moved from Fort Myers on Nov. 13, 1924, and was routed by A. C. L., R. F. & P., Pennsylvania and New Haven. On Nov. 14, 1924, it was reconsigned at Waycross to Chicago and was routed by defendant over its line to Petersburg, Va., thence N. & W. and Pennsylvania to destination, where it arrived Nov. 20, 1924. The evidence shows that on Nov. 14, 1924, about 10 A. M. complainant telephoned defendant's Boston office to have the car reconsigned to Chicago, if through rate could be protected; that upon inquiry as to the location of the car complainant expressed the opinion that it was somewhere between Fort Myers and Waycross; that defendant took the matter up promptly by telegraph, located the car at Waycross and had it reconsigned to Chicago. The evidence does not establish that complainant gave any routing instructions in connection with the reconsignment of this shipment or that there was any misrouting by defendant. HELD, complaint dismissed. Kingman Co. v. A. C. L. R. R., 118 I. C. C. 31.

(c) Complainant alleged that four shipments of watermelons forwarded between July 15 and 31, 1924 from Daisy and Hagan, Ga., to Jacksonville Fla., were misrouted. Shipments were sold f. o. b. points of origin and were consigned on straight bills of lading to the Southern Fruit & Produce Co., at Jacksonville, the bills of lading calling for A. C. L. delivery. It appears that one shipment which originated at Hagan was

turned over by defendant to the A. C. L. at Savannah, Ga., and was delivered by the latter carrier at destination. The remaining shipments moved over defendants line to destination, and upon arrival were tendered to the consignee, whose place of business is reached only by defendants tracks. Inasmuch as the delivery specified in the bills of lading was not effected, there is no question but that these shipments were misrouted. If delivery had been made on the tracks of the A. C. L. in accordance with the instructions in the bills of lading and the transaction consummated, complainant would have received under the contract of sale a total of $300. As the transaction turned out he received only $72.62. HELD, shipments misrouted and such misrouting was the proximate cause of damage to complainant in the amount of the difference between the original sale price of the watermelons and the amount he received in final settlement, reparation awarded in sum of $227.38. Harp v. S. A. L. Ry., 122 I. C. C. 585.

(d) Complainant alleged commodity rate charged on three cars of fir lumber shipped June 30 and July 1, 1925 from Terryville, Conn., to Minnesota Transfer, Minn., were inapplicable and shipments were misrouted. The bills of lading contained no routing instructions. Complainant contends that the shipments were unrouted, and therefore, it was the duty of defendant to forward them over the cheapest available route, namely, a so called differential route passing through Canada, over which the rate of 64c applied. Upon receipt of the bill of lading the agent telephoned the office of the consignor for routing instructions and was advised that the same routing as had applied eastbound was proper for the westbound movement. The eastbound bills of lading showed the following routing instructions: C. St. P. M. & P., C. & N. W., E. J. E., Erie, N. Y. N. H. & H., and Soo, E. J. & E., Erie and N. Y. N. H. & H. The westbound rates over these routes was 65c. The shipments were returned over the N. Y. N. H. & H., C. N. E., Erie to Chicago thence C. M. & St. P. at a rate of 65c. Although the telephone instructions were not literally followed, the shipments were nevertheless forwarded over a route over which the same rate applied as was in effect over the route specified. To hold that shipments should have been sent through Canada would be to sanction a violation of the instructions. HELD, shipments were misrouted but that complainant was not damaged thereby complaint dismissed. Brooks Bros. v. N. Y. N. H. & H., 123 I. C. C. 607.

(e) Shipments were sold f. o. b. point of origin at a stipulated price per car. Due to misrouting, resulting in misdelivery, consignee canceled its contract of sale, necessitating resale of shipments. HELD: Acquiescence of consignee to the erroneous delivery could not alter contract of carriage to the detriment of shipper without latter's consent. Had proper delivery been effected, shipments would not have been rejected, and shipper would have received full contract sale price. The damages therefore resulted from misrouting, and are measured by difference between contract of sale and amount which shipper actually received after deduction of freight charges. G. W. Harp. v. S. A. L., 122 I. C. C. 585.

§11. Reparation in General.

See Reparation.

(a) Prior to movement carrier's agent quoted complainant a rate but said nothing as to routing. Upon delivery of potatoes for shipment by complainant's employee, the agent inadvertently inserted in bill of lading a route taking a higher rate than that quoted. Employee thinking they were receipts signed complainant's name to bills of lading not knowing they purported to route shipments and they moved in accordance with billing and applicable rates charged. HELD: Shipments were misrouted. While generally speaking it is carrier's duty to follow routing instructions of shipper, here routing shown was result of an error on part of carrier's agent whose intent was to route shipments via route taking lower rate. Routing shown in bill of lading, rather than signing and acceptance thereof, was, therefore, the proximate cause of damage. Reparation awarded. Hubbard v. O. S. L., 118 I. C. C. 202.

(b) Routing instructions on apples from Chelan, Wash., to Chicago, diverted to Newark, N. J., specified Erie delivery. Diverting carrier's agent erroneously routed shipments for Lehigh Valley delivery. Upon complaint seeking damages for cartage, labor, and loss of sales value of part of shipments, containers of which were said to have been broken and contents damaged and frozen in transit, HELD: While shipments were misrouted, damages claimed were not shown to have been occasioned thereby. No

claim was made that cartage would not have been necessary had Erie delivery been effected or whether cartage charge would have been greater or less than that paid for cartage from Lehigh Valley, nor was evidence introduced to show that containers were broken or contents frozen while in transit. Moreover, all facts on complainant's behalf were sworn to by his attorney who had no actual knowledge of any of the transactions. Horel v. G. N., 120 I. C. C. 125.

(c) Complainant alleged the failure of the Georgia Northern correctly to bill a carload of watermelons from Pritchett, Ga., to Cincinnati, O., violated section 15 and caused delay in transit whereby the shipment arrived in a deteriorated condition and on a declining market. Reparation is sought to the difference between the alleged market value of the car if properly billed and the actual selling price. Shipment was delivered on July 12, 1924, with shipping instructions showing Cincinnati as the destination, L. & N. as delivering carrier. The initial line waybilled the shipment in accordance with instructions except J. G. McPhaul Co. was shown as the consignee instead of the correct name. The shipment arrived July 15 at Latonia, Ky., which is the hold yard of the L. & N. at Cincinnati for freight waybilled to unknown consignees. The agent of the L. & N. telegraphed the initial line on the date of arrival inquiring as to the correct consignee. Upon receipt of advice and placement instructions from the consignee on July 16 the car was placed at East End Yard, Cincinnati, July 17, but due to the accumulation of 126 cars of melons in the yard at that time the car could not be placed for unloading until July 17, car being unloaded July 18. The error in billing on the part of the initial carrier is admitted, but complainant has failed to establish on this record that that error was the proximate cause of the alleged damage. HELD, complainant has not shown that the error of the initial carrier in failing strictly to observe the shipping instructions was the proximate cause of the alleged damage, complaint dismissed. Pearce v. G. N. Ry., 129 I. C. C. 253.

(d) Complainant alleged that the commodity rate charged on 17 cars of stock cattle shipped on April 26, 1923, from New Castle, Tex., to Grand Summit, Kas., was unreasonable, inapplicable and that shipments were misrouted. The single bill of lading contained no routing instructions. Shipments moved W. F. & S. to Wichita Falls, Tex., M. K. T. to Woodward, Okla., and Santa Fe beyond, joint commodity rate $101.50. Complainant contends that the shipments should have been routed over W. F. & S. to Wichita Falls, M. K. T. to Gainesville, Tex., and G. C. & S. F. and Santa Fe beyond, distance 384 miles, rate $67. The line haul charges over the route claimed are less than over route of movement. However, the record contains no showing that the route claimed was a reasonable, available one for the transportation of livestock. Defendants maintain that the feeding and other charges in connection with that route would have resulted in aggregate charges much greater than those collected. In the absence of proof that the total charges applicable over route of movement exceeded those over the route claimed, the allegation of misrouting has not been sustained. HELD: Rate charged applicable, not unreasonable and shipments not misrouted, complaint dismissed. Live Stock Freight Bureau v. A., T. & S. F. Ry., 129 I. C. C. 721.

(e) Bill of lading covering shipment of peanuts from Samson, Ala., to Camden, N. J., showing routing "C of Ga—S A L—P & N" but no rate, moved C. of Ga., S. A. L. to Richmond, Va., Richmond, Fredericksburg & Potomac Yard, Va., and Pennsylvania beyond. Shipment was refused at destination and subsequently sold at auction. Upon contention that "P & N" was the Philadelphia and Norfolk Steamship line; that shipment was therefore misrouted and carrier liable for difference between contract price and auction price of peanuts, FOUND: As "P & N" are also initials of Piedmont & Northern which forms a workable route with other named carriers, routing specified did not put carriers on notice that rail-and-water route was desired. Therefore, while shipment was misrouted, record fails to show that complainant was damaged thereby. See Conf. Ruling 190. South Alabama Grocery Co. v. C. of G. 129 I. C. C. 327.

(f) Upon claim for reparation complainant relied upon decisions in 68 I. C. C. 559 and 74 I. C. C. 288, to effect that in absence of routing directions in tariff, a joint rate is applicable over any route over lines of carriers parties to tariff, and if carriers desire to restrict application of such ates to particular routes

they should do so in clear and unequivocal language. FOUND: That question presented in cases cited was with respect to applicability under an intermediate clause and not the reasonableness of rates under rule 77. Woodward Auto Co. v. C., M. & St. P., 129 I. C. C. 613, 615.

§14. Procedure.

See Procedure Before Commission.

(a) Complainant attacked combination rate of $2.80 charged on a car of eggs shipped August 11, 1919 from Fremont, Neb., to Phoenix, Ariz., as inapplicable to extent it exceeded $2.29. The routing instructions inserted in the bill of lading read "UP care Santa Fe, Reice Grand Island, No. Platte, Denver, La Junta, Albuquerque and Winslow." Shipment moved through the icing points named over the U. P. to Denver, Colo., thence Santa Fe, charged 87.5 c. to Denver and $1.925 beyond. A joint rate of $2.29 was published but restricted to routing beyond Denver over the U. P. Complainant insists that the initial carrier could have routed the shipment through certain junctions in Kansas and a lower rate than that over the route of movement would have been applicable; also that complainant was not required to show on the bill of lading the points at which the carriers should re-ice the shipment, and, therefore, the carriers were not required to follow the icing instructions. These contentions are not germane to the issue; no misrouting is alleged. Any allegation with respect to misrouting is barred. HELD, rate charged applicable, complaint dismissed. Armour & Co. v. Director General, 113 I. C. C. 1.

(b) A complaint which merely alleges that rate charged on a shipment was in excess of rate applicable does not involve an issue of misrouting, and unless an allegation with respect to the latter is brought in issue within statutory period of limitation provided by the act, it can not be considered. See also 87 I. C. C. 130. Armour & Co. v. Director General, 113 I. C. C. 1.

(c) An allegation of overcharges does not embrace an issue of misrouting damages for the latter not being "overcharges above the legal tariff charges." See also 87 I. C. C. 130. Tidal Osage Oil Co. v. Director General, 115 I. C. C. 237, 238.

§15. Statute Of Limitations.

See Statute of Limitations.

(a) Complaint alleging misrouting of shipments moving during Federal control was filed more than one year, but within two years and six months, after termination of Federal control. Shipments were in fact misrouted, and relying upon Conf. Ruling 214 (c) and various formal decisions holding that it is duty of initial carrier to forward unrouted shipments over cheapest available reasonable route, complainant contended that damages resulting from misrouting constitute such overcharges as are contemplated by section 206 (c) of transportation act, 1920, as amended, and that complaint, therefore, is not barred. HELD: Neither conference ruling nor cited cases support complainant's contention, and following 87 I. C. C. 130 damages due to misrouting are not "overcharges above the legal tariff charges" as contemplated by the amendment, Armour & Co. v. Director General, 107 I. C. C. 310.

SAFETY APPLIANCE ACTS

See Automatic Train Control; Cars and Car Supply §7¾; Employers' Liability Acts; Personal Injuries.

(a) After inspection and test of automatic train-stop system of National Safety Appliance Co., of the intermittent-magnetic induction type with forestalling feature, its installation on the following named lines found to meet requirements of commission's specifications and order in Automatic Train-Control Devices, 69 I. C. C. 258. Additional requirements with respect to certain apparatus and operations prescribed in order that greatest degree of safety may be insured: Galveston, Harrisburg & San Antonio Ry. Co. (Houston Division), 104 I. C. C. 549. St. Louis-San Francisco Ry. Co. (Southwestern Division), 104 I. C. C. 565. Southern Pacific Co., (Western Division of Pacific system), 104 I. C. C. 558.

(b) After inspection and test of the automatic train-control system (three speed) of the continuous-induction type, of the Union Switch & Signal Co., its installation on the Shenandoah division of Norfolk & Western Ry. Co., found to meet requirements of commission's spe-

cifications and order in Automatic Train-Control Devices, 69 I. C. C. 258. Additional requirements with respect to certain apparatus and operations prescribed in order that the greatest degree of safety may be insured. Automatic Train-Control Devices, 107 I. C. C. 65.

(c) After inspection and test of the automatic train-stop system of the intermittent magnetic-induction type with forestalling feature, of the Sprague Safety Control & Signal Corp., its installation on the following-named lines found to meet requirements of the commission's specifications and order in Automatic Train-Control Devices, 69 I. C. C. 258. Additional requirements with respect to certain apparatus and operations prescribed in order that the greatest degree of safety may be insured: Chicago, Burlington & Quincy R. R. Co. (Creston Division), 107 I. C. C. 367. Great Northern Ry Co. (Minot Division), 107 I. C. C. 385.

(d) Requirement in reports upon installations of automatic train-control or speed-control devices upon the Oregon-Washington R. R. & Navigation lines, 101 I. C. C. 487, and upon Norfolk & Western Ry., 107 I. C. C. 65, that provision should be made to require acknowledgement by the enginemen of succeeding stop signals, eliminated. Automatic Train-Control Devices, 109 I. C. C. 66.

(e) After inspection and test of automatic train-stop or train-control systems of Union Switch & Signal Co. of the two and three speed continuous-induction types, and of the National Safety Appliance Co. of the intermittent magnetic-induction type without forestalling feature, their installation on following-named lines found to meet requirements of the commission's specifications and order in Automatic Train-Control Devices, 69 I. C. C. 258. Additional requirements with respect to certain apparatus and operations prescribed in order that greatest degree of safety may be insured: Atlantic City R. R. of Reading Co (three speed continuous-induction type), 109 I. C. C. 667. Central R. R. Co. of N. J., New Jersey Southern division (three-speed continuous-induction type), 109 I. C. C. 680. Missouri Pacific R. R., Central Kansas division (intermittent magnetic-induction type without forestalling feature), 109 I. C. C. 199. Union Pacific R. R., Wyoming division (Two-speed continuous-induction type), 109 I. C. C. 147.

(f) In 69 I. C. C. 258 commission required 49 carriers by railroad to install automatic train-stop or train-control devices. This report is made after inspection and test of the two speed continuous-induction train-control system of the Union Switch & Signal Company on the Knoxville division of the Louisville & Nashville. It extends from Corbin, Ky., to Etowah, Tenn., distance 162 miles, single track, 47 locomotives being equipped. HELD: Device approved subject to recommendations made. Automatic Train-control devices, 112 I. C. C. 501.

(g) This report made after inspection and test of the automatic train-stop (automatic) system of the General Railway Signal Company on the first division of the Atlantic Coast Line R. R. Co. Previous report 69 I. C. C. 258. The device was first installed on the A. C. L., in Dec. 1924, on a 24-mile double track section, between Rocky Mount and Ruggles, N. C., with 10 equipped locomotives. In March 1925, a preliminary inspection of this installation was made. The installation inspected and tested was completed on Oct. 1, 1925. HELD: Signal approved, subject to compliance by A. C. L., with certain recommendations. Automatic Train control devices, 113 I. C. C. 245.

(h) This report is made after inspection and test of the automatic train-stop system of the Union Switch & Signal Company on the river division of the C. M. & St. P. Ry. It was first placed in service in January 1925, on a preliminary section of the C. M. & St. P., between Bridge Switch, Minn., and Winona, Minn., a distance of 21 miles, double track, with 10 equipped locomotives. The installation inspected and tested was placed in service March 2, 1926. It extends from a point 5,800 feet west of Bridge Switch, Minn., to the west end of Hastings Yard, Minn., a distance of 108.1 miles, double tracked with 58 equipped locomotives. HELD: Inspection satisfactory except certain modifications required. Automatic train-control devices, 113 I. C. C. 323.

(i) This report is made after inspection and test of the automatic train-stop system of the Sprague Safety Control & Signal Corporation on the first subdivision of the Yellowstone division of the Northern Pacific. This device was first placed in service on the N. P., between Mandan and Judson, N. D., a distance of 21 miles, with 6 equipped locomotives.

The installation inspected and tested was completed in Sept. 1925. It extends from Mandan to Dickinson, N. D., a distance of 109.6 miles, single track. There are 34 equipped locomotives. HELD: Installation satisfactory with certain modifications and recommendations. Automatic Train-control devices, 113 I. C. C. 359

(j) Upon complaint alleging that New York Central R. R., in awarding its contract for installation of an automatic train-stop system upon its line to the General Railway Signal Co., subjects complainant, Sprague Safety Control & Signal Corp., to undue prejudice in violation of section 3 of the act, HELD: That section of the act does not apply to making of contracts by a carrier for purchase of equipment, and fact that equipment is apparatus for automatic train-stop or train-control devices which Commission has authority, under section 26 of the act, to require a carrier to install in accordance with prescribed specifications and requirements, does not extend applicability of prohibitions of section 3 to matters connected with selection or purchase of such equipment. Automatic Train-Control Devices, 112 I. C. C. 259, 260.

(k) Upon complaint alleging that the New York Central R. R., by adopting the automatic train-control device of the General Railway Signal Corp., has violated provisions of section 1 of the act relating to furnishing of safe and adequate car service, HELD: Matter of automatic train-stop or train-control devices is controlled by the specific provisions of section 26 of the act and question of the safety of such devices is governed by specifications and requirements of commission's order thereunder, and not by general car service provisions of section 1. Automatic Train-Control Devices, 112 I. C. C. 259, 260, 261.

(l) While a failure to install an automatic train-stop or train-control device would not constitute a violation of section 1 of the act, a failure to install such a device as required by Commission's orders under section 26 would constitute a violation of such orders and subject carrier to penalties provided for by the latter section. The safety and adequacy of installation of such devices are governed by the specifications and requirements of those orders, which furnish the criteria by which such installation may be judged. Automatic Train-Control Devices, 112 I. C. C. 259, 261.

(m) Upon complaint alleging that section 26 of the act and commission's specifications and requirements are being violated by New York Central R. R., because of latter's failure to include speed control in its installation of an automatic train-stop system and its employment of a forestalling device in connection with that system, HELD: Allegation has no basis under provisions of the commission's orders. Selections and installation of a plain automatic-stop device without speed control is permissible and always has been. Carriers are given a choice as between a plain automatic stop and an automatic stop with automatic speed control and these features may be included separately or in combination. The use of a forestalling feature is also permitted, and there are no restrictions, insofar as traffic or operating conditions are concerned; so that a carrier whose line is one of heavy traffic density may install a device without speed control. Automatic Train Control Devices, 112 I. C. C. 259, 261, 262.

(n) Method of braking employed in automatic train-stop and train-control system of the intermittent inductive type of the General Railway Signal Co., found not to impair efficiency of the air-brake system. Automatic Train Control Devices, 112 I. C. C. 259, 262, 263.

(o) Carriers are best informed as to their own operating conditions, the effect of speed, weather, etc., and must exercise their own judgment as to whether automatic train-stop or train-control devices selected by them will meet requirements when installed and in operation. Automatic Train Control Devices, 112 I. C. C. 259, 263.

(p) The extent to which clearances already established must be changed in connection with installation of automatic train-stop or train-control devices and cost of such changes are important factors to be considered by a carrier before selecting a device. Automatic Train Control Devices, 112 I. C. C. 259, 264.

(q) Upon contention that automatic train-stop or train-control specifications of commission which provide that "The apparatus shall be so constructed as to conform to established clearances for equipment and structures" means that train-control equipment installed on

tracks and locomotives shall not encroach upon standard clearances established and approved for rolling stock and tracks, HELD: Commission's requirements do not set up any standard clearances, that being left to judgment of operating officials of carriers. Although requirement mentions established clearances it does not mean that such clearances, may not be changed in connection with installation of an automatic train-control device. All that it means is that, whatever clearances are established, train-control devices shall conform to them. Automatic Train Control Devices, 112 I. C. C. 259, 263, 264.

(r) It can not be found that the automatic train-stop or train-control system of the intermittent inductive type of the General Railway Signal Co. does not comply with commission's requirements with respect to clearances and operation. These may be demonstrated only after the device is installed and in operation. The same is true with respect to requirement that apparatus shall be so constructed that it will, so far as possible, perform its intended function if a break, cross, or ground occurs in electric circuits. Automatic Train Control Devices, 112 I. C. C. 259, 263, 266.

(s) After inspection and test of automatic train-control (two-speed continuous-induction type) of the Union Switch & Signal Co., its installation on Knoxville division of the L. & N. R. R. found to meet requirements of Commission's specifications and order in Automatic Train-Control Devices, 69 I. C. C. 258. Additional requirements with respect to certain apparatus and operations prescribed in order to insure the greatest degree of safety. Automatic Train-Control Devices, 112 I. C. C. 501.

(t) After inspection and test of the following train-stop or train-control systems, their installation on the following-named lines found to meet requirements of the Commission's specifications and order in Automatic Train-Control Devices, 69 I. C. C. 258. Additional requirements with respect to certain apparatus and operations prescribed in order that greatest degree of safety may be insured. Atchison, Topeka & Santa Fe Ry. Co., Illinois Division (Three speed continuous-induction type of the Union Switch & Signal Co.), 113 I. C. C. 561. Atlantic Coast Line R. R. Co., first division (Intermittent induction automanual type, with forestalling feature, of the General Railway Signal Co.), 113 I. C. C. 245. Chicago, Milwaukee & St. Paul Ry. Co., River division (Continuous induction type of the Union Switch & Signal Co.), 113 I. C. C. 323. Northern Pacific Ry. Co., Yellowstone division (Intermittent magnetic-induction type with forestalling feature of the Sprague Safety Control & Signal Corp.), 113 I. C. C. 359.

(u) This report is made after inspection and test of the automatic train control system of the Union Switch & Signal Company on the Illinois division of the Santa Fe. It extends from East Fort Madison, Ill., to Chillicothe, Ill., a distance of 102.17 miles of which 101.8 miles is double track and 0.37 mile single track. There are 87 locomotives equipped with the device. HELD, the system complies with the requirements except certain recommendations as outlined. Automatic Train Control Devices, 113 I. C. C. 561.

(v) Kansas City Southern requested that the effective date of the order in 69 I. C. C. 258, be suspended in so far as applicant is concerned, under further order. The effective date of the order was originally January 1, 1925, but at the request of the applicant for various reasons, it has been postponed until July 1, 1926, with respect to said applicant. HELD: Effective date of the order should be suspended in so far as it applies to the applicant, until further order. Automatic Train Control Devices, 113 I. C. C. 625.

(w) Line of the Kansas City Southern Ry. Co., found to be of such a character and its operating conditions and traffic density such as not to require at present time the installation of automatic train-stop or train-control devices. Accordingly, the commission's order in 69 I. C. C. 258, suspended in so far as that carrier is concerned. Automatic Train-Control Devices, 113 I. C. C. 625.

(x) This report is made after inspection and test of the automatic train stop system of the Union Switch & Signal Company on the Illinois division of the Illinois Central. The installation inspected and tested is an automatic train stop system of the continuous induction

type with forestalling feature and color cab signals but without automatic block signals. It was completed January 21, 1926, and extends from Champaign, Ill., to Branch Junction, Ill., a distance of 121.8 miles, double track, with 56 equipped locomotives. HELD: System approved subject to certain modifications as recommended. Automatic train control devices, 115 I. C. C. 256.

(y) This report is made after inspection and test of the two speed continuous induction train control system of the Union Switch & Signal Company on the Buffalo Division of the Delaware, Lackawanna & Hudson Railroad. The installation inspected and tested was completed on July 1, 1925. It extends from Elmira, N. Y., to East Buffalo, N. Y., a distance of 141 miles of double track. There are 69 equipped locomotives. HELD: Installation approved with certain modifications. Automatic train control devices, 115 I. C. C. 270.

(z) This report is made after inspection and test of the automatic train stop system of the Union Switch & Signal Company on the Waterloo district, Iowa division, of the Illinois Central, installed by that carrier pursuant to the second order entered in this proceeding on January 14, 1924, as modified July 18, 1924, 91 I. C. C. 426. The device under consideration is an automatic train stop system of the continuous induction type with forestalling feature and color light cab signals. The installation inspected and tested was completed and placed in service on February 5, 1926. It extends from West Waterloo, Iowa, to Fort Dodge, Ia., a distance of 97.5 miles, of single track. There are 37 equipped locomotives. HELD: Approved subject to certain modifications. Automatic train control devices, 115 I. C. C. 387.

(aa) This report is made after inspection and test of the automatic train stop system of the General Railway Signal Co. on the Detroit division of the Pere Marquette Ry. The device was first placed in service on the P. M. between Seymour, Mich., and Clarksville, Mich., a distance of 22.82 miles, single track and 0.75 mile double track, with six equipped locomotives. The installation inspected and tested was completed in December, 1925. It extends from Seymour, Mich., to North Lansing, Mich., a distance of 59.2 miles, single track and 1.6 miles, double track. There are 67 locomotives equipped with the device. HELD: Installation approved with modifications. Automatic Train Control Devices, 115 I. C. C. 426.

(bb) This report is made after inspection and test of the automatic train stop system of the General Railway Signal Co. on the Detroit division of the Pere Marquette, installed by that carrier pursuant with 91 I. C. C. 426. The installation inspected and tested was completed in December, 1925. It extends from Lansing, Mich., to Oak Station, Mich., a distance of 74.6 miles, of which 63 miles are single track and 11.6 miles double track. This portion of the Detroit division adjoins that portion of the Detroit division which is equipped with the same type of device under order of June 13, 1922. There are a total of 67 proved with modifications. Automatic locomotives equipped under both orders, which operate on or over both portions of this division. HELD: Installation ap- Train Control Devices, 115 I. C. C. 451.

(cc) This report is made after inspection and test of the automatic train control system of the Union Switch & Signal Company on the third subdivision of the Wyoming division of the Union Pacific. The installation inspected and tested was completed February 1, 1926. It extends from North Platte to Sidney, Neb., a distance of 123 miles of double track. There are 34 locomotives equipped. HELD: Installation found to meet the requirements of the specifications with recommendations. Automatic Train Control Devices, 118 I. C. C. 250.

(dd) This report is made after inspection and test of the automatic train control system of the General Railway Signal Co., on the Iowa division of the Chicago & Northwestern Ry. The device under consideration is an automatic train control system, two speed, of the continuous induction type. The installation inspected and tested was completed and placed in service in December, 1925. It extends from Council Bluffs, Ia., to Boone, Ia., a distance of 149 miles of double track. There are 110 locomotives equipped with the device including two locomotives of the C. St. P. M. & O. which operate in equipped territory between Missouri Valley and Council Bluffs. HELD: Installation found to meet requirements with certain recommendations. Automatic Train Control Devices, 118 I. C. C. 265.

(ee) This report is made after inspection and test of the automatic train stop system of the National Safety Appliance Co. on the Stockton division of the Pacific system of the Southern Pacific. It extends from Tracy, Calif., to Fresno, Calif., 125.4 miles, single track, with 75 equipped locomotives. This installation is a continuation of the system installed between Oakland, Calif., and Tracy, Calif. HELD: Installation approved with modifications. Automatic Train Control Devices, 118 I. C. C. 555.

(ff) This report is made after inspection and test of the automatic train stop system of the General Railway Signal Company on the Charlotte division of the Southern Ry. This device was first installed by the Southern in November, 1924, on a 39.5 mile section on the C. N. O. & T. P. between Ludlow and Williamstown, Ky., with eight locomotives. The installation inspected and tested was completed and placed in service in November, 1925. It extends from Spencer, N. C., to Greenville, S. C., a distance of 152.11 miles of double track, 65 equipped locomotives. HELD: With certain modifications installation approved. Automatic Train Control Devices, 118 I. C. C. 611.

(gg) This report is made after inspection and test of the automatic train stop system of the General Railway Signal Company on the Charlotte division of the Southern. The installation inspected and tested was completed in November, 1925. It extends from Greenville, S. C., to Howell, Ga., a distance of 151.91 miles of double track, 39 equipped locomotives. HELD: With certain modifications installation approved. Automatic Train Control Devices, 118 I. C. C. 622.

(hh) After inspection and test of the following train-stop or train-control systems, their installation on the following named lines found to meet requirements of commission's specifications and orders in Automatic Train Control Devices, 69 I. C. C. 258; 91 I. C. C. 426. Additional requirements with respect to certain apparatus and operations prescribed in order that greatest degree of safety may be insured: Delaware, Lackawanna & Western R. R., Buffalo division (Two-speed continuous-induction type of the Union Switch & Signal Co.) 115 I. C. C. 270. Illinois Central R. R. Co., Illinois and Iowa divisions (Continuous-induction type with forestalling feature and color-light cab signals of the Union Switch & Signal Co.) 115 I. C. C. 265, 387. Pere Marquette Ry. Co., Detroit division (Intermittent-induction type with forestalling feature of the General Railway Signal Co.), 115 I. C. C. 426, 451.

(ii) After inspection and test of the following train-stop or train-control systems, their installation on the following named lines found to meet requirements of the commission's specifications and orders in Automatic Train Control Devices, 69 I. C. C. 258; 91 I. C. C. 426. Additional requirements with respect to certain apparatus and operations prescribed in order that greatest degree of safety may be insured: Chicago & North Western Ry. Co., Iowa division (Two-speed continuous-induction type of the General Railway Signal Co.), 118 I. C. C. 265. Southern Ry. Co., Charlotte division between Greenville, S. C. and Howell (Atlanta), Ga. (Intermittent-induction type, with forestalling feature of the General Railway Signal Co.), 118 I. C. C. 622. Southern Ry. Co., Charlotte division between Spencer, N. C., and Greenville, S. C. (Intermittent-induction type, with forestalling feature of the General Railway Signal Co.), 118 I. C. C. 611. Southern Pacific Co., Stockton division of the Pacific system (Intermittent-magnetic-induction type with forestalling feature of the National Safety Appliance Co.), 118 I. C. C. 555. Union Pacific R. R. Co., third subdivision of the Wyoming division (Continuous-induction type, two-speed, of the Union Switch & Signal Co.), 118 I. C. C. 250.

(jj) This report is made after inspection and test of the automatic train stop system of the Sprague Safety Control & Signal Corporation on the second subdivision of the Minot division of the Great Northern. It extends from Minot, N. D., to New Rockford, N. D., a distance of 108.91 miles with 24 equipped locomotives. This installation is a continuation of the system installed between Minot, N. D., and Williston, N. D. HELD, with certain modifications installation approved. Automatic Train Control Devices, 120 I. C. C. 193.

(kk) This report is made after inspection and test of the automatic train stop system of the Sprague Safety Control & Signal Co. on the second subdivision of the Yellowstone division of the Northern Pacific. It extends from Dickinson, N. D., to Glendive, Mont., a dis-

tance of 106 miles, single track. HELD, with certain modifications installation approved. Automatic Train Control Devices, 120 I. C. C. 199.

(ll) This report is made after inspection and test of the automatic train stop system of the Sprague Safety Control & Signal Corporation on the Omaha division of the Burlington, extending from Pacific Jct., Ia., to M. P. crossing at Lincoln, Neb., distance 81.58 miles, of which 25.81 miles are double track and 55.77 miles single track. HELD, installation approved with minor changes. Automatic Train Control Devices, 120 I. C. C. 475.

(mm) This report is made after inspection and test of the automatic train stop system of the General Railway Signal Company on the Champlain division of the Delaware & Hudson. The installation inspected and tested was completed in June, 1926, and extends from Rouses Point, N. Y., to Whitehall, N. Y., a distance of 111.65 miles of single track and 4.6 miles of double track. There are 66 locomotives equipped. HELD, with certain modifications device approved. Automatic Train Control Devices, 120 I. C. C. 624.

(nn) This report is made after inspection and test of the automatic train stop (automanual) system of the General Railway Signal Company on the Baltimore division (west end) of the Baltimore & Ohio. It extends from Bailey, Baltimore, Md., to F tower at Washington, D. C., a distance of 36.6 miles, of which 34.4 miles are double tracked and 2.2 miles four tracked. There are 130 locomotives equipped with the device. HELD, with certain modifications device approved. Automatic Train Control Device, 120 I. C. C. 635.

(oo) After inspection and test of following train-stop or train-control systems, their installation on following-named lines found to meet requirements of commission's specifications and orders in Automatic Train-Control Devices, 69 I. C. C. 258; 91 I. C. C. 426. Additional requirements with respect to certain apparatus and operations prescribed in order that the greatest degree of safety may be insured: Baltimore & Ohio R. R. Co., Baltimore (West end) division (Intermittent-induction automanual type with forestalling feature of the General Railway Signal Co.), 120 I. C. C. 635. Chicago, Burlington & Quincy R. R. Co., Omaha division (Intermittent magnetic-induction type with forestalling feature of the Sprague Safety Control & Signal Corp.), 120 I. C. C. 475. Delaware & Hudson Co., Champlain division (Intermagnetic-induction type with forestalling feature of the Sprague Safety Control Co.), 120 I. C. C. 624. Great Northern Ry. Co., Minot division (Intermittent magnetic-induction type with forestalling feature of the Sprague Safety Control & Signal Corp.), 120 I. C. C. 193. Northern Pacific Ry. Co., second subdivision of Yellowstone division (Intermittent magnetic-induction type with forestalling feature of the Sprague Safety Control & Signal Corp.), 120 I. C. C. 199.

(pp) This report is made after inspection and test of the automatic train stop (automanual) system of the General Railway Signal Company on portions of the New Jersey & Lehigh and New York divisions of the Lehigh Valley system. This device was first installed on a section of the L. V. R. R. between Phillipsburg, N. J., and Flemington, N. J., with 10 equipped locomotives. The installation inspected and tested was completed in August 1926. It extends from Easton, Pa., to Newark, N. J., a distance of 65.5 miles of which 0.92 miles consists of single track, 32.34 miles of two tracks, 19.94 miles of three tracks and 12.40 miles of four tracks, a total of 175.02 miles. HELD, with certain modifications installation approved. Automatic Train Control Devices, 122 I. C. C. 45.

(qq) This report is made after inspection and test of the automatic train stop system of the Sprague Safety Control & Signal Corporation on the Northern division of the Chicago Indianapolis & Louisville Ry. The device was first placed in service on the C. I. & L. between Shelby and Rensselaer, Ind., a distance of 20.2 miles, with six equipped locomotives. The installation inspected and tested was completed in July 1926 and extends from South Hammond, Ind., to the north end of Monon, Ind., a distance of 63.6 miles of single track. There are 32 locomotives equipped with the device. HELD, with certain modifications installation approved. Automatic Train Control Devices, 122 I. C. C. 587.

(rr) This report is made after inspection and test of the automatic train stop system of the Union Switch & Signal Company on the Chicago division of the New York Chicago & St. Louis R. R. The device was first installed by the N. Y. C. & St. L. in July 1925 on a 20.2 mile sec-

tion consisting of 4 miles of double track and 16 miles of single track, between Fort Wayne, Ind., and Arnolds, Ind. There were six locomotives equipped with the device in Oct. 1925. The installation inspected and tested was placed in service in August 1926. It extends from West Fort Wayne, Ind., to Stony Island, Ill., a distance of 139 miles, of which 123.1 miles is single track and 15.9 miles double track. There are 53 locomotives equipped with the device. HELD, with certain modifications, device approved. Automatic Train Control Devices, 122 I. C. C. 597.

(ss) This report is made after inspection and test of the automatic train stop system of the Miller Train Control Corporation on the Terre Haute district of the Chicago division of the C. & E. I. Ry. Original report 91 I. C. C. 426. It extends from Danville, Ill., to Clinton, Ind., a distance of 35.5 miles of double track. There are 33 locomotives equipped with the device. HELD, with certain modifications suggested, system approved. Automatic Train Control Devices, 123 I. C. C. 617.

(tt) After inspection and test of the following train-stop or train-control systems, their installation on the following-named lines found to meet requirements of the commission's specifications and orders in Automatic Train Control Devices, 69 I. C. C. 258. Additional requirements with respect to certain apparatus and operations prescribed in order that the greatest degree of safety may be insured: Chicago, Indianapolis & Louisville Ry., Northern division (Intermittent magnetic-induction type with forestalling feature of the Sprague Safety Control & Signal Corp.), 122 I. C. C. 587. Lehigh Valley R. R. Co., New Jersey & Lehigh and New York division (Intermittent-induction type, automanual, with forestalling feature of the General Ry. Signal Co.), 122 I. C. C. 45. New York, Chicago & St. Louis R. R. Co., Chicago division (Intermittent-induction type, with forestalling feature of the Union Switch & Signal Co.), 122 I. C. C. 597.

(uu) After inspection and test of the automatic train-stop or train-control system of the intermittent electrical contact type with forestalling feature of the Miller Train Control Corp., its installation on the Terre Haute District of the Chicago division of the Chicago & Eastern Illinois Ry., found to meet requirements of the commission's specifications and order in 91 I. C. C. 426. Additional requirements with respect to certain apparatus and operations prescribed in order that the greatest degree of safety may be insured. Automatic Train Control Devices, 123 I. C. C. 617.

(vv) This report is made after inspection and test of the automatic train stop system of the General Railway Signal Company on the first district of the Cincinnati, New Orleans and Texas Pacific Ry. This device was first installed by the C. N. O. & T. P. in Nov. 1924 on a 35 mile section between Ludlow and Williamstown, Ky., with eight locomotives. The installation inspected and tested was completed and placed in service in Feb. 1926. It extends from Ludlow, Ky., to Somerset, Ky., a distance of 157 miles, of which 79 miles is double track and 78 miles single track. HELD, with certain modifications, device approved. Automatic Train Control Devices, 126 I. C. C. 186.

(ww) This report is made after inspection and test of the automatic train stop system of the Union Switch & Signal Company on portions of the Richmond and Clifton Forge divisions of the Chespeake & Ohio. The installation inspected and tested was placed in service in October, 1926. It extends from Orange, Va., to Staunton, Va., a distance of 70 miles of single track. There are 60 locomotives equipped with the device. HELD, with certain modifications device approved. Automatic Train Control Devices, 126 I. C. C. 217.

(xx) This report is made after inspection and test of the automatic train stop system of the Union Switch & Signal Company on a portion of the Clifton Forge division of the C. & O. It extends from Staunton, Va., to Clifton Forge, Va., distance of 55 miles of single track. This installation is a continuation of the system installed between Orange, Va., and Staunton, Va., under the order of June 13, 1922. The 60 locomotives equipped with the train stop device operate over this division. HELD, with modifications, device approved. Automatic train control devices, 126 I. C. C. 229.

(yy) This report is made after inspection and test of the automatic train stop system of the General Railway Signal Co., on portions of the Delaware and New York divisions of the Erie. This device under consideration was first installed on a section of the Erie between Lordville and Deposit, N. Y., a distance

of 21 miles with eight equipped locomotives. It extends from Port Jervis, N. Y., to Susquehanna, N. Y., a distance of 104 miles of double track. There are 94 locomotives equipped with the device. HELD, with certain modifications device approved. Automatic Train Control devices, 126 I. C. C. 231.

(zz) This report is made after inspection and test of the automatic train stop system of the General Railway Signal Company on the second district of the C. N. O. & T. P. The installation inspected and tests were completed in June 1926. It extends from Somerset, Ky., to Citico Jct, Chattanooga Tenn., a distance of 175 miles, of which 84 miles is double track and 91 miles single track. There are 75 locomotives equipped with the device. HELD, with certain modifications device approved. Automatic Train Control devices, 126 I. C. C. 290.

(3a) This report is made after inspection and test of the automatic train stop system of the Union Switch & Signal Company on the Fitchburg-Berkshire division of the Boston and Maine. The installation inspected and tested was completed and placed in service August 28, 1926. It extends from the west end of West Cambridge tower to the west end of East Deerfield Yard, Mass., a distance of 99.5 miles, of which 94.6 miles is two track and 4.9 miles is three track, with 130 equipped locomotives and two gas electric cars. HELD, with certain modifications device approved. Automatic Train Control devices, 126 I. C. C. 392.

(3b) After inspection and test of the following train-stop or train-control systems, their installation on the following named lines FOUND to meet requirements of the commission's specifications and orders in Automatic Train-Control Devices, 69 I. C. C. 258; 91 I. C. C. 426. Additional requirements with respect to certain apparatus and operations prescribed in order that the greatest degree of safety may be insured: Boston & Maine R. R., Fitchburg-Berkshire division (Continuous-induction type of the Union Switch & Signal Co.) 126 I. C. C. 392. Chesapeake & Ohio Ry., Richmond and Clifton Forge Divisions (Intermittent-induction type, with forestalling feature of Union Switch & Signal Co.), 126 I. C. C. 217, 229. Cincinnati, New Orleans & Texas Pacific Ry. Co., First and Second Districts, Intermittent-induction, automanual type, with forestalling feature, of the General Railway Signal Co.), 126 I. C. C. 186, 290. Erie R. R., Delaware and New York divisions (Intermittent-induction, auto-manual type, with forestalling feature, of the General Railway Signal Co., 126 I. C. C. 231.

(3c) Safety appliance law, in all cases involving railroads and their employes engaged in interstate commerce, supersedes Texas statute limiting defense of assumed risk as allowed at common law. Chicago R. I. & G. Ry. Co. v. Bernard, (Tex., 1925) 275 S. W. 505.

(3d) After inspection and test of the automatic train-stop of the intermittent-induction (automanual) type, with forestalling feature, of the General Railway Signal Co., its installation on portions of the Mohawk and Syracuse divisions of the New York Central R. R., found to meet requirements of the commission's specifications in 69 I. C. C. 258. Additional requirements with respect to certain apparatus and operations prescribed in order that the greatest degree of safety may be insured. Automatic Train-Control Devices, 128 I. C. C. 662.

(3e) This report is made after inspection and test of the automatic train stop systems of the General Railway Signal Company on portions of the Mohawk and Syracuse divisions of the New York Central Railroad. It extends from Albany, N. Y., to Syracuse, N. Y., a distance of 145.16 miles. There are 476 locomotives equipped with the device. HELD: Installation approved with modifications. Automatic Train-Control Devices, 128 I. C. C. 662.

(3f) This report is made after inspection and test of the automatic train stop system of the Union Switch & Signal Company on the P. & L. E. division of the P. & L. E. R. R. HELD: With certain modifications and recommendations, installation approved. Automatic Train Control Devices, 129 I. C. C. 93.

(3g) This report is made after inspection and test of the automatic train stop system of the General Railway Signal Company on portions of the Cleveland Buffalo divisions, and the Erie division of the N. Y. C. The installation inspected and tested was completed June 18, 1926. It extends from Buffalo, N. Y., to Cleveland, O., a distance of 180.76 miles. HELD: With certain modifications, installation approved. Automatic Train Control Devices, 129 I. C. C. 483.

(3h) This report is made after inspection and test of the automatic train stop system of the General Railway Signal Company on the Albany division of the Boston & Albany R. R. The installation, inspected and tested, was completed and placed in service July 5, 1926. It extends from Rensselaer, N. Y., to Springfield, Mass., a distance of 101.55 miles. HELD: With certain modifications, device approved. Automatic Train Control Devices, 129 I. C. C. 490.

(3i) This report is made after inspection and test of the automatic train stop system of the General Railway Signal Company on the Boston division of the Boston & Albany R. R. The installation inspected and tested was completed and placed in service July 5, 1926. It extends from Springfield, Mass., to Boston, Mass., a distance of 97.21 miles. HELD: With certain modifications, device approved. Automatic Train Control Devices, 129 I. C. C. 537.

(3j) This report is made after inspection and test of the automatic train stop system of the General Railway Signal Company on the Fayetteville district of the Atlantic Coast Line R. R. HELD, device with modifications approved. Automatic Train Control Devices, 129 I. C. C. 700.

(3k) This report is made after inspection and test of the automatic train control device of the Regan Safety Devices Co. on the Iowa division of the Rock Island, installed by that carrier. The installation was completed and placed in operation on July 23, 1927. HELD: With certain modifications, device approved. Automatic Train Control Devices, 132 I. C. C. 141.

(3l) This report is made after inspection of the automatic train stop system of the General Railway Signal Company on portions of the Middle and West divisions of the Michigan Central. Installation inspected and tested, was completed July 18, 1926. It extends from Jackson, Mich., to Niles, Mich., a distance of 116.82 miles. HELD: With certain modification device approved. Automatic Train Control Devices, 132 I. C. C. 155.

(3m) This report is made after inspection and test of the automatic train stop system of the General Railway Signal Company on portions of the Detroit and Middle divisions of the Michigan Central. It extends from West Detroit, Mich., to Jackson, Mich., distance 72.64 miles. HELD: With certain modifications device approved. Automatic Train Control Devices, 132 I. C. C. 176.

(3n) This report is made after inspection and test of the automatic train stop system of the General Railway Signal Company on the West division of the Michigan Central. The installation inspected and tested was completed and placed in service July 22, 1927. It extends from Niles. Mich., to Kensington, Ill., distance 78.47 miles. HELD: With certain modifications, device approved. Automatic Train Control Devices, 132 I. C. C. 244.

(3o) This report is made after inspection and test of the automatic train stop system of the National Safety Appliance Co. on a part of the Southwestern division of the St. Louis San Francisco Ry. The installation inspected and tested was completed and placed in service by sections from August to December, 1926. It extends from Monett, Mo., to Afton. Okla., distance 66.1 miles. HELD: With certain modifications, device approved. Automatic Train Control Devices, 132 I. C. C. 393.

(3p) This report is made after inspection and test of the automatic train stop system of the General Railway Signal Company on a portion of the St. Louis division of the Big Four. It extends from Mattoon, Ill., to Lenox, Ill., a distance of 109.4 miles. There are 15 locomotives and one gas electric passenger car equipped with the device. HELD: With certain modifications, device approved. Automatic Train Control Devices, 132 I. C. C. 633.

(3q) This report is made after inspection and test of the intermittent inductive automanual train stop system, manufactured by the General Railway Signal Company as installed on 4.2 miles of the Knoxville division of the L. & N. between Holton, Tenn., and Lot, Ky., to operate in connection with Southern Railway equipped locomotives which run over this portion of the L. & N. HELD: With certain modifications, device approved. Automatic Train Control Devices, 132 I. C. C. 646.

(3r) This report is made after inspection and test of the automatic train stop system of the Union Switch & Signal Company on the New Orleans & Mobile division of the L. & N., extending from Mobile, Ala., to New Orleans, La., a dis-

tance of 136.2 miles, of which 132 miles is single track and 4.2 miles double track. There are 44 locomotives equipped with the device. HELD: With certain modifications, device approved. Automatic Train Control Devices, 132 I. C. C. 649.

(3s) This report is made after inspection and test of the automatic train stop system of the General Railway Signal Company on a portion of the St. Louis division of the Big Four Ry. It extends from Mount Jackson (Indianapolis) Ind., to Mattoon, Ill., a distance of 125.7 miles. There are 74 locomotives equipped with the device. HELD: With certain modifications device approved. Automatic Train Control Devices, 132 I. C. C. 731.

(3t) After inspection and test of the following train-stop or train-control systems, their installation on the following-named lines found to meet the requirements of commission's specifications and orders in Automatic Train Control Devices, 69 I. C. C. 426. Additional requirements with respect to certain apparatus and operations prescribed in order that greatest degree of safety may be insured:

Atlantic Coast Line R. R. Co., Fayetteville district, first division (Intermittent-induction (automanual) type, wth forestalling feature of the General Railway Signal Co., 129 I. C. C. 700.

Boston & Albany R. R. (N. Y. C. R. R. Co., lessee):

Albany division (Intermittent induction (automanual) type, with forestalling feature of the General Railway Signal Co.) 129 I. C. C. 490.

Boston division (Intermittent-induction (automanual) type, with forestalling feature of the General Railway Signal Co.), 129 I. C. C. 537.

New York Central R. R., Cleveland and Buffalo divisions and the Erie division (Intermittent-induction (automanual) type, with forestalling feature of the General Railway Signal Co.), 129 I. C. C. 483. Pittsburgh & Lake Erie R. R., Pittsburgh & Lake Erie division (Intermittent-induction type, with forestalling feature of the Union Switch & Signal Co.), 129 I. C. C. 93.

SALE OF FREIGHT

See Freight Charges.

(a) That carrier notified shipper that, unless disposition orders were received, refused merchandise would be sold at public auction to highest bidder without further notice, HELD not a sufficient act of dominion, inconsistent with shipper's title or carrier's right as bailee, to constitute conversion and defeat carrier's claim for storage charges. Erie R. Co. v. E. Kieser & Son, (N. Y., 1925) 211 N. Y. S. 362.

(b) In action to recover shipping and storage charges on refused merchandise, defenses alleging that carrier unreasonably allowed charges to accumulate in excessive amount by failing to deliver merchandise to warehouseman, whose rates were less than carrier's rates, after 60 days, as authorized by Railroad Law, § 68, HELD sufficient on their face, and not objectionable, as attack on reasonableness of carrier's rates without preliminary resort to Interstate Commerce Commission. Erie R. Co. v. F. Kieser & Son, (N. Y., 1925) 211 N. Y. S. 362.

SEASON RATES

See Reasonableness of Rates §35.

SHERMAN ACT

See Anti-Trust Act; Evidence §10.

SIDE TRACKS AND SPUR TRACKS

See Switch Tracks and Switching §11; Transportation §5.

(a) Placement tracks, from standpoint of tariff description, are either public or private; there is no middle ground. A plug track used for inspection of hay and leased to a hay exchange for that purpose could not be described as a public delivery track on which any or all shippers could receive or ship any or all freight. Consequently it falls into the general category of private tracks. Brown & Co. v. E. R. R., 109 I. C. C. 109, 111.

(b) Rate on lumber from Millville Junction, Fla., to Decatur, Ga., when consigned to industries having private sidings lower than on like traffic consigned to general public, found unreasonable. Watters-Tonge Lumber Co. v. A. & St. A. B., 109 I. C. C. 598.

(c) The commission does not approve the practice of some carriers of repaying advancements made by a shipper for the construction of a switch track by making an allowance to him of a definite amount on each carload of freight shipped to or from its manufacturing

plant. Such an arrangement presents too much the appearance of a purchase of property by the carrier with transportation, which is contrary to the principles of the act. Service on K. O. & G. Ry., 118 I. C. C. 412.

(d) A spur may, at the outset, lead only to a single industry or establishment; it may be constructed to furnish an outlet for the products of a particular plant; its cost may be defrayed by those in special need of its service at the time. But none the less, by virtue of the conditions under which it was provided, the spur may constitute at all times a part of the transportation facilities of the carrier which are operated under the obligations of public service and are subject to the regulation of public authority. The uses for which the track desired are not the less public because the motive which dictated its location over this particular land was to reach a private industry, or because the proprietors of that industry contributed in any way to the cost. The branch or spur comes into existence as a public utility and as such is always available as localities change and communities grow. Service on K. O. & G. Ry., 118 I. C. C. 412, 415.

(e) The Federal Transportation Act, Feb. 28, 1920 (U. S. Comp. St. Ann. Supp. 1923, § 10071¼ et seq.), does not affect intrastate commerce only as incidental to the effective regulation of interstate and foreign commerce, and specifically reserves to the state the power to compel the construction of spurs, switching or side tracks, located or to be located wholly within one state, and nothing in said act impairs or affects the right of the state in the exercise of its police power to require just and reasonable freight and passenger service for intrastate business, except so far as such regulations are inconsistent with any lawful order of the Interstate Commerce Commission. Milhollan v. Great Northern Ry. Co., (N. D., 1925) 204 N. W. 994.

SLEEPING CAR COMPANIES

See Passenger Fares and Facilities.

(a) Upon complaint alleging a violation of section 2 of the act, and seeking damages due to unjust discrimination against colored passengers in favor of persons of the white race in furnishing of Pullman accommodations, HELD: That commission had no jurisdiction to award punitive or exemplary damages as here sought. See 112 I. C. C. 239. Undue prejudice in violation of section 3 of the act was not alleged or established by proof, and refusal to sell Pullman accommodations to colored passengers as alleged does not constitute unjust discrimination within the meaning of section 2 of the act, which prohibits charging one person more than another for a like and contemporaneous service. Harden v. Pullman Co., 120 I. C. C. 359.

(b) That Pullman Company is under contract to pay railroads for hauling Pullman cars HELD not to authorize removal of intrastate Pullman surcharge by State Corporation Commission. Atlantic Coast Line R. Co. v. Commonwealth State Corporation Commission, (Va., 1926) 133 S. E. 883.

(c) State Corporation Commission cannot reduce intrastate fares below general level of interstate rates be ordering removal of intrastate Pullman surcharge, as to do so would break down interstate rates established by Interstate Commerce Commission under Interstate Commerce Act, § 15a as added by Act Feb. 28, 1920, § 422 (U. S. Comp. St. Ann. Supp. 1923, § 8583a). Atlantic Coast Line R. Co. v. Commonwealth State Corporation Commission, (Va., 1926) 133 S. E. 883.

(d) Pullman surcharge, authorized by Interstate Commerce Commission under Interstate Commerce Act, § 15a, as added by Act Feb. 28, 1920, § 422 (U. S. Comp. St. Ann. Supp. 1923, § 8583a), HELD not invalid as additional tax exacted by Pullman Company without giving anything of value in return, being collected by it for carriers as part of transportation charge. Atlantic Coast Line R. Co. v. Commonwealth State Corporation Commission, (Va., 1926) 133 S. E. 883.

(e) Intrastate Pullman surcharge, worth $100,000 annually to carriers in state, HELD not removable on ground that loss would be de minimis. Atlantic Coast Line R. Co. v. Commonwealth State Corporation Commission, (Va., 1926) 133 S. E. 883.

(f) That two railroads in state were earning more than return fixed by Interstate Commerce Commission HELD not ground for removal of intrastate Pullman surcharge, in view of Transporta-

tion Act Feb. 28, 1920 (U. S. Comp. St. Ann. Supp. 1923, § 10071¼ et seq.), subjecting excess to prorata recapture for prorata benefit of all roads in same rate group. Atlantic Coast Line R. Co. v. Commonwealth State Corporation Commission, (Va., 1926) 133 S. E. 883.

(g) Where commonwealth offered no evidence and carriers' evidence did not support State Corporation Commission's order eliminating intrastate Pullman surcharge, worth $100,000 annually to carriers, such order is void as taking property without due process. Atlantic Coast Line R. Co. v. Commonwealth State Corporation Commission, (Va., 1926) 133 S. E. 883.

(h) Where, on suggestion of railroad, Interstate Commerce Commission, under Interstate Commerce Act, as amended by Transportation Act, at hearing participated in by railroads and Pullman Company, authorized a 50 per cent. extra charge on sleeping and parlor car passengers for benefit of carriers, and thereafter authorized Pullman Company to publish a surcharge tariff, which it did, HELD, Commission did not exceed its authority in directing schedule to be filled by Pullman Company, which was to collect the tariff, and carrier's concurrence therein, if necessary, could be inferred from the circumstances. Waters v. Pullman Co., 10 Fed. (2d.) 622.

SMELTING-IN-TRANSIT

(a) Failure and refusal of Northern Pacific to establish smelting-in-transit arrangement at East Helena, Mont., on lead ore and concentrates from Kellogg and Bradley, Idaho, on O.-W. R. & N. lines, to eastern destinations, while contemporaneously maintaining such transit arrangements o ore from other points on its own lines in same district, found not discriminatory or unduly prejudcial. Complaint is desirous of smelting all ores it can obtain at its own plant at Bradley, and it is therefore not likely that it would ship ore to East Helena smelter even if transit tariff were extended to Kellogg and Bradley. Nor is it shown that it would be benefited if preference and prejudice were removed by withdrawal of transit arrangements from other points in the district. Bunker Hill & Sullivan M. & C. Co. v. N. P., 129 I. C. C. 242.

§2. In General.

(a) It is a familiar principle of equity jurisprudence that equity courts alone have power to reform contracts, and that this power is exercisable only in the case of fraud or mutual mistake. However, this equitable principle applies only to private contracts, of concern only to parties thereto. But other considerations enter into a contract, impressed with public interest, entered into between carriers or between them and a State or municipality, provisions of which encroach upon latent or exerted authority of Congress under commerce clause of the Constitution. No such contract can be placed beyond reach of a competent exercise of such authority merely by inclusion therein or relation thereto of outside interests not themselves subject to the act, however cautiously power should be exercised in such cases. Nor does fact that franchise grants are among mutual covenants make it immune, as was settled in New York v. U. S., 257 U.

S. 591. M.-K.-T. v. K. C. T., 104 I. C. C. 203, 222.

(b) Contracts entered into by carriers for continuance of a service may not stand in the way if they conflict with enforcement of the act. However, commission should not strike such contracts down without considering whether other means of removing violations of the act may not be adopted which will preserve such contract rights. York Mfrs. Asso. v. P. R. R., 107 I. C. C. 219, 239.

(c) Complainant contracted to manufacture a commodity for a specific sum of money f. o. b. destination. Contract provided that in event of revision of freight rate prior to time materials were shipped, freight allowance was to be adjusted accordingly. Complainant subsequently filed claim for reparation and four years after date of shipment the buyer authorized complainant to act as its agent. Carrier contended that under circumstances reparation could not be awarded. HELD: Neither carrier nor commission had knowledge of sales contract and are therefore not concerned with it. Moreover, the latter must deal with freight charges as such and not as part of the price of a commodity. See 269 U. S. 217. Duluth Boiler Works v. A., T. & S. F., 118 I. C. C. 161, 164.

(d) Arrangement whereby shipper does not pay definite and stated charges to carriers for transportation services rendered, but such compensation is received by carriers under terms of contracts covering rental of track materials, found contrary to principles of the act. See also 12 I. C. C. 503. Service on K., O. & G. Ry., 118 I. C. C. 412, 415.

(e) Contracts between carriers and shippers can not be permitted to defeat requirements of the law. Service on K., O. & G. Ry., 118 I. C. C. 412, 415.

(f) Existence of option contracts on shares of stock of a carrier, issued to shippers and conditioned upon the routing of traffic over the carrier's line, can have little weight in the consideration of whether or not the line of the carrier issuing the option contracts should be eliminated as an intermediate carrier in the routing of transcontinental traffic. The proper remedy for the practice of entering into such contracts, assuming it to be illegal, would be the elimination of the practice rather than of the carrier, in the routes. Restriction in Routing over S. L. & U., 122 I. C. C. 208, 209, 210.

(g) Contracts which violate the provision of a statute are illegal. When there are a number of considerations, and one of them is illegal, the whole agreement is avoided; this doctrine being put upon the ground of the impossibility of saying how much or how little the void portion may have had as an inducement to the contract. Lehigh Valley R. Co. v. United Lead Co., (N. J., 1926) 133 Atl. 290.

(h) Special agreement between carrier and shipper to transport and deliver cattle on certain date is void, unless open to all shippers alike. Willer v. Chicago, M. & St. P. Ry. Co., (S. D., 1926) 210 N. W. 81.

(i) Express contract for carrier's services, made prior to rendition thereof, does not make carrier a private carrier. State v. Washington Tug & Barge Co., (Wash, 1926) 250 Pac. 49.

(j) Where railroad company makes contract giving defendant special freight rates, not filing the schedule with Public Service Commission, as required in Rev. St. 1919, §§ 10438, 10444, HELD, company could not recover such freight charges; the contract being void, as providing for rates different than those on file. St. Louis Southwestern Ry. Co., (Mo., 1925) 275 S. W. 55.

(k) Assuring performance to shipper of a transportation service, which otherwise might not have been promptly rendered, constitutes an undue preference, and contract therefore would be illegal and void. Chesapeake & O. Ry. Co. v. Westinghouse, Church, Kerr & Co., Inc., 46 Sup. Ct. 220. Mellon, Director General of Railroads v. Same, 46 Sup. Ct. 220.

III. LIABILITY.

§4. Damages for Breach.

(1) Jurisdiction of Commission.

See Interstate Commerce Commission I; Jurisdiction of Commission.

(a) Carriers seeking, in effect, revision or reformation of an improvident operating agreement governing joint use and operation of terminal facilities, contend that for commission's jurisdiction to attach it needs only to give effect to section 15a of the act without waiting until a carrier's bankruptcy shall ensue, and

to find as a fact that operating agreement is so burdensome as to result in inefficient and uneconomical operation, to cause misapplication of funds created for an entirely different purpose, and generally to operate to impair carrier's ability to furnish adequate railway service. FOUND: Neither expressly nor by implication does section 15a embrace a direct or indirect revision or reformation of any such contact, nor is the commission able to find the requisite power or authority in any other provision of the act. M.-K.-T. v. K. C. T., 104 I. C. C. 203, 223, 224.

(b) The commission is not bound by terms of contracts entered into between carrier and its tenants in exercising its powers under the act in respect of interchange traffic. Rates of P. & P. U. Ry., 115 I. C. C. 469, 511.

(c) A modification of the terms of a contract between shipper and carrier is clearly beyond the scope of the commission's authority. Transit Privileges on Lumber and Ties, 126 I. C. C. 433, 436.

§ 5. Discrimination Through Contract.

See Discrimination.

(a) It is well settled that contracts between carriers and shippers can not be permitted to defeat the requirements of the law. Service on the K. O. & G. Ry., 118 I. C. C. 412, 415.

IV. ACTIONS TO ENFORCE.

See Action at Law.

§5½. In General.

(a) It is a familiar principle of equity jurisprudence that equity courts alone have power to reform contracts, and that this power is exercisable only in case of fraud of mutual mistake. However, this equitable principle applies only to private contracts, of concern only to parties thereto. But other considerations enter into a contract, impressed with public interest, entered into between carriers or between them and a State or municipality, provisions of which encroach upon latent or exerted authority of Congress under commerce clause of the Constitution. No such contract can be placed beyond the reach of a competent exercise of such authority merely by inclusion therein or relation thereto of outside interest not themselves subject to the act, however cautiously the power should be exercised in such cases. Nor does fact that franchise grants are among mutual covenants make it immune, as was settled in New York v. U. S., 25 U. S. 591. M.-K.-T. v K. C. T., 104 I. C. C. 203, 222.

(b) The court will not aid either party to an illegal contract, but will leave the parties just where it finds them, unless the legal part is separable from the illegal part. Lehigh Valley R. Co. v. United Lead Co., (N. J., 1926) 133 Atl. 290.

V. AS EVIDENCE OF REASONABLE RATES.

§7. In General.

(a) Existence of option contracts on shares of stock of a carrier, issued to shippers and conditioned upon the routing of traffic over the carrier's line, can have little weight in the consideration of whether or not the line of the carrier issuing the option contracts should be eliminated as an intermediate carrier in the routing of transcontinental traffic. The proper remedy for the practice of entering into such contracts, assuming it to be illegal, would be the elimination of the practice rather than of the carrier, in the routes. Restrictions in Routing over S. L. & U., 122 I. C. C. 208, 209, 210.

(b) Agreements between carriers and shippers are of no legal effect in determining applicable rate where such agreements are not published in tariffs on file with the commission. Harlem & Morrisiana Transp. Line v. N. Y., N. H. & H., 123 I. C. C. 480, 483, 484.

SPECIAL RATES AND SERVICES

See Additional Charges and Services; Car Ferry; Cars and Car Supply §9¼, §9½, §9⅝, §9¾, §9⅞, §10, §10½, §11, §11½, §11¾, 11⅞; Expedited Service; Facilities and Privileges §9, §10, §12½; Passenger Fares and Facilities §7¾; Precooling; Protective Service; Reasonableness of Rates §31; Reconsignment: Refrigeration §3; Reparation §14; Stock Yard Companies; Stoppage-In-Transit; Switch Tracks and Switching §5; Transportation §8; Warehouses; Weights and Weighing.

(a) Resort to charges for special services is not proper means of maintaining a parity in freight rates. Refrigeration of L. C. L. Perishable Freight, 107 I. C. C. 179, 181.

(b) The commission has approved separately stated charges for special services rendered by carriers. U. S. Industrial Alcohol Co. v. C. & N. W. Ry., 118 I. C. C. 674, 676.

(c) On evidence that intrastate rates were higher than interstate rate from mines nearby, and put undue burden on complainant's finished product not borne by its competitor, in view of record showing that complainant was independent of shipping points in question for fuel supply, special rates should not be granted, in view of fact that established uniform rates had been set from experience extending over a long time and after many hearings. Atchison T. & S. F. Ry. Co. v. State, (Okla., 1925) 241 Pac. 776.

SPECIAL TRAIN

See Circus Trains; Passenger Fares and Facilities §7¾.

SPOTTING

See Allowances §9 (i).

STATE RATES AND REGULATION

See Accounting §2; Act to Regulate Commerce; Advanced Rates §5 (7¼); Attorney's Fees; Cars and Car Supply §33; Courts III, V; Demurrage §1½; Discrimination §2½, §8 (6), §11, §12½; Equalization of Rates §5, §13 (6), V; Evidence §13 (6), §25; Express Companies §1½; Interstate Commerce I, §2, §4, §5, §10; Interstate Commerce Commission §10, III; Jurisdiction of Commission; Loss and Damage §2, §3, §5; Rail and Water Rates (3d); Reasonableness of Rates §3; Routing and Misrouting §4½, §13; Tariffs §17; Through Routes and Joint Rates §16½, §19, §22; Undercharges §7½; Water Carriers §4½.

(a) Following Conference Ruling of March 13, 1922, and 74 I. C. C. 703 and other cited cases, commission is without authority to award reparation, or to consent to an award of reparation made by a State commission, on intrastate shipments which moved during guaranty period following period of Federal control. Armour & Co. v. G. N. 104 I. C. C. 34.

(b) Fact that a State commission has declared in a proceeding commenced subsequent to termination of so-called guaranty period following Federal control that certain intrastate rates collected during that period were unreasonable, and that commission is asked merely to approve that finding, does not enlarge the limited jurisdiction conferred upon it by section 208 (a) of transportation act, 1920, to review rates reduced by State commissions prior to termination of guaranty period, since commission's direct jurisdiction over reductions in intrastate rates was limited to action taken prior to such period. Under no provisions of transportation act or of interstate commerce act is commission given authority to review and approve a finding of a State commission made subsequent to said period, and to order award of reparation based thereon. Armour & Co. v. G. N., 104 I. C. C. 34, 36.

(c) The commission's authority to pass upon unreasonableness of an intrastate rate and a prayer for reparation based thereon ceased with relinquishment of Federal control. See 74 I. C. C. 703 and other cases cited. Armour & Co. v. G. N., 104 I. C. C. 34, 36.

(d) Except under certain circumstances commission has no jurisdiction to determine reasonableness of rates for transportation wholly within one State. Florence Chamber of Commerce v. C. of G., 104 I. C. C. 373, 374.

(e) Import shipment arrived at East San Pedro, Calif., where it was unloaded from vessel. Complainant, being unable to handle as rapidly as discharged from ship, moved part to San Pedro, where it was stored and subsequently forwarded to Los Angeles. No place of business was maintained by complainant at San Pedro or East San Pedro, nor was any of the shipment sold at, or distributed to consumers from those points FOUND: Shipment constituted import traffic subject to commission's jurisdiction, the foreign character of commerce not being destroyed by temporary storage at San Pedro, there being a continuing intention that transportation should not end at that point but that a further movement beyond—i. e., to Los Angeles—would follow water transportation. Woodhead Lbr. Co. v. P. E., 104 I. C. C. 751.

(f) Intrastate rates on flaxseed from Minnesota points to Minneapolis and Duluth found unduly preferential and prejudicial and unjustly discriminatory against interstate commerce. Nonpreju-

dicial basis of rates prescribed. South Dakota R. R. Commrs. v. C. & N. W., 107 I. C. C. 35.

(g) Intrastate express rates on fresh fruits and vegetables from Western Slope district of Colorado to destinations in that State found not unduly preferential of that district nor unduly prejudicial to Farmington district of New Mexico, and not unjustly discriminatory against interstate commerce. Hunter Bros. Mercantile Co. v. Am. Ry. Ex. Co., 107 I. C. C. 313.

(h) Contention that commission is without jurisdiction over an intrastate movement as part of a through rail-and-water movement from an interstate point of origin where there is no common control, management, or arrangement for continuous carriage or shipment, not sustained. Where there is an original and continuing intention to ship goods from a point in one State to a point in another State the commerce is interstate and its character, as such, is not changed by mere accidents or incidents of billing. See 260 U. S. 166, and 88 I. C. C. 447. United States Finishing Co. v. N. Y., N. H. & H., 107 I. C. C. 412, 413.

(i) To approve a rate to a given destination merely because it would bear a proper relationship to intrastate rate to a nearby destination would be to hold that intrastate rates may control interstate rates. See 38 I. C. C. 742. Coal from Southern Illinois, 107 I. C. C. 415, 419.

(j) Shipper contends that rates maintained over a short intrastate route control, and uphold to an unreasonable level rates via interstate routes, thereby imposing an unjust burden upon interstate commerce, and seeks as a remedy to have commission reduce the intrastate rate, on theory that, this being the basing rate, such action will result in establishment of reasonable and nondiscriminatory interstate rates. HELD: Since no showing made that intrastate commerce is favored or interstate commerce prejudiced by the rate adjustment, and no claim made that intrastate rate fails to produce its just share of revenue as compared with level of interstate rates, no situation is presented which would bring intrastate rates under the commission's jurisdiction. In such case, commission can merely determine whether interstate rates are unreasonable or otherwise in violation of the act. Hammond Iron Works v. P. R. R., 107 I. C. C. 473, 475.

(k) Contention that commission has no jurisdiction to require carriers to increase intrastate rates in order to remove alleged undue prejudice where complainants do not specifically allege a violation of section 13 of the act, not sustained where complaints sufficiently set forth facts putting both defendant carriers and State authorities, as required by the act, upon notice that maintenance of lower intrastate rate as compared with interstate rate is challenged, and where State authorities are also notified of hearing. Four States Grocery Co. v. K. C. S. Ry., 107 I. C. C. 485, 489.

(l) Where law of a State prohibits pooling of revenues by competing rail carriers, and only a small portion of such revenue proposed to be pooled is from intrastate traffic, commission has jurisdiction in the matter under section 5 of the act, paragraph (1) of which gives it authority to enter orders approving certain pooling arrangements, and paragraph (8) of which provides that carriers so affected shall be relieved of all restraints of prohibitions by law, State or Federal, in so far as may be necessary to enable them to do anything authorized or required by such orders. Joint Passenger Train Service, 107 I. C. C. 493, 495.

(m) Upon further hearing, rates on fertilizer from Jacksonville, Fla., to certain destinations within that State, to extent that they are on lower bases than those governing corresponding rates from Blackshear, Ga., to same destinations, found unduly preferential of Jacksonville, unduly prejudicial to Blackshear, and unjustly discriminatory against interstate commerce. Nonprejudicial bases of rates prescribed. Original report, 87 I. C. C. 654. Blackshear Mfg. Co. v. A. C. L., 107 I. C. C. 538.

(n) Cattle moving from Alfred, Tex., to Foraker, Okla., upon arrival were found tick infested, whereupon they were ordered by Federal authority to Oklahoma City for dipping. This accomplished they were reforwarded to Foraker and delivered, carriers assessing an intrastate rate for movement between Foraker and Oklahoma City upon theory that original contract of carriage was completed on first arrival at Foraker and that movement to Oklahoma City and return was an independent intrastate shipment subject to local intrastate

rates for haul each way. FOUND: Since cattle were inspected before delivery and full control denied complainant who paid no freight charges at that time, took out no new bills of lading, or made shipments to new consignees, the shipments were overcharged, being subject to lower rates for entire movement under provisions of an interstate tariff permitting stoppage in transit of cattle moving under above circumstances. Refund of overcharges directed. Borroum & Tucker v. M. V., 107 I. C. C. 668.

(o) Intrastate rates on brick and other clay products except common brick in Texas, Arkansas, Oklahoma, Kansas, and southern Missouri, which are lower than the contemporaneous interstate rates, found to result in undue prejudice and unjust discrimination against interstate commerce. Southwestern Brick Cases, 107 I. C. C. 681.

(p) Intrastate shipments of petroleum made during Federal control moved partly over short lines not under Federal control. No joint rates being in effect, combinations were assessed each factor of which was increased under General Order, No. 28 of the director general. Tariffs publishing factors applicable over the federally controlled lines contained the combination rule which provided a specific method for constructing through rates made on combination, but no similar rule, or reference thereto, was carried in tariffs of short lines. HELD: The combination rule being unrestricted in its application, the applicable rates were those constructed in conformity therewith. Shipments found overcharged and reparation awarded. Continental Oil Co. v. Director General, 109 I. C. C. 289.

(q) Joint rates on petroleum and products moving from Casper to Buffalo, Wyo., during Federal control, found unreasonable to extent they exceeded the aggregate of intermediates contemporaneously in effect. Reparation awarded. Continental Oil Co. v. Director General, 109 I. C. C. 289.

(r) Fact that shipments moved entirely intrastate during Federal control does not relieve carriers from their obligation to protect rates constructed under combination rule, which provides a specific method for constructing through rates made on combination, when such rule is carried in their tariffs. See 89 I. C. C. 645. Calif. Cotton & Factorage Co. v. Director General, 109 I. C. C. 293, 295.

(s) Shipments of tobacco moved from points in Virginia to Richmond, where delivery was accepted by consignee, who took charge thereof, paid incoming charges thereon, and without unloading, and without carrier or its agent acting for it, arranged for further transportation to Norfolk, for export. Reconsignment charges in addition to rates to and from point of reshipment were assessed in accordance with applicable tariff. rules. HELD: Movements to Richmond are not within commission's jurisdiction because intrastate in character. See 204 U. S. 403. On other hand, reconsignment charges, assessed because of movement beyond that point and incidental to it, are so subject. Taylor Co. v. S. Ry. Co., 109 I. C. C. 431, 433.

(t) Respondents proposed to restrict to intrastate traffic the application of the present rate of 11c upon rough dressed stone, in carloads, from St. Louis, Mo., to Carthage, Mo., now applicable upon both intrastate and interstate traffic. If the proposed restriction is permitted to become effective a rate equivalent to 15.2c will become applicable on interstate traffic. There are two routes of movement from St. Louis to Carthage, one over the Frisco 314 miles, and the other over the M. P., 364 miles. HELD: proposed schedules justified. Rough stone from St. Louis, 112 I. C. C. 700.

(u) The conclusion of the Commission is that ordinarily there can be no justification for a different rating on an article when transported wholly within a state than when moved into or out of the state or between states in the same general territory. City of Augusta v. A. C. L. R. R., 113 I. C. C. 303, 307.

(v) Upon contention that the regulation of train service for transportation of property is not one of the powers delegated to the commission by Congress; further, that by legislative enactment, the State has prescribed the minimum train service that may be maintained on all railroads within its borders, and that the sole jurisdiction of such service is in the State. HELD: Under section 1, paragraphs (10), (11), and (14), and section 15 of the act jurisdiction to regulate the supply of trains for transportation of property has been vested in the commission, and where there is a conflict of jurisdiction similar to that here considered the State law must give way to the Federal statute. See 225 U. S. 501 and 267 U. S. 404. Train Ser-

vice on Northern Pacific, 112 I. C. C. 191, 192, 195.

(w) Maintenance of intrastate rates in Alabama on fertilizers and fertilizer materials lower than corresponding interstate rates found reasonable by commission for future application found to result in undue prejudice to persons and localities engaged in interstate commerce, and undue preference of persons engaged in interstate commerce, and in unjust discrimination against interstate commerce. Effective intrastate rates in Georgia and South Carolina found not unlawful for future, except in individual instances. Fertilizers between Southern Points, 113 I. C. C. 389, 435.

(x) In 60 I. C. C. 337 the commission prescribed rates and charges on all freight service, except on coal for distances less than 30 miles, for intrastate application in Indiana. Proceeding was reopened for further hearing at request of Consumers Co., which, in substance, asks the commission to except from the order, the rates on sand and gravel from Ginger Hill, Ind., to Granger and Wyatt, Ind., in order that the Indiana Commission may pass upon the reasonableness of those rates. Counsel for defendants admitted that the rates charged during the periods mentioned were unreasonable to extent they exceeded 84c rate subsequently established. HELD: Rates on sand and gravel from Ginger Hill to Granger and Wyatt prior to January 28, 1921, did not cause any undue prejudice to interstate traffic. Indiana rates, fares and charges, 113 I. C. C. 531.

(y) Upon further hearing, original report, 60 I. C. C. 337, modified so as to except from its provisions intrastate rates on sand and gravel from Ginger Hill, Ind., to Granger and Wyatt, Ind., such rates not being shown to have caused any undue or unreasonable advantage, preference, or prejudice as between persons and localities in intrastate commerce, on one hand, and interstate or foreign commerce, on other hand, or any undue, unreasonable, or unjust discrimination against interstate commerce. Indiana Rates, Fares, and Charges, 113 I. C. C. 531.

(z) The commission has no jurisdiction over intrastate shipments. Luria Bros. & Co. v. B. & O., 115 I. C. C. 193.

(aa) Jurisdiction assumed by commission over an intrastate rail haul where such movement was part of a through rail-and-water movement. Kay County Gas Co. v. G., C. & S. F., 115 I. C. C. 736.

(bb) Rates on logs, except walnut, cherry, and cedar, from points on Atlantic Coast Line in South Carolina south of Charleston, to Savannah, Ga., found unreasonable as compared with lower rates under distance scales in effect in same general territory, and to extent they exceed rates prescribed by the State public service commission for intrastate application in Alabama. Reasonable maximum scale of rates prescribed for future. Southern Cotton Oil Co. v. A. C. L., 120 I. C. C. 190.

(cc) The commission has jurisdiction over intrastate rates on shipments moving from one point within a state to a port within same state, for export. Thomas Traffic Co. v. L. A. & S. L., 120 I. C. C. 671.

(dd) Complainant attacked intrastate rate on brick and articles taking brick rates, such as hollow building tile, carloads, maintained by Big Four, C. & E. I., I. C. from Kankakee, St. Anne, Beaverville and Woodland, Ill., to Chicago as unduly prejudicial; complainant attacked interstate rates on tile from Kankakee, St. Anne and Beaverville to the Indiana portion of the Chicago switching district as unreasonable and unduly prejudicial, and that rates to deliveries in that district in both Indiana and Illinois from Chicago Heights, Ill., and Hobart, Porter and other producing points in Indiana are unduly prejudicial; complainant alleged that rates from Hobart to points of unloading throughout the Chicago switching district are unreasonable and unduly prejudicial as compared with rates from Chicago Heights. Present proceedings are largely an outgrowth of 68 I. C. C. 213. Tile produced within approximately 100 miles of Chicago is manufactured from clay, whereas that produced at more distant points is made from shale and costs more than clay tile. Both kinds may be used for the same purpose, but, due to its higher cost, shale tile is not utilized where clay tile will serve. About 95% of Chicago's demand for tile is supplied by plants within a radius of about 60 miles of Chicago. No. 16116. Evidence of this complainant is directed almost entirely against the $1.15 rate on tile published on Illinois intrastate traffic from St. Anne group in compliance with Ill. C. C. orders in its dockets 13665 and 13742.

The complainant asks for the restoration of the $1.45 rate on intrastate traffic from the St. Anne group in order to remove the alleged undue prejudice against interstate commerce. No. 16392. These complainants attack the $1.45 interstate rate on tile from their plants in the St. Anne group to the Indiana portion of the Chicago switching district. No. 16563. This complainant operates the tile plant at Hobart, served by the Pennsylvania. The E. J. & E. also reaches Hobart. About 80% of their shipments go to Chicago, of which from 60 to 65% are unloaded on the Pennsylvania. Competition experienced is with Chicago Heights, Kankakee and St. Anne. Hobart and Chicago Heights are about 9 and 7.5 miles outside the outer rim of the Chicago switching district. The tile plant at Chicago Heights is on the C. H. T. T. whose switching charge of $6 is absorbed by the B. & O. C. T. The 50c rate applies. It is asserted that the transportation services from Hobart and from Chicago Heights are substantially similar. That from Hobart is over a main line with heavy traffic density. The 60c rate of the B. & O. C. T. from Chicago Heights to open deliveries on connecting lines in the Chicago switching district is clearly in issue in 16392 and 16563. By the Lowrey agreement defendants operating in the Chicago switching district receive divisions of that rate as well as of the rates from St. Anne group and Hobart. Similarly, defendant B. & O. C. T., which maintains the 50c rate from Chicago Heights to deliveries on its line receives divisions of the rates from the St. Anne group and Hobart on traffic moving to delivering points on its line in the Chicago switching district. The same carriers therefore participate in any undue prejudice or preference caused by such rates. In 68 I. C. C. 213 a scale of distance rates was prescribed for application between points in central territory. It reflects the general level of the rates in central territory, and therefore can not be deemed unduly high for rates covering interstate and intrastate hauls involving expensive deliveries in the Chicago district. No good reason appears upon this record why the scale should not be applied to the average of the rate making distances from St. Anne group, and to the respective distances from the points of origin under consideration nearer to Chicago. A differential relationship between that group and Hobart-Chicago Heights closer than that which results from the application of the scale would unduly widen either or both the spreads between the former and Danville, and between the latter and producers within the Chicago district. HELD, with respect to the carload rates attacked to the Chicago switching district, 1, that the interstate rates on tile from the St. Anne group are unreasonable to extent they exceed $1.35; 2, that interstate rates on brick list from Hobart is not unreasonable; 3, that the circumstances and conditions surrounding the transportation of intrastate shipments of tile from the St. Anne group and of interstate and intrastate shipments of articles in the uniform brick list from Chicago Heights, are substantially similar to those surrounding the interstate transportation of like traffic from Indiana producing points in the Wabash Valley group and to Hobart; 4, that the the maintenance by defendants of their present rates on intrastate shipments of tile from the St. Anne group, and on interstate and intrastate shipments of articles in the uniform brick list from Chicago Heights are unduly preferential and unduly prejudicial to the Wabash Valley group and to Hobart; 5, that the undue preference and prejudice should be removed by publishing rates which shall be on tile from the St. Anne group not lower than 55c below the rate from Terre Haute, and articles in the uniform brick list from Chicago Heights not lower than the rate from Hobart. Indiana State Chamber of Commerce v. A. T. & S. F. Ry., 122 I. C. C. 81.

(ee) No. 17517 is a proceeding instituted by the Commission upon petition filed on behalf of the A. C. L., and eight short line carriers operating in Georgia to determine whether the present carload rates on chert, clay, sand, gravel and other allied commodities required by the Georgia Public Service Commission to be maintained by petitioners for intrastate movements between points in Georgia result in any undue or unreasonable advantage, preference, or prejudice as between persons or localities in intrastate commerce on the one hand, and interstate or foreign commerce, on the other, or in any undue, unreasonable or unjust discrimination against interstate or foreign commerce; and if so, what rates or what maximum or minimum, or maximum and minimum, rates shall be prescribed to be charged to cure the situation. The Commodities considered in these proceedings are used chiefly in the building of highways and

in concrete construction work. Their tonnage was exceeded only by that of products of the forest, and of bituminous coal. The commodities considered are among the lowest valued offered for transportation and will not move except at comparatively low rates. They are generally transported in open top cars, load to capacity of the car, and move with little risk or damage or loss. Crushed stone, slag and washed gravel compete in concrete construction and in the building of hard surfaced roads. The use of sand is necessary as a filler in forming the course aggregate for concrete or hard surface construction work, and as it is of comparatively low value there is apparently no practicable substitute for it. Slag is a by-product of iron and steel production and is produced chiefly in the Birmingham district. While the Commission shall not prescribe minimum rates, it shall prescribe a scale which takes fully into consideration the very low values of these commodities and all characteristics, transportation and otherwise, which entitle them to relatively low rates. It will be a scale from which the carriers ought not to depart. Departures could only have the result ultimately, of forcing an unwarranted reduction in the general rate level on these commodities which would be burdensome to other traffic. The present method of making rates on these commodities to and from the Florida peninsula is by combination of factors to and from Jacksonville. In changing from a system of rate making which has prevailed for many years to a new method, it is reasonable that consideration should be given, particularly in the case of commodities moving in volume at relatively low rates, to the effect which an abrupt and radical change in rate level might have upon carrier revenues; and there is the more reason for such consideration in this instance in view of the heavy burden which the carriers have recently assumed in the form of new railroad construction to meet Florida needs. In the fixing of rates on these commodities in the past the Commission has not recognized the existence of a difference in the transportation characteristics, or in any other factors entitled to consideration in the fixing of rates, such as to warrant a different basis of rates on some as distinguished from others. The Commission is of the opinion that there should be a uniform rate level upon the commodities in issue over standard lines within the territory involved, excepting the Florida peninsula. HELD, reasonable scale prescribed ranging from 50c to single line for 10 miles and under joint line 65c, to 800 miles single line 285c, joint line 285c. Fourth section application may be made. Proposed rates on slag from Copperhill not justified. It is felt that the Georgia Commission will cooperate in authorizing such revisions as may be necessary to bring their rates into harmony with the interstate adjustment herein approved. In 17763 it is alleged that the rates on sand and gravel from Montgomery and Chattanooga to Mississippi are unreasonable and unduly prejudicial in favor of intrastate Mississippi shippers. Aside from testimony going to show that a large part of the intrastate movement in Mississippi is over lines not made defendants it was also shown that shipments could not be made from Montgomery into Mississippi over lines that are named defendants without passing through or near Mississippi points of production. HELD, Mississippi intrastate rates not unduly prejudicial. Rates on chert, clay, sand and gravel, 122 I. C. C. 133.

(ff) Upon petition of the G. H. & S. A. and other carriers Commission instituted an investigation to determine whether the rates and charges required by the Texas Commission to be established and maintained by said petitioners for transportation of freight between Fort Bliss and other stations in Texas will cause any undue or unreasonable advantage to state traffic. The Texas order provided that rates on all shipments of freight, in carloads and in less carloads, transported between the military reservation of Fort Bliss and other points in Texas, except El Paso, should not exceed the rates on the same classes and commodities between such other points and El Paso. It further provided that on carload traffic between Fort Bliss and El Paso the charge assessed by the E. P. & N. E. or the G. H. & S. A. should not exceed $12.50 per car. The order provided that on carload traffic between Fort Bliss and El Paso the terminal or switching charges of other lines in El Paso should be added to the charges of the lines named. The effect of the Texas order would be to make Fort Bliss a part of the El Paso switching district but not at the rates generally applicable on switch movements within said district. Whereas the maximum rate for switching within the El Paso terminals is $8 the order prescribes $12.50 to Fort Bliss,

with a provision that when service is performed by other carriers the switching charges of such carriers shall be added. Petitioners cost studies are not convincing that under the rates prescribed intrastate traffic would be transported at charges so low as to produce substantial disparity which would operate as a real discrimination against and obstruction to interstate commerce. The record is not convincing that the establishment of the rates referred to would unduly prejudice shippers in interstate commerce. HELD, proceeding discontinued. Rates between points in Texas, 122 I. C. C. 373.

(gg) The jurisdiction of the Commission over intrastate rates initiated by the Director General is well settled and has never been seriously questioned. Atlas Portland Cement Co. v. Director General, 122 I. C. C. 680, 681.

(hh) Intrastate rates on cement from Cement City (Sugar Creek), Mo., and Bonner Springs and Sunflower, Kans., to destinations in the Kansas City, Mo., Kans., switching district, to extent they are lower by more than 4.5 cents than interstate rates contemporaneously maintained on like traffic from points in the Kansas gas belt, found unduly prejudicial to the Kansas gas-belt points and shippers therefrom, unduly preferential of Cement City (Sugar Creek), Bonner Springs, and Sunflower, and shippers therefrom, and unjustly discriminatory against interstate commerce. Iola Cement Mills Traffic Asso. v. A., T. & S. F., 122 I. C. C. 337.

(ii) Intrastate rates neither prescribed nor approved by the commission, but maintained under State authority, can not be regarded as controlling in determining the measure of interstate rates or the relationship of interstate and intrastate rates. Iola Cement Mills Traffic Asso. v. A., T. & S. F., 122 I. C. C. 337, 345.

(jj) Ruling of March 13, 1922, holding that section 208 (a) of the transportation act, 1920, does not authorize commission to award reparation on intrastate shipments which moved during the guaranty period adhered to, but modified to hold that commission has authority to approve after August 31, 1920, awards of reparation by State authority on intrastate traffic which moved during the guaranty period. Reparation on Intrastate Traffic, 122 I. C. C. 443.

(kk) The commission has jurisdiction to approve after August 31, 1920, an award of reparation made by State authority on intrastate traffic which moved during the guaranty period, March 1 to August 31, 1920, whether such authority was actually exercised during the guaranty period or thereafter. The phrase "prior to September 1, 1920," as used in section 208 (a) of the transportation act, 1920, is not to be construed as prescribing a time limitation within which the commission was authorized to act, but as fixing the period as to which its approval was necessary to a reduction in rates whether made during the guaranty period by naming lower rates for future, or accomplished after expiration of the period by way of reparation on shipments which moved during the period. Reparation on Intrastate Traffic, 122 I. C. C. 443.

(ll) Subject to certain exceptions, the commission's jurisdiction over intrastate rates terminated with termination of Federal control, February 29, 1920. On that date jurisdiction passed to State authorities, subject to the limitation that no rates should be reduced prior to September 1, 1920, unless approved by commission. The commission, therefore, was and is without power to require rate reductions or award reparation on intrastate shipments moving during the guaranty period and the only order it can lawfully make as to such shipments is one of a permissive character. Accordingly conference ruling of March 13, 1922, and previous decisions holding that section 208 (a) of the transportation act, 1920, does not authorize commission to award reparation on intrastate shipments which moved during the guaranty period, adhered to. Reparation on Intrastate Traffic, 122 I. C. C. 443.

(mm) An award of reparation on Intrastate traffic which moved during the guaranty period, March 1 to August 31, 1920, is, in effect, a reduction of a rate prior to September 1, 1920, within the meaning of section 208 (a) of the transportation act, 1920, regardless of the date on which decision making the award was rendered. See 271 U. S. 124. Reparation on Intrastate Traffic, 122 I. C. C. 443, 447.

(nn) The primary purpose of second clause of section 208 (a) of transportation act was to protect the United States from liability on its guaranty to the

carriers of the standard return, and this it sought to do by prohibiting any reduction of rates, fares, or charges without consent of commission. See 270 U. S. 466. When it comes to awards of reparation after expiration of the guaranty period upon interstate traffic which moved during that period, there is equal necessity for review by commission to the end that revenues of carriers may not be unduly reduced and at the same time that awards of reparation in meritorious cases may be granted. Reparation on Intrastate Traffic, 122 I. C. C. 443, 447, 448.

(oo) Mere existence of a lower intrastate rate under which a commodity does not move, has little, if any, probative value in determining the reasonableness of interstate rates under which there is a movement. Tanning Extract from Lynchburg, 122 I. C. C. 647, 650.

(pp) Jurisdiction of commission over intrastate rates initiated by Director General of Railroads is well settled and has never been seriously questioned. See 55 I. C. C. 280. Atlas Portland Cement Co. v. Director General, 122 I. C. C. 680, 681.

(qq) The commission is without authority to pass upon lawfulness of intrastate rates where the only issues raised in complaint are violations of sections 1, 2, and 3 of the act. Chicago Fire Brick Co. v. C. & N. W., 123 I. C. C. 164.

(rr) State cannot, under cover of exercising its police powers, undertake what amounts essentially to regulation of interstate commerce, or impose direct burden thereon. Wrigley Pharmaceutical Co. v. Cameron, 16 Fed. (2d) 290.

(ss) When local police regulation has real relation to suitable protection to people of state, and is reasonable in its requirements, it is not invalid because incidentally affecting interstate commerce, providing it does not conflict with federal legislation. Wrigley Pharmaceutical Co. v. Cameron, 16 Fed. (2d.) 290.

(tt) Pennsylvania Securities Act (Pa. St. Supp. 1924, §§ 19867a1-19867a36), being police measure intended to prevent fraud in sale of securities, HELD a reasonable exercise of police power, and not unlawful interference with interstate commerce. Wrigley Pharmaceutical Co. v. Cameron, 16 Fed. (2d.) 290.

(uu) For state statute to be invalid, as in conflict with act of Congress, it is not necessary that the conflict be literal or express. Staten Island Rapid Transit Ry. Co. v. Public Service Commission of State of New York, 16 Fed. (2d) 313.

(vv) Public Service Commission Law N. Y. (Consol. Laws, c. 48), § 53-a, requiring electrification of certain railroads, and giving Public Service Commission power to prescribe equipment, etc., invalid in part as conflict with federal statute, cannot be held valid as to requirement of electrification. Staten Island Rapid Transit Ry. Co. v. Public Service Commission of State of New York, 16 Fed. (2d) 313.

(ww) Public Service Commission Law N. Y. (Consol. Laws, c. 48), § 53-a, relating to the electrification of railroads in certain cities, and giving Public Service Commission power to prescribe equipment, HELD invalid, as in conflict with federal Boiler Inspection Act 1911, as amended (U. S. Comp. St. § 8630 et seq.), and federal Safety Appliance Act (U. S. Comp. St. § 8605 et seq.). Staten Island Rapid Transit Ry. Co. v. Public Service Commission of State of New York, 16 Fed. (2d) 313.

(xx) If legislation, though having for its purpose promotion of public health of state, comes in conflict with legislation enacted by Congress pursuant to its power to regulate interstate commerce, so that the two cannot stand together, then state legislation must give way to federal legislation. Chicago & N. W. Ry. Co. v. Railroad Commission of Wisconsin. Chicago, M. & St. P. Ry. Co. v. Same. Minneapolis, St. P. & S. S. M. Ry. Co. v. Same, (Wis., 1925) 205 N. W. 932.

(yy) Where original order of department of public works fixed rates on intrastate shipments of certain wood on basis of 128 cubic feet per cord, and later in supplementary order fixed basis on 192 cubic feet per cord, such orders were not retroactive, but prospective, and shipper who shipped wood between effective dates of such orders could not in reparation proceedings, under Laws 1921, p. 336, recover difference between what he was charged on 128-foot basis and what charge would have been on 192-foot

basis, inasmuch as, at time of shipment, rates on 128-foot basis were lawful and standard. Northern Pac. Ry. Co., v. Department of Public Works, (Wash., 1925) 240 Pac. 362.

(zz) In view of Const. 1902, § 156(b) and Code 1919, §§ 3910, 3920, intrastate freight rates are made by State Corporation Commission, as distinguished from carrier made interstate rates under Interstate Commerce Act, §§ 13, 16, as amended by Act Feb. 28, §§ 416, 423-429 (U. S. Comp. St. §§ 8581, 8584), and rates approved by the commission, are conclusively presumed legal and reasonable until changed by commission as to the future, but commission cannot declare rates legally established unreasonable retroactively, and commission's finding that rates between certain points were unreasonable did not entitle shippers to recover as for excess freight charges on shipments previously made. Mathieson Alkali Works, Inc. v. Norfolk & W. Ry. Co., (Va., 1927) 137 S. E. 608.

(3a) Transportation Act Feb. 28, 1920, § 208 (a), being Comp. St. Ann. Supp. 1923, § 10071¼d, prohibiting reduction of rates during six months following termination of federal control, applied to intrastate as well as interstate shipments, and, without approval of Interstate Commerce Commission, state Public Service Commission could not by a reparation order require railroad to repay part of freight collected on intrastate shipments during such period, on ground that rates were excessive, thereby effecting reduction of rates. New York Cent. R. Co. v. New York & Pennsylvania Co., 46 Sup. Ct. 447.

(3b) Carrier's failure to appeal from decision of state Public Service Commission, holding lower rate than that charged on intrastate coal shipments during six months termination of federal control reasonable, and stating that on presentation of supporting data reparation would be awarded, HELD not a waiver of its right to resist enforcement of reparation order, as in violation of Transportation Act Feb. 28, 1920, § 208(a), being Comp. St. Ann. Supp. 1923, § 10071¼d. New York Cent. R. Co. v. New York & Pennsylvania Co., 46 Sup. Ct. 447.

(3c) Explicit provisions of railroad's charter requiring it to operate particular intrastate branch must yield to paramount power of Congress to regulate interstate commerce, and to authorize abandonment of branch when its operation becomes prejudicial to interstate commerce. State of Colorado v. United States, 46 Sup. Ct. 452.

(3d) Since state's power to regulate and promote intrastate commerce may be exercised in a way to prejudice interstate commerce, Congress has power to authorize abandonment of wholly intrastate operation. State of Colorado v. United States, 46 Sup. Ct. 452.

(3e) Prejudice to interstate commerce may be effected by excessive expenditures in local interest from fund arising from both interstate and intrastate traffic. State of Colorado v. United States, 46 Sup. Ct. 452.

(3f) This proceeding was instituted upon petition of respondents to determine whether the rate required by the Ohio Commission for intrastate application on bulk salt, in carloads, from Akron, O., and points grouped therewith, to Cincinnati, O., is unlawful in its relation to interstate rates. Prior to June 7, 1925, respondents had a rate from the Akron group to Cincinnati of 14.5c, minimum 60,000 pounds on bulk salt and another of 15.5c, minimum 37,500 pounds, on package salt. Incident to Salt Cases of 1923, 92 I. C. C. 388, respondents proposed a rate of 15.5c minimum 45,000 pounds, on both bulk and package salt to become effective on that date. The Ohio Commission found the schedules not justified. The 15.5c rate on package salt went into effect, but the 14.5c rate on bulk salt remained. The interstate rate from the Akron group to Cincinnati on both bulk ond package salt is 15.5c minimum 45,000 pounds. The 15.5c rate is about 72% of the sixth class rate from Akron to Cincinnati. The average of all salt rates in central territory is said to be about 75% of the sixth class rates. The 14.5c rate is about 67.5% of the sixth class rate to Cincinnati. It does not appear to be seriously contended that the present intrastate rate is unreasonably low. The situation here under consideration represents the only instance where a lower rate is published on bulk than on package salt from and to points in central territory. HELD: Intrastate rate not been shown to subject interstate traffic to undue prejudice. Rates and minimum weights on salt, 128 I. C. C. 499.

(3g) Only in a strained sense could it be said that the removal of undue prejudice to or unjust discrimination against intrastate commerce resulting from a difference in levels of interstate and intrastate rates is necessary for the effective regulation of interstate commerce and certainly the effective protection of interstate commerce calls for no such action. The interstate commerce act should not be broadly construed to empower this Commission to take action against rate adjustments for purposes which are primarily of intrastate concern and are not essential to the proper regulation of either interstate or foreign commerce. An issue of undue prejudice to intrastate commerce and undue preference of interstate commerce, and of unjust discrimination against intrastate commerce, is not within the purview of the act the Commission administers. Mutual Creamery Co. v. American Ry. Express Co., 132 I. C. C. 207, 212.

(3h) In Reparation on intrastate traffic, 122 I. C. C. 443, the Commission found it has jurisdiction to approve after August 31, 1920, an award of reparation made by state authority on intrastate traffic which moved during the period between March 1 and August 31, 1920. The Commission adhered to previous decisions that section 208a of the transportation act, 1920, does not authorize it to award reparation on intrastate shipments which moved during the guaranty period. Armour & Co. v. G. N. Ry., 132 I. C. C. 261.

(3i) In 104 I. C. C. 34, the Commission dismissed for lack of jurisdiction a complaint seeking reparation on 35 cars of sand and gravel, 65 cars of dirt, and 20 cars of clay shipped between April 1 and August 7, 1920, from Shieleys Pit, Minn., to South St. Paul, Minn. HELD: Commission approves finding and order of the Minnesota Commission as to rates on the intrastate traffic here considered, complaint dismissed. Armour & Co. v. G. N. Ry., 132 I. C. C. 261.

STATIONS

See Passenger Fares and Facilities §13.

STATUTE OF LIMITATIONS

See Claims I; Loss and Damage §13½; Reparation §7; Undercharges §10.

STATUTES

(a) The usual and primary office of an exception or proviso in a statute is to limit generalities and exclude from scope of the statute that which otherwise would be within its limits. See 228 U. S. 459. Where the enacting clause is general in its language and objects, and a proviso is afterwards introduced, that proviso is construed strictly, and takes no case out of the enacting clause which does not fall fairly within its terms. See 140 U. S. 142; 205 U. S. 1. Exceptions to the general policy which the law embodies are to be strictly construed, and are to be so interpreted as not to destroy the remedial purpose intended. See 241 U. S. 344. Rules for testing other than Steam Power Locomotives, 122 I. C. C. 414, 421.

(b) It is a well-established rule that in case of any doubt or ambiguity, a statute is to be construed so as not only to be consistent with itself throughout, but also to harmonize with other laws relating to same or kindred matters. See 1 Black 55. Rules for testing other than Steam Power Locomotives, 122 I. C. C. 414, 428, 429.

(c) Action by Director General of Railroads, being action on behalf of United States in its governmental capacity, HELD not subject to statute of limitation. Davis, Director General of Railroads v. Ford, (N. C. 1927) 137 S. E. 328.

(d) Statute should not be given a retroactive effect, unless required by explicit language or by necessary implication. United States v. St. Louis, S. F. & T. Ry. Co., Same v. Wabash R. Co., 46 Sup. Ct. 182.

(e) A construction rendering statute of doubtful constitutionality will not be adopted, if another is open to court. Missouri Pac. R. Co. v. Boone, 46 Sup. Ct. 341, 342.

(f) Where general purpose of Legislature is manifest, and subserved by giving words their ordinary meaning, rule that criminal statutes are to be strictly construed is inapplicable. United States v. P. Koenig Coal Co., 46 Sup. Ct. 392.

(g) An order of a State Railroad Commission, requiring an interstate railroad company to furnish the use of terminal facilites and tracks to another company, HELD void for want of jurisdiction, and for the further reason that

it failed to make any provision for compensation, in violation of the constitutional provision against the taking of property without compensation. Southern Ry. Co. v. Shealy, 18 Fed. (2d.) 784.

STOCK YARD COMPANIES

See Absorption of Charges §1 (a); Live Stock Shipments; Twenty-Eight Hour Law.

(a) Yardage charge assessed by public stockyard company for use of its facilities and services from time animals are taken out of unloading pens until delivered to consignee or reloaded, found not subject to commission's jurisdiction. Complainant contends that commission's jurisdiction extends to actual delivery to consignee and that services of stockyard company are no more than carriers are by law required to furnish, but stockyard company contends that jurisdiction ends when animals are placed in unloading pens; that services are not connected with transsubject to jurisdiction of Secretary of portation but are stockyard services and Record indicates that carriers provided Agriculture under stockyards act, 1921. adequate stockyard facilities but complainants used public yards for convenience. While in 139 U. S. 128, it was held that transportation ends only after delivery to consignee, section 15 (5) provides that it ends when, as here, animals are delivered into suitable pens, and it follows that there commission's jurisdiction ends. See secton 301 (b) of stockyards act, 1921. Southwestern Horse & Mule Asso. v. A., T. & S. F., 129 I. C. C. 730.

(b) Prior to decision in 52 I. C. C. 209, carriers absorbed loading and unloading charges at public stockyards, but not elsewhere. In that case carriers refusal to absorb out of their line-haul revenues increases for loading and unloading live stock at public stockyard at Chicago was upheld on ground that it was duty of shippers rather than of carriers to load and unload livestock and other carload traffic. Since adoption of section 15 (5) of act, carriers have, been required to perform loading and unloading of ordinary livestock at public stockyards without extra charge to shippers. However, duty still rests upon shippers to load and unload such shipments at other than public stockyards. Southwestern Horse & Mule Asso. v. A., T. & S. F., 129 I. C. C. 730, 737.

(c) Stockyards act, 1921, gives Secretary of Agriculture jurisdiction over stockyard services at public stockyards as defined in section 301 (b) of that act. While section 406 (a) of same act provides that nothing therein shall affect power or jurisdiction of Interstate Commerce Commission, nor confer upon the secretary concurrent power or jurisdiction over any matter within power or jurisdiction of such commission, neither that clause nor the interstate commerce act gives commission jurisdiction over lvestock after it has been unloaded into suitable pens, as the bill when introduced proposed to give the secretary complete inquisitorial, visitorial, supervisory, and regulatory power over packers, stockyards, and all actvities connected therewith, such jurisdiction to begin where commission's jurisdiction ends. Southwestern Horse & Mule Asso. v. A., T. & S. F., 129 I. C. C. 730, 738.

(d) Under section 15 (5) of the act, transportation of livestock ends when animals are delivered into suitable pens, and it follows that there commission's jurisdiction ends. This conclusion is further strengthened by section 301 (b) of stockyards act, 1921, and decision of Supreme Court upholding constitutionality thereof. Southwestern Horse & Mule Asso. v. A. T. & S. F., 129 I. C. C. 730, 737, 738.

STOPPAGE IN TRANSIT

See Express Companies §34; Facilities and Privileges §10 (g), §15.

(a) Tariff rule published in compliance with a legislative enactment of the State of Missouri under which c. l. shipments of grain and products moving intrastate from Kansas City and St. Joseph, Mo., to other points in Missouri are permitted to be stopped in transit for part unloading found reasonable for interstate application on shipments from Kansas City, Kans., to points in Missouri, and failure of carriers to apply said tariff rule to such interstate shipments found to result in undue prejudice. Removal of undue prejudice ordered. Southwestern Milling Co. v. A., T. & S. F., 118 I. C. C. 61.

(b) Complainant alleged that the failure of defendant to provide for stoppage of carload shipments of dead freight in transit, to partly unload, at points in Ohio on its line in central territory is unreasonable. An arrangement to have cars stopped to partly unload is

desired at present in connection with feed, fertilizer, twine and tankage. All carriers in central territory except the defendant, the C. & O., and a few of the smaller carriers provide for this. HELD, failure to provide stopping in transit to partly unload is unreasonable. Ohio Farm Bureau Federation v. N. & W. Ry., 120 I. C. C. 305.

(c) Failure of Norfolk & Western Ry., to provide for stoppage in transit to partly unload c. l. shipments of feed, fertilizer, tankage, and twine at points in Ohio on its line in c. f. a. territory, found unreasonable. The difficulties, abuses and errors encountered by carriers in performance of stop-off service are not materially different from those met in connection with reconsignment and other transit services generally recognized as commercial necessities. The service here sought would accord farmers an opportunity to obtain fertilizer, feed and other necessities at c. l. rates without inconvenience of trucking great distances and without injury, undue hazard, or burden to carrier if properly limited and restricted. Ohio Farm Bureau Federation v. N. & W., 120 I. C. C. 305.

(d) Stoppage in transit to partially unload c. l. shipments should not be available to shippers where a back haul or unduly circuitous out-of-line haul is required. Ohio Farm Bureau Federation v. N. & W., 120 I. C. C. 305, 308.

(e) Respondent, Texas carriers proposed to cancel their arrangement under which interstate carload shipments of cranberries are stopped at Texas points for partial unloading. Charges on shipments stopped to partially unload are based upon the original weight of the load, subject to the minimum, and the rate from point of origin to final destination, plus $6.30 per car for each stop. The level of the rates is the same on shipments which move under the present arrangement as on shipments which move through to one destination, and the Commission is not here considering that level. HELD, suspended schedules justified. Stop over Transit Privileges, 122 I. C. C. 479.

(f) Complainant alleged refusal of defendant to accord at Oakland, Calif., the privilege of stopping in transit, for the purpose of treating with creosote or other preservatives, or of storing, or both, shipments of red cedar poles and piling which originate on lines of defendant in Oregon, or are delivered to defendant at Portland or East Portland, Oreg., and are finally destined to stations in California south of Oakland, is unreasonable, and unduly prejudicial. Complainant admits the impracticability of keeping the poles received by water separate from those received by rail, and the natural result of the transit arrangement at Almeda would be to permit complainant to ship outbound carloads of mixed sizes, some received by rail and some by water, limited only by the transit credits on inbound rail shipments. The record does not show such similarity of conditions at Oakland, on the one hand, and Springfield and East Milwaukee on the other, as would justify the Commission in finding that the refusal of defendant to permit transit at the former while permitting it at the latter is either unreasonable or unduly prejudicial or preferential. Although it is true there is a possible route to certain destinations on the lines of the defendant through Oakland, that is not the normal route for the handling of traffic, and there is no evidence that traffic could be as economically handled over it as over the routes now used. Further, the establishment of transit at Oakland would give complainant an advantage over competitor at Springfield and East Milwaukee by reason of the fact that the receipt of a large volume of poles and piling by steamer would enable complainant to use its transit credits to greater advantage than would be possible if all its shipments came in by rail. HELD, complaint dismissed. Baxter & Co. v. S. P. Co., 122 I. C. C. 498.

(g) Proposed cancellation of arrangement for stopping to partially unload interstate shipments of cranberries at points in Texas, found justified. Charges on such shipments are based upon original weight of load, subject to minimum weight and rate from point of origin to final destination, plus per-car stoppage charge. Therefore, in instances where rates from origin to stop-off point and to final destination are the same, carriers receive nothing for additional haul from stop-off point to final destination regardless of its length, except stoppage charge. Moreover, where distance from stop-off point to final destination is short and quantity which goes to final destination is small, carriers furnish two c. l. services for what are c. l. shipments to stop-off points and l. c. l. shipments beyond. Stop-over Transit Privilege, 122 I. C. C. 479.

(h) Stopping to partially unload interstate shipments of cranberries at

points in Texas is, at least so far as this commodity is concerned peculiar to Texas, applying nowhere else in the Southwest, or possibly in the United States. Stop-over Transit Privilege, 122 I. C. C. 479, 481.

(i) Upon further consideration, combination rates based on Norfolk, Va., assessed on lumber from Roach, Fla., to Harrison and Jersey City, N. J., and Great Works, Me., from Springdale, Fla., to Harrison and Jersey City, N. J., and Great Works, found unreasonable to extent they exceeded lower combinations based on Live Oak, Fla., and Savannah, Ga., plus a transit charge maintained by the Atlantic Coast Line at time of shipment for stoppage at Portsmouth. The A. C. L. sought to compute reparation on basis of a higher transit charge established subsequent to movement. While the lower charge was applicable only on shipments originating on that carrier's rails, no reason appears why it should not be used in computing the reparation due complainant under the original findings. Reparation awarded. Former report, 100 I. C. C. 405. McClave & Son v. A. C. L., 128 I. C. C. 1.

(j) Upon further consideration, elimination of arrangement for stopping to partially unload interstate shipments of cranberries at points in Texas, found not justified. While respondents urged that to haul a partially loaded car from stop-off point to final destinations was a waste of transportation and that stop-off charge was not sufficient to take care of additional service rendered, it is obvious that where part of the load has been removed, less service would be performed beyond the stop-off point to final destination than on through shipments. Moreover, stop-charge appears sufficient to cover additional services rendered and the transit service is highly beneficial to protestants in the sale and distribution of cranberries and yet is not unduly burdensome to respondents. Previous report 122 I. C. C. 479, reversed. Stop-Over in Transit Privilege, 128 I. C. C. 425.

(k) Charges collected on caterpillar tractors and parts from Stockton, Calif., to Dallas, Tex., based on rate from Stockton to Dallas, plus reconsignment charge at San Antonio and stop-over charge at Houston, where shipment was partially unloaded, found inapplicable. While governing tariff authorized reconsignment at San Antonio, it did not authorize stop-over at Houston, and movement therefrom must be treated as a reshipment. Refund of overcharges directed. Holt Co. of Texas v. S. P., 128 I. C. C. 555.

(l) Failure to provide for stopping in transit to partially unload shipment of Portland cement and wall plaster, in straight or mixed carloads, from Hanover and Trident, Mont., to western and central portions of North Dakota and South Dakota, while contemporaneously according this privilege to competitors at Steelton, Duluth, and Minneapolis, Minn., Mason City, Iowa, and Piedmont and Black Hawk, S. Dak., found unduly prejudicial. No order entered by carriers excepted to provide for transit privilege in revising rates in accordance with findings herein. Three Forks Portland Cement Co. v. C., B. & Q., 129 I. C. C. 107, 118, 119.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. Jurisdiction of Commission.

See Interstate Commerce Commission I; Jurisdiction of Commission.

(a) Contention that commission is without jurisdiction over shipments of commodities arriving from foreign ports and stored at ports of entry to await shipment to interior points located within same State as port of entry on ground that transportation is intrastate, not sustained. Temporary storage at ports does not divest such traffic of its foreign character acquired at time it begins its journey from foreign port, and movement to port of entry is only a step in its transportation to interior destina-

tions. Alexander Grocery Co. v. B., S. L. & W., 104 I. C. C. 155, 156.

II. CHARGES AND REGULATIONS.

§ 2. Reasonableness and Discrimination in General.

See Demurrage §12 (f); Discrimination; Reasonableness of Rates.

(a) Upon reconsideration, finding in 107 I. C. C. 77, reversed and storage charges assessed on whiskey stored at El Paso, Tex., found applicable and not unreasonable. Shipment was consigned c/o collector of customs, El Paso, notify a drug store at Juarez, Mex. Upon arrival consignee was duly notified but shipment remained unclaimed and was stored by carrier to release needed equipment. Thereafter libel proceedings against shipment were filed and by direction of the court the collector of customs was notified to detain shipment in his custody. HELD: While tariff provided that no storage charges should be collected for detention due to delay by U. S. customs, after attachment the goods were under control of the court. Mere fact that customs collector had custody of shipment is not proof of "Delay by U. S. Customs." Moreover, there is no evidence that prior to attachment the collector was not at all times ready to permit exportation of shipment upon presentation of clearance papers and other evidences of ownership. Sunny Brook Distillery Co. v. A., T. & S. F., 113 I. C. C. 533.

(b) The reasonableness of storage charges assessed by a carrier may not fairly be determined by charges made by public warehouses. Sunny Brook Distillery Co. v. A., T. & S. F., 113 I. C. C. 533, 535.

(c) Complainant alleged storage charges collected on a less carload shipment of stock powders made by it on Oct. 4, 1922 from Indianapolis, Ind., to Kitchener, O., were unjust and unreasonable. Shipment was accepted under a bill of lading showing complainant as consignor and H. M. Linder, Kitchener, O., as consignee. Kitchener is a non-agency station of the Big Four about one fifth mile from the consignee. The agent of Big Four at Indianapolis failed to collect the freight charges in advance and instead of rectifying his mistake by holding the shipment and notifying complainant at Indianapolis that the charges must be prepaid before the shipment could be moved, he billed the shipment, charges collect, to Lytle, O., an open station about 4 miles from Kitchener. Shipment arrived at Lytle on Oct. 20, and written notices thereof were sent to the consignee Oct. 23, Nov. 1 and Nov. 10, 1922 without effect on delivery. It apears that on Nov. 11, 1922 the consignee went to Lytle but upon learning of the freight and storage charges which had accrued refused the shipment. On that date the agent at Lytle notified the consignor that the shipment had not been delivered and requested directions as to its disposition. No reply was received. The shipment, after remaining on hand for 60 days was forwarded from Lytle to Cincinnati, O., for storage and was finally returned to complainant at Indianapolis on Jan. 15, 1923 upon complainants request, after payment of storage and freight charges. HELD, storage charges which accrued subsequently to Nov. 11, 1922 appear proper because the consignor failed to furnish disposition instructions after receiving notification that the shipment had not been delivered and to direct disposition, storage charges prior thereto inapplicable, refund to be made, complaint dismissed. Columbian Hog & Cattle Powder Co. v. C., C., C. & St. L. Ry., 120 I. C. C. 31.

(d) Upon arrival of an l. c. l. shipment at destination written notice thereof was sent to consignee, who failed to accept delivery resulting in accrual of storage charges. Subsequently shipment was refused and consignor was duly notified and disposition orders requested. No reply was received and additional storage charged accrued, the shipment ultimately being returned to point of origin. Upon complaint seeking refund of all accrued charges for storage, HELD: Charges accruing subsequent to date of notification by carrier that shipment was refused were proper and complainant could have abated the accrual of additional charges by furnishing disposition orders requested. Charges accruing prior to such notice, however, were inapplicable and should be refunded. Columbian Hog & Cattle Powder Co. v. C., C., C. & St. L., 120 I. C. C. 31.

(e) On resale of rails by carrier after they had been refused by consignee, charging storage from 48 hours after notice of arrival at destination according to public tariff of carrier, was error, in view of evidence that storage charges would not have been made if

consignee had accepted shipment before filing suit, and storage should be allowed only from date of notification of shipper by carrier that rails would be sold, to date of sale. Morley Cypress Co. v. Hines, Director General of Railroads, (La., 1926) 107 So. 487.

(f) Where carrier, after rails shipped were refused by consignee, notified shipper that they would be resold, there should be allowed as charges storage from date of notification of intended sale to date of sale, charges for unloading rails at point of consignment and reloading, freight from point of consignment to point of sale, and cost of advertising sale. Morley Cypress Co. v. Hines, Director General of Railroads, (La., 1926) 107 So. 487.

(g) In trover for goods lost by railway's refusal to ship goods, based on demand for storage charges which plaintiff denied to be due, refusal to railway's requested instruction that storage charges are presumed to be reasonable, though correctly stating the law, was not prejudicial error, in view of issue made. Seaboard Air Line Ry. Co. v. McWhorter, (Ala., 1926) 108 So. 242.

(h) Railway storage charges, not properly allowable, may properly be alleged to be excessive. Seaboard Air Line Ry. Co. v. McWhorter, (Ala., 1926) 108 So. 242.

(i) Complainant alleged storage charges of $1.93 on one car of cypress bridge piling shipped February 6, 1922, from Cardwell, Mo., to Clarks, Neb., and there stored as unreasonable, unjustly discriminatory and unduly prejudicial. Upon arrival at Clark's complainants representative gave the agent of the U. P. a receipt therefor and paid charges at applicable rate of 45c. Because complainant's teams were engaged in other service at that time and were not available for removal of the material, the piling was unloaded within the free time on the U. P. premises, with permission of its agent, where it remained from February 18 to April 10, 1922, 51 days, and was then removed by complainant. HELD: Storage should be waived on the ground that notice in writing was not given to complainant, undercharge waived. Western Bridge & Construction Co. v. S. L. & S. F. Ry., 118 I. C. C. 607.

III. TARIFFS AND CONSTRUCTION.

See Tariffs.

§3. In General.

(a) Shipments moved in bond from points in Mexico to points in United States where they were stored in bonded warehouses and subsequently forwarded, in bond, to New Orleans and exported to foreign destinations of Porto Rico. Contention that inasmuch as shipments came to a temporary rest in bond at New Orleans, the transportation should be considered as ended there, found without merit. Fernandez & Co. v. S. P., 104 I. C. C. 193, 195.

(b) Shipment of whiskey was consigned to shipper's order c/o collector of customs, El Paso, notify a drug store at Juarez, Mex. Upon arrival at El Paso consignee was notified but shipment remained unclaimed and was subsequently stored. Thereafter, by command of United States court, customs collector was notified to detain shipment in his custody. This was done until dismissal of court proceedings when, upon payment of accrued storage charges, shipment was returned to point of origin. Tariff rule provided that no storage charges should be collected for detention due to delay by U. S. customs and that free time lost through such delay shall be allowed. FOUND: While detention here was for purposes other than those incident to customs inspection and clearance for export, terms of the rule, which clearly comprehend any delay by U. S. customs are sufficiently broad to preclude assessment of storage charges under circumstances. Refund of overcharges directed. Sunny Brook Distillery Co. v. A., T. & S. F., 107 I. C. C. 77.

(c) In 107 I. C. C. 77, complainant attacked the storage charges on a car of whiskey stored at El Paso, Tex., as unreasonable and inapplicable division 1 found charges inapplicable. The mere fact that the collector of customs had custody of the shipment which was forwarded in his care by complainant is no proof of "delay by U. S. Customs." There is no evidence that prior to the attachment by the marshal the collector was not at all times ready to permit the exportation of the shipment upon presentation to him of clearance papers and other evidences of ownership. HELD: Charges paid applicable and not unreasonable, complaint dismissed. Sunny

Brook Distillery Co. v. A., T. & S. F. Ry., 113 I. C. C. 533.

(d) Upon reconsideration, finding in 107 I. C. C. 77, reversed and storage charges assessed on whiskey stored at El Paso, Tex., found applicable and not unreasonable. Shipment was consigned c/o collector of customs, El Paso, notify a drug store at Jaurez, Mex. Upon arrival consignee was duly notified but shipment remained unclaimed and was stored by carrier to release needed equipment. Thereafter libel proceedings against shipment were filed and by direction of the court the collector of customs was notified to detain shipment in his custody. HELD: While tariff provided that no storage charges should be collected for detention due to delay by U. S. customs after attachment the goods were under control of the court. Mere fact that customs collector had custody of shipment is not proof of "Delay by U. S. Customs." Moreover, there is no evidence that prior to attachment the collector was not at all times ready to permit exportation of shipment upon presentation of clearance papers and other evidences of ownership. Sunny Brook Distillery Co. v. A., T. & S. F., 113 I. C. C. 533.

(e) Tariff rule providing that where c. l. shipments are stored by carriers to release needed equipment, storage charges would be at same rate as demurrage charges, found not unreasonable. Such rule is of general application, has been in effect for many years, and was found not unreasonable in 38 I. C. C. 349 and other cited cases. Sunny Brook Distillery Co. v. A., T. & S. F., 113 I. C. C. 533, 535.

(f) Following 95 I. C. C. 603 and 266 U. S. 92. storage charges assessed on cypress bridge piling stored on carrier's right of way, found inapplicable. Tariff specifically provided that notice in writing should be sent or given consignee by carrier or as otherwise agreed to. No such notice was sent nor agreement entered into for receipt thereof. Fact that consignee had actual notice did not constitute a "substantial compliance" with tariff and charges assessed were therefore inapplicable. Western Bridge & Construction Co. v. St. L.-S. F., 118 I. C. C. 607.

(g) Upon arrival of an l. c. l. shipment at destination, written notice thereof was sent to consignee, who failed to accept delivery, resulting in accrual of storage charges. Subsequently shipment was refused and consignor was duly notified and disposition orders requested. No reply was received and additional storage charges accrued, the shipment ultimately being returned to point of origin. Upon complaint seeking refund of all accrued charges for storage, HELD: Charges accruing subsequent to date of notification by carrier that shipment was refused were proper, and complainant could have abated the accrual of additional charges by furnishing disposition orders requested. Charges accruing prior to such notice, however, were inapplicable and should be refunded. Columbian Hog & Cattle Powder Co. v. C., C., C. & St. L., 120 I. C. C. 31.

(h) Storage charges assessed on private cars of gasoline under storage rule providing for assessment of charges on dangerous articles requiring "inflammable" placards, held on railroad premises in excess of free time found inapplicable. Under the rule the term "railroad premises" included private tracks constructed, maintained or operated under written agreement, located inside carrier's right of way, yard, and terminals, preserving to carriers right of use. Here, tracks were constructed under contract, but were used exclusively as plant facilities, and could be used by carrier only when such use did not interfere with complainant's business. Moreover, in 66 I. C. C. 58, interpretation of term "railroad premises" made the written agreement the controlling factor rather than right of use. Complainant's tracks therefore could not under any circumstances be considered as railroad premises. Refund of charge directed. Kelly Oil Co. v. M. K. T., 123 I. C. C. 517.

(i) Lumber from White Sulphur, W. Va., to Harrisburg, Pa., ordered reconsigned to Hershey, Pa., by letter addressed to agent of Norfolk & Western, who referred it to agent of Western Maryland at Hagerstown Junction, Md., was held by latter carrier at Harrisburg beyond free time and demurrage and storage charges accrued. Upon contention that detention of car and handling of request amounted to negligence on part of Western Maryland, HELD: Carrier's reconsigning tariff provided that request for reconsignment must be made or confirmed in writing to its general freight agent at Baltimore, and under

doctrine laid down in 266 U. S. 92, tariff regulations could not be waived by acceptance of reconsignment order by its agent at Hagerstown Junction. As request was not made in accordance with tariff provisions no duty was placed upon carrier to reconsign shipment and storage and demurrage charges assessed were therefore applicable. Shreiner Lbr. Co. v. Director General, 123 I. C. C. 551.

STORAGE-IN-TRANSIT

See Facilities and Privileges §15; Storage.

(a) Complainant attacked defendant's failure to provide storage in transit on iron and steel pipe and fittings shipped from points east of the Mississippi river to destinations in Kansas, Oklahoma, Texas, Louisiana and Arkansas as unjust and unreasonable and unduly prejudicial. The transit arrangement sought would not eliminate interfield or back haul movements, and, if granted at St. Louis, a similar arrangement could not well be denied at other points or on other oil well supplies. The evidence does not establish that the storage in transit or other transit arrangements which complainants show are in effect on other commodities undulv prejudice them in any manner. Most of the commodities are articles of food and the transit service a stop over to complete loading or to partly unload. None of the commodities could be used by complainants in place of those here considered. Defendants do not now provide storage in transit on these commodities at other points between the pipe producing and consuming fields and no compelling commercial necessity or demand for its establishment has been shown. HELD: Defendant's failure to provide storage in transit not unreasonable or unduly prejudicial, complaint dismissed. Western Petroleum Refiners Asso. v. St. L. S. F. Ry., 113 I. C. C. 716.

(b) Respondents proposed to cancel rules providing storage in transit arrangements on iron and steel articles at Texas gulf ports. Transit arrangements are provided at the Texas gulf ports for various commodities moving on rates which in general are no higher than on iron and steel articles. The present storage arrangement places Galveston and Houston on a parity with respect to rates to Texas. If the storage arrangement is canceled, shipments stored at the ports will move on a combination of the rates to and from the ports, and Houston, because of its geographical situation, will have a rate advantage over Galveston ranging from 1.5 to 7 cents. The proposed schedules will restore the situation in effect prior to 1922 and remove the prejudice to the interior points by placing jobbers at the ports and interior points on a parity; that is to say, each will pay charges based on the combination of rates to and from the storage point. HELD, suspended schedules justified. Storage in Transit of Iron and Steel Articles, 120 I. C. C. 147.

(c) Proposal to cancel storage-in-transit arrangements at Texas Gulf ports on iron and steel articles from Atlantic Seaboard and southeastern territories to Shreveport, La., Texarkana, Ark.-Tex., and points in Texas, found justified. Storage in transit of above commodities is not permitted in the Southwest except at Texas Gulf ports and interior points are demanding that they be granted similar arrangements. If this is done, other localities will demand like treatment, eventually, resulting in establishment of storage in transit on iron and steel articles throughout the country, thereby imposing additional burdens on carriers and depleting their revenues. Proposed schedules will restore the situation in effect prior to establishment of storage arrangements at the Texas Gulf ports and remove prejudice to interior points by placing them on a parity with the Gulf ports. Storage in Transit on Iron and Steel Articles, 120 I. C. C. 147.

(d) Refusal of Southern Pacific Co. to permit creosoting or storage in transit at Oakland, Calif., on red-cedar poles and piling, originating in Oregon and Washington, destined to points on its line in California, while maintaining such arrangements at Springfield and East Milwaukee, Oreg., found not unreasonable or unduly prejudicial. Record indicates a dissimilarity of conditions at Oakland as compared with the Oregon points. Latter are directly intermediate to destinations on carrier's line, whereas route through Oakland necessitates an additional road haul and switching movement. Moreover, establishment of transit at Oakland would give complainant an advantage over its Oregon competitors because receipt of a large volume of poles and piling by steamer would enable it to use its tran-

sit credits to greater advantage than would be possible if all shipments came in by rail. Baxter & Co. v. S. P., 122 I. C. C. 498.

(e) Failure to provide for stopping in transit to partially unload shipments of Portland cement and wall plaster, in straight or mixed carloads, from Hanover and Trident, Mont., to western and central portions of North Dakota and South Dakota, while contemporaneously according this privilege to competitors at Steelton, Duluth, and Minneapolis, Minn., Mason City, Iowa, and Piedmont and Black Hawk, S. Dak., found unduly prejudicial. No order entered but carriers expected to provide for transit privilege in revising rates in accordance with findings herein. Three Forks Portland Cement Co. v. C., B. & Q., 129 I. C. C. 107, 118, 119.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. In General.

(a) Under section 4777 and section 4779, C. L. 1913, the railroad commissioners of the state have authority to compel train connections of competing lines when they are within one-half mile of any common point, when such connection does not place a burden on interstate commerce. Milhollan v. Great Northern Ry. Co., (N. D., 1925) 204 N. W. 994.

(b) The Congress of the United States has assumed full and complete control of physical connections between railroad companies engaged in interstate commerce, and, unless the Interstate Commerce Commission authorizes such connections, the state cannot compel such connections by reason of state laws. A. & V. Railway Co. v. Jackson & Eastern Railway Co., 271 U. S. 244, 46 S. Ct. 535, 70 L. Ed. 928. Alabama & V. Ry. Co. v. Jackson & E. Ry. Co., (Miss., 1927) 110 So. 865.

§2. Jurisdiction of Commission.

See Interstate Commerce Commission I; Jurisdiction of Commission.

(a) Under that portion of paragraph (3) of section 3 of the act which requires that all carriers shall, according to their respective powers, afford all reasonable,

proper, and equal facilities for interchange of traffic between their respective lines, the commission has power to deal with an issue involving, as here, establishment of switch connection between carriers. See 81 I. C. C. 333. Breckenridge Chamber of Commerce v. W. F., R. & F. W., 109 I. C. C. 81, 82.

II. ABSORPTION OF SWITCHING.

See Absorption of Charges §3.

§3. In General.

(a) Switching charges in addition to through rates assessed on shipments receiving transit at Meridian, Miss., found illegal. While transit tariff provided that such charges would be in addition to through rates, tariffs of outbound carriers provided for their absorption, no distinction being made between shipments originating at transit point and those originating beyond. If it was desire of carriers to exclude transit shipments from general absorption provisions they should have done so by plain langauge rather than by inference, and their failure to do so can not cast burden of paying charges upon shipper. Reparation awarded. Sturges Co. v. A. & V., 107 I. C. C. 136.

(b) A general provision in a tariff to effect that a carrier will absorb switching charges of "connecting lines" on traffic received by it as a certain point in transit as an incident to a through to cover all traffic, whether originating at point of absorption or handled there equivocal language to contrary, be taken most, in the absence of clear and unmovement from a point beyond. Sturges Co. v. A. &. V., 107 I. C. C. 136, 138, 139.

(c) Upon further hearing, rates on ice from interstate origin points to Chicago and South Omaha found reasonable in previous reports, 62 I. C. C. 618 and 87 I. C. C. 81, found to include absorption of switching charges of delivering terminal lines. While contemporaneous line-haul and switching tariffs were of equal weight in their respective spheres, in absence of cross reference between them, in accordance with rules 10 (a) and 10(d) of Tariff Circular 18-A, they were usable in combination to make a through rate, just as two local tariffs, of line-haul carreirs would be. One provision of switching tariff, binding upon line-haul carriers parties thereto, was that switching charges would be absorbed. Reparation awarded. Wilson & Co. v. Director General, 107 I. C. C. 580.

(d) Proposal of C. & N. W. and C., M. & St. P. to cancel absorption of switching charges on interstate shipments of ice from points in Illinois and Wisconsin to deliveries on lines of their connections in Chicago district, resulting in increased through charges, found justified in part. Net revenue accruing to respondents after absorption of connecting-line charges is insufficient to cover line-haul movement. Moreover, where originating carrier has no direct connection with delivering line respondents are entitled to some compensation for additional cost incident to trackage rights over intermediate lines. Ice from Illinois and Wisconsin, 109 I. C. C. 3.

(e) Upon reargument, nonabsorption of switching charges of Pittsburgh, Allegheny & McKees Rocks R. R., on traffic to and from points of unloading and loading at complainant's plants at McKees Rocks and Allegheny, Pa., during Federal control, found not to have resulted in unreasonable charges because in excess of Pittsburgh district rates. Finding in former report, 93 I. C. C. 224 affirmed. Pressed Steel Car Co. v. Director General, 109 I. C. C. 75.

(f) Upon contention that failure of the Wabash Ry. to absorb switching charges of the Nickel Plate on sand and gravel at LaFayette, Ind., on traffic moving to points in Illinois, while contemporaneously absorbing such charges on intrastate traffic, resulted in undue prejudice. HELD: Intrastate absorptions resulted from an order of the State commission, complainant does not allege a violation of section 13 of the act, nor is evidence such as would sustain a finding of unjust discrimination against interstate commerce under that section. Western Indiana Gravel Co. v. N. Y., C. & St. L., 109 I. C. C. 727, 731.

(g) Proposal of C. & N. W. Ry. to increase from $3 to $5 per car the maximum amount of its absorption of the Laona & Northern's switching charge to and from plant of the Connor Land & Lbr. Co., at Snyders, near Laona, Wis., found not justified. While establishment of such absorption would attract some traffic to the North Western's line, in 49 I. C. C. 75 it was held that the Laona was entitled to no greater switching allowance than $2 per car, and in 92 I. C. C. 23 the present $3 allowance was found not inadequate although the North West-

ern was willing to pay $5 and although the Laona was operating at a deficit. The commission further found that to permit a $5 absorption would be to accord the Laona a preference over other lines operating largely under similar circumstances and conditions. No showing is here made of actual cost of interchange nor is there anything of record that would warrant a conclusion different from that previously reached. Absorption of Switching Charges at Laona, Wis., 112 I. C. C. 115.

(h) In shipments destined to Atlanta, Ga., complainant with expectation of securing at Atlanta, as an intermediate point, the application of a rate published to Westwego Elevators, La., specified routing beyond East St. Louis gateway via Illinois Central R. R. Based upon fact that the Illinois Central does not reach Westwego Elevators with its own rails, complainant contended that routing instructions in tariff were incomplete and permitted any routing not specifically prohibited over lines parties thereto, provided the Illinois Central first be given a road haul. HELD: Routes to New Orleans, where Westwego Elevators are located, through East St. Louis, as described in tariff are complete, and since tariff also provided for absorption by Illinois Central of delivering line's switching charges the routing to Westwego Elevators specified in tariff were not made incomplete by failure to name in connection therewith the switching line between that point and New Orleans. Hogan Bros. v. C., B. & Q. R. R., 113 I. C. C. 223.

(i) In a proceeding to determine the propriety of switching charges absorbed by carriers the commission must consider them as though they were to be charged for by the railroad rendering the service and paid for by shippers. Switching at Lamar and Harrisonville, 115 I. C. C. 393, 395.

(j) Determination of a reasonable practice governing the application of interchange switching charges should not be controlled by the extent of a switching district or by the arrangements under which carriers absorb switching charges to reach industries on other lines. Rates of Peoria & Pekin Union Ry., 115 I. C. C. 469, 511.

(kl) Mixed vegetables from industries on the Santa Fe and Pacific Electric railways at Los Angeles, Calif., destined to Salt Lake City and Ogden, Utah, are subjected to switching charges at Los Angeles, while on shipments originating beyond Los Angeles switching charges are absorbed and the Los Angeles rate assessed. Upon complaint alleging unreasonableness, HELD: It is practice of carriers in the West to absorb switching charges only on competitive business. Traffic originating beyond Los Angeles constitutes competitive business, whereas the traffic here involved is not competitive. Frank Produce Co. v. Director General, 118 I. C. C. 88.

(m) Failure and refusal of the C., M. & St. P. Ry., to absorb switching charges of connecting lines at Elgin, Ill., and Racine, Wis., on interstate shipments of sand, gravel, and crushed stone, while absorbing such charges on various other commodities, found not unduly prejudicial. Chicago Gravel Co. v. A., T. & S. F., 118 I. C. C. 633.

(n) Fact that a carrier absorbs switching charges on various commodities but does not absorb such charges on sand and gravel does not warrant a finding of undue prejudice. See 36 I. C. C. 259; 69 I. C. C. 688. Chicago Gravel Co. v. A., T. & S. F., 118 I. C. C. 633, 651.

(o) Complainant alleged the refusal of defendant to absorb inbound and outbound switching charges at Kansas City on certain shipments of grain and grain products, in carloads, shipped between Aug. 1 and Dec. 26, 1924, from Kansas City to certain competitive points, resulted in unreasonable charges. The tariff is confined to rules and regulations governing transit on grain, etc., within the Kansas City switching district. It is limited to Kansas City. Item 200 read alone, is ambiguous. But when the scope of the tariff is considered and due weight is given to the fact, that item 190 is the only item in the tariff which refers to item 200, the conclusion seems clear that Kansas City is the point from which the "equal rates" are to apply in determining whether a certain point is a "comparative point" within the meaning of the tariff. HELD, defendants refusal to absorb the switching charges illegal, overcharges to be refunded, complaint dismissed. Davis-Noland-Merrill Grain Co. v. St. L., S. F. Ry., 120 I. C. C. 87.

(p) Transit tariff of St. L.-S. F. Ry., provided for absorption of switching charges of connecting lines at Kansas

City, Mo.-Kans., on shipments of grain and products moving via its line destined to competitive points. Another item defined competitive points as those to which "equal rates" are in effect via lines other than St. L.-S. F. Ry. Carrier construed a competitive point as one to which rates from point of origin to ultimate destination were same in connection with its line via Kansas City as over lines of other carriers, and refused to absorb switching charges. HELD: Item defining competitive points is ambiguous when read alone. However, when read in connection with item providing for absorption of switching charges, it is clear that Kansas City is the point from which the "equal rates" are to apply in determining which points are competitive within meaning of tariff. Refusal to absorb switching charges was therefore not in accord with carrier's tariff and resulted in illegal charges. Refund of overcharges directed. Davis-Noland-Merrill Grain Co. v. St. L.-S. F., 120 I. C. C. 87.

(q) Conference ruling 304 (d) authorizes carriers to absorb switching charges on competitive and not on noncompetitive traffic, even though departures from long-and-short-haul provision of the fourth section may result therefrom, but that rule does not authorize this to be done in violation of the aggregate-of-intermediates provision of section 4. Bissinger & Co. v. G. N., 120 I. C. C. 745, 748.

(r) Respondent, Frisco, proposed to cancel its absorption of switching charges of connecting lines on grain, feed and hay moving to North Kansas City, Mo. Respondent under its present rule absorbs switching charges of connecting lines of $6.30 per car on all traffic to and from North Kansas City. If the suspended schedule is permitted to become effective, the existing preference of protestant and other industries at North Kansas City and prejudice against industries at Kansas City will be removed. The desirability of such a result is obvious. If, as contended by protestant, its plant is directly intermediate to St. Joseph within the meaning of the fourth section, it is worthy of note that industries in Kansas City, where the switching charges on grain, seeds, and hay are not absorbed, are quite as directly intermediate to its plant. Without undertaking, upon this record, to which only one of the carriers entering Kansas City is party, to decide the various fourth section questions which might arise in this as in any other switching district upon such a contention as that made by protestant, and which should be dealt with in an appropriate proceeding upon an adequate record, the Commission is of the opinion that the desirability of placing protestants industry upon the same basis as all other industries similarly situated within the Kansas City switching limits outweighs the possibility that on some future record a violation of the fourth section may be found to have resulted. HELD, suspended schedules justified Switching charges at North Kansas City, 122 I. C. C. 73.

(s) Proposal of St. L.-S. F. Ry., to cancel absorption of switching charges of connecting lines on grain, feed, and hay, moving to North Kansas City, Mo., a separate municipality within Kansas City switching district, for purpose of correcting an oversight by which North Kansas City was excepted from the rule providing for nonabsorption of such charges on inbound shipments to all points within Kansas City switching district, found justified. Grain is one of the most highly competitive commodities handled by carriers reaching Kansas City, and is accorded liberal transit arrangements and other services. Purpose of carriers in publishing above exception is to hold grain to their own elevators in order to secure the outbound haul, and placing of all industries within Kansas City switching district on an equal basis will remove undue preference of North Kansas City. Switching at North Kansas City, 122 I. C. C. 73.

(t) Absorption by trunk-line carriers of switching charges of Hutchinson & Northern Ry., at Hutchinson, Kans., on salt shipments, FOUND not unjustly discriminatory or unduly prejudicial. Hutchinson & Northern is a common carrier engaged in interstate commerce, files its tariffs and reports with the Kansas Public Utilities Commission and with this commission, is recognized by connecting lines as a common carrier and as such may have its charges absorbed by line-haul connections. American Salt & Coal Co. v. C., R. I. & P., 126 I. C. C. 7.

(u) It is not necessary that a switching line whose charges are absorbed be named as a party defendant in a complaint alleging unreasonableness of rates. See 50 I. C. C. 203. Sinclair Crude Oil Co. v. A., T. & S. F., 126 I. C. C. 73, 74.

(v) Combination rate on paving brick

from Buffalo, Kans., to McCook, Nebr., subject to switching charge at Superior, Nebr., found unreasonable as compared with joint-line rates contemporaneously in effect on cement on which switching charge is absorbed; with distance rates prescribed in 77 I. C. C. 22 from Mason City, Iowa, to destinations in Nebraska and South Dakota; and to extent it exceeded joint-line distance rate prescribed in 77 I. C. C. 4, from Sioux City Iowa, to Nebraska points for comparable distances. Reparation awarded. Buffalo Brick Co. v. M. P. Ry., 126 I. C. C. 744.

(w) Complainant purchases practically all of its lumber supply consisting of white pine, from small sawmills in Idaho and Washington and ships this lumber in the form of planks of varying widths, about 2 inches thick, from the sawmills to its plant at Spokane, Wash., where it is sawed into match blocks 2.375 inches long which are then shipped to its eastern factories. This milling operation is conducted under transit arrangements which allow a period of 12 months for its consummation and which apply only when the match blocks move out of Spokane by the line which brought the planks in. Complainant is on the C. M. & St. P. and O. W. R. R. & N. When complainant's lumber is brought to Spokane by lines other than the Milwaukee and Oregon-Washington, a switching charge of $3.60 per car is assessed to and from complainant's plant on the inbound and outbound movements These switching charges are absorbed by the line haul carrier when the lumber originates at competitive points, but not when it originates at non-competitive points. No switching charges are assessed when the lumber originates on either the Milwaukee or the Oregon-Washington. Original report in 102 I. C. C. 353, Federal Match Corp. v. G. N. Ry. There is nothing of record which would warrant a finding that the refusal to absorb the switching charges under the circumstances is in violation of either section 2 or 3. Complainant admits that the charge, as such, is not unreasonable, and no evidence was offered to show that the through charges, made up of the line haul rate plus the switching charge, are unreasonable. There would seem to be little justification for the maintenance of graded charges for the transit of this lumber at Spokane. The evidence of record, however, is insufficient for the determination of a reasonable flat transit charge on the traffic involved. Under all the circumstances it would seem that 18 months would not be an unreasonably long transit period for complainant's shipments. HELD: Refusal to absorb switching charges on shipments originating at noncompetitive points not unreasonable, unjustly discriminatory or unduly prejudicial; transit period unreasonable to extent it is less than 18 months; graded transit charges dependent upon the length of the inbound haul on shipments of lumber unreasonable, and a reasonable flat transit charge should be published. Federal Match Corp. v. G. N. Ry., 128 I. C. C. 415.

(x) Upon further hearing, finding in previous report, 102 I. C. C. 353, that switching charges and assessment thereof in addition to road-haul rate on lumber from sawmills in Idaho and Washington, milled in transit at Spokane, Wash., are not unreasonable, discriminatory, or unduly prejudicial, affirmed. Nothing of record would warrant a finding that refusal to absorb switching charges under such circumstances as described is in violation of either section 2 or 3 of the act, as tariff provisions with respect to switching charges and their absorption which apply to complainant's traffic apply also to traffic of its competitors. Moreover, in 49 I. C. C. 613; 88 I. C. C. 413, it was found that carriers may lawfully absorb switching charges on competitive traffic and refuse to absorb them on traffic that is not competitive, so long as all shippers similarly situated are treated alike. Federal Match Corp. v. G. N., 128 I. C. C. 415.

(y) Tariff provided for absorption of switching charges on lumber when shipments originated at competitive points but not when they originated at non-competitive points. Upon contention that term "competitive traffic" as used in tariffs should include all shipments of lumber on ground that more or less competition is always present in purchase of that commodity. FOUND: That is not the meaning of this term as used in connection with absorption or non absorption of switching charges, competition as there used relating only to competition between carriers for the traffic. Federal Match Corp. v. G. N., 128 I. C. C. 415, 417.

(z) Failure of connecting carrier to absorb switching charges at Chicago on traffic coming into Cincinnati over one

line of L. & N., while absorbing such charges on traffic arriving over certain other lines, found not to have resulted in unreasonableness, discrimination, or undue prejudice. The L. & N. contended that absorption of such charges is wrong in principle and contrary to practices of carriers throughout the country, and cited 68 I. C. C. 283, wherein commission stated that a carrier can not be compelled to absorb switching charges of connecting line in absence of discrimination or prejudice. Here routes over which shipments could move, and rates applicable thereto were open to all shippers alike and evidence fails to support allegations of undue prejudice or preference. Sanzone-Palmisano Co. v. L. & N., 128 I. C. C. 515.

(aa) Complainant alleged that charges collected for switching two carloads of grapefruit at Chicago, Ill., were unreasonable, unjustly discriminatory and unduly prejudicial. Shipments originated at Lucerne Park and Fuller, Fla. Both moved to Cincinnati over L. & N. thence Big Four and I. C. On arrival at Chicago the cars were switched from the team tracks of the I. C. to the fruit auction house by the C. M. & St. P., and switching charges assessed of 7.5c per 100 pounds, minimum 24,000 pounds. The Big Four publishes a tariff providing for the absorption of switching charges, not to exceed 7.5c per 100 pounds, on citrus fruit, in carloads, originating south of the Ohio river and east of the Mississippi river, and received by it at Cincinnati from the C. N. O. & T. P., or the N. & W. for delivery to the Chicago Fruit Auction House. The switching charge of the Milwaukee at Chicago is not absorbed on traffic delivered to the Big Four at Cincinnati by the L. & N. No showing is made with respect to the reasonableness or unreasonableness of the rate for the line haul movement or of the charge for the switching service at Chicago. The routes over which shipments could move, and the rates applicable thereto, are open to all shippers alike and there is no evidence that any person, locality or commodity is subjected to any undue prejudice or preference. HELD: Switching charges collected not unreasonable or otherwise unlawful, complaint dismissed. Sanzone Palmisano Co. v. L. & N. R. R., 128 I. C. C. 515.

(bb) In the absence of unjust discrimination or undue prejudice a carrier can not be compelled to absorb the switching charges of a connecting line. Sanzone Palmisano Co. v. L. & N. R. R., 128 I. C. C. 515, 516.

(cc) In a proceeding to determine the propriety of switching charges it is immaterial whether such charges are absorbed by carrier or paid for by shippers as they must be considered as though they were to be charged for by carrier and paid for by shipper. True, carrier is entitled to make a charge for its service if it sees fit, but it is entitled only to a reasonable compensation for service performed. Its charge may not be so high as to restrict or deter a particular movement. See 47 I. C. C. 583, and other cited cases. Mitchell Chamber of Commerce v. C., M. & St. P., 129 I. C. C. 451, 455.

(dd) A carrier can not be compelled to absorb switching charges of a connecting line in absence of unjust discrimination or undue prejudice. See 49 I. C. C. 613. Romann & Bush Pig Iron & Coke Co. v. A., T. & S. F., 129 I C. C. 509, 510.

(ee) Refusal of defendant to absorb connecting line switching charges assessed at destination on traffic originating at points exclusively on its line and delivered to so-called off-line industries found not to result in violation of tariff prvisions. Record indicates that the traffic involved was local to defendant's rails and noncompetitive in character from a transportation standpoint, and governing tariff contains no provision for absorption by defendant of destination switching charges of other lines on that class of traffic. Southern Kansis Millers Club v. A., T. & S. F., 129 I. C. C. 632.

III. DISCRIMINATION AND REASONABLENESS OF CHARGES.

See Discrimination; Reasonableness of Rates.

§4. In General.

(a) Shipments of matches moving from Chico, Calif., to destinations in Washington were assessed a rate to Portland, Oreg., higher than proportional rate applicable over a route other than route of movement to St. Johns, situated within corporate and switching limits of Portland. Lower rate was restricted to destinations other than those here involved and carried a switching charge at Portland also restricted to

switching service performed in connection with a line haul. There was no switching in connection with a line haul via route of movement, and an out-of-line haul would have resulted had traffic moved through St. Johns. FOUND: Rates assessed were not unreasonable or otherwise unlawful. Diamond Match Co. v. Director General, 104 I. C. C. 147.

(b) Tariff governing switching charges from South Omaha to Omaha carried separate charges, lower applying when added to line-haul rates and representing a separate charge for terminal services, higher when covering entire charge from shipper to consignee. No facilities being maintained by carriers at South Omaha for acceptance of l. c. l. shipments, complainant was compelled to switch c. l. shipments to Omaha, from which point they were reforwarded in l. c. l. lots and higher charges assessed. FOUND: Higher charge, which merely covered a c. l. movement and was not a specific charge for trap or ferry cars with provisions for acceptance and distribution of commodity shipped, was legally applicable. Moreover, shipments would not have been accepted at South Omaha in l. c. l. lots; there was an essential difference between their character from that point and from Omaha; and, continuity of c. l. movement was destroyed by breaking it up into l. c. l. shipments. Armour & Co. v. Director General, 104 I. C. C. 603.

(c) Applicable rates on articles named in uniform brick list from complainant's plant at East St. Louis, to destinations within switching district of St. Louis, Mo., found not unreasonable or otherwise unlawful as compared with rates from farther distant competing points in Illinois and Missouri. Rates from complainant's plant are lower than those from more distant points in Illinois, and are as low as or lower than rates prescribed for similar distances in the Brick case, 68 I. C. C. 213. It is not shown that complainant has lost any sales in St. Louis by reason of adjustment complained of; moreover, shipments from its plant for delivery in St. Louis switching district move freely under present rates. H. & R. Mining & Mfg. Co. v. A. & S., 104 I. C. C. 671.

(d) Switching charges in addition to through rates assessed on shipments receiving transit at Meridian, Miss., found illegal. While transit tariff provided that such charges would be in addition to through rates, tariffs of outbound carriers provided for their absorption, no distinction being made between shipments originating at transit point and those originating beyond. If it was the desire of carriers to exclude transit shipments from general absorption provisions they should have done so by plain language rather than by inference and their failure to do so can not cast burden of paying charges upon shipper. Reparation awarded. Sturges Co. v. A. & V., 107 I. C. C. 136.

(e) Shipment of potatoes from Almora, Minn., to Tinley Park, Ill., was billed to complainant's order with instructions that it be held at Burr Oak yard, Blue Island, Ill. Carrier routed Soo Line to Chicago and Rock Island beyond. A lower rate applied in connection with the Soo Line to Minneapolis and the Rock Island beyond, but over such lower-rated route it would have been necessary in order to comply with billing instructions, to transport shipment through Tinley Park to Burr Oak yard and then back haul it. Such lower rate was not applicable in connection with such a back-haul movement. On other hand, Burr Oak yard is directly intermediate between Almora and Tinley Park via route of movement. Shipment found not misrouted. Thoeming & Co. v. M., St. P. & S. S. M., 107 I. C. C. 658.

(f) Rates on logs for movement from Cooper's point to Victor Talking Machine Company's siding, both points being within the switching district of Camden, N. J., the original movement having been by barge from James River landings, Va., found unreasonable as compared with charges on various commodities for similar hauls between points within the Philadelphia industrial district, and to extent they exceeded lower switching charge contemporaneously in effect for the same movement on logs but restricted in its application so as not to apply on shipments arriving at or moved from Camden by water. Reparation awarded. Rickards v. P. R. R., 109 I. C. C. 297.

(g) Complainant attacked $20 charged for switching at Boston, Mass., a carload of apples shipped March 14, 1924, from Peshastin, Wash., to Tampa, Fla., and reconsigned to Boston as inapplicable. Shipment arrived at New London, Conn., on the New Haven. Thereafter complainants Boston representative telegraphed the New Haven agent at New London to further reconsign the

shipment to Boston and on the afternoon of the following day again telegraphed the same agent to route the shipment Boston & Maine auction delivery. The shipment was then enrouted. It arrived at Boston within an hour after the second telegram was sent and was placed on the tracks of the New Haven. Delivery was not made nor attempted at that point and in compliance with the second telegram the shipment was soon afterwards switched to the auction tracks of the B. & M., where it was unloaded, charged $20. That charge was applicable if, as defendants in effect contend, the interstate character of the shipment terminated when it was placed on the tracks of the New Haven. If not, the governing tariff provided a charge of $10 in addition to the line haul rate for the movement thence to the auction tracks of the B. & M., and for the absorption of that charge by the New Haven. The facts of record are convincing that the character of the shipment under consideration was interstate from the time it left Peshastin until it came to rest on the auction tracks of the B. & M. HELD, charge attacked inapplicable, reparation awarded. Gwin White & Price v. N. Y. N. H. & H. R. R., 112 I. C. C. 707.

(h) Rate on sand from Michigan City, Ind., to points on connecting lines in Chicago, Ill., switching district, found not unreasonable or unduly prejudicial as compared with lower rates from Dune Park, Aetna, Millers, and Gary, Ind., and other near-by competing producing points. The comparisons, based merely upon differences in distance do not constitute sufficient justification for a finding either of unreasonableness or of undue prejudice, the differential between Michigan City and alleged preferred points is less than that prescribed by commission between the inner and outer zones, Michigan City having been found to be properly included in the higher 52-mile scale, whereas alleged preferred points are in the lower 35-mile scale, indicating that alleged preferred points are entitled to advantage of their location. Furthermore, certain of these points are not served by same carriers serving Michigan City. Bos Sand Co. v. A., T. & S. F., 112 I. C. C. 121.

(i) Shipment arrived at New London, Conn., and reconsignment to Boston ordered. On following day complainant by telegraph requested "Boston & Maine auction delivery," but shipment having gone forward, arrived at Boston and was placed on tracks of the New Haven, where no delivery was made or attempted. Subsequently it was switched to auction tracks. Upon contention that interstate character of shipment terminated when it was placed on the New Haven's tracks, FOUND: Since character of the shipment was interstate from time it left Peshastin, Wash., the point of origin, intrastate switching charge collected for the movement from the New Haven's tracks to the auction track was inapplicable. Applicable interstate tariff provided a lower charge and for its absorption by the New Haven. Reparation awarded. Gwin, White & Price v. N. Y., N. H. & H., 112 I. C. C. 707.

(j) Complicated switching movements are not confined to joint-line hauls of c. l. traffic. The switching and classification of cars at terminal or division points enroute is a frequent incident of single-line movements. Nor is the transfer of l. c. l. freight from car to car confined to joint-line hauls. It also happens in many single-line hauls and is frequently performed at special transfer stations designed for the purpose as an aid to economical and expeditious handling of freight. Southern Class Rate Investigation, 113 I. C. C. 200, 205.

(k) Practice whereby east-side lines require west-side lines to bear expense of transferring across the river from East St. Louis, Ill., to St. Louis, Mo., interstate westbound freight moving under combination rates which are same on St. Louis as on East St. Louis, found unreasonable. Usual practice among rail carriers throughout the country is to divide switching expenses when services of an intermediate carrier are utilized in effecting an interchange of traffic, the switching charges being absorbed by carrier that delivers traffic to its connection. Moreover, there is a generally recognized obligation on part of all carriers on through traffic to make delivery on rails of connections, either direct or by bearing charges of intermediate switching line. Reasonable practice prescribed for the future and reparation denied. C., R. I. & P. v. B. & O., 113 I. C. C. 681.

(l) M. P., respondent, proposed to increase its charges for switching interstate road haul shipments between connecting lines and industries on its own line at Lamar, Mo., from $2.25 to $6.30

per car. Lamar is reached by the M. P., and the Frisco. Harrisonville is reached by the M. P., Frisco and M. K. T. The tables show that on June 24, 1918, there were uniform switching charges of $3 at Lamar and $2 at Harrisonville, and that at the present time the charge of the Frisco and Katy is $6.30, as compared with the M. P. charge of $3.60 at Lamar and $2.25 at Harrisonville. The intrastate switching charge of the Frisco at both points was made $6.30 on July 1, 1926. Respondent's primary object in proposing the increases is to make its switching charges at Lamar and Harrisonville uniform with those of the Frisco and Katy. Each of the three lines absorbs the switching charges of the others on competitive traffic. HELD: Schedules justified. Switching at Lamar and Harrisonville, 115 I. C. C. 393.

(m) There is no evidence tending to show that respondent should be required to maintain a lower switching charge than that applied generally by other trunk lines in the same district for a like kind of service. Switching at Lamar and Harrisonville, 115 I. C. C. 393, 395.

(n) Complainant attacked commodity rates charged on brick and hollow building tile, carloads, since May 23, 1923, from Vale, Mo., to Kansas City, Mo.-Kans., as unreasonable, unjustly discriminatory and unduly prejudicial. Rate charged from May 23, 1923, to Sept. 15, 1925, was 3.5c and thereafter 4.5c. Complainant alleged these rates were unreasonable and unduly prejudicial to extent they exceeded 2.5c, the switching rate in effect on carloads of brick in the Kansas City switching district in excess of 5 miles. Vale is outside of the Kansas City switching district, 9 miles from Leeds, Mo., the nearest point within the district. HELD: Rate attacked not unreasonable or otherwise unlawful, complaint dismissed. Kansas City Brick Co. v. C. R. I. & P. Ry., 115 I. C. C. 750.

(o) Proposal of Missouri Pacific to increase its charges for switching between connecting lines and industries on its own line at Lamar and Harrisonville, Mo., for purpose of making such charges uniform with those of the Frisco and the Katy at those points, found justified. Each line involved absorbs the switching charges of the other on competitive traffic; uniform switching charges were formerly in effect; and there is no evidence tending to show that the Missouri Pacific shoud be required to maintain a lower switching charge than that applied generally by other trunk lines in same district for like kind of service. Moreover, in 102 I. C. C. 559 a charge equal to that here proposed was found not unreasonable for switching at Arkansas City, Kans. Switching at Lamar and Harrisonville, 115 I. C. C. 393.

(p) In a proceeding to determine propriety of switching charges absorbed by carriers, the commission must consider them as though they were to be charged for by railroad rendering the service and paid for by shipper. See 61 I. C. C. 205. Switching at Lamar and Harrisonville, 115 I. C. C. 393, 395.

(q) Upon further hearing, proposed charges of Peoria & Pekin Union Ry. Co., for intermediate switching in Peoria switching district, and for intermediate switching between the Minneapolis & St. Louis R. R., and carriers in East Peoria, found unreasonable to extent any separate charge is assessed against the M. & St. L. or shippers, as well as unduly prejudicial and preferential of the C., B. & Q. and Rock Island railroads. Former reports, 68 I. C. C. 412; 77 I. C. C. 43; and 93 I. C. C. 3. Rates of P. & P. U. Ry., 115 I. C. C. 469.

(r) The value of a cost study showing average cost per unit of switching, obviously depends upon selection of a test period representative as to number of cars handled, a careful count of actual number switched, and proper assignment and apportionment of expenses to switching service involved. Rates of P. & P. U. Ry., 115 I. C. C. 469, 487.

(s) Determination of a reasonable practice governing application of interchange switching charges should not be controlled by extent of a switching district or by arrangements under which carriers absorb switching charges to reach industries on other lines. Rates of P. & P. U. Ry., 115 I. C. C. 469, 511.

(t) Upon a consideration of the character of service and cost studies submitted in evidence, a division of $3 per loaded car, which covers empty as well as loaded movement, found just, reasonable, and equitable to the Peoria & Pekin Union Ry. Co., for interchanging freight cars between all connecting lines in the Peoria switching district. Rates of P. & P. U. Ry., 115 I. C. C. 469, 481, 497, 513, 514.

(u) Failure or refusal of carrier to compensate complainant, out of line-haul rates, for interchange switching performed by latter on c. l. shipments between points within its industrial plant at Minetto, N. Y., and point of interchange at that place, found not to violate the act. Here complainant of its own volition elected to perform service which carrier formerly performed, and does not seek or desire its resumption, but seeks compensation only. The settled doctrine, however, is that carrier has right to complete service included within its rates, and when deprived of that opportunity by action of shipper it can not be required to pay compensation therefor. Moreover, allowances contemplated by section 15 (13) are optional with carriers, and commission is empowered to fix merely the maximum that may be paid. Columbia Mills v. D., L. & W., 118 I. C. C. 112.

(v) Charge of $5 per car proposed by Kanawha Central Ry. to apply at mine sidings on its line, to cover switching and set-out service where consignors designate certain cars for billing and such cars are not in consecutive order from point of interchange, found not justified. While rule is intended to cover instances in which mines bill out coal cars standing near its tipple when same kind or size of coal in same kind of equipment is held unbilled in cars standing nearer connection with its line, thus unnecessarily requiring the pulling out and setting back of such unbilled cars, such rule does not conform to intention or desire of carrier and would result in increased transportation charges which have not been shown to be reasonable. Switching Charges at K. C. Ry. Mines, 118 I. C. C. 468.

(w) Rates on sand from Lawrence, Kans., to destinations within a radius of 150 miles east of Kansas City, Mo., found unreasonable and unduly prejudicial to extent they exceed by more than 20 cents per ton rates from Turner, Muncie, Grinter, Sirridge, and Armourdale, Kans., competing points accorded Kansas City basis of rates. Reasonable and nonprejudicial rates prescribed for future. Jackman & Jackman v. A., T. & S. F., 118 I. C. C. 547.

(x) Rate on sand from Lawrence, Kans., to Kansas City, Mo.-Kans., found unreasonable and unduly prejudicial to extent it exceeds by more than 1 cent per 100 pounds the rate from points within Kansas City switching limits and Muncie and Grinter, Kans., to points in Kansas City switching district. Taking into consideration low grade of sand and keen competition in its sale, the difference in rate from Lawrence is too high as compared with those from Kansas City district points. Reasonable rate prescribed for future. Jackman & Jackman v. A., T. & S. F., 118 I. C. C. 560.

(y) Switching charge assessed for movement of lumber at Detroit, Mich., was assessed on basis of charge in effect on date when movement was made. HELD, as shipment involved was not a reshipment, applicable switching charge thereon was charge in effect on date shipment originated. Milne Lbr. Co. v. M. C. R. R., 118 I. C. C. 580, 582.

(z) Proposed increases in interstate rates on sand, gravel, and crushed stone within Chicago switching district and from the district to destinations just outside, pursuant to commission's decision in 109 I. C. C. 441, found justified in part. Chicago Gravel Co. v. A., T. & S. F., 118 I. C. C. 633.

(aa) Respondent, Wabash, proposed generally to increase its switching rates on carload freight in and about St. Louis, Mo. Present reciprocal rate for switching in the city is usually 1.5c, although there are a few rates as low as 0.5c and some as high as 2c. On industrial switching the rate quite generally applied at present is 2c, minima $8.10 and $9.50 per car. The proposed rate on most traffic, reciprocal and industrial, is 2c, although in a few instances the rates proposed are 1.5c for certain reciprocal switching and 2.5c for certain industrial switching. For various practical reasons, it is desirable that switching rates be on somewhat of a postage stamp basis. It is impracticable to reflect the same refinements of rate making in switching rates as in line haul rates. Instead of publishing rates in cents per 100 pounds, it would seem more simple and practical to follow the usual plan of publishing a few flat charges per car, to apply regardless of weight, thus reducing clerical work in billing, avoiding the expense of weighing cars, and preventing the discriminations which would arise out of weighing some cars and not others. HELD, proposed schedules not justified but without prejudice to establishing of: Where the proposed rate is not over 1.5c per 100 pounds or the equivalent thereof, a flat charge of $8

per car may be established for reciprocal and one of $10 for industrial switching. Where the proposed rate is over 1.5c and not over 2c per 100 pounds, a flat charge of $10 per car may be established for reciprocal and one of $12 per car for industrial switching. Where the proposed rate is 2.5c, a flat charge of $12.50 per car for reciprocal and $15 per car for industrial switching. Switching at St. Louis and East St. Louis, 120 I. C. C. 216.

(bb) Distance is not necessarily a controlling factor in switching costs. Switching at St. Louis and East St. Louis, 120 I. C. C. 216, 221.

(cc) Complainant attacked rates on green and green salted hides, green and green salted pelts, and tallow, in straight and mixed carloads, from Billings, Butte and Missoula, Mont., and Wenatchee, Wash., to Portland, Ore., for delivery at complainants warehouse on the N. P. T. Ry., as unreasonable and that the additional charge of 29.5c per ton, minimum $5.85 per car, for switching Wenatchee shipments to that warehouse as unreasonable and excessive in that no charge is made for switching Seattle, Wash., shipments to complainants warehouse, although the sum of the local rates, Wenatchee to Seattle and Seattle to Portland, is less than the specific rate from Wenatchee by 2.5c plus switching charge. Wenatchee is the only point which is not accorded a commodity rate on this traffic. HELD, rate attacked unreasonable to extent it exceeded 62.5c from Sept. 13, 1921 to June 30, 1922 and 56.5c thereafter reparation awarded. Bissinger & Co. v. G. N. Ry., 120 I. C. C. 745.

(dd) Charges on cement from Humbolt, Kans., to a lead track to the spur of Metropolitan water district and Metropolitan water-district station, private industries within the Omaha switching district, and two miles from Florence, Nebr., also within the district, found unreasonable to extent they exceeded lower rates, plus switching charges, contemporaneously in effect to California Junction, Iowa, and Omaha, to which the lead track is intermediate. Reparation awarded. Monarch Cement Co. v. C., St. P., M. & O., 120 I. C. C. 4.

(ee) Proposed increased switching rates in and about St. Louis, Mo., found not justified for application as a whole. In justification of proposed rates carriers introduced in evidence the results of a cost study based on the so-called Coverston-Sauer formula. Proposed rates are higher than those in effect at Kansas City, but compare favorably with those in effect at such points as Boston and Detroit. However, instead of publishing rates in cents per 100 pounds, as proposed, it would seem more simple and practical to follow the usual plan of publishing flat charges per car, thus reducing clerical work in billing, avoiding expense of weighing cars, and preventing discriminations which would arise out of weighing some cars and not others. Accordingly specific flat charges per car approved for application on all traffic generally. Switching at St. Louis and East St. Louis, 120 I. C. C. 216.

(ff) Distance is not necessarily a controlling factor in switching costs, the time consumed in rendering service being of more importance. Switching at St. Louis and East St. Louis, 120 I. C. C. 216, 222.

(gg) It is impracticable to reflect the same refinements of rate making in switching as in line-and-haul rates. For practical reasons, it is desirable that switching rates be on somewhat of a postage-stamp basis. Switching at St. Louis and East St. Louis, 120 I. C. C. 216, 222.

(hh) Sand and gravel from Beloit, Wis., to Beach and Waukegan, Ill., and Kenosha, Wis., were routed via complainant's gravel pit, Libertyville, Ill., care of Chicago, North Shore & Milwaukee. Carrier moved shipments through Libertyville to Rondout, Ill., where they were interchanged with the North Shore, line-haul rates plus interchange switching charge being assessed. Complainant alleged misrouting, contending that switching charge would have been avoided had routing instructions been followed. HELD: Originating carrier's use of the track at Libertyville was limited, that carrier having been refused its use as a common interchange point. To have allowed complainant free interchange switching at Libertyville while subjecting other shippers to switching charge at Rondout, would have given complainant an undue preference in violation of the act. Moreover, route to be legal must be available to all shippers and this requirement can not be waived by private agreement between carrier and a particular shipper. Accordingly, shipments were not misrouted. Racine Crushed Stone Co. v. C., M. & St. P., 120 I. C. C. 742.

(ii) St. L. S. F. Ry., respondent, proposed to increase its charges for switching at Joplin and Carthage, Mo., between industries on its line and interchange points with other carriers, on carload traffic handled by the latter in interstate line haul service. Joplin is served by the respondent, K. C. S., M. & N. A., M. K. T., M. P., Santa Fe and J. & P. Carthage is served by the respondent and M. P. and is 18 miles from Joplin. Present switching charges at these points are $3.60 on both interstate and intrastate movements. It proposed to increase them to $6.30. The cost study submitted by respondent sufficiently establishes that the switching charges here proposed to be increased are less than the costs of service. The fact that other lines in Joplin maintain charges for switching lower than those here proposed by respondent is no justification for requiring it to perform its services at less than cost. HELD, suspended schedules justified. Switching at Carthage and Joplin, 123 I. C. C. 141.

(jj) Interstate rates on cement from Cement City (Sugar Creek), Mo., and Bonner Springs and Sunflower, Kans., to destinations in the Kansas City, Mo. Kans., switching district, to extent they are lower by more than 4.5 cents than interstate rate contemporaneously maintained on like traffic from points in the Kansas gas belt, found unduly prejudicial to said Kansas gas-belt points and shippers therefrom and unduly preferential of Cement City (Sugar Creek), Bonner Springs, and Sunflower, and shippers therefrom. Iola Cement Mills Traffic Asso. v. A., T. & S. F., 122 I. C. C. 337.

(kk) Rates on anthracite coal from points in Pennsylvania and West Virginia to West Roxbury and Bemis (Water-town), points outside the Boston switching district, and Roxbury, Boylston Street, and Forest Hills, Mass., points within the district intermediate to Boston, found not unreasonable or unduly prejudicial to West Roxbury as compared with lower rates to Boston, but unduly prejudicial to Roxbury, Boylston Street and Forest Hills. Rates to Bemis found unduly prejudicial to extent they exceed rates contemporaneously in effect to other stations in Watertown. Lower rates to Boston are protected by fourth-section orders and are shown to be depressed by water competition, but no good reason appears for maintaining higher rates to Bemis than to other stations in Watertown. Whittemore's Sons v. N. Y., N. H. & H., 122 I. C. C. 451.

(ll) Proposal of the St. L.-S. F. Ry., to increase its charges for switching at Joplin and Carthage, Mo., between industries on its line and interchange points with other carriers on c. l. traffic handled by latter in interstate line-haul service, found justified. A cost study submitted by respondent sufficiently establishes that switching charges at both Carthage and Joplin proposed to be increased are less than cost of performing the service. Substantially higher charges were approved between points on the Kansas City Southern in Kansas City, Mo., and at Lamar and Harrisonville, Mo. It is generally recognized that switching charges in a particular territory should be approximately uniform. Fact that other lines in Joplin maintained charges for switching lower than those here proposed is no justification for requiring respondent to perform its services at less than cost. Switching at Carthage and Joplin, 123 I. C. C. 141.

(mm) Rates on sand and gravel from Janesville, Afton, and Beloit, Wis., to complainant's plants located in the Mayfair and Weber districts in Chicago, Ill., found not unreasonable or discriminatory, but unduly prejudicial to extent they exceeded rates contemporaneously applicable on like traffic from same points of origin to so-called inner zone destinations in Chicago switching district. Reparation denied. Chicago Fire Brick Co. v. C. & N. W., 123 I. C. C. 164.

(nn) Findings in previous report on reargument, 89 I. C. C. 137, that interstate rates on anthracite and bituminous coal from various producing regions to Chicago switching district, higher to some delivery points therein than to Chicago proper, were not unreasonable but were unduly prejudicial to extent that rates to higher-rated points exceeded the flat Chicago rates, modified so as to provide that rates will not be unduly prejudicial to such points except to extent they exceed nonprejudicial basis of differentials prescribed. Original report 73 I. C. C. 161. Chicago Coal Merchants Asso. v. Director General, 123 I. C. C. 169.

(oo) Joint rates on shipments of bituminous coal during Federal control from central and southern Illinois to Edgebrook, a point within Chicago switching district, and Morton Grove a point immediately outside of that dis-

trict, found not unreasonable, but combination rates based on Chicago, plus local rate beyond, found unreasonable as compared with lower rates contemporaneously in effect to near-by competing points both within and without the district. See also 73 I. C. C. 152. Reparation awarded. Chicago Coal Merchants Asso. v. Director General, 123 I. C. C. 169.

(pp) Rates on anthracite and bituminous coal from points in Illinois, Indiana, Pennsylvania and West Virginia to complainant's siding between Mayfair and Peterson Avenues in the Chicago switching district applicable to Peterson Avenue, but in excess of the flat Chicago rate applicable to Mayfair, found not unreasonable, but maintenance of rates applicable to Peterson Avenue higher than rates to destinations here in question found unduly prejudicial to extent they exceeded the flat Chicago rate. See 73 I. C. C. 161; 89 I. C. C. 137. Reparation denied, there being no satisfactory proof of damage. Chicago Coal Merchants Asso. v. C. & N. W., 128 I. C. C. 519.

(qq) Complainant alleged that defendants switching charges for the movement of carload line haul traffic between their respective interchange connections and industries on their lines at Mitchell, S. D., are unjust, unreasonable and unjustly discriminatory. Mitchell is 72 miles west of Sioux Falls, S. D., and 138 miles northwest of Sioux City, Ia. It is the terminus of the Mitchell branch of the Omaha and a main line division point on the Milwaukee. No other lines serve Mitchell. Their respective yards are about 1 mile apart, across town. The Omaha was agreeable to the publication of a flat charge at Mitchell of $3.60 per car but the Milwaukee, because of its peculiar operating conditions, and more extensive hauls, insisted on a charge of 1.5c per 10 pounds, minimum charge $5 per car, which was published. It is this charge that is here attacked. Mitchell is entitled to the same consideration accorded towns in the surrounding territory and particularly those with which it is in competition. HELD, charges assailed unreasonable and unduly prejudicial to the extent they exceed $3.60 per car. Mitchell Chamber of Commerce v. C., M. & St. P. Ry., 129 I. C. C. 451.

(rr) In a proceeding to determine the propriety of switching charges it is immaterial whether such charges are absorbed by the carrier or paid for by the shippers. The Commission must consider them as though they were to be charged for by the carrier and paid for by the shipped. True the carrier is entitled to make a charge for its service if it sees fit, but it is entitled only to a reasonable compensation for the service performed. Its charge may not be so high as to restrict or deter a particular movement. Mitchell Chamber of Commerce v. C., M. & St. P. Ry., 129 I. C. C. 451, 455.

(ss) The Commission has indicated that a flat switching charge is generally the most desirable, in that it relieves the carrier of much work and places all shippers on the same level. See 120 I. C. C. 216. Mitchell Chamber of Commerce v. C., M. & St. P. Ry., 129 I. C. C. 451, 456.

(tt) Complainant alleged combination rate charged on three interstate carload shipments of smithing coal from San Diego, Calif., to Los Angeles, Calif., on Dec. 28, 1923 were and are unreasonable and inapplicable. Shipments originating at Douglas, W. Va., and moved by rail to Baltimore and thence water to San Diego, from that point moving via the Santa Fe to Los Angeles, and there switched to the S. P., charged beyond San Diego 6.5c and switching charge of $2.70 per car. The switching charge was an incidental one for a special service performed upon completion of the line haul. The phrase "separately established class rates or class and commodity rates" can not be construed as embracing these switching charges. HELD, assailed charges were not, and are not, unreasonable or otherwise unlawful, complaint dismissed. Roman Bush& Pig Iron & Coke Co. v. A., T. & S. F. Ry., 129 I. C. C. 509.

(uu) Complainant alleged commodity rates on coal and fuel oil to Boston, Mass., and Medford, Mass., between Jan. 23, 1923 and Jan. 1, 1925 were unreasonable and unduly prejudicial. Glenwood is situated about 1 mile west of Wellington, Mass. There were 124 cars of bituminous coal which originated in West Virginia and moved by rail to Newport News, thence by water to Mystic Wharf and Everett, and 68 cars of fuel oil which originated in Texas and were transported by rail to tidewater, thence by tank steamer to Everett, thence B. & M. to destination. Charged from Mystic Wharf at 88c for the coal and 7.5c for the fuel oil. Contemporaneously the charges per car from Mystic Wharf to points in

the Boston switching district were $15 to Wellington, North Somerville, Cambridge and West Cambridge 4, 6, 6.5, and 7 miles, and $20 to Forest Hills, Boston, Boylston and Roxbury, 1.5, 6, 17, and 19 miles. Rate on coal from Pennsylvania mines was $4.73, rate to Boston $4.35, 17 industries in Medford, all but 4 have the advantage of the Boston switching rates. The fact that Glenwood is on a socalled branch line does not appear to be a matter of material consequence in so far as switching operations are concerned. Apparently the maintenance of a higher rate on bituminous coal to Glenwood than to Boston from Pennsylvania mines is without justification, but no proof of the reasonableness per se of the rate to Boston is record and in view of the fact that the other carriers concerned have not been made defendants, and have not been heard, the Commission shall make no finding with respect to those rates. HELD, defendants switching limits at Boston, applicable to traffic moving in interstate and foreign commerce, should include its Medford branch and industry tracks adjacent thereto, and the maintenance of rates to and from Glenwood, from and to other points within the Boston switching limits which exceed those to Boston switching district will be unreasonable, reparation denied. New Engl'and Brick Co. v. B. & M. R. R., 129 I. C. C. 607.

(vv) Rates on anthracite coal from anthracite region of Pennsylvania to destinations within the district of metropolitan Boston but outside Boston switching district, found not unreasonable as compared with lower rates to Boston and destinations within or just outside the switching district, but unduly prejudicial to extent they exceeded the contemporaneous rates to adjacent points in metropolitan Boston outside the switching limits but not on tidewater, where distances are not greater than those to complainant's plants. Fourth-section situation is protected by an order. Undue prejudice ordered removed and reparation denied. Chadwick Coal Yard Co., v. N. Y., N. H. & H., 129 I. C. C. 165.

(ww) Refusal of carriers to switch cars to and from complainant's track reasonably safe, upon repeated reasonable requests therefor, found unduly prejudicial and in violation of section 1 (4) of the act, causing damage to complainant, amount of which is to be determined at further hearing. Carnes v. A., T. & S. F., 129 I. C. C. 341.

(xx) Class D rates and switching charges collected on interstate shipments of smithing coal from San Diego to Los Angeles, Calif., originating at Douglas, W. Va., found not unreasonable or otherwise unlawful. Exceptions to governing tariff provided a minimum class scale applicable to the total of the combinations of separately established class rates or class and commodity rates applicable on continuous through movements. Complainant's contention that switching charge, under the tariff, should be considered a commodity rate, and that minimum class scale was applicable to combination of class rates plus switching charge, not sustained. The switching charge was an incidental one for a special service performed upon completion of the line haul. Romann & Bush Pig Iron & Coke Co. v. A., T. & S. F., 129 I. C. C. 509.

(yy) Rates on traffic to Glenwood station, Medford, Mass, from various points, found unreasonable to extent they exceed those prescribed to Boston swiching district, in 69 I .C. C. 282. Glenwood is within the 5-mile radius of South Station stated in that case to be one homogeneous industrial community with which carrier's rates should be in harmony. Distance to other points which are included within the district are shown to be much greater and carrier's switching limits should therefore be extended to include its Medford branch and industry tracks on all traffic moving in interstate and foreign commerce. Reparation denied for same reason announced in cited case. New England Brick Co.. v. B. & M., 129 I. C. C. 607.

(zz) Hypothetical illustrations, which serve to show how shippers, in certain circumstances, may avoid payment of destination switching charges upon strictly local traffic by exercising care in selection of inbound billing and outbound routing on transit shipments, have no direct bearing upon a reasonable interpretation of tariff provision upon which complaint rests. Southern Kansas Millers Club v. A., T. & S. F., 129 I. C. C. 632.

§5. Incidental Services.

See Additional Charges and Serv-

ices; Refrigeration §3; Special Rates and Services; Spotting; Tap Lines.

(a) Charge of $5 per car proposed by Kanawha Central Ry., to apply at mine sidings on its line, to cover switching and set-out service where consignors designate certain cars for billing and such cars are not in consecutive order from point of interchange, found not justified. While rule is intended to cover instances in which mines bill out coal cars standing near its tipple when same kind or size of coal in same kind of equipment is held unbilled in cars standing nearer connection with its line, thus unnecessarily requiring the pulling out and setting back of such unbilled cars, such rule does not conform to intention or desire of carrier, and would result in increased transportation charges which have not been shown to be reasonable. Switching Charges at K. C. Ry. Mines, 118 I. C. C. 468.

(b) Tariff prescribing rental to be paid shipper for use of its "facilities" in switching intrastate shipments at its plants, which railroad was required to perform, HELD, in view of Interstate Commerce Act, § 15, as amended by Act Feb. 28, 1920, § 421 (U. S. Comp. St. 8583), not violative of Wis. St. 1925, § 195.39; "facility" as used in Wis. St. 1925, § 195.39, subd. 2, embracing anything which aids the performance of duty which carrier was required to perform, and includes a switch engine and its crew. Nekoosa-Edwards Paper Co. v. Railroad Commission of Wisconsin, (Wis., 1927) 213 N. W. 633.

§6. Reciprocal Switching.

See Facilities and Privileges §1 (a); Reciprocal Switching.

(a) Interchange switching charge of the C. & N. W. on wood pulp forwarded to Menominee, Mich., in connection with the Wisconsin & Michigan, found not unreasonable, but unduly prejudicial to extent it exceeded charge contemporaneously maintained for a corresponding service on like traffic received at Menominee over rails of C., M. & St. P. Nonprejudicial basis of charges prescribed for future. Marinette & Menominee Paper Co., v. C. & N. W., 107 I. C. C. 21, 28.

(b) Practice of the Pennsylvania and Western Maryland railroads of extending use of their tracks to each other for purpose of terminal receipt and delivery of freight at industries within a specified trackage zone in York, Pa., found tantamount in practical effect to maintenance of a limited reciprocal free switching district. Continuance of practice found to be just, fair, and reasonable for the future as to industries in trackage zone, and substantial equality of treatment required as to industries outside of zone by establishment in public interest of a switching district at York, with interchange at that point. York Mfrs. Asso. v. P. R. R., 107 I. C. C. 219.

(c) Upon contention that interchange of traffic situation at York, Pa., does not constitute a "practice," and that if undue prejudice is found an alternative order is only order legally permissable, since section 15 (1) of the act is procedural and does not enlarge duties or obligations of carriers, HELD: Section 15 (1) is adjective law as distinguished from substantive law and while it casts no additional duties on carriers, it gives commission authority to deal with violations of substantive law. Considering definition of word "practice," and fact that arrangement at York is referred to as such in proceedings before commission and the courts, the situation discloses a practice "relating to or connected with receiving, storing, and delivery of property," and commission is empowered to determine and prescribe manner in which violations of the act in connection with such situation shall be removed. York Mfrs. Asso. v. P. R. R., 107 I. C. C. 219, 231, 232.

(d) Inadequacy of facilities, of itself, is no defense for failure or refusal to establish arrangements for interchange of traffic between connecting lines. York Mfrs. Asso. v. P. R. R., 107 I. C. C. 219, 239.

(e) Practice of the Pennsylvania and Western Maryland railways of interchanging traffic at Hagerstown, Md., but refusing to do so at York, Pa., under substantially similar transportation conditions found unduly prejudicial to York and shippers there located, and unduly preferential of Hagerstown and its shippers. York Mfrs. Asso v. P. R. R., 107 I. C. C. 219, 240.

(f) Reciprocal switching arrangements are advantageous to shipping public and carriers alike. See 30 I. C. C. 71; 33 I. C. C. 168. York Mfrs. Asso. v. P. R. R., 107 I. C. C. 219, 240.

(g) Practice of the Pennsylvania and

Western railways of extending the use of their tracks to each other for purpose of terminal receipt and delivery of freight at industries in York, Pa., within certain trackage zone, while contemporaneously refusing to accord to industries outside the trackage zone benefit of service, rates, and routes of both lines found unduly prejudicial to such outside industries. York Mfrs. Asso. v. P. R. R., 107 I. C. C. 219, 241.

(h) Charges of the Pennsylvania R. R. for the interchange and switching at Warren, Pa., of interstate inbound shipments of iron and steel articles destined to Struthers, Pa., found unreasonable. Reasonable maximum charge prescribed for future and reparation denied. Hammond Iron Works v. P. R. R., 107 I. C. C. 473.

(i) Where a carrier interchanges traffic at a particular point and publishes charges for that service, if it elects to perform the service, it must provide a reasonable charge therefor. Thatcher Mfg. Co., 57 I. C. C. 244, Hammond Iron Works v. P. R. R., 107 I. C. C. 473, 481.

(j) Proposal of the Gulf, Colorado & Santa Fe to cancel its reciprocal switching charge applicable on traffic to and from Fair Grounds, Beaumont, Tex., and eliminate that point as a point to and from which it will switch traffic of connecting lines, found not justified. Proposal would put shippers to expense and inconvenience of trucking their freight between that point and downtown team tracks through city of Beaumont. Such trucking would be very undesirable, particularly to owner of fancy stock, and detrimental to interests of the Fair Association, in that it might lead prospective exhibitors to avoid Beaumont. Moreover, the fair grounds in other large cities are generally served by railroads and can be reached without trucking, and on intrastate traffic in Texas the State commission requires that team tracks be kept open to all. Switching at Beaumont, 112 I. C. C. 125.

(k) In 68 I. C. C. 412, 77 I. C. C. 43 and 93 I. C. C. 3, the commission had before it switching and interchange arrangements at Peoria, Ill. HELD: Considering all the facts it seems impracticable to impose a separate charge or division on empty cars upon which the P. & P. U. performs switching interchange; and that just, reasonable and equitable divisions to that carrier for interchanging freight cars between all connecting lines in the Peoria switching district would be $3 per loaded car, which covers the empty as well as the loaded movement. The commission is not bound by the terms of the contracts between the P. & P. U. and its tenants in exercising its powers under the act in respect of this interchange traffic. Plainly the Union is now a link in the chain of carriers forming through routes via Peoria. Its rails connect directly with the west side lines in Peoria proper, and in East Peoria with those over which the eastern lines handle their traffic. As to through eastbound and westbound movements its service is performed east of Peoria, disregarding the extent of the switching district for the reasons stated. Under the existing divisional arrangements the lines east of Peoria receive proportions which are generally more favorable than the proportions accruing to the lines west thereof. Traffic conditions and rate levels on the latter and in the territory through which they operate, as compared with those encountered east of Peoria, warrant divisions no lower, distance considered, than those on the east side lines. It appears that the west side lines originate the greater portions of their eastbound traffic interchanged at Peoria. Upon this record it appears that on through traffic via Peoria unjust, unreasonable and inequitable divisions would accrue to the west side lines if they were required to absorb the interchange charges of the Union, in either direction, in effecting the transfer between them and the lines serving the Peoria district through East Peoria. Competitive reasons make impracticable varying divisions and rates to and from Peoria as between the respective east side and west side lines. A difference in treatment would create undue prejudice and preference. The Northwestern is in substantially the same situation in regard to through eastbound and westbound traffic as are the carriers herein termed the west side lines, except that it has separately contracted with the Union for the operaton of its yard in Peoria proper. There is generally no difference in their corresponding rates and divisions to and from Peoria. The Northwestern should be treated the same as the Rock Island, Burlington and M. & St. L. on such traffic. On traffic for the Northwestern delivered by the west side lines into yards 90 and 91, the ser-

vice performed by the Union appears to be practically only that necessary in making up the Northwestern's outbound trains. Under the circumstances surrounding the Northwestern station at Peoria, delivery into yards 90 and 91 is equivalent to delivery to the Northwestern. Any additional expense incurred in making up outbound trains and setting them out for the Northwestern should be borne by the latter. Rates of Peoria & Pekin Union Ry., 115 I. C. C. 469.

(l) In 115 I. C. C. 469, the commission required the establishment of joint rates by respondents, including the P. & P. U., on certain traffic interchanged by that line between the lines of other respondents at Peoria or East Peoria, Ill., and prescribed reasonable divisions to the Union and other respondents out of such joint rates. Under present arrangements the T. P. & W. delivers all traffic from its western division to the Union in the East Peoria yards, but so do certain of the other lines west of Peoria. No objection to the request of the T. P. & W. has been received. HELD: Previous findings modified so as to classify the eastern division of the T. P. & W. with the east side or East Peoria carriers and its western division with the west side or Peoria carriers. Petition of the Union urges that the order regarding divisions on traffic delivered to the Northwestern by other west side carriers, which provides that the Union shall not receive any division on such traffic deprives that carrier of its property without due compensation. HELD: Order modified so as not to prevent the Union from receiving a division of joint rates on the traffic above referred to, provided the same shall come out of the rates or proportions of joint rates now accruing to the Northwestern. Rates of Peoria & Pekin Union Ry. Co., 118 I. C. C. 127.

(la) The charges for reciprocal switching, as the term would imply, are generally established without regard to the cost of the particular service, on the theory that the services are of mutual advantage to all of the carriers concerned, and will be performed by all at correspondingly low charges. They are generally less than the actual cost of performing the service. Mitchell Chamber of Commerce v. C., M. & St. P. Ry., 129 I. C. C. 451, 456.

(m) Complainant has a private siding connecting with the Pennsylvania at Detroit, Mich., deals in coal, coke, fuel and builders supplies received in carload lots from points in Indiana, Ohio, Kentucky, West Virginia and Pennsylvania. It alleged that the refusal of the M. C. and the N. Y. C. to switch carload traffic from and to the Pennsylvania at Detroit; the refusal of the latter to switch carload traffic from and to the M. C. and N. Y. C. at that point; and the refusal of these carriers to enter into a reciprocal switching arrangement while maintaining such an arrangement with the Wabash and the P. M. at Detroit, is unjustly discriminatory and unduly prejudicial. Traffic to and from Detroit and other points in Michigan is generally interchanged at Toledo between the M. C. and N. Y. C., as well as between those carriers, on the one hand, and the Pennsylvania and other carriers, on the other. The operations there are in harmony with the policy of the M. C. of classifying traffic for Detroit at points outside the Detroit district. Trains are made up for movement to certain districts, and in some instances for direct movement to a single industry, and congestion at Detroit is accordingly obviated. These operations are said to have resulted in a saving of from two to five days in deliveries to consignees. From all the facts of record there appears to be no persuasive reason why traffic originating at or destined to points on defendants terminals at Detroit should not be interchanged at Toledo. The discrimination and prejudice which complainant and intervener seek to establish do not appear to be unjust, unreasonable or undue. The only issue remaining is in respect of cars reconsigned after reaching Detroit. Not a single car of this character is shown to have moved, nor has there even been a demand for such a movement, except where a car was misrouted. The evidence does not show sufficient grounds for such far reaching results as would necessarily follow a finding of unjust discrimination and undue prejudice. HELD, complaint dismissed. Cary Co. v. M. C. R. R., 132 I. C. C. 233.

(n) Interchange switching charges maintained at Mitchell, S. Dak., on line-haul traffic between carriers' interchange connections and industries on their lines, found unreasonable and unduly prejudicial to extent they exceed those generally assessed at towns in same general territory, with many of which complainant is in competition. Reasonable and nonprejudicial charges

prescribed for future. Mitchell Chamber of Commerce v. C., M. & St. P., 129 I. C. C. 451.

§6a. Obligation to Switch.

(a) Complainant alleged that defendants failed and refused to furnish him transportation into and out of his plant at Olathe, Kas., upon reasonable request therefor, in violation of section 1; that they assessed and collected certain charges for service not performed; that they maintained unreasonable switching charges; and that defendants refusal to furnish him transportation while according such service to his competitors at Argentine and Coffeyville, Kas., and Tulsa, Okla., subjected him to undue prejudice. Defendants are the Santa Fe, K. C. C. & S., and Frisco. From the interchange track a siding runs north to the Olathe waterworks. The track leading to complainants plant extends southwestward from the interchange track at a point east of the waterworks track. On April 3, 1923 complainant began negotiations with the president of the Clinton, looking toward construction of tracks to serve his plant. As a result of these negotiations complainant constructed a track 1.306 miles long upon his land, roughly paralleling the interchange track, and the Clinton built on its right of way a turnout and 140 feet of track with which complainant made connections from the east end of his track on or about May 15, 1923. It also appears to have been contemplated that complainant would connect the west end of his track with another turnout installed by the Clinton, and complainants failure to do so, together with a dispute over payment for certain labor performed by complainant in connection with the railroad company's portion of the construction, led to considerable controversy as to whether there had been proper fulfillment of the informal agreement as to the construction of the track. The Olathe Car Works Company was shown as an industry at Olathe on the joint track of the Clinton and the Frisco effective July 5, 1923 and continued to be shown till Oct. 31, 1925. The tariff also published a switching rate of $6.30 per car for applicaiton at Olathe between the Santa Fe and the Olathe Car Works Company. The preponderance of the evidence supports the conclusion that defendants were not justified in refusing to switch cars to and from complainant's plant upon the alleged ground that the track was not safe. It is conclusively shown that reasonably safe and adequate facilities in the form of a turnout and sidetrack for performing switching service to and from complainants plant were in existence and that the Frisco and the Clinton held themselves out in regularly published tariffs as being in a position to perform such service. Although reasonable request therefor was repeatedly made by complainant, switching service was refused through the arbitrary action of certain employees of the Frisco and the Clinton. Such action constituted a refusal to furnish transportation upon reasonable request therefor in violation of section 1 (4) of the act and caused damage to complainant for which the Frisco and the Clinton must be held jointly and severally liable. This action must also be held to have resulted in undue prejudice to complainant in violation of section 3. The record does not show the Santa Fe to have shared in any way in these violations. The record amply proves that the value of complainants plant for the purpose for which it was intended was directly impaired by defendants wrong doing. A car repair plant is peculiarly and directly dependent upon adequate transportation service, and complainant would seem to be clearly entitled to compensation covering the difference between the value which his property would have had as a car repair plant enjoying the transportation service to which it was entitled by law and such value as it had under the handicap of a total deprivation of transportation service. Further hearing will be had to determine the amount of complainants damage. Carnes v. A., T. S. F. Ry., 129 I. C. C. 341.

(b) Refusal of carrier to switch cars to and from complainant's track which was shown conclusively to be reasonably safe, upon repeated reasonable requests therefor, found unduly prejudicial and in violation of section 1 (4) of the act, causing damage to complainant, amount of which is to be determined at further hearing. Carnes v. A., T. & S. F., 129 I. C. C. 341.

§7. Right To Connection.

See Cars and Car Supply §7 (b); Electric Lines VIII.

(a) Upon further argument, findings in 96 I. C. C. 143, to effect that complainant has complied with provision of section 1 (9) of the act and is entitled to an order directing defendant to

construct and maintain switch connection between track constructed by it from its coal mine near Eldorado, Ill., and line of defendant carrier, affirmed. Dering Coal Co. v. C. C. C. & St. L., 109 I. C. C. 55.

(b) Establishment of switch connection at Breckenridge, Tex., between tracks of Wichita Falls, Ranger & Fort Worth R. R. and Cisco & Northeastern, sought for alleged purpose of eliminating inconvenience and expense to shippers, excessive drayage charges, and misrouting of freight, found not warranted Proposed arrangement would result in diversion of traffic from Ranger line and loss in revenue to an extent that if it did not force its abandonment, would seriously impair its ability to operate, thus injuring those communities depending solely upon it for transportation service. Moreover, complaining parties are at present adequately served by existing routes with respect to interstate commerce, and benefit inuring to them would not offset detriment sustained by others. Breckenridge Chamber of Commerce v. W. F. R. & F. W., 109 I. C. C. 81.

(c) Under that portion of paragraph (3) of section 3 of the act which requires that all carriers shall, according to their respective powers, afford all reasonable, proper, and equal facilities for interchange of traffic between their respective lines, the commission has power to deal with an issue involving, as here, establishment of switch connection between carriers. See 81 I. C. C. 333. Breckenridge Chamber of Commerce v. W. F., R. & F. W. 109 I. C. C. 81, 82.

(d) Interchange switching charges maintained at Mitchell, S. Dak., on line-haul traffic between carriers' interchange connections and industries on their lines, found unreasonable and unduly prejudicial to extent they exceed those generally assessed at towns in same general territory, with many of which complainant is in competition. Reasonable and nonprejudicial charges prescribed for future. Mitchell Chamber of Commerce v. C., M. & St. P., 129 I. C. C. 451.

§8. Validity of Regulations.

(a) Refusal of carriers to switch cars to and from complainant's track which was shown conclusively to be reasonably safe, upon repeated reasonable requests therefor, found unduly prejudicial and in violation of section 1 (4) of the act, causing damage to complainant, amount of which is to be determined at further hearing. Carnes v. A., T. & S. F., 129 I. C. C. 341.

§10 Tariffs and Construction.

See Tariffs.

(a) Tariff governing switching charges from South Omaha to Omaha carried separate charges, the lower applying when added to line-haul rates and representing a separate charge for terminal services, the higher when covering entire charge from shipper to consignee. No facilities being maintained by carriers at South Omaha for acceptance of l. c. l. shipments, complainant was compelled to switch c. l. shipments to Omaha, from which point they were reforwarded in l. c. l. lots and higher charges assessed. FOUND: Higher charge, which merely covered a. c. l. movement and was not a specific charge for trap or ferry cars with provisions for acceptance and distribution of commodity shipped, was legally applicable. Moreover, shipments would not have been accepted at South Omaha in l. c. l. lots; there was an essential difference between their character from that point and from Omaha; and, the continuity of c. l. movement was destroyed by breaking it up into l. c. l. shipments. Armour & Co. v. Director General, 104 I. C. C. 603.

(b) Shipments of scrap iron from Superior, Wis., to Steelton, Minn., were delivered to carrier unrouted and forwarded via a two-line route at minimum class rate. Shipper constructed lower charges by combining switching tariffs embracing a three-line route. FOUND: Since switching tariff of one carrier applied only on cars having a "road-haul," and movement over the three-line route is more in the nature of an intraterminal transfer than a road haul, lower charges were not applicable over route embracing three lines and shipments were not misrouted. Kaner v. C., St. P. M. & O., 104 I. C. C. 710.

(c) Switching charges in addition to through rates assessed on shipments receiving transit at Meridian, Miss., found illegal. While transit tariff provided that such charges would be in addition

to through rates, tariffs of outbound carriers provided for their absorption no distinction being made between shipments originating at transit point and those originating beyond. If it was desire of carriers to exclude transit shipments from general absorption provision they should have done so by plain language rather than by inference and their failure to do so can not cast burden of paying charges upon shipper. Reparation awarded. Sturges Co. v. A. & V., 107 I. C. C. 136.

(d) Upon further hearing, rates on ice from interstate origin points to Chicago and South Omaha found reasonable in previous reports, 62 I. C. C. 618 and 87 I. C. C. 81, found to include absorption of switching charges of delivering terminal lines. While contemporaneous line-haul and switching tariffs were of equal weight in their respective spheres, in absence of cross reference between them, in accordance with rules 10 (a) and 10 (d) of tariff Circular 18-A, they were usable in combination to make a through rate, just as two local tariffs of line-haul carriers would be. One provision of switching tariff, binding upon line-haul carriers parties thereto, was that switching charges would be absorbed. Reparation awarded. Wilson & Co. v. Director General, 107 I. C. C. 580.

(e) An unrestricted rate to Chicago found applicable on shipments of sand and gravel moving during Federal control from Hammond, Ill., to sidings located within Chicago district. While it was intention of carriers to apply a rate published to Division Street to all points within what the carrier considers its Division street district, that fact can not be definitely ascertained from tariffs, which are ambiguous. Tariffs are to be construed strictly, the intention of framers is not controlling, and where doubt exists as to meaning of a tariff provision its construction must be resolved in favor of shippers. American Sand and Gravel Co. v. Director General, 109 I. C. C. 557.

(f) Shipment arrived at New London, Conn., and reconsignment to Boston ordered. On following day complainant by telegraph requested "Boston & Maine auction delivery" but shipment having gone forward, arrived at Boston and was placed on tracks of the New Haven where no delivery was made or attempted. Subsequently it was switched to auction tracks. Upon contention that interstate character of shipment terminated when it was placed on the New Haven's tracks, FOUND: Since character of the shipment was interstate from time it left Peshastin, Wash., the point of origin, intrastate switching charge collected for the movement from the New Haven's tracks to the auction track was inapplicable. Applicable interstate traffic provided a lower charge and for its absorption by the New Haven. Reparation awarded. Gwin, White & Price v. N. Y., N, H. & H., 112 I. C. C. 707.

(g) The switching charge assessed for movement of lumber at Detroit, Mich., was assessed on basis of charge in effect on date when movement was made. HELD, as shipment involved was not a reshipment, applicable switching charge thereon was charge in effect on date shipment originated. Milne Lbr. Co. v. M. C. R. R., 118 I. C. C. 580, 582.

(h) Rates on anthracite coal from Lehigh, Schuylkill, and Wyoming regions in Pennsylvania, to complainant's siding within corporate limits of Providence, R. I., found inapplicable. Charges were collected based on rate to Auburn, R. I., a point intermediate to Providence. However, as tariffs did not define the switching limits of Providence or indicate that the Auburn rate applied on shipments delivered on complainant's siding, the logical interpretation of tariffs was that Providence rate applied to all points within corporate limits of that city and was therefore applicable to complainant's shipments. See 63 I. C. C. 392; 73 I. C. C. 143. Refund of overcharges directed. City Coal Co. v. N. Y., N. H. & H., 123 I. C. C. 609.

§11. Team Tracks and Sidetracks.

See Side Tracks and Spur Tracks.

(a) Carrier's obligation under an agreement to perform switching service within limits of an industrial plant over tracks primarily for plant use, found to have been canceled by assumption of this service by the plant itself. Columbia Mills v. D., L. W., 118 I. C. C. 112, 116.

IV. PROCEDURE AND PLEADING.

See Evidence; Procedure Before Commission.

§12. In General.

(a) Where switching lines charge is absorbed that carrier is not a necessary

party to the complaint. Sinclair Crude Oil Co. v. A. T. & S. F. Ry., 126 I. C. C. 73, 74.

(b) It is not necessary that a switching line whose charges are absorbed be named as a party defendant in a complaint alleging unreasonableness of rates. See 50 I. C. C. 203. Sinclair Crude Oil Co. v. A., T. & S. F., 126 I. C. C. 73, 74.

V. SWITCHING DISTRICTS.

§13. In General.

(a) Proposed restriction of switching limits of Tulsa, Okla., so as to exclude plant of Wertzberger Derrick Co., found not justified. Respondent's purpose in desired restriction is to protect its line-haul rates and revenues to and from Red Fork, Okla., a local point on its line, but no attempt was made to show that Tulsa rates are too low for application from that point. On the contrary, it expressed a willingness to go into the situation further with a view to giving protestant more favorable through rates. Switching at Tulsa, Okla., 104 I. C. C. 42.

(b) Combination rate on crushed rock from Dresser Junction, Wis., to Minnehaha Falls, Minn., outside the switching district but within the city limits of Minneapolis, Minn., found unreasonable as compared with lower rates contemporaneously in effect from point of origin to various delivery points within the Minneapolis switching limits and to extent it exceeded lower joint rate subsequently established. Reparation awarded. Board of Park Commrs. v. C., M. & St. P., 115 I. C. C. 211.

(c) A switching district is developed according to needs of an industrial center and interest of carriers serving such center. Through traffic has little influence upon it. Rates of P. & P. U. Ry., 115 I. C. C. 469, 511.

(d) Rates on brick and hollow building tile from Vale, Mo., a point outside Kansas City switching district, to Kansas City, Mo.-Kans. found not unreasonable or unduly prejudicial as compared with other rates on same and related products for comparable distances to same destination from points both within and without the district, or as compared with distance rates for similar hauls in effect on intrastate and interstate traffic in Kansas, Nebraska, Missouri, Texas, Arkansas, Illinois, and Iowa. Kansas City Brick Co. v. C., R. I. & P., 115 I. C. C. 750.

(e) Rates on sand from Sirridge and Grinter, Kans., on the Kansas City, Kaw Valley & Western Ry., an electric line, to destinations on the Kansas City, Clay County & St. Joseph Ry., within Kansas City switching limits, found not unduly prejudicial as compared with lower rates contemporaneously maintained from same origin points to other destinations in Kansas City district, and from other sand-producing points in same general territory to destinations on the Clay County. Circumstances and conditions surrounding transportation from Grinter and Sirridge are not substantially similar to those surrounding transportation at lower rates from alleged preferred points, the former embracing a four-line haul, necessitating use of two intermediate carriers, whereas from the latter, less than a four-line haul is involved in conjunction with which the use of only one intermediate carrier is necessary. Kansas City, K. V. & W. Ry. v. A., T. & S. F., 120 I. C. C. 258.

(f) Complainant alleged that the commodity rate charged on anthracite coal, prepared sizes, in carloads, two years prior to Feb. 12, 1926 from the anthracite region of Pennsylvania to its siding in Providence R. I., was and is unreasonable, unduly prejudicial and in violation of section four. Complainants siding is located within the corporate limits of Providence on Narragansett Avenue, just south of Reservoir Ave. and west of Elmwood Ave., on the west side of the main line of the New Haven. Complainants shipments are billed to Auburn, R. I., a station within the corporate limits of Cranston, R. I., 5 miles west of and intermediate to Providence on the shore line of the New Haven. The switching limits of Auburn as shown in the tariff effective Oct. 16, 1925 include complainants siding. Prior to that date defendants schedules did not define the switching limits of either Auburn or Providence. Since the filing of this complaint the rate to Auburn has been reduced to $4.16 by several of the originating carriers defendants herein. The evidence of record is sufficient to rebut the presumption of unreasonableness raised by complainants showing that the rate attacked contravened the fourth section. It is clear that the Providence rate was applicable to complainants shipments forwarded from point of origin prior to Oct. 16, 1925 and they were overcharged. HELD, rate attacked not unreasonable or unjustly discriminatory but for future will be unduly prejudicial

to extent it exceeded rate maintained to either Olney, or Providence, reparation denied. City Coal Co. v. N. Y. N. H. & H. R. R., 123 I. C. C. 609.

(g) Rates on sand and gravel from Janesville, Afton, and Beloit, Wis., to complainant's plants located in the Mayfair and Weber districts in Chicago, Ill., found not unreasonable or discriminatory, but unduly prejudicial to extent they exceeded rates contemporaneously applicable on like traffic from same points of origin to so-called inner-zone destinations in Chicago switching district. Reparation denied. Chicago Fire Brick Co. v. C. & N. W., 123 I. C. C. 164.

(h) Chicago switching district points: Findings in previous report on reargument, 89 I. C. C. 137, that interstate rates on anthracite and bituminous coal from various producing regions to Chicago switching district, higher to some delivery points therein than to Chicago proper, were not unreasonable but were unduly prejudicial to extent that rates to higher-rated points exceeded the flat Chicago rates, modified so as to provide that rates will not be unduly prejudicial to such points except to extent they exceeded nonprejudicial basis of differentials prescribed. Original report 73 I. C. C. 161. Chicago Coal Merchants Asso. v. Director General, 123 I. C. C. 169.

(i) Shipment of denatured alcohol from Philadelphia to Providence, R. I., was held at latter point and subsequently taken to complainant's private siding within corporate limits of Providence. Charges were collected on basis of rate to Providence plus rate to Auburn, a point intermediate to and adjoining Providence. Tariff publishing rate to Providence did not define switching district, but provided that the rate applied to private sidings connected with carriers at which traffic is usually delivered. Upon contention that complainant's siding was within Auburn switching limits and that rate to Providence was applicable. HELD, following 73 I. C. C. 143, in which a similar shipment was involved, rate to Providence included rate to complainant's private siding in absence of tariff provisions showing what delivery points the rate actually included. Reparation awarded. Atlantic Refining Co. v. P. R. R., 128 I. C. C. 43.

(j) Rates on lumber from southern points of origin to Reading, Ohio, a point within Cincinnati switching limits, higher than rates to Cincinnati and other points within switching limits taking same rates, found not unreasonable but unduly prejudicial to extent rates to Reading exceeded those contemporaneously maintained to Cincinnati. Switching charges are assessed on shipments to Reading, whereas to points more distant such charges even though higher are absorbed on all carload traffic. Reading is practically the only point within switching district to which Cincinnati rates on lumber do not apply, or where a distinction is made between lumber and other traffic. Moreover, in 85 I. C. C. 197, rates to Madisonville, Ohio, which bore same relationship to Cincinnati as those here assailed were found unduly prejudicial. Nonprejudicial basis of rates prescribed for future. Nivison-Weiskopf Co. v. A. & V., 128 I. C. C. 233.

(k) Complainant attacked rates on lumber, in carloads, from Alabama, Florida, Georgia, Kentucky, Louisiana, Mississippi and Tennessee to Reading, O., as unreasonable and unduly prejudicial. Reading, a local point on the Richmond, Ind., division of the Pennsylvania 15 miles north of Cincinnati, O., has been included in the Cincinnati switching limits since Oct. 25, 1920. Traffic from points in the south to Reading is handled by Pennsylvania switching crews from interchange points in Cincinnati to Undercliff, O., and by road haul crews beyond. For this service the Pennsylvania generally maintains a switching charge of 38c per net ton from its connection with the L. & N., and 50.5c from its connection with the B. & O. and Southern. Complainant contends that the rates attacked are unreasonable to extent they exceed rates on like traffic from the same points of origin to Cincinnati and points within the Cincinnati switching limits taking the same rates. HELD, rates attacked not unreasonable but for future unduly prejudicial to extent they exceed rates to Cincinnati, reparation denied. Nivison-Weiskopf Co. v. A. & V. Ry., 128 I. C. C. 233.

TANK CAR SHIPMENTS

See Advanced Rates §2½ (f); Cars and Car Supply §10, §11¾ (a), §17, §32½ (b); Class Rates §2 (5c); Demurrage §10; Distance Rates §3 (f); Evidence §12 (3p); Minimums §10; Routing and Misrouting §3 (a), §5 (w) (x); Transportation §2 (a).

(a) Proposal to define a "tank car" as a car with permanently attached tank

or tanks which can not be detached for filling, emptying, or storage of contents, found not justified. Such definition would result in charges on chlorine and other compressed gases moving in multiple-unit tank cars higher than on shipments moving in single-unit class V cars. The multiple-unit car affords every safeguard for transporting and handling chlorine gas, and it would be impracticable or impossible for some consumers to use that commodity when shipped in single-unit cars. Use of a car, tanks of which may be removed in interest of safety, is necessary for future development of chlorine-gas industry. Moreover, if full complement of tanks which form superstructure of multiple-unit car is securely attached to underframe when offered for transportation or return movement after being unloaded, no good reason appears for applying different rules and charges on the two types of equipment. Definition of Tank Cars, 104 I. C. C. 196.

(b) The existence of rates on a commodity in tank cars lower than on same commodity moving in packages and subsequent establishment of lower rates on package shipments do not alone demonstrate unreasonableness of higher rates. Texas Oil Co. v. T. & N. O., 104 I. C. C. 337, 340.

(c) Rates on gasoline in tank cars from Eldorado, Kans., and Yale and Grandfield, Okla., to Canon City, Colo., found unreasonable and unduly prejudicial to extent they exceeded rates contemporaneously in effect to Pueblo by more than differentials herein prescribed. Reparation awarded and future rates prescribed. Jewel Co. v. A., T. & S. F., 104 I. C. C. 380.

(d) Rate on glucose, in tank-car loads, from Clinton, Iowa, and Roby, extent it exceeded rate from Chicago to Meridian and Jackson, Miss. Reasonable rate prescribed for future and reparation awarded. Cairo Syrup Co. v. I. H. B.., 104 I. C. C. 487.

(e) Rates on gas oil in tank-car loads from Parco, Wyo., to Denver, Colo., found unreasonable to extent they exceeded lower contemporaneous rate on like traffic from Parco and Laramie, Wyo., to Ogden and Salt Lake City, Utah. Reasonable rate prescribed and reparation awarded. Colorado Public Service Co. v. U. P. R. R., 107 I. C. C. 97.

(f) Shipments of sulphuric acid, in tank cars, moving over an interstate route from Grasselli, Ind., to Vincennes, Ind., found overcharged, inasmuch as lower rate to Lawrenceville, Ind., applied to Vincennes under provisions of rule 77 of Tariff Circular 18-A carried in applicable tariff at time of movement. Reparation awarded. Vincennes Refining Co. v. C. & E. I., 109 I. C. C. 25.

(g) Rates on sulphuric acid, in tank-car loads, from Evansville, Ind., and Louisville, Ky., to Lawrenceville, Ill., found unreasonable and unduly prejudicial as compared with rates from East St. Louis, Danville, Hillsboro, La Salle, Peru, and Depue, Ill. Rates which will permit by-products sulphuric acid to move to markets are of great importance to producers thereof, and rates here in issue are so high as to preclude movement. Reasonable and nonprejudicial rates prescribed. Southern Agricultural Chem. Corp. v. C., C., C. & St. L., 109 I. C. C. 227.

(h) Rate on crude petroleum, in tank-car loads, from Sallyards, Kans., to St. Joseph, Mo., found unreasonable to extent it exceeded rate contemporaneously in effect to Kansas City, Mo., such lower rate having been established pursuant to commission's decision in the Midcontinent case, 36 I. C. C. 109, and reflecting a differential in rates on crude oil under refined oil of 5 cents. Reparation awarded. St. Joseph Viscosity Oil Co. v. M. P. R. R., 109 I. C. C. 286

(i) Rate on gasoline, in tank cars, from Somerset, Tex., to Phoenix, Ariz., found unduly prejudicial to Somerset and unduly preferential of competing Texas refining points from which a lower rate applied, such lower rate being Ind., to Atlanta, found unreasonable to subsequently established from Somerset. Reparation awarded. Pioneer Oil & Refining Co. v. S. A. S., 109 I. C. C. 551.

(j) Fifth class rates on fish oil and whale oil, in tank-car loads from Ivorydale, Ohio, to Port Ivory, N. Y., found not unreasonable, but similar rates on fish oil from Atlantic seaboard points to Port Ivory, N. Y., and Bayway, N. J., and from Bayway to Philadelphia and Marcus Hook, Pa., found unreasonable for

future only and reasonable rates prescribed. Lower commodity rates on fish oils instanced by complainants were in most, if not in all, instances so affected by competition that they do not afford a criterion upon which fifth-class rates assailed may be condemned as exceeding reasonable maxima in the past over routes of actual movement. Procter & Gamble Mfg. Co. v. B. & O., 112 I. C. C. 177.

(k) Rates on oil in tank carloads from Ponca City, Okla., to Joplin, Mo., found not unreasonable, but unduly prejudicial in favor of competitors located at points in Kansas accorded alternative application of distance rates, to extent that rate assailed exceeded rate applicable upon same commodity for same distance under the scale contemporaneously maintained as an alternative from points in same origin group to destinations grouped with Joplin. Nonprejudicial basis of rates prescribed and reparation denied. Wilhoit Refining Co. v. A., T. & S. F., 112 I. C. C. 225.

(l) Rates on fuel oil, in tank-car loads found unreasonable and unduly prejudicial to extent they exceeded 6.5c less than contemporaneous rates on refined oil prior to general reductions of 1922 and 6c thereafter. Reparation awarded. Shores-Mueller Co. v. A., T. & S. F., 112 I. C. C. 603.

(m) Interstate rates on sulphuric acid, in tank-car loads, from Tiltonville, Ohio, to points in the Wheeling, W. Va., Youngstown, Ohio, and Pittsburgh, Pa., districts found unreasonable and unduly prejudicial in favor of Newell, Langeloth, Natrona, Beaver Falls, and New Castle, Pa., and Moundsville, W. Va., competing points. Reasonable and nonprejudicial scale of distance rates prescribed for future. Bertha Mineral Co. v. B. & O., 112 I. C. C. 754.

(n) Complainant attacked commodity rates charged of 12.5c prior to April 12, 1925, and 11.5c subsequent thereto, on silicate of soda, in tank cars and in drums in carloads, from Grasselli, N. J., to Brooklyn, N. Y., subsequent to June 1, 1923, as unreasonable to extent they exceed 10c. Grasselli is on the Jersey Central 13.3 miles from Jersey City. The movement from Grasselli to Bayway, N. J., is a switching movement. From Bayway the movement to Jersey is through extensive terminals where the traffic is dense. At Jersey the trains are broken up, the cars sorted for the different terminals and placed on car floats by the Central for movement and delivery by the terminal companies. Silicate of soda is rated fifth class. HELD: Rates attacked not unreasonable, complaint dismissed. Interstate Corrugated Box Co. v. C. R. R. of N. J., 113 I. C. C. 539.

(o) Complainant attacked commodity rates on linseed oil, in tank cars, from Minneapolis, Minn., to Dallas, Tex., two years prior to March 9, 1925, as unreasonable. The rate of 60c on the basis of which reparation is sought is arrived at in the following manner: Complainants first use a component of 46c from Kansas City which is the rate prescribed on cottonseed oil in 98 I. C. C. 183 for 671 miles, and to this is added an arbitrary of 14c for the haul from Minneapolis to Kansas City. The rate on cottonseed oil prescribed for 1,161 miles, the average distance from Minneapolis to Texas common point territory, was 57c. HELD: Rate attacked unreasonable in past to extent it exceeded 60c and for future 57c, reparation awarded. DeForest Co. v. A. T. & S. F. Ry., 113 I. C. C. 591.

(p) Complainant attacked combination commodity rates on 2,500 tank cars of petroleum oils and gasoline shipped between November 27, 1920, and November 1, 1923, from Wood River, Ill., Neodesha, and Wichita, Kas., Sugar Creek, Mo., Cushing, Okmulgee, Sapulpa, and Tulsa, Okla., and Casper, Wyo., to destinations in Indiana, Illinois, Michigan, Missouri and Ohio as illegal in violation of section 6. No. 15877. Tulsa and Wood River are representative origins, and Hebron, Wolcott, Medora, Syracuse and Fowler, Ind., are representative destinations. The first two destinations are on the Pan Handle, the next two on the B. & O., and last on Big Four. Wood River is between Alton and East St. Louis, Ill., on the C. & A. It is also served by the Burlington, Big Four and Illinois Terminal. The other origins covered by the complainant are all located west of the Mississippi river. From points of origin other than Wood River the shipments moved, as routed by the shipper, over one or another of the defendant western lines to Alton, East St. Louis, Wood River, or Edwardsville, Ill., to all of which the same rates apply and are within a radius of 35 miles of St. Louis, Mo. They then moved over the

lines of the several eastern defendants to destinations. No joint rates were in effect. Charges were collected on the basis of combinations over the above named junctions, using from Oklahoma, far example, a specific proportional rate of 30.5c to the junctions prior to January 1, 1922, and 27.5c on and subsequent thereto. From the junctions specific point to point proportional rates prior to January 1, 1922, and local rates thereafter, based on class rates applied. The rates from the junctions are the only rates here attacked, no question having been raised as to the applicability of the rates to the junctions. During the period of movement there were in effect in individual tariffs of the Big Four and the Ill. Terminal from Alton, Wood River and Roxana to Chicago and Chicago rate points, a specific commodity rate of 21c prior to April 5, 1922, and 17.5c on and after that date. These rates were lower than the rates charged from the junctions to certain intermediate points on circuitous routes. The rules provide for rates only to or from points where rates are not specifically named in this tariff, in the Illinois Terminal tariff, or to any point of destinations not specifically provided for, in the Big Four tariff. The rates charged applied on the single group of commodities in the petroleum list; they were published in definite amounts; and prior to the raising by the complainant of the technical tariff question presented in this case, had been recognized by the carriers, the shippers, and by the commission, as the applicable rates. In the opinion of the commission they were sufficiently specified under the tariff provisions as to render the intermediate rules inoperative in connection with the traffic. HELD: Rates charged legally applicable. No. 15878. The shipments were specifically routed by the shipper, and moved as routed over the lines of the western defendants to East St. Louis or Alton, thence east thereof for short distances over one or another of the short lines to some intermediate junction, generally Edwardsville or Wood River, and in some instances back again over the same lines to East St. Louis or Alton, where they were turned over to the eastern defendants for movement to destination. They could have been delivered direct by the western lines at East St. Louis or Alton in the first instance to the destination lines without the intervention of these intermediate carriers. The routes used by complainant were not the customary routes for handling this traffic, and, excluding the periods covered by the complaint, were not used for through traffic between the points involved. The shipments were so routed solely to take advantage of the combination rules carried in tariffs of the intermediate lines. No joint rates were in effect. Charged two factor combinations, by specific tariff provision, the combination rule was made inapplicable to the combinations of proportional rates. The practices here disclosed throw grave doubt on the propriety of according shippers unlimited latitude in the designation of intermediate routing. The act contemplates that carriers shall receive reasonable and just compensation for transportation service rendered by them. It does not contemplate that they shall participate in transportation without any charge, and it certainly does not permit or require such transportation at less than no charge. Such a result is wholly repugnant to the letter and spirit of the law, and when as here, it is sought to be accomplished by the wasteful shuffling of shipments back and forth in the congested terminals of the St. Louis-East St. Louis switching district it is especially to be condemned. The commission feels its power under the law is ample to deal with cases of this kind and it would be derelict in its duty if it did not intervene to prevent such unwarranted dissipation of carrier revenue regardless of where the responsibility lies. HELD: Application of the combination rules in question to these shipments would produce a result which is unlawful per se, and the commission will therefore regard them as of no effect. Complaints dismissed. Standard Oil Co. v. A. T. & S. F. Ry., 113 I. C. C. 597.

(q) Complainant attacked commodity rate of 26.5c charged on petroleum crude oil, in tank cars, between October 13, 1924, and January 24, 1925, from Texon, Tex., to Texas City, Tex., for coastwise movement, as unjust, unreasonable and unduly prejudicial to extent it exceeded 19c subsequently established. Texon is on the Orient in what is known as Texas differential territory 88 miles southwest of San Angelo, Tex., a Texas common point. Shipments moved Orient to San Angelo, thence G. C. & S. F., to Terminal Junction, Tex., a distance of 435 miles and the Texas City Terminal to complainant's storage tanks in Texas City, €

miles, a total distance of 529 miles. HELD: Rate attached not unreasonable, complaint dismissed. Kay County Gas Co. v. G. C. & S. F. Ry., 115 I. C. C. 736.

(r) Complainant attacked commodity rates charged on petroleum oil and its products, in tank cars from Kansas and Oklahoma to St. Francis, Kas., as unreasonable and unduly prejudicial. Prior to October 10, 1924, a rate of 34c applied on refined oil from north Texas points to St. Francis, applicable through some, at least, of the refining points in Oklahoma and Kansas. On that date the rate was increased to 60c, based on the established differentials of 2.5c and 6.5c over the rates from Oklahoma and Kansas. The cancellation of the 34c rate and the establishment of a rate of 60c removed undue prejudice, and also removed departure from the fourth section. Shipments moved between December 18, 1922, and May 6, 1925, charged from Kansas prior to July 1, 1923, 54c, and subsequent to that date 53.5c from Kansas and 57.5c from Oklahoma. HELD: Rates attacked unreasonable to extent they exceeded 49c from Kansas and 52.5c from Oklahoma, reparation awarded. El Dorado Refining Co. v. A. T. & S. F. Ry., 118 I. C. C. 51.

(s) Complainant attacked commodity rates charged on petroleum oil in tank cars to Petrolia, Findlay and Toledo, O., from Beattyville, Ky., between December 14, 1920, and November 25, 1922, as not applicable and unreasonable, unjustly discriminatory and unduly prejudicial. Rates were based on Cincinnati combination. The principal question presented is whether the commodity shipped was crude oil or a blend or mixture of casing head gasoline with crude oil. The latter was not covered by either a specific or general item in the commodity tariffs or by a specific item in the classification. It was covered, if at all, only by a general item in the classification, namely petroleum oil, n. o. i. b. n. Casing head gasoline is an extremely volatile material and even when mixed with heavier oils its evaporation while somewhat retarded, is rapid. It is one of complainant's principal contentions that notwithstanding the mixing of casing head gasoline with the crude oil at the start of its journey from the field the evaporation which took place in the pipe lines, in the loosely covered tanks at the relay station, and during the average detention of 23 days in the large tank at Beattyville, was such that at the time this oil was loaded into the tank cars its casing head content had disappeared. This contention is supported by expert opinion and by tests of samples of mixtures of casing head gasoline and crude oil in which the evaporation could be accurately determined. Generally speaking the material here considered, as shipped, when subjected to the usual tests, showed characteristics well within the range of those exhibited by crude oils, produced in and shipping at the crude oil rates from these and other fields, to which no casing head gasoline had been added. While the oil here considered originally contained a substantial percentage of casing head gasoline, the commission is convinced upon this record that in view of the highly volatile character of the commodity and the opportunities that were afforded for its evaporation between the time of its production and the time it was loaded into the cars, the oil as tendered for shipment did not contain sufficient quantity of casing head gasoline to render it different in any essential respect from crude oil as covered by the tariffs. HELD: Rates legally applicable those on crude oil, reparation awarded. National Refining Co. v. L. & N. R. R., 118 I. C. C. 177.

(t) Complainant attacked joint commodity rate of 36.5c charged on 27 tank cars of refined petroleum oil shipped from Reno, Pa., to Rockford, Ill., between September 25, 1922, and February 21, 1924, as unreasonable, unjustly discriminatory and unduly prejudicial in violation of the fourth section. At time of movements there was in effect a joint commodity rate of 34.5c from Foxburg, Pa., a point on the Pennsylvania 48 miles south of Reno to Rockford, which was applicable via Reno. This rate was established January 15, 1925. HELD: Rate attacked unreasonable to extent it exceeded 34.5c, reparation awarded. Smith Oil & Refining Co. v. C. M. & St. P. Ry., 118 I. C. C. 527.

(u) Failure of intermediate line to provide for payment of mileage allowances on private tank cars moving in service over its line, the same as paid by line-haul carriers, found to constitute an unreasonable practice. Under section 1 of the act, it is carrier's duty to provide transportation, including furnishing of cars, and when a shipper furnishes his

own cars, he relieves carrier of its common-carrier obligation and is entitled to reasonable compensation for the service rendered. Reasonable allowance prescribed for future and reparation awarded. Paragon Refining Co. v. A. & S., 118 I. C. C. 166.

(v) Rate on gasoline, in tank-car loads, from Los Angeles, to Reno, Nev., found unreasonable as compared with rates between other points for comparable and greater distances, and to extent it exceeded a lower rate contemporaneously in effect from and to same points by way of a longer route and subsequently established via route of movement. Reparation awarded. Richfield Oil Co. v. A., T. & S. F., 118 I. C. C. 214.

(w) In 101 I. C. C. 177 division 4 found that the applicable rate of 44c charged on liquid asphalt, in tank cars, shipped between Sept. 1, 1921 and Dec. 1, 1921, from Port Neches, Tex., to Morrillton, Galla and Conway, Ark., was unreasonable to the extent it exceeded 27c and awarded reparation. HELD, upon reconsideration rate attacked unreasonable to extent it exceeded 35c, reparation awarded. Texas Co. v. K. C. S. Ry., 120 I. C. C. 1.

(x) Complainant attacked combination rate charged on three tank cars of gasoline shipped from San Antonio, Tex., to Westwood, Calif., as unjust and unreasonable. Shipments were delivered to the G. H. & S. A. routed "S. P." They moved G. H. & S. A. to El Paso and S. P. beyond. Applicable rate $2.275, made up $1.26 to Sacramento, Calif., and $1.015 beyond, and rate now effective is $1.815 a combination of $1.13 to Colfax, Calif., and 68c beyond. Third shipment moved in accordance with shippers instructions, over S. P. to Fort Worth, Ft. W. & D. C., C. & S. and U. P. to Ogden, Utah and S. P. beyond, applicable rate to Fort Worth 38c, to Wendel $1.20, Westwood 25.5c plus 6c combination rule. HELD, rates attacked unreasonable to extent they exceeded $1.575, reparation awarded. Petroleum Products Co. v. G. H. & S. A. Ry., 120 I. C. C. 24.

(y) Complainant attacked combination rate charged on 13 cars of fuel oil in tank cars from Oleum, Calif., to Eureka, Nev., between Feb. and Oct. 1923 as unreasonable and inapplicable. Shipments moved S. P. to Palisade, Nev., and E. N. beyond, charged 38.5c to Palisade and 45c beyond, plus 50c per ton for transferring to narrow gauge equipment at Palisade. 38.5c factor not attacked. On Aug. 5, 1924 the rate of 45c on crude oil was made applicable on fuel oil. HELD, rate unreasonable to extent factor from Palisade to Eureka of 82.5c exceeded 45c, reparation awarded. Mackintosh Mines Co. v. E. N. Ry., 120 I. C. C. 121.

(z) Complainant attacked commodity rate charged on sulphuric acid, in tank-cars, shipped since Oct. 28, 1921 from La Salle, Ill., to Washington Court House, O., as unjust, unreasonable and unduly prejudicial as compared with rates to Cincinnati, O. Shipments moved Burlington, E. K. & E., C. I. & L., C. I. & W. and B. & O., 467 miles, short line distance 367 miles, charged $6.20 prior to July 1, 1922 and $5.60 on those on and after that date. On May 23, 1923 the rate became $5 but it has not been shown that any shipments have been made since that date. Present commodity rate from La Salle to Washington Court House is the same as the sixth class rate. The sixth class rate applies from Columbus to Washington Court House. Bearing in mind that sulphuric acid moves on the sixth class basis throughout central territory, except where lower rates have resulted from circumstances which are not a factor here, it is readily apparent that there is no substantial evidence of record to demonstrate that the rate attacked is unreasonable. HELD, rates attacked not unreasonable, complaint dismissed. Hamm Co. v. B. & O. R. R., 120 I. C. C. 345.

(aa) Complainant attacked rates on gasoline, in tank cars, from Texas and Oklahoma to California and Washington between August 26 and Dec. 31, 1920 as unjust, unreasonable, inapplicable and in violation of the fourth section. In 89 I. C. C. 356, Division 3 found that the rates charged were those applicable, but unreasonable to extent they exceeded the combinations resulting after modifying and changing the intermediate rates for segments of the same movement under the combination rule, and reparation awarded. In 100 I. C. C. 219 the rates attacked were found not unreasonable or otherwise unlawful. When the shipments in question moved, there were in effect joint through rates of $1.26 from points of origin to the California destinations named. and $1.46 to Richmond Beach. At the same time there were in effect separately established intermediate

rates to and beyond junction points in Oklahoma, Kansas and Texas, which aggregated more than the joint through rates. There is not now nor has there been since 1920 a movement of gasoline from the mid-continent field to California. HELD, rates attacked were those applicable and not unreasonable, complaint dismissed. McLeod v. T. & P. Ry., 120 I. C. C. 550.

(bb) Complainant attacked class rate charged on liquid tanning extract in tank cars shipped since Oct. 4, 1923 from Brooklyn, N. Y. to Winchester, Mass., as unreasonable and also to Peabody, Mass. Winchester is on the B. & M. 7.8 miles west of Boston and Peabody is on that railroad 2 miles west of Salem. Charged fifth class 27.5c and 28c. Sixth class rates are asked. HELD, rate attacked not unreasonable, complaint dismissed. Beggs & Cobb v. B. & M. R. R., 120 I. C. C. 711.

(cc) Upon reconsideration, findings in 92 I. C. C. 256 and 100 I. C. C. 233, that rates on liquid asphalt, in tank-car loads, from Port Arthur and Port Neches, Tex., to West Monroe, La., and on liquid and solid asphalt from Port Neches and points taking same rates to Tulsa, Okla, were not unreasonable, affirmed. Finding in 101 I. C. C. 177 that rates on liquid asphalt from Port Neches to Morrillton, Conway, and Galla, Ark., were unreasonable, modified. There is nothing to indicate that routes from Port Neches to Arkansas destinations are not as favorable from a transportation standpoint as those to Tulsa and Monroe and based upon distances alone the rate found reasonable is not in harmony with contemporaneous rate found not unreasonable. Moreover, rate found reasonable is unduly low as compared with rate found not unreasonable when consideration is given to the fundamental principle that ton-mile earnings should decrease as distance increases. Texas Co. v. K. C. S., 120 I. C. C. 1.

(dd) Rates on gasoline in tank-car loads fron San Antonio, Tex., to Westwood, Calif., found unreasonable to extent they exceeded lower rates contemporaneously in effect via several other routes between same points. Reparation awarded. Petroleum Products Co. v. G., H. & S. A., 120 I. C. C. 24.

(ee) Rate on fuel oil in tank-car loads from Oleum, Calif., to Eureka, Nev., found unreasonable to extent that factor from Palisade, Nev., to Eureka over narrow-gauge line of the Eureka Nevada Ry. exceeded lower rate contemporaneously in effect on crude oil and distillate, which lower rate was subsequently made applicable on fuel oil. Reparation awarded. Mackintosh Mines Co. v. E. N. Ry., 120 I. C. C. 121.

(ff) Sixth-class rates on sulphuric acid in tank cars, from La Salle, Ill., to Washington Court House, Ohio, found not unreasonable as compared with rates on fertilizer and various other commodities. The comparisons submitted were unaccompanied by a showing of any movement or of conditions influencing their establishment; moreover, sulphuric acid moves on the sixth-class basis throughout c. f. a. territory, except where lower rates have resulted from circumstances which are not a factor in instant case. Hamm Co. v. B. & O., 120 I. C. C. 345.

(gg) Rate on petroleum crude oil, in tank-car loads; from Currie, Tex., to Minneapolis, Minn., found unreasonable and unduly prejudicial as compared with rates to Kansas City, East St. Louis, and Chicago, at which points competing refineries are located. Reparation awarded. Pure Oil Co. v. C., R. I. & P., 120 I. C. C. 422.

(hh) Complainant attacked commodity rate charged on 44 cars of petroleum refined oil shipped between July 8, 1923 and Nov. 5, 1923 from Odonnell Spur, Calif., to Wilmington, Calif., for export as unreasonable and unjustly discriminatory. Charged 8c, which was equal to the aggregate of 4c from Odonnell Spur to Los Angeles, 11 miles and 4c beyond, 27.1 miles. Rate attacked was reduced to 7c Oct. 10, 1924. HELD, rate charged not unreasonable or unjustly discriminatory, complaint dismissed. Thomas Traffic Co. v. L. A. & S. L. R. R., 120 I. C. C. 671.

(ii) Complainant attacked commodity rate of 42c charged on lubricating oil, in tank carloads, from Galena, Port Arthur and West Port Arthur, Tex., to Topeka, Kas., from Jan. 7, 1924 as unreasonable, unjustly discriminatory, unduly prejudicial and in violation of the fourth section to extent it exceeds 32c. Galena, on the T. & N. O. 12 miles east of Houston, Tex., and Port Arthur and West Port Arthur on the T. & Ft. S. and T. & N. O., 19 and 23 miles south of Beaumont, Tex., are in the south Texas district. Topeka is on the Santa Fe, Rock Island and M. P. about 67 miles west of Kansas City,

Mo., in the Kansas district. A rate of 32c applied from these points to Topeka over practically all routes, except those in which the Santa Fe was the delivering carrier. Over such routes a rate of 42c applied and still in effect. Distance over Santa Fe range from 806 to 901 miles, over other routes 739 to 1,051 miles. From points on the Santa Fe, such as Beaumont, Houston and Galveston, which are a greater distance from Topeka than are the points involved herein, a rate of 32c has been in effect since Sept. 15, 1925. HELD, rate attacked unreasonable to extent it exceeded 32c, reparation awarded. White Eagle Oil & Refining Co. v. A. T. & S. F. Ry., 122 I. C. C. 223.

(jj) Complainant attacked commodity rates on eight tank cars of gas oil shipped from Kansas and Oklahoma to York, Neb., between June 8, 1921 and July 17, 1922 as unjust and unreasonable. Charged 55c from Fairmont and 53.5c from the other four points, the same as on refined oils. Reparation is desired on basis of 37.5c, which is the rate found reasonable on gas and fuel oils from Group B to Hastings and Grand Island, Neb., and Sioux City, Ia. in 68 I. C. C. 507. 34c is the rate found reasonable in that case reduced July 1, 1922 and published Aug. 28, 1922 to the destinations involved in that case as well as to York. York, Grand Island, and Hastings are in central Nebraska. York is 262 miles from Kansas City and 56 miles west of Lincoln over the Burlington and is directly intermediate to Grand Island, 97 miles west of Lincoln over that route. Hastings is 97 miles west of Lincoln on the Burlington to Oxford Neb. Sioux City is 288 miles northwest of Kansas City over the route of the Burlington to Council Bluffs, and C. & N. W. beyond. HELD, rates attacked unreasonable to extent they exceeded 37.5c, reparation awarded. Public Service Co. v. A. T. & S. F. Ry., 122 I. C. C. 316.

(kk) Complainant attacked commodity rates of $1.425 charged on six tank cars of inedible tallow from North Salt Lake, Utah., to Chicago, Ill., and 1.10 on seven tank cars from North Salt Lake to Kansas City, Kas., between March 22, 1923 and Dec. 2, 1924, as unreasonable, unjustly discriminatory, unduly prejudicial and in violation of the fourth section. North Salt Lake City is about 5 miles north of Salt Lake City in Utah common point territory, and is about 1,140 and 1,509 miles from Kansas City and Chicago. Inedible tallow is rated fifth class, the class rates being $1.82 and $1.50. A rate of $1.13 was in effect on the same commodity when shipped in barrels. HELD, rate attacked unreasonable to extent it exceeded $1.13 to Chicago and $1 to Kansas City, reparation awarded. Cudahy Packing Co. v. U. P. R. R., 122 I. C. C. 459.

(ll) Complainant attacked commodity rates charged on 121 tank cars of crude oil shipped from Verla, Ark., to Shreveport, La., as unreasonable, unjustly discriminatory and unduly prejudicial. Shipments moved between July 5 and Sept. 25, 1923. Charged prior to Sept. 1, 1923 15.5c and thereafter 12.5c, distance 91 miles. Defendant admits rate of 15.5c was unreasonable to extent it exceeded 12.5c. HELD, rate of 12.5 cents not unreasonable but rate of 15.5c unreasonable to extent it exceeded 12.5c, reparation awarded. Louisiana Refining Corp. v. St. L. S. W. Ry., 122 I. C. C. C. 503.

(mm) Complainant atttacked commodity rates charged on 114 tank cars of crude oil shipped between April 9 and 22, 1925 from Dale, Tex., to Sabine Pass, Tex., for coastwise movement beyond, was unreasonable and unduly prejudicial to extent it exceeded the rate subsequently established. Dale is in southeastern Texas on the M. K. T. Shipments moved 254 miles to Sabine Pass, thence coastwise vessels to Marcus Hook, Pa. Charged domestic rate of 21c, a rate of 11c being established April 23, 1925. HELD, rate attacked not unreasonable or otherwise unlawful, complaint dismissed. Sun Oil Co. v. M. K. T. R. R., 123 I. C. C. 17.

(nn) Complainant assails the storage charges assessed between April 1, 1922 and Feb. 1, 1925 on numerous tank cars of gasoline held in private cars on the private tracks of complainant at Wynona, Okla., and Burkburnett, Tex., as unreasonable, unjustly discriminatory, unduly prejudicial and illegal. The private tracks at Wynona and Burkburnett were constructed by defendants for the use of and paid for by complainant pursuant to certain contracts. The plants including the said tracks are used exclusively as plant facilities. Each plant is inclosed by a fence with a gate across the lead-in track, thus making the plant inclosure continuous and complete. The plants and facilities are at all times maintained by complainant as private property and no persons are permitted upon said property, or within said plant inclosure, except upon permission from

complainant. Defendants concede that the tracks were not so constructed that the same could be used by defendants in the operation of their business as private carriers. Thus is appears that complainants tracks could not under any circumstances be used as railroad premises within the limitation contained in the contract of construction; therefore the tariff definition of railroad premises in effect prior to Feb. 25, 1924 had no application to complainants sidings, and any charges collected under the storage rule were illegal. HELD, storage charges to be refunded, complaint dismissed. Skelly Oil Co. v. M. K. T. R. R., 123 I. C. C. 517.

(oo) Complainant attacked combination rates charged on casing head gasoline, in tank cars, from Bartlesville, Bryant, De Noya, Shidler, Pershing and Fite, Okla., to Bayonne, Bayway, and Paulsboro, N. J., and Olean, N. Y., as unreasonable. Gasoline, including natural gasoline, is shipped on the basis of an estimated weight of 6.6 pounds per gallon. While this is about the actual weight of gasoline, natural gasoline weighs about 5.5 pounds per gallon. The basis for the rates on petroleum and its products from Group 3 to these points is the lowest combination and this makes on St. Louis, Mo., or East St. Louis, Ill. To the basing point the factor is 27.5c. While complainant assails the separate factors of the rates the complaint is particularly intended as an attack upon the use of the combination basis and to the "system of proportional rates" under which the factors from the gateways vary, dependent upon the origin of the traffic, and the factors to the gateways vary, dependent upon the destination of the traffic. It is insisted that this basis of rates results in excessive through rates and undue advantage to jobbers and dealers at the rate breaking points. HELD, reasonable maximum rates on and after July 1, 1922 would be 72c to Bayonne and Bayway, 70c to Paulsboro, and 61c to Olean, reparation awarded. Phillips Petroleum Co. v. A. T. & S. F. Ry., 123 I. C. C. 724.

(pp) Joint rate on lubricating oil, in tank-car loads, from Galena, Port Arthur, and West Port Arthur, Tex., to Topeka, Kans., with A., T. & S. F. delivery, found unreasonable and unduly prejudicial to extent it exceeded lower rate for single-line haul contemporaneously in effet from Beaumont, Houston, and Galveston, Tex., farther distant points on the Santa Fe to same destination, and to extent it exceeded rates over practically all routes from and to same points, except to destinations on the Santa Fe from points on connecting lines. Reasonable and nonprejudicial rate prescribed for future and reparation awarded. White Eagle Oil & Refining Co. v. A. T. & S. F., 122 I. C. C. 223.

(qq) Rates on gas oil in tank-car loads from midcontinent field in Oklahoma, to York, Nebr., found unreasonable to extent they exceeded lower rate found reasonable from same origin points to Hastings and Grand Island, Nebr., and Sioux City, Iowa, in the Fairmont case, 68 I. C. C. 507, the rates to all these destinations having been equalized subsequent to above-cited decision. Reparation awarded. Public Service Co. v. A., T. & S. F., 122 I. C. C. 316.

(rr) Rate on inedible tallow, in tank-car loads, found unreasonable to extent it exceeded a lower rate contemporaneously in effect on the same commodity, in barrels. Reparation awarded. Cudahy Packing Co. v. U. P., 122 I. C. C. 459.

(ss) Rates on inedible tallow, in tank-car loads, from North Salt Lake, Utah., to Chicago, Ill., and Kansas City, Kans., found unreasonable as compared with rates on same commodity from Pacific coast points to same destinations; with rates prescribed in 98 I. C. C. 183 on vegetable oils in the Southwest for comparable distances; and with rates on lard, lard substitutes, and vegetable cooking oils from St. Louis, Kansas City, and certain other points in the southwest, prescribed in 101 I. C. C. 563. Reparation awarded. Cudahy Packing Co. v. U. P., 122 I. C. C. 459.

(tt) Following 112 I. C. C. 481, rates on naphtha, in tank-car loads, from Shreveport, La., to Cincinnati, Ohio, found not unreasonable as compared with rates on refined oil from same point to Chicago, St. Louis, and various other destinations. Rates on same commodity from Tulsa, Okla., and Wichita Falls, Tex., to Cincinnati, found not unreasonable in the past but unreasonable for the future to extent they exceed rates on refined oil from and to the same points. Reasonable rates prescribed for future. Procter & Gamble Co. v. A., T. & S. F., 122 I. C. C. 473.

(uu) Rates on crude oil, in tank-car loads from Verla, Ark., to Shreveport, La., found unreasonable as compared with rates for same distance under the

so-called normal or distance scales applicable in surrounding States, and to extent it exceeded rate subsequently established. Subsequently established rate which reflects the usual basis under distance scale prescribed in 58 I. C. C. 611, 644 found not unreasonable. Reparation awarded. Louisiana Oil Refining Corp. v. St. L. S. W., 122 I. C. C. 503.

(vv) Rate on crude oil in tank-car loads from Dale to Sabine Pass, Tex., for coastwise movement, found not unreasonable or otherwise unlawful as compared with rates from various other points in same general territory to Sabine Pass, or with lower rate from Oilfield and Luling to Sabine Pass, subsequently established from Dale. Rate charged was based upon distance scale approved in 34 I. C. C. 472, and carrier showed that the subsequently established rate was depressed on account of carrier and pipeline competition, and was established without regard to its reasonableness per se. Sun Oil Co. v. M.-K.-T., 123 I. C. C. 17.

(ww) Rates on natural gasoline, in tank-car loads, from points in Ranger group in Texas to destinations in official and southern territories, found not unreasonable or unduly prejudicial as compared with those contemporaneously in effect from Burkburnett and Houston-Galveston-Beaumont groups in Texas and from Shreveport and other Louisiana points taking same rates, except that rate to Brunswick, Ga., found unreasonable as compared with other rates assailed and to extent it exceeded rate herein prescribed. Houston and Shreveport rates are depressed and disparity between Ranger and Burkburnett rates is primarily due to difference in proportional rates made on Vicksburg, Miss. Although propriety of this adjustment is doubtful, it seems impracticable to deal with it and other situations involved in view of general investigation pending. Reasonable rate prescribed to Brunswick and reparation awarded. Chestnut & Smith Corp. v. A. & R. R. R., 123 I. C. C. 707.

(xx) Rates on natural gasoline, in tank-car loads from Bartlesville, and Oklahoma points taking same rates, to Bayonne, Bayway, and Paulsboro, N. J., and Olean, N. Y., found unreasonable as compared with rates contemporaneously in effect on petroleum and products between same and various points, and with those on cottonseed and vegetable oils, and vinegar for comparable distances. Natural gasoline ordinarily moves from this territory to the East under rates applicable on petroleum and products and as compared with rates prescribed to and from the Mississippi River in 66 I. C. C. 426 and 14 I. C. C. 272, respectively, earnings under rates assailed appear too high. Reasonable rates prescribed for future and reparation awarded. Phillips Petroleum Co. v. A., T. & S. F., 123 I. C. C. 724.

(yy) Rates on natural gasoline, in tank-car loads, found unreasonable as compared with those on petroleum and products, cottonseed and vegetable oils, and vinegar. Reasonable rates prescribed for future and reparation awarded Phillips Petroleum Co. v. A., T. & S. F., 123 I. C. C. 724.

(zz) Complainant combination rates charged on 17 tank cars of gasoline forwarded over defendants lines between June 2 and Dec. 1, 1923 from Dublin, Desdemona, Breckenridge, and Eliasville, Tex., and one tank car of gasoline shipped on July 14, 1923 from Jennings, Okla., to Shelton, W. Va., as unreasonable to the extent they exceeded the rates from the same points of origin to Charleston, W. Va., or the rate from Hodge, Tex., to Blue Creek, W. Va. The Texas points are grouped and range from 90 to 174 miles southwest and west of Fort Worth, Tex., and about 765 to 835 miles southwest of East St. Louis, Ill. Jennings is on the Frisco about 465 miles southwest of East St. Louis. Shelton is on the Charleston division of the B. & O. 40 miles northeast of Charleston and 124 miles south of Clarksburg. Similar cases were decided in Transcontinental Oil Co. v. A. & V. Ry., 96 I. C. C. 136 and Transcontinental Oil Co. v. B. & O. R. R., 118 I. C. C. 518. HELD, rates assailed were, are, and for future will be unreasonable to extent they exceed 63c reparation awarded. Shelton Gasoline Corp. v. W. F. R. & F. W. R. R., 126 I. C. C. 125.

(3a) Rates on gasoline, in tank-car loads, from Dublin, Desdemona, Breckenridge, and Eliasville, Tex., and Jennings, Okla., to Shelton, W. Va., FOUND unreasonable to extent they exceeded those contemporaneously maintained to Charleston, W. Va., by more than 4.5 cents. Issues similar to those here presented were considered in 96 I. C. C. 136; 118 I. C. C. 518, in connection with rates to Blue Creek, W. Va., wherein a differential of 1.5 cents was prescribed, and using the same rate of progression the rate to Shelton would be 4.5 cents

over Charleston. Reasonable rate prescribed for future and reparation awarded. Shelton Gasoline Corp. v. W. F., R. & F. W., 126 I. C. C. 125.

(3b) Conditions and circumstances peculiar to the transportation of petroleum oil and its products are so unique as to force carriers to abandon most of the customarily employed elements or factors in establishing rates. Pipe-line competition and water competition among refiners and producers are elements chiefly responsible not only for subnormal or depressed rates, but have combined to force the forming of large origin and destination groups. This method has long been practiced in the Southwest, where competition is keen and where pipe lines are numerous. In order to share in the traffic carriers have been forced to establish depressed rates over wide blankets and this has brought about a disregard of the distance factor so commonly used in making rates under normal conditions. Humble Oil & Rfg. Co. v. B. S. L. & W. Ry., 126 I. C. C. 717, 721, 722.

(3c) Suit for rental under contract to furnish tank cars HELD not an action founded upon open account which may be proven under Rev. St. 1925, art. 3736, by submission of verified account. Warren v. North American Car Co., (Tex., 1927) 293 S. W. 301.

(3d) In suit for breach of contract to furnish tank cars, correctness of account, showing amount due under contract, HELD for jury; the account not establishing cause of action by verification alone. Warren v. North American Car Co., (Tex., 1927) 294 S. W. 301.

(3e) In suit for rental under contract to furnish tank cars, account showing amount due HELD inadmissible until items thereof had been shown to be correct by testimony other than its verification; such account not being established by affidavit alone. Warren v. North American Car Co., (Tex., 1927) 294 S. W. 301.

(3f) On reconsideration, finding in original report 122 I. C. C. 223, that rate on lubricating oil, in tank-car loads from Galena, Port Arthur, and West Port Arthur, Tex., to Topeka, Kans., was unreasonable and unduly prejudicial, modified, and rate found not unreasonable in the past but for future will be unreasonable and unduly prejudicial to extent it exceeds rate found reasonable in 120 I. C. C. 614 from Chaison, Tex., a point intermediate to Port Arthur and West Port Arthur, and Topeka. Latter rate was also prescribed in 112 I. C. C. 421 from the south Texas refining group to Kansas City, Mo., and Topeka usually takes the Kansas City rate on oil from that group, so that to establish rates prescribed in original report would be to maintain rates lower from certain points in the group than those fixed from the group as a whole. Reasonable rate prescribed for future. White Eagle Oil & Rfg. Co. v. A., T. & S. F., 128 I. C. C. 55.

(3g) Complainant attacked fifth class rate of 38.5c charged on four tank cars of linseed oil which previously had been imported, shipped from San Francisco to Los Angeles, Calif., over S. P. from Jan. 11, 1923 to August 8, 1924 as unreasonable to extent it exceeded 31.5c. Complainants contention that the movement was in foreign commerce is based solely upon the fact that this oil originated in England. There was no connection between the ocean transportation to San Francisco and the subsequent rail movement to Los Angeles. As the original destination San Francisco, this oil passed into the possession and exclusive control of complainant, and remained as a part of its general stock to be distributed as commercial conditions occasioned. Complainant does not contend that the stoppage at San Francisco was merely a transportation incident between the receipt from the water carriers and the subsequent movement by rail to final destination. HELD, shipments intrastate, complaint dismissed. Fuller & Co. v. S. P. Co., 128 I. C. C. 199.

(3h) Shipments of linseed oil, in tank-car loads, previously imported, from San Francisco to Los Angeles, found to have been intrastate and beyond the commission's jurisdiction. The oil arrived from England, was pumped directly into complainant's storage tanks near the wharf, and subsequently reloaded into tank cars and moved to destination. Complainant's contention that movement was in foreign commerce is based solely upon fact that oil originated in England. However, there was no connection between ocean transportation to the United States port and subsequent rail movement beyond. Oil passed into possession and control of complainant at San Francisco and remained part of its general stock for commercial distribution. Moreover, complainant does not contend that the stop-

page at San Francisco was merely a transportation incident between receipt from water carriers and subsequent rail movement. See 6 Fed. (2d) 911; 209 U. S. 211; 102 I. C. C. 363. Fuller & Co. v. S. P. Co., 128 I. C. C. 199.

(3i) Joint rates on naphtha and gasoline in tank-car loads from Philadelphia to Sandyville, W. Va., a branch-line point, constructed on basis of rates to Ravenswood, W. Va., plus arbitraries beyond, found unreasonable as compared with contemporaneous rates in opposite direction and with those to Spencer, W. Va., a more distant point, subsequently made applicable to Sandyville; and rates from Meraux, La., and points in Kansas, Oklahoma, and Texas to same destination, found unreasonable to extent they exceeded rates subsequently established. Reparation awarded. Virginian Gasoline & Oil Co. v. B. & O., 128 I. C. C. 621.

(3j) Complainant attacked commodity rates charged on numerous tank cars of naphtha and gasoline shipped since Jan. 1, 1924 from Philadelphia, Pa., Meraux, Sandyville, W. Va., as unreasonable. Sandyville is a local station on the branch of the B. & O., 8.5 miles southeast of Ravenswood, W. Va., a point on the main line of that carrier between Kenova and Parkersburg, W. Va. HELD, rates attacked were and are not unreasonable, except that the rates of 48.5c from Philadelphia, 57 and 56c from Meraux, 64.5c La., and Kansas, Oklahoma and Texas, to from the Kansas and Oklahoma points, and 67c from Texas points unreasonable to extent they exceeded 43.5c from Philadelphia, 53.5c from Meraux, 62c from the Kansas and Oklahoma points and 64.5c from Texas, reparation awarded. Virginian Gasoline & Oil Co. v B. & O. R. R., 128 I. C. C. 621.

(3k) Complainant alleged that class rate charged on petroleum fuel oil in tank cars shipped subsequent to Oct. 31, 1924 from Pettys Island, N. J., to Garden City, L. I. N. Y., as unreasonable. Pettys Island is within the Philadelphia rate district. Garden City is on the L. I. Railroad 19 miles east of Long Island City. Shipments moved Pennsylvania to Greenville Piers, N. J., within New York Harbor, by car ferry to Long Island float bridge at Long Island City, thence by series of switch movements over L. I. R. R. to Holban Yards, Long Island, N. Y., and by that line to destination. The entire movement, exclusive of the car ferry across New York Harbor was about 111 miles, charged fifth class rate of 22c. HELD, rates attacked unreasonable to extent they exceeded 20.5c, reparation awarded. Curtiss Aeroplane & Motor Co. v. Pennsylvania R. R., 129 I. C. C. 174.

(3l) Complainant alleged rates charged on sulphuric acid, in tank cars, from Kansas City, Mo., to Oklahoma and Texas are unreasonable, unjustly discriminatory and unduly prejudicial as compared with rates from Grasselli, Ala., and Copperhill, Tenn., to the same destinations. Complainant alleged rates charged on sulphuric acid, in tank cars, from Copperhill and points in Nashville, Tenn., territory to oil refiners in Oklahoma were and are unreasonable and unduly prejudicial. No. 16459. Kansas City's largest market is in the petroleum refineries in Oklahoma, and its keenest competition is with Copperhill. HELD, a study of the rates, distances, and ton mile revenue portrayed in the evidence does not convince the Commission that the rates from Copperhill and Grasselli are too low. No. 16719. Copperhill is a local point on the L. & N. Sulphuric acid is rated fifth class in the western classification. Throughout the southwest it generally moves on commodity rates which have apparently been made for competitive or commercial reasons and without much regard for distance. HELD, rates assailed to Oklahoma not unreasonable or otherwise unlawful, but nothing contained herein affects the conclusions reached in the Southwestern Cases upon the issues there presented and a broader record. Complaints dismissed. National Zinc Co. v. A. & V. R. R., 132 I. C. C. 249.

(3m) Complainant alleged that rates on tallows, greases and vegetable soap stocks, in tank cars, from Chicago, Ill., to destinations on defendants lines in trunk line and New England territories were and are unjustly discriminatory, unduly prejudicial and in violation of section 4. Shipments made subsequent to March 12, 1924 to East Cambridge, Mass., Philadelphia, Pa., Jersey City and Little Falls, N. J., and East Hartford, Conn. Articles are rated fifth class, although by exceptions the sixth class rates are authorized, namely, 49.5c to East Cambridge and East Hartford, 45.5c to Philadelphia and 47.5c to Jersey City and Little Falls. HELD, rates assailed not unreasonable, unjustly discriminatory or in violation of section four but for future unduly prejudicial in favor of Neville Island, to ex-

tent they are higher than the rates on like commodities maintained from Chicago to Neville Island, Pa., plus the rates on the same commodities, crude or refined, from that point to the same destinations, reparation denied. Darling & Company v. N. Y. C. R. R., 132 I. C. C. 568.

(3n) Fifth-class rates on petroleum fuel oil in tank-car loads from Pettys Island, N. J., to Garden City, Long Island, N. Y., a Group B point, found unreasonable as compared with rates established following 89 I. C. C. 738, from same point of origin to Group A points. Reasonable rates prescribed for future and reparation awarded. Curtiss Aeroplane & Motor Co. v. P. R. R., 129 I. C. C. 174.

(3o) Rates on liquid asphalt in tank-car loads from Mereaux, Destrehan, and New Orleans, La., to Mobile, Ala., found unreasonable as compared with lower contemporaneous rates on like traffic between points in same general territory for comparable distances. Reasonable rates prescribed for future and eparation awarded. Continental Roofing & Mfg. Co. v. G. & S. I., 129 I. C. C. 313.

(3p) Complainant alleged commodity rate of 18.5c charged on 50 tank cars of gas oil shipped from Eldorado, Kas., to Tulsa, Okla., during April and May, 1926 was unreasonable to extent it exceeded 16c. From practically all Kansas refining points, except Eldorado, to destinations in Oklahoma specific rates ranging from 0.5c to 2.5c lower than the Kansas Oklahoma scale for like distances were maintained on crude and fuel oils. Under that scale the rate would be 16c. This is the basis to which reparation is sought, and is the specific commodity rate on gas oil between those points voluntarily established by the Santa Fe on Sept. 25, 1926 shortly after the filing of this complaint. HELD, rate assailed unreasonable to extent it exceeded 16c, reparation awarded. Eldorado Refining Co. v. A., T. & S. F. Ry., 132 I. C. C. 612.

§3. Effect in General.

(1) Adherence to Published Rate.

(a) A carrier may not arbitrarily set aside its tariff provisions without due notice in the proper form. Lexington Elevator & Mill Co. v. B. & O., 109 I. C. C. 542, 544.

(b) Since shippers as well as carriers are charged with a knowledge of the legally applicable tariff charges, the fact of undercharges is insufficient to sustain an award of damages. Clements Paper Co. v. T. C. Ry., 112 I. C. C. 411, 417.

(c) Agreements between carriers and shippers are of no legal effect in determining applicable rates where such agreements are not published in tariffs on file with the commission. Harlem & Morrisiana Transp. Line v. N. Y., N. H. & H., 123 I. C. C. 480, 483, 484.

(d) Shipper by rail must pay specified tariff charges, and carrier is forbidden to exact more or less than published rate or charge. New York & Pennsylvania Co. v. Davis, Director General of Railroads, 8 Fed. (2d) 662.

(e) Carrier's intention as to applicable rate is competent only in so far as it is fairly expressed in language of printed rates. Southern Pac. Co. v. Lothrop, 15 Fed. (2d) 486. Spokane P. & S. Ry. Co. v. Same, 15 Fed. (2d) 486. Oregon-Washington R. & Nav. Co. v. Same, 15 Fed. (2d) 486.

(f) Rulings of Interstate Commerce Commission as to routing of shipments, adopted to carry out Interstate Commerce Act, § 7 (U. S. Comp. St. § 8563), providing for collection of full tariff rates by carrier and prohibiting refunds, have effect of law in regulation of shipments in interstate commerce. Davis, Director General of Railroads v. Cayuga Operating Co., (N. Y., 1926) 216 N. Y. S. 186.

(g) A freight rate once lawfully established continues to be the legal rate until legally cancelled. Subsequent tariffs naming new rates, without canceling previous rates, cannot carry the new rate into lawful effect. McCaffrey Bros. Co. v. Chicago, B. & Q. R. Co., (Neb., 1926) 207 N. W. 503.

(h) Subject to regulation of public authority, railroad schedules must be followed. Siegel v. Chicago, R. I. & P. Ry. Co., (Ia., 1926) 208 N. W. 78.

(i) Tariff rates, filed and published as required by the Interstate Commerce Act (U. S. Comp. St. § 8563 et seq.), are binding and conclusive on both carrier and shipper until changed in the manner provided in the act. Illinois Cent. R. Co. v. Van Dusen, Harrington Co., (Minn., 1927) 212 N. W. 940.

(j) A compromise of a bill of freight charges on an interstate shipment of live stock for less than the regularly published and lawful tariff rate was void as against public policy and in breach of the inhibitions of the Interstate Commerce Act. Farrar v. Perkins, (Kan., 1926) 251 Pac. 440.

(k) On interstate shipments carrier can compel shipper to pay difference between legally established interstate rate and lower rate quoted or collected by mistake or otherwise. Missouri Pac. R. Co. v. Pfeiffer Stone Co., (Ark., 1924) 266 S. W. 82.

(l) A carrier cannot depart to any extent from its published schedule of rates for interstate transportation on file, without incurring penalties of act

of Congress. Missouri Pac. R. Co. v. Pfeiffer Stone Co., (Ark., 1924) 266 S W. 82.

(m) Section 6 (7) of the act provides so far as pertinent that no carrier subject to the act shall charge or receive a greater compensation for the transportation of property than the rates specified in the tariff filed and in effect at the time. Hyman Michaels Co. v. Director General, 128 I. C. C. 689, 691.

§3. (2). Erroneous Quotation or Publication.

See Erroneous Rates; Passenger Fares and Facilities §15.

(a) Shippers are charged with knowledge of lawful rates, and misquotation or misinformation by carriers can not alter the specific wording of tariffs. Underwriters Salvage Co. v. L. & N., 115 I. C. C. 585, 586.

§3 (3). Notice to Shipper.

See Notice; Released Rates §3½; Reparation §8.

(a) The Commission has repeatedly found that shippers are charged with notice of tariff provisions. Chattanooga Wheelbarrow Co. v. N. C. & St. L. Ry., 112 I. C. C. 549, 550.

(b) Shippers are presumed to know provisions of tariffs under which their traffic is offered for transportation. Russell Grain Co. v. A. G. S. R. R., 113 I. C. C. 701, 702.

(c) The law imposes on shippers the duty of ascertaining the rates and conditions under which they ship and noncompliance by a shipper with tariff rules affords no basis for a finding that the rate legally applicable was or is unreasonable or unjustly discriminatory. Memphis Freight Bureau v. St. L. S. W. Ry., 115 I. C. C. 409, 411.

(d) A shipper is charged with knowledge of the lawful rate, and that even misquotation or misinformation by the carriers can not alter the specific wording of the tariffs. Underwriters Salvage Co. v. L. & N. R. R., 115 I. C. C. 585.

(e) Shippers are chargeable with a knowledge of rates and conditions under which they ship. Rates lawfully in effect continue to remain so until canceled by other rates lawfully established. Murphysboro Paving Brick Co. v. M. & O., 122 I. C. C. 15, 16.

§ 4. Necessity of Publication.

See Allowances §4, II; Common Carrier §4; Demurrage §11; Divisions §2; Facilities and Privileges §17; Reconsignment §4; Refrigeration §5; Water Carriers III.

(a) Where shipments of a commodity are being accepted for transportation by carriers, appropriate tariff provisions therefor should be established. Garrett & Co. v. N. Y. C., 112 I. C. C. 519, 520.

(b) Agreements between carriers and shippers are of no legal effect in determining applicable rate where such agreements are not published in tariffs on file with the commission. Harlem & Morrisiana Transp. Line v. N. Y., N. H. & H., 123 I. C. C. 480, 483, 484.

(c) Under section 1, subd. 4, and section 6, subd. 1, Interstate Commerce Act, as amended (Comp. St. §§ 8563, 8569), it was carrier's duty, immediately on shipper's request for transportation between points on carrier's line, respecting which there was no published tariff, to publish a rate, and shipper was entitled to recover excess freight paid because of shipment over longer route. Swift & Co. v. New York Cent. R. Co., 16 Fed. (2d) 17.

(d) Circulars published by the Weighing and Inspection Bureau not published as tariffs by carriers or filed with commission are not controlling as are tariffs or other publications filed in accordance with section 6 of the act. Glarner & Co. v. S. Ry., 129 I. C. C. 75. 77.

III. FILING AND POSTING.

See Cars and Car Supply §4 (o); Crimes §10, §22; Reparation §9.

§6. In General.

(a) The commission can not too strongly condemn tariff provisions which not only fail to comply with section 6 of the act but also contravene tariff rules prohibiting inclusion of any provision in a tariff which makes amount of the charge dependent upon measure of a rate or charge published in tariffs of some other carrier. Davis-Noland-Merrill Grain Co. v. St. L.-S. F., 120 I. C. C. 87, 89.

(b) The commission has no special qualifications as an official body to determine the character of commodities from samples. However, where a violation of

section 6 is alleged, it has concurrent jurisdiction with the courts, and mode of proof does not differ in essence from that in court. Usual method of proving the character of a commodity or article is to introduce the commodity or article itself, or an agreed sample thereof, and, where the decision involves an intricate analysis, to adduce competent evidence by expert witnesses. Fraser v. A. C. L., 122 I. C. C. 520, 525.

(c) Evidence which goes to the question of reasonableness of rates can not affect interpretation of tariffs in a proceeding involving legality of rates under section 6 of the act. Fraser v. A. C. L., 122 I. C. C. 520, 526.

(d) There is no statutory burden upon carriers to prove character of a commodity where question in issue is legality of rates under section 6 of the act. Fraser v. A. C. L., 122 I. C. C. 520, 526.

(e) Proof of carrier's filing with Interstate Commerce Commission of supplemental tariff changing rates HELD to establish, prima facie, that carrier had taken all steps required by U. S. Comp. St. § 8569, to make new rates valid, in view of section 8584, subd. (12). New York, N. H. & H. R. Co. v. Salter, (Conn. 1926), 134 Atl. 220.

IV. CONSTRUCTION.

§7. In General.

See Supra II; Advanced Rates §8½a, §9½, §24; Class Rates §2 (7u); Classification §17, §20, §22, §24; Commodity Rates I, II, §3; Courts V; Differentials III; Express Companies X, §13; Facilities and Privileges §17½, §18, §19; Import Traffic §2 (c); Long and Short Hauls §16; Pipe Lines III; Reconsignment §5; Refrigeration §6; Reparation §8; Storage III; Tap Lines IV; Through Routes and Joint Rates §18, §20a (i), §21, V; Storage III; Water Carriers III; Weights and Weighing VI.

(a) Rates assessed on shipments of fuel oil moving from Tulsa, Okla., to St. Catharines, Ontario, reconsigned to Pittsburgh, and again to Woodlawn, Pa., over a circuitous route, found illegal. Contemporaneously, a lower unrestricted rate applied via a more direct route and all carriers participating in movement were parties to tariff naming such lower rate. Reparation awarded. Kyoleum Co. v. Director General, 104 I. C. C. 1.

(b) Tariffs provided that if other tariffs make a lower charge such lower rates would be applicable. They also contained special rules providing for application of c. l. rate on actual weight necessary to load where two or more consignments are made at one time by one consignor to one consignee at one destination and the minimum c. l. weight is exceeded. Lower rates were named in other tariffs which coupled with special rule made lower charges, but which in connection with applicable minimum made higher charges. Contention that lower rates, disregarding minimum weights, were applicable in connection with special rule, not sustained, since rates published in tariffs are governed by provisions contained therein, and rates are applicable only in connection with minimum weights published in tariffs naming such rates. Bailey Co. v. I. C., 104 I. C. C. 255.

(c) Following Pittsburgh Crucible Steel Co., 81 I. C. C. 659, rate on furnaces and furnace parts from Holland Mich., to Chicago higher than contemporaneous rate from Detroit, a farther distant point, found unreasonable, since tariffs naming rate from Detroit carried a rule 77 provision. Holland Furnace Co. v. A., T. & S. F., 104 I. C. C. 286, 289.

(d) Tariffs must be read in strict accordance with their terms. Lewiston Elevator Co. v. C. G. W., 104 I. C. C. 473, 474.

(e) Failure of carriers to publish their rates and charges in clear and unmistakable terms, as required by tariff rules, may not be used as a cloak to defeat claims of shippers. In construing doubtful ambiguous tariffs, commission has always resolved doubt against party responsible for having such tariffs in effect. North Packing & Provision Co. v. Director General, 104 I. C. C. 607, 614.

(f) In interpreting a tariff, terms thereof must be taken in sense in which they are generally understood and accepted commercially. Iron and Steel Articles, 104 I. C. C. 616, 621.

(g) Technical construction of one portion of the act may not be relied upon by carriers to justify a violation of other provisions. Mfrs. Asso. v. P. R. R., 107 I. C. C. 219, 236.

(h) Combination rate assessed on lumber moving from Westwood, Calif., to Pensacola, Fla., found to have been inapplicable, inasmuch as a lower combination could have been applied under rule 5-b of Tariff Circular 18-A based on New Orleans. Carrier contended that since rule 5-b was not made a part of tariff, it did not constitute basis for determining tariff rates. This rule, however, definitely determines applicable rates and its incorporation in tariffs is not necessary. Reparation awarded. Red River Lumber Co. v. Director General, 107 I. C. C. 671.

(i) A carrier may not arbitrarily set aside its tariff provisions without due notice in the proper form. Lexington Elevator & Mill Co. v. B. & O., 109 I. C. C. 542, 544.

(j) An unrestricted rate to Chicago found applicable on shipments of sand and gravel moving during Federal control from Hammond, Ill., to sidings located within Chicago district. While it was intention of carriers to apply a rate published to Division Street to all points within what the carrier considers its Division Street district, that fact can not be definitely ascertained from tariffs, which are ambiguous. Tariffs are to be construed strictly, the intention of framers is not controlling, and where doubt exists as to meaning of a tariff provision its construction must be resolved in favor of shippers. American Sand & Gravel Co. v. Director General, 109 I. C. C. 557.

(k) Shipment of carbide of calcium from Duluth, Minn., to Kingman, Ariz., was routed via short-line route through Denver over line of Union Pacific. A lower rate applied over various other routes, but tariff provision restricted its application in connection with Union Pacific by providing that " rates from or via points on the U. P. will not apply in connection with the Santa Fe via junctions in Kansas, nor in connection with Santa Fe via Denver * * *." Upon contention that phrase "in connection with the Santa Fe" was broad enough to cover transportation by that line anywhere en route, and phrase "via Denver" was broad enough to cover any interchange at Denver and did not limit first phrase to mean "in connection with the Santa Fe at Denver," HELD: Inasmuch as delivery at destination could be made only by Santa Fe, effect of such construction would be to exclude Union Pacific entirely from the haul. Tariff, being ambiguous, construed against the framer and lower rate found applicable in connection with all workable lines except Union Pacific. Reparation awarded. Central Commercial Co. v. A., T. & S. F. 109 I. C. C. 639.

(l) A failure strictly to observe the requirements of tariff circular 18-A in the publication of tariffs while a matter to be dealt with between the Commission and the carriers does not, in itself, invalidate the rate in the one tariff. Burlington Shippers Asso. v. C. B. & Q. R. R., 112 I. C. C. 533, 537.

(m) Rules for applying rates which require computations on part of users of tariffs should, in general, be avoided. Brick and Clay Products in the South, 113 I. C. C. 380, 382.

(n) The failure of defendants to publish their rates and charges in clear and unmistakable terms, as required by the tariff rules, may not be used as a cloak to defeat the claims of shippers. In construing doubtful and ambiguous tariffs, the commission has always resolved the doubt against the party responsible for having such tariffs in effect. Olsen v. A. G. S. R. R., 115 I. C. C. 195, 197.

(o) Tariffs are to be construed according to their language, and the intention of the framers is not controlling. Lautz Marble Corp. v. E. R. R., 115 I. C. C. 543, 544.

(p) Complainant attacked commodity rates charged on 21 cars of petroleum products shipped between September 19, 1921, and January 23, 1922, from Gates and Port Arthur, Tex., to Alamosa, Leadville, Monte Vista, and Salida, Colo., as inapplicable in violation of section 6. Lelands tariff I. C. C. 1308 named joint commodity rates to Alamosa of 133c, 139c to Leadville and Monte Vista, and 124c to Salida. Contemporaneously Countiss I. C. C. 1089 carried a rate of 98c from Gates and Port Arthur to Deming, N. M. Whatever may have been the intention of the defendant carriers with respect to restricting the application of the lower rate, the tariff must be construed in accordance with its language. If the carriers desired to exclude the application of the Deming rate to points on defendant's line they had it in their power to do so by plain language. HELD: Rates charged inapplic-

able, applicable rate 98c, reparation awarded. Texas Company v. B. S. L. & W. Ry., 115 I. C. C. 572.

(q) In construing doubtful or ambiguous tariffs the commission has always resolved the doubt against the carriers publishing the tariffs. Texas Co. v. B. S. L. & W. Ry., 115 I. C. C. 572, 574.

(r) Increase or reduction symbols do not affect the validity or applicability of the items to which they refer. General Motors Truck Co. v. G. T. W. Ry., 118 I. C. C. 99, 103.

(s) Although it is true, that the commission has found that the intention of the framers of a tariff is not controlling and that tariffs are to be construed according to the language used, it has also found that a fair and reasonable construction should be given in the light of all the pertinent provisions considered together. General Motor Truck Co. v. G. T. W. Ry., 118 I. C. C. 99, 104.

(t) Although doubts as to the meaning of a tariff must be resolved against the carrier and in favor of the shipper, the doubt must be a reasonable one; and in interpreting a tariff the terms used must be taken in the sense in which they are generally understood and accepted commercially, and neither carriers nor shippers can be permitted to urge for their own purposes a strained and unnatural construction. General Motor Truck Co. v. G. T. W. Ry., 118 I. C. C. 99, 104.

(u) Combination rate on furniture from Oklahoma City, Okla., to Jackson, Miss., found applicable. Complaint sought application of a lower third-class joint rate carried in a tariff which contained the restriction that "Rates between Jackson, and Natchez, Miss., will apply northbound only in connection with C. R. I. & P. no southbound rates in effect," contending that the rule was ambiguous and failed to restrict application of lower rate southbound. But shipment moved southbound to Jackson and since the restrictive clause definitely states "no southbound rates in effect," such contention not sustained. Orgill Bros. & Co. v. C., R. I. & P., 115 I. C. C. 23.

(v) The term "base point" as used in rule 5(b) of Tariff Circular 18-A was not intended to refer to stations named in tariffs as basing points, or even to well-known basing points, but was used merely to refer to any point upon which rates may base. Birmingham Tariff Bureau v. Director General, 115 I. C. C. 33, 36.

(w) In judging reasonableness and character of a tariff rule, consideration must be given to effect of rule on both railroad and shipper. Victor-American Fuel Co. v. D. & S. L., 115 I. C. C. 169, 173.

(x) Charges were collected on steel bars, round, square, and bent, and used for concrete reinforcements, under tariff description covering "bar, band, boiler, hoop, plate, and rod iron or steel * * *." Contemporaneously same tariff named lower rates in another item on " * * * sheet bars or bars of steel," a reference note thereto reading "These rates will also apply on sheet bars (for the manufacture of tin plate) * * *." HELD, note in no way restricted application of lower rates, and if it was carriers' intention, as contended, to limit them to sheet bars or sheet bars of steel, they should have done so by clear and unequivocal language. Having failed to do so, conflicting rates were therefore in effect, and shipper was entitled to the lower. See also 104 I. C. C. 607. Refund of overcharges directed. Olsen v. A. G. S. R. R., 115 I. C. C. 195.

(y) Tariff carried notation "applicable only via Seaboard Air Line as initial carrier and only on traffic originating at points south and west of Jacksonville." Upon contention that notation included points on all lines in Florida south and west of Jacksonville or on traffic turned over to the S. A. L. at that point. HELD, given a reasonable construction such notation restricted lower rate to traffic originating only on Seaboard Air Line south and west of Jacksonville. Wauchula Development Co. v. A. C. L., 115 I. C. C. 207.

(z) Tariffs are to be construed according to their language and intention of framers is not controlling. Lautz Marble Corp. v. E. R. R., 115 I. C. C. 543, 544.

(aa) Although intention of tariff framers is not controlling and tariffs are to be construed according to language used, a fair and reasonable construction should be given in the light of all pertinent provisions considered together. See 92 I. C. C. 211, 214; 101 I. C. C. 74, 76. General Motors Truck Co. v. G. T. W. Ry., 118 I. C. C. 99, 104.

(bb) The Commission can not too strongly condemn tariff provisions which not only fail to comply with section 6 but also directly contravene the tariff rules prohibiting the inclusion of any provision in the tariff which makes the amount of the charge dependent upon the measure of a rate or charge published in the tariffs of some other carrier. Davis-Noland-Merrill Grain Co. v. St. L. S. F. Ry., 120 I. C. C. 87, 89.

(cc) Tariffs must be construed strictly according to their language; the intention of the compiler is not controlling; and doubt as to the meaning of the tariff must be resolved in favor of the shipper and against the carriers. But the doubt must be a reasonable one, and neither shippers nor carriers may be permitted to urge a strained or unnatural construction. In arriving at a proper determination of this question the tariff must be considered in its entirety, and if it may be said after consideration of the pertinent provisions and limitations that a fair and reasonable construction of the tariff expresses the intention of the framers such intention should control. Gates Marble & Tile Co. v. C. P. & St. L. Ry., 120 I. C. C. 275, 277.

(ddee) The intent of a tariff is not superior to its terms, applied within reason. Delmar Co. v. G. N. Ry., 120 I. C. C. 530, 535.

(ff) Rates lawfully established remain in effect until specifically canceled. See 57 I. C. C. 547. Virginia & Rainy Lake Co. v. D., W. & P., 120 I. C. C. 131, 132.

(gg) Doubt as to meaning of a tariff must be a reasonable one and neither shippers nor carriers may be permitted to urge a strained or unnatural construction. In arriving at a proper determination of this question a tariff must be considered in its entirety, and if it may be said after consideration of pertinent provisions and limitations that a fair and reasonable construction expresses intention of framers, such intention should control. See 92 I. C. C. 211. Gates Marble & Tile Co. v. C., P. & St. L., 120 I. C. C. 275, 277.

(hh) As between two constructions of a tariff, that one should be adopted which gives effect to the whole, rather than one which creates a conflict. See 81 I. C. C. 241, 244. Gates Marble & Tile Co. v. C., P. & St. L., 120 I. C. C. 275, 277.

(ii) Character of an article shipped and not use to which it is put determines the rate applicable thereon. Menasha Wooden Ware Co. v. D., S. S. & A., 120 I. C. C. 415, 416.

(jj) The intent of a tariff is not superior to its items applied within reason. Delmar Co. v. G. N. Ry., 120 I. C. C. 530, 535.

(kk) It is well settled that shippers are chargeable with a knowledge of the rates and conditions under which they ship. Rates lawfully in effect continue to remain so until canceled by other rates lawfully established. Murphysboro Paving Brick Co. v. M. & O. R. R., 122 I. C. C. 15, 16.

(ll) The verbal agreement hereinbefore referred to under which certain named fish were accepted for transportation as fish bait, is of no legal effect in determining the applicable rate on shipments of those fish as such agreement was not published in tariffs on file with the Commission. Harlem & Morrisiana Transp. Line v. N. Y. N. H. & H. R. R., 123 I. C. C. 480, 483.

(mm) Complainant alleged charges collected on four cars of hollow building tile, shipped during Dec. 1923 from Volant, Pa., to Hamersville, O., were unreasonable. Charged $2.40 to Cincinnati plus sixth class of 11.5c beyond. Applicable rate to Cincinnati was $2.20 per ton, overcharge to be refunded. The factor of 11.5c was reduced to 6.5c Nov. 28, 1924. HELD, rate attacked unreasonable to the extent the factor south of Cincinnati exceeded 6.5c reparation awarded. Moores Coney Co. v. C. G. & P. Ry., 123 I. C. C. 559.

(nn) Publication by initial carrier of rule for computation of rate on through shipment of gasoline, is constructed from combination of separately established rates, HELD binding on it, notwithstanding tariff of connecting carrier did not cantain such rule, especially where this merely carried out Director General's intention. Empire Refining Co. v. Davis, Director General, 6 Fed. (2d) 305.

(oo) Manifest inadvertent, or clerical omissions in freight schedules, as well as statutes, will be supplied by court to avoid absurd and mischievous consequences and give effect to intent ascertainable from context. Gunnison Sugar Co. v. Public Utilities Commission of Utah, (Utah, 1927) 256 Pac. 790.

(pp) Although doubt as to meaning of a tariff must be resolved in favor of

the shipper and against the carrier which compiled it, the doubt must be a reasonable one. Di Giorgio Fruit Co. v. A. E. R. R., 128 I. C. C. 31, 33.

(qq) The Commission has repeatedly stated that, in interpreting a tariff, the terms used must be taken in the sense in which they are generally understood and accepted commercially and where the meaning so construed is clear it must govern. Di Giorgio Fruit Co. v. A. E. R. R., 128 I. C. C. 31, 33.

(rr) Where there is doubt as to meaning of a tariff, so long as it is a reasonable doubt, it must be resolved in favor of shipper and against carrier. Paraffine Companies v. S. P., 128 I. C. C. 421, 423.

(ss) Complainant contended that the minimum scale is inapplicable because in its publication the publishing agent failed to denote an advance. This contention is without merit. Lynchburg Traffic Bureau v. B. & O. R. R., 128 I. C. C. 557, 558.

(tt) The Commission can not consider only that part of the item that is favorable to complainants contention, and ignore other provisions of the item that make clear its application. Morse Dry Dock & Repair Co. v. A. C. L. R. R., 132 I. C. C. 351, 352.

(uu) Carriers tariffs must be construed strictly according to their language; the intention of the framers is not controlling; although doubt as to the meaning of a tariff must be resolved in favor of the shipper and against the carrier which compiled it the doubt must be a reasonable one. United States Can Co. v. A. & V. Ry., 132 I. C. C. 363, 368.

(vv) The Commission has frequently stated that carriers tariffs must be construed strictly according to their language, and the intention of the framers is not controlling. It has also stated that although doubt as to the meaning of a tariff must be resolved in favor of the shipper and against the carrier which compiled it, the doubt must be a reasonable one; that the terms of a tariff must be taken in the sense in which they are generally understood and accepted commercially; that neither carriers nor shippers can be permitted to urge for their own purposes a strained and unnatural construction; that all of the pertinent provisions of a tariff must be considered together; and that if those provisions may be said to express the intention of the framers under a fair and reasonable construction the intention must be given effect. As between two constructions, that one should be adopted which gives effect to the whole rather than one which creates conflicts. Prentice v. S. P. Co., 132 I. C. C. 409.

(ww) Invoices alone are not sufficient to establish character of commodity shipped or determine rates applicable. Glarner & Co. v. S. Ry., 129 I. C. C. 75, 76.

(xx) Circulars published by the Weighing and Inspection Bureau not published as tariffs by carriers or filed with commission are not cnotrolling as are traiffs or other publications filed in accordance with section 6 of the act. Glarner & Co., v. .S Ry., 129 I. C. C. 75, 77.

(yy) Coal from southern Illinois, Indiana, and Kentucky to points within Chicago switching district were assessed local rates to Chicago plus arbitraries beyond. Contemporaneously lower proportional rates were in effect to Chicago but were restricted to apply only to points beyond the switching district via Chicago and to points on certain lines within the district to which no through rates were published. While complainants contend that rates assessed were not through rates and lower proportionals were applicable, carriers urge that since both locals and arbitraries were concurred in by all participating carriers, they were through as well as joint rates. FOUND: While doubt as to meaning of tariff provisions is ordinarily construed against the maker, such doubt must be reasonable after consideration of pertinent tariff provisions. Here it is reasonably apparent that local rates plus arbitraries were through rates within meaning of restrictive tariff provisions and that rates assessed were applicable. Chicago Coal Merchants Asso. v. N. Y. C., 129 I. C. C. 203.

(zz) Hypothetical ilustrations, which serve to show how shippers, in certain circumstances, may avoid payment of destination switching charges upon strictly local traffic by exercising care in selection of inbound billing and outbound routing on transit shipments, have no direct bearing upon a reasonable interpretation of tariff provision

upon which complaint rests. Southern Kansas Millers Club v. A. T. & S. F., 129 I. C. C. 632.

(3a) Combination rates on wrought-iron pipe from Lorain, Ohio, to various Kansas points were assessed on two different bases, the lower combination being based on Jacksonville, Ill. Tariff pulishing higher combination provided, in absence of specific rates, a specific manner of constructing combination by addition of basing rates to factor from Lorain to Mississippi River crossing. Under rule 5 (c) of Tariff Circular 18-A if specific manner of constructing rates had not been prescribed, the lower combination would have been applicable, but, under the circumstances, higher combination was applicable. National Tube Co. v. A., T. & S. F., 129 I. C. C. 693.

(3b) Rates charged on cotton fabrics, l. c. l. from North Carolina points to Galveston, Tex., found inapplicable. Governing tariff stated that it was subject to western classification, "Except as otherwise provided," and provided for alternative application of rates in section 2 or 3, whichever were lower. No minimum weight was provided in connection with lower rates under section 3, and rates were there applicable to actual weight of shipment. However, since rule 15 of the western classification provided for assessment of separate loading and unloading charges on l. c. l. freight moving at c. l. rates, and rule 13 required a minimum charge of $15 per car, these rules must be considered in determining rates applicable to various shipments. Refund of overcharges directed on basis indicated Southern Traffic & Audit Asso. v. I.-G. N., 129 I. C. C. 723.

(3c) In determining rate chargeable, all parts of tariff field should be considered, and, if plain meaning can be gathered therefrom, effect should be given to it, and tariff must be construed in its entirety, considering both limitations on its title page and rules contained therein. Lothrop v. Spokane, P. & S. Ry. Co., 10 Fed. (2d.) 225. Same v. Oregon-Washington R. & Nav. Co., 10 Fed. (2d.)225. Same v. Southern Pac. Co., 10 Fed. (2d.) 225.

(3d) Traffic bureaus and organizations fixing rates for carriers act somewhat in legislative capacity to conserve their best interests, and rates, when presented to shipper and accepted, becomes a hard and fast contract, which is to be construed in case of ambiguity liberally in favor of shipper. Lothrop v. Spokane, P. & S. Ry. Co., 10 Fed. (2d.) 225. Same v. Oregon-Washington R. & Nav. Co., 10 Fed (2d.) 225. Same v. Southern Pac. Co., 10 Fed. (2d.) 225.

(3e) If amendment of carrier's tariffs creates an ambiguity only, shipper is entitled to that construction most favorable to him Lothrop v. Spokane, P. & S. Ry. Co., 10 Fed. (2d.) 225. Same v. Oregon-Washington R. & Nav. Co. 10 Fed. (2d.) 225. Same v. Southern Pac. Co. 10 Fed. (2d.) 225.

(3f) Tariff fixing rates must be strictly construed in accordance with the printed language. Lothrop v. Spokane, P. & S. Ry. Co. 10 Fed. (2d.) 225. Same v. Oregon-Washington R. & Nav. Co. 10 Fed. (2d.) 225. Same v. Southern Pac. Co., 10 Fed. (2d.) 225.

(3g) In absence of limitation in schedules filed with Interstate Commerce Commission, limiting schedules to strictly interstate shipments as distinguished from shipments in foreign commerce, Circuit Court of Appeals will assume that schedules were intended to comply with full duty imposed upon carrier, so that rates therein would apply to shipments moving in commerce with foreign countries as well as shipments in interstate commerce. Chandler v. Pennsylvania R. Co. 11 Fed. (2d.) 39.

(3h) Form of rate schedule is for Interstate Commerce Commission, which may approve or disapprove splitting of charges. J. C. Famechon Co. v. Northern Pac., 11 Fed. (2d.) 312.

§8. Ambiguity.

(a) An unrestricted rate to Chicago found applicable on shipments of sand and gravel moving during Federal control from Hammond, Ill., to sidings located within Chicago district. While it was intention of carriers to apply a rate published to Division Street to all points within what the carrier considers its Division Street district, that fact can not be definitely ascertained from tariffs which are ambiguous. Tariffs are to be construed strictly, the intention of

framers is not controlling, and where doubt exists as to meaning of a tariff provision its construction must be resolved in favor of shippers. American Sand & Gravel Co. v. Director General, 109 I. C. C. 557.

(b) Shipment of carbide of calcium from Duluth, Minn., to Kingman, Ariz., was routed via short-line route through Denver over line of Union Pacific. A lower rate applied over various other routes, but tariff provision restricted its application in connection with Union Pacific by providing that "rates from or via points on the U. P. will not apply in connection with Santa Fe via junctions in Kansas, nor in connection with the Santa Fe via Denver * * *." Upon contention that phrase "in connection with the Santa Fe" was broad enough to cover transportation by that line anywhere en route, and phrase "via Denver" was broad enough to cover any interchange at Denver and did not limit first phrase to mean "in connection with the Santa Fe at Denver," HELD: Inasmuch as delivery at destination could be made only by Santa Fe, effect of such construction would be to exclude Union Pacific entirely from the haul. Tariff, being ambiguous, construed against the framer and lower rate found applicable in connection with all workable lines, except Union Pacific. Reparation awarded. Central Commercial Co. v. A., T. & S. F., 109 I. C. C. 639.

(c) In case of ambiguity, the familiar rule of construction is that a tariff must be construed against the framer. Central Commercial Co. v. A., T. & S. F., 109 I. C. C. 639, 640.

(d) Manner in which carrier listed stations in its tariff and as to how rates should be applied, resulted in a conflict as to applicable rates. HELD: Where there is doubt as to meaning of a tariff provision, doubt should be resolved against maker and in favor of shipper. Reparation awarded. Wagner Electric Corp. v. Director General, 112 I. C. C. 57.

(e) Carriers tariffs must be construed strictly according to their language; that the intention of the framers is not controlling; that, although doubt as to the meaning of a tariff must be resolved in favor of the shipper and against the carrier which compiled it, the doubt must be a reasonable one; that the terms of a tariff must be taken in the sense in which they are generally understood and accepted commercially, and neither carriers nor shippers can be permitted to urge for their own purposes a strained and unnatural construction; and that all of the pertinent provisions of a tariff must be considered together, and, if these provisions may be said to express the intention of the framers under a fair and reasonable construction, that intention must be given effect. Forbes & Sons Piano Co. v. A. G. S. R. R., 118 I. C. C. 185, 186.

(f) On petroleum products from Gates and Port Arthur, Tex., to certain Colorado points, tariff rule provided that if rates and charges in an agency tariff applicable from same origin points to Lago, Utah, or Deming, N. Mex., respectively, made lower charges than those provided in another tariff, the lower rates to Lago or Deming, respectively, would apply. Upon contention that word "respectively" applied to routes and not to rates. HELD, while it may have been carriers' intention to restrict application of lower rate to their own lines, tariff must be construed in accordance with its language. Tariff publishing the rule contained no routing restrictions and made all destinations therein, with one exception, subject thereto; nor was there any restriction that particular destination points must be directly intermediate to points carrying lower rates and if it was desire of carriers to exclude application of the Deming rate to points on their lines they had it in their power to do so by plain language. Here the tariff was doubtful or ambiguous and must be resolved against framers. Refund of overcharges directed. Texas Co. v. B., S. L. & W., 115 I. C. C. 572.

(g) In construing doubtful or ambiguous tariffs the doubt is always resolved against carriers publishing the tariffs. Finch Bros. v. C., St. P., M. & O., 123 I. C. C. 541, 542.

(hi) The Commission has repeatedly found that where there is a reasonable doubt as to the meaning of tariff provisions the doubt should be resolved against the maker of the tariff and in favor of the shipper. Brunswick Balke Collender Co. v. B. & O. R. R., 126 I. C. C. 747, 750.

(j) Ambiguous tariffs are to be construed favorably to shippers. Southern Pac. Co. v. Lothrop, 15 Fed. (2d) 486.

(k) The Commission has stated that, although doubt as to the meaning of a tariff must be resolved in favor of the

shipper and against the carrier which compiled it, the doubt must be a reasonable one. Di Giorgio Fruit Co. v. A. E. R. R., 128 I. C. C. 31, 33.

(l) The Commission has repeatedly found that where there is doubt as to the meaning of a tariff provision the doubt should be resolved against the maker and in favor of the shipper, but the doubt must be reasonable after consideration of all the pertinent provisions of the tariff or tariffs. Chicago Coal Merchants Asso. v. N. Y. C. R. R., 129 I. C. C. 203, 207.

(m) Where there is doubt as to the meaning of a tariff provision the doubt should be resolved against the maker and in favor of the shipper. Fewell Tea Co. v. D. L. & W. R. R., 129 I. C. C. 424, 426.

§8½. Amendments and supplements.

(a) A special supplement to a tariff issued by a railroad company in form, pursuant to special permission of the Interstate Commerce Commission, and purporting to increase freight rates, is valid and effective if it fairly sets forth, when construed as an entirety, (1) the amendments made, (2) the cancellation of all original rates relating to the same service to which the amendments pertain, and (3) information as to where all changes from the original tariff that are effective on the date thereof may be found. McCaffrey Bros. Co. v. Chicago, B. & Q. R. Co., (Neb., 1926) 207 N. W. 503.

(b) Parts of a supplement to a freight tariff may be canceled and the remainder of the supplement continue in effect. McCaffrey Bros. Co. v. Chicago B. & Q. R. Co., (Neb., 1926) 207 N. W. 503.

(c) A tariff, or a supplement thereto, must be construed in its entirety, considering both the limitations on its title page and the rules contained therein. Supplements are a part of the tariff the same as though originally incorporated therein. McCaffrey Bros. Co. v. Chicago, B. & Q. R. Co., (Neb., 1926) 207 N. W. 503.

(d) The Interstate Commerce Commission authorized a carrier to issue a supplement to its tariff, on less than the statutory notice, canceling and reissuing a former supplement unchanged except to correct a specified mistake. In the new supplement a rate of 17.5 cents, which should have remained unchanged, appeared as 1.5 cents, the figure 7 having been dropped out in printing. HELD that this supplement did not establish the 1.5-cent rate as a lawful rate, as it was not authorized by the commission and the statutory notice was not given. Illinois Cent. R. Co. v. Van Dusen, Harrington Co., (Minn., 1927) 212 N. W. 940.

§ 8½a. Basis Book.

(a) Section 6 of the act deals with two classes of rates, joint through rates and, in the absence thereof, application of separately established rate factors applicable to through movement over through route. In addition to the two methods of rate making the commission has, in rule 5 (b) of Tariff Circular 18—A, outlined another plan of making through rates. FOUND: That the so-called Florida basis book containing proportional rate factors used for making through combination rates on Jacksonville and other Florida junction points does not conform to rule 5 (b), nor are carriers serving a large part of origin territory here involved named as participating carriers. The basis book, therefore, can only be considered as containing proportional rates, which may be used in combination when such combinations are lower than other lawfully established combination rates applicable over route of movement. Lumber from or to Florida Points, 112 I. C. C. 133, 138.

§9. Cancellation.

(a) Carriers having assessed rate applicable under old tariff subsequent to issuance of new tariff, rendered bill for undercharges. Upon contention that old rate was applicable since old tariff was not specifically canceled by a supplement thereto, notwithstanding fact that new tariff contained a statement cancelling the old tariff, HELD: This contention is without merit. Rule 8 (e) of Tariff Circular 18-A provides that if a tariff is canceled by issuance of a similar tariff to take its place, cancellation notice must not be given by supplement, but by notice printed in new tariff. Rate subseqently assessed was therefore applicable and outstanding undercharges should be collected. Chicago Heights Mfrs. Asso. v. B. & O. C. T., 123 I. C. C. 636, 637.

(b) HELD, under the evidence in this case, special supplement No. 7 to tariff issued by the Chicago, Burlington & Quincy Railroad Company, taking effect March 10, 1921, cancels all prior rates on the commodities therein enumerated,

and the rates therein prescribed were legally in effect during the time the services set forth in plaintiff's petition were performed. McCaffrey Bros. Co. v. Chicago, B. & Q. R. Co., (Neb., 1926) 207 N. W. 503, 504.

§9a. Combination Rule.

See Infra §13a.

(a) Tariffs provided that if other tariffs make a lower charge such lower rates would be applicable. They also contain special rules providing for application of c. l. rate on actual weight necessary to load where two or more consignments are made at one time by one consignor to one consignee at one destination and the minimum c. l. weight is exceeded. Lower rates were named in other tariffs which couple with special rule made lower charges, but which in connection with applicable minimum made higher charges. Contention that lower rates, disregarding minimum weights, are applicable in connection with special rule, not sustained, since rates published in tariffs are governed by provisions contained therein and rates are applicable only in connection with minimum weights published in tariffs naming such rates. Bailey Co. v. I. C. C., 104 I. C. C. 255.

(b) Fremont, Ind., and Montgomery and Reading, Mich., are intermediate to Angola, Ind., and Hillsdale, Mich., over different routes. On shipments moving from these origin points rates from Angola, which were higher than from Hillsdale were assessed. FOUND: That Angola rates were legally applicable since tariff provided that where rates were not specifically named from origin points located directly between two points from which rates were named, such intermediate points would take higher of named rates. Ohio Farm Bureau Federation v. N. Y. C. 104 I. C. C. 490.

(c) Rate on rough lumber from North Lewisburg, Ohio, to Chicago, found unreasonable to extent it exceeded lower contemporaneous rate from Woodlawn (Cincinnati), a farther distant point of origin. Applicable tariff carried rule 77 of Tariff Circular 18-A, which provided that upon reasonable request therefor the lower rate would be established from intermediate point. However, following 69 I. C. C. 403, 405, a request for publication of lower rate prior to movement was not essential in order that shipper might take advantage of the rule. Reparation awarded. Liberty Cooperage & Lbr. Co. v. E. R. R., 107 I. C. C. 165.

(d) Combination rate assessed on lumber moving from Westwood, Calif., to Pensacola. Fla., found to have been inapplicable, inasmuch as lower combination could have been applied under rule 5-b of Tariff Circular 18-A based on New Orleans. Carrier contended that since rule 5-b was not made a part of tariff, it did not constitute basis for determining tariff rates. This rule, however, definitely determines applicable rates and its incorporation in tariffs is not necessary. Reparation awarded. Red River Lumber Co. v. Director General, 107 I. C. C. 671.

(e) Proposal to cancel commodity rates on coal tar and pitch based on a minimum of 60,000 pounds from Birmingham, Ala., and group points, to certain points in the Carolinas, leaving applicable higher commodity rates based an a minimum of 40,000 pounds, designed to forestall requests for publication of lower rates to intermediate points under rule 77 of Tariff Circular 18-A, found not justified. Extension of these lower rates to intermediate points for private consumption seems not only proper, but they should be extended further to all intermediate points to which these commodities move for road-building and roof-making purposes. Coal Tar and Pitch from Birmingham, 109 I. C. C. 73.

(f) Shipments originated at or were destined to points on nonfederally controlled roads and moved over routes embracing carriers under Federal control. Full combinations, both factors of which were increased under General Order No. 28 of director general, were assessed. The combination rule which provided for application of but a single increase to through rates made on combination, was published in tariffs of individual lines. HELD: Applicable rates were those made bv applying combination rule in instances where one or more of the individual tariffs contained or made appropriate reference thereto, and in instances where none of the individual tariffs contain or made such reference the combinations to and from junctions were applicable. Pacific Coast

Shippers Asso. v. Director General, 109 I. C. C. 166.

(g) Rate charged under an exception to classification on prepared roofing over the Chicago and Eastern Illinois from Chicago, Illinois to Terre Haute, Ind., found illegal. Legal rate found to be a specific joint commodity rate published in a tariff to which the C.& E. I. was a party from Chicago to Midland City, Ill., applicable over its line to Terre Haute and the Pennsylvania beyond. This tariff carried the intermediate rule which provided that rates named therein would apply from or to directly intermediate points not indexed, or if indexed, but with no rate shown, such tariff not naming a specific rate to Terre Haute. Refund of overcharges directed. Elaborated Ready Roofing Co. v. C. & E. I., 109 I. C. C. 401.

(h) Shipments from Wilmington and Modesto, Calif., to Jacksonville, Fla., were routed by shipper and a joint through rate assessed. Governing tariff contained alternative rule providing for application of aggregate-of-intermediate rates when less than through rate, and a lower combination unrestricted as to routing applied via Memphis. Upon contention that under rule 5(b) of Tariff Circular 18-A such lower combination was applicable, HELD: Only application of rule 5(b) is when "no joint rate applies," or "in the absence of a specified rate," and therefore had no application in the situation here presented. Moreover, had shipments moved via Memphis an out-of-line haul of more than 1,000 miles would have resulted. Joint rate assessed found applicable. Rosser & Fitch v. Director General, 109 I. C. C. 724.

(i) Rate on bulk corn from Jefferson, S. Dak., to Fowler, Colo., found applicable, but unreasonable to extent it exceeded a lower rate contemporaneously in effect to Trinidad, a more distant point, to which Fowler is directly intermediate. Tariff carrying lower rate contained an intermediate rule under provisions of which rates apply to intermediate points only when they are not named in the tariff. Fowler was named in the tariff but not in item carrying rates on this commodity between points named, consequently the Trinidad rate was not applicable to Fowler. See 36 I. C. C. 523 and 45 I. C. C. 183. Later carriers provided by addition of a note to the rule for application of Trinidad rate to Fowler and other points; thus the situation presented clearly raises a presumption of unreasonableness, which carriers made no attempt to meet. Reparation awarded. Summitt Grain Co. v. C., M. & St. P., 109 I. C. C. 763.

(j) Carrier incorporated in its tariff a note for purpose of applying the intermediate rule under which rates to farther distant points would apply at intermediate stations. HELD: As commission's tariff rules require publication of rates in clear and specific manner, and include a rule extending rates to intermediate points which is not subject to misinterpretation, tariff should be amended by incorporating therein a rule substantially in accord with that appearing in Tariff Circular 18-A. See also 66 I. C. C. 472, 473. Summitt Grain Co. v. C., M. & St. P., 109 I. C. C. 763, 764.

(k) Tariff governing one factor of combination rate contained provision to effect that rates named therein were subject to combination rule carried in an agency tariff, which provided a specific method for constructing through rates made on combination. Tariff of carrier governing other factor contained no combination rule, or similar reference, and provided specifically that rates named therein were not subject to agency tariff. HELD: Reference to agency tariff was equivalent to publication of the rule in rate tariff of the individual line, which must protect the aggregate rate constructed by use of the rule. See 93 I. C. C. 186. The principle laid down in the Sligo case, 62 I. C. C. 643; 73 I. C. C. 551, is controlling, and there was a holding out to shipper of the rate constructed in conformity with the rule, which publishing carrier must protect. Overcharges found and reparation awarded. Phosphate Products Corp. v. C. & O., 112 I. C. C. 161.

(l) Shipment of dried lima beans from Santa Monica, Calif., to Tampa, Fla., billed via a rail-and-water route was diverted at request of shipper to an all-rail route. Combination rate based on Jacksonville, Fla., assessed. FOUND: As there was no published joint all-rail rate from point of origin to destination, shipper was entitled to lowest combination, which, under rule 5 (b) of Tariff Circular 18—A, was a combination based on Memphis and Jacksonville. Reparation awarded for

overcharges. Harman & Hulsey v. Director General, 112 I. C. C. 275.

(m) Rate charged on baled cotton transported over an interstate route from Brownsville, Tenn., to Delano, Tenn., found inapplicable. Lower combination in effect referred to a tariff carrying so-called combination rule which provided a specific method for constructing through rates made on combination. While schedule carrying combination rule applied "where no published through rates are in effect from point of origin to destination," and there was a through rate from Brownsville to Delano over a route other than route of movement, conclusions reached in 95 I. C. C. 451, wherein commission held that this rule is applicable in the absence of a joint rate over the route traversed, regardless of joint rates over other routes, is controlling. Applicable rates found to be those constructed by use of combination rule and reparation awarded for overcharges. Gunther & Co. v. L. & N., 112 I. C. C. 387.

(n) Upon contention of complainants that, under an intermediate clause and open routing of the tariffs, where point of destination was intermediate to a named point designated as taking a particular group rate, a shipment could be routed over any lines parties to tariffs and that hence the rate to any point not specifically named would be that applicable to unnamed intermediate points located between two named points, HELD: Not only destinations named are indexed within meaning of intermediate rule in question, but all points falling within the descriptions of "all points," "all other points," and "unnamed intermediate points located between two of the above-named points" are likewise indexed, i. e., a point in the higher rated territory, covered by the description "all other points" is not to be regarded as located between two named points merely because there is a possible route from one named point to another through such higher rated territory. Pacific Coast Shippers' Asso. v. A., C. & Y., 112 I. C. C. 527.

(o) Rates on lumber and other forest products from points in Washington, Oregon, Idaho, Montana, and British Columbia, to destinations in Indiana, Michigan and Ohio, found illegal in some instances and legal in others due to construction of an intermediate clause. Construction given tariffs is warranted by their provisions considered as a whole, is reasonable under all circumstances, and is undoubtedly that intended by makers so far as their intention can be judged by tariffs. Construction sought by complainants would lead to absurd results. Pacific Coast Shippers' Asso. v. A., C. & Y., 112 I. C. C. 527.

(p) Rate on crushed stone from New Ulm, Minn., to Holstein, Iowa, found not unreasonable as compared with lower rates to Sac City and Lake View, Iowa, farther distant points, or with rates to other Iowa points for comparable distances. While an item in governing tariff carried the so-called intermediate rule which provided for application to unnamed points of rate to next more distant point, Holstein was itself named in the tariff, therefore rate to the next more distant point was not applicable. Everist & Co. v. C. & N. W., 113 I. C. C. 267.

(q) Complainant took advantage of unrestricted combination rules published in local tariffs of intermediate short lines by routing shipments over unusual routes. Shipments could have been billed without intervention of intermediate short lines. Tariffs of originating and delivering carriers specifically prohibited use of such rule and computation of rates by its use would require the intermediate roads to haul traffic for less than nothing. FOUND: Holding out principle laid down in the Sligo case, 62 I. C. C. 643; 73 I. C. C. 551, is not controlling. In no case applying that principle was a carrier required to protect a rate less than nothing or surrender all its earnings to connections; nor does the act permit or require transportation without any charge or at less than no charge. When, as here, such a result is sought to be accomplished, it is to be condemned; and the commission may intervene to prevent unwarranted dissipation of carrier revenues regardless of where the responsibility lies. Combination rules here produce a result unlawful per se and are of no effect. Standard Oil Co. v. A., T. & S. F., 113 I. C. C. 597.

(r) Rule 77 of Tariff Circular 18-A was promulgated in order to obviate necessity of publishing commodity rates from and to intermediate points where shipments may never be made, and has no application where specific commodity rates apply from or to intermediate

points. See also 37 I. C. C. 372; 66 I. C. C. 611. Booth & Flinn v. P. R. R., 113 I. C. C. 613, 614.

(s) Complainant attacked combination rate of 48c charged on one carload of yellow pine lumber shipped on July 1, 1924, from Ragland, Miss., to Pittsburgh, Pa., as illegal, unreasonable, unjustly discriminatory and unduly prejudicial to extent it exceeded a rate of 44.5c. Shipment moved, as routed by complainants, over A. & V. to Meridian, A. G. S. to Birmingham L. & N. to Cincinnati and Pennsylvania beyond. Rate charged 29.5c to Cincinnati and 18.5c beyond. It is complainant's contention that these factors should be reduced in accordance with the combination rule to which appropriate reference was made in the tariffs carrying those factors, or 44.5c. HELD: Rate charged inapplicable and applicable rate was 44.5c, reparation awarded. Usher Bros. v. A. & V. Ry., 115 I. C. C. 89.

(t) When only one of the tariffs used in making combination rates on through shipments contains a rule that such rate will be subject to but a single increase, there is a holding out to the shipper of the rate so constructed which the carrier publishing the rule must protect. A provision in a tariff carrying rates which may be used in combination to the effect that the rates are subject to the combination rule in Jones I. C. U. S. 1 is equivalent to the publication of said rule in the rate tariff. Traffic Bureau of Knoxville v. Southern Ry., 115 I. C. C. 187, 188.

(u) Complainant attacked combination rate charged on 15 cars of sand shipped between Jan. 9 and 19, 1924 from Estill Springs to Rockwood, Tenn., as unreasonable and illegal. Shipments moved interstate over N. C. & St. L. to Chattanooga, Tenn., thence C. N. O. & T. P. 145 miles, charged $1.90, composed of 95c to Chattanooga and 95c beyond. The factor to Chattanooga was subject to the combination rule. HELD, rate of $1.60 applicable, reparation awarded. West Construction Co. v. N. C. & St. L. Ry., 115 I. C. C. 355.

(v) When one of the tariffs used in making combination rates on through shipments contains a rule that such rates will be subject to a single increase, there is a holding out to the shipper of a rate so constructed which the carrier publishing the rule must protect. West Construction Co. v. N. C. & St. L. Ry., 115 I. C. C. 355.

(w) Complainant attacked combination rate charged on gravel in carloads from Glencoe, Yeatman, and Jedburgh, Mo., to Greenville, Ill., during Oct., 1924, as unreasonable and unlawful. Shipments moved M. P., Terminal St. Louis, East St. Louis Connecting, and Pennsylvania, charged $1.44, composed of 50c to St. Louis and $1.24 beyond, subject to the combination rule. When the shipments moved there was in effect over the same route a combination rate of $1.24, 50c to St. Louis, 50c St. Louis to East St. Louis and 84c beyond, subjection to the combination rule. HELD, $1.24 applicable rate, reparation awarded. Van Fusen & Baumberger v. M. P. R. R., 115 I. C. C. 603.

(x) The publication of the socalled combination rule in one of the tariffs is a holding out of the manner of making combination rates on through shipments which the carrier publishing the rule must protect. Lehigh Portland Cement Co. v. B. S. & K. R. Ry., 118 I. C. C. 507, 508.

(y) Combination rates charged on common brick moving from Nashville, Tenn., to Morehead, Ky., found inapplicable. When shipments moved a specific commodity rate applied from Nashville to Maysville, Ky., and under an intermediate clause this rate applied from Nashville to Morehead. Shipments were therefore overcharged. Bush & Co. v. L. & N., 115 I. C. C. 45, 46.

(z) Combination rate on iron roofing from Delphos, Ohio, to Springfield, Tenn., found inapplicable. Tariff naming a lower rate to Bowling Green and Nashville, unrestricted as to routing, carried the so-called intermediate clause which provided for its application at intermediate destinations. While Springfield is not between Bowling Green and Nashville via direct route it is directly between them on a route over which lower rate applies. Reparation awarded. Cincinnati Sheet Metal & Roofing Co. v. P. R. R., 115 I. C. C. 133.

(aa) Rates on spelter by-products from Pittsburgh, Pa., to Trenton, N. J., found unreasonable to extent they exceeded lower rate contemporaneously in effect to farther distant points to which Trenton is intermediate, rates to farther distant points being published subject to

rule 77 of Tariff Circular 18-A. Reparation awarded. Lissberger & Co. v. P. R. R., 115 I. C. C. 521.

(bb) The publication of a rate under authority of rule 77 of Tariff Circular 18-A is a substantial compliance with requirements of section 4 of the act, and is equivalent to an admission by carriers that a higher rate from intermediate than from farther distant points in unreasonable. See 66 I. C. C. 611. Lissberger & Co. v. P. R. R., 115 I. C. C. 521, 525.

(cc) Shipments of refuse sand from Detroit, Mich., to Indianapolis, Ind., moved as routed by shipper. Applicable tariffs carried so-called intermediate clause, such clause via one of the routes being unrestricted in its application, whereas via the other route the clause contained phrase "on the same line." HELD, that on shipments moving via the unrestricted route the clause was applicable and lower rates provided thereunder applied. As to shipments moving over the other route the words "on the same line" in intermediate rule required that intermediate point be on line of same carrier as the more distant point to which a rate is published and since rails of delivering line did not reach the farther distant point the intermediate rule did not apply on shipments moving thereover. American Radiator Co. v. D. & T. S. L. R. R., 115 I. C. C. 529.

(dd) Shipment of lumber from Hogansville, Ga., to Norton, Va., moved under a combination rate, no joint rate being in effect. Upon contention that a lower combination through Appalachia, Va., to Norton, thence back to Appalachia and again back to Norton, was applicable under provisions of rule 5(b) of Tariff Circular 18-A. HELD, one factor of lower combination contended for was a proportional rate applicable to Norton for beyond, the word "beyond" implying movement beyond Norton. Here the shipment was consigned to and actually delivered at Norton, Appalachia being intermediate thereto, and, from a transportation standpoint, not beyond. Rule 5(b) has no application to situations of this kind. Pine & Cypress Mfg. Co. v. L. & N., 115 I. C. C. 557.

(ee) Cotton from Gieger, Ala., to Rossville, Ga., moved under combination rates, no joint rates being in effect. Tariff governing one factor made reference to the so-called combination rule which provided a specific method for constructing through rates made on combinations, tariff governing other component neither carrying the rule nor making any reference thereto. HELD, that the holding-out principle as laid down in the Sligo case, 62 I. C. C. 643; 73 I. C. C. 551 is controlling, and carrier whose tariff referred to the rule must protect the aggregate rate constructed in conformity therewith. Shipments found overcharged and reparation awarded. Peerless Woolen Mills v. A., T. & N. R. R. Corp., 115 I. C. C. 577.

(ff) On gravel moving from Glencoe, Yeatman, and Jedburg, Mo., to Greenville, Ill., no joint rates were in effect, charges being collected on basis of a two-factor combination treated by combination rule, which provided a specific method for construction of through rates. Contemporaneously a lower three-factor combination applied when treated by the rule, one factor of which carried the rule unrestricted, one restricted its application to cases where all factors referred to the rule and authorized an affirmative application thereof, third factor neither referring to nor containing the rule. HELD, the holding-out principle laid down in the Sligo case, 62 I. C. C. 643; 73 I. C. C. 551, governs, and lower combination treated by the rule was applicable. Shipments found overcharged and reparation awarded. Van Dusen & Baumberger Co. v. M. P., 115 I. C. C. 603.

(gg) Shipments moved under combination rates. Tariffs governing one factor made reference to combination rule which provided a specific method for constructing through rates made on combination. Tariff governing other factor also made reference to combination rule except during a certain period when a note was published therein to effect that combination rates would be constructed without its application. Upon assumption that this restriction had effect of nullifying the rule. HELD, following 81 I. C. C. 193, the restriction was tantamount to the rule's absence and holding-out principle laid down in the Sligo case, 62 I. C. C. 643; 73 I. C. C. 551, was controlling. Shipments assessed full combinations were overcharged. Refund directed. Knight & Kennett v. L. & N., 115 I. C. C. 732.

(hh) Third-class rates on drugs and medicines from Elkhart, Ind., to New York and Philadelphia, found legally

assessed. Although lower commodity rate was contemporaneously in effect from Kalamazoo, Mich., a farther distant point to which Elkhart is directly intermediate, and governing tariff carried the intermediate rule which provided for its application at stations from which a specific rate was not named, tariff published class rates from Elkhart and that point was therefore not entitled to the lower commodity rate. Moreover, Elkhart and Kalamazoo were both granted fourth-section relief which was also mentioned in the tariff. Miles Medical Co. v. B. & O., 118 I. C. C. 33.

(ii) Tariff carried intermediate clause providing for application of rates from intermediate stations. Upon contention of carrier that over customary, natural. and logical route a certain point was not intermediate to stations from which rates were published and was therefore not entitled to published rates. HELD, where tariffs are silent as to routing, the rates apply over all reasonably available routes of participating carriers, and on a haul approximating 900 miles it can not be said that an additional haul of 29 miles would constitute a route not reasonably available. Miles Medical Co. v. B. & O., 118 I. C. C. 33, 35.

(jj) Shipments from Los Angeles, Calif., destined to Salt Lake City and Ogden, Utah, originating on tracks of Santa Fe and Pacific Electric at Los Angeles, were switched to connecting line and switching charges assessed. Contemporaneously switching charges were absorbed on shipments originating at points beyond Los Angeles taking Los Angeles rate. Upon contention that shipments here involved were subject to lower rates under an intermediate clause which provided that rate from unnamed origin points would be the rate from the station beyond from which a rate was named. HELD, Los Angeles was named in the tariff and as under provision of intermediate clause rates apply only when intermediate points are not named, the charges assessed were applicable. See also 109 I. C. C. 763. Frank Produce Co. v. Director General, 118 I. C. C. 88.

(kk) On reconsideration, Ohio River combination rates on pianos from Hammond, Ind., and Steger and Oregon, Ill., to Birmingham, Ala., found not unreasonable or otherwise unlawful. Complainant contended for lower joint rate published in another tariff to Birmingham subject to an intermediate rule. Carriers, however, showed that such rule was intended to apply only to unindexed intermediate points in Mississippi Valley territory in which Birmingham is not located; also that Ohio River basis to Birmingham has been long maintained, and that lower rates are maintained to Mobile under appropriate fourth-section relief. Interpretation contended for is strained and unnatural, raises no reasonable doubt in its favor, and would break down long-standing adjustment by extending the Hammond-Mobile rate under Mississippi Valley bases to points east thereof as far south as the south Atlantic ports. Moreover, record is convincing that complainant was not misled to his damage by the intermediate rule. Original report, 101 I. C. C. 74, affirmed. Forbes & Sons Piano Co. v. A. G. S., 118 I. C. C. 185.

(ll) Shipment moved under combination rate. Tariff governing one factor made reference to combination rule, which provides a specific method for constructing through rates made on combination. Tariff governing other factor made no such reference nor contained a similar rule. Carrier contended that under such circumstances the rule was not applicable. HELD, this contention has been advanced in numerous cases wherein commission has applied holding-out principle laid down in the Sligo case, 62 I. C. C. 643; 73 I. C. C. 551. Reparation awarded. Standard Lbr. Co. v. A. C. L., 118 I. C. C. 703, 704.

(mm) Where one of the tariffs used in constructing combination rates on through shipments contains a rule that such rates will be subject to a single increase there is a holding out to the shipper of rates so constructed which the carrier publishing the rule must protect. Dann Gerow Co. v. A. C. L. R. R., 120 I. C. C. 123, 124.

(nn) Shipment moved under combination rates. Tariff governing one factor made reference to combination rule which provides a specific method for constructing through rates made on combination. Tariff governing other factor made no similar reference nor contained a similar rule. Upon contention that application of the rule would be contrary to provisions of Tariff Circular 18-A, and also in violation of section 6 of the act, HELD: Contentions have been rejected in other cases and in 81 I. C. C. 193,

it was held that restriction of the rule in connection with a particular factor was tantamount to absence of the rule. Therefore, in accordance with principle announced in 62 I. C. C. 643; 73 I. C. C. 551; applicable rate was that constructed in accordance with the rule. Reparation awarded. Dann-Gerow Co., Inc., v. A. C. L., 120 I. C. C. 123.

(oo) Shipment moved under combination rate. Tariff governing one factor made reference to combination rule which provides a specific method for constructing through rates made on combination. Tariff governing second factor made no such reference nor contained a similar rule, and tariff of third factor excepted proportional rates from application of rule. Upon contention that item authorizing use of tariff containing the rule should be construed as permitting use of that tariff only to extent authorized by it, HELD: Similar contention considered in 81 I. C. C. 193, 195, not sustained. In 62 I. C. C. 643; 73 I. C. C. 551; it was found that where one of the tariffs used in making combination rates on through shipments contained the rule, there was an undertaking by publishing carrier to protect resulting aggregate rate. Therefore, rate constructed in accordance with the rule was applicable. Reparation awarded. Dann-Gerow Co. v. A. C. L., 120 I. C. C. 163.

(pp) Combination rates on sawed stone and marble from Carthage and Phenix, Mo., to Indianapolis, Brightwood, and St. Mary of the Woods, Ind., found inapplicable. Governing tariff carrying an intermediate clause published lower rates to destinations taking Group 3 (Chicago) rates. While destinations named herein are not mentioned in tariff, they are directly intermediate to Group 3 points and under the rule are, therefore, entitled to those rates. Shipments found overcharged and reparation awarded. Gates Marble & Tile Co. v. C., P. & St. L., 120 I. C. C. 275.

(qq) Usual method of providing for intermediate application of rates is by a general rule or provision governing the entire tariff or a particular section thereof. Gates Marble & Tile Co. v. C. P. & St. L., 120 I. C. C. 275, 277.

(rr) Tariff item publishing rates from Carthage and Phenix, Mo., to various Illinois and Missouri destinations listed rates to "Chicago, Ill., Milwaukee, Wis., and intermediate points." Upon contention that phrase "and intermediate points" included all points between Carthage and Phenix as origins, and Chicago and Milwaukee as destinations, via all routes, and that rates named thereunder applied on sawed stone and marble moving from Carthage and Phenix, to Indianapolis, Brightwood, and St. Mary of the Woods, Ind., HELD: By a fair and reasonable construction of tariff as a whole, the phrase "and intermediate points" refers only to points between Chicago and Milwaukee. To sustain complainant's contention would necessitate a strained and unnatural construction of tariff and result in various conflicts. Gates Marble & Tile Co. v. C. P. & St. L., 120 I. C. C. 275, 277, 278.

(ss) Reference in a tariff to rule 77 of Tariff Circular 18-A, like all other tariff provisions, is to be constructed in the light of its terms, and does not charge its interpreter with knowledge of operating and other conditions which would eliminate one of two apparently reasonable and available routes. To charge a shipper, or the commission, with such knowledge would nullify the effect of the tariff, as well as commission's enforcement of rule 77. Lawrence Construction Co. v. L. & N., 120 I. C. C. 316, 317.

(tt) Rate on hide trimmings and fleshings from Wilmington, Del. to Ontario Street station, Philadelphia, Pa., found unreasonable to extent it exceeded a lower rate subject to rule 77 of Tariff Circular 18-A contemporaneously in effect to Camden, N. J., a farther distant point, which lower rate was established to Wilmington subsequent to movement. Reparation awarded. Tunnell & Co. v. P. R. R., 120 I. C. C. 425.

(uu) Complainant attacked rates charged on 10 cars of lumber shipped from Sulligent, Ala., to destinations in Kentucky between July 6, 1922 and Feb. 6, 1923 as unlawful in violation of section 6. Shipments, five to Wallins, one each to Evarts, Baxter, Harlan, Poor Fork and Livingston. Livingston is the main line of the L. N. between Junction City and Knoxville. The other points are on a branch line of the L. N. which connects with the main line at Corbin, Ky. Corbin is south of Livingston and is also located between Junction and Knoxville. Charged 11.5c to Birmingham and 19.5c to Middlesboro, plus factors beyond of 8.5c to Wallins, 10.5c to Evarts, Baxter and Harlan and 11.5c to

Poor Fork. To Livingston charged 26c to Richmond, Ky., and 8.5c beyond, subject to the combination rule. There was a rate of 24.5c from Sulligent to Junction City restricted so as to apply only via Birmingham and L. & N. or Memphis and L. & N. also a rate of 25c to Knoxville which was restricted to apply via Birmingham and A. G. S. It clearly appears that the intermediate rule has no application to the shipments under consideration and that they were not entitled to the rate sought. HELD, overcharged to Poor Fork, rates charged applicable to other points, overcharge to be refunded, complaint dismissed. Kentucky Lumber Co. v. L. & N. R. R., 122 I. C. C. 119.

(vv) Complainant alleged overcharge on a car of cedar posts shipped April 4, 1924 from spur 28, Minn., to Gaston, Ind., as inapplicable and unreasonable. Shipment moved M. R. L. & M. to Bemidji, Minn., G. N., C. G. W., C. & O. to destination, charged 45.5c combination composed of 9c to Bemidji and 36.5c beyond. The rate from Bemidji was subject to the combination rule but the rate to Bemidji was not. The use of the combination rule results in a rate of 43.5c. HELD, applicable rate was 43.5c, reparation awarded. Pendelton & Gilkey v. C. & O. Ry., 122 I. C. C. 287.

(ww) Complainant alleged combination rates charged on plaster, carloads between June 15, 1922 and June 11, 1924 from Southard and Eldorado, Okla., to points east of the Mississippi river and south of the Ohio river were unreasonable, unjustly discriminatory and unduly prejudicial. Shipments moved to Memphis, Tenn., via Frisco, thence that line and connections beyond. From Southard and Eldorado rates were 20.5c and 17.5c to Memphis, respectively. These rates were subject to the combination rule. Between June 15, 1922 and June 11, 1924 the tariff provided they were not subject to the combination rule. The record shows that in each instance where rates were made by combination on Memphis at least one of the rate factors applying beyond Memphis were subject to the combination rule. Charged full combination without use of combination rule. Applicable rates not unreasonable, but inapplicable. HELD, rates charged inapplicable to extent they exceeded the Memphis combination using the combination rule, reparation awarded. United States Gypsum Co. v. St. L. S. F. Ry., 123 I. C. C. 200.

(xx) The publication of the socalled combination rule in the tariff of one of the carriers participating in the movement is a holding out of one of the carriers participating in the movement of a manner of making combination rates on through shipments on which shippers are entitled to rely. United States Gypsum Co. v. St. L. S. F. Ry., 123 I. C. C. 200, 201.

(yy) Complainant attacked combination rates charged on two carloads of brick shipped from Perla, Ark., to Newman, Ga., and Quitman, Miss., on Oct. 9, 1923 and Sept. 4, 1924 as unreasonable and inapplicable. Shipment to Quitman moved M. P. to Memphis, Tenn., thence M. & O., charged 11c to Memphis and 14.5c beyond. To Newman shipment moved M. P. to Memphis, N. C. & St. L. to Chattanooga thence C. of Ga., charged 11c to Memphis and 16c beyond. Factors east of Memphis made reference to the combination rule. By use of combination rule rates to Newman and Quitman would be 24.5c and 23c. HELD, applicable rates were 23c to Quitman and 24.5c to Newman, reparation awarded. Acme Brick Co. v. C. of Ga. Ry., 123 I. C. C. 660.

(zz) Rate on hay from Illinois points to St. Louis, Mo., found unreasonable to extent it exceeded lower rate contemporaneously in effect from farther distant points, such lower rates being subject to Rule 77 of Tariff Circular 18-A. Fact that shipper failed to request publication of lower rate at the intermediate point did not deprive him of benefit thereof, the commission having in such cases uniformly found that charging of a higher rate was unreasonable. See 69 I. C. C. 403, and other cited cases. Reparation awarded. Toberman Mackey Co. v. C., B. & Q., 122 I. C. C. 299.

(3a) Fifth-class rate on quebracho tanning extract, from New York Harbor points to Ludlow, Pa., found inapplicable. Contemporaneously a lower commodity rate applied to a farther-distant point and as tariff carried the intermediate rule which provided for an application of rates to intermediate points not specifically named in the tariff, such lower rate was also applicable to Ludlow. Reparation awarded. Curtis Leather Co. v. P. R. R., 123 I. C. C. 1.

(3b) Publication of rule 77 of Tariff Circular 18-A, is a substantial compliance with provisions of section 4 of the

act. Grain and Products from North Dakota, 123 I. C. C. 49, 54.

(3c) On potatoes moving from Pablo and Whitehall, Mont., to New Orleans, La., without routing instructions, carriers assessed a combination based on St. Paul, Minn. Contemporaneously a lower combination to and from Omaha, Nebr., was in effect. HELD: As it was not necessary, under rule 5(b) of Tariff Circular 18-A, that shipments actually move through Omaha to make combination over that point applicable, they were accordingly overcharged. Reparation awarded. Kohlman Bros. & Sugarman v. L. & N., 123 I. C. C. 56.

(3d) Applicable rate on potatoes from Pablo and Whitehall, Mont., to New Orleans, La., found not unreasonable as compared with lower rate contemporaneously in effect to Houston, Tex, a farther distant point. While subsequent to movement tariff naming lower rate was made subject to rule 77 of Tariff Circular 18-A, and such lower rate was made applicable from and to points here involved, neither the subsequent reduction nor the fourth-section violation, in and of themselves, establish unreasonableness of the rate to New Orleans. Moreover, carriers showed that higher rates contemporaneously applied on this traffic between various points in same general territory for comparable distances. Kohlman Bros. & Sugarman v. L. & N., 123 I. C. C. 56.

(3e) Rates on brick, and articles taking same rates, from designated points in Ohio and West Virginia to Verona, Brackenridge, and Tarentum, Pa., found applicable. While lower rates contemporaneously applied from same points of origin to Glassmere and Butler Junction, Pa., to which Tarentum and Brackenridge are intermediate, and governing tariff carried an intermediate clause which specifically provided that it had application only to points to which specific rates were not named, here the tariff named specific rates to Tarentum and Brackenridge. Globe Brick Co. v. P. R. R., 123 I. C. C. 498.

(3f) Complaint alleged that combination rates on powdered milk, moving interstate from Andes and Shavertown, N. Y., to Pier 23, North River, New York, were unduly prejudicial and in violation of long-and-short-haul provision of section 4 of the act. Contemporaneously carrier's tariff, subject to rule 77 of Tariff Circular 18—A, published commodity rates from Delhi, N. Y., lower than factor of rates assailed from East Branch, a point directly intermediate to Delhi. HELD: While publication of a lower rate from a farther distant point under authority of rule 77, is equivalent to an admission that higher rate from intermediate point is unreasonable, here complainant did not allege unreasonableness and has failed to show damage resulting from undue prejudice or violation of section 4. Moreover, commodity rates equal to those in effect from Delhi have since been established from East Branch. Innis, Speiden & Co., v. N. Y., O. & W., 123 I. C. C. 577.

(3g) Publication of a rule in conformity with rule 77 of Tariff Circular 18—A is a substantial compliance with requirements of fourth section of the act, and publication of a lower rate from a farther distant point under authority of that rule is equivalent to an admission that publication of a higher rate from an intermediate point is unreasonable. Innis, Speiden & Co. v. N. Y., O. & W., 123 I. C. C. 577, 578.

(3h) Sixth-class rate on lumber from Burks Falls, Ontario, Canada, to Pontiac, Mich., found inapplicable. Contemporaneously tariff carrying an intermediate rule published a lower joint commodity rate from Burks Falls to Owosso, Mich. As Pontiac is intermediate to Owosso over route of movement and as rate was unrestricted in its application, it was therefore applicable to Pontiac and shipments were overcharged. Refund of overcharges directed. Strable Lbr. & Salt Co. v. C. N. Ry., 123 I. C. C. 585.

(3i) Rates on gasoline, kerosene, naphtha, lubricating oil, and fuel oil, in tankcar loads, from points in Oklahoma to Lawrenceville, Paris, and Farrington, Ill., found inapplicable to certain destinations in Ohio and Indiana on the B. & O., C., C., C. & St. L., and Pennsylvania. Tariff publishing rates attacked contained an intermediate rule, exception thereto providing that rates named therein were not applicable over any routes east of the Illinois-Indiana State line except on the N. Y. C. R. R., via junctions Danville, Ill., north thereof, or west of Schneider, Ind. However, shipments under consideration did not move via that line. Pure Oil Co. v. A., T. & S. F., 123 I. C. C. 624.

(3j) Complainant attacked combina-

tion commodity rates charged on lime, carloads, from Martinsburg, W. Va., to destinations on the W. B. & A. as inapplicable and unreasonable, and rates on lime, carloads, from Martinsburg to destinations on the H. &. F. in excess of applicable rates during the period from Jan. 1, 1922 to Nov. 24, 1925 and two years prior to the filing of the complaint, Dec. 22, 1925, unreasonable. Shipments moved over B. & O. to Frederick, Md., thence over H. & F. One of the factors was subject to the combination rule. HELD, rates attacked inapplicable to extent they exceeded the combination by use of the combination rule, reparation awarded. North American Cement Corp. v. B. & O. R. R., 126 I. C. C. 36.

(3k) Complainant attacked combination rates charged on four cars of smithing coal, shipped in April, June and October, 1920 from Douglas, W. Va., and Logan, Pa., to Chicago, Ill., and St. Louis, Mo., and reconsigned to Cardin, Okla., as inapplicable. Shipments moved to St. Louis over W. M. and B. & O. or W. M., B. & O. and C. & E. I., beyond St. Louis movement was over the Frisco and Northeast Oklahoma. No joint rates were applicable combination of $7.95 and $7.90 were collected on April 22 and June 12, 1920 shipments from Douglas. Charged from Logan $10.825 and $10.83. When the shipments moved the factors from Chicago and St. Louis to Miami were published subject to the combination rule, but the tariffs to St. Louis and Chicago did not. HELD, applicable rates were $7.20 from Douglas and $8.60 from Logan, shipments overcharged, complaint dismissed. Tuffli Bros. v. W. M. Ry., 126 I. C. C. 737.

(3l) Shipments moved under combination rates. Tariffs of trunk lines referred to the combination rule which provides a specific method for constructing through rates made on combination. No such reference was made by tariffs of delivering carriers nor did they contain a similar rule. Upon contention that combination rule may be applied only when each tariff naming a factor of through rate makes specific reference thereto and that the rule may not be applied where one of carriers is an electric line. HELD, contentions are not sound. Provision in a tariff to effect that rates are subject to the combination rule is equivalent to its publication in rate tariff. It is an undertaking by carrier publishing the rule to protect resulting through rate. See 62 I. C. C. 643 and other cited cases. Rates made in accordance with the rule were therefore applicable. Reparation awarded. Washington Building Lime Co. v. B. & O., 128 I. C. C. 9, 10, 11.

(3m) Combination rates on lime, ground limestone, and crushed stone from Woodville, Ohio, to stations in Maryland on the Washington, Baltimore & Annapolis Electric R. R. and the Hagerstown & Frederick Ry., under tariff providing that combination rule would apply only where all issues publishing the factors made reference to the combination-rule tariff, found unreasonable as compared with rates found reasonable in 112 I. C. C. 7, and in 104 I. C. C. 293, from Gibsonburg, Ohio, near Woodville, to Rivermont, Va., for comparable distances, and to extent they exceeded rates constructed in accordance with combination basis previously in effect. Reparation awarded. Washington Building Lime Co. v. B. & O. 128 I. C. C. 9, 16, 18.

(3n) Shipments moved under combination rates. Tariff governing one factor made reference to the combination rule which provided a specific method for constructing through rates made on combination. Tariff of other factor made no such reference nor carried a similar rule. Upon contention that tariff of first factor was so restricted as not to apply in connection with traffic moving in connection with second factor, and that to hold combination rule applicable would be to require carriers to participate in transportation in contravention of section 6 (7) of the act. HELD, same contentions were advanced in 62 I. C. C. 643; 73 I. C. C. 551; and 93 I. C. C. 186, in which the commission found that the combination rule applied and that the proportion of rate accruing to line publishing the tariff not subject to the combination rule was its full local. Reparation awarded. Potosi Tie & Lbr. Co. v. S. & E. R. R., 128 I. C. C. 41.

(3o) Shipments moved under combination rate. Tariff governing one factor made reference to combination rule, which provides a specific method for constructing through rates made on combination. Tariff governing other factor made no similiar reference nor contained a similar rule. Upon attempt of carriers to distinguish present case from Sligo Iron Store, 62 I. C. C. 643 and 73 I. C. C. 551. HELD, That similar contentions were considered in 93 I. C. C. 279, in which it was found that rate constructed in ac-

cordance with combination rule was applicable. Hines Yellow Pine Co. v. M. S., 128 I. C. C. 511.

(3p) Fifth-class rate was charged on angles, channels, and beams, moving interstate from Indiana Harbor, Ind., to Indianapolis, Ind. A lower commodity rate contemporaneously applied to Raven, Ill., a point beyond Indianapolis which rate complainant contended was applicable to Indianapolis by virtue of an intermediate clause in tariff. An examination of tariff, however, discloses that lower rate was contingent upon routing provided therein and as no routing was provided from Indiana Harbor in connection with one of carriers over which shipment was routed, and tariff specifically provided that rates named therein would apply only when routing instructions were provided in tariff, the rate charged was applicable. Inland Steel Co. v. C. & O., 128 I. C. C. 551.

(3q) Rates on ground poultry manure from Kenton, Ohio, to Meridian and Hattiesburg, Miss., found unreasonable as compared with lower rates contemporaneously in effect over route of movement to Mobile, Ala., via Meridian, and to New Orleans, via Hattiesburg. While carriers had no record that complainant requested, prior to movement, establishment of rates to Meridian and Hattiesburg not in excess of rates to the more distant points, in compliance with rule 77 of Tariff Circular 18-A, failure on part of a shipper to request prior to shipment a rate to which he is entitled under the rule, through ignorance of the rule or otherwise, is not a reason for saying that he is not entitled to reparation. See 81 I. C. C. 659. Reparation awarded. Fosse & Co. v. E. R. R., 128 I. C. C. 553.

(3r) Combination rates on hogs from points on A., T. & S. F. Ry. in New Mexico and Texas to Los Angeles, based on Mojave, Calif., found not unreasonable. Complainant contended that lower rate from Mojave should be extended to apply from Barstow, Calif., because distance from latter to Los Angeles is less. However, while none of shipments actually moved to Mojave and back through Barstow but moved directly through Barstow, the Mojave combination was applicable under rule 5 (b) of Tariff Circular 18-A, and over the Southern Pacific, the rate-making line, distance between Mojave and Los Angeles is much less than over the Santa Fe. Moreover, authority to depart from long-and-short-haul clause of California constitution and public-utilities act has been granted the Santa Fe and departure from section 4 of the act is protected by application. Calif. Dressed Beef Co. v. A., T. & S. F., 128 I. C. C. 607, 610, 611.

(3s) Rates on copper wire from Phillipsdale, R. I., to Wallingford, Conn., found unreasonable to extent they exceeded rates to Harlem River, N. Y., published in conformity with rule 77 of Tariff Circular 18-A, governing publication of rates to intermediate points and unrestricted as to routing. Wallingford directly intermediate point over Berlin is a route, but carrier contended that, the Berlin route being impracticable, Wallingford was not an intermediate point, and rule 77 was therefore not applicable. Routing being unrestricted, contention not sustained. Reasonable rates prescribed for future and reparation awarded. New York Insulated Wire Co. v. N. Y.,N. H. & H., 128 I. C. C. 698.

(3t) Reference in a tariff to rule 77 of Tariff Circular 18-A is to be construed in the light of its terms,and does not charge its interpreter with knowledge of operating or other conditions which would eliminate any apparently reasonable and available route. See 81 I. C. C. 662 and 120 I. C. C. 316. New York Insulated Wire Co., v. N. Y., N. H. & H., 128 I. C. C. 698, 699.

(3u) Notation on a tariff provision in accordance with rule 77 is a substantial compliance with requirements of the fourth section. New York Insulated Wire Co., v. N. Y., N. H. & H., 128 I. C. C. 698, 699.

(3v) Shipments moved under combination rates. Tariff governing two factors made reference to combination rule, which provided a specific method for constructing through rates made on combination. Tariff governing other factor made no similar reference nor contained a similar rule. FOUND, there was a holding out to shipper of rate constructed in accordance with the rule which publishing carrier must protect, and applicable rate was the through rate constructed by use of the rule. Refund of overcharges directed. See 62 I. C. C. 642; 73 I. C. C. 551; 74 I. C. C. 188. Culler Lbr. Co. v. C., B. & Q., 128 I. C. C. 723.

(3w) General commodity tariff found applicable on shipments of horses and mules from Sikeston and Oran, Mo., to Memphis, Tenn., moving prior to date of its cancellation, although tariff, by excep-

tion, referred specifically to other tariffs for rates from points on carrier's lines in Missouri to Memphis. Contention of carrier that exception prohibited application of general tariff not sustained in view of fact that tariffs referred to failed to provide rates on livestock from and to points in question. Under rule 4 (c) of Tariff Circular 18-A it is permissible for a general commodity tariff to refer to other tariffs in which certain named class or commodity rates may be found, but where, as here, the tariff referred to fails to publish any rate on commodity in question, rate in general commodity tariff remains applicable. Maxwell Sons Commission Co. v. St. L.-S. F., 128 I. C. C. 725.

(3x) Rate on brass and copper ingots from East Liberty, Pa., a point within Pittsburgh switching limits, to Detroit, Mich., found unreasonable to extent it exceeded lower rate contemporaneously in effect from Baltimore applicable through East Liberty, and published in accordance with rule 77 of Tariff Circular 18-A. Although that rule, as amended April 7, 1924, provides that it is not authority for reducing commodity rates from or to intermediate points on less than statutory notice, and was therefore not applicable in instant case, the rate from East Liberty being a commodity rate, there were departures from the fourth section, and establishment of lower rate from Baltimore subject to the rule is tantamount to an admission by carriers that higher rate from East Liberty was unreasonable. See 66 I. C. C. 611. Federated Metals Corp. v. P. R. R., 128 I. C. C. 757.

(3y) Complainant attacked commodity rate of 23.5c the same as the sixth class rate on brass and copper ingots, in carloads, from East Liberty, Pa., to Detroit, Mich., between Jan. 1 and Nov. 21, 1925 as unreasonable and unduly prejudicial. East Liberty takes Pittsburgh rates, served by the Pennsylvania. Contemporaneously there was a commodity rate of 22c, subject to rule 77, applicable over defendants line from Baltimore, Md., through East Liberty to Detroit, 633 miles. Establishment of the 22c rate from Baltimore subject to rule 77 is tantamount to an admission by defendants that the higher rate from East Liberty was unreasonable. HELD, rate attacked prior to July 1, 1926 unreasonable to extent it exceeded the rate from Baltimore, but after that date not unreasonable, reparation awarded. Federated Metals Corp. v. P. R. R., 128 I. C. C. 757.

(3z) Complainant alleged combination rate charged on two cars of lumber shipped April 19, 1923 from Louisville, Ga., to West Liberty, Pa., was inapplicable. Shipments were originally consigned to Cape Charles, Va., with instructions to deliver them to the Pennsylvania, and later were reconsigned to West Liberty. They moved L. & W. and C., of Ga., to Augusta, Ga., Southern to Charlotte, N. C., N. S. to Norfolk, Va., were barged to Cape Charles, thence moved over Pennsylvania to Clairton, Pa., and P. & W. V. beyond. Rate charged 63c composed of 10.5c to Augusta, 41c to Clairton and 11.5c beyond. At time of movement there was in effect from Louisville to West Liberty via Cape Charles and Pennsylvania, applicable over route of movement, a rate of 46c combination using the combination rule. HELD, applicable rate was 46c, reparation awarded. Underwood Lumber Corp. v. C. of Ga., 132 I. C. C. 298.

(4a) Complainant attacked combination rates charged on four cars of lumber from Lumberton, Miss., to Boone, N. C., as unreasonable and inapplicable. Shipments were made Nov. 7, 1924, Feb. 3, March 16 and June 15, 1925 and moved G. & S. I. and Southern to Johnson City, Tenn., and beyond over the E. T. & W. N. C. and L. E. Ry., charged combination rate of 45c, composed of 27c to and 17c beyond Johnson City, plus 1c charge for transfer of carload shipments from standard to narrow gauge line at that point. Tariff naming the rate to Johnson City was subject to the combination rule, but tariff naming the rate beyond did not. HELD, applicable rate was 42c, reparation awarded. Edward Hines Yellow Pine Co. v. M. S. R. R., 128 I. C. C. 511.

(4b) Shipments moved under combination rates. Tariff naming one factor made reference to the combination rule which provides a specific method for constructing through rates made on combination. Tariff naming other factor made no similar reference nor contained a similar rule. Upon contention that carrier publishing latter rate was not shown as a participating carrier and therefore the principle announced in 62 I. C. C. 643, and other cited cases, was not applicable, FOUND

Situation here is identical with that considered in 113 I. C. C. 579, in which rates treated by combination rule were found applicable. Reparation awarded. North America Cement Corp. v. W. M., 129 I. C. C. 90, 91.

(4c) Rates on scrap brass and brass ingots from Pittsburg, Pa., to Jersey City, N. J., and Baltimore, Md., found inapplicable. Lower rates were contemporaneously maintained from Zanesville, Ohio, subject to a clause which authorized their application from Pittsburgh as an intermediate point. Refund of overcharges directed. S. Hausman & Sons Co. v. P. R. R., 129 I. C. C. 233.

(4d) Rates on asphalt from North Baton Rouge, La., to Louisville and Philadelphia, Miss., higher than to more distant point to which they were intermediate, found applicable and not unreasonable. An intermediate clause provided for application of this lower rate to unnamed intermediate points, but Louisville and Philadelphia were both named in tariff and fourth-section departures were protected. Merrill Engineering Co. v. G., M. & N., 129 I. C. C. 249.

(4e) Rate on petroleum fuel oil from Granfield, Okla., originally destined to Granite City, Ill., and diverted to East Chicago, Ind., found inapplicable. A lower combination, applicable under the combination rule was contemporaneously in effect over route of movement. Reparation awarded. Barnsdall Refineries v. C., R. I. & P., 129 I. C. C. 443.

(4f) Respondents attempt to justify restriction of combination rule upon inability of protestant to show movement under rates which would be increased by such restriction. However, to assume that respondents have gone to the trouble and expense of amending the numerous tariffs involved merely to affect a "paper" restriction of a tariff provision in connection with traffic which does not move would be imputing to them a vain and useless act which would merely tend to complicate an already confusing situation by adding an exception to application of the rule. Combination Rule on Lumber, 129 I. C. C. 564, 568.

(4g) Combination rates on wrought-iron pipe from Lorain, Ohio, to various Kansas points were assessed on two different bases, the lower combination being based on Jacksonville, Ill. Tariff publishing higher combination provided, in absence of specific rates, a specific manner of constructing combination by addition of basing rates to factor from Lorain to Mississippi River crossing. Under rule 5 (c) of Tariff Circular 18-A, if specific manner of constructing rates had not been prescribed, the lower combination would have been applicable but, under the circumstances, higher combination was applicable. National Tube Co. v. A., T. & S. F., 129 I. C. C. 693.

§10. Concurrences.

See Concurrences; Through Routes and Joint Rates §20½.

(a) Concurrence sheets are not posted in the same manner as are tariffs, and no opportunity is afforded the general public to ascertain whether or not the terms of the concurrence limit the application of the tariff in so far as the participating road is concerned. National American Wholesale Lumber Asso. v. A. C. L. R. R., 120 I. C. C. 665, 667.

§11. Conflict.

See Bills of Lading §9 (2); Through Routes and Joint Rates §21, §22.

(a) Combination rate assessed on lumber moving from Westwood, Calif., to Pensacola, Fla., found to have been inapplicable, inasmuch as a lower combination should have been applied under rule 5-b of Tariff Circular 18-A based on New Orleans. Carrier contended that since rule 5-b was not made a part of tariff, it did not constitute basis for determining tariff rates. This rule, however, definitely determines applicable rates and its incorporation in tariffs is not necessary. Reparation awarded. Red River Lumber Co. v. Director General, 107 I. C. C. 671.

(b) Where conflicting rates between two points are named in different tariffs, rate first established remains in effect and is lawful rate until formally cancelled. Vincennes Refining Co. v. C. & E. I., 109 I. C. C. 25, 26.

(c) The commission's tariff rules do not authorize or permit publication of conflicting rates. Indian Refining Co. v. L. & N., 112 I. C. C. 732, 736.

(d) Where a tariff specifies more than one rate the lowest is applicable. Eshelman & Sons v. Director General, 118 I. C. C. 441, 444.

(e) Rates lawfully established re main in effect until specifically cancelled. Virginia & Rainy Lake Co. v. D. W. & P. R. R., 120 I. C. C. 131, 132.

(f) Where conflicting rates are named in separate tariffs the rate first established is the legal rate, upon the principle that lawfully established rates remain in effect until specifically canceled. Tomkins Summer Co. v. C. M. & St. P. Ry., 120 I. C. C. 677, 678.

(g) Where conflicting rates are named in separate tariffs, rate first established is legal rate, upon the principle that lawfully established rates remain in effect until specifically canceled. See Conf. Rulings 50, 70, 104; 16 I. C. C. 315 and other cited cases. Tomkins-Summer Co. v. C., M. & St. P., 120 I. C. C. 677, 678, 679.

(h) Rates were named in separate tariffs, but lower rates did not cancel or in any way refer to rates originally published. HELD: Originally published rates were legally applicable. See 57 I. C. C. 547. Reparation awarded. Blytheville Compress & Warehouse Co. v. M. & O., 123 I. C. C. 95, 96.

(i) Fifth-class rate was assessed on iron and steel articles, billed as scrap iron from Little Rock, Ark., to Kansas City, Mo. A lower commodity rate was contemporaneously in effect on scrap iron or steel. Carrier contended that an inspection of the shipments showed that they contained a number of hot-air house-heating furnaces, some in the original crates. Complainant contended that inspection was more perfunctory, that the only crated parts were a few ash pits and bases, that shipment consisted of old furnace and stove castings and a few new parts, so intermingled that the entire lot was of no value except for remelting purposes, and that shipments were bought and resold as scrap iron for remelting purposes, and that they were actually remelted. HELD: That shipments consisted of scrap iron or steel, and that lower commodity rate was applicable. Reparation awarded. Consolidated Metals Corp. v. M. P., 123 I. C. C. 139.

(j) Class rates were assessed on steam road rollers under classification item "Grading and road-making implements: Rollers, Road: Self-propelling or other than self-propelling." Contemporaneously lower class rating applied on "Machinery and machines." Upon carrier's contention that a steam road roller is not a machine; that as classification makes no distinction between self-propelling and nonself-propelling road rollers mere addition of a steam engine to provide tractive power can not transform a road roller into a machine; and that since classification lists road rollers under a specific heading, question of applicability of term "machinery and machines" is removed, HELD: Similar contentions were advanced in 115 I. C. C. 439 in which it was found that "machinery and machines" included steam rollers, and record in instant case does not warrant a different conclusion. Refund of overcharges, directed. Buffalo-Springfield Roller Co. v. D., T. & I., 126 I. C. C. 177.

(k) Tariff published two sets of rates from Peoria, one without restriction and the other a lower rate applicable on traffic "when from beyond." Upon contention that lower rates are not proportional rates because when added to rates inbound to Peoria from shipping points generally "through rates" are not thereby secured, inasmuch as joint rates on lower basis are maintained from such points through Peoria, Held: Contention is without merit. The "when from beyond" rates could be used in constructing combination rates fro mpoints from which no through rates were published. Moreover, in 81 I. C. C. 688, the commission held that the word "beyond" implies a line-haul movement "beyond" the rate-breaking point. Armour & Co. v. Director General, 126 I. C. C. 539, 540, 541.

(l) Tariff governing shipments of hogs from Peoria, Ill., to Chicago and East St. Louis, Ill., carried an unrestricted local rate and a lower rate applicable on traffic "when from beyond." Upon contention that local rates were applicable only to hogs raised in the city of Peoria and were mere paper rates, while lower rates were applicable on all hogs from that point, including those raised immediately outside the city limits and driven across the boundary line. HELD: This interpretation can not be accepted. While lower rates were not termed proportional rates in body of tariff, title-page described tariff as a local and proportional tariff, only limitations upon

use of any rates therein which could establish their proportional application being the words "when from beyond." In 81 I. C. C. 688 it was pointed out that word "beyond" implied a line-haul movement "beyond" the rate-breaking point. Therefore, in instant case, local rates assessed on shipments moving to Peoria other than by rail from beyond were applicable. Armour & Co. v. Director General, 126 I. C. C. 539.

(m) Where there are inconsistent provisions in same tariff, effect will be given to lower rate. Norfolk Southern R. Co. v. Freeman Supply Corporation, (Va., 1926) 133 S. E. 817.

(n) Fifth-class rate was charged on angles, channels, and beams, moving interstate from Indiana Harbor, Ind., to Indianapolis, Ind. A lower commodity rate contemporaneously applied to Raven, Ill., a point beyond Indianapolis, which rate complainant contended was applicable to Indianapolis by virtue of an intermediate clause in tariff. An examination of tariff, however, discloses that lower rate was contigent upon routing provided therein, and as no routing was provided from Indiana Harbor in connection with one of carriers over which shipment was routed, and tariff specifically provided that rates named therein would apply only when routing instructions were provided in tariff, the rate charged was applicable. Inland Steel Co. v. C. & O., 128 I. C. C. 551.

(o) First-class rate on passenger and freight automobiles in straight or mixed carloads moving in 36-foot cars, or longer lengths furnished for carrier's convenience on orders for 36-foot cars, under tariff item providing minimum weight of 10,000 pounds, found applicable. While lower commodity rate was listed in same tariff, shipments involved weighed less than minimum weight provided thereunder and with exception of two shipments on which lower rate applied, actual weights of shipments at first-class rates produced lower charges than minimum weight and rates provided under the commodity rate. Moreover, contention that since tariff is governed by western classification and contains nothing which relieves it from provisions thereof, minimum weight provided thereby should be used rather than minimum weight carried in item itself, is untenable. Rates assessed, except on two cars mentioned, were therefore applicable. Refund of overcharges directed. Chevrolet Motor Co. v. A., T. & S. F., 128 I. C. C. 638.

(p) Second-class l. c. l. rate was assessed on corrugated fiber boxes under tariff item 27, "Paper Articles: Boxes, corrugated or not corrugated, K. D." Contemporaneously tariff item 11 rated "Boxes or Crates: Fiber Packing Boxes, K. D.," as fourth class. Upon contention that item 11 did not apply as commodity shipped was corrugated paper or fiber box and item 27 which specifically covered corrugated paper boxes therefore took precedence, FOUND: As there was no contention that shipments were not fiber packing boxes and since item 27 was broad enough to include all knocked-down paper boxes whether fiber of otherwise and item 11 was broad enough to include all fiber packing boxes whether corrugated or otherwise and described type of box quite as well as item 27, the fourth-class rate thereunder was applicable. Refund of overcharges directed. Eggerss-O'Flyng Co. v. C. & N. W., 128 I. C. C. 644.

(q) L. c. l. rate collected on steam condenser from Philadelphia, Pa., to Santa Fe, N. Mex., found inapplicable. A lower rate was contemporaneously in effect and tariff authority for rate collected was not shown. Refund of overcharges directed. Mirabel Motor Co. v. M. C., 129 I. C. C. 411.

(r) Fifth-class rates applicable on iron or steel bars were assessed on rods known as nut flats. Contemporaneously a lower rate applied on "Rods, Bolt, Nail, Rivet, and Wire (iron or steel), unfinished * * *." Upon carrier's contention that latter applies only on articles that have not progressed beyond the billet stage and that description applies to rods only when found in cross section, FOUND: Similar contentions advanced in 102 I. C. C. 355, were not sustained, and in 104 I. C. C. 616, propostal to restrict above description to bolts, rivets, or wire rods only when round in cross section, was not justified. Rates charged were therefore inapplicable, the lower rate on rods being applicable and not unreasonable. Columbus Bolt Works Co. v. P. R. R., 129 I. C. C. 512.

§11½. Description.

(a) Commodity description "soapstone manufactured and in slabs * *

*" found to have been legally applied to shipments of soapstone furnace linings sawed on six sides to specific sizes. Although manufacturing process in case of furnace linings is not carried to as great an extent as in case of certain other soapstone products, process of sawing blocks on all six sides to specific sizes is clearly a manufacturing process. Moreover, fact that classification carried a more specific description "soapstone or Talc: Linings, Fire Box or Furnace," did not prevent commodity rate from applying. See also 89 I. C. C. 395, 396. Thilmany Pulp & Paper Co. v. N. & A. Ry., 104 I. C. C. 186.

(b) Shipment of hickory pieces or sticks billed as "hickory lumber," which were asserted but not shown to have been golf-stick material, was assessed rate applicable on "vehicle material" by analogy in absence of specific rate on golf-stick material. FOUND: Description "lumber," rather than description "vehicle material," covered shipment, and rate assessed was inapplicable. Shipment overcharged and reparation awarded. Bush Bros. & Co. v. Cumberland Transp. Co., 107 I. C. C. 571.

(c) Tariff item carried a list of perishable commodities in which was included both cantaloupes and melons. Another item showed tables of perishable commodities, one column being headed "Melons, all kinds." By supplement the first item was amended in so far as it applied to cantaloupes by a note making reference to item "Melons, all kinds," the latter being subsequently amended by listing the varieties of melons, cantaloupes being named separately. HELD: There being no evidence that prior to filing of this complaint any question was raised as to application of charges on basis of those provided for "Melons, all kinds," the classification of cantaloupes as melons was not in error and refrigeration charges assessed accordingly on shipments moving from Heber, Calif., to interstate destinations and to Canadian points were not unlawful. Brown v. C., R. I. & P., 112 I. C. C. 545.

(d) In 101 I. C. C. 687, division 3 directed the refunding of overcharges on four shipments of bed sacks which moved in May, 1922, from Atlanta, Ga., to New York, N. Y., found that the applicable first class rate and rating under the southern classifications were not unreasonable or otherwise unlawful, and dismissed the complaint. The carriers have not attempted to classify separately, and it is difficult to see how they could, the almost innumerable variety of articles commonly known as dry goods. Bed sacks belong to this class. With a few outstanding exceptions, such as blankets and clothing, all these textile articles are covered in the classification by the generic term "dry goods, n. o. i. b. n." at a rating of first class. Bed sacks, unlike bags, are not a commonly known or used textile article. Separate classification descriptions and ratings for all or any considerable number of textile articles would complicate the billing and packing of dry goods for shipment, and would create many policing difficulties. The existing grouping has been in effect without substantial modification for many years and during that time has occasioned practically no complaints before the Commission. HELD: former findings affirmed. Triad Corp. v. C. of Ga. Ry., 113 I. C. C. 663.

(e) Proposed commodity descriptions and specifications for petroleum products applicable from points in California to destinations in Western and Southwestern States, dependent largely upon gravities and flash points, found not justified. Uniform results can not be obtained in flash-point tests, even where prescribed apparatus is used, unless a standard procedure is followed, and the mere prescription of a particular type of tester is not sufficient. Nor do the proposed gravity specifications indicate that they are to be determined at any particular temperature, and inasmuch as petroleum oils have different gravities at different temperatures, any tariff specifications as to gravity should make it clear that gravity is to be determined at a certain temperature. Commodity Specifications on Petroleum Products, 113 I. C. C. 707.

(f) Rates on brick assessed in accordance with rates included in uniform brick list, found applicable. Complainants sought lower rates, contending that its brick fell within tariff description of common brick. Brick in question, however, differs from common brick in that it is very hard and tough, may be exposed without noticeable deterioration, and may be and is used as face brick, whereas common brick is soft, can be readily broken and is used primarily for back-up purposes, foundations, and cross walls. While use to which brick is put

does not alone determine its essential character or charges which may be legally exacted for its transportation, it does tend to show that it has qualities which distinguish it from ordinary common brick. McEwing & Thomas Co. v. C. & E. I., 118 I. C. C. 211.

(g) Tariff description "other malt liquors" found sufficiently broad to comprehend "cereal beverages." Latter are made in same manner as beer, but are then subjected to a process for reducing alcoholic content. Bradley & Woertz v. I. C., 118 I. C. C. 233, 236.

(h) Proposed change in commodity description governing application of rates on stone from Champaign, Ill., to points in Ohio and other States, found justified. While protestant contended that if suspended schedule becomes effective it will render inapplicable a factor of a combination rate on granite, real purpose of change in description is to clarify the item, does not effect a change in rates on granite, and discussion of evidence pertaining to propriety of rates is therefore unnecessary. Stone from Champaign, Ill., 128 I. C. C. 21.

(i) Refrigeration charges assessed on cantaloupes under tariff item "Melons, all kinds," found unlawful. Complainant contended that cantaloupes are not melons but are a kind of vegetable and applicable on "Vegetables (except Melons) n. o. i. b. n." However, tariff provided that "Where term fruit * * * vegetables, or melons is used in tariff, should, therefore, be assessed charges it will include commodities classified under their respective headings," and under heading "Melons," cantaloupes were listed. Latter are generally understood and commercially classified as melons, and dictionaries define watermelons and muskmelons as two separate species of melons, and cantaloupes are defined as a variety of muskmelon. Moreover, in 112 I. C. C. 545, refrigeration charges on melons were found applicable on cantaloupes and instant case does not warrant a different conclusion. Di Giorgio Fruit Co. v. A. E. R. R., 128 I. C. C. 31.

(j) Upon contention that as certain freight tariffs show cantaloupes and melons separately, cantaloupes can not therefore be classed as melons, HELD: Fact that these commodities are sometimes or frequently shown separately does not establish that cantaloupes are not melons. Di Giorgio Fruit Co. v. A. E. R. R., 128 I. C. C. 31, 33.

(k) One and one-half times first-class rate collected on l. c. l. shipment of portable laundry tubs under heading "Sheet Iron or Sheet Steel Ware: Wash Tubs," found inapplicable. Carriers contended that by analogy rule, applicable rating was double first class under item "Wash Sinks, n. o. i. b. n.: Plate or Sheet Iron or Steel: on legs: * * * In Boxes or crates," l. c. l., while complainant sought third-class rating on laundry tubs under head of "Plumbers' Goods" by use of analogy rule. At time of shipment, however, a commodity rate applicable on wash tubs appeared under caption "Sheet Iron or Sheet Steel Ware," l. c. l., and since Century Dictionary and Cyclopedia define a wash tub as "a tub for washing, especially one in which clothes are washed," articles shipped clearly fall within that description and lower commodity rate was therefore applicable. Reparation awarded. West Texas Utilities Co. v. M. C., 128 I. C. C. 57.

(l) The analogy rule has no application where commodity shipped is clearly and definitely covered by a description set forth in an item of the classification and referred to in the tariff item naming a commodity rate. West Texas Utilities Co. v. M. C., 128 I. C. C. 57, 58.

(m) Broom handles were assessed commodity rate applicable on finished handles. Contemporaneously a lower rate applied on "handles, in the rough, sawed or turned to shape, not further finished" which complainant contended was applicable. Carrier, however, urged that after the handles are turned to shape they are not in marketable condition until they are either tumbled or sanded which they contend is a "further finishing" process preventing application of rate sought. HELD: Since evidence adduced does not clearly show condition of handles when shipped it is insufficient to warrant a finding that rate charged was inapplicable. Nt'l. Broom Co. v. A., T. & S. F., 128 I. C. C. 98, 99.

(n) The Commission has consistently found that commodity rates must be applied strictly, from which it follows that only the article or articles clearly comprehended within the descriptive terms of the commodity rate can be considered as having been removed from the classification. Paraffine Companies v. S. P. Co., 128 I. C. C. 421, 423.

(o) Shipments billed as cottonseed-hull shavings were inspected in transit and description changed to "cotton linters," rates being assessed accordingly. Complainant, in support of its contention that commodity shipped was entitled to lower rate on shavings introduced samples purporting to be taken from cars at time of inspection. While in 122 I. C. C. 520, it was stated that commission has no special qualifications to determine from samples whether a shipment consisted of linters or shavings, complainant's price quotations together with other evidence sustained its burden of proof. Rates assessed found inapplicable and refund of overcharges directed. Sneir & Co. v. A. & W. P., 128 I. C. C. 559.

(p) Second-class l. c. l. rate was assessed on corrugated fiber boxes under tariff item 27, "Paper Articles: Boxes, corrugated or not corrugated, K. D." Contemporaneously tariff item 11 rated "Boxes or Crates: Fiber Packing Boxes, K. D.," as fourth class. Upon contention that item 11 did not apply as commodity shipped was a corrugated paper or fiber box and item 27 which specifically covered corrugated paper boxes therefore took precedence, FOUND: As there was no contention that shipments were not fiber packing boxes and since item 27 was broad enough to include all knocked-down paper boxes whether fiber or otherwise and item 11 was broad enough to include all fiber packing boxes, whether corrugated or otherwise, and described type of box quite as well as item 27, the fourth-class rate thereunder was applicable. Refund of overcharges directed. Eggerss-O'Flyng Co. v. C. & N. W., 128 I. C. C. 644.

(q) To come within the tariff description of scrap iron, "scrap or pieces of iron or steel having value for remelting purposes only," the material must be reduced to fragments or pieces so as to be useless for any purpose other than remelting. Cohen & Son v. C. R. R. of N. J., 129 I. C. C. 1, 2.

(r) Where an article is clearly embraced within a generic commodity description, and neither the tariff nor governing classification discloses a contrary intention, the Commission has found the commodity rate applicable, even though the classification description was more specific. Sunbury Converting Works v. Pennsylvania R. R., 132 I. C. C. 230, 232.

(s) Turned last blocks found not to be entitled to lumber rates nor to fall within tariff description "Billets, blocks or strips, sawed or split, rough unpainted." Jackson v. M. C., 129 I. C. C. 235, 236.

(t) The incorrect description of a rate as a proportional rate when as a matter of fact it was an arbitrary did not chnge the character of the rate. National Pole Co. v. G. N., 129 I. C. C. 697, 699.

§12. Cross-references.

(a) Complainant attacked second class rates charged on various carloads of furniture shipped from Jasper, Ind., to St. Louis, Mo., from Sept. 11, 1920 to March 3, 1925 as inapplicable. Jasper is on a branch line of the Southern a few miles north of Huntingburg, Ind., a point on its main line 74 miles west of Louisville, Ky. When a tariff refers to another tariff for rules or application, the tariff referred to in effect becomes a part of the tariff making such reference, and any restrictions, which are a part of the tariff referred to, are thereby included in the tariff making the reference, unless the latter tariff clearly and specifically provides otherwise. Jones tariff I. C. C. 1592 provides that Jasper takes Louisville rates only with respect to shipments destined to Cairo, Gale, and Thebes, Ill., and points taking same rates. Its application is not broadened by the reference thereto in the exceptions to the classification. HELD, rates charged applicable, complaint dismissed. Lammert Furniture Co. v. Southern Ry., 126 I. C. C. 197.

§12¼. Exceptions.

(a) Governing classification provided fifth-class rate on red oil. By exceptions thereto "soap stock" was rated sixth-class. HELD: Red oil is a "soap stock" and is so described in a definition from the Condensed Chemical Dictionary. While it may not have been carrier's intention that classification exception should embrace red oil, the familiar rule of construction is that ambiguities in a tariff must be resolved against the maker. Shipments found overcharged and refund directed. Williams Co. v. C. N. E., 112 I. C. C. 158.

(b) Furniture from Jasper, Ind., to St. Louis, Mo., was assessed second-class rate. Exceptions to governing tariff referred to a second tariff naming a lower rate from Louisville, Ky., to

St. Louis. Station index in governing tariff showed Jasper as taking Louisville rates, subject to notation, "Rates named from these stations will apply only to Cairo, Gale, and Thebes, Ill. * * * . " Upon contention that restriction did not affect application of Louisville rates from Jasper because tariff is used merely as a basing book in which list of origin or destination points may be found; HELD: While one tariff which refers to another for rules or application becomes a part thereof, here the governing tariff specifically provided that Jasper takes Louisville rates only with respect to shipments destined to Cairo, Gale, and Thebes, and its application is not broadened by reference to lower rate named in the exceptions. Lammert Furniture Co. v. S. Ry. 126 I. C. C. 197.

§13. Index.

(a) When tariff index shows points as located in a particular State, no county being shown, the rate provided thereto is applicable to any destination of that name in that State upon lines of carriers participating in tariff. Pacific Coast Shippers' Asso. v. A., C. & Y., 112 I. C. C. 527, 532.

(b) On reconsideration, Ohio River combination rates on pianos from Hammond, Ind., and Steger and Oregon, Ill., to Birmingham, Ala., found not unreasonable or otherwise unlawful. Complainant contended for lower joint rate published in another tariff to Birmingham subect to an intermediate rule. Carriers, however, showed that such rule was intended to apply only to indexed intermediate points in Mississippi Valley territory in which Birmingham is not located; also that Ohio River basis to Birmingham has been long maintained, and that lower rates are maintained to Mobile under appropriate fourth-section relief. Interpretation contended for is strained and unnatural, raises no reasonable doubt in its favor, and would break down long-standing adjustment by extending the Hammond-Mobile rate under Mississippi Valley bases to points east thereof as far south as the south Atlantic ports. Moreover record is convincing that complainant was not misled to his damage by the intermediate rule. Original report, 101 I. C. C. 74, affirmed. Forbes & Sons Piano Co. v. A. G. S., 118 I. C. C. 185.

(c) Shipment of piling from Minong, Wis., to Dakota, Minn., a point on the C., M. & St. P. Ry., found overcharged. Contemporaneously tariff published a lower rate from Group 4 to Dakota and listed Minong as a Group 4 point, rate being subject to restriction "will not apply to or from stations in Minnesota in this group located on C., M. & St. P. Ry.," However, as tariff did not list Dakota as a Group 4 point and Minong is in Wisconsin, lower rate was applicable. Refund of overcharges directed. Finch Bros. v. C., St. P. M. & O., 123 I. C. C. 541.

(d) Description of a tariff on its title-page does not modify such application as may be provided therein, but may be considered as an indication of intent of its application. Pure Oil Co. v. A., T. & S. F., 123 I. C. C. 624, 626.

(e) Furniture from Jasper, Ind., to St. Louis, Mo., was assessed second-class rate. Exceptions to governing tariff referred to a second tariff naming a lower rate from Louisville, Ky., to St. Louis. Station index in governing tariff showed Jasper as taking Louisville rates, subject to notation, "Rates named from these stations will apply only to Cairo, Gale, and Thebes, Ill., * * *. " Upon contention that restriction did not affect application of Louisville rates from Jasper because tariff is used merely as a basing book in which list of origin or destination points may be found, HELD: While one tariff which refers to another for rules or application becomes a part thereof, here the governing tariff specifically provided that Jasper takes Louisville rates only with respect to shipments destined to Cairo, Gale, and Thebes, and its application is not broadened by reference to lower rate named in the exceptions. Lammert Furniture Co. v. S. Ry., 126 I. C. C. 197.

§13a. Intermediate Rule.

See Supra §9a.

(a) Shipments moved under combination rates. Tariff governing one factor made reference to combination rule which provided a method for constructing through rates made on combination. Tariff of second factor made no such reference nor carried a similar rule. Upon contention that tariff of first factor was so restricted as not to apply in connection with second factor HELD: Similar contention was considered in 93 I. C. C. 186, in which commission said that such provisions are general in na-

ture and should not be given a narrow construction, which would defeat provisions as to application of tariff provided in body of the issue. Under the Sligo principle laid down in 62 I. C. C. 643; 73 I. C. C. 551, and similar cases, rates were subject to combination rule and applicable rates were those constructed in accordance therewith. Reparation awarded. North American Cement Corp. v. B. & O. 126 I. C. C. 36.

(b) Upon reconsideration finding in original report 118 I. C. C. 33, modified to extent that third-class rates on drugs and medicine from Elkhart, Ind., to New York and Philadelphia were unreasonable to extent they exceeded commodity rate contemporaneously in effect from Kalamazoo, Mich., to same destinations. Tariff specifying the lower commodity rate published a rule in conformity to Rule 77 of Tariff Circular 18-A, and commission has consistently found that publication of such a rule is tantamount to an admission by carriers that higher rate from intermediate point from which no specific commodity rate is published is unreasonable. Reparation awarded. Miles Medical Co. v. B. & O. 126 I. C. C. 159.

(c) Finding in original report, 113 I. C. C. 699, that combination rates on grain and products from Colorado, Kansas and Nebraska to destinations in Tennessee, Georgia, and Alabama, were applicable, affirmed. Complainant sought lower joint rates to intermediate points constructed in accordance with an intermediate rule, contending that while routing as published was incomplete to certain stations, it could be properly completed by shipper by adding lines of any carriers parties to tariff carrying rule. However, Rule 4, (j) of Tariff Cicular 18-A provides that when a tariff specifies routing, rates may not be applied via routes not specified, and since routes sought were not specified, lower joint rates did not apply. Moreover, even though destinations involved were intermediate over routes constructed by complainant, they were not directly intermediate as the routes were unreasonably circuitous. Russell Grain Co. v. A. G. S., 126 I. C. C. 405.

(d) Shipments moved under combination rate. Tariff governing one factor made reference to combination rule, which provided a specific method for constructing through rates made on combination. Tariff governing other factor made no similar reference nor contained a similar rule. HELD: There was a holding out to shipper of rate constructed in accordance with the rule which publishing carrier must protect, and applicable rate was the through rate constructed by use of the rule. See 113 I. C. C. 734. Refund of overcharges directed. Tuffli Bros. Pig Iron & Coke Co. v. W. M. Ry., 126 I. C. C. 737.

§18. **What is Legal Rate.**

See Classification §17, §24; Commodity Rates §2, II; Crimes; Demurrage §12; Evidence §47; Legal Rates; Overcharges; Reconsignment §5, §6½a; Tariffs IV; Through Routes and Joint Rates §15. §15½, §18,§20, §20½, §21, §22.

(a) Rate on alcoholic liquors, n. o. i. b. n., assessed on shipments of whiskey, found to have been legally assessed. While whiskey is listed in United States Pharmacopoeia, tariff items naming lower rates on drugs, medicines, and chemicals, contended for, did not specifically include whiskey or alcoholic liquors. Under circumstances latter commodities can not be deemed to fall within general description. Green v. A., T. & S. F., 104 I. C. C. 24.

(b) Shipments of salvaged miscellaneous iron and steel machinery parts billed as "salvaged government material" were assessed fifth-class rate on second hand iron and steel machinery and parts. Complainant contends for lower scrap-iron rate, but offered no evidence to identify alleged sales of scrap iron with material involved other than copies of invoices dated five months and more than a year after delivery of shipments, upon which tonnage shown does not correspond with that shipped. FOUND: In absence of positive evidence that description of goods upon face of bills of lading and freight bills was erroneous, charges assessed not shown to have been illegal. Washington Salvage Co. v. P. R. R., 104 I. C. C. 291.

(c) Rates charged on shipments originally billed as cottonseed hull fiber or shavings but changed by carrier to cotton linters, found illegal. In absence of tariff provision defining linters and fiber or shavings, the question of what the material shipped consisted of is one of fact to be determined upon evidence submitted. Shipments found to have

been cottonseed hull fiber or shavings, evidence showing that it was manufactured, represented, and sold as such, and that price received therefor was lower than that on linters. Reparation awarded. Speir & Co. v. A. G. S., 107 I. C. C. 161.

(d) Rates on "scraps or pieces of iron or steel having value for remelting purposes only" found not applicable to shipments of obsolete lathe parts. In instant case the lathe parts were in no case broken up, and, therefore, did not come within the term "scraps or pieces" as used in tariff description. McCabe Lathe & Machinery Corp. v. N. Y., N. H. & H. 107 I. C. C. 311.

(e) Rates on "flavoring syrup" assessed on shipments of Chero Cola found applicable and not unreasonable. While tariff provided lower rates on "molasses and syrup (except fountain and coloring)," carrier introduced correspondence from complainant tending to indicate that Chero Cola is a fountain or flavoring syrup and cited a tariff put into effect responsive to that correspondence. While Chero Cola in a narrow sense is not dispensed over fountains, nevertheless it is similar to other fountain beverages and comes under general classification of fountain syrups. Carrier applied tariff in the generally understood and commercially accepted manner and any other construction would be strained. Chero Cola Bottling Co. v. C. of G., 107 I. C. C. 355.

(f) Bicycles were classified under heading "hand vehicles" upon which first-class rates applied. Contemporaneously a lower commodity rate was maintained on "light and heavy non-self-propelling freight and passenger vehicles." FOUND: Following 101 I. C. C. 334, a bicycle comes within definition of a "light, non-self-propelling passenger vehicle," and lower commodity rate was applicable. Shipments overcharged and reparation awarded. Original report, 93 I. C. C. 697, reversed Jones v. P. R. R., 107 I. C. C. 483

(g) Applying the doctrine of fair and reasonable construction of tariffs as laid down in 96 I. C. C. 595, and 92 I. C. C. 211, rates charged on automobiles from Omaha, Nebr., to Roswell, N. Mex. found applicable and not unreasonable. Roswell Auto Co. v. A., T. & S. F., 107 I. C. C. 555.

(h) Shipment of hickory pieces or sticks billed as "hickory lumber," which were asserted but not shown to have been golf-stick material, was assessed rate applicable on "vehicle material" by analogy in absence of specific rate on golf-stick material. FOUND: Description "lumber," rather than description "vehicle material," covers shipment, and rate assessed was inapplicable. Shipment overcharged and reparation awarded. Bush Bros. & Co. v. Cumberland Transp. Co., 107 I. C. C. 571.

(i) Shipments of lumber from Hillsboro, Ga., originally billed by complainant to itself at Potomac Yard, Va., were diverted or reconsigned to West End, Pittsburgh, Pa. Rates were assessed presumably on Potomac Yard combination. HELD: There being no joint rate in effect between these points when shipments moved, a lower through combination based on Athens, Ga., was legally applicable. Refund of overcharges directed. Lynchburg Chamber of Commerce v. B. & O., 107 I. C. C. 573.

(j) Shipments of ambulance axles purchased from the Government after manufacture of Army ambulances was virtually discontinued were billed as "scrap iron." Carrier's inspector at point of origin classified shipments as "vehicle axles," and after further inspection at destination charges were collected at rates on "billets," into which the axles were manufactured. Tariff carrying the scrap-iron rate provided for its application on "scraps or pieces of iron or steel having value for remelting purposes only." HELD: Following Alaska Junk Co., 98 I. C. C. 551 rates on "vehicle axles" were legally applicable, since the words "value for remelting purposes only" define nature of the articles and do not make the rate to be applied dependent upon use to which the commodity is put, and iron or steel articles having a recognized commercial value other than that of the elementary metal from which manufactured do not properly come within description of scrap. Southern Steel & Rolling Mill v. L. & N., 109 I. C. C. 539.

(k) An unrestricted rate to Chicago found applicable on shipments of sand and gravel moving during Federal Control from Hammond, Ill., to sidings located within Chicago district. While it was intention of carriers to apply a rate published to Division Street to all points within what the carrier considers its

Division Street district, that fact can not be definitely ascertained from tariffs, which are ambiguous. Tariffs are to be construed strictly, the intention of framers is not controlling, and where doubt exists as to meaning of a tariff provision its construction must be resolved in favor of shippers. American Sand & Gravel Co. v. Director General, 109 I. C. C. 557.

(l) Governing classification accorded rating of class A to bridge builders', contractors', or graders' outfits, n. o. i. b. n. Commodity item carried a lower rate on Graders', bridge builders', and contractors' outfits," qualified by further description "Graders' outfits." Upon contention that general heading in commodity item stands alone and establishes specific commodity rates applicable on shipments of contractors' outfits, HELD: Terms in general heading are merely descriptive of what follows and may only be read in connection therewith. They are not to be read alone, but must be considered as qualified by further descriptions appearing in the item. Commission can not consider only that part of the rule that is favorable to shipper's contention and ignore other provisions of tariff that make clear its application. The tariff must be construed in its entirety, considering both the limitations in the particular item and in the general index to commodities. Dolese Bros. Co. v. C., R. I. & P., 109 I. C. C. 561, 562.

(m) Shipments from Wilmington and Modesto, Calif., to Jacksonville, Fla., were routed by shipper and joint through rate assessed. Governing tariff contained alternative rule providing for application of aggregate-of-intermediate rates when less than the through rate, and a lower combination, unrestricted as to routing, applied via Memphis. Upon contention that under rule 5 (b) of Tariff Circular 18-A such lower combination was applicable, HELD: Only application of rule 5 (b) is when "no joint rate applies," or "in the absence of a specified rate," and therefore had no application in the situation here presented. Moreover, had shipments moved via Memphis an out-of-line haul of more than 1,000 miles would have resulted. Joint rate assessed found applicable. Rosser & Fitch v. Director General, 109 I. C. C. 724.

(n) Complainant attacked combination rates charged on cotton from Philadelphia, Miss., to Columbus, Aragon and Social Circle Ga., between Nov. 1, 1922 and Feb. 16, 1924 as unjust, unreasonable and in violation of the fourth section. Cotton was delivered at Philadelphia compressed, and carrier paid compress company's charges. Shipments moved as routed by shipper over G. M. & N., to Meridian and Southern and connections beyond, charged rates to and from Newton, Miss., of $1.05 to Columbus and Aragon and $1.255 to Social Circle. Complainant asks basis of combinations of the rates to and from Meridian of 97c to Aragon, $1.025 to Columbus and $1.175 to Social Circle. HELD, applicable rates were those claimed, reparation awarded. Threefoot Bros. & Co. v. G. M. & N. Ry., 112 I. C. C. 657.

(o) Complainant attacked combination rates charged on 3 cars of lumber from East End, Mo., to Toledo, O., on 18 cars of oak lumber from East End to Indianapolis, Ind., and on 6 cars of wooden paving blocks from Buick, Mo., to Indianapolis as unreasonable and inapplicable. No joint rates were in effect but there were commodity rates of 9c to Sligo, 14c Sligo to St. Louis, 21.5c from St. Louis to Toledo and 16.5c from St. Louis to Indianapolis. The Eastern was not a party to the tariff publishing the combination rule but the other carriers were. HELD: aggregate rates were 41c to Toledo and 36.5c to Indianapolis. HELD, shipments overcharged reparation awarded. Irvin v. Pennsylvania R. R., 112 I. C. C. 746.

(p) Complainant attacked combination of 52c charged on one car of lumber shipped Sept. 19, 1924, from Nashville, Tenn., to Montreal, Que., as inapplicable. Shipment moved as routed over L. & N., to Louisville, Ky., C. I. & L. Wabash, Canadian Pacific and C. N. Ry. beyond, charged 13c and 39c to and beyond Louisville. L. & N., tariff carrying the rate to Louisville made reference to combination rule but the tariff carrying the 39c rate did not. Through rate was 49.5c. HELD, applicable rate was 49.5c reparation awarded. Ransom & Co. v. L. & N. R. R., 113 I. C. C. 177.

(q) Complainant attacked combination rates charged on five cars of heavy machinery August 21, 1923 and later dates from Duluth, Minn., to Scanlon, Fla., as in violation of section 6 and unreasonable. Lawful tariff rates in August

1923 were 38.5c to Ohio river points, 65c from Ohio river to Jacksonville, Fla., and $52 per car beyond. Defendants claim proper rate beyond Jacksonville was sixth class of 26c per 100 pounds. It is obvious that when the shipment moved the rate was published strictly on a per car basis. HELD: rate attacked illegal to extent rate beyond Jacksonville exceeded $52 per car, reparation awarded. Brooks Scanlon Corp. v. A. C. L. R. R., 113 I. C. C. 237.

(r) Contention that commodity rate provided for machinery, or oil-well supplies was not applicable to electric starters and electric transformers, not sustained. List of commodities named in tariff contains "electric machinery, consisting of dynamos and motors, and parts thereof." Electric starters and electric transformers are not specifically named, but transformers are. The latter item includes electric transformers and an electric starter is an electric motor. Wagner Electric Corp. v. Director General, 112 I. C. C. 57, 58.

(s) Refined-oil rate assessed on petroleum refined-oil distillate having a specific gravity in excess of 36° found to have been legally assessed. While the oil here shipped is much lower in value than that of various commodities on which refined-oil rates apply, such as kerosene and gasoline, the tariffs did not define the various kinds of oil; an oil trade publication presented in evidence shows specific gravity of gas oil in various sections of the country to be not over 36° in practically every instance; and a ruling of the western classification committee provided that petroleum oil with a specific gravity in excess of 36° should be rated as refined oil. Sioux City Gas & Elec. Co. v. C., B. & Q., 112 I. C. C. 344.

(t) Combination rates to and from Newton, Miss., collected on shipments of cotton delivered to initial carrier for transportation in compressed bales at Philadelphia, Miss., for movement to Columbus, Aragon, and Social Circle, Ga., found inapplicable. Lower combination applied over routes of movement based on Meridian, Miss., tariff carrying the local Philadelphia-Meridan rate providing for its application on "cotton in bales" whether delivered to carrier compressed, uncompressed, or with carrier's privilege of compression. Factors beyond Meridian applied on cotton, carrier's privilege of compression, and as this was the original character of the shipments this rate was applicable beyond Meridian via routes of movement. Reparation awarded. Threefoot Bros. & Co. v. G., M. & N., 112 I. C. C. 657.

(u) Shipments of machinery from Duluth, Minn., to Scanlon, Fla., found overcharged. Carriers claimed a class rate beyond Jacksonville which provided a minimum carload weight made on a 100-pound basis. At time of movement, however, the commodity description applying for movement beyond Jacksonville read: "Machinery and machines, carload minimum weight 20,000 pounds, class N," the class "N" rate being a per car rate. Subsequent to movement a phrase "excess in proportion" was inserted in the tariff but did not apply on shipments in question, which moved under rate published strictly on the per-car basis. Reparation awarded. Brooks-Scanlon Corp. v. A. C. L., 113 I. C. C. 237.

(v) Question as to whether marine engines are comprehended in the term "engines" as used in a tariff item in view of the limiting words in the heading, viz, "Electrical, Iron Working (Power), Mining and Smelting," HELD: In common acceptation the term "engine" does not include motors and generators or dynamos, which the item specifically names. However, it can not be said that engines used for operating iron-working, mining or smelting machinery are essentially different from other engines used to operate power machinery; in fact, same kind and style of engines as are used for purposes named are put to many other uses, marine-type engines being sometimes used on land for power purposes. The parenthetical expression in the heading, therefore, clearly does not so restrict the term "engines" as to prevent its application to marine engines. See 68 I. C. C. 195, construing the term "turbines" in the same item. Duthie & Co. v. Director General, 113 I. C. C. 255, 257.

(w) Complainant attacked commodity rates charged on numerous cars of grain and grain products shipped in 1924 from Colorado, Kansas, and Nebraska, to points in Tennessee, Georgia, and Alabama as illegal. Rates charged were combinations on Ohio river crossings. There were contemporaneously in effect from the points of origin in ques-

tion to Greenwood, Miss., and New Orleans, La., joint through rates which were much lower, and the tariff in which they were named provided that they would also apply to directly intermediate points. The rates contended for to Atlanta, Ga., Attalia, Ala., and Winchester, Tenn., are the Greenwood rates, while those contended for to Bessemer, Birmingham and Tuscaloosa, Ala., are the New Orleans rates. The rate situation involved is the same in principle with respect to all the shipments, and the Commission will take, as an example, the shipments which moved to Atlanta. Complainant selects route 2, south of East St. Louis, which it will be noted from the extract, means I. C. Complainant contended that Atlanta is intermediate to Greenwood over the route formed by that road and its connections and that the Greenwood rates applied. It will be observed that the tariff specifically provided that the Greenville rates applied to Greenwood over route 2. However, the I. C. does not reach Greenwood. Complainant says that the route was incompletely stated, only the initial line out of East St. Louis being shown, and that, therefore, under the commission's well known rule any route made up of lines of carriers that are shown as parties to the tariff might properly have been used beyond the I. C. To secure the desired rate, complainant builds a route from East St. Louis to Greenwood, using the I. C., for 206 miles southwardly to Martin, Tenn., thence N. C. & St. L., 429 miles southeastwardly to Atlanta, thence Southern 287 miles westwardly to Columbus, Miss., thence C. & G., 113 miles westwardly to Greenwood. The total distance over this route is about 1,035 miles, as compared with the short line distance over I. C., and Y. & M. V., of about 455 miles. Regardless of the complete specific routings shown in the tariff the complainant ignored such routes and attempted to construct unauthorized routes via which the destination points of the shipments would be intermediate to Greenwood and New Orleans. It is further to be observed that in connection with the various routes in the tariff to either Greenwood or New Orleans no junction point is named which is located outside of the Mississippi valley territory. This indicates very clearly that the authorization of an unusual or an unduly circuitous route is not contemplated. Furthermore a reasonable interpretation of the I. C., routing shown in connection with Greenwood requires the Commission to hold that it means the longest possible haul to that carrier and that delivery to a connection, in this case its subsidiary the Y. & M. V., which reaches Greenwood reasonably direct. HELD, rates charged applicable, complaint dismissed. Russell Grain Co. v. A. G. S. R. R., 113 I. C. C. 699.

(x) Complainant attacked rate charged on a car of furniture shipped on Oct. 27, 1923, from Oklahoma City, Okla., to Jackson, Miss., as inapplicable. Shipment moved C. R. I. & P. to Memphis and I. C., beyond charged $1.02 to Memphis and 59c beyond. The tariff naming the rate of $1.49 contains the following restriction under the exceptions of the C. R. I. & P. to the general application of rates: Rates between Jackson and Natchez, Miss., will apply northbound only in connection with C. R. I. & P., no southbound rates in effect. The shipment here considered moved southbound to Jackson and the restrictive clause definitely states no southbound rates in effect. HELD, rate charged applicable, complaint dismissed. Orgill Bros. Co. v. C. R. I. & P. Ry., 115 I. C. C. 23.

(y) Complainant alleges charges collected on one car of potatoes shipped Oct 9, 1923, from Sidney, Mich., to Niagara Falls, N. Y., reconsigned to Old Forge, Pa., and again reconsigned to Philadelphia, Pa., as unreasonable. Shipment was delivered to the P. M. consigned to shippers order notify Frank T. Miller, Niagara Falls, and routed Suspension Bridge and N. Y. C. On October 15, 1923, complainant, having paid the draft covering the shipment, obtained the bill of lading, which he tendered to the agent of the Erie to Buffalo with instructions to reconsign the shipment to the Empire Stores Co., Old Forge, Pa. The shipment moved P. M. apparently to Suspension Bridge and thence over Erie to Old Forge where it arrived Oct. 30, 1923, and was apparently placed for unloading. It was refused by consignee at Old Forge and on Nov. 2, 1923, the complainant instructed the agent at Buffalo to reconsign the shipment to Guy P. Ford, Philadelphia, routing P. & R. Shipment moved from Old Forge to Philadelphia over Erie to Sparta Jct., N. Y., L. & H. to Easton, Pa., C. R. R. of N. J. to Bethlehem, Pa., and Reading

to destination. Charged 50c to Old Forge and 32c beyond, plus reconsignment charges of $2.70 at Suspension Bridge and $6.30 to Old Forge and demurrage of $58 at Old Forge and $33 at Philadelphia. Rate charged Old Forge to Philadelphia was inapplicable to extent it exceeded 28.5c. At time of movement a fifth class rate of 50c was in effect from Sidney to Philadelphia via another route. HELD, applicable rate no unreasonable and shipment subject to demurrage charges prior to Nov. 26, 1923, but not thereafter, reparation awarded. Miller v. P. M. R. R., 115 I. C. C. 461.

(z) Complainant attacked commodity rates charged on sand and gravel, carloads, shipped from Montgomery, Ala., to Fort Benning, Ga., between May 28 and Oct. 21, 1924, as illegal and unreasonable. Shipments moved C. of Ga. from Montgomery to Fort Benning Junction, 99 miles, thence over a military railroad to Fort Benning 6 miles. Prior to June 15, 1924, the military line was operated by the War Department and not as a common carrier. On and after that date it was operated by defendant. In applying distance rates defendant used 99 miles, the distance to the junction, prior to June 15, 1924, and 105 miles to the fort on and after that date. Prior to May 28, 1924, there was in effect to Junction a rate of 2050c per car of 40,000 pounds excess in proportion. On nine shipments made between June 15 and July 21, 1924, charges were collected on 2150c per car of 40,000 pounds excess in proportion. Just before these 20 cars moved, and effective on May 28, 1924, the commodity tariff was changed in that the "unit of rate" was omitted. The rates were stated at 2050c and 2150c for distances of 99 and 105 miles, but the tariff failed to state that these amounts were intended to apply "per car" or "per car of 40,000 pounds excess in proportion." The tariff merely provided "C. L. minimum weight 90% of marked capacity of car, except when cars are loaded to their visible capacity actual weight will govern." HELD, rates applicable were 2050c per car from May 28 to June 14, 1924, and 2150c per car from June 15 to July 24, 1924, defendant to refund overcharges, complaint dismissed. Baehl & Co. v. C. of Ga. Ry., 115 I. C. C. 679.

(aa) Complainant attacked second class rates charged on automobile trucks shipped between Feb. 28, 1920, and May 15, 1924, from Detroit, North Flint, Lansing, and Pontiac, Mich., Lima and Cleveland, O., and Evansville and Marion, Ind., to Sioux City, Ia., Bayard, Lincoln and Norfolk, Neb., as unjust and unreasonable and illegal. Shipments consisted of automobile trucks, variously described in the bills of lading as "auto trucks", "auto trucks, self propelled", "freight panel body business cars", "autos, freight screen body" and "freight business cars". Rates charged second class rates to East St. Louis, Ill., or other east bank Mississippi river crossings, and second class beyond. Rates west of the Mississippi are not attacked. Complainants contend that the description "vehicles, spring, freight or delivery" shown in the exception was applicable. On May 15, 1924, the description was changed by including therein the words "(non self propelling)" following the words "vehicles (spring)". On Sept. 1, 1925, the description was again changed by substituting the words "horse drawn" for the words "non self propelling". There is no question in this case of ambiguity as between the description in the classification, on the one hand, and the description in the exception, on the other. The only question is whether the exception under the description "vehicles (spring), freight or delivery" included "vehicles, motor, automobiles, freight". The official classification does not make any distinction in, or separately classify, freight motor vehicles upon the basis of their being equipped with springs. The description in the exception standing by itself, is practically meaningless. The exception does not specify what is meant by spring vehicles. If complainant's contention is correct, any freight vehicle of any kind whatsoever, whether self propelling or not, would come under the description, if it had springs. It would include, therefore, all kinds and sorts of freight or delivery vehicles equipped with springs from the smallest up to and including a railroad freight car. The distinction made in the classification proper between self-propelling and non-self-propelling, or horse drawn, vehicles would be completely nullified. Such a construction of the exception item is a strained and unnatural one. The official classification clearly provides for a second class rating upon freight motor vehicles. The description used is gen-

erally known and understood by producers, shippers and users of such vehicles. The classification also includes another description for horse drawn vehicles. Under that description it includes "trucks, wagons, delivery, with springs." The classification itself leaves no room for doubt. The particular description in the exceptions must be read in connection with the classification item, and not wholly by itself. It appears that the exception item read in connection with the classification is intended to include only non self propelling, or horse drawn, freight vehicles, as the latter are described in the official classification. This is a reasonable construction not inconsistent with the classification or the item of the exceptions. None of the complainants have been misled or relied upon the alleged applicable rates to his damage. HELD, second class rates applicable, complaint dismissed. General Motors Truck Co. v. G. T. W. Ry., 118 I. C. C. 99.

(bb) In 112 I. C. C. 325 complainant attacked as unlawful under section 6 and unreasonable under section 1, interstate rates on cotton shipped to Montgomery, Ala., from points south thereof, for concentration and compression, and reshipped to Mobile, Ala., Pensacola, Fla., and New Orleans, La. During that portion of the period covered by the complaint prior to August 25, 1924, from all the points of origin, and between that date and Oct. 20, 1924, from all points except stations north of and including Searcy, Ala., 37 miles south of Montgomery, charges were based on local rates to Montgomery, plus reshipping rates to the ports which were materially less than the local rates. On August 25, 1924, specific rates were provided from stations Searcy and north, which, in all but one instance, were higher than the combinations of local rates to Montgomery and the reshipping rates from that point previously available. Coincidently with the establishment of these specific rates, however, the reshipping rates from Montgomery on traffic originating at these points were withdrawn so that the specific rates were at no time in excess of any combinations available over the routes of movement. Prior to October 20, 1924, the applicable interstate locals to Montgomery were published subject to the combination rule. On the date mentioned reference to the combination rule in the Jones tariff in connection with the local rates to Montgomery, was eliminated. At no time during the period covered by the complaint were the reshipping rates from Montgomery subject to the combination rule. HELD, under the tariff provisions, the shipments from all points of origin. prior to August 25, 1924, and from all points except those north of and including Searcy, between that date and Oct. 20, 1924, were overcharged, and that the applicable rates were the interstate locals to Montgomery, plus the reshipping rates from that point, subject to the combination rule, rates attacked not unreasonable. Montgomery Cotton Exchange v. L. & N. R. R., 118 I. C. C. 157.

(cc) In 101 I. C. C. 74, the Commission, by division 4, found that the rates charged on several carload and less than carload shipments of pianos made during 1922 and 1923 from Hammond, Ind., and Steger and Oregon, Ill., to Birmingham, Ala., were not unreasonable or unlawful, and dismissed the complaint. Reconsideration was had. Birmingham is east of Mississippi valley territory, and the Commission can not overlook the fact, apparently well known to complainant, that rates from the origin territory considered to Birmingham and other similarly situated points have been maintained for many years on the basis charged of lowest combination on the Ohio river crossings, and have been higher than the rates to Mobile and other gulf ports under fourth section authority. The interpretation contended for would break down this long standing adjustment by extending the Hammond-Mobile rate under the Mississippi valley bases to points, for example, on the Southern Ry. east thereof as far as the south Atlantic ports of Savannah, Ga., and Jacksonville, Fla. Clearly, such an interpretation would be strained and unnatural and raises no reasonable doubt in its favor. The record is convincing that complainant was not misled to his damage by the intermediate rule. HELD, complaint dismissed. Forbes & Sons Piano Co. v. A. G. S. R. R., 118 I. C. C. 185.

(dd) Shipments of staves from Blytheville, Ark., to Gulfport, Miss., were routed "J. L. C. & E.-Frisco-Ill. Cent. at Memphis." A rate lower than that assessed applied from Blytheville on the Frisco to Gulfport, but tariffs provided that in order to be entitled thereto shipments tendered to the J. L. C. & E.

must be turned over by that line to the Frisco at Blytheville. In other words, under routing governing lower rate the J. L. C. & E. was entitled to a switch movement only. Upon contention that under routing instructions given it was initial carrier's duty to turn these shipments over to the Frisco at Blytheville. HELD, notation "J. L. C. & E." in routing instructions indicated clearly that a line haul by that road was desired and that carrier was under no obligation to deliver shipment to the Frisco to Blytheville. If shipper desired shipments handled in manner contended for it should have so specified in routing instructions. See also 51 I. C. C. 183. Hollingshead Co. v. J., L. C. & E., 115 I. C. C. 19, 20.

(ee) On cottonseed meal from Greenwood, Miss., to Angola, La., a combination rate based on Baton Rouge, La., was assessed. A lower joint rate was contemporaneously in effect from Memphis to Angola via Baton Rouge, tariff publishing that rate containing an intermediate rule restricted to apply via direct available routes only. HELD, application of the lower rate not being confined to a single direct route, but being applicable over all "direct available routes," and record not establishing that route through Greenwood was not an available direct route from Memphis to Angola, such lower joint rate was applicable from Greenwood and shipments were overcharged. Reparation awarded. Planters Oil Mill v. Y. & M. V., 115 I. C. C. 21.

(ff) Tariff provided a fifth-class rate on animal hoofs and horns, in packages or in bulk, whereas under certain classification exceptions a lower sixth-class rating was provided in "fertilizer material, consisting of the following articles having value only as a fertilizing ingredient, viz: * * * hoofs or horns." Upon contention that restriction "having value only as a fertilizer ingredient" brings in a monetary consideration, and since commission did not authorize the restriction as to value, sixth-class rates were applicable, and shipments were therefore overcharged. HELD, the restriction of sixth-class rates to hoofs and horns having value only as a fertilizing ingredient manifestly does not make provision of section 20(11) of the act applicable and fifth-class rates were legally assessed. Tomkins-Summer Co. v. B. & O., 115 I. C. C. 24.

(gg) Two-factor combination rate assessed on automobiles from Detroit, Flint, and North Flint, Mich., and on plumbers' supplies from Noblesville, Ind., to Birmingham, Ala., based on Jeffersonville, Ind., found inapplicable. Legal rate found to be a lower three-factor combination based on Louisville and Water Works, Ky., and applicable under rule 5 (b) of Tariff Circular 18-A. Refund of overcharges directed. Birmingham Traffic Bureau v. Director General, 115 I. C. C. 33.

(hh) Western classification fourth-class rates on "Spring Assemblies, Cushion or Seat, * * *," charged on a mixed shipment of cushion seat springs and coiled-wire springs, not shown in excess of those applicable or otherwise unlawful. Complainant contended for a commodity rate on "Springs, wire, n. o. s., in bundles," or a still lower commodity rate subsequently established on articles shipped. Commodities here in issue did not come within description contended for, were specifically covered by various classification items on "Springs" and "Spring Assemblies," and charges should have been assessed on whichever of the several classification bases resulted in lowest total charges. Moreover, absence, among other things, of weights of the several articles renders it impossible to ascertain aggregate legal charges, and record fails to show that total charges collected exceeded those which should have been assessed. D'Arcy Spring Co., v. G. T. W., 115 I. C. C. 91.

(ii) Charges collected on newsprint paper moving from Sault Ste. Marie, Ontario, Canada, to Dallas, Tex., based on actual-value rates plus switching charge at point of origin, found applicable. Complainant contended for lower released rates via route of movement, or lower combination also based on released rates via a different route, insisting that rates based on released value not having been authorized by commission were void under section 20 of the act. However, in 100 I. C. C. 471, commission held that actual-value rates may fairly be distinguished from released rates, and as value in instant case was not declared and authority for publication of released rates had been duly granted, the applicable rate was the rate assessed. Western Newspaper Union v. Director General, 115 I. C. C. 105.

(jj) Charges were collected on steel

bars, round, square, and bent, and used for concrete reinforcements, under tariff description covering "bar, band, boiler, hoop, plate, and rod iron or steel * * *." Contemporaneously same tariff named lower rates in another item on "* * * sheet bars or bars of steel," a reference note thereto reading "These rates will also apply on sheet bars (for the manufacture of tin plate) * * *." HELD, note in no way restricted application of lower rates and if it was carriers' intention, as contended, to limit them to sheet bars of steel they should have done so by clear and unequivocal language. Having failed to do so conflicting rates were therefore in effect and shipper was entitled to the lower. See also 104 I. C. C. 607. Refund of overcharges directed. Olsen v. G. S. R. R., 115 I. C. C. 195.

(kk) Tariff carried notation "applicable only via Seaboard Air Line as initial carrier and only on traffic originating at points south and west of Jacksonville." Upon contention that notation included points on all lines in Florida south and west of Jacksonville or on traffic turned over to the S. A. L. at that point. HELD, given a reasonable construction such notation restricted lower rate to traffic originating only on Seaboard Air Line south and west of Jacksonville. Wauchula Development Co. v. A. C. L., 115 I. C. C. 207.

(ll) Following 104 I. C. C. 48, domestic rate assessed on a shipment of coiled-steel wire rods moving on a domestic bill of lading from Acme, Ill., to San Francisco, intended for export, and actually exported to China, found applicable. While a lower export rate was contemporaneously in effect, complainant failed to comply with all regulations and tariff requirements governing reservation of steamer space and prepayment or guaranteeing of transportation charges. American Trading Co. v. Director General, 115 I. C. C. 223.

(mm) Shipments of wrought iron pipe from Chester, Pa., were originally billed to Billings, Mont. While en route diversion was requested but this carriers failed to accomplish and shipments moved through to Billings, whence they were reconsigned to Beggs, Okla. Charges were collected at a combination rate to and from Billings. At time of movement a lower joint rate applied from Chester to both Billings and Beggs. HELD, the lower rate, being restricted to apply via a route other than route of movement, was not applicable to shipments here involved and combination assessed was legally applied. Tidal Osage Oil Co. v. Director General, 115 I. C. C. 237.

(nn) Mixed shipment of veneer moved under a joint commodity rate applicable to veneer less than one-eighth inch in thickness. A portion of shipment was of greater thickness but no separate weights of differing thicknesses were shown in billing. Upon contention that as tariff made no provision for such mixed shipments a lower commodity rate on lumber or veneer, n. o. i. b. n., without restriction as to thickness, should have been assessed on entire shipment. HELD, rate sought was restricted to apply only in absence of other specific commodity rates. Commodity rate charged was applicable on that portion less than one-eighth inch thick, and rate contended for applied on the balance of greater thickness. Adjustment of charges authorized, computed to these bases, if weights of differing thicknesses can be determined or agreed upon. Standard Furniture Co. v. A. G. S., 115 I. C. C. 243.

(oo) Class A rate on "Machinery and Machines: Ice Making or Refrigeration" subject to graduated minima for cars of different sizes, assessed on refrigerating and ice-making machinery, found not illegal or otherwise unlawful. Complainant contended for application of an item on "Machinery and Machines," under which was listed various articles, including refrigerating machinery, comprising creamery and cheese factory apparatus, and subject to a 20,000-pound minimum. Creamery apparatus loads considerably lighter than ice-making machinery, and fact that separate items permit of generous mixtures does not lead to conclusion that they are analogous. There is no provision in the creamery-apparatus list for ice-making machinery, and numerous articles embraced in one list have no counterpart in other. Moreover, to follow interpretation contended for would result in drastic curtailment of the generous mixtures which the two items now provide and necessitate elimination of numerous unlike articles of general use from both lists. Arctic Ice Machine Co. v. A., T. & S. F., 115 I. C. C. 346.

(pp) Rates on l. c. l. shipment of household goods and secondhand trailer from Bozeman, Mont., to Alameda, Calif., found applicable and not unreasonable.

Commodity rate assessed on household goods was listed under item "Household goods, taking 1st-class rating under heading 'Household goods or emigrant movables,'" complainant contending that it was also applicable on trailers which were included under general description "Emigrant movables." There was no single description covering "Household goods or emigrant movables," but each item was listed separately, household goods being included under both items. Trailers, however, were covered only by item "Emigrant movables," but rate thereunder was not applicable to l. c. l. shipments. The commodity rate was therefore applicable on household goods but not on the trailer, a first-class rate being properly applied on latter. Desch v. N. P., 115 I. C. C. 401.

(qq) Shipments of barley from South Dakota and Minnesota, during Federal control, moved to Minneapolis, and were reforwarded to Milwaukee, combination rates being assessed. Concurrently, joint rates, restricted to apply only via Winona, Minn., and Wyeville, Wis., via the shortest available route, were in effect from original shipping points to Milwaukee. HELD, as shipments did not move through points through which lower joint rates applied, and no joint rates were applicable over route of movement, the combination of locals assessed was legally applied. Zimmerman v. Director General, 115 I. C. C. 407.

(rr) Charges are assessed on a steam roller under a tariff description "Grading and Road Making Implements: Rollers, road: Self-propelling and other than self-propelling." Contemporaneously by exceptions to classification a lower rating was provided on "Machinery and Machines, rated sixth class in southern classification." FOUND, a self-propelling road roller is a machine in an entirely proper and normal sense of the word and for obvious reasons most machines are generally referred to by their individual names. That fact, however, does not make them any the less machines. Moreover, the item carried in the exception sheet was not limited either in the lower rate provided thereunder was terms or by reasonable implication and therefore applicable here. Refund of overcharges directed. Lawrence Construction Co. v. L. & N., 115 I. C. C. 439.

(ss) Shipments of condensing machinery, condensers, pumps, and parts thereof from North Philadelphia, Pa., to Florida points moved under combinations, the factor beyond Jacksonville being based on rates per carload, minimum 20,000 pounds, excess in proportion. Tariff naming rates was governed by exceptions to the classification which omitted the words "excess in proportion." Upon contention of shipper, that, due to such omission, the rates stated in the tariff were the applicable total charges for each carload, regardless of weight of contents. HELD, while omission of phrase made application of rates confusing, the tariff naming them stated that they applied "Per Carload. As prescribed in classification, excess in proportion," thereby supplying the measure of the carload unit while the minimum weight was supplied by the classfication exception. Rates assailed were, therefore, applicable. Wheeler Mfg. Co. v. A. C. L., 115 I. C. C. 527.

(tt) On shipments of rough marble, originally imported, and used for interior decorations, sixth-class rates were assessed under governing classification on "Stone, Natural, * * * Marble * * *." Contemporaneously commodity tariff provided lower rates on "Stone (building)." HELD, the lower commodity item not being restricted to domestic traffic, or otherwise, rates thereunder were applicable on traffic here involved. Refund of overcharges directed. Lautz Marble Corp. v. E. R. R., 115 I. C. C. 543.

(uu) On petroleum products, from Gates and Port Arthur, Tex., to certain Colorado points, tariff rule provided that if rates and charges in an agency tariff applicable from same origin points to Lago, Utah, or Deming, N. Mex., respectively, made lower charges than those provided in another tariff, the lower rates to Lago or Deming respectively would apply. Upon contention that word "respectively" applied to routes and not to rates. HELD, while it may have been carriers' intention to restrict application of lower rates to their own lines, tariff must be construed in accordance with its language. Tariff publishing the rule contained no routing restrictions and made all destinations therein, with one exception, subject thereto: nor was there any restriction that particular destination points must be directly intermediate to points carrying lower rates and if it was desire of carriers to exclude application of the Deming rate to points on their lines they had it in their power to do so by plain language. Here the tariff

is doubtful or ambiguous and must be resolved against framers. Refund of overcharges directed. Texas Co. v. B., S. L. & W., 115 I. C. C. 572.

(vv) First-class rate on l. c. l. shipments of "tinsel" found applicable and reasonable for transportation of threads or strands of metal, the German name for which is "lahn," used in manufacture of tinsel articles. Allegation that second-class rate provided for wire n. o. i. b. n. in official classification should have been collected, not sustained, lahn being a form of tinsel and not wire. Nat'l Tinsel Mfg. Co. v. C. & N. W., 115 I. C. C. 631.

(ww) Caption of tariff naming rates on furniture stated that rates were applicable to "Carloads except as otherwise specified." The furniture items carried under this caption separated different kinds of furniture into groups according to classification ratings applicable thereon, each item carrying the words "any quantity." HELD, as such tariff did not indicate whether l. c. l. or c. l. rating was to be used in determining to which commodity-rate group any particular article belonged, the words "any quantity" constituted an exception and made the rates applicable to either c. l. or l. c. l. shipments, and since the tariff item was specifically made applicable to shipments in "any quantity" the carload classification rating could and should have been used in determining commodity rates applicable to l. c. l. shipments. Refund of overcharges directed. Amber Furniture Co. v. C. & N. W., 115 I. C. C. 640.

(xx) On sand and gravel from Montgomery, Ala., to Fort Benning, Ga., tariff originally named rates in "cents per car of 40,000 pounds, excess in proportion." Prior to movement tariff was changed by omitting unit of rate, such tariff failing to state that amounts stated therein were intended to apply "per car" or "per car of 40,000 pounds, excess in proportion." Subsequently unit of rate was restored in tariff. HELD, assessment of rates on shipments moving during the interim on basis of unit per car of 40,000 pounds, excess in proportion, found to result in overcharges. Applicable rate was unit in cents per car regardless of amount of sand or gravel which each car actually contained. Refund directed. Baehl & Co. v. C. of G. Ry., 115 I. C. C. 679.

(yy) Shipments of defective or damaged radiators, bath tubs, sinks, and lavatories were transported in their original form and described in bills of lading under names of individual pieces, charges being collected at rates applicable to articles as described. Upon contention that shipments came properly within tariff description of scrap iron and should be accorded rate applicable thereto. HELD, in order to come within tariff description of scrap iron, articles must not be shipped in original form but must be reduced to fragments, scraps or pieces so as to be useless for any other purpose except remelting, for it is nature of the article shipped and not price at which it is sold or use to which it is put that determines whether scrap iron rate shall apply. See 102 I. C. C. 325, 326. As shipments did not conform to these requirements, rates assailed were applicable and not unreasonable. Richmond Radiator Co. v. C. & N. W., 115 I. C. C. 743.

(zz) Marine-engine parts from Hamilton, Ohio, to Oakland, Calif., were assessed class A rates. Governing tariff provided for alternative application of any lower aggregate of intermediates. A lower aggregate of intermediates was in effect but one factor thereof was limited to specific kinds of machinery, marine-engine parts not being specifically named. Upon contention that marine-engine parts are embraced in description "Motors," or "Stationary Engines," or both, on which the lower commodity rate factor applied. HELD, while shipments as a whole constituted marine engines they were not shipped in complete units, each shipment consisting of marine-engine parts only. It follows, therefore, that the class A rates assessed were applicable. Moore Shipbuilding Co. v. C., I. & W., 118 I. C. C. 3.

(3a) Third-class rate on cabinets charged on servidor doors, a patented article with double panels enclosing a narrow compartment to permit delivery or removal of clothes and other articles from hotel rooms without an employee having to enter the room, found illegal, and lower commodity rate on ordinary doors, found applicable. Servidor doors compete with ordinary doors and while they constitute a combination article having characteristics of both doors and cabinets and might reasonably take higher rates than common doors, their primary purpose and use continues to be

that of a door. Here commodity rate on doors was not restricted to certain types or qualities of doors and it therefore applied on servidor doors which are of higher value, possess features not common to ordinary doors, and presumably not contemplated when commodity rate on doors, was published. Reparation awarded. Servidor Co. v. C., M. & St. P., 118 I. C. C. 49.

(3b) Tariff rule published in compliance with a legislative enactment of the State of Missouri under which c. l. shipments of grain and products moving intrastate from Kansas City and St. Joseph, Mo., to other points in Missouri are permitted to be stopped in transit for part unloading found reasonable for interstate application on shipments from Kansas City, Kans., to points in Missouri, and failure of carriers to apply said tariff rule to such interstate shipments found to result in undue prejudice. Removal of undue prejudice ordered. Southwestern Milling Co. v. A., T. & S. F., 118 I. C. C. 61.

(3c) Charges on l. c. l. shipments of cheese from Burnett, Random Lake, Mayville and Hartford, Wis., to Cincinnati, Ohio, during Federal control, were collected on various bases. Complainant contended that in absence of a joint through rate the lowest available combination applied. HELD, through rates take precedence over lower combinations contemporaneously in effect and here applicable tariffs provided through rates. Rohan Co. v. Director General, 118 I. C. C. 83.

(3d) Automobile trucks were assessed second-class rate applicable under classification description, "Vehicles, motor: Automobiles * * * Freight." Upon contention that lower fourth-class rate was applicable under exception sheet item, 'Vehicles (Spring), Freight or Delivery." HELD, exception to classification must be read in connection with the classification and not wholly by itself, and applying the rule of fair and reasonable construction coupled up with a history and development of tariff items, the classification clearly provides for separate ratings on both freight motor vehicles and horse-drawn vehicles. The exception appears meaningless unless construed to mean horse-drawn vehicles and the construction of the exception item contended for by complainant is a strained and unnatural one. Second-class rates as charged were legally applicable. General Motors Truck Co. v. G. T. W. Ry., 118 I. C. C. 99.

(3e) Although intention of tariff framers is not controlling and tariffs are to be construed according to language used, a fair and reasonable construction should be given in the light of all pertinent provisions considered together. See 92 I. C. C. 211, 214; 101 I. C. C. 74, 76. General Motors Truck Co. v. G. T. W., 118 I. C. C. 99, 104.

(3f) Shipments of crude oil blended with a small quantity of casing-head gasoline and assessed gasoline rates found overcharged. Such shipments found to consist of crude oil it being shown that the material here considered, as shipped, when subjected to usual tests, showed characteristics well within the range of those exhibited by crude oils to which no casing-head gasoline had been added. Moreover, while oil originally contained a substantial percentage of casing-head gasoline, in view of highly volatile character of the commodity and opportunities that were afforded for its evaporation between time of its production and time it was loaded into the cars, the oil as tendered for shipment did not contain a sufficient quantity of casing-head gasoline to render it different in any essential respect from crude oil as covered by tariffs. Reparation awarded. National Refining Co. v. L. & N., 118 I. C. C. 177.

(3g) Combination rates on watermelons shipped from Oliver, Ga., to Kansas City, Mo., and forwarded back to Rock Island, Ill., found legally assessed. Complainant contended for application sence of routing restrictions in tariff. of a through rate to Rock Island in ab- While reconsignment rules authorized application of through rate with graduated charges for back hauls, carriers deny any knowledge of reconsignment and shipper adduced no proof that tariff provisions requiring that "request for reconsignment must be in writing" had been compiled with. Nor was testimony offered with respect to date of arrival or departure from Kansas City, or that request for reconsignment was made. Moreover, complainant's attorney signed statement of facts of which he had no knowledge, freight bills and bills of lading were not introduced in evidence, and there is no proof that complainant paid

charges or is the real party in interest. Ward Bros. v. C. of G. Ry., 118 I. C. C. 183.

(3h) Rates on "Furniture and Furniture Parts" were assessed on chairs, in the white, partially assembled. In the same tariff, carrier published lower rate on "Chair Stuff or Stock, K. D., in the white." Classification provided separate ratings on wooden chairs, knocked down, in the white, and when knocked down flat. Upon contention that commodity here shipped was chair stock, k. d., since it conformed to a rule of the tariff which provided that k. d. ratings involved the taking apart of the commodity in such a manner as to materially reduce the space occupied, HELD: The mere separation of the chairs into two or more parts did not destroy their identity as chairs and to sustain contention raised would nullify the distinction between the ratings on chairs, knocked down and chairs knocked down flat. Rates charged were therefore legally assessed. Memphis Furniture & Mfg. Co. v. L. & N., 120 I. C. C. 267.

(3i) Tariff item publishing rates from Carthage and Phenix, Mo., to various Illinois and Missouri destinations listed rates to "Chicago, Ill., Milwaukee, Wis., and intermediate points." Upon contention that phrase "and intermediate points" included all points between Carthage and Phenix as origins, and Chicago and Milwaukee as destinations, via all routes, and that rates named thereunder applied on sawed stone and marble moving from Carthage and Phenix, to Indianapolis, Brightwood, and St. Mary of the Woods, Ind., HELD: By a fair and reasonable construction of tariff as a whole, the phrase "and intermediate points" refers only to points betweeen Chicago and Milwaukee. To sustain complainant's contention would necessitate a strained and unnatural construction of tariff and result in various conflicts. Gates Marble & Tile Co. v. C., P. & St. L., 120 I. C. C. 275, 277, 278.

(3j) Charges on wheat from points west of Kansas City, Mo., milled in transit at Marshall, Mo., and the product, flour, forwarded to Oklahoma City, Okla., found inapplicable. Here, the movement involved a back haul through Kansas City, and charges assessed were based upon those published for out-of-direct-line routes. Tariff provision, however, related solely to charges where out-of-line haul exceeded 150 miles, such charges not to be based on the round trip but only for distance from point of origin to transit point. Distances from origin points to Marshall being less than 150 miles, charges assessed were therefore inapplicable. Applicable charges found to be those in effect via an unrestricted route through St. Louis. Victor Milling Co. v. M. P., 120 I. C. C. 335.

(3k) Facts of record showed that logs were originally cut as saw logs, but on account of market conditions were sold to a paper company which converted them into pulp. These logs were of large size, and were shipped in the condition in which originally cut. HELD: From facts of record no other conclusion is possible than that shipments consisted of saw logs, and were subject to saw-log rate. Charges thereon, based upon rates on pulpwood, found to have been illegally assessed. Refund of overcharges directed. Menasha Wooden Ware Co. v. D., S. S. & A., 120 I. C. C. 415.

(3l) On grain moving from points in Montana, the Dakotas, and Minnesota, to Duluth, Minn., and Superior, Wis., via Minneapolis, Minn., charges were assessed on basis of through rates to Minneapolis, plus proportionals beyond. Lower local rates applied between origins and destinations by way of direct routes. HELD: That such lower rates, because unrestricted as to routing, were applicable also by way of the indirect route through Minneapolis, except where tariffs provided for an additional charge on shipments moving beyond that point. Reparation awarded. Delmar Co. v. G. N., 120 I. C. C. 530.

(3m) Sixth-class rate applicable on "Cranes or Derricks * * *" and charged on girders constituting part of an electric crane, loaded on two cars because of their length, and billed as "girders for overhead electric crane," or "overhead electric crane girders," found illegal. Governing classification provided for application of the "Special Iron" rate on "Iron or Steel Girders, n. o. i. b. n." The competent facts of record establishing that these shipments were stripped of all attachments or fixtures, for purposes of transportation, they were steel girders entitled to special iron rating. Reparation awarded. Knight-Luttrell Iron Co. v. S. A. L., 120 I. C. C. 580.

(3n) Street-car bodies generally used by street-railway companies in construction and repair work were assessed class A rate applicable on "Car Bodies:

Bodies for Cinder, Dump, Furnace * * * Push or Slag cars." Contemporaneously a lower commodity rate applied on "Cars and Car Bodies, Street, with or without motor attachments." Upon contention that term "street car" means a passenger street car, whereas type of car body here in issue was used for carrying sand, gravel, etc., and therefore class rate was properly assessed, HELD: Tariff did not restrict application of the commodity rate to passenger cars. Wording "Cars and Car Bodies, Street," is general and must be construed to apply to other types of street-railway cars and car bodies such as freight or work car, as well as to passenger type. Reparation awarded. Market Street Ry. Co. v. S. P., 120 I. C. C. 654.

(3o) Rate on "handles, wooden, n. o. i. b. n., in the rough, loose or in packages," found to have been legally assessed on shipments of rough, lathe-turned wooden handles, shipped loose, in bundles, without covering. Complainant contended for application of lumber rate under a commodity description "wooden billets, blocks, bolts or strips, sawed or split, rough, unpainted," contending that commodity shipped was "billets, green, in the rough, sawed or hewn, but not to shape of finished article." It also showed that the material must be subjected to further processing before constituting a finished article. Commodity in question, however, is not a billet, as defined in a bulletin of the U. S. Department of Agriculture, or by the commission in its report in 62 I. C. C. 701. Cronk & Carrier Mfg Co. v. G., M. & N., 120 I. C. C. 663.

(3p) Fifth-class rates were assessed on shipments of calcium carbide. Upon contention of complainant that as a lower commodity rate carried under the heading of "lime (calcium)," in the classification was not specifically confined by tariff to a particular kind of lime, it is applicable to all classes of lime or lime products, including calcium carbide. HELD: The term "lime" has a well understood meaning in commercial transactions, and that commodity is usually classified commercially as chemical, building, and agricultural lime, dependent upon the calcium content. Calcium carbide is not known commercially as lime, and only by a strained interpretation of the tariff could commodity rate on lime be applied thereto. Charges assessed found applicable. Kansas City Oxygen Gas Co. v. C., B. & Q., 120 I. C. C. 715.

(3q) Complainant alleged that overcharges were collected on a car of secondhand or old wire rope, in reels or in a coil, shipped May 29, 1918 from Globe, Ariz., to Portland, Ore. It is rated fifth class, shipment moving A. E. to Bowie, Ariz., and S. P. beyond, charged fifth class of 40c to Bowie and $1.18 to San Francisco and 20c beyond. Complainant contends for combination of 80.5c, composed of 60c applicable on junk, consisting of OLD ROPE from Globe to San Francisco and 20.5c beyond on rope, scrap wire. HELD, applicable rate was 80c, overcharges to be refunded. Zimmerman Wells Brown Co. v. Director General, 122 I. C. C. 199.

(3r) Complainant attacked rates charged on black plate iron, carloads, subsequent to Jan. 31, 1922 from Alabama, Indiana, Illinois, Kentucky, Missouri, Pennsylvania, Virginia, West Virginia and other interstate points to Houston, Tex., as inapplicable. The question presented for determination is whether complainants commodity falls within the commodity description "iron or steel plate" as claimed by complainant or the description "sheet iron or steel" under which charges were assessed. When carriers desire to distinguish between plate and sheet iron according to gauge they do so by tariff, but there appears to be no uniform or recognized distinction. Much confusion appears to exist in this respect not only to the commercial world but also as between shippers and carriers. It is apparent that no hard and fast rule has been set or used in distinguishing sheet iron from plate iron. It appears that while there is no uniform distinction made between the two articles, nevertheless by custom of the trade there is a distinction dependent upon the gauge, or thickness of the article. Tariffs of various carriers make the distinction anywhere from 7 to 20 gauge. The tariffs in the instant case do not make a distinction either by gauge or otherwise, and are defective in this respect. While it is difficult to determine where the exact line is drawn between the two products by custom of the trade, the highest gauge shown of record for plate iron or steel is 20, and it is clear that iron or steel of a gauge 26 and lighter falls within the designation sheet iron or steel. Charges assessed were applicable. The record contains little of probative value bearing upon the reasonableness of the rates attacked. HELD, rates attacked applicable and not unreasonable,

complaint dismissed. Davis George Mfg. Co. v. A. G. S. R. R., 123 I. C. C. 10.

(3s) Complainant attacked rate charged on three cars of potatoes shipped in Oct. 1921 from Whitehall and Pablo, Mont., to New Orleans, La., as unreasonable, unduly prejudicial and in violation of the fourth section. Shipments delivered to N. P. unrouted, the Pablo and one from Whitehall moved N. P. to St. Paul, Minn. M. & St. L. to Albia, Ia., Wabash to St. Louis, Mo., and L. & N. beyond. The other Whitehall shipment moving N. P. to St. Paul, C. G. W. to Des Moines, Ia., Wabash to St. Louis and L. & N. beyond. Applicable rates were $1.215 composed of 58.5 and 63c, to and beyond Omaha, Neb., under authority of rule 5b. Effective Oct. 6, 1922 the $1.10 rate was established on this traffic. HELD, shipment overcharged, reparation awarded, rate attacked not unreasonable or unduly prejudicial. Kohlman Bros. v. L. & N. R. R., 123 I. C. C. 56.

(3t) Complainant attacked combination charged on two cars of bulk sawdust shipped on Dec. 30, 1919 and Jan. 2, 1920 from Danbury, Wis., to Omaha, Neb., as unreasonable and inapplicable. Shipments moved Soo Line, C. St. P. M. & O. and C. & N. W., charged 5.5c to Minnesota Transfer Minn., and 13c beyond. The fact remains that although the base rate of 13c from St. Paul to Omaha is shown in section 2 of the tariff Danbury is not shown in the alphabetical list of stations therein, and it would appear that the rate of 18c from Danbury to Omaha was not applicable. HELD, applicable rate was 18.5c overcharge on one shipment to be refunded, complaint dismissed. American Smelting & Refining Co. v. Director General, 123 I. C. C. 136.

(3u) Complainant alleged that rates charged on nine cars of various iron and steel articles, billed as scrap iron, shipped from Little Rock, Ark., to Kansas City, Mo., in Sept. and Oct. 1922 were unreasonable and inapplicable. Charged fifth class rate of 83c, there being contemporaneously a rate of 37.5c on scrap iron or steel. Upon the facts as developed of record, the shipments consisted of scrap iron or steel and applicable rate was 37.5c. HELD, applicable rate was 37.5c. reparation awarded. Consolidated Metals Corp. v. M. P. R. R., 123 I. C. C. 139.

(3v) While rates predicated upon the use to be made of a commodity are unlawful because of the resulting discrimination, nevertheless such rates, while in effect, are the legally applicable rates on the particular commodity when the conditions of the tariffs publishing such rates have been fully complied with. Harlem & Morrisiana Transp. Line v. N. H. & H. H. R. R., 123 I. C. C. 480, 484.

(3w) Complainant attacked sixth class rate charged on lumber carloads shipped Jan. 11 and 12, 1924 from Burks Falls, Ont., to Pontiac, Mich., as inapplicable and unreasonable. Charged sixth class 41.5c. Contemporaneously there was a joint commodity rate of 33c applicable from Burks Falls to Owosso, Mich. Pontiac is intermediate to Owosso over the route of movement. HELD, applicable rate was 33c, overcharge to be refunded, applicable rate not unreasonable. Strable Lumber & Salt Co. v. C. N. Ry., 123 I. C. C. 585.

(3x) Complainant attacked commodity rate of 24.5c charged on carloads of lumber in pieces not exceeding 102 inches in length, shipped from Angora, Minn., to Chicago Heights, Ill., between June and November 1923 as inapplicable and unreasonable and unduly prejudical. Angora is on the D. W. & P., 588 miles from Chicago Heights. The rate of 23c was published in C. N. I. C. C. W. 116. Effective Feb. 1, 1923 a rate of 24.5c from Angora to Chicago Heights was established in Boyds I. C. C. A-1360. That tariff specifically stated that the C. N. tariff was canceled, but no supplement to the latter tariff was issued. Rule 8 E of Tariff circular 18 A provides that if a tariff is canceled by the issuance of a similar tariff to take its place, cancellation notice must not be given by supplement, but by notice printed in new tariff. The rate from Tower, Minn., 583 miles was and is 22c. This latter rate has since been published from Angora. HELD, 24.5c rate applicable between June and Nov. 1923, not unreasonable or unduly prejudical, and present rate of 22c, not unreasonable or unduly prejudicial, complaint dismissed. Chicago Heights Mfrs. Assn. v B. & O. C. T. R. R., 123 I. C. C. 636.

(3y) Complainant alleged that commodity rates charged on gravel, in carloads, from Gravel Siding, Miss., to Arkansas since Sept. 8, 1924 have been inapplicable and unreasonable. Gravel Siding is a local station on the Southern 118 miles east of Memphis, Tenn. Rates charged were combination on Memphis, the tariff to Memphis referring to the

combination rule, the tariff from Memphis not referring to it. HELD, rates charged inapplicable and rates are the combination on Memphis subject to the combination rule, reparation awarded. Allen Gravel Co. v. C. R. I. & P. Ry., 123 I. C. C. 650.

(3z) Fifth-class rate assessed on granite monuments and parts thereof under classification description "Granite * * * carved, lettered, polished or traced," found applicable. Governing classification carried no rating on monuments and while a lower commodity rate contemporaneously applied on polished granite, tariff item naming this rate specifically excluded monuments or parts. Accordingly, such lower commodity rate could not be applied on monuments, but under analogy rule carried in the classification, articles here shipped may be regarded from a classification standpoint as polished granite. Kassebaum & Son v. N. Y., N. H. & H., 122 I. C. C. 59.

(4a) First-class rating on "Dry goods: braid, n. o. i. b. n., cotton or other than cotton" applied on round braided twine, found to have been legally assessed. Contemporaneously lower third-class rating applied on "Twine, n. o. i. b. n.," While this particular article may not have been used for braid, it is made of cotton on a braiding machine, could be used as a cheap braid, and clearly falls within the generic group of woven or braided trimmings. It does not fall within the correct description of twine described in Standard Dictionary as "A string of some fibre, composed of two or more threads or strands twisted together." Fall River Chamber of Commerce v. B. & O., 122 I. C. C. 100.

(4b) Fifth-class rate was assessed on secondhand wire rope. Contemporaneously a lower rate applied on "junk, consisting of * * * Old Rope." Upon contention that rope shipped was of more value than ordinary junk, was intended to be used further, and that rate assessed was therefore applicable, HELD: Item covered old rope without restriction. It apparently was not contemplated that articles included in the item could not be put to further use as such articles as old tierces and barrels are listed. If carriers intended to limit application of rates, they should have done so by proper tariff provision. Moreover, in 88 I. C. C. 217, it was held that old rails were entitled to rate under heading "Scrap Iron and Scrap Steel," although they were to be further used. Reparation awarded. Zimmerman-Wells-Brown Co. v. Director General, 122 I. C. C. 199.

(4c) Class rates were assessed on pneumatic rubber tires. Tariff carried a lower commodity rate item under caption "Agricultural Implements and Parts Thereof," which referred to articles shown in a separate item under head of "Vehicles (except Automobiles, * * *) and parts thereof: Tires, Rubber, pneumatic." Upon contention that commodity rate was applicable because pneumatic tires are specifically named in tariff item and that item is made a part of commodity rate item by reference, HELD: Contention overlooks fact that vehicles and parts are restricted by caption of the rate item to agricultural implements and parts thereof. The commodity shipped not being shown to have been part of an agricultural implement or of any vehicle not excepted; and the tariff under consideration clearly excluding application of commodity rate on automobile parts, such as pneumatic rubber tires, the class rates charged were legally applicable. Federal Rubber Co. v. C. & N. W., 122 I. C. C. 331.

(4d) Fourth-class rate was assessed on fresh berries preserved in sugar, in barrels, under tariff item: "Fruit, Fresh: Berries, n. o. i. b. n.," with foot note "Rating applies on Fresh berries in water or in their own juice or sugared for preservation during transit." Contemporaneously a lower commodity rate applied on "fruit, fresh." Upon contention that placing of rating applicable on sugared berries in the classification under main heading of fresh fruits indicated that carriers regarded sugared berries as fresh fruits, and commodity rates should, therefore, have been assessed, HELD: Contention is without merit. Sugared berries are not fresh fruits as they can be kept in ice storage for a year, and often remain in a solid frozen mass for several days after barrels in which they are shipped are removed. Applicable rates were therefore assessed. North Ontario Packing Co. v. O. W. R. R. & Nav. Co., 122 I. C. C. 360, 361, 362.

(4e) Combination rates assessed on shipments of structural iron and steel, from St. Louis, Mo., Chicago, Ill., and Bethlehem, Pa., routed by shipper for fabrication in transit at Muskogee, Okla., and reforwarded to Casper, Illco, and Salt Creek, Wyo., found applicable. While contemporaneously lower joint rates were

in effect to Great Falls, Mont., and Spokane, Wash., they were restricted so as not to apply to destinations named, and lower joint rates in effect to the Wyoming points were not applicable via Muskogee. Complainants routed shipments over extremely circuitous routes involving an out-of-line haul of at least 800 miles. Had they been forwarded over direct routes, lower rates could have been secured and wasteful transportation avoided. Tulsa Rig, Reel & Mfg. Co. v. M.-K.-T., 122 I. C. C. 405.

(4f) Combination rates assessed on structural iron and steel from Indiana Harbor, Ind., to Casper, Wyo., fabricated in transit at Muskogee, Okla., found overcharged. Contemporaneously a lower joint rate was in effect from Chicago to same destination. Rates from Indiana Harbor are same as rates from Chicago and transit tariff provided for application of joint rates from points of origin to destinations wherever applicable via the transit point. Refund of overcharges directed. Tulsa Rig, Reel & Mfg. Co. v. M.-K.-T., 122 I. C. C. 405, 406.

(4g) Shipments billed as "cottonseed-hull fiber shavings" were upon inspection found to consist of "cotton linters," and charges on latter commodity were collected. Neither published tariffs nor classification defined "hull fiber or shavings" or "linters." Upon complainant's contention that shipments consisted of hull fiber or shavings, HELD: Where tariffs merely provide rates on linters and hull fiber or shavings without defining either, determination of applicable rate is a question of fact. See 77 I. C. C. 727. Here, samples of commodity shipped were entirely free from particles of the hull, which is one of the chief characteristics of cottonseed-hull fiber or shavings, and were somewhat light in color, whereas hull fiber or shavings are usually dark. Therefore, shipments consisted of linters and applicable rates were assessed. Fraser v. A. C. L., 122 I. C. C. 520.

(4h) Circulars issued by inspection bureaus to inspectors for purpose of assisting them in determining proper ratings to be applied, not being incorporated in tariffs or on file with commission, found to have no legal status or effect in so far as they might be used in any manner to change rates applicable on a particular commodity or commodities. Fraser v. A. C. L., 122 I. C. C. 520, 523.

(4i) Invoices alone do not satisfactorily establish the character of a commodity shipped, when that is in issue, or determine the rate applicable, as the inherent character of an article is not changed or affected by manner in which it is invoiced. Concrete evidence, however, such as samples of the shipments are helpful. Fraser v. A. C. L., 122 I. C. C. 520, 522, 524.

(4j) The commission has no special qualifications as an official body to determine the character of commodities from samples. However, where a violation of section 6 is alleged, it has concurrent jurisdiction with the courts and mode of proof does not differ in essence from that in court. Usual method of proving the character of a commodity or article is to introduce the commodity or article itself, or an agreed sample thereof, and, where the decision involves an intricate analysis, to adduce competent evidence by expert witnesses. Fraser v. A. C. L., 122 I. C. C. 520, 525.

(4k) Evidence which goes to the question of unreasonableness of rates can not affect interpretation of tariffs in a proceeding involving legality of rates under section 6 of the act. Fraser v. A. C. L., 122 I. C. C. 520, 526.

(4l) Rates applicable on septic tanks assessed on shipments described as clay sewer pipe and sewer-pipe fittings, found applicable and not unreasonable. Carrier showed that commodities involved were in fact material for construction of individual septic tanks; that complainant's catalogue describes them as such and also shows tank to be patented; and that application of various shippers for establishment of specific classification entries for septic tanks, both clay and concrete, is evidence that term "septic tank" is an appropriate description. Moreover, in 4 I. C. C. 41, the commission stated that manufacturer's description of an article for selling purposes described it for transportation, and carriers may accept such description for classification and rate purposes and are not required to analyze the freight to ascertain whether it is in fact inferior to description or public representation in order to give it a lower rate corresponding to actual value. Southern Sewer Pipe Works v. L. & N., 122 I. C. C. 721.

(4m) Charges were assessed on commodities variously described as tin-mill black plate, or black sheet iron or sheet iron, under tariff item "Paving and Roof-

ing Material: Roofing and Sheet Iron or Steel." Complainant contended for lower rate applicable on "Iron and Steel Articles of: Iron or steel plate." HELD: While governing tariff does not make a distinction either by gauge or otherwise, in 77 I. C. C. 473, separate commodity descriptions were provided for plate and sheet iron, and in 77 I. C. C. 311, it was pointed out that mills at Pittsburg commercially recognize plates as 16 gauge or lower, and sheets as 17 gauge or higher. The highest gauge shown of record for plate iron or steel is 20. As commodity involved ran from 28 to 32 gauge, it is clear that it falls within designation sheet iron or steel and charges assessed were therefore applicable. Davis George Mfg. Co. v. A. G. S., 123 I. C. C. 10.

(4n) Rate on fresh and frozen fish, charged on shipments of "bait fish" found not unreasonable or otherwise unlawful. Applicable tariffs did not name species of fish entitled to fish-bait rates but under a verbal agreement between carriers and shipper certain varieties when offered as such were transported at fish-bait rates. Such an agreement, however, is of no effect in determining applicable rates since not published in tariffs on file with the commission. While rates predicated upon use are unlawful, nevertheless such rates, while in effect, are legally applicable when tariff conditions are fully complied with. Here the fish shipped as bait were intended and sold for human consumption, whereas fish-bait rates were legally applicable only on fish shown to a reasonable degree of certainty to have been or to be used for that purpose. Harlem & Morrisiana Transp. Line v. N. Y., N. H. & H., 123 I. C. C. 480.

(4o) Rates on anthracite coal from Lehigh, Schuylkill, and Wyoming regions in Pennsylvania, to complainant's siding within corporate limits of Providence, R. I., found inapplicable. Charges were collected based on rate to Auburn, R. I., a point intermediate to Providence. However, as tariffs did not define the switching limits of Providence or indicate that the Auburn rate applied on shipments delivered on complainant's siding, the logical interpretation of tariffs was that Providence rate applied to all points within corporate limits of that city and was therefore applicable to complainant's shipments. See 63 I. C. C. 392; 73 I. C. C. 143. Refund of overcharges directed. City Coal Co. v. N. Y., N. H. & H., 123 I. C. C. 609.

(4p) Complainant alleged that the charges collected on a car of hay, shipped Nov. 6, 1922 from Manhattan, Kas., to Birmingham, Ala., and reconsigned thence to Jasper, Ala., were unjustly discriminatory. Shipment moved UP to Kansas City, and reconsigned to Birmingham, and moved Burlington to East St. Louis, Ill., thence IC through Jasper to Birmingham. Consignee, after inspection, refused the shipment and complainants reconsigned it to Jasper. From Birmingham the car moved over the Southern to Parrish, Ala., and NA beyond. Charged combination rate of 83.5c, composed of a rate of 36.5c to East St. Louis, 33c to Birmingham and 14c to Jasper. Defendants admit that the factor of 37.5c to Memphis should have been employed, but state that the class D rate of 24c from Memphis to Birmingham plus the local rate of 14c to Jasper made the applicable combination 75.5c. HELD, shipment overcharged based on legal rate of 75.5c reparation awarded. Arnold Co. v. S. Ry., 126 I. C. C. 141.

(4q) In Russell Grain Co. v. A. G. S. R. R., 113 I. C. C. 699, division 4 found that the combinations of rates to and from the Ohio river crossings charged on numerous carloads of grain and grain products shipped in 1924 from Colorado, Kansas and Nebraska on the Burlington to destinations in Tennessee, Georgia and Alabama were applicable and dismissed the complaint. If complainants contention as to the application of the intermediate rule is also correct, the Greenwood rates would apply to any point on lines parties to tariff. It will be noted that all of the destinations to which specific domestic rates are provided are Ohio river crossings or in Mississippi valley territory, and that where available routes specify junction points none of the junction points are east of the Mississippi valley territory. It will also be noted that where it was intended to leave the routing open beyond certain junctions it was done by adding "and lines beyond". HELD, construction contended for unreasonable and not warranted by the provisions of the tariff, complaint dismissed. Russell Grain Co. v. A. G. S. R. R., 126 I. C. C. 405.

(4r) Shipment of hay from Manhattan, Kans., to Birmingham, Ala., was upon refusal at that point reconsigned to Jasper, Ala., a point intermediate to Birmingham. Combination rate to Birmingham plus local rate back to Jasper was assessed. Contemporaneously a lower combination rate unrestricted as to

routing applied via Memphis to Jasper. HELD: Contention that Memphis rate was applicable through Jasper to Birmingham and back to Jasper is founded upon an unreasonable construction of the tariff. Manifestly a rate from one point to another does not contemplate movement beyond destination and back again. Combination rate based on Birmingham was, therefore, applicable. Arnold & Co. v. S. Ry., 126 I. C. C. 141.

(4s) Class rates were assessed on steam road rollers under classification item "Grading and road-making implements: Rollers, Road: Self-propelling or other than self-propelling." Contemporaneously lower class ratings applied on "Machinery and machines." Upon carrier's contention that a steam road roller is not a machine; that as classification makes no distinction between self-propelling and non-self propelling road rollers, mere addition of a steam engine to provide tractive power cannot transform a road roller into a machine; and that since classification lists road rollers under a specific heading, question of applicability of term "machinery and machines" is removed, HELD: Similar contentions were advanced in 115 I. C. C. 439 in which it was found that "machinery and machines" included steam rollers, and record in instant case does not warrant a different conclusion. Refund of overcharges directed. Buffalo-Springfield Roller Co., v. D., T. & I. 126 I. C. C. 177.

(4t) Complainant sought rates on shipments of iron and steel articles, applicable on "scraps and pieces of iron and steel which have value solely for remelting purposes" upon contention that articles have no commercial value, there was no demand for them in their original form, and they were actually remelted. HELD: To come within description contended for articles must be reduced to fragments, scraps, or pieces so as to render them useless for any purpose other than remelting, for it is the nature of articles shipped, not price at which it is sold, use to which it is put, or commercial demand, that determines whether rate on scrap iron and steel applies. See 98 I. C. C. 551 and other cited cases. Here evidence indicated that articles were transported in their original form, and were described individually in bills of lading. Charges collected on that basis were therefore applicable, not unreasonable or otherwise unlawful. Hymen-Michaels Co. v. N. & W. 126 I. C. C. 195.

(4u) Shipments of nitrate of soda from New Orleans, were billed to Edwards, Ill., and moved by carrier to complainant's plant at Olin, Ill., a point 6 miles farther distant without further orders. At time shipments moved no import class or commodity rates were maintained to Olin and import commodity rates applicable to Edwards were assessed. HELD: As Olin is located in the Peoria, Ill., group to which lower rates on domestic shipments were contemporaneously maintained, and as such rates apply in absence of specific import rates, shipments were overcharged. Refund of overcharges directed. Egyptian Powder Co. v. I. C., 126 I. C. C. 293, 301, 302.

(4v) Grain from west-bank Mississippi River points and from Illinois, mixed into feed at Chicago, and product forwarded to c. f. a. destinations was assessed grain rates to Chicago and proportional or reshipping grain-products rates beyond. Tariff provided that when shipment originated at point from which no joint rate to final destination applied via the transit point, rates would be the reshipping or proportional rates, except when commodity consisted of grain, in which event rate on out-bound shipment would be that applicable to grain products. Here, through grain-products rates but no through by-products rates were published. HELD: Words "no joint through rate" refer to grain products. If carriers intended that the rule refer to through grain rates, tariff should have been so worded. Accordingly through one-factor rates on grain products from origins to final destinations, in effect when the grain originated, were applicable. Refund of overcharges directed. Arcady Farms Milling Co. v. A., C. & Y., 126 I. C. C. 449.

(4w) First-class rate provided for paper goods, n. o. i. b. n., any quantity, was assessed on cardboard trouser presses. Upon contention that lower sixth-class rate applicable on fiber-board boxes, k. d., flat, printed, is by analogy applicable on trouser presses since material, appearance, process of manufacture, value, and other characteristics of the two articles are the same, only difference being in uses to which each is put. HELD: Fact that two articles may resemble each other in these respects is not sufficient to make them the same. Rating on boxes applies definitely on that

article, and as there was no specific rating for trouser presses, it follows that rate applicable was rate on paper goods, n. o. i. b. n. Chicago Carton Co. v. N. Y. C., 126 I. C. C. 457.

(4x) Charges on grapes from Reedley, Calif., to Croxton., N. J., reconsigned to Scranton, Pa., assessed on basis of through rate to Croxton plus second-class rate to Scranton, FOUND inapplicable. The through rate applied both to Scranton and Croxton and governing tariff provided that to points on direct route reconsignment would be made at through rate plus reconsignment charge, except on shipments involving a back haul, in which event charges would be computed on a mileage basis, plus reconsignment charge, for back hauls not exceeding 300 miles. Here, movement involved a back haul exceeding 300 miles and class rate was assessed. However, as the through rate was unrestricted as to routing and shipments could have moved via a route involving a back haul less than 300 miles, charges based on mileage over the shorter route should have been assessed. Reparation awarded. California Table Fruit Co. v. A., T. & S. F., 126 I. C. C. 700.

(4y) "Prepared and anthracite briquettes and boulets" in carriers' tariff schedule HELD to include anthracite coal in native form in sizes above pea and briquettes and boulets made from anthracite coal, since "prepared coal" in anthracite coal trade means sizes of coal above pea. New York, N. H. & H. R. Co., v. Salter, (Conn., 1926) 134 Atl. 220.

(4z) Freight tariff HELD to quote rates on sugar in cents per hundred pounds, as shown in sheets devoted wholly to sugar schedule, not in cents per ton of 2,000 pounds, as indicated in rate column at top of sheet containing last of stone schedule and first of sugar schedule, in view of absurdly unreasonable rates if quoted in cents per ton. Gunnison Sugar Co. v. Public Utilities Commission of Utah, (Utah 1927) 256 Pac. 790.

(5a) Shipment of denatured alcohol from Philadelphia to Providence, R. I., was held at latter point and subsequently taken to complainant's private siding within corporate limits of Providence. Charges were collected on basis of rate to Providence plus rate to Auburn, a point intermediate to and adjoining Providence. Tariff publishing rate to Providence did not define switching districts, but provided that the rate applied to private sidings connected with carriers at which traffic is usually delivered. Upon contention that complainant's siding was within Auburn switching limits and that rate to Providence was applicable, HELD: Following 73 I. C. C. 143, in which a similar shipment was involved, rate to Providence included rate to complainant's private siding in absence of tariff provisions showing what delivery points the rate actually included. Reparation awarded. Atlantic Refining Co. v. P. R. R., 128 I. C. C. 43.

(5b) On shipments of "cold-pack" berries and cherries, second-class rate applicable on "Fresh fruit n. o. i. b. n." was assessed on cherries, and third-class rate applicable on "Fresh fruit: Berries, n. o. i. b. n." was assessed on berries. Complainant contended that, as the fruit was preserved by freezing, fifth-class rate on "Fruits, other than dried, evaporated or fresh: Canned or Preserved in juice or syrup, or in liquid, other than brine or alcoholic liquor * * *," was applicable. HELD: The term "preserved" as applied to fruit contemplates only fruit that has been treated in such a manner that it will keep for an indefinite but substantial length of time at ordinary temperatures, while cold-pack fruit is simply fresh fruit, the deterioration of which has been arrested by freezing and refrigeration, and rates charged were applicable. Lutz & Schramm Co. v. P. & L. E., 128 I. C. C. 521.

(5c) Complainant attacked fifth class rates charged on eight carloads of angles, channels, and beams between Jan. 16 and Feb. 15, 1924 from Indiana Harbor, Ind., to Indianapolis, Ind., as unreasonable, illegal and in violation of section four. Shipments moved as routed over I. H. B., C. & O. to Cottage Grove, Ind., 76 miles east of Indianapolis and C. I. & W. beyond, 275 miles, rate charged 25c. Contemporaneously there was in effect a rate to Raven, Ill., a point on the C. I. & W. about 80 miles west of Indianapolis, commodity rates of 15.5c on angles and 17.5c on beams and channels, which, complainant contended were applicable under an intermediate clause. No routing was provided from Indiana Harbor in connection with the C. & O. as Raven is not located on the line of this carrier, and the tariff specifically provided that the rates named therein would apply only when routing

instructions were provided in the tariff. HELD, rate charged applicable and not unreasonable or otherwise unlawful, complaint dismissed. Inland Steel Co. v. B. & O., 128 I. C. C. 551.

(5d) Complainant attacked charges collected on one car of caterpillar tractors and parts shipped on May 10, 1923 from Stockton, Calif., and delivered on May 30, 1923 at Dallas, Tex., were in violation of section 1, 4 and 6. The issue of unreasonableness is barred by limitation and there is no evidence with respect to the alleged fourth section violation. The sole question to be determined is whether the charges assessed were applicable. Shipment moved S. P. to San Antonio, Tex., where it was reconsigned to Dallas over the G. H. & S. A. and H. & T. C., with directions to stop and partly unload at Houston, Tex., Charged $2.935 to Dallas plus $2.25 reconsignment and $6.30 stop over at Houston. The tariff authorized reconsignment at San Antonio but there was no authority for stop over at Houston and the movement therefrom must be treated as a reshipment. Applicable charges were based upon rates of $2.145 from Stockton to Houston for the original loading and 69c beyond plus $2.25 reconsignment, overcharge to be refunded, complaint dismissed. Holt Co. of Texas v. S. P. Co., 128 I. C. C. 555.

(5e) Upon contention that minimum class-rate scale is inapplicable because in its publication the publishing agent failed to denote an advance, FOUND: Contention is without merit. See 74 I. C. C. 179, 181. Lynchburg Chamber of Commerce v. B. & O., 128 I. C. C. 557, 558.

(5f) Shipment of wrought-iron scrap from Etowah, Tenn., to Cleves, Ohio, purchased under contract f. o. b. Cincinnati, from L. & N. R. R., then under Federal control, and sold by complainant, f. o. b. Cleves, was assessed the rate Etowah to Cleves. FOUND: As material was purchased from railroad administration on price basis delivered at Cincinnati, charges collected in excess of that named in effective tariff for transportation from Cincinnati to Cleves were assessed in violation of section 6 (7) of the act. Reparation awarded. Hyman-Michaels Co. v. Director General, 128 I. C. C. 689.

(5g) General commodity tariff found applicable on shipments of horses and mules from Sikeston and Oran, Mo., to Memphis, Tenn., moving prior to date of its cancellation, although tariff, by exception, referred specifically to other tariffs for rates from points on carriers' lines in Missouri to Memphis. Contention of carrier that exception prohibited application of general tariff not sustained in view of fact that tariffs referred to failed to provide rates on livestock from and to points in question. Under rule 4 (c) of Tariff Circular 18-A it is permissible for a general commodity tariff to refer to other tariffs in which certain named class or commodity rates may be found, but where, as here, the tariff referred to fails to publish any rate on commodity in question, rate in general commodity tariff remains applicable. Maxwell Sons Commission Co. v. St. L.-S. F., 128 I. C. C. 725.

(5h) Shipments of anthracite coal from Pennsylvania points to Fort Snelling, Minn., moved via St. Paul to Minneapolis, thence to Fort Snelling. Charges were collected on basis of rate to Minneapolis. However, Fort Snelling was not named as a point to which that rate applied, and carriers sought to collect undercharges for local rates from Minneapolis to Fort Snelling. FOUND: While customary route between St. Paul and Minneapolis is via Minnesota Transfer, and shipments moved over that route, they could have moved via Mendota, Minn., over which route Fort Snelling is intermediate to Minneapolis. Since Fort Snelling generally takes Minneapolis rate on coal from various other points, and that rate was subsequently established over route of movement, applicable rate was unreasonable to the extent it exceeded rate to Minneapolis. Waiver of undercharges authorized. Hostler Coal & Lbr. Co. v. P. M., 128 I. C. C. 731.

(5i) Rate on clay cotton bagging from Chickamauga, Ga., to St. Joseph, Mo., found inapplicable. Authority for rate collected was not shown and governing tariff contemporaneously published a lower joint rate between same points. Refund of overcharges directed. Cleveland-Akron Bag Co. v. C. of G., 128 I. C. C. 733.

(5j) Rate on sand from Pacific, Mo., to Fort Smith, Ark., found inapplicable on shipments moving over St. Louis-San Francisco, but applicable on those moving over Missouri Pacific. Tariff carried a c. l. rate applicable over either route and also published a single-line

distance rate applicable between points in Missouri B territory, use of either rate, whichever made lower, being authorized. During a certain period Pacific on the Frisco was included within Missouri B territory, and as distance rate over that line made the lower rate shipments assessed c. l. rate were overcharged. However, as haul over Missouri Pacific was considerably greater than over the Frisco and rate under distance scale exceeded the c. l. rate, it is immaterial whether or not Pacific over that route was in Missouri B territory inasmuch as the c. l. rate being lower was applicable in either event. Reparation awarded. Harding Glass Co. v. M. P., 128 I. C .C. 754.

(5k) Complainant attacked rate charged on scrap iron, carloads, from Jersey City, N. J., to Luzerne, Pa., Oct 26, 1925 as unreasonable, and in violation of section four. Charged $4.50 per long ton. Since the material shipped was not scrap iron, complainants comparisons of scrap iron rates have little value. HELD, applicable rate $4.50 per short ton, undercharges to be collected, applicable rate not unreasonable or otherwise unlawful, complaint dismissed. Cohen & Son v. C. R. R. of N. J., 129 I. C. C. 1.

(5l) The applicability of a rate to a given shipment depends upon whether or not such shipment moved over lines of carriers parties to the tariff naming the rates. In the absence of information as to the route of movement the Commission is unable to determine the question. Milne Lumber Co. v. N. Y. C. R. R., 129 I. C. C. 457, 458.

(5m) Complainant alleged that sixth class rate charged on cottonseed hull fiber or shavings from Jackson, Tenn., to Brooklyn, N. Y., and Jersey City, N. J., were unreasonable and inapplicable. The shippers duplicate bills of lading, presented in evidence, describe the consignments as "cottonseed hull fiber shavings" and in other similar terms of the same descriptive sense and meaning; but an inspection and examination of the carriers caused the inspector to change the billed description to read "cotton linters." At time of shipment a commodity rate of 44.5c applied on cottonseed hull fiber or shavings. and sixth class rate of 94c on cotton linters. In such a case as this the selling price, if properly verified, would be persuasive evidence of the true nature of the property transported. But the proof offered as to selling price should not leave room for doubt. These consignments were all billed to the shippers order, and therefore could not be procured from the delivering carrier until the original bills of lading had been surrendered. These original bills of lading in turn could not be procured by the complainant-consignee until the shippers drafts, supported by the original bills of lading and selling invoices, had been paid and taken up at the bank. The canceled drafts would clearly be the best evidence of payment, and of the amount of the selling price. The record, however, lacks such evidence. Moreover, the selling contract and bills of sale, presented in evidence by complainant are not satisfactorily verified. The Commission has no special qualification as an official body to determine from samples whether a certain shipment consists of linters or shavings. All that it undertakes to say here is that the proof is insufficient to justify application of the cottonseed hull fiber or shavings classification and the lower commodity rate of 44.5c. HELD, sixth class rates charged applicable, complaint dismissed. Eblin & Co. v. N. C. & St. L. Ry., 129 I. C. C. 629.

(5n) Complainant alleged fifth class rates charged on numerous carloads of liquid bleach or peroxide of hydrogen shipped on and after April 1, 1922 from Wallabout Pier No. 2 (Brooklyn), N. Y., to Sunbury, Pa., as unreasonable and inapplicable. Charged fifth class rates of 31.5 and 28.5c in effect prior and subsequent to July 1, 1922. Complainant contended it should have taken the commodity rates of 21c and 19c, minimum 36,000 pounds, on "bleach and bleaching" in effect prior and subsequent to July 1, 1922. The tariff publishing the rates on "bleach and bleaching" neither names the commodities intended to be included within that designation nor except any commodity therefrom. The governing official classification has no item designated "bleach and bleaching" as such. Under the headings "bleaching liquid, n. o. i. b. n.," and "Hydrogen, dioxide of," or "Peroxide of," carload ratings of fifth class are provided. Classification also lists "bleaching powder, n. o. i. b. n." and chloride of lime "bleach or bleaching powder" as taking sixth class. Commodities falling within either of these two descriptions could also be described

as "bleach and bleaching" for which the commodity rates are provided. HELD, shipments consisted of bleach or bleaching and commodity rates of 21c and 19c were applicable, overcharge to be refunded, complaint dismissed. Sunbury Converting Works v. Pennsylvania R. R., 132 I. C. C. 230.

(5o) Complainant alleged rate charged on a carload of yellow pine lumber, shipped August 23, 1923 from Jackson, Ala., to Orangeville, Ill., was inapplicable. Shipment was originally consigned to Cincinnati. It moved Southern to Birmingham, A. G. S. to Chattanooga, thence C. N. O. & T. P. to Cincinnati. There it was reconsigned to Orangeville and was forwarded over the Big Four to Kankakee, Ill., thence I. C., charged 48.5c plus reconsignment charge of $6.30. Contemporaneously there was in effect from Jackson to Orangeville a combination of proportional rates to and beyond Cairo, both of which were subject to the rule for constructing combination rates, which would produce a through rate of 40.5c. Since no joint through rate applied over the route of movement, the applicable rate from Jackson to Orangeville was the lowest combination of intermediate rates via Cincinnati, which, under rule 5b, was combination of proportional rates to and beyond Cairo. There was nothing in the tariffs naming these rates which would have precluded their application on a shipment billed direct from Jackson to Orangeville via Cincinnati over the lines of defendants comprising the route of movement. HELD, rate charged inapplicable, applicable rate was 40.5c, overcharge to be refunded. Brabston v. S. Ry., 132 I. C. C. 705.

(5p) Rate on structural steel from Jersey City, N. J., to, Luzerne, Pa. found not unreasonable or otherwise unlawful. While complainants alleged that material shipped was scrap iron and that as compared with rates on that commodity in same general territory rates assailed were unreasonable and otherwise unlawful, carriers showed that it was originally shipped as structural steel and stored at Jersey City; that material shipped therefrom was of same character, shape, and form as when received at that point; and that it was later used as I beams for mine support. Since to come within tariff description of scrap iron, material must be reduced to fragments or pieces so as to be useless for any purpose other than remelting, material shipped was not scrap iron and comparisons instanced have little value. See 102 I. C. C. 325. Cohen & Son v. C. R. R. Co. of N. J., 129 I. C. C. 1.

(5q) One factor of combination rate on a mixed carload of sawmill machinery and a power boiler, shipped in a car 41 feet 4 inches in length, was published as "$61 per car as per classification." Governing classification rated both sawmill machinery and power boilers sixth class, minimum 24,000 pounds, subject to rule 34. Exceptions to classification, however, provided class N rating to apply on "Boilers, steam power * * * in straight or mixed carloads, with machinery, per car 20,000, excess in proportion," for cars 36 feet 6 inches, or under, larger cars being subject to rule 34. Complainant's contention that the chinery, and machines per car 20,000, excess in proportion," for cars 36 feet 6 inches, or under, larger cars being subject to rule 34. Complainant's contention that the rate of $61 is applicable to 20,000-pound units of freight with any fractional excess in proportion, substained, and charges collected found inapplicable to extent they exceeded charges computed by multiplying the rate per car by the weight of shipment and dividing by 20,000 units. Reparation awarded. West Florida Lbr. Co. v. G. F. & A., 129 I. C. C. 62.

(5r) One factor of combination rate on a carload of sawmill machinery, shipped in a car 41 feet 4 inches in length, was published as "$61 per car as per classification." Governing classification rated sawmill machinery sixth class, minimum 24,000 pounds, subject to rule 34, and exceptions thereto provided class N rating on "Machines and Machinery, c. l., * * * minimum weight 20,000 pounds," for cars 36 feet 6 inches, or under, larger cas being subject to rule 34. Upon contention by carriers that under ule 34 the rate of $61 should be regarded as applicable to a unit of 23,400, the minimum weight for a car of size used, and that excess above such weight should be computed proportionately, HELD: The portion of rule 34 on which carriers rely fits ordinary situation where rates are applicable to specified units of weight, but has no reasonable application where, as here, the rate stated as a flat charge per car-

load and charges collected were inapplicable. Reparation awarded. West Florida Lbr. Co. v. G., F. & A., 129 I. C. C. 62.

(5s) Shipments billed on cottonseed-hull fiber or shavings, or descriptions of similar import, were inspected in transit, desciption changed to "cotton linters," and rates collected accordingly. Upon contention that rates assessed were inapplicable and unduly prejudicial to extent they exceeded rate on shavings, FOUND: While various methods for determining difference between commodities were presented they were not published as tariffs nor on file with commission and are not controlling. Neither were commodities defined in governing tariffs or classification. In 107 I. C. C. 161, shipments claimed by carriers to be linters were found to be entitled to rates on shavings by a showing that they were sold at prices lower than market price of average linters. However, a like showing has not been made here, and since no burden rests upon carrier for determination of question involved and complainant has not sustained its burden of proof, rates charged were applicable and not unduly prejudicial. Glarner & Co. v. S. Ry., 129 I. C. C. 75.

(5t) Coal from southern Illinois Indiana, and Kentucky to points within Chicago switching district were assessed local rates to Chicago plus arbitraries beyond. Contemporaneously lower proportional rates were in effect to Chicago but were restricted to apply only to points beyond the switching district via Chicago and to points on certain lines within the district to which no through rates were published. While sessed were not through rates and lower complainants contend that rates asurge that since both locals and arbiproportionals were applicable, carriers traries were concurred in by all participating carriers, they were through as well as joint rates. FOUND. While doubt as to meaning of tariff provisions is ordinarily construed against the maker, such doubt must be reasonable after consderation of pertinent tariff provisions. Here, it is reasonably apparent that local rates plus arbitraries were through rates within meaning of restrictive tariff provisions and that rates assessed were applicable. Chicago Coal Merchants Asso. v. N. Y. C., 129 I. C. C. 203.

(5u) Rates on scrap brass and brass ingots from Pittsburgh, Pa., to Jersey City, N. J., and Baltimore, Md., found inapplicable. Lower rates were contemporaneously maintained from Zanesville, Ohio, subject to a clause which authorized their application from Pittsburgh as an intermediate point. Refund of overcharges directed. S. Hausman & Sons Co. v. P. R. R., 129 I. C. C. 233.

(5v) Turned last blocks found not to be entitled to lumber rates nor to fall within tariff description "Billets, blocks or strips, sawed or split, rough, unpainted." Jackson v. M. C., 129 I. C. C. 235, 236.

(5w) Combination rate on copper wire from Black Eagle, Mont., to Northport and Lexington, Nebr., and Topeka, Kans., found applicable. Lower joint rates sought were specifically restricted to routes via "Western Gateways" 9 and 10 "except as otherwise specifically provided" and shipper's routing instructions precluded use of these routes over which joint rate applied. Sinclair Pipe Line Co. v. G. N. 129 I. C. C. 251.

(5x) Shipment of oil-well machinery, tendered unrouted, moved from Mobile, Ala., to Tulsa, Okla., over Mobile & Ohio, Midland Valley delivery. Contemporaneously a lower rate applied over M. & O., M.-K.-T. delivery, to Chetopa and Coffeyville, Kans., points midway on the right and left sides of a triangle formed by the M.-K.-T., with Parsons, Kans., at the apex and Tulsa lying intermediate to Osage and Muskogee, Okla., on base line. Tariff carried an intermediate clause providing for rates to unnamed directly intermediate points. Upon contention that as Tulsa is unnamed in tariff and is intermediate to Coffeyville via Parsons and Chetopa, shipment was misrouted and charges collected inapplicable, FOUND: Tariff is not described as applying from or to Oklahoma points and since only points directly between Coffeyville and Chetopa are those between Coffeyville and Parsons, and Parsons and Chetopa, shipment was not misrouted nor rates collected inapplicable. Sinclair Oil & Gas Co. v. M. & O., 129 I. C. C. 281.

(5y) Shipments billed as cottonseed-hull fiber or shavings were inspected in transit and description changed to "cot-

ton linters," rates being assessed accordingly. In support of its contention that commodity shipped was entitled to lower rate on shavings, complainant introduced samples purporting to have been taken from cars at time of inspection. FOUND: Classification and tariffs provided certain ratings and rates on both linters and fiber or shavings but did not describe either commodity. However, as samples taken from cars appear on the whole to be of higher grade than those introduced as cottonseed-hull fiber or shavings and average price received for shipments was considerably above that quoted for lowest grade fiber or shavings, record does not support finding that shipments were of so low grade as to be classed as shavings and rates collected were applicable. Virginia Cellulose Co. v. N. & W., 129 I. C. C. 297.

(5z) L. c. l. rate collected on steam condenser from Philadelphia, Pa., to Santa Fe, N. Mex., found inapplicable. A lower rate was contemporaneously in effect and tariff authority for rate collected was not shown. Refund of overcharges directed. Mirabel Motor Co. v. M. C., 129 I. C. C. 411.

(6a) Combination rates on l. c. l. shipments from Hoboken, N. J., on Hoboken Manufacturers' R. R., to Norfolk and Richmond, Va., found inapplicable. Contemporaneously Lackawanna published lower joint class rates from New York Lighterage Station, a point within the free-lighterage limits of New York Harbor, subject to a terminal tariff which provided that rates from points in free-lighterage limits would apply on shipments from Hoboken via Hboken Manufacturers' except where where specific rates from Hoboken were in effect. No specific rates covering traffic were published from Hoboken and where there is doubt as to meaning resolved against maker and in favor of of tariff provisions the doubt shuld be shipper. Refund directed. Jewel Tea C. v. D., L. & W., 129 I. C. C. 424.

(6b) On shipments of lumber originating at Woodbury, Ga., consigned to St. Louis, Mo., and reconsigned to Buffalo, N. Y., complainant contended that reconsignment instructions directed that a lower unrestricted rate in effect from origin point to Buffalo be protected. Complainant failed, however, to show route over which shipment moved. FOUND: Applicability of a rate to a given shipment depends upon whether or not such shipment moved over lines of carriers parties to tariff naming the rate, and in absence of such information the commission is unable to determine applicable rates. Milne Lbr. Co. v. N. Y. C., 129 I. C. C. 457.

(6c) Fifth-class rates applicable on iron or steel bars were assessed on rods known as nut flats. Contemporaneously a lower rate applied on "Rods, Bolt, Nail, Rivet, and Wire (iron or steel), unfinished* * *" Upon carrier's contention that latter applies only on articles that have not progressed beyond the billet stage and that description applies to rods only when round in cross section. FOUND: Similar contentions advanced in 102 I. C. C. 355, were not sustained, and in 104 I. C. C. 616, proposal to restrict above description to bolts, rivets, or wire rods only when round in cross section, was not justified. Rates charged were therefore inapplicable, the lower rate on rods being applicable and not unreasonable. Columbus Bolt Works Co. v. P. R. R., 129 I. C. C. 512.

(6d) Shipments of scrap iron from various points, originally consigned to Bethlehem, Pa., but there refused and in a few instances partially unloaded, were subsequently reconsigned to Allentown, Pa. Rates were assessed under tariff rule providing that cars placed for unloading at original billed destination but reforwarded therefrom without being unloaded, to a point outside switching limits, would be subject to published rates to and from reconsignment point plus reconsignment charge. FOUND: In 89 I. C. C. 236, so-called reconsignment charge was found inapplicable on shipments the lading of which was changed in whole or in part at original destination, and in 91 I. C. C. 615, and other cited cases, reconsignment charge provided under a similar rule were found unreasonable. Principles announced in those cases are applicable here. Reparation awarded. Sofranscy Co. v. R. Co., 129 I. C. C. 617.

(6e) Shipments billed as cottonseed-hull fiber shavings or descriptions of similar import were inspected in transit and description changed to "cotton linters," sixth-class rates thereon being col-

lected. In support of its claim for lower commodity rate on shavings, complainant presented in evidence original contract of purchase and sale, original invoices, and duplicate copies of bills of lading, together with paid freight bills, which, with exception of paid freight bills, describe shipments as shavings. Although selling price would be persuasive evidence of true nature of property transported, here evidence in support thereof is no sufficiently verified. While commission is not qualified to determine from samples whether shipment consisted of linters or shavings, genuine samples of the shipments introduced by carriers as evidence, identified by inspector's affidavits and declared by him to be linters, present strong reasons for believing that shipments consisted of linters and that sixth-class rates were not inapplicable. Eblin & Co. v. Co. v. N., C. & St. Ll., 129 I. C. C. 629.

(6f) Combination rates on wrought-iron from Lorain, Ohio, to various Kansas points were assessed on two different bases, the lower combination being based on Jacksonville, Ill. Tariff publishing higher combination provided, in absence of specific rates, a specific manner of constructing combination by addition of basing rates to factor from Lorain to Mississippi River crossing. Under rule 5 (c) of Tariff Circular 18-A, if specific manner of constructing rates ad not been prescribed, the lower combination would have been applicable, but under the circumstances, higher combination was applicable. National Tube Co. v. A., T. & S. F., 129 I. C. C. 693.

(6g) Seattle-Portland factor of combination rates on wooden poles from Washington points to California was described in the governing tariff as a proportional rate but was, nevertheless, an arbitrary. Tariff authorized the application of the combination rule "except as otherwise indicated" and restricted use to "separately established commodity (or class) rate factofs," thus precluding the use of rule in connection with the Seattle-Portland arbitrary. Rates assessed found applicable except that overcharge, not due to inapplicable rate, was assessed on one shipment. Complaint dismissed. National Pole Co. v. G. N., 129 I. C. C. 697.

(6h) Combination rates were collected on automobiles and parts from points in Illinois, Indiana, Michigan, Pennsylvania, Ohio, Missouri, Wisconsin, and Iowa to Klamath Falls, Oreg. Upon contention that lower joint commodity rate contemporaneously published to Reed, Calif., and Modoc Point, Oreg., to which Klamath Falls, is directly intermediate, was applicable because of intermediate clause published in the tariff naming lower rates. FOUND: Intermediate rule applied only when rates were not specifically provided for points directly intermediate to stations to which rates were published. As joint through class rates were published to Klamath Falls, rule has no application and rates collected were applicable. Baldwin Hardware Co. v. Director General, 129 I. C. C. 708.

(6i) Shipments of stock cattle, c. l., moved from New Castle, Tex., to Grand Summit, Kans., under specific commodity rates. Upon contention that a lower joint-line distance rate contemporaneously in effect over another route was applicable. HELD: Lower rate is a joint-line distance rate applicable in the absence of specific commodity rates, and is restricted in its application in Kansas to certain named points. Nor is route claimed shown to be a reasonable, available one for the transportation of livestock. Rate assessed found to be applicable and not unreasonable. Live stock Freight Bureau v. A., T. & S. F., 129 I. C. C. 721.

(6j) Rates charged on cotton fabrics, l. c. l., from North Carolina points to Galveston, Tex., found inapplicable. Governing tariff stated that it was subject to western classification, "Except as otherwise provided," and provided for alternative application of rates in section 2 or 3, whichever were lower. No minimum weight was provided in connection with lower rates under section 3, and rates were there applicable to actual weight of shipments. However, since rule 15 of the western classification provided for assessment of separate loading and unloading charges on l. c. l. freight moving at c. l. rates, and rule 13 required a minimum charge of $15 per car, these rules must be considered in determining rates applicable to various shipments. Refund of overcharges directed on basis indicated. Southern Traffic & Audit Asso. v. I. G. N., 129 I. C. C. 723.

(6k) Carload of peaches from North Mountain, W. Va., originally consigned to Cincinnati, Ohio, but diverted, without routing instructions, to Pittsburgh, was routed by carrier over lowest rates route, via Everson, Pa. Subsequently shipment was reconsigned to Toledo, Ohio, and combination rates to and from Pittsburgh, plus reconsignment charge, were assessed. Lower joint rate from crigin to final destination sought by complainant was restricted, precluding its use via Everson, over which route shipment moved, but defendant had no knowledge that Pittsburgh was not final destination of shipment and can not be charged with misrouting. Rates assessed found applicable and not unreasonable, but reconsignment charge found unreasonable and its discontinuance required. Purse Bros. v. B. & O., 129 I. C. C. 727.

(6l) Alfalfa meal from Colorado to Dyersburg, Tenn., moved onder combination rates via Memphis. Via East St. Louis, factor from that point to Dyersburg accorded transit on alfalfa meal mixed into feed at Dyersburg except where outbound shipment consisted of more than 30 per cent nontransit materials when local rates would apply to entire shipment. No transit was accorded via Memphis. Upon contention that as tariff specified alfalfa meal as a ""transit ingredient," that regardless of how it reached Dyersburg it should not be considered in computing the 30 per cent of nontransit material in ascertaining whether remainder of outbound shipment is entitled to transit privileges. FOUND: Term "Transit ingredient" comprehends only such shipments as may be transited under tariff provisions, and since nontransit material exceeded 30 per cent, meal moving via Memphis was nontransit material. Dyersburg Milling Co. v. Director General, 129 I. C. C. 739.

§19. As Evidence.

(a) An expert familiar with the construction of professional or expert terms employed in a tariff may decipher such terms. W. L. Shepherd Lumber Co. v. Atlantic Coast Line R. Co., (Ala., 1927) 112 So. 323.

TAXES

See Evidence §57½a.

(a) In suit to enjoin collection of tax assessed under Act La. No. 109 of 1921, § 5, on rolling stock of nonresident corporations, evidence including report covering taxes for parishes, but not showing whether taxes assessed by cities, towns and villages under Const. La., 1921, art, 14, §§ 7, 8, 12, were included, HELD not to show that tax exceeded average of local taxes on domiciled corporations. General American Tank Car Corporation v. Day, Sheriff, etc., 46 Sup. Ct. 234.

(b) Tax on rolling stock of nonresident corporations, imposed by Act. La. No. 109 of 121, § 5, under authority of Const. La., 1921, art. 10, § 16, held not violative of article 10, § 1, requiring uniform taxation, and not to impose burden on inetrstate commerce, or deny equal protection of laws, in violation of federal Constitution, where the amount of tax, together with that imposed under Act No. 109 of 1921, § 1, was substantially equivalent to local taxes on corporations domiciled in state. General American Tank Car Corporation v. Day, Sheriff, etc., 46 Sup. Ct. 234.

(c) Right of state to tax articles does not depend on same considerations applicable to federal regulation of transportation rates. Atlantic Coast Line R. Co. v. Standard Oil Co. of Kentucky, 16 Fed. (2d.) 441, 442.

(d) Courts may not revise the system of taxation of states to secure a more just distribution of the burdens. Interstate Busses Corporation v. Blodgett, State Tax Comm'r of Connecticut, 19 Fed. (2d) 256.

(e) That the United States government, under the federal highway aid legislation, has aided in construction of highways within a state, does not deprive the state of power to impose an excise tax for use of such highways in interstate commerce. Interstate Busses Corporation v. Blodgett, State Tax Comn'r of Connecticut, 19 Fed. (2d) 256.

I. DISCRIMINATION IN SERVICE.

See Discrimination; Facilities and Privileges §21.

§1. In General.

(a) Telephone business is impressed with public use, and property used therefore is dedicated to public use. Bess v. Citizens' Telephone Co., Same v. Southwestern Bell Telephone Co., (Mo., 1926) 287 S. W. 466.

(b) Telephone companies, contracting to send messages in nature of telegrams, are under same obligations, and subject to same liabilities, as telegraph companies. Bess v. Citizens' Telephone Co., Same v. Southwestern Bell Telephone Co., (Mo., 1926) 287 S. W. 466.

II. CHARGES AND REGULATIONS.

§2. In General.

(a) Rules and regulations of a telephone company under which a cash deposit is required of subscribers who arbitrarily or otherwise fail to pay their bills promptly, which specify no definite amount that may be required, nor any definite means for determining what it shall be, found defective for want of definiteness. Rule requiring a deposit equal to, but not in excess of, the sum of accrued charges for any two successive months during the 12-month period next preceding the date on which services are withdrawn on account of nonpayment or failure to pay promptly, found reasonable. Huntington Engineering Co. v. C. & P. Teleph. Co., 112 I. C. C. 377.

(b) Telephone companies may make reasonable rules and regulations in conduct of their business, not in conflict with any duty or liability imposed by law. Bess v. Citizens' Telephone Co., Same v. Southwestern Bell Telephone Co., (Mo., 1926) 287 S. W. 466.

III. CONTROL AND REGULATION.

See Control and Regulation.

§3. In General.

(a) Where a local telephone company undertakes to originate or deliver toll messages, practically all of its property is open for use in interstate commerce and at any time may so be used. Under such circumstances Congress has power to regulate accounting practices of such companies with respect to their property, including accounting for depreciation. Stated otherwise, telephone property, although used largely for local business, is subject to Federal regulation when it is subject to interstate use. Telephone and Railroad Depreciation Charges, 118 I. C. C. 295, 332.

(b) Act Cong. June 18, 1910 (36 Stat. 539 [U. S. Comp. St. §8563 et seq.]), placing telegraph companies, so far as interstate commerce is concerned, under supervision of Interstate Commerce Commission, and permitting companies to make rules and regulations for conduct of their business, which shall be deemed reasonable until changed by Commission, does not change common-law rule of liability, nor prevent an aggrieved party from instituting common-law action in state courts. Krivitsky & Cohen, Inc., v. Western Union Telegraph Co., Inc., 221 N. Y. S. 525.

(c) Railroad Commission cannot, under Public Utilities Act (St. 1915, p. 148), § 50, subds. (a) and (b), as amended by St. 1917, p. 168, order telegraph company, operating under federal franchise through acceptance of Act Cong. July 24, 1866, §§ 1, 2, (14 Stat. 221), under provisions of section 4, which act was authorized by Const. U. S. art. 1, § 8, to cease operation of line constructed along "post roads," which, under Act. Cong. March 1, 1886 (U. S. Comp. St. § 7457), include all public roads and highways maintained as such, for intrastate business until it secures certificate of public convenience and necessity, though it may regulate conduct of company's business under police power. Postal Telegraph-Cable Co., v. Railroad Commission of California, (Calif., 1927) 254 Pac. 258.

(d) Telegraph company obtaining federal franchise by accepting Act. Cong.

July 24, 1866, §§ 1, 2, 4 (14 Stat. 221), under provisions of section 4 thereby became agency of federal government for transaction of postal business, and an agent of interstate and foreign commerce. Postal Telegraph-Cable Co., v. Railroad Commission of California, (Calif., 1927) 254 Pac. 258.

§3½. Jurisdiction of Commission.

See Interstate Commerce Commission I; Jurisdiction of Commission.

(a) Rules and regulations of a telephone company under which a cash deposit is required of subscribers who arbitrarily or otherwise fail to pay their bills promptly, which specify no definite amount that may be required, nor any definite means for determining what it shall be, found defective for want of definiteness. Rule requiring a deposit equal to, but not in excess of, the sum accrued charges for any two successive months during the 12-month period next preceding the date on which services are withdrawn on account of nonpayment or failure to pay promptly, found reasonable. Huntington Engineering Co. v. C. & P. Teleph. Co., 112 I. C. C. 377.

(b) Motion of defendant to dismiss for want of jurisdiction a complaint that a cash deposit to secure payment of bills for telephone services, in part interstate, is unjust, unreasonable, and unduly prejudicial, denied. By the amendatory act of June 18, 1910, telephone and telegraph companies were declared to be common carriers and the commission was given jurisdiction and control over their interstate rates and practices, as well as the rules, regulations, conditions, and restrictions affecting their interstate rates. That telephone companies whose lines extend from one State to another, either of themselves or in connection with the lines of other companies, are engaged in interstate commerce, and that messages passing over their lines from one State to another constitute such commerce, is indisputable. See 220 U. S. 364. Any rule or regulation affecting or obstructing such commerce is within the commission's jurisdiction. Huntington Engineering Co. v. C. & P. Teleph. Co., 112 I. C. C. 377, 379.

IV. LIABILITY FOR DAMAGES.

§4. In General.

(a) Even though telephone company negligently delayed connecting plaintiff with fire department to enable plaintiff to report fire, company HELD not liable for loss; it being highly speculative whether damages would have been less if connection had been promptly made. Cody v. New York Telephone Co., (N. J., 1925) 131 Atl. 221.

(b) Where record showed no rule or custom by telephone company to receive, transmit, and deliver written messages, sender, tendering written message to telephone company for long distance transmission, cannot recover penalty provided for in Rev. St. 1919, § 10136, for refusal of company to send message. Bess v. Citizen's Telephone Co., Same v. Southwestern Bell Telephone Co., (Mo., 1926) 287 S. W. 466.

V. PUBLICATION AND TARIFFS.

See Tariffs II.

§5. In General.

(a) Telephone companies are not required to file their tariffs with the Interstate Commerce Commission. Huntington Engineering Co. v. C. & P. Teleph. Co., 112 I. C. C. 377, 378.

VI. ACCOUNTING RULES.

See Accounting.

§6. In General.

(a) Proceeding instituted by commission on its own motion pursuant to section 20(8) of the act under which it is required to prescribe classes of property for which depreciation charges may properly be included under operating expenses and percentages of depreciation which shall be charged to each class of property, classifying carriers as it may deem proper for the purpose. Telephone and Railroad Depreciation Charges, 118 I. C. C. 295.

(b) Contention that retirements of most units of a large composite railroad or telephone property tend to equalize, i. e., become same in amount from year to year, found not adequately supported by data of record, the evidence indicating rather that opposition to depreciation accounting is based partly on a desire to adjust retirement charges from year to year in accordance with financial needs. Telephone and Railroad Depreciation Charges, 118 I. C. C. 295, 303, 305.

(c) With exception of land and grading, most property units which make up

the plant of a telephone company are gradually worn out in operation or are abandoned from time to time in favor of better substitutes. Cost of property thus consumed or abandoned is, therefore, plainly a part of cost of rendering service and carrier accounts should conform to and adequately record this fact. Telephone and Railroad Depreciation Charges, 118 I. C. C. 295, 303, 306.

(d) Upon contention that if depreciation accounting is extended to cover all depreciable property it will add so materially to operating expenses that further increases in rates will be necessary. HELD, if depreciation accounting is a method by which facts with respect to cost of operating telephone companies are recorded with approximate accuracy, then that method should be adopted regardless of its effect on rates, since nothing is gained by a refusal to face facts or by deferring to some future date burdens which ought to be borne now. Telephone and Railroad Depreciation Charges, 118 I. C. C. 295, 317, 318.

(e) The need for depreciation accounting is emphasized by provisions of section 15a of the act relative to recapture by the Government of excess income and by existing situation with respect to public regulation of telephone companies. Telephone and Railroad Depreciation Charges, 118 I. C. C. 295, 318, 319.

(f) Depreciation accounting is supported by prior decisions of commission in valuation proceedings. by decisions of United States Supreme Court, and by decisions of other courts and Federal and State commissions. It is also in general accord with provisions which at present time are embodied in accounting classifications of steam railroads and telephone companies and which were included in those classifications when section 20 of the act was amended. Telephone and Railroad Depreciation Charges, 118 I. C. C. 295, 320, 323.

(g) Where a local telephone company undertakes to originate or deliver toll messages, practically all of its property is open for use in interstate commerce and at any time may be so used. Under such circumstances Congress has power to regulate accounting practices of such companies with respect to their property, including the accounting for depreciation. Stated otherwise, telephone property, although used largely for local business, is subject to Federal regulation when it is subject to interstate use. Telephone and Railroad Depreciation Charges, 118 I. C. C. 295, 332.

(h) Depreciation accounting for telephone companies, classes A, B, and C, is practicable, but determination of depreciation percentages for various classes of telephone property is a task as to which commission may well avail itself of the cooperation, services, records, and facilities of State commissions, under the provisions of section 13 (3) of the act. Telephone and Railroad Depreciation Charges, 118 I. C. C. 295, 332.

(i) Depreciation expense is based upon original cost of property to accounting company, and depreciation accounting requires an analysis of investment and apportionment of appropriate amounts to primary accounts covering depreciable property, under fixed capital for telephone companies. Investment accounts of telephone companies are, in general, sufficiently adapted to such accounting; but if it should develop that they are not, the matter can then be dealt with. Telephone and Railroad Depreciation Charges, 118 I. C. C. 295, 343, 347.

(j) Annual depreciation charges of telephone companies required to be computed at such percentage rate of ledger value of the unit of property in question that service value may be distributed under the straight-line method in equal annual charges to operating expenses during estimated service life of the unit; annual charges so computed to be reduced to a monthly basis by dividing by twelve. Telephone and Railroad Depreciation Charges, 118 I. C. C. 295, 356.

(k) The unit and group plans of accounting for depreciation compared and latter approved for telephone and railroad companies. Operating companies required to account for depreciation charges on leased property, the groups of property and reserves applicable thereto to include improvements thereon. Telephone and Railroad Depreciation Charges, 118 I. C. C. 295, 367, 372.

(l) The unit and group plans of accounting for depreciation compared and latter approved. Groups of property and reserves applicable thereto should correspond with fixed capital of telephone companies, including improvements on leased property. Operating companies must also account for depreciation charges on property leased. Telephone

and Railroad Depreciation Charges, 118 I. C. C. 295, 367, 372.

(m) It is impossible to prescribe uniform depreciation percentages for various classes of depreciable property, applicable to all companies alike. However, method of determining percentages of depreciation which shall be charged by telephone companies with respect to each primary account prescribed, and cooperation of State commissions as provided for under provisions of section 13 of the act availed of in supervision of the matter. Such companies also required to keep adequate property records and maintain in convenient and accessible form engineering data bearing upon prospective service lives. Telephone and Railroad Depreciation Charges, 118 I. C. C. 295, 372, 376.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. Jurisdiction of Commission.

See Interstate Commerce Commission I; Jurisdiction of Commission.

(a) Carriers seeking, in effect, revision or reformation of an improvident operating agreement governing joint use and operation of terminal facilities, contend that for commission's jurisdiction to attach it need only to give effect to section 15a of the act without waiting until a carrier's bankruptcy shall ensue, and to find as a fact that operating agreement is so burdensome as to result in inefficient and uneconomical operation, to cause misapplication of funds created for an entirely different purpose, and generally to operate to impair carrier's ability to furnish adequate railway service. FOUND: Neither expressly nor by implication does section 15a embrace a direct or indirect revision or reformation of any such contract, nor is commission able to find requisite power or authority in any other provision of the act. M. K. T. v. K. C. T., 104 I. C. C. 203, 223, 224.

(b) The conditions which commission must determine antecedent to exercise of power to require the joint use of terminals and terminal facilities as conferred by section 3 (4) of the act are (1) public interest, and (2) practicability, without substantially impairing the ability of owning carrier to handle its business. Hastings Commercial Club v. C. M. & St. P., 107 I. C. C. 208, 209.

(c) When Congress provided that in public interest the commission could require a carrier to give up a use of its terminal facilities to another carrier, it was faced with necessity of not only satisfying constitutional prohibition that private property shall not be taken for public use without just compensation, but in addition had to provide for a judicial review of the question of compensation at option of owning carrier. However, Congress did impose on commission the duty, in first instance, to fix just and reasonable terms and compensation, for any use that the commission may require, "on the principle controlling compensation in condemnation proceedings." In giving this direction, it is clear that Congress did nothing more than recognize the constitutional right of a carrier to just compensation in the event that its property, or any portion of it, was taken for public use. Hastings Commercial Club v. C. M. & St. P., 107 I. C. C. 208, 212.

(d) Congress has fully occupied the field of regulation by placing control of terminal facilities of interstate railroads in the Interstate Commerce Commission. See 211 Pac. 460, 464; 135 N. E. 195. Hastings Commercial Club v. C. M. & St. P., 107 I. C. C. 208, 215.

(e) In original report commission made its determination as to public interest requiring joint use of terminal facilities but no order was entered. The case was set for further hearing to determine just and reasonable compensation for use of terminal facilities required. Upon contention that as record stands, upon further hearing, the commission is foreclosed from considering again question of "public interest," HELD: Use of terminal facilities of one carrier by another carrier or carriers is jurisdictional, and question of public interest may be reexamined or reconsidered at any point in proceeding. Hastings Commercial Club v. C., M. & St. P., 107 I. C. C. 208, 217.

(f) By Interstate Commerce Act, § 3 (4), as amended by Transportation Act, § 405, construed in connection with section 1 (3), power to regulate the use of terminal facilities of an interstate railroad, including all sidings and switch and spur tracks, is vested in the Interstate Commerce Commission, to the exclusion of the states. Southern Ry. Co. v. Shealy, 18 Fed. (2d) 784.

(g) Where interstate and intrastate transactions both are involved in the use of terminal facilities, the regulation of the latter is so incidental to, and inseparable from, the regulation of the former, as to be deemed included in the authority to regulate such use conferred by statute on the Interstate Commerce Commission. Southern Ry. Co. v. Shealy, 18 Fed. (2d) 784.

II. DUTY TO PERFORM TERMINAL SERVICE.

§3. Duty to Allow Use.

(a) Upon petition by M.-K.-T. R. R., seeking entry of an order, pursuant to section 3 (4) of the act, according it right to use, upon compensation determinable wholly upon a user basis designated portions of union passenger and freight terminals at Kansas City, owned and operated by Kansas City Terminal Ry. Co., FOUND: Petitioner's future use of such facilities, in furtherance of its transportation service, would be in public interest and practicable, without substantially impairing terminal company's ability to handle its own business. However, in view of a cause now pending in the courts as to whether or not petitioner is bound by an operating agreement entered into by its predecessor company, relief can not be granted, but in event of its being adjudged not so bound, further proceedings may be had looking to entry of an order according a right of user, and thereupon, failing agreement, a determination of terms and compensation to be paid or secured therefor, in accordance with provisions of act M.-K.-T. v. K. C. T., 104 I. C. C. 203.

(b) Upon petition of carriers parties to an operating agreement governing use and operation of union terminals at Kansas City, seeking entry of an order, pursuant to section 3 (4) of the act, under which they will be accorded right to use such facilities upon compensation determinable wholly upon a user basis, HELD: Power and authority invoked are not conferred by section 3 (4), requirement of which lays upon a carrier "owning or entitled to enjoyment" of such facilities to accord their enjoyment or use to "another carrier or carriers." Here carriers under operating agreement and as coproprietors, already use and enjoy such terminals, and to grant relief sought would involve a revision or reformation of operating agreement. M.-K.-T. v. K. C. T., 104 I. C. C. 203, 222, 223.

(c) Carrier seeking, in effect, revision or reformation of an improvident operating agreement governing joint use and operation of terminal facilities, contend that for commission's jurisdiction to attach it need only to give effect to section 15a of the act without waiting until a carrier's bankruptcy shall ensue, and to find as a fact that operating agreement is so burdensome as to result in inefficient and uneconomical operation, to cause misapplication of funds created for an entirely different purpose, and generally to operate to impair carrier's ability to furnish adequate railway service. FOUND: Neither expressly nor by implication does section 15a embrace a direct or indirect revision or reformation of any such contract, nor is commission able to find requisite power or authority in any other provi-

sion of the act. M.-K.-T. v. K. C. T., 104 I. C. C. 203, 223, 224.

(d) Contention that paragraphs (1) and (3) of section 3 of the act vitiate an operating agreement providing for joint use of terminal facilities in so far as it provides for an equal division of interest and taxes, not sustained. Those charges are distinctly capital charges, based upon terminal property itself, not upon its use, and are divided among lines in proportions of their equitable titles to or interests in property. For their respective uses of property the lines also severally assume proportionate maintenance and operating expenses. This is not undue prejudice, preference, or discrimination within meaning of paragraph (1). Also, as essentially capital charges, they have no direct or indirect relation to interchange of traffic between several lines within contemplation of paragraph (3). M.-K.-T. v. K. C. T., 104 I. C. C. 203, 224.

(e) Upon contention that terminal facilities at Kansas City constitute a unified and integral whole, not divisible or separable, the use of no part of which can be separately condemned, and that section 3 (4) of the act does not authorize acquisition of a right to use portions of facilities separately and apart from unified whole, FOUND: To this view as a matter of law commission is unable to accede. Section 3 (4) does not contemplate and should not receive such a restricted interpretation as would virtually defeat its practical aim and purpose where extensive terminals are concerned, but its provisions should have a practicable and workable application to practical situations. M.-K.-T. v. K. C. T., 104 I. C. C. 203, 229.

(f) Where a tenant line seeks a right of user by condemnation of joint terminal facilities for purposes of a practicable physical use, it should not, as a condition to any relief, be required to acquire and pay for a right to make use of portions of terminal which it would not desire or need and upon which it would impose no additional burden. M.-K.-T. v. K. C. T., 104 I. C. C. 203, 229.

(g) Commission's service order prescribed joint use by M.-K.-T., of terminal facilities in Kansas City, owned and operated by the Kansas City Terminal Ry. Co. in accordance with terms and provisions of an operating agreement entered into by the Katy's predecessor company. Objections to such order set up in a plea and motion on ground that there was no emergency within meaning of section 1 (15) of the act, found not well taken. In commission's opinion an emergency requiring immediate action existed, petitioner being faced with alternative of submission to a franchise ordinance and operating agreement, notwithstanding section 3 (4) of the act, or of exclusion from terminals and consequent interference with its transportation service. M.-K.-T. v. K. C. T., 104 I. C. C. 203, 230.

(h) Upon further hearing, joint use use of terminal facilities of C., M. & St. P. at Hastings, Minn., by that carrier and the C. B. & Q., found not to be in public interest within meaning of section 3 (4) of the act. Original report, 69 I. C. C. 489, reversed. Hastings Commercial Club v. C., M. & St. P., 107 I. C. C. 208.

(i) The conditions which commission must determine antecedent to exercise of power to require the joint use of terminals and terminal facilities as conferred by section 3 (4) of the act are (1) public interest, and (2) practicability, without substantially impairing ability of owning carrier to handle its business. Hastings Commercial Club v. C., M. & St. P. 107 I. C. C. 208, 209.

(j) In cases involving joint use of terminals or terminal facilities traffic gained by one carrier at expense of corresponding loss to another should be given consideration in arriving at conclusions as to public interest. Cost to be met by user carrier, as compared with traffic served, is also an important element. The commission must also consider financial consequences to carriers involved and inconveniences that may result to shipping and traveling public in general. Hastings Commercial Club v. C., M. & St. P., 107 I. C. C. 208, 216.

(k) In original report commission made its determination as to public interest requiring joint use of terminal facilities but no order was entered. The case set for further hearing to determine just and reasonable compensation for use of terminal facilities required. Upon contention that as record stands, upon further hearing, the commission is foreclosed from considering again question of "public interest," HELD: Use of terminal facilities of one carrier by an-

other carrier or carriers is jurisdictional, and question of public interest may be reexamined or reconsidered at any point in proceedings. Hastings Commercial Club v. C., M. & St. P., 107 I. C. C. 208, 217.

(l) Practice of the Pennsylvania and Western Maryland railways of extending the use of their tracks to each other for purpose of terminal receipt and delivery of freight at industries in York, Pa., within a certain trackage zone, while contemporaneously refusing to accord to industries outside the trackage zone benefit of service, rates and routes of both lines found unduly prejudicial to such outside industries. York Mfrs. Asso. v. P. R. R., 107 I. C. C. 219, 241.

(m) A carrier has no absolute legal right to deny connecting lines use of its terminal facilities. Where public convenience makes it desirable such facilities must be kept open. However, proprietary carrier is entitled to proper compensation, and is not without means of protecting itself against competition. See 28 I. C. C. 621. Switching at Beaumont, 112 I. C. C. 125, 127.

(n) Upon complaint seeking extension of the principle laid down in York Mfrs. Asso., 73 I. C. C. 40; 107 I. C. C. 219, wherein the commission required certain carriers to extend the use of their tracks to each other for purpose of terminal receipt and delivery in the city of York, to a situation where local mines are endeavoring to obtain a joint-mine status by trackage agreements, not sustained. The two situations are not parallel, the cited case embracing a defined zone in a city, whereas the mining district here involved is many miles in extent. Winding Gulf Colliery Co. v. C. &. O., 115 I. C. C. 113, 119, 120. Ragland Coal Co. v. V. Ry., 115 I. C. C. 147, 151.

§5. Reasonableness of Charges.

See Bridges and Tolls; Evidence §57½; Reasonableness of Rates.

(a) When Congress provided that in public interest the commission could require a carrier to give up a use of its terminal facilities to another carrier, it was faced with necessity of not only satisfying constitutional prohibition that private property shall not be taken for public use without just compensation, but in addition had to provide for a judicial review of the question of compensation at option of owning carrier. However, Congress did impose on commission the duty, in first instance, to fix just and reasonable terms and compensation, for any use that the commission may require, "on the principle controlling compensation in condemnation proceedings." In giving this direction, it is clear that Congress did nothing more than recognize constitutional right of a carrier to just compensation in the event that its property, or any portion of it, was taken for public use. Hastings Commercial Club v. C., M. & St. P. 107 I. C. C. 208, 212.

(b) It is desirable to confine line-haul rates to the ports strictly to service ending with spotting of cars, and requiring all further terminal service to be covered by a special charge or charges. Such a plan would preserve to each port such advantages as inhere in facilities for convenient and economical loading of vessels and would also facilitate such comparison of special terminal services and charges therefor as may be deemed advisable in future. Maritime Asso., Boston Chamber of Commerce v. A. A. R. R., 126 I. C. C. 199, 213.

§6. What are Public Terminals and Facilities.

(a) In original report commission made its determination as to public interest requiring joint use of terminal facilities but no order was entered. The case was set for further hearing to determine just and reasonable compensation for use of terminal facilities required. Upon contention that as record stands, upon further hearing, the commission is foreclosed from considering again question of "public interest," HELD: Use of terminal facilities of one carrier by another carrier or carriers is jurisdictional, and question of public interest may be reexamined or reconsidered at any point in proceedings. Hastings Commercial Club v. C., M. & St. P., 107. I. C. C. 208, 217.

III. STATUS OF TERMINAL ROADS.

§7. In general.

(a) The Terminal Railroad Asso. of St. Louis though a common carrier, may not legally operate in all respects as a railroad transportation company, having been perpetually enjoined from operat-

ing otherwise than as a terminal and interchange facility for railroads. See 224 U. S. 383, 236 U. S. 194. C., R. I. & P. v. B. & O., 113 I. C. C. 681, 685.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. Jurisdiction of Commission.

See Adjacent Foreign Country; Interstate Commerce Commission; Jurisdiction of Commission.

(a) While ordinarily, in undue prejudice or discrimination cases, commission enters an alternative order leaving carriers an option as to how such discrimination shall be removed, section 15 (1) of the act authorizes and empowers commission to prescribe the rate, charge, regulation, or practice to be thereafter followed. This provision of the act applies with respect to control of practices of carriers that result in undue prejudice or other violations of the act, in that the commission is empowered thereunder to determine "what * * * regulation

or practice is or will be just, fair, and reasonable, to be thereafter followed" York Mfrs. Asso. v. P. R. R., 107 I. C. C. 219, 231.

(b) In their present form provisions of section 15 of the act governing establishment of through routes and joint rates were enacted as part of transportation act, 1920, and they lay upon the commission the mandatory duty of establishing such routes and rates as may be found to be necessary or desirable in the public interest, whereas corresponding statutory provisions in effect prior thereto did not. Ft. S., S. & R. I. R. R. Co. v. A. & V., 107 I. C. C. 523, 524.

(c) Upon contention that commission can not lawfully require establishment of through routes and joint rates in connection with an intermediate carrier solely on ground of intermediate line's financial necessity, and that public interest referred to in section 15 of the act is that of the shipping public in reasonable, expeditious routes, HELD: Commission is unable to adopt such a narrow conception of public interest. Ft. S., S. & R. I. R. R. Co. v. A. & V., 107 I. C. C. 523, 524.

(d) The limitation imposed by section 15 (4) of the act on authority of commission to require establishment of a through route has no application where inclusion in such route of all or substantially all of the lines of a carrier invoking this section would make through route unreasonably long as compared with another practicable through route which could otherwise be established. See 85 I. C. C. 5, 11; 92 I. C. C. 304. Rising Paper Co. v. N. Y., N. H. & H., 115 I. C. C. 699, 701.

(e) Upon contention that commission can go no further than to require American lines to withdraw from any joint rate to or from an adjacent foreign country deemed excessive or otherwise objectionable, and may deal only with rates of those lines to or from international boundary, HELD: Commission does not undertake to prescribe joint rates as between American and foreign lines but merely determines what in its judgment will be maximum joint rates in which American lines can participate. The proportion of rates to accrue to each line is left to negotiation between participants, and if foreign lines decline to join in such rates the American lines are forced to withdraw from joint rates which exceed the maxima, in which case commission can then determine and prescribe specific rates to be applied to or from boundary. If complainants are then dissatisfied their remedy lies in the hands of the foreign regulatory body. Spanish River Pulp & Paper Mills v. A. & W., 120 I. C. C. 251.

(f) Ruling of the Interstate Commerce Commission, made on application of carriers for general increase of freight rates, and authorizing a flat increase, did not have the effect of establishing any specific joint through rate, as to which there was no hearing, as required by Interstate Commerce Act, § 15(3), as amended by Transportation Act 1920, § 418 (Comp. St. Ann. Supp. 1923, § 8583), so as to give the commission authority to make a subsequent order, changing division of joint rates in a particular case, retroactive under section 15(6), as amended, in view of section 1(4) as amended by Transportation Act 1920, § 400 (Comp. St. Ann Supp. 1923, § 8563). Brimstone R. & Canal Co., v. United States, 13 Fed. (2d) 914.

(g) Under Interstate Commerce Act. § 1, subds. 18-20, 22, as amended by Transportation Act 1920, §§ 400-403, (Comp. St. Ann. Supp. 1923, § 8563), section 3, subd. 4, as amended by Transportation Act 1920 §405 (Comp. St. Ann. Supp. 1923 § 8565), and in view of section 3, subd. 3, and section 1, subd. 9, each as amended by Transportation Act 1920, and section 6, as amended by Act Aug. 24, 1912, § 11 (now Comp. St. Ann. Supp. 1923, §8569), Interstate Commerce Commission has exclusive jurisdiction over establishment of junctions or physical connections between railroads engaged in interstate commerce notwithstanding Const. Miss. 1890, §§ 184, 190, and Hemingway's Code Miss. §§ 6722, 6725, 6728. Alabama & V. Ry. Co. v. Jackson & E. Ry. Co., 46 Sup. Ct. 535.

(h) Under Act to Regulate Commerce, § 15 (3) being Comp. St. § 8583, a finding of public necessity is essential to validity of order for establishment of through routes and joint rates. Virginian Ry. Co., v. United States. United States v. Virginian Ry. Co., 47 Sup. Ct. 222.

(i) Under section 15, paragraph (3) of the act the Commission has the power to establish through routes and joint rates "whenever deemed by it necessary or desirable in the public interest," subject to the limitation in paragraph (4) that a carrier may not be required to

short haul itself unless its route is unreasonably long as compared with another practicable route. Smith Wilson Co. v. A., T. & S. F. Ry., 129 I. C. C. 65, 68.

(j) It is true that the act, in giving to this Commission authority to publish through routes and joint rates, was not intended to require it to establish such through routes and joint rates whenever requested to do so, without regard to the peculiar circumstances of each case. In view of the fact that the act was designed to promote the free movement of interstate commerce, and bearing in mind that a large river is a natural artery of commerce, it would seem that any responsible common carrier operating on the river in question would be prima facie warranted in requesting this Commission to allow that carrier to participate to the fullest possible extent in the interstate traffic originating on that river. Inland Waterways Corp. v. C. G. W. R. R., 129 I. C. C. 521, 528.

(k) Prior to 1910 the power of the Commission to establish through routes was limited to instances in which no satisfactory through route existed. The elimination of this limitation placed within the discretion of this Commission the establishment of additional through routes. In the exercise of this discretion the existence of through routes capable of adequately and expeditiously handling all traffic offered is entitled to much consideration, but no longer constitutes a barrier to another through route. Inland Waterways Corp. v. C. G. W. R. R., 129 I. C. C. 521, 528.

(l) Under paragraph (3) of section 15 of the act the Commission is empowered, upon proper showing, to prescribe through routes such as are desired and the maximum rates to be applied thereover. The question is as to how these maximum rates are to be determined. If the Commission is limited in all cases to the prescription of maximum reasonable rates, there is here no showing that the joint rates desired by the barge line are maximum reasonable rates, nor is there any evidence which would enable the Commission to determine what maximum reasonable rates would be. Power of the Commission under section 15 (3) of the act is to establish through routes and joint rates "or the maxima or minima, or maximum and minima, to be charged or, in the case of a through route where one of the carriers is a water line, the maximum rates, fares and charges applicable thereto." The quoted provision is an alternative to the preceding provision, which empowers the Commission to establish through routes and joint rates without specifying that the latter must be on either a maximum or minimum level. Doubtless the rates prescribed must be reasonable, but it does not follow that they must reach the pinnacle of reasonableness. Inland Waterways Corp. v. C. G. W. R. R., 129 I. C. C. 521, 530.

(m) The Commission may, whenever deemed by it to be necessary or desirable in the public interest, establish through routes and joint rates and the conditions under which such through routes shall be operated. In establishing any such through route it shall not, except as provided in paragraph 3, require any carrier by railroad, without its consent, to embrace in such route substantially less than the entire length of its railroad, which lies between the termini of such proposed through route, unless such inclusion of lines would make the through route unreasonably long as compared with another practicable route which could otherwise be established. Indianapolis Board of Trade v. B. & O. R. R., 129 I. C. C. 675, 679.

(n) Contention that commission is without power to order establishment of additional through routes where existing routes are capable of handling traffic, and that such routes can only be ordered on a showing of public convenience and necessity such as is required in case of new-line construction, not sustained. Section 6 (13—b) of act empowers the commission to establish through routes and maximum joint rates between rail and water lines and to determine terms and conditions of operation, and section 15 (3) provides that it "may" establish through routes and joint rates over rail and water lines and "shall" do so whenever deemed "to be necessary or desirable in the public interest." See also 24 I. C. C. 179, 185; 31 I. C. C. 281, 288; 77 I C. C. 317, 353. Inland Waterways Corp. v. C. G. W., 129 I. C. C. 521, 528, 529.

(o) Contention that commission has power to prescribe maximum reasonable joint rates only, and that inasmuch as all-rail rates are depressed they can not properly be used as a yardstick for measuring maximum reasonable rail-

barge rates, not sustained. Obviously if another through route is sought between certain points in competition with existing through routes, joint rates prescribed over the new through route must be comparable with those over existing through routes or they will be of no avail. Under section 15 (3) of act, commission is empowered to establish through routes and joint rates "or the maxima or minima, or maxima and minima, to be charged (or, in case of a through route where one carrier is a water line the maximum rates, fares, and charges applicable thereto)," which is an alternative to preceding provision empowering commission to establish through routes and joint rates without specifying that latter must be on either maximum or minimum level. Doubtless rates must be reasonable but must not necessarily reach pinnacle of reasonableness. See 92 I. C. C. 528, 546, and other cited cases. Inland Waterways Corp. v. C. G. W., 129 I. C. C. 521, 529, 531.

(p) While under section 15 (3) of the act, commission may, whenever deemed necessary or desirable in the public interest, establish through routes and joint rates and conditions under which such through routes shall be operated, paragraph 4 of that section provides that in establishing any such through route it shall not, except as provided in paragraph 3, require any carrier by railroad, without its consent, to embrace in such route substantially less than entire length of its railroad, which lies between termini o f such proposed through route, unless such inclusion of lines would make the through route unreasonably long as compared with another practicable through route which could otherwise be established. Indianapolis Board of Trade v. B. & O., 129 I. C. C. 675, 678, 679.

§2. What is Through Route or "Common Arrangement."

See Crimes; Tariffs §10.

(a) Evidence of ownership by one carrier of shares of capital stock of another carrier, or of a majority of such shares, does not in and of itself warrant a finding that both carriers are under common management and control. See 87 I. C. C. 654. Bragg & Millsaps Co. v. A. & W. P., 128 I. C. C. 238, 239.

(b) It should be understood that where the term "carriers under the same management and control" is used, it refers to carriers generally controlled through ownership, lease, or otherwise to the extent of controlling traffic policy, even though separate corporate entity may be maintained. Bragg & Millsaps v. A. & W. P. Ry., 128 I. C. C. 238, 239.

(c) A through route is an arrangement, express or implied, between connecting railroads for continuous carriage from a point on the line of one to a destination on the line of another. A joint rate is not essential. The through rate may as well be a combination of locals or proportionals. Grain and Grain Products, 129 I. C. C. 261, 264.

(d) In determining whether hauls are single line or joint line, carriers under same common control or management shall be considered as one line. Colbert Limerock Asphalt Co. v. A. C., 129 I. C. C. 177, 185.

§3½. Participation in Through Traffic.

See Discrimination §7; Interstate Commerce Commission §2 §3.

(a) Points of origin and destination are located on lines of carriers not named in the complaint, but rates found unlawful were joint through rates in which carriers not named participated. Upon objection to introduction of evidence tending to prove damage on shipments moving over lines of carriers not named as defendants in original complaint, HELD: Following 295 Fed. 53, the participation by initial carriers in violation of the act by exacting unreasonable rates is enough to make such carriers liable for full amount of damages sustained in consequence of such violation, liability against such carrier resulting from its unlawful action in charging unreasonable rates, that liability being enforceable against defendants though other parties to such joint rates were also liable but were not proceeded against. South Carolina Mfrs. Asso. v. C., C. & O., 112 I. C. C. 683, 685.

(b) No carrier participating in a through route, except by special agreement with its connection or connections, can be charged with responsibility for transporting any shipment over such through route until that shipment has been offered to it at a recognized inter-

change point on its line. Until it has been so offered the responsibility rests with connecting line. C. R. I. & P. v. B. & O., 113 I. C. C. 681, 689.

(c) The financial status of a carrier is but one element in determining whether or not a railroad should be eliminated as an intermediate line in routing of traffic and is not necessarily controlling. Restrictions in Routing over S. L. & U., 115 I. C. C. 357, 369.

(d) Fact that a carrier hauls cars with its own engines over tracks of an intermediate line does not constitute the latter line an intermediate carrier. Kansas City, K. V. & W. Ry., v. A., T. & S. F., 120 I. C. C. 258, 261.

(e) Local rates to Chicago plus arbitrary to points within Chicago switching district beyond, found to constitute through rates where participating carriers concurred in tariffs publishing both local raes and arbitrary. Chicago Coal Merchants Asso. v. N. Y. C., 129 I. C. C. 203, 207.

II. ESTABLISHMENT BY CARRIER.

See Common Carrier; Electric Lines IV; Tap Lines §4.

§4. In General.

(a) It is the total through rate that vitally interests the shipper. Combination rule on brick, 115 I. C. C. 293, 300.

§5. Dispute over Divisions.

See Advanced Rates §7 (6); Divisions §4; Terminal Facilities §9.

(a) Failure of New York, New Haven & Hartford and Central New England railroads to accord to the C. R. R. of N. J., joint rates via New York Harbor on traffic from and to points on the Central and its connections west of Allentown, Reading, and Harrisburg, Pa., and west of and including Hagerstown, Md., while contemporaneously according joint rates via New York Harbor on such traffic to the Lehigh Valley and Pennsylvania railroads, found to result in discrimination in violation of section 3 (3) of the act. C. R. R. Co. of N. J. v. N. Y., N. H. & H., 122 I. C. C. 661.

§9. Right To Favor Own Line.

See Discrimination §7, §10; Routing and Misrouting §1.

(a) While desire of a carrier to retain to itself the long haul on all traffic tributary to its line is a right ordinarily safeguarded by provisions of section 15 (4) of the act, the technical construction of one portion of the act may not be relied upon by carriers to justify violation of other provisions. York Mfrs. Asso. v. P. R. R., 107 I. C. C. 219, 236.

(b) Under section 15 (4) of the act, the right of originating or intermediate carrier to its long haul on traffic in its possession is superior to that of delivering line. Ft. S., S. & R. I. R. R. Co. v. A. & V., 107 I. C. C. 523, 524.

(c) Upon contention of carrier that it can not be required to establish transit arrangements at a point on its line applicable in connection with traffic originating on its rails on the ground that to do so would deprive it of the long haul in violation of section 15 (4) of the act, HELD: That section merely prohibits commission from requiring establishment of joint through routes and rates which will have the effect of short hauling carriers under circumstances there set forth. But, where as here, the situation is simply whether or not transit shall be permitted at a point on its rails in connection with through rates and routes already in effect, this is clearly a situation not covered by section 15 (4). Montgomery Cotton Exchange v. S. A. L., 109 I. C. C. 579, 584.

(d) The limitation imposed by paragraph 4 of section 15 of the Act on authority of the Commission to require the establishment of a through route has no application where the inclusion in such route of all or substantially all of the lines of a carrier involving this section would make the through route unreasonably long as compared with another practicable through route which could otherwise be established. Rising Paper Co. v. N. Y. N. H. & H. R. R., 115 I. C. C. 699, 701.

(e) Carriers contended that there is a well-recognized exception to general condemnation by commission of restrictive rates in cases where combinations are supported by a general policy of carriers concerned in refusing to join in establishment of joint rates on coal to their local markets from points on other coal-carrying roads, citing in support thereof numerous cases in which commission found combination rates on that commodity not unreasonable or unduly prejudicial when maintained in accordance with such a policy. HELD: To merit

commission's approval any such policy must be followed without discrimination between shippers similarly situated. Old Ben Coal Corp. v. C., C., C. & St. L., 115 I. C. C. 84, 87, 88.

(f) Combination rates on staves and headings from Winnsboro, La., to Jackson, Miss., found unreasonable. No reason was shown why through rates should not be somewhat less than combination of locals, and mere fact that carrier desired to keep traffic on its own lines in order to secure a longer haul is no valid reason why it should refrain from becoming a party to joint rates. Reasonable joint rates prescribed for future and reparation awarded. Jackson Traffic Bureau v. A. & V. Ry., 115 I. C. C. 570.

(g) The provisions of the act protecting the right of a carrier to the long haul on traffic originating by it relate to the establishment of through routes. Ex Lake Iron Ore from Chicago to Granite City, 120 I. C. C. 75, 77.

(hi) Carriers published rates on their own line for single-line haul, lower than rate for similar joint-line hauls from points on other carriers to destinations on their own lines, contending that the rate for single-line haul was established for competitive reasons and that while earnings thereunder were low they were more satisfactory than would have been the case if the same rate were applied for joint-line hauls where it would receive but a part of the haul and a division of the rate. HELD: Similar situation was considered in 98 I. C. C. 488, in which commission stated that such rates resulted in a denial to shippers of ability to choose their market, and concluded that prejudice against such shippers was undue within meaning of the act. See also 58 I. C. C. 261. White Eagle Oil & Refining Co. v. A.T. & S. F., 122 I. C. C. 223, 225.

(j) Upon contention of carrier that it is entitled as a matter of right to its long haul on traffic under provisions of section 15 (4) of the act, HELD: That this provision of the act places a limitation only on commission's power to require establishment of such through routes and does not affect right of carriers to join in their establishment. C. R. R. Co. of N. J. v. N. Y., N. H. & H., 122 I. C. C. 661, 666.

(k) A carrier originating traffic or receiving it from its connection should be allowed to carry it as far as it can before delivering it to a connecting line if the public interest does not suffer thereby. Routing on cotton, 129 I. C .C. 387.

(l) If a carrier has traffic in its possession it should be allowed to handle it by its own line as far as it can in the absence of injury thereby to the public. Routing on cotton, 129 I. C. C. 387, 391.

(m) A carrier has no right, under the guise of reserving to itself the long haul, to restrict the markets in which its shippers may dispose of their products. Indianapolis Board of Trade v. B. & O. R. R., 129 I. C. C. 675, 679.

(n) Paragraph 4 of section 15 provides that in establishing through routes the Commission may not, without the consent of a carrier, embrace in such route substantially less than the entire length of its railroad unless the inclusion of its railroad would make the through route unreasonably long as compared with another practicable through route which could otherwise be established. Colorado Portland Cement Co. v. A., T. & S. F. Ry., 132 I. C. C. 671, 676.

(o) Establishment of joint rates on cotton, shipped uncompressed from points in Pecos Valley of New Mexico on the Santa Fe to Texas Gulf ports via Pecos, Tex., with concentration at that point at carrier's expense, which would short haul the Santa Fe system route via Clovis, N. Mex., and Sweetwater, Tex., with option of concentration at either Roswell, N. Mex., or Pecos, found not "necessary or desirable in the public interest," under section 15 (3) of the act. Establishment of joint rates would deprive the Santa Fe of the longest possible haul to which it is shown to be entitled and would tend to disturb transportation service now afforded Pecos Valley shippers by that line, which shippers are for most part opposed to establishment of such rates. Moreover, such rates would not, as contended, enlarge complainants' sales area, as in 109 I. C. C. 579. Smith-Wilson & Co. v. A., T. & S. F., 129 I. C. C. 65.

§10. Status of Intermediate Carrier.

(a) The financial status of a carrier is but one element in determining whether or not a railroad should be eliminated as an intermediate line in routing of traffic and is not necessarily controlling. Restrictions in Routing over S. L. & U., 115 I. C. C. 357, 369.

(b) The limitation imposed by section 15 (4) of the act on authority of commission to require establishment of a through route has no application where inclusion in such route of all or substantially all of the lines of a carrier invoking this section would make through route unreasonably long as compared with another practicable through route which could otherwise be established. See 85 I. C. C. 5, 11; 92 I. C. C. 304. Rising Paper Co. v. N. Y., N. H. & H., 115 I. C. C. 699, 701.

§11. What is Satisfactory Thru Route. (2) When Through Route Ordered Or Denied.

(a) Because of a strike in the anthracite fields which has brought about a shortage of fuel for household use, an emergency, such as is contemplated by section 15 (4) of the act, found to exist requiring prompt establishment of additional joint rates and through routes on bituminous coal in prepared sizes from certain mining districts in the Virginias and eastern Kentucky, and on semianthracite coal from certain Virginia mines, to points in New England and middle Atlantic States. Additional through routes, and temporary joint rates in connection therewith, prescribed without prejudice to subsequent consideration of requests for their being made permanent. Transportation of Anthracite Coal, 104 I. C. C. 341.

(b) Upon further consideration, and based primarily upon financial needs of intermediate line, through routes and joint rates between points on lines of certain carriers applicable via the Ft. Smith, Subiaco & Rock Island R. R. Co., as an intermediate carrier, found desirable in public interest and ordered established. Original report, 102 I. C. C. 708. Ft. S., S. & R. I. R. R. Co. v. A. & V., 107 I. C. C. 523.

(c) Upon contention that commission can not lawfully require establishment of through routes and joint rates in connection with an intermediate carrier solely on ground of intermediate line's financial necessity, and that public interest referred to in section 15 of the act is that of the shipping public in reasonable, expeditious routes, HELD: Commission is unable to adopt such a narrow conception of public interest. Ft. S., S. & R. I. R. R. Co. v. A. & V., 107 I. C. C. 523, 524.

(d) Rates on pulp wood from Minnesota points to Wisconsin Dam and Kings, Wis., points served exclusively by Marinette, Tomahawk & Western Ry., when routed from Duluth or Missabe Junction over the Soo Line via Bradley, Wis., thence over the Marinette, found unreasonable because of factor from Duluth or Missabe Junction to destinations. Reparation awarded and a reasonable proportional rate, which takes into consideration the financial condition of the Marinette and fact that movement requires a haul over two lines, prescribed for future. Tomahawk Kraft Paper Co. v. C. & N. W., 109 I. C. C. 517.

(e) Refusal of rail carriers to establish through routes and joint or proportional rates with the Nelson S. S. Co. on same basis and to same extent as contemporaneously maintained with the Pacific S. S. Co. and McCormick S. S. Co., competing water lines, found to result in undue prejudice. The Nelson company transports same classes of freight at same time between same ports at same rates under substantially similar circumstance and conditions as its competitors, its service is satisfactory, and it is financially responsible. While service rendered by the competing lines is also satisfactory, this fact alone is insufficient under the law to warrant undue prejudice found in view of the express language of section 3 of the act. The through routes and rates prayed for found desirable in the public interest and ordered established. Nelson S. S. Co. v. B., A. & P., 109 I. C. C. 529.

(f) Public interest found not to require establishment of through routes and joint class rates via Phoenix, Ariz., on traffic moving between points in Arizona and certain other States over circuitous routes. Carriers, however, should give consideration to establishment of such routes and rates between points where there is a substantial movement of traffic and the use of the Phoenix gateway would effect a considerable saving in transportation service. Arizona Corp. Commission v. A. E., 113 I. C. C. 52, 62, 63.

(g) Complainant operates bituminous coal mines near Pemberton, W. Va., in the New River district, two are on what is known as Collins Spur of the Virginian, the other two on a short spur of the C. & O., and alleged that defendant's refusal to accord complainant's mines the same treatment in facilities, service, and rates on coal to interstate

destinations as is accorded other mines in the same district on defendant's lines and the Glen Jean, and to open to each other their respective lines and facilities to the extent that they are open to competing mines in the district resulted in undue prejudice. There is an underground connection between complainant's mine on the C. & O. and that on the Virginian through which coal can be and is transferred. There was transferred by this means 3,082 tons, 78.8% of which was from the mine on the C. & O. to that on the Virginian. It is not shown that rates from the mines on the C. & O. or Virginian to eastern destinations on or via the other line are necessary, nor is it shown that it would be in the public interest to open the markets served by either the C. & O. or Virginian in the east to the shippers on the other line. HELD, defendant's failure to arrange for the extension of the same service and facilities to complainant's mines as are accorded by them under trackage arrangements, or otherwise, not unduly prejudicial, complaint dismissed. Winding Gulf Colliery Co. v. C. & O. Ry., 115 I. C. C. 113.

(h) Combination rates on coal from certain mines in New River district of West Virginia, on the C. & O. to interstate destinations on or via the Virginian Ry., and from mines on the Virginian to eastern interstate destinations on or via the C. & O., found not unreasonable, discriminatory, or unduly prejudicial as compared with rates accorded other mines similarly situated, which by trackage agreements or otherwise have the benefit of district rate on or via either line. Rates sought are not shown to be necessary or that it would be in the public interest to open the markets served by either the Chesapeake or the Virginian to shippers on the other line. Ragland Coal Co. v. V. Ry., 115 I. C. C. 147.

(i) Only in those instances where some advantages will accrue to parties other than a petitioning weak line does commission believe that it should exercise its powers in prescribing through routes and joint rates under section 15 (3) of the act. Commission also takes this view of the continuance of through routes already in effect. Restrictions in Routing over S. L. & U., 115 I. C. C. 357, 369.

(j) Upon further hearing, FOUND: That it is desirable in public interest that joint rates be established by carriers in connection with the Peoria & Pekin Union Ry. Co., on traffic to, from, and via Peoria or East Peoria, Ill. Former reports, 68 I. C. C. 412; 77 I. C. C. 43; and 93 I. C. C. 3. Rates of P. & P. U. Ry., 115 I. C. C. 469, 512, 513.

(k) Former report 115 I. C. C. 469, requiring establishment of joint rates on traffic interchanged by the Peoria & Pekin Union at Peoria or East Peoria, Ill., and classifying division of the Toledo, Peoria & Western west of Peoria as an east-side carrier thereby requiring that line to bear division of the Pekin Union on all traffic brought into Peoria over its western division, modified so as to classify eastern division of the Toledo's line with east side or East-Peoria carriers and its western division with west-side carriers. Rates of Peoria & Pekin Union Ry., 118 I. C. C. 127, 128.

(l) Complainant alleged among other things that the failure of defendants to establish through routes and joint rates on wool and mohair, carloads, from all points west of the 100 degree meridian to Boston, Mass., and other North Atlantic ports, when routed rail and water via the Pacific ports and Panama canal, was unjust and unreasonable. In 91 I. C. C. 235, the commission found this failure not to be unjust or unreasonable. Case was reopened for reconsideration. The request, in addition to the desire for lower through rates, is predicated largely on the ground of public interest. But the public interest must be considered broadly. The interests of the producers, the consumers, and the carriers must all be taken into consideration. There are no joint rail and water rates in effect on any commodity when shipped via the Pacific ports and the Panama canal. Not all of the intercoastal lines which are actually handling wool shipments and which sail on regular schedules, and none of the tramp steamers, are parties to this proceeding. The time may not be far distant when joint rail and water rates via the Pacific ports and the Panama canal to Atlantic seaboard destinations on many commodities will become a reality, but this record is not convincing that as yet the public interest, considered broadly, requires that such joint rate should be prescribed on wool. HELD, former findings affirmed, complaint dismissed. Wool

Rates Investigation, 1923, 120 I. C. C. 493.

(m) Establishment of through routes and joint rail-and-water rates on wool and mohair from interior points on shipments moving via Pacific ports and Panama Canal to Boston and other north Atlantic ports found not necessary or desirable in public interest, and failure of carriers to establish same and issue through bills of lading found not unreasonable or otherwise unlawful. The commission has never required establishment of joint rail-and-water rates when, as here, both the rail and water carriers are opposed thereto and no such rates are in effect on any commodity over routes here involved. While the time may not be far distant when their establishment on many commodities will become a reality, the record is not convincing that as yet the public interest, considered broadly, requires that such joint rates be prescribed on wood. Wool Rates Investigation, 1923, 120 I. C. C. 493.

(n) The commission has power to establish through routes and prescribe maximum joint rail-and-water rates on wool and mohair from interior points on shipments moving via Pacific coast ports and Panama Canal to Boston, Mass., and other Atlantic ports. See 87 I. C. C. 392 and other cited cases. Wool Rates Investigation, 1923, 120 I. C. C. 493, 495, 497.

(o) Where establishments of through routes and joint rates are sought, the public interest must be considered broadly, i. e., the interests of producers, consumers, and carriers must all be taken into consideration. Wool Rates Investigation, 1923, 120 I. C. C. 493, 507.

(p) Complainant, Jersey Central, seeks in this proceeding the reestablishment of joint rates by way of New York harbor on traffic between points on its line west of Allentown, Pa., and on connecting lines west of that point, and points on the New Haven and Central New England alleging that the refusal of defendants to join with it in establishing such rates is unduly prejudicial and unduly preferential of the L. V. and Pennsylvania, and that divisions on anthracite coal via Maybrook, N. Y., are unduly prejudicial. ROUTES AND RATES. Through routes and joint rates are in effect via New York harbor between all points generally on the Jersey Central and its connections and points on the New York division of the New Haven, Bridgeport, Conn., and west and between points on the Jersey Central, with some minor exceptions not here involved, and connecting carriers east of a line drawn west of Allentown, Reading, Harrisburg, Pa., and east of Hagerstown, Md., including points reached through Potomac Yard, Va., on the one hand and points on the New Haven and C. N. E. on the other. Joint rates between points on the Jersey Central west of Allentown and its connection west of the above described line and points on the lines of defendants, other than stations Bridgeport and west, and on cement from Vulvanite, N. J., and all points on defendants lines apply by way of Maybrook, and to some extent Campbell Hall. The greater part of the traffic between points on or reached over the Jersey Central and points on defendants now moves over the Maybrook route, the bulk of the movement being eastbound. With joint rates via New York harbor on such of this traffic as was not routed by the shippers through Maybrook the Jersey Central would have received additional hauls over its line of 73 miles from Easton and 84 miles from Bethlehem to Jersey City. The gravamen of the complaint is that the Jersey Central is being deprived of the additional revenues which it would receive under joint rates via New York harbor between these points. It is conceded that there is no breach by defendants of the duty of establishing through routes in that a through route, together with facilities for its operation, now exists via New York harbor between all points on or reached over the Jersey Central west of the above described line and points served by defendants. The choice of more than one route between the same points at equal rates is generally of advantage to shippers, particularly during periods of congestion, but the record indicates that these two routes would afford little, if any, benefit to shippers in this respect. The history of embargoes placed for account of defendants against traffic from points on or via their lines since 1916 shows that they were generally in effect via both gateways concurrently. The evidence shows that operating conditions generally are less favorable via New York harbor than via Maybrook between these points. The use for the movement of freight of reasonably direct routes which avoid congested centers is generally regarded as a sound operating practice, and a number of instances are cited where ad-

ditional lines and other facilities, generally known as cutoffs, have been constructed by carriers for the handling of through traffic around certain other large cities. HELD, establishment of joint rates between the points here considered via New York harbor under conditions which would add substantially to the volume of traffic interchanged by the New Haven with its connections at that point is not necessary or desirable in the public interest. The prejudice arises not from the existence of joint rates through New York harbor over the L. V. and Pennsylvania, or the absence of such rates over the Jersey Central, but from conditions local to these carriers over which defendants have no control. HELD, failure of defendants to establish the joint rates sought by complainant is not unduly prejudicial. In limiting joint rates with the Jersey Central via New York harbor for the purpose of restricting the amount of traffic moving through that gateway and at the same time making no similar limitation in the case of the L. V. and Pennsylvania, defendants have acted arbitrarily. HELD, failure of defendants to accord to complainant like treatment with the L. V. and Pennsylvania in the matter of joint rates via New York harbor is discriminatory and unlawful. ANTHRACITE DIVISIONS. In 1908, when traffic between the points here considered was diverted from the New York harbor to the Maybrook route, the Jersey Central and its connections west of Maybrook received as their division of joint rates on prepared sizes of anthracite coal from and to these points $1.25 per long ton. The record lacks definite and convincing proof of any agreement otherwise between the parties whereby the divisions west of Maybrook were to be determined by the use of a fixed differential of 30c under the divisions west of Jersey City. Contention of the Jersey Central must be rejected. Central R. R. Co. of N. J. v. N. Y. N. H. & H. R. R., 122 I. C. C. 661.

(q) Complainant alleged the failure and refusal of defendants to establish through routes and joint rates on coal, in carloads, from mines on the Virginian Ry., and the K. G. J. & E. by way of Matoaka, W. Va., and Roanoke, Va., over the N. & W. by way of Elkton, Va., to destinations on complainants line, resulted in violation of sections 1, 3 and 15 of the act. Complainant is Chesapeake Western Ry., operating a line of railroad, entirely within the state of Virginia, from Elkton, a point on the N. & W. to Stockesville, 40 miles. Consumers along the line of complainant receive their coal from coal fields in southern West Virginia and Virginia on the C. & O., and on the Virginia, Glen Jean and N. & W. The only joint rates on coal to destinations on complainants line other than Harrisonburg are from mines on the N. & W., applicable by way of Roanoke and Elkton, but as no receiver of coal at any of these destinations appeared at the hearing there seems to be no such public interest in this regard as would warrant the exercise of the powers under section 15. In the absence of any showing that coal from mines on the Virginian or Glen Jean has moved or will move to Harrisonburg or to the other destinations on complainants line, the Commission is not justified in making such an order as might tend to open up the local territory of the N. & W. to coal originating on other lines. HELD, complaint dismissed. Chesapeake Western Ry. v. N. & W. Ry., 123 I. C. C. 159.

(r) Contention of the Salt Lake & Utah R. R., that the practice of transcontinental lines in permitting certain carriers to short haul them on transcontinental traffic, while refusing it the same privilege, subjects it to discrimination under section 3 (3) of the act, not sustained. No showing was made that the circumstances under which these other carriers short haul the transcontinental lines are similar to those existing in connection with the Salt Lake & Utah, or that the latter named carrier is adversely affected by the transcontinental lines' arrangements with those other lines. Moreover, if these arrangements were discontinued protestant would be in no better position than that in which it now finds itself. See 35 I. C. C. 131. Restrictions in Routing over S. L. & U., 122 I. C. C. 208, 210.

(s) Reestablishment of joint rates on traffic from and to points on the C. R. R. Co. of N. J., and its connections west of Allentown, Reading, and Harrisburg, Pa., and west of and including Hagerstown, Md., via New York Harbor to and from points on the N. Y., N. H. & H. and Central New England railroads, found not necessary or desirable in the public interest, and failure of defendant carriers to establish such rates found not unduly prejudicial. C. R. R. Co. of N. J. v. N. Y., N. H. & H., 122 I. C. C. 661.

(t) Failure of New York, New Haven

& Hartford and Central New England railroads to accord to the C. R. R. of N. J., joint rates via New York Harbor on traffic from and to points on the Central and its connections west of Allentown, Reading, and Harrisburg, Pa., and west of and including Hagerstown, Md., while contemporaneously according joint rates via New York Harbor on such traffic to the Lehigh Valley and Pennsylvania railroads, found to result in discrimination in violation of section 3 (3) of the act. C. R. R. Co. of N. J. v. N. Y., N. H. & H., 122 I. C. C. 661.

(u) While there may be reasons in some instances to justify the construction of grain rates so that through rates are equal to combinations of rate factors to and from important grain markets, there is a limit to the extent to which such a policy can be followed with propriety in view of requirements of the act that all rates must be just and reasonable Ogden Grain Exchange v. A. & S., 122 I. C. C. 691, 702.

(v) Rates on grain and products from points in Utah, Idaho, Oregon, Montana, and Wyoming to points on the Denver & Rio Grande Western R. R. in Utah and Colorado (west of Colorado common points) found not unreasonable and prayer for establishment of joint rates from and to these points found not warranted by record. Ogden Grain Exchange v. A. & S., 122 I. C. C. 691, 718.

(w) Failure and refusal of carriers to establish through routes and joint rates on coal from mines on the Virginia Ry. and Kanawha, Glen Jean & Eastern R. R., by way of Matoaka, W. Va., and Roanoke, Va., over the Norfolk & Western Ry., to destinations on the Chespeake Western Ry., found not unreasonable or otherwise unlawful. Joint rates now apply to Harrisonburg, Va., a point on the Chesapeake Western, but as no receiver of coal at any other destinations on its line appeared at the hearing there is no such public interest in this regard as would warrant the exercise of the commission's powers under section 15. Moreover, in absence of any showing that coal from mines on the Virginian or the Glen Jean has moved or will move to these Chesapeake Western destinations, the commission is not justified in making such an order as might tend to open up local territory of the N. & W. to coal originating on other lines. See 39 I. C. C. 153. Chesapeake Western Ry. v. N. & W., 123 I. C. C. 159.

(x) To compel the application of short line rates over indirect or longer routes merely as a means of providing a channel of doubtful benefit to comparatively few shippers, would lay an unnecessary expense upon the railroads against the interest of the public as a whole. When joint rates that are neither unreasonable nor unduly prejudicial are maintained over direct routes adequate response is made to the reasonable requirements of the public, and carriers should not be required to perform wasteful transportation by maintaining the same rates over indirect and more circuitous routes. Restriction in routing lumber, 129 I. C. C. 561, 563.

(y) The public interest is not conserved by shutting out, by denial of joint rates, a miller from markets which he can reach by routes not necessitating the performance of a greater total service for him than the service over present routes over which joint rates apply, unless some substantial right of the carriers is thereby invaded. Indianapolis Board of Trade v. B. & O. R. R., 129 I. C. C. 675, 678.

(z) The commission is required to establish through routes and joint rates whenever deemed by it to be necessary or desirable in the public interest. That joint rates via Superior are desirable in the public interest is evident from the facts that traffic can be and is interchanged at that point; that the hauls via Kansas City or St. Joseph are in general excessively circuitous; and that lower rates would obtain via Superior because of the much shorter distances via that junction. The denial to complainants of reasonable rates via Superior can only be said to be in the interest of the carriers. White Eagle Oil & Refining Co. v. B. & Q., 129 I. C. C. 467, 469.

(aa) Through routes and joint rail-barge and rail-barge-rail rates between St. Paul and Minneapolis, Minn., and Fargo, N. Dak., and points in Illinois, Indiana, Iowa, and Missouri, in connection with barge line between Dubuque, Iowa, and St. Paul and Minneapolis, found desirable in the public interest. Such joint rates to be constructed by subtracting from contemporaneous all-rail rates between same points differentials equivalent to 15 per cent of contemporaneous all-rail rates between Dubuque and Twin Cities, and divisions

thereof to be arrived at by rate prorata basis, using as factors contemporaneous first-class rail rate between Dubuque or Twin Cities and the interior point and contemporaneous first-class barge rate between Dubuque and Twin Cities. Inland Waterways Corp. v. C. G. W., 129 I. C. C. 521.

(bb) Refusal of carriers to maintain through routes for transportation of grain and products to and via Indianapolis, Ind., from points on Wabash Railway in Illinois and Indiana to western termini of eastern trunk lines and points east thereof, found not unreasonable nor unduly prejudicial as compared with lower commodity rates to and via Indianapolis from cross-country and other competitive points on other lines nor with commodity rates applicable from points on the Wabash to the east via Chicago and other junctions with eastern lines. While in 83 I. C. C. 451, it was stated that a carrier has no right, under guise of reserving to itself the long haul, to restrict markets in which its shippers may dispose of their products, it is not shown that absence of joint rates via Indianapolis restricts shippers on the Wabash since both complainants and preferred parties can now reach all markets, except Indianapolis, at rates sought. Indianapolis Board of Trade v. B. & O., 129 I. C. C. 675.

(cc) While under section 15 (3) of the act, commission may, whenever deemed necessary or desirable in the public interest, establish through routes and joint rates and conditions under which such through routes shall be operated, paragraph 4 of that section provides that in establishing any such through route it shall not, except as provided in paragraph 3, require any carrier by railroad, without its consent, to embrace in such route substantially less than entire length of its railroad, which lies between termini of such proposed through route, unless such inclusion of lines would make the through route unreasonably long as compared with anther practicable through route which could otherwise be established. Indianapolis Board of Trade v. B. & O., 129 I. C. C. 675, 678, 679.

IV. REASONABLENESS AND DISCRIMINATION.

See Blanket Rates §10; Commodity Rates II; Discrimination §7; Equalization of Rates; Evidence §66; Local Rates and Combinations; Proportional Rates; Reasonablness of Rates §27½; Restricted Rates (i); Water Carriers V.

§13. In General.

(a) Through rates on fresh meats from points west of Mississippi River to destinations in trunk-line and New England territories found unreasonable for future to extent they exceed lowest combination of contemporaneous factors west of Mississippi River or Chicago plus rates herein found reasonable east thereof. Reasonable rates prescribed. Morrell & Co. v. N. Y. C., 104 I. C. C. 104, 136.

(b) Through rates on cured meats and hides from points west of Mississippi River to destinations in trunk-line and New England territories found not unreasonable or unduly prejudicial, except rates from Cedar Rapids, Iowa, and certain Missouri River packing points, which are herein found unreasonable for future, and reasonable rates prescribed. Morrell & Co. v. N. Y. C., 104 I. C. C. 104, 135, 136.

(c) Under ordinary conditions practice of making through rates by adding to a rate for a long distance the local rate from basing point to destination, a relatively short distance beyond, can not be approved. Jewel Co. v. A., T. & S. F., 104 I. C. C. 380, 384.

(d) Rates on coke from Chickamauga and Durham, Ga., and Chattanooga and Alton Park, Tenn., to Pacific coast terminals, found not unreasonable or discriminatory but unduly prejudicial to extent they exceed rates from Birmingham, Ala., district to same destinations. Following 34 I. C. C. 10, rates from these origin points were placed on a rate parity and so remained until disrupted by a reduction in rate from Birmingham. While southeastern carriers are willing to reduce rates involved to same as that applicable from Birmingham, the transcontinental lines are unwilling to concur therein because of low divisions which they would receive thereunder. Durham Coal & Iron Co. v. C. of G., 104 I. C. C. 483.

(e) In original report, 101 I. C. C. 363, 374, commission provided for reduction of higher rates on anthracite coal from Pennsylvania mines to destinations

in upper New York State over longer joint line routes to level of those applicable over single-line routes between same points. Upon showing by carriers that single-line rates were prescribed in 35 I. C. C. 220 for single-line hauls only, that those rates would not be reasonable maxima for joint-line hauls, and that a reduction of the joint-line rates to one-line basis would result in a serious and unwarranted loss in revenue, a difference of 13 cents between single and joint-line routes approved. Such difference found not unreasonable or great enough to place retail coal dealer served by joint routes under any serious handicap in competing with dealer served by single line at same point. Moreover, where not unduly circuitous, it is desirable that all routes be maintained. Anthracite Coal Investigation, 104 I. C. C. 514.

(f) Rates applicable on crushed stone, assessed on agricultural limestone from Buffalo, Iowa, to Illinois destinations, in absence of specific rates on latter commodity, found unreasonable to extent they exceeded subsequently-established specific joint commodity rates on agricultural limestone having value for purposes of soil treatment only. Reparation awarded. Dolese Bros. Co. v. C., R. I. & P., 107 I. C. C. 127.

(g) Rates on crushed stone from Columbia, S. C., to Wilford, Edwards, and Dean Siding, N. C., destinations on Washington & Vandemere, a short-line carrier under the same management and control as Atlantic Coast Line, found not unreasonable as compared with single-line distance rates from same point of origin to same and other destinations, or with rates between numerous other points for application over two or more lines for approximately equal distances. Raleigh Freight Traffic Bureau v. A. C. L., 107 I. C. C. 156.

(h) Rate on bituminous coal from South Providence and Harbor Junction Wharf, R. I., to Sterling, Conn., as part of a through interstate movement from Virginia mines by rail and water, found unreasonable to extent it exceeded lower contemporaneous rate on like traffic from New Haven and Stratford to other destinations in Connecticut for comparable distances found reasonable in 83 I. C. C. 563. Reasonable rate prescribed and reparation awarded. United States Finishing Co. v. N. Y., N. H. & H., 107 I. C. C. 412.

(i) Rate on bituminous coal from Allyn's Point to Sterling, Conn., as part of a through interstate movement from Virginia mines by rail and water, found not unreasonable as compared with contemporaneous rates on like traffic between points in same general territory for comparable distances and with rates found reasonable in 83 I. C. C. 563. United States Finishing Co. v. N. Y., N. H. & H., 107 I. C. C. 412.

(j) Considering, among other things, the earnings under through rates, and the measure of, and earnings under, separate factors, through combinations on anthracite coal from Pennsylvania mines to points in Iowa found unreasonable as compared with rates to Chicago and Peoria, Ill., St. Louis, Mo., and St. Paul, Minn. Reasonable rates for future prescribed. Iowa R. R. Commrs. v. C. R. R. Co. of N. J., 109 I. C. C. 273.

(k) Factors of through rates on traffic destined beyond should be lower than local rates, except where the latter are shown to be depressed by special conditions to an extent which makes them reasonable for application as proportional rates. Wichita Chamber of Commerce v. A. & V., 109 I. C. C. 368, 376.

(l) Combination rate assessed on lumber from Millville Junction, Fla., to Decatur, Ga., reconsigned to Scottdale, Ga., found unreasonable to extent that factor Millville Junction to Decatur exceeded rate from same origin point to Atlanta. Carrier offered no justification for an unusual situation whereunder industries at Decatur having private sidings were accorded the Atlanta rate whereas higher rates were assessed on lumber consigned to the general public. Reasonable rates prescribed for future and reparation awarded. Watters-Tonge Lumber Co. v. A. & St. A. B., 109 I. C. C. 598.

(m) Complainant attacked through rates on tinware from Chicago, Waukegan and Rockford, Ill., Milwaukee, Wis., and points taking same rates, to Burlington and Keokuk, Ia., as unreasonable and unduly prejudicial as compared with rates from same points to Quincy, Ill., and St. Louis, Mo. Burlington, Keokuk, Quincy and St. Louis are Mississippi River crossings north to south in the order named. Burlington serves all these points. One route of the Burlington to St. Louis is down the west bank through Burlington and Keokuk. This route also

passes through West Quincy on the Iowa side of the river opposite Quincy. The rates to Burlington and Keokuk are higher than to Quincy and St. Louis. Complainants refer to fourth class rates as principally applicable on their shipments in straight carloads or in mixed carloads under rule 10. Rates to Quincy and St. Louis are commodity rates. The record does not establish that the class rates are unreasonable for this traffic. The commodity rates to Quincy and St. Louis are exceptions to the class basis. The class basis to Burlington and Keokuk seems to be in harmony with the adjustment east of the Mississippi River, except to Quincy and St. Louis. But the maintenance of rates to Quincy and St. Louis lower than to Burlington is not warranted upon the facts here presented, and such an adjustment would subject Burlington to undue prejudice and give to Quincy and St. Louis an undue preference. Commodity rate to St. Louis from Chicago is 28.5 c. and from Milwaukee 33.5 c., that rate being applicable to McIntosh, Mo. In the absence of instructions for routing over the direct route this tariff authorizes the application of the McIntosh and St. Louis basis to Burlington and Keokuk as intermediate points over the permissible route through those points. HELD: defendants are to maintain rates on tinware to Burlington and Keokuk no higher than to St. Louis and Quincy. Burlington Shippers' Asso. v. C. B. & Q. R. R., 112 I. C. C. 533.

(n) Complainant attacked commodity rates charged on 37 cars of lubricating oil and gasoline between Oct. 5, 1921 and Jan. 4 1922 from Burkburnett, West Port Authur, Wichita Falls, Fort Worth, North Fort Worth and Houston, Tex., to Dayton, O., as unreasonable. Previous report in 102 I. C. C. 249. Prior to Sept. 29, 1921 no joint through rates were maintained from the points of origin to Dayton. On that date a commodity rate of 42c was published from Vicksburg, Miss., to Dayton. That tariff already named a proportional commodity rate of 19c from the origin points to Vicksburg. The record indicates that they were routed, presumably by shippers, through East St. Louis, Memphis and New Orleans. If the joint rates over those routes had been cancelled, joint through rates would nevertheless have remained in effect over other routes to Dayton. HELD: rates attacked not unreasonable or otherwise unlawful, complaint dismissed. Refiners Oil Co. v. Pennsylvania R. R., 112 I. C. C. 680.

(o) Complainant attacked commodity rate of $7.92 charged on coke, carloads, subsequent to Nov. 1, 1922 from the Birmingham district to Collinsville, Okla., as unreasonable. On April 2, 1925 prior to the hearing, defendants established the rate of $6.12 per ton sought by complainant. Collinsville is 19 miles north of Tulsa on the Santa Fe. Over short route distance is 770 miles. HELD: rate attacked unreasonable to extent it exceeded $6.12, reparation awarded. Oil Well Improvement Co. v. A. T. & S. F. Ry., 112 I. C. C. 705.

(p) Complainant attacked commodity rates charged on wire fencing, carloads, to Americus, Ga., from Fairfield, Ala., as unreasonable and unduly prejudicial. Fairfield is on the Birmingham Southern about 13 miles from Birmingham and takes the same rate on this traffic. 15 moved over B. S., to Ensley, Ala., L. & N., to Montgomery and S. A. L., beyond. One moved B. S., to Birmingham and C. of Ga., beyond. Distances from Birmingham over these routes are 237 and 221 miles, respectively. Prior to Dec. 15, 1922 the rates on this commodity from Birmingham to Americus were sixth class, reduced on that date to the special iron basis. HELD, rates attacked unreasonable to extent they exceeded 36.5c prior to July 1, 1922 and 33c thereafter, reparation awarded. Sheffield Co. v. B. S. R. R., 112 I. C. C. 729.

(q) Complainant attacked commodity rates on green or green salted hides and tallow, in straight carloads, and on hides, pelts, skins, grease and tallow, in mixed carloads, shipped since July 1, 1922 from Norfolk, Neb., to Chicago, Ill., as unjust and unreasonable and unduly prejudicial. Generally speaking, the points of origin here under consideration may be divided into three groups, namely, (1) Missouri river points (2) Nebraska differential territory. (3) territory west of Nebraska differential territory. Joint rates apply from the Missouri river cities and points taking the same rates to Chicago. From Nebraska differential territory, which includes such points as Lincoln, Beatrice and Fremont, the rates to Chicago are made by adding certain arbitraries, usually less than the local rates, to the rates from Omaha, a Missouri river city. From the territory west of the Nebraska differential terri-

tory, the rates to Chicago are made on the full combination based on the Missouri river cities. Norfolk, served by the lines of three railroads, is within the territory west of the Nebraska differential territory, 122 miles northwest of Omaha. On Oct. 1, 1924 the rate was voluntarily reduced to 53c. There is no transportation condition to justify the charging of a relatively higher basis of rates from points in Nebraska, such as Norfolk, west of Nebraska differential territory, than from points within that territory, and the fact that the carriers apply the differential basis from other points explains or accounts for the difference in the rates but affords no justification therefor. HELD, rates attacked unreasonable to extent they exceeded 48.5c, reparation awarded. Robinson v. A. T. & S. F. Ry., 113 I. C. C. 280.

(r) Complainant attacked commodity rates on grain and grain products, carloads, between points in Wisconsin on the I. C., and points in Illinois on both the I. C., and Burlington, on and north of the line of the Burlington, from Chicago through Aurora, Galva, and Alpha, Ill., to New Boston, Ill., on the one hand and Chicago on the other hand, are unjust and unreasonable and as compared with the rates to St. Louis and Ohio river crossings unduly prejudicial. GRAIN RATES TO CHICAGO DISTRICT. The rates brought in issue are applicable in combination with rates from Chicago in constructing through rates to and east and south, but they are named in the tariffs as local rates and are here attacked only as such. They grade upward as the distance to the Chicago district increases, and from Illinois points are the same on both wheat and coarse grain. FEED RATES FROM CHICAGO DISTRICT. Generally speaking, the local rates on grain, including grain products, such as animal, poultry, and mixed livestock feed, apply to and from the Chicago district from and to points in northern Illinois and southern Wisconsin on those portions of the I. C., and Burlington herein considered. Complainants disadvantage is primarily one of location, for it is readily apparent that they seek to market feed against the flow of the ingredients, in competition with manufacturers shipping with it. The rates attacked are for the most part local rates, and under the circumstances of this case their reasonableness may not tested by comparisons with proportional rates. The fact that local rates on feed lower than on grain are maintained to a few points is not convincing that the same basis should be extended to all points. HELD, rates attacked not unreasonable or unduly prejudicial, complaint dismissed. Chicago Board of Trade v. C. B. & Q. R. R. 113 I. C. C. 295.

(s) Failure of carriers to establish joint rail-and-water commodity rates on plain iron wire, c. l. and l. c. l., from Fostoria, Ohio, to Savannah, Ga., and Jacksonville, Fla., while contemporaneously maintaining such joint rate from Pittsburgh, Pa., and from Youngstown, Cleveland, and Greenwich, Ohio, to same destinations, found unduly prejudicial. Nonprejudicial relationship prescribed. Seneca Wire & Mfg. Co. v. B. & O., 112 I. C. C. 95.

(t) Through combination rate on unshelled peanuts from Suffolk, Va., to Hutchinson, Kans., found unreasonable to extent it exceeded rate prescribed in 83 I. C. C. 14 and 100 I. C. C. 307, from Suffolk and other Virginia points to Oklahoma and Texas destinations for comparable distances. Reparation denied. Western Brokerage Co. v. A. C. L., 112 I. C. C. 103.

(u) Combination rate assessed on batting dross from Mangrum, Miss., to Pensacola, Fla., found not unreasonable as compared with lower joint rate subsequently established. Combination compares favorably with rates in force at time of movement from shipping points in territory contiguous to Mangrum. Moreover, where adjustments of rates have been initiated by carriers, the exercise of their judgment in good faith and within reasonable limits should not be at peril of liability of reparation; and awarding of reparation by no means necessarily follows reducing of a rate by their voluntary action. See also 58 I. C. C. 46. Western Paper Makers Chemical Co. v. G. & S. I., 112 I. C. C. 221.

(v) Combination rates on coal from Colorado and northern New Mexico producing districts to local points in State of Kansas on the Frisco, Katy, and Midland Valley railroads found unreasonable and unduly prejudicial as compared with joint rates maintained to destinations on other lines in same general Kansas territory. Reasonable rates prescribed for

future. Kansas Public Utilities Comm. v. A., T. & S. F., 112 I. C. C. 235.

(w) Where issue is one of reasonableness and propriety of through charges from point of origin to final destination, mere fact that such through charges include a factor which may have been too high is not controlling if total charges were not unreasonably high. Wright Lumber Co. v. A. A., 112 I. C. C. 337, 339.

(x) Rates on crude mine-run fire clay from St. Louis and Clayton, Mo., to South Fort Smith and Van Buren, Ark., found unreasonable as compared with rates prescribed for similar distances in Memphis Southwestern Investigation, 77 I. C. C. 473, and to extent they exceeded 16 cents on shipments moving over the Ft. Smith & Western and on other shipments 14 cents for single-line and 14.5 cents for joint-line hauls. The Ft. Smith & Western, designated as a weak line in cited case is shown to be in poor financial condition with an annual operation loss and participates in traffic under a rate of 12 cents in order to compete for this traffic despite the low earnings thereunder. Reparation awarded. Athletic Mining & Smelting Co. v. F. S. & W., 112 I. C. C. 497.

(y) Rates on canned meats from Atlanta, Ga., to Chicago, Ill., found unreasonable due to factors from Atlanta to Ohio River crossings. The omission of canned meats from the canned-goods list clearly was and is an exception to general basis of commodity rates on canned goods in the Southeast, numerous comparisons of rates from and to other points indicate that assailed factor and through rate resulting from its use were and are inherently unreasonable, and fact that canned meats are classified with other canned goods and that proportional c. l. rate on canned meats exceeded both the local and proportional l. c. l. rate on other canned goods is prima facie evidence of unreasonableness of rates assailed. Reparation awarded, and original report, 93 I. C. C. 360, reversed. Armour & Co. v. L. & N. 112 I. C. C. 695.

(z) Complainant attacked commodity rates on sugar, carloads from New Orleans, California, Colorado, Utah, Idaho, Nebraska and New Jersey to Nebraska and South Dakota destinations as unreasonable and unduly prejudicial. Regardless of the point of origin, sugar is sold to the jobbers throughout the destination territory in these cases at the prevailing New York price plus the freight rate from New Orleans to the jobbing points. Comparatively little sugar moves to this territory either from New Orleans or the Atlantic seaboard. About 85% of the consumption is of beet sugar received from refineries in the western states. The cane sugar consumed originates in California. Nevertheless by reason of the manner in which prices are fixed by the refiners a reduction in the freight rates from points other than from New Orleans would not benefit complainants unless attended by a reduction in the rates from New Orleans. The record indicates the ability of the Missouri river cities to distribute sugar in less carload quantities at points naturally tributary to the complaining points at lower rates than the jobbers located there can distribute. The average short line distance from New Orleans to the complaining cities is about the same as the average short line distance to the river cities in Iowa and Nebraska. Under commodity scale 11 in 77 I. C. C. 473, 595 for application to sugar in the generally higher rated territory in that case, extended beyond 800 miles at the constant rate of progression employed therein beyond 500 miles, namely 1c for each additional 25 miles, the rates to the complaining points would be, using the short line distances, as follows for single line or joint line hauls; to Superior and Fairbury 74c, to Hastings 76c, to Grand Island 78c, to Columbus and Kearney 79c, to Norfolk 81c, to North Platte 83c to Scotts Bluff 89c, to Crawford 93c. So far as traffic and transportation conditions differ as between Nebraska and the Southwest the advantage is with the former territory, apart from such consideration, if any, as should be accorded the materially longer hauls to the Nebraska points. HELD, rates attacked unreasonable to extent they exceed rates based on the scale mentioned, plus arbitraries not exceeding 2c for the bridge crossing at Memphis or 2.5c for the ferry crossing at Mississippi river points south thereof minimum 60,000 pounds. HELD, further, rates unduly prejudicial to extent they exceed present rates from New Orleans to the river cities by more than 8c to Superior or Fairbury, 10c to Hastings, 12c to Grand Island, 13c to Columbus or Kearney, 15c to Norfolk, 17c

to North Platte, 23c to Scottsbluff or 27c to Crawford. Rapid City, S. D., is on branch lines of the Northwestern and Milwaukee and R. C. B. H. & W., Lead and Deadwood, S. D., on the Burlington and Northwestern. The same rates apply generally to these points. Practically the entire receipts are from Nebraska. From San Francisco to Chicago rates are 91c for 60,000 pounds and 84c, 80,000. To the river cities the rates at those minima are 88.5c and 84c which rates are blanketed back throughout Kansas and Nebraska. To Rapid City the applicable rate is $1.035 on 60,000 pounds, or 15c higher than to Crawford, 162 miles less distant. HELD, rates attacked unduly prejudicial to extent they exceed the rates to Omaha or Sioux City or 88.5c minimum 60,000 pounds or 84c minimum 80,000 pounds. The rates from Utah, Idaho territory to Rapid City are $1.58. HELD, rates attacked unduly prejudicial to extent they exceed the rates from California. The rate from New Orleans to Rapid City distance 1,610 miles is $1.35, to Deadwood 45 miles beyond is $1.41. HELD, rates attacked unduly prejudicial to extent they exceed the rates from New Orleans to Omaha by more than 31c to Rapid City or 33c to Deadwood or Lead. Nebraska State Ry. Commission v. A. & W. Ry., 113 I. C. C. 467.

(aa) Complainant attacked commodity rates on flaxseed, carloads, from Montana and North Dakota to Portland, Ore., as unreasonable. N. P., party to the rates from the Canadian points to Portland, stated that these rates would be reduced simultaneously with rates from the same points to Seattle. The reduction in rates to Seattle is necessary to meet a lower combination of local rates via Sumas, Wash. This will result in rates from Regina and Moose Jaw to Portland 9 and 9.5c lower than the rates complained of, and will satisfy the complaint in this respect. The record in this case does not warrant a finding of unreasonableness. HELD, rates attacked not unreasonable, complaint dismissed. Portland Linseed Oil Works v. G. N. Ry., 113 I. C. C. 528.

(bb) Joint class rates for movement of interstate traffic from Erie station at Paterson, N. J., to Broadway station on the New York, Susquehanna & Western, in the same city, found not unreasonable. Complainant instanced lower rates for comparable switching movements in same general territory but carriers showed that movement here involved embraced two switching and two road-haul operations. Wilgus v. P. R. R., 113 I. C. C. 617.

(cc) Rates on coke from Appalachia, Stonega, and other producing points in Virginia and from Birmingham, Ala., to destinations in California found not unreasonable or unduly prejudicial as compared with rates from Chattanooga. Similar rates from Chattanooga found not unreasonable or discriminatory, but following 104 I. C. C. 483, were unduly prejudicial to extent they exceeded the rates from the Birmingham district to the same destinations. Romann & Bush Pig Iron & Coke Co. v. I. R. R., 113 I. C. C. 622.

(dd) Complainant attacked fifth class rates charged on carloads of evaporated milk in tin cans, in boxes, from Pecatonica, Ill., to trunk line territory as unreasonable and unduly prejudicial. The gravamen of complainant's case is that its competitors at the Wisconsin producing points were accorded commodity rates in most instances lower than the fifth class rates and also lower than complainant's rates for equal or comparable distances. Subsequent to the hearing the carriers proposed a revision of rates on canned goods and vegetables and condensed and evaporated milk from various Wisconsin and Minnesota points to trunk lines. In 101 I. C. C. 502, the Commission permitted numerous increases in the rates, but not to the extent proposed. The points which still enjoy rates lower than Pecatonica are located near Lake Michigan and their rates are influenced by the car ferry routes. HELD, rates attacked not unreasonable or unjustly discriminatory and that any undue prejudice which may have existed has been removed, complaint dismissed. Milk Producers Co-operative Co. v. B. & O. R. R., 113 I. C. C. 721.

(ee) Accidents by which shipments move via either of two intermediate points, because like specific class rates are applicable over both routes, should not alone determine the measure of reasonable rates over two lines of same carrier between same points, where no differences in transportation conditions are shown, where difference in distance is slight, and where a lower combination is

sometimes figured over the shorter route and sometimes over the longer route. Firestone Tire & Rubber Co. v. Director General, 113 I. C. C. 751, 755.

(ff) Complainant attacked commodity rates charged on corrugated strawboard boxes, knocked down, in carloads, shipped since Sept. 1, 1924, from Baltimore, Md., to Durham, Winston Salem, and Reidsville, N. C., as unduly prejudicial as compared with rates from Louisville, Ky., to the same destinations. Baltimore is on the T. & O. C., 25 miles southeast of Columbus, O. The short line distance to Durham is 544 miles, to Winston Salem 511 miles, and to Reidsville 513 miles. Charged 49c. Louisville has a 41c rate for distances of 651 miles to Durham, 619 miles to Winston Salem and 622 miles to Reidsville. The general basis of making rates from points in central territory to Carolina destinations is by combination either on Ohio river crossings or on the Virginia cities. Figured on the latter the Baltimore rate would be 58c. But Baltimore takes the Columbus rate. This is not made by the usual method but is a differential of 8c over the Ohio river of 41c, which applies from Cincinnati and Louisville. The N. & W. has a through line from Columbus to North Carolina and originally put Columbus on the differential basis in order to secure traffic in competition with Cincinnati. The T. & O. C. meets the rate of the N. & W. at Columbus and applies it from intermediate points, thereby giving complainant the benefit of the lower basis. These lines do not serve Louisville. HELD: rates attacked not unduly prejudicial, complaint dismissed. Fairfield Paper Co. v. A. C. L. Ry., 115 I. C. C. 43.

(gg) Complainant attacked as unreasonable the rates on fresh meats and packing house products from Chicago, Milwaukee and South St. Paul to Marquette, Ishpeming, Munising, Nestoria, Houghton, Hancock and Calumet, Mich., and to points intermediate thereto in northern Wisconsin and the northern peninsula of Michigan. The points of destination are in the upper peninsula of Michigan, and with the exception of Ishpeming, which is served by Northwestern, are reached only by socalled short line carriers which operate solely within the peninsula or in the peninsula and northern Wisconsin. Fresh meats and packing house products, in carloads, are rated third and fifth class, in western classification territory. Prior to July 5, 1924, commodity rates the same as the third class rates were maintained on fresh meats, carloads, from Chicago and Milwaukee to Houghton, Hancock and Calumet and from South St. Paul to Houghton and Hancock; and from South St Paul to Calumet the rates on this traffic were combination third class rates. On that date the commodity rates were reduced 4c, and a combination rate made up of the commodity rate to Houghton and the local third class rate beyond, also 4c less than the sum of the third class rates to and from Houghton, became effective from South St. Paul to Calumet. The rates attacked on packing house products from Chicago and Milwaukee to Ishpeming were 3c lower than the fifth class rates from and to these points prior to July 5, 1924, when they were increased to the classification basis. The shipments from Chicago to Houghton moved over C. M. & St. P. and Copper Range, 431 miles. The attacked rates on fresh meats range from about 77 to 95% of the third class rates, whereas the rates on like traffic to the other destinations named range from 50 to 70% of class rates. HELD: Rates attacked to Marquette, Ishpeming, Munising and Nestoria not unreasonable, but to Houghton, Hancock and Calumet unreasonable to extent they exceed 57.5c on fresh meats and 34.5c on packing house products to Houghton and Hancock and 59.5c on fresh meats and 35.5c on packing house products to Calumet, reparation awarded. Armour & Co. v. C. M. & St. P. Ry., 115 I. C. C. 68.

(hh) Complainant attacked rates on bituminous coal, carloads, from southern Illinois field to points in Indiana on the Big Four as unreasonable and unduly prejudicial. All of the mines are served by the I. C., two of them those at West Frankfort and Johnston City are also served by the C. & E. I. The Indiana destinations, 173 in number, are points on the Big Four on and north of the line of that road extending from Sandford via Freensburg and Shirley to Crete, including those points on the Martinsville and Columbus branches. The average short line distances from the Old Ben mines over the I. C., or C. & E. I. in connection with the Big Four, range from 185 miles to Sandford, Ind., to 431 miles to Granger, Ind. The rates are based on the full combinations of

the locals to and from the various junction points. The lowest rates applicable from the Old Ben mines to the destinations in question via any route in connection with the Big Four range from $2.40 to $3.62. To destinations in Michigan, Wisconsin, Minnesota, North Dakota, South Dakota, Iowa, Nebraska, and Missouri, the rates from the Old Ben mines and from the Harrisburg group mines are, with few exceptions, the same. To many destinations in Indiana the same rates are accorded to both groups. To stations on the Big Four in Michigan the other defendants and the Burlington maintain joint rates from their southern Illinois mines. To its Indiana destinations the Big Four joins in rates from mines on other lines in the Brazil and Evansville, Ind., groups on the same basis as the local rates from its own mines in those groups to the same destinations. HELD, rates attacked unreasonable and unduly prejudicial to extent they exceed the rates from Harrisburg, Ill. Old Ben Corp. v. C. C. C. & St. L. Ry., 115 I. C. C. 84.

(ii) Complainant attacked commodity rate of 7c, minimum 50,000 pounds, on ice, carloads, from Wymore, Neb., to St. Joseph, Mo. as unreasonable to extent it exceeded 5c minimum 60,000 pounds. Distance is 122 miles. Loss and damage claims are negligible. HELD: rates attacked not unreasonable, complaint dismissed. Rawlings v. C. B. & Q. R. R., 115 I. C. C. 103.

(jj) Complainant attacked rate charged on staves, carloads, from Strasburg Jct., Va., to Engle, W. Va., as unreasonable. The evidence submitted shows that the shipments actually moved from Strasburg, Va., on the Southern to its siding at Bakerton, W. Va. A reciprocal switching charge of $2.70 per car is absorbed by defendant for the movement. Rate charged $2.02. Bakerton is the terminus of a branch line of the B. & O. 2.3 miles from Engle and it has been customary in the past to bill shipments to Engle and make delivery at Bakerton. Bakerton while only a siding to complainant's plant, is listed in tariff as a nonagency station. Legal rate was distance commodity rate of 13c. Staves move in ordinary box cars and complainant has had no claims for damage, they are rated sixth class and in the absence of a commodity rate or mileage scale the rate would be 17.5c. HELD: rate attacked of $2.02 not unreasonable, undercharges waived. Washington Building Lime Co. v. B. & O. R. R., 115 I. C. C. 128.

(kk) Complainant attacked rate on lime, carloads, from Woodville, O., to Fulton, Md. as unreasonable unjustly discriminatory and unduly prejudicial. Woodville is a local point on the Pennsylvania, 16 miles southeast of Toledo, O., and Fulton is served by the Western Maryland within the corporate limits of Baltimore. Combination was 27.4c. A commodity rate of 25.5c was in effect from Woodville to deliveries in Baltimore on the Pennsylvania. HELD: rate attacked unreasonable to extent it exceeded 25.5c, reparation awarded. Woodville Lime Products Co. v. Pennsylvania R. R., 115 I. C. C. 131.

(ll) Complainant attacked rate charged on three cars of peaches shipped from Timberville and Markham, Va., to Jacksonville, Fla., as unreasonable unjustly discriminatory unduly prejudicial and in violation of the fourth section. One shipment was made on Aug. 27, 1924, from Timberville and moved Southern. The other two were made from Markham on Sept. 3 and 8, 1924, and were originally consigned to Richmond, Va., but were diverted to Jacksonville and moved Southern, R. F. & P., and A. C. L., applicable second class rate of $1.425 charged, complainant seeking rate of 70c. From Timberville to Palatka, Fla., 60 miles beyond Jacksonville the rate at the time the shipments moved was $1.36 made of $1.075 to Jacksonville and 28.5c beyond. To Jacksonville from Cincinnati, O., 840 miles, the present rate is 70c, and from St. Louis, Mo., 1,090 miles the rate is $1.04. Transportation characteristics relating to the compared rates are not shown. The rates attacked compare favorably with those from comparable distances from Timberville to approximately 40 important destinations in Georgia, Alabama and Tennessee. HELD: rate attacked not reasonable, unjustly discriminatory or unduly prejudicial, complaint dismissed. Toney Bros. v. Southern Ry., 115 I. C. C. 203.

(mm) Complainant attacked commodity rate of $1.50 charged on two cars of paper boxes, knocked down, in bundles, from Chicago Ill. to Salt Lake City, Utah, on Sept. 1 and Oct. 14, 1922, as unreasonable, unduly prejudicial to extent it exceeded $1.35 on Sept. 1 ship-

ment and $1.13 on Oct. 14 shipment. Shipments moved Burlington to Council Bluffs, Ia., U. P., beyond. On Oct. 10, 1922, the rate was reduced to $1.13 in an effort to secure some of the roofing felt, building paper and wall board traffic that was then moving in large volume by water. HELD: Rate attacked unreasonable to extent it exceeded $1.32, or 10% over the rate on newsprint paper, reparation awarded. Chicago Carton Co. v. C. B. & Q. R. R., 115 I. C. C. 215.

(nn) Complainant attacked joint commodity rate of 36.5c charged on 20 cars of phosphate rock from Milldale, Fla., in Nov., 1920, to Shreveport, La., as unreasonable. Milldale is within the switching limits of Jacksonville, Fla., and about 74 miles from Alachua, Fla., the nearest point in the Florida phosphate strata. No phosphate has ever been mined at Milldale. There is no evidence of any movement previous or subsequent to these 20 cars to Shreveport or to any other destination. There is no indication of record that any future movement is in prospect. The movement was distinctly sporadic. Shipments moved A. C. L. to Montgomery, M. & O. to Meridian, A. & V., to Vicksburg and V. S. & P. beyond, distance 836 miles. HELD: Rate attacked not unreasonable, complaint dismissed. Meridian Fertilizer Factory v. A. C. L. R. R., 115 I. C. C. 226.

(oo) Complainant attacked joint commodity rate of 25c charged on a carload of mixed veneering shipped Aug. 4, 1923, from Tuscaloosa, Ala., to Nashville, Tenn., as illegal. Shipment was unrouted and moved A. G. S. to Chattanooga, Tenn., C. N. O. M. T. P. to Harriman, Tenn., and T. C. beyond, rate being applicable on veneering less than one-eighth inch in thickness. The rate charged was applicable on that portion of the shipment less than one-eighth inch in thickness and was subject to minimum of 30,000 pounds. The charges on the balance of the shipment can not be determined without knowledge of the actual weight of that portion. Complaint dismissed. Standard Furniture Co. v. A. G. S. R. R., 115 I. C. C. 243.

(pp) Complainant attacked joint rate of 29c charged on carload shipments of wet wood pulp from Port Arthur, Ont., to Wisconsin Rapids and Biron, Wis., as unreasonable. HELD: Rate attacked not unreasonable, complaint dismissed. Consolidated Water Power & Paper Co. v. C. N. Ry., 115 I. C. C. 310.

(qq) Complainant attacked commodity rate charged on sand, carloads, from Ottawa, Wedron and Utica, Ill., to Sandusky, O., as unjust and unreasonable. Judged by the percentage relationships between the silica sand rates and the sixth class rates the rate on silica sand to Sandusky compares favorably with the rates on the same commodity to other points in Ohio, Indiana, and Michigan to which there is substantial movement. HELD: Rates attacked not unjust or unreasonable, complaint dismissed. Frohman Chemical Co. v. B. & O. R. R., 115 I. C. C. 322.

(rr) Complainant attacked rates charged on box shooks and sawdust, carloads from Albuquerque, N. M., and El Paso, Tex., to Curtiss and Kennard, Ariz., as unreasonable, unjustly discriminatory and unduly prejudicial in their relation to the rates between various points in Arizona, California, Oregon, Washington, Nevada, New Mexico, Texas, Colorado and other states. Curtiss and Kennard are stations on branch lines of the E. P. & S. W. and S. P. respectively, about 7 miles south of Benson, Ariz., and rates to both have been and are the same. The distance from El Paso over the E. P. & S. W. to Curtiss is 289 miles. Over the S. P. to Kennard or Benson and thence E. P. & S. W. to Curtiss is about 270 miles. From Albuquerque the distance over the Santa Fe to Deming, N. M., and E. P. & S. W. to Curtiss is 459 miles; and over S. P. beyond Deming to Kennard or Benson, thence E. P. & S. W. to Curtiss is about 413 miles. There is no joint rate from Albuquerque to Curtiss or Kennard and the combination of the lumber rates to and from Deming is applicable upon shipments via that point or El Paso. Prior to Sept. 1, 1923, this combination was 60.5c to both Curtiss and Kennard under the combination rule. On that date the elimination of the combination rule on shipments moving over the E. P. & S. W. increased the through rate to Curtiss to 65.5c. Prior to Dec. 10, 1923, a specific rate of 40.5c on box shooks was applicable from El Paso to Curtiss. The lumber rate was 39.5c. On that date the specific rate was canceled and the lumber rate became applicable. The evidence shows

that the rate charged on box shooks from Albuquerque were and are excessive. A rate of 33c on box shooks from El Paso would reflect a proper relationship to a rate of 42.5c from Albuquerque and it would be in line with the rates prescribed for comparable distances from northern Arizona and San Pedro. HELD: Rates attacked not unjustly discriminatory or unduly prejudicial but rates on box shooks unreasonable to extent they exceed 42.5c from Albuquerque and 33c from El Paso and rates on sawdust unreasonable to extent they exceed 30c and 23c, reparation awarded. Apache Powder Co. v. A. T. & S. F. Ry., 115 I. C. C. 339.

(ss) Complainant attacked combination rates on rough heading and staves from Winnsboro, La., to Jackson, Miss., as unjust, unreasonable and unduly prejudicial. Shipments moved M. P. to Rayville, La., 23 miles, V. S. & P. to Vicksburg, Miss., and A. & V. beyond 99 miles, total 122 miles, charged 25c, composed of 11c to Rayville and 14c beyond. There was and is a rate of 9c on lumber from Winnsboro to Rayville. The M. P. tariffs from points in Louisiana to Arkansas accord the rates on lumber to staves and heading. The mere fact that the M. P. desires to keep lumber and cooperage stock on its own lines west of the river in order that it may secure a longer haul is no valid reason why it should refrain from becoming a party to joint rates to Jackson in Mississippi valley territory, and no reason is shown why the through rates from Winnsboro to Jackson should not be somewhat less than the combination. HELD: Rates attacked unreasonable to extent it exceeded 19c, reparation awarded. Jackson Traffic Bureau v. A. & V. Ry., 115 I. C. C. 570.

(tt) Complainant attacked through rate on lime, carloads, from Woodville, O., to stations in Baltimore on the W. M. east of Walbrook station as unreasonable, unjustly discriminatory and unduly prejudicial to extent they exceeded 25.5c applicable to Walbrook. Woodville is on the Pennsylvania about 16 miles southeast of Toledo, O. A rate of 25.5c is applicable on lime, in carloads, from that point to Baltimore rate base points, but specific restrictions are placed against its application to shipments to stations in Baltimore on the W. M. In order to effect delivery at those stations complainant must pay a switching charge of 50c per ton, minimum 25 tons, over the Baltimore rate, or it may bill its shipments to Walbrook and reconsign them at a charge of $6.30 per car. In the sale of its product in Baltimore complainant competes with shippers at Luckey, O., a station on the New York Central about 6 miles cross country from Woodville. The Baltimore rate is applicable from Luckey to all W. M. Stations in Baltimore. HELD: 25.5c rate plus switching or reconsigning charges to points on the W. M. east of Walbrook in Baltimore unreasonable and unduly prejudicial to extent they exceeded the rates to Baltimore, reparation awarded. Washington Building Lime Co. v. Pennsylvania R. R., 115 I. C. C. 618.

(uu) Complainant attacked commodity rate of $1.51 charged on 94 cars of sand and gravel, from Portsmouth, O., to Williamson, W. Va., as unreasonable to extent it exceeded $1.39. Portsmouth is on N. & W. 39 miles west of Kenova, W. Va. Williamson is 15 miles east of Naugatuck, W. Va. Between Kenova and Naugatuck defendant has two routes, one, the socalled 12 pole line, 83 miles, and the other the Big Sandy line, 59 miles. Rate attacked applies for the published distance of 137 miles. The rate for the distance of 113 miles over the Big Sandy route would be $1.39, to the basis of which reparation is sought. There appears to be no good reason why the distance scale of rates here considered should not have been applied for the actual distance over this line on traffic between these points. HELD: rate attacked unreasonable to extent it exceeded $1.39, reparation awarded. Good Construction Co. v. N. & W. Ry., 115 I. C. C. 629.

(vv) Complainant attacked commodity rate charged on a car of creosote oil, in barrels, shipped Sept. 17, 1924, from Fort Worth, Tex., to Woodward, Ala., as unreasonable. The car was originally shipped by complainant from Woodward to Fort Worth. The shipment was refused by the consignee and was returned to complainant at Woodward in the same car. Both movements were over Frisco, Rock Island, C. R. I. & G., through Memphis, Tenn., and Terral, Okla. For movement to Fort Worth commodity rate of 62c was charged. For the return movement a combination rate of $1.345 was charged, composed of fifth class rate of $1.06 to Memphis and commodity rate of 28.5c beyond. HELD: Rate attacked

unreasonable to extent it exceeded 62c, reparation awarded. American Tar Products Co. v. C. R. I. & P. Ry., 115 I. C. C. 677.

(ww) Complainant attacked commodity rate of 17.5c charged on carloads of grain shipped in 1923 from Tab, Ind., to Indianapolis, Ind., thence reconsigned to Louisville, Ky., and Cincinnati, O., as unreasonable, unjustly discriminatory, unduly prejudicial and in violation of section four. Tab is a local station on the Danville branch of the N. Y. C., about 5 miles south of Handy, Ind., and 23 miles north of Danville, Ill. Presumably the shipments moved N. Y. C. to Danville and Big Four to Indianapolis, where they were reconsigned and moved thence either to Louisville or Cincinnati over the latter carrier. Charged to Louisville 17.5c to Cincinnati 16c, applicable rate 17.5c. For a number of years prior to May 9, 1918, the rates on grain from Tab were 9c to Cincinnati and Louisville by way of Danville and Big Four and 11c to Cincinnati and 12c to Louisville over other routes. If the 9c rate had been subjected to the general increases and reductions it would be equivalent to 16c. HELD: Rate attacked unreasonable to extent it exceeded 16c, reparation awarded. Indianapolis Board of Trade v. C. C. C. & St. L. Ry., 115 I. C. C. 681.

(xx) Complainant attacked combination rate charged on 44 cars of wood pulp between April, 1923, and Jan., 1925, 5 from Ticonderoga, N. Y., and 39 from Great Works, Me., to Housatonic, Mass., as unreasonable. There was and is no joint rate and charges were collected at combination rate made of an arbitrary of 13c per long ton from Ticonderoga to Delano Jct., to Pittsfield and New Haven local sixth class rate of 11.5c beyond. From Great Works shipments moved as routed Me. Cent., B. & M., B. & A., and New Haven, charged joint sixth class rate of 29.5c. Defendant D. & H., admits that the rate attacked from Delano Junction is out of line with the rates on wood pulp from that point to other destinations generally for similar distances, but insists it should not be expected or required to establish a joint rate over route of movement of the shipments when it has established joint rates over what it describes as its usual routes from and to these points. HELD: Rates attacked and for future unreasonable to extent they exceed 21c from Delano Junction and 27c from Great Works, reparation awarded. Rising Paper Co. v. N. Y., N. H. & H. R. R., 115 I. C. C. 699.

(yy) Complainant attacked rates on strawberries, in 32 qt. crates, in refrigerator cars, from North Carolina to Providence, R. I., in 1922, 1923 and 1924 as unreasonable, and as compared with the rates from the same points of origin to New York, N. Y., unduly prejudicial. The applicable tariff provided that on shipments in refrigerator cars not less than 236 crates would be charged for. Excepting one shipment from Wallace, consisting of 238 crates, all of the shipments were of less than the minimum. Contemporaneously the southern classification, which governed the class rates from these points to Providence rated strawberries in carloads, first class, subject to 17,000 pound minimum. Complainants contend that the charges collected were unreasonable to the extent they exceeded those that would have been assessed in the absence of the commodity rates. HELD: Rates attacked not unduly prejudicial but unreasonable to extent they exceeded first class rates, minimum 17,000 pounds, reparation awarded. Providence Fruit & Produce Exchange v. N. Y. N. H. & H. R. R., 118 I. C. C. 190.

(zz) Complainant attacked commodity rates on two cars of anthracite coal, one shipped May 15, 1923, from Rahn No. 11 Colliery, Pa., and other shipped June 13, 1923, from Lansford Colliery, Pa., originally consigned to Elkhart, Ind., reconsigned to Edwardsburg, Mich., as unreasonable. Shipments moved L. & N. E., to Goshen, Ind., Erie via Salamanca, N. Y., to Bolivar, Ind., Big Four to Elkhart, thence Big Four to Granger, Ind., and G. T. W., to Edwardsburg, 992 miles. Applicable rates were $2.96 per long ton to Salamanca; $2.71 per long ton thence to Granger via Elkhart; and $1.13 per net ton thence to Edwardsburg. Contemporaneously a rate of $2.96 per long ton applied over the L. & N. E. to Goshen, Erie to Black Rock, N. Y., and rate of $2.71 beyond over the G. T. W., distance 902 miles, rate sought. The rate of $5.67 applied from these points of origin to Chicago, Ill., and numerous destinations in a large territory in northwestern Indiana and southern Michigan, but not via all junction points. The rate sought applied over an available route. Complainant used a route

90 miles longer and comprised of the lines of two more carriers and secured the benefit of a reconsigning service. HELD: Rate attacked not unreasonable, complaint dismissed. Russell v. G. T. W. Ry., 118 I. C. C. 209.

(3a) Complainant attacked rates on fertilizer and fertilizer materials, in carloads, shipped within the statutory period from Jackson, Miss., to southern Arkansas as unreasonable, unjustly discriminatory, unduly prejudicial, and in violation of the fourth section. Complainant is satisfied with the present rates. Rates from the Mississippi valley to the southeast are generally on a lower level than rates to the southwest. HELD: Rates attacked not unreasonable or otherwise unlawful, complaints dismissed. Jackson Traffic Bureau v. A. & V. Ry., 118 I. C. C. 217.

(3b) Complainant attacked commodity rate charged on nine cars of bulk corn shipped between Sept. 13 and Oct. 6, 1920, from Blue Island and Chicago, Ill., and Hammond, Ind., to Maine was unreasonable, unjustly discriminatory and unduly prejudicial. Prior to Aug. 26, 1920, the rate on bulk corn from these origin points to New York was 24.5c. The destinations in question take the Rockland, Me., basis on this traffic and that rate was 2c higher or 26.5c. Effective on the date referred to rates in the eastern district were increased 40% and those to New York and Rockland became 34.5c and 37c. In exceptions to the tariffs publishing the increased rates, Portland, Me., and apparently other points in this territory, were named as taking a basis of 2c over New York, in lieu of a 40% increase. Subsequent to the movement the Rockland rate was reduced to 36.5c. HELD: Rate attacked not unreasonable, complaint dismissed. Paris Flouring Co. v. N. Y. C. & St. L. Ry., 118 I. C. C. 291.

(3c) Complainant attacked commodity rates on sulphuric acid, carloads, since April 1, 1923, from El Segundo and Nadeau, Calif., to Curtiss, Ariz., and rate on sawdust, carloads, since April 7, 1923, from Los Angeles, Calif., to Curtis, as unreasonable and unduly prejudicial. No. 16935. The distance from El Segundo to Curtiss is 577 miles. From Los Angeles 558 miles. On May 11, 1922, a rate of 62.5c was published on sulphuric acid, carloads, from these points to Curtiss and remained in effect until May 30, 1925, and reduced on that date to 56.5c. No. 16966. Rate applicable on sawdust from Los Angeles to Curtiss, 558 miles, is 48.5c, and is the same as the rate on lumber. Sawdust is a very low grade commodity and its value is much less than the value of lumber, although it does not load as heavily as lumber, and moves in much smaller volume. HELD: Rates attacked on sulphuric acid since April 1, 1923, unreasonable to extent they exceed 41c, on sawdust since April 7, 1923, unreasonable to extent it exceeded 32c, reparation awarded. Apache Powder Co. v. A. T. & S. F. Ry., 118 I. C. C. 457.

(3d) Complainant attacked commodity rate of $2.84 charged on five cars of bituminous coal shipped on Oct. 10 and Dec. 5, 1922, from West Virginia to Connersville and New Castle, Ind., as unreasonable to extent it exceeded rate of $2.52 applicable over routes other than that over which shipments moved. Shipments were routed by the shippers L. E. & W. without specifying the rate or junction point. They moved over the K. & M. and N. Y. C. to St. Marys O., thence L. E. & W. HELD: Rate attacked not unreasonable, complaint dismissed. Connersville Lumber Co. v. L. E. & W. Ry., 118 I. C. C. 499.

(3e) Complainant attacked sixth class rate of 13c charged on two cars of logs shipped from Arcola, Ind., to Montpelier, O., on June 29, and Aug. 6, 1923, as unjust, unreasonable and unjustly discriminatory to extent it exceeded 65% of sixth class rate. Shipments moved Pennsylvania to Fort Wayne and Wabash beyond. The lumber rate was sixth class. HELD: Rate attacked unreasonable to extent it exceeded 10c, reparation awarded. Liberty Cooperage & Lumber Co. v. Pennsylvania R. R., 118 I. C. C. 505.

(3f) Complainant attacked sixth class rates charged on four cars of logs shipped between Dec. 29, 1922, and April 21, 1923, from Adrian, Grosvenor and Pittsford, Mich., to Hicksville, O., as unjust, unreasonable and unduly prejudicial. Reparation is sought to basis of 9.5c from Grosvenor and 9c from Adrian and Pittsford which rates were established subsequent to the movement and are still in effect. HELD: Rates attacked unreasonable to extent they exceeded 10c from Pittsford, 11c from Adrian and 11.5c from Grosvenor, re-

paration awarded. Crook Son & Co. v. N. Y. C. R. R., 118 I. C. C. 512.

(3g) Complainant attacked rates charged on three cars of automobiles shipped July 17, August 11 and August 17, 1923, from Lansing, Mich., and Springfield, O., to Santa Fe, N. M., as unreasonable, unduly prejudicial and inapplicable. Shipments moved according to shipping instructions over various routes from the origins named to Streator, or Joliet, Ill., or Kansas City, Mo., thence over Santa Fe. First class rate of $3.935 charged, which was the rate to Deming, N. M. First class rate to Columbus was $3.74 subsequently increased to $3.945. HELD: Rate attacked applicable and not unreasonable or otherwise unlawful, complaint dismissed. Thomas Motor Co. v. A. T. & S. F. Ry., 118 I. C. C. 631.

(3h) Complainant attacked commodity rate on sugar from New Orleans, La., to Keokuk, Ia., as unreasonable and unduly prejudicial. Keokuk is a Mississippi river crossing, 39 miles north of Quincy, Ill., and 43 miles south of Burlington. Rate to Chicago is 54c and to Keokuk 57.5c. Short line distance is 918 miles from New Orleans to Chicago and 876 miles to Keokuk. The rate to Keokuk compares favorably with rates to points on the Mississippi river north of Keokuk, and the Commission finds no basis for condemning the adjustment complained of except to deny fourth section relief. Keokuk Shippers Asso. v. A. T. & S. F. Ry., 118 I. C. C. 683.

(3i) Complainant attacked commodity rates charged on dried beans, carloads, from Bovina, Limon, Sterling, and Trinidad, Colo., Huntley, Mont., and Kendrick, Ida., to Florence, Ala., group as unreasonable, unduly prejudicial and unduly preferential of Memphis, Tenn., Corinth, Miss., etc. Florence group is not in Mississippi valley territory, but is in southeastern territory about 150 miles southeast of Memphis and 55 miles east of Corinth. Memphis and Corinth are in Mississippi valley territory. Group joint rates are published on dried beans to the Florence group from the Colorado points of origin. Applicable rate $1.05, minimum 60,000 pounds and $1.28 minimum 40,000 pounds. Defendants show that the rates applicable on dried beans from Memphis and the Ohio river crossings to the Florence group do not compare unfavorably with rates in general to the southeast. HELD: Rates attacked not unreasonable, unduly prejudicial or otherwise unlawful, complaint dismissed. Florence Chamber of Commerce v. A. T. & S. F. Ry., 118 I. C. C. 710.

(3j) Combination rates on coal from certain mines in the New River district of West Virginia, on the C. & O. to interstate destinations on or via the Virginian Ry., and from mines on the Virginian to eastern interstate destinations on or via the C. & O., found not unreasonable, discriminatory, or unduly prejudicial as compared with rates accorded other mines similarly situated, which by trackage agreements or otherwise have the benefit of the district rate on or via either line. Rates sought are not shown to be necessary or that it would be in the public interest to open the markets served by either the Chesapeake or the Viriginian to shippers on the other line. Ragland Coal Co. v. V. Ry., 115 I. C. C. 147.

(3k) Rate equal to 90 per cent of sixth-class on box board from Halltown, W. Va., to Lynchburg, Va., found not unreasonable as compared with lower intrastate commodity rate on wood-pulp board from Covington, Va., to Richmond, it being shown that movement from Covington to Richmond involves but a local single-line haul whereas the movement from Halltown to Lynchburg is over two or more roads. Lynchburg Chamber of Commerce v. B. & O., 115 I. C. C. 465.

(3l) Upon reargument, former report, 101 I. C. C. 138, modified, and combination rates on shelled peanuts from points in Alabama, Florida, Georgia, and South Carolina, to Chicago, Ill., Milwaukee, Wis., Canton and Cleveland, Ohio, South Bend, Ind., and Dubuque, Iowa, and from Nashville, Tenn., to Chicago, found unreasonable due to factors north of the Ohio and Mississippi River crossings. Reasonable rates for future prescribed and reparation awarded only for the period extending back to date of filing of complaint. United Fig & Date Co. v. A. C. L., 115 I. C. C. 643.

(3m) Based upon light traffic density and unfavorable operating and financial conditions, joint distance commodity rate assessed on petroleum crude oil from Texon, Tex., to Texas City, Tex., for coastwise movement, found unreasonable because it exceeded lower rate subsequently established, such lower rate

being literally forced upon carrier to meet pipe-line competition. Kay County Gas Co. v. G., C. & S. F., 115 I. C. C. 736.

(3n) Upon reargument, former report, 92 I. C. C. 722, wherein it was found that class rates from western trunk-line, c. f. a., and trunk-line territories, and rates on various commodities from same territories and from Ohio River crossings and New Orleans, to Virginia, Minn., are not unreasonable or unduly prejudicial in their relation to rates to Duluth Minn., affirmed. Rates assailed do not compare unfavorably with those from and to other points in same territory as Virginia, for comparable distances, and notwithstanding fact that rates to Virginia are made on a combination basis, Virginia derives benefit of depressed rates to Duluth and its growth has not been retarded by rate situation. Moreover, the commission can not condemn through rates as unreasonable merely because they are constructed upon combination. Virginia Chamber of Commerce v. A. A. R. R., 118 I. C. C. 195.

(3o) Through rates may not be condemned as unreasonable merely because they are constructed upon a combination basis. Virginia Chamber of Commerce v. A. A. R. R., 118 I. C. C. 195, 199.

(3p) Complainant alleged rates on zinc and spelter, in pigs, slabs or ingots, in carloads, from Trenton, N. J., to Chattanooga, Tenn., Birmingham, Ala., and Atlanta, Ga., as unreasonable, unjustly discriminatory and unduly prejudicial. It is not susceptible to damage in transit. Box cars are used to prevent pilferage, rated sixth class carloads, southern and official and fifth class in western. But for all important movements, commodity rates are maintained on a basis much lower than the class rates, subject to a substantially higher carload minimum. HELD, rates attacked unreasonable to extent they exceed 44 cents to Atlanta and Chattanooga and 48 cents to Birmingham, minimum 60,000 pounds. Federated Metals Corp. v. Pennsylvania R. R., 120 I. C. C. 181.

(3q) Complainant attacked class rates charged on less car load shipments of liquid meters from Boston to Pacific coast points since Aug. 15, 1922 as unreasonable to extent they exceeded $3.50. Because of the material used in construction and the manner of packing there is practically no loss or damage in transit. These meters are rated first class in western and third in official. Prior to Sept. 1, 1924 charged $5.55 first class, on that date a commodity rate of $2.91 was established from Group D, and effective Mar. 3, 1925 a commodity rate of $3.50 was established from Boston. The class rate as such is not attacked. HELD, rates attacked not unreasonable, complaint dismissed. Hersey Mfg. Co. v. B. & A. R. R., 120 I. C. C. 413.

(3r) Complainant attacked rates, combination charged on 54 cars of scrap iron car wheels shipped between Jan. 1 and Mar. 1, 1923, from Windsor, Ont., Can., to Michigan City, Ind., and Pullman, Ill., as unreasonable and unduly prejudicial to extent they exceeded the rates from Detroit, Mich., by more than 50 cents per gross ton. Charged $1.26 to Detroit, plus $3.66 to Michigan and $3.78 to Pullman. Correct rate Detroit to Michigan City was $3.65. Sixth class rate of 23.5 cents was applicable through to Michigan City and sixth class rate of 25 cents to Pullman, shipments undercharged. HELD, joint class rates charged unreasonable to extent they exceeded to Michigan City $4.20 per long ton and to Pullman $4.50, reparation awarded. Hyman Michaels Co. v. B. & O. R. R., 120 I. C. C. 417.

(3s) In 113 I. C. C. 280 the commission found rates on green or salted hides, pelts, skins, tallow and grease, in straight or mixed carloads shipped since July 1, 1922 from Norfolk, Neb., to Chicago, Ill., unreasonable to extent it exceeded 48.5 cents, and reparation awarded. There is no transportation condition to justify the charging of a relatively higher basis of rates from points in Nebraska such as Norfolk, west of Nebraska differential territory, than from points within that territory, and the fact that the carriers apply the differential basis from certain points in Nebraska and the higher combination basis from other points explains or accounts for the difference in the rates but affords no justification therefor. HELD, original findings affirmed, except that reparation is awarded only on shipments moving since Nov. 17, 1924 the date the complaint was filed. Robinson v. A., T. & S. F. Ry., 120 I. C. C. 452.

(3t) In 104 I. C. C. 104, in a portion of conclusion 3, page 135, the commission prescribed specific joint through rates on cured meats, and green salted

hides, in carloads, from Cedar Rapids, Ia., and from Missouri River packing points, Kansas City, Mo., to Sioux City, Ia., inclusive, to New York and other points in trunk line and c. f. a. territories. In conclusion 2, page 135, the commission prescribed a base rate on fresh meats, in carloads, from Chicago to New York and rates from certain other packing centers in central territory, including St. Louis, Mo., Davenport, Ia., and other upper Mississippi River points to various destinations throughout trunk line and New England territories, based on the application of the percentage system to the base rate. None of the complainants attack the reasonablenes of the rate factors up to the river. They attack only the rates from the Mississippi River crossings to the east, applicable as factors of through rates, on traffic originating west of the river. None of the complainants asked for the establishment of specific or joint rates from the Missouri River points or interior points to the East. HELD, conclusion No. 3 modified, that the rates attacked on cured meats, packed, and green salted hides, in carloads, from the Mississippi River crossings, St. Louis to Dubuque, inclusive, applicable on traffic from origins west thereof, are not unreasonable nor unduly prejudicial in relation to the existing rates on hogs and sheep in double deck cars, and on cattle, from and to the same points. Fresh meats from the Mississippi River. In conclusion 2, commission prescribed a reasonable base rate of 79 cents on fresh meats from Chicago to New York and required that the rates from certain other packing points in central territory should be based upon their respective customary percentages of the base rate. the base from St. Louis, Davenport and other upper Mississippi River crossings, were designated at 117%. HELD, conclusion modified to extent they exceed rates from Chicago by more than 8 cents, rates applicable on traffic originating beyond, basing on St. Louis and other crossings to be correspondingly changed. REPARATION. Claimants have no vested right to awards of reparation based upon the theory that the extent of the unreasonableness must have existed during a period extending from a date two years prior to the filing of their claims until the reduced rates became or may become effective. HELD, reparation denied. HELD, in conclusion No. 6 of original report that the rating in official classification of fourth class and rates on dried, dry salted smoked and pickled meats, loose in carloads, from the various packing points in central, western trunk line, and trans-Mississippi territories to all destinations in trunk line and New England territories unjust and unreasonable to extent it exceeds fifth class, reparation awarded. Morrell & Co. v. N. Y. C. R. R., 120 I. C. C. 537.

(3ta) Finding in prior report, 113 I. C. C. 343, that joint rates on newsprint paper from Espanola, Ontario, Canada, to destinations in Wisconsin, Minnesota, Illinois, Missouri, Iowa, and Nebraska, are and for future will be, in so far as transportation takes place within United States, unreasonable and unduly prejudicial to extent they exceed or may exceed by more than 4 cents per 100 pounds the rates contemporaneously applicable from Sault Ste. Marie, Ontario, to same destinations, affirmed on reconsideration. Spanish River Pulp & Paper Mills v. A. & W., 120 I. C. C. 251.

(3u) Complainant attacked joint rate of $2.77 per long ton charged on coal, carloads, shipped from Dante and Clinchfield, Va., to Lambert Point, Va., for transhipment, as unduly prejudicial to extent it exceeded $2.52 per long ton from Norton, Va., and points west of St. Paul, Va., to Lambert Point. Clinchfield is on the C. C. & O. 3 miles north of Carbo, Va., its junction with the N. & W. Dante is 7 miles north of St. Paul on the C. C. & O. Norton is 24 miles west of St. Paul. Complainants mines are in Clinchfield Group 1, while the other points mentioned are in Group 2. The C. C. & O. has indicated its willingness to establish the $2.52 rate from complainants mines. HELD, rate attacked unduly prejudicial to extent it exceeds the rate from Carbo and St. Paul. Clinchfield Coal Corp. v. C. C. & O. Ry., 122 I. C. C. 37.

(3v) In 88 I. C. C. 747 the Commission found the rates charged on paving and roofing material, carloads, shipped since Jan. 1, 1917 from St. Louis and Kansas City, Mo., Cleveland, Lockland, O., and Chicago, Aurora, Marseilles, Madison and East St. Louis, Ill., to Little Rock, Ark., as not unreasonable or otherwise unlawful. On Nov. 27, 1923 pursuant to 77 I. C. C. 473 a rate of 35c was established from St. Louis to Little Rock, and to Hope and Texarkana, Ark., and Shreveport, La., the alleged preferred points, were 40, 41 and 44c, re-

spectively. Present record affords no basis for reversing the previous finding, complaint dismissed. Cooperative Oil & Paint Co. v. Director General, 122 I. C. C. 227.

(3w) Complainant attacked combination rate charged on a carload of middlings shipped May 22, 1923 from New Castle, Pa., to Pioneer, O., as unreasonable, unjustly discriminatory and unduly prejudicial. Shipment moved as routed P. & L. E. to Youngstown, O., N. Y. C. to Toledo, O., and T. & W. beyond, charged 29.5c composed of 18c to Toledo and 11.5c beyond. Applicable rate was 31c, composed of 19.5c to Toledo and 11.5c beyond. Contemporaneously there was a joint rate of 18c, applicable over Erie or B. R. & P., T. & W. beyond, the intermediate carriers absorbing the reciprocal switching charge of the P. L. E. The tariff was subsequently amended, making the joint rate applicable over other routes, but no change was made in the rate over the route of movement. HELD, rate attacked not unreasonable or otherwise unlawful, complaint dismissed. Newsome Feed & Grain Co. v. P. & L. E. R. R., 122 I. C. C. 329.

(3x) Complainant attacked combination rates on wrapping paper and other paper articles, carloads, from Cincinnati, O., to destinations in Missouri, Kansas, Iowa, Nebraska and Colorado other than the socalled Mississippi river crossings as unreasonable, unjustly discriminatory and unduly prejudicial. Lockland and Arlington Heights are about 11 miles from Cincinnati and Rialto is 22.4 miles therefrom. Both within the switching limits of Cincinnati. The rates from Cincinnati are combination of the sixth class rate of 24c on plain and printed wrapping paper and paper bags, or fifth class rate of 30c on plain or printed garment bags, or the fourth class rate of 42.5c on plain or printed gummed paper tape and shopping bags to East St. Louis, applied as proportional rates to all other Mississippi river crossings as far north as East Dubuque, Ill., plus commodity rates beyond. The latter were prescribed in 66 I. C. C. 571. There are but two different rates on these commodities from the northern mills and from the river west, while from Cincinnati to the river there are three different rates. The different commodity groupings east and west of the river result in five different rates on these commodities from Cincinnati to this destination territory while there are but two different rates from the northern mills. HELD, rates attacked unduly prejudicial and unreasonable to extent they exceed specific rates to specified points. Rates attacked, judged as combination rates, do not produce excessive earnings, and therefore rates not unreasonable in the past. Fox Paper Co. v. A. T. & S. F. Ry., 122 I. C. C. 399.

(3y) The fair measure of the reasonableness of a through rate, exceeding the combination which would apply in the absence of such through rate, is the lowest combination which would apply if the through rate were canceled. Van Dyke Motor Co. v. M. P. R. R., 122 I. C. C. 412, 413.

(3z) Complainant alleged that rates charged on linseed oil, carloads, from Portland, Ore., to Seattle, Tacoma, Spokane and other destinations in Washington, to Boise, Ida., and to San Francisco, Paraffin, Berkely, Los Angeles and other California destinations were unreasonable and unduly prejudicial. HELD, rates attacked to Spokane not unreasonable or otherwise unlawful. The record shows that both the class and commodity rates from Portland to Tacoma and Seattle are now on a lower basis than would apply in the absence of water competition between the Pacific coast ports. HELD, rates attacked not unreasonable or otherwise unlawful, complaint dismissed. Portland Linseed Oil Works v. G. B. Ry., 122 I. C. C. 484.

(4a) While there may be reasons in some instances to justify the construction of grain rates so that the through rates are equal to the combinations of rate factors to and from important grain markets, there is a limit to the extent to which a policy can be followed with propriety in view of, the requirement of the act that all rates must be just and reasonable. Ogden Grain Exchange v. A. & S. Ry., 122 I. C. C 691, 702.

(4b) Combination rates based on Chicago, Ill., charged on shipments of automobiles and extra parts from South Bend, Ind., to Pueblo, Colo., found not unreasonable a s compared with lower combination subsequently established pursuant to commission's decision in 88 I. C. C. 728, or with lower combination contemporaneously in effect at time of movement via Gary, Ind. Tariff containing the Gary-Pueblo factor contained a provision which prevented its use in constructing through rates from points beyond Gary. Under such restriction all

shippers east of the Indiana-Illinois State line are placed upon the Chicago basis on traffic to Colorado and other States, and this constitutes an equalization measure which should not lightly be condemned. Moreover, difference in the total rates is relatively so inconsiderable that it could hardly be said to transgress the "flexible limits of judgment" in rate making. Van Dyke Motor Co. v. M. P., 122 I. C. C. 411.

(4c) The commission has consistently refused to condemn rates on grain merely because they are the same as, or are, in fact, the combination on the primary grain markets. Ogden Grain Exchange v. A. & S., 122 I. C. C. 691, 716.

(4d) Rates on coke and bituminous and anthracite coal from eastern points to Beaver Dam, Wis., found not unreasonable or unduly prejudicial because of factors from Milwaukee to Beaver Dam, or as compared with factors on same commodities from Milwaukee to various other eastern Wisconsin destinations. Factor assailed was established as outgrowth of a general revision of coal rates in Wisconsin with a view to harmonizing rates, and appears to be in line with the general level throughout that State. Through rates in issue are on a group basis, both as to origins and destinations, and represent efforts of years toward balancing the delicate competitive situation obtaining among carriers, producers, and distributors. Complainant's comparisons can not be taken as the measure of reasonableness in this wide territory, nor do exceptions which obtain at competitive Wisconsin points within a short distance of one or more docks show unreasonableness of rates to Beaver Dam. Beaver Dam Chamber of Commerce v. C., M. & St. P., 123 I. C. C. 5.

(4e) Combination rate on sporadic shipment of cane sirup from Inwood, Fla., to Columbus, Ga., found unreasonable as compared with lower rates between various points in same general territory for comparable distances, and to extent it exceeded a lower joint rate subsequently established. Reparation awarded. Hardaway-Cargill Co. v. L. & N., 123 I. C. C. 23.

(4f) Joint rates on shipments of bituminous coal during Federal control from central and southern Illinois to Edgebrook a point within Chicago switching district, and Morton Grove a point immediately outside of that district, found not unreasonable, but combination rates based on Chicago, plus local rate beyond, found unreasonable as compared with lower rates contemporaneously in effect to near-by competing points both within and without the district. See also 73 I. C. C. 152. Reparation awarded. Chicago Coal Merchants Asso. v. Director General, 123 I. C. C. 169.

(4g) Joint rate on lubricating oils and greases from East Chicago, Ind., to Houston, Tex., found unreasonable as compared with rates on petroleum products contemporaneously in effect from various Illinois and Missouri points to Houston for comparable distances and to extent it exceeded lower combination rate contemporaneously in effect based on New Orleans, and subsequently established as a joint rate. Reparation awarded. Sinclair Refining Co. v. A., T. & S. F., 123 I. C. C. 537.

(4h) Complainant attacked joint class B rate charged of 78c on a mixed shipment of freight and vegetable packages and box material March 20, 1924 from Crystal Springs, Miss., to Houma, La., as unreasonable to the extent it exceeded 24c. Crystal Springs is on the I. C. about 158 miles north of New Orleans, La., and 235 miles south of Memphis, Tenn. Houma is on the M. L. & T. in southern Louisiana, about 66 miles west of Gretna, La., opposite New Orleans. Interveners shipments moved, apparently via New Orleans, about 224 miles, exclusive of the distance across the river. A rate of 11.5c on fruit and vegetable package material will be established at an early date from New Orleans to Houma, which, combined with the rate of 13c from Crystal Springs to New Orleans would produce a through rate of 24.5c. HELD, rate attacked unreasonable to extent it exceeded 24.5c reparaawarded. Crystal Springs Mfg. Co. v. I. C. R. R., 126 I. C. C. 4.

(4i) Complainant attacked through rates charged on seven cars of gluten feed from Roby, Ind., to Hobart, Stamford, Grand Gorge, Oneonta, and Bloomsville, N. Y., during 1923 as unreasonable and unduly prejudicial. Shipment to Stamford, 33 miles, and two to Grand Gorge, 42 miles southeast of Oneonta on the U. & D., and two to Oneonta, a junction of the U. & D. and D. & H. 22 miles northeast of Sidney, N. Y., moved Dec. 6, 7, March 13, 20 and 26, 1923. Sidney is 125 miles over the N. Y. O. & W. east of Oswego, N. Y. Roby is 670 miles over the N. Y. C. from Oswego. The

combination of 43.5c charged to Oneonta, as compared with the joint rate of 31c in effect via many other routes, a number of them involving hauls of greater length than via the routes of movement, seems unduly high, and the reason for such a basis, embracing as it did the full sixth class rate for the last 22 miles, is unexplained of record. HELD, rates attacked unreasonable to extent the rate to Oneonta exceeded 31c, and to destinations on the U. & D. unreasonable to extent they exceed 31c to Oneonta plus the local rates of the U. & D. beyond, reparation awarded. American Maize Products Co. v. N. Y. C. R. R., 126 I. C. C. 137.

(4j) Complainant alleged that the rates charged on building and roofing material, in straight or mixed carloads, from Chicago, Ill., and St. Louis, Mo., and points taking same rates to Denver, Colorado Springs and Greeley, Col., since July 10, 1923 have been unreasonable. Rates attacked were 81c from Chicago and 76c from St. Louis prior to July 15, 1924 and 66.5c from Chicago and 61.5c from St. Louis on and after that date. The rates sought are 64c from Chicago and 58.5c from St. Louis. HELD, rates attacked not unreasonable, complaint dismissed. Mountain States Roofing Co. v. A. T. & S. F. Ry., 126 I. C. C. 475.

(4k) Joint rates on box material, including fruit or vegetable packages, from Crystal Springs, Miss. to Houma, La., FOUND unreasonable as compared with lower rates contemporaneously in effect for greater distances from Memphis to points in southern Louisiana from Hope, Ark., to New Orleans; with those prescribed in 80 I. C. C. 132, from Crystal Springs to Mobile; and to extent they exceeded combination rate based on rate contemporaneously in effect from Crystal Springs to New Orleans, plus rate voluntarily established by carriers from New Orleans to Houma. Reparation awarded. Crystal Springs Mfg. Co. v. I. C. R. R., 126 I. C. C. 4.

(4l) Joint rates on cedar posts and poles from points in Alabama, Georgia, and Tennessee to Illinois destinations, found not unreasonable as compared with lower combination rates contemporaneously in effect constructed by use of the combination rule which provides a specific method for constructing through rates made on combination. Carriers cited 100 I. C. C. 219; 120 I. C. C. 550, to support contention that joint rates in excess of combinations are not prima facie unreasonable. They also show that one factor is a proportional rate established to enable shippers in origin territory to compete with shippers of white cedar from western producing points, and that it is therefore subnormal and should not be used to condemn a reasonable through rate. Moreover, numerous rate comparisons show that from points in same general territory to less distant points in c. f. a. and eastern territories, rates are as high or higher than rates assailed. Nebraska Bridge Supply & Lbr. Co., v. A. G. S., 128 I. C. C. 94.

(4m) Complainant attacked commodity rate of 12.5c charged on linseed oil, carloads, from Chicago, Ill., to Milwaukee, Wis., two years prior to Dec. 3, 1925 as unjustly discriminatory and unduly prejudicial to the extent it exceeded 8c in the opposite direction. Shipments originated on the tracks of the Burlington to Chicago, moving via C., M. & St. P. to Milwaukee, the latter carrier absorbing switching and other terminal charges. The unreasonableness of the 12.5c northbound rate has not been established. HELD, rate attacked not unreasonable or otherwise unlawful, complaint dismissed. American Linseed Co. v. C. M., & St. P. Ry., 128 I. C. C. 163

(4n) Rate and minimum weights on poles from San Pedro to Thenard, Calif., being part of through movement from interstate points of shipments reaching San Pedro by water, found not unreasonable or otherwise unlawful as compared with rates accorded competitors at Los Angeles, or with rates and minimum weights on lumber between points in the Los Angeles harbor district. While poles received by competitors are creosoted in the Pacific Northwest, thus reducing weight of poles transported, creosoting is permitted at Thenard and the creosoted poles move at the lower minimum sought on green poles under the through rates from San Pedro to Los Angeles and other southern California destinations. Although none of shipments involved exceeded the applicable minima, evidence does not establish that cars covered by the complaint were loaded to full capacity or that the applicable minimum could not have been loaded. Moreover, in 87 I. C. C. 1, per-car rate on lumber equal to that here assessed was found reasonable. Baxter & Co. v. S. P. Co., 128 I. C. C. 211.

(4o) Joint rates on cement from

Mankato, Minn., to Detroit, Mich., and Toledo and Cleveland, Ohio, found not unreasonable or otherwise unlawful as compared with lower rate subsequently established based on rates to and from Milwaukee, Wis., reduced by application of the socalled combination rule. Complainant introduced comparisons with rates in a different territory but failed to show that traffic circumstances and conditions were similar. Other comparisons indicate that rates assailed were not out of line with contemporaneous rates between points in the same territory. Moreover, rates from Mankato to numerous destinations in c. f. a. territory, distances considered, compare favorably with those assailed and with those subsequently established. Carney Co. v. A. A. R. R., 128 I. C. C. 255.

(4p) Combination rates on grain and products from Oklahoma points to destinations in Louisiana west of the Mississippi River, including points on west bank thereof, and to Mississippi River crossings in Mississippi and Louisiana on east bank thereof, found unreasonable as compared with rates contemporaneously in effect from Kansas City, Mo., and Council Bluffs, Iowa, and to extent they exceed through rates based on those prescribed in Consolidated Southwestern Cases, 123 I. C. C. 203. Reasonable joint through rates prescribed for future. Oklahoma Millers' League v. A. & M., 128 I. C. C. 523.

(4q) Combination rates on grain and products from Oklahoma points to destinations in southeastern and Carolina territories found unreasonable to extent that factors east of Memphis, Tenn., exceed rates based on and approximating the class 12 rates prescribed in Southern Class Rate Investigation 113 I. C. C. 200, and to extent that factors west of Memphis from all points exceed present group rates, computed as provided in Consolidated Southwestern Cases, 123 I. C. C. 203, up to 610 miles and from points at greater distance from Memphis those graded up 1.5 cents on wheat and flour and made less by 10 per cent on coarse grains, for each 50 miles. Factors east of Memphis constructed as above should apply not only on Oklahoma traffic but also from other western states from which through rates are equalized via the various gateways. Reasonable joint through rates prescribed for future. Oklahoma Millers' League v. A. & M., 128 I. C. C. 523.

(4r) Through rates equal to combination of locals on the Virginia cities would clearly not be free from undue prejudice to North Carolina and undue preference of the Virginia cities. Southern Class Rate Investigation, 128 I. C. C. 567, 580.

(4s) Complainant attacked commodity rate of 11c charged on 43 carloads of paving brick between July 5 and 29, 1924 from Murphysboro, Ill., to Martin, Tenn., as unreasonable to extent it exceeded 8.5c. Murphysboro, a local station on defendants line, is in the southern part of Illinois. The shipments moved over I. C. to destination, a distance of 117 miles. At time of movement Murphysboro took the St. Louis, Mo., basis of rates. The rate charged is the result of the decision in Rates to, from and between points south of Ohio River, 64 I. C. C. 306, as modified by the general reductions of 1922. HELD, complaint dismissed. Murphysboro Paving Brick Co. v. I. C. R. R., 128 I. C. C. 635.

(4t) Complainant alleged that commodity rate of $1.73 charged on one car of peaches shipped Aug. 28, 1925 from Palisade, Colo., to Syracuse, N. Y., was unreasonable, unduly prejudicial and in violation of section four. Shipment moved D. & R. G. W. to Pueblo, Colo., Santa Fe to Chicago, Ill., N. Y. C. beyond 2,067 miles. Complainant contended that a rate of $1.38 would be reasonable. This contention is based upon a comparison of the rate assailed with certain rates from peach producing points in Georgia and also upon the fact that the rate of $1.73 also applies from California points to Syracuse. HELD, rate assailed not unreasonable or otherwise unlawful, complaint dismissed. Caruso Rinella Battaglia Co. v. D. & R. G. W. Ry., 128 I. C. C. 687.

(4u) Complainant attacked joint commodity rate of $2.88 charged on two cars of printing presses shipped April 18, 1925 from Vancouver, B. C., to Orlando, Fla., as unreasonable and unduly prejudicial. Machinery and machines including printing presses, are rated class A in western classification, fifth class in the official classification and sixth class in the southern classification. Rate charged is the same as class A except the latter is subject to minimum of 24,000 pounds subject to rule 34. Orlando is on the S. A. L. 181 miles south of Jacksonville, Fla. From Pacific coast

terminals, Group K rates apply to Orlando and Group A rates to New York. When the shipments moved the Group A rate was $2.31. Prior to Jan. 15, 1925 commodity rates to these destinations were on the same basis. Rates from Pacific coast terminals to New York were reduced, it is asserted by defendants, on account of canal competition. The southeastern carriers refused to concur in reductions to group K territory. Combination was $2.7325. HELD, applicable rate was $2.7325 not unreasonable or otherwise unlawful, overcharge to be refunded, complaint dismissed. Duplex Printing Press Co. v. B. C. E. Ry., 128 I. C. C. 692.

(4v) Combination rates on enamel, other than watch dial, from Cicero, Ill., to Chattanooga, Tenn., found unreasonable to extent that factor south of Cairo, Ill., second class under southern classification, exceeded the fifth-class rating contemporaneously applicable in western and official territories and subsequently established in southern. Fact that no carload movement existed at time second-class rating was establishing found not sufficient to justify spread in rating between southern and other territories. Reparation awarded. Tennessee Furniture Corp. v. B. & O. C. T., 128 I. C. C. 701.

(4w) Complainant attacked commodity rate charged on sand, carloads, from Pacific, Mo., to Fort Smith, Ark., as in violation of sections 1, 3, 4 and 6 of the act. Pacific and Fort Smith are each served by the M. P. and Frisco. Distance is 381 miles over Frisco and 530 miles over M. O., charged 12c. In section 2 of the tariff single line distances were published of 11.5c for 381 miles at 14.5c for 530 miles. HELD, rate of 12c not unreasonable over M. P. but it was unreasonable to extent it exceeded 11.5c over the Frisco, reparation awarded. Harding Glass Co. v. M. P. R. R., 128 I. C. C. 754.

(4x) Complainant alleged that rates and charges on numerous cars of coal shipped between March 1, 1920 and July 29, 1923 from Illinois, Indiana, and Kentucky to certain points within the Chicago switching district were unlawful, unreasonable and unduly prejudicial and in violation of the fourth section. The points of origin are mines on the I. C. C., B. & Q., and Big Four in southern Illinois, Indiana and Kentucky. The points of destination are on the C. & N. W. and C., M. & St. P. within the Chicago switching district. Edgewater, Ill., on the latter road, is a representative destination. The shipments were charged the local rates to Chicago, plus an arbitrary provided in the socalled Lowrey tariff. The originating line also published proportional rates from the points of origin to Chicago ranging generally from 10 to 14c per ton lower than the local rates. All of defendants concur in the Lowrey tariffs, and the tariffs of some of defendants publishing the rates to Chicago referred to the Lowrey tariffs for the basis of making rates to Edgewater and the other destinations. They also contained provisions for the application of the proportional rates under certain conditions to the Chicago district. The tariffs of defendant Big Four did not specifically refer to the Lowrey tariff, but did contain an omnibus clause providing for the application of switching and other terminal charges in accordance with the tariff of the delivering road on shipments to points beyond the tracks of the Big Four. In Wilson & Co. v. Director General, 107 I. C. C. 580, the Commission found that, even in the absence of any cross reference, the Lowrey tariff could be used in connection with the tariff of the line haul carrier. It is reasonably apparent that the applicable rates were assessed on these shipments and that the rates constructed by adding to the arbitraries named in the Lowrey tariff the local rates applying from the points of origin to Chicago constituted through rates within the meaning of the tariff provisions restricting the application of the proportionals. HELD, rates charged applicable, not unreasonable or otherwise unlawful, complaints dismissed. Chicago Coal Merchants Asso. v. N. Y. C. R. R., 129 I. C. C. 203.

(4y) Complainant alleged that through commodity rates on canned goods, including canned milk, in carloads, from points in I. F. A. and central territories to Memphis, Tenn., New Orleans, La., and other points in the lower Mississippi valley are unreasonable. In the original report in 14096, 96 I. C. C. 208, involves rates on canned goods from points in Wisconsin and St. Paul, Minn., to the same destination territory. No. 17776. In rates to, from and between points south of the Ohio river, 64 I. C. C. 106, the Commission revised the commodity rates from Ohio river crossings to the Mississippi Valley and prescribed a key rate of 57c on canned goods, in carloads, from St. Louis and Louisville, Ky.,

to New Orleans. Under this readjustment the carriers having the direct routes to the Valley were denied fourth section relief. Carriers operating to the valley through southeastern territory were temporarily given relief with the understanding that such departures from the long and short haul provision of the fourth section were later to be removed and the rates to both territories harmonized. Finally on July 1, 1923 all of the carriers reaching the valley united in a revision of the rates upon a few selected articles over all routes. Canned goods was one of these articles. On Oct. 15, 1924 the canned goods rates from Wisconsin were also increased to approximately the same extent from most points as the rates from Chicago in order to preserve the preexisting differentials. The evidence introduced by all parties seems to establish the fact that the present rates on canned goods to the valley are fairly aligned with those to the rest of the south. For comparable distances they approximate those now in effect in 9702 territory west of the Mississippi river. Complainants are interested principally in the rates from Chicago. These rates in particular appear more favorable in comparison with rates from Chicago to 9702 territory than do rates from points farther south, such as St. Louis. HELD, rates assailed from I. F. A. and central territories to Memphis, Tenn., New Orleans, La., and other points in the lower Mississippi valley not unjust or unreasonable. No. 14096. Prior to the decision in this case rendered Feb. 12, 1925, defendants had increased on Oct. 15, 1924 the rates from Wisconsin under consideration to correspond with the revision of rates from central territory and Chicago upon which they were, and are, constructed. In making the change from Wisconsin the increases were not always uniform. This has brought about a relationship between the points of origin somewhat different from that existing at the time of the first hearing. HELD, former finding that rates from Middleton, Wis., should not exceed the rates from Madison, Wis., by more than 2c is affirmed. Rates from Richland Center, Chilton, Berlin, Sparta, and Neillsville and any other points in Wisconsin no farther from Madison or Milwaukee, whichever is nearer, are and for future will be unreasonable to extent they exceed the rates from Madison and Milwaukee to the same destinations by more than 8c, rates throughout the balance of the territory here considered not unreasonable or otherwise unlawful. National Canners Asso. v. B. & O. R. R., 129 I. C. C. 269.

(4z) Complainant assailed fifth class rate of 94c charged on one car of soy, soja, or soya beans, from Bloomington, Ill., to Fort Smith, Ark., on April 18, 1924 as unreasonable. Shipment moved C. & A. to East St. Louis, Ill., Frisco beyond. On May 21, 1924 defendants established a rate of 38c from Fort Smith to Bloomington composed of 31c to St. Louis and 7c beyond. The 31c rate also applied from St. Louis to Fort Smith. On Jan. 31, 1926 defendants established a joint commodity rate of 42.5c from Bloomington to Fort Smith, made an arbitrary of 11.5c over the 31c rate from St. Louis. HELD, rate charged unreasonable to extent it exceeded 38c, reparation awarded. Binding Stephens Seed Co. v. A. T. & S. F. Ry., 129 I. C. C. 291.

(5a) Complainant alleged joint commodity rate of 15.5c charged on 88 cars of paving brick from Buffalo, Kas., to Dodge St. Irvington, Neb., during June 1924 was unreasonable and unduly prejudicial. Dodge St. is northwest of South Omaha, Neb., 5 miles beyond the switching limits. A joint rate of 13c was established July 1, 1924. Buffalo takes the same rate as Chanute, Kas. Dodge St. is 334 miles from Chanute and 347 miles from Buffalo, routing M. P. and C. & N. W. Galesburg, Ill., is 347 miles from Dodge St., and 13c rate applies. HELD, rate assailed not unreasonable but unduly prejudicial to extent it exceeded the rate from Galesburg, reparation awarded. Buffalo Brick Co. v. C. & N. W. Ry., 129 I. C. C. 294.

(5b) Complainant attacked rates charged on 24 cars of grapes from California to Ely, Gilbert, Chisholm, Hibbing and Keewatin, Minn., between Aug. 17 and Oct. 10, 1924 as unreasonable. Charged $1.99 to Gilbert and Hibbing $2.005 to Chisholm and Keewatin, and $2.07 to Ely. In Hansen Peterson Co. v. A. T. & S. F. Ry., 113 I. C. C. 575 the Commission found the rates charged unreasonable to extent they exceeded $1.73 the rate to Duluth. HELD, rates assailed unreasonable to extent they exceeded $1.73, reparation awarded. Fena v. A. T. & S. F. Ry., 129 I. C. C. 311.

(5c) Complainant alleged that the

combination rates on lumber and other forest products, in carloads, from points in Oregon and Washington on the S. P. & S., C. M. & St. P., G. N. to destinations in Minnesota, Montana, North Dakota and South Dakota west Duluth and Cardigan Jct., Minn., on the main line and branch lines of the Soo Line, are unreasonable, unjustly discriminatory and unduly prejudicial. At the hearing defendants conceded that joint through rates on the socalled coast group basis from the territory of origin should be established. The carriers, however, could not agree as to the routes over which such rates should apply. HELD, rates assailed not unreasonable or unjustly discriminatory but for future will be unduly prejudicial to extent they exceed the rates from the coast group. West Coast Lumbermens Asso. v. C. M. & St. P. Ry., 129 I. C. C. 363.

(5d) Complainant alleged that the rates from Dawkins, Ky., to central and trunk line territories on carloads of lumber originating at Royalton are unreasonable and unduly prejudicial. Royalton is on the Kentucky Railway 16 miles south of Dawkins. No joint rates are in effect from Royalton. Through rates to the destinations here considered are composed of the local rates of the Kentucky Ry. to Dawkins plus the rates maintained from that point by the C. & O. The latter factor also applies on shipments originating at Dawkins. With the exception of Blue Jay Jct., the C. & O. maintains proportional rates from the junction points which range from 3 to 5.5c less than the rates applicable on shipments originating at the junctions. Dawkins is about 62 miles south and Morehead is 64 miles west of Catlettsburg, Ky. Hitchins is intermediate to Morehead and Ashland, Ky. Blue Jay Jct., is about 15 miles south of Prince, W. Va., the junction of the Piney branch with the main line of the C. & O. Rates from Dawkins to central territory are made from 3.5c to 5c higher than from Catlettsburg. To eastern destinations, the Dawkins rates exceed rates from this main line point by amounts ranging from 6 to 9c. HELD, rates from Dawkins as applied on shipments from Royalton not unreasonable but will be unduly prejudicial to extent they exceed rates made the same differential under the local rates from Dawkins as the proportional rates from Meadow Creek to the same destinations are made under the local rates from the latter point. Dawkins Lumber Co. v. C. & O. Ry., 129 I. C. C. 415.

(5e) Complainant alleged that rates charged on muriatic, sulphuric and nitric acids, in carboys, in straight or mixed carloads, from Kansas Cty, Mo., Grasselli, Ind., and Hegewisch, Ill., to Omaha, Neb., were unreasonable. Short line distance to Omaha are, from Kansas City 200 miles, from Hegewisch 495 miles and from Grasselli 496 miles. They are generally loaded in box cars in two tiers and braced by strips of lumber. Western classification rates these acids, in carboys, class A minimum 30,000 pounds and, excepting nitric acid, in tank cars, fifth class. The rates on acids in carboys are usually higher than on acids in tank cars. Since June 24, 1918 commodity rates have been in effect from Kansas City to Omaha, on muriatic and sulphuric acids, in tank cars, whereas class rates applied on these acids in carboys until commodity rates were established May 15, 1923 over the U. P. and Nov. 30, 1923 over the Burlington. The foregoing is also true of the rates from Chicago to Omaha, except that commodity rates on acids, in carboys, were established May 1, 1923. Class A rates are still in effect on nitric acid, in carboys. HELD, rates assailed not unreasonable, complaint dismissed. Bruce & Co. v. C. & N. W. Ry., 129 I. C. C. 435.

(5f) Complainant alleged that commodity rates on petroleum products, carloads, from Augusta, Topeka and El Dorado, over the Santa Fe via Superior, Neb., or via Kansas City or other lower Missouri river points, thence Burlington to St. Francis, Kas., and intermediate destinations in Kansas and Nebraska on that line, were and are unreasonable. The destinations are on the main line of the Burlington west of Superior to Orleans, Neb., and on its branch line extending beyond Orleans to St. Francis, which is 133 miles from Orleans and 210 miles from Superior. Augusta and El Dorado are grouped with and take the same rates as other refining points in Kansas and Joplin, Mo., Group 2. The joint rates were and are restricted to apply via Kansas City or St. Joseph, Mo. Joint rates are not in effect via Superior. The extent of the circuity via the Missouri river points is illustrated in the haul from Augusta

to Bostwick via Kansas City, which is about 105% greater than via Superior. Under section 15 paragraph 3 of the act, Commission is required to establish through routes and joint rates whenever deemed by it to be necessary or desirable in the public interest. That joint rates via Superior are desirable in the public interest is evident from the facts that traffic can be and is interchanged at that point; that the hauls via Kansas City or St. Joseph are in general excessively circuitous; and that lower rates would obtain via Superior because of the much shorter distances via that junction. The denial to complainants of reasonable rates via Superior can only be said to be in the interest of the carriers. HELD, assailed rates from Augusta and Topeka to St. Francis, Bird City and Atwood via Kansas City or St. Joseph unreasonable to extent they exceed 49c, reparation awarded; rates from Augusta and El Dorado via Superior for future unreasonable to extent they exceed 33c to Riverton, 35c to Orleans, 38c to Marion, and 40c to St. Francis. White Eagle Oil & Refining Co. v. C. B. & Q. R. R., 129 I. C. C. 467.

(5g) Complainant alleged through commodity and combination commodity rates charged on cottonseed, carloads, since Jan. 1925 from Cairo, Ill., Success and Corning, Ark., and Essex and Neelyville, Mo., to Newton, Miss., were and are unreasonable, unjustly discriminatory and unduly prejudicial. Newton is on the G. M. & N. and Y. & M. V., 64 miles east of Jackson, Miss., and 31 miles west of Meridian, Miss. No cottonseed has moved from Cairo to Newton over the I. C. since that time. A joint rate applied from Cairo, and combination rates from the other points. Shipments from Cairo to Newton prior to Feb. 5, 1925 were assessed a 28.5c rate. When the shipments moved a 22.5c rate applied in the reverse direction. On April 17, 1926 the rate from Cairo to Newton was reduced to 22.5c. HELD, rates assailed not unreasonable or otherwise unlawful, complaint dismissed. Newton Oil Mill v. A. & V. Ry., 132 I. C. C. 33.

(5h) Complainant alleged that through commodity and combination rates charged on green salted hides, carloads, from New Orleans, La., group and from Jasper, Ala., to Manchester, N. H., were and are unreasonable and unduly prejudicial. Manchester is on the B. & M. 52 miles northwest of Boston, Mass., and takes Boston rates. 20 shipments from New Orleans were delivered to the I. C. unrouted and moved between Feb. 15, 1926 and Dec. 17, 1926, charged joint commodity rate of 71c. Six shipments were delivered to the Northern Alabama unrouted and moved between Nov. 14, 1925 and Jan. 14, 1927, over that line, the Southern and connecting carriers, charged 84c, composed of sixth class 22.5c to Birmingham and commodity rate of 61.5c beyond. The rate sought from Jasper is that proposed by the southern carriers but not published because their eastern and northern connections refused to concur therein. The rate sought from New Orleans is the same as that in effect prior to Feb. 1, 1926 and is 5.5c less than the rate sought from Jasper, although the distance from New Orleans over the route of movement is about 500 miles longer. HELD, rate assailed from New Orleans not unreasonable; rate assailed from Jasper unreasonable to extent it exceeded 73c, reparation awarded. International Shoe Co. v. I. C. R. R., 132 I. C. C. 37.

(5i) Complainant alleged that the joint rates and combination rates over the Ohio river crossings charged for the transportation of cane fibre lumber and cane fiber board, shipped from New Orleans switching district to points located, generally speaking, in central territory were and are unreasonable and unduly prejudicial as compared with rates maintained on insulating and construction materials, fibre board, and wall board, from Louisiana, Kansas, Wisconsin, Minnesota and New York to the same destinations. Fiber board and pulpboard are rated class A in southern territory, sixth class in official territory but rates on the basis of 90% of sixth class apply in central territory by exception to the classification. Local commodity rates are published on fiber board from New Orleans to Ohio river crossings, and also proportional rates which are 4.5c lower than the local rates to the same points. Specific joint rates are published to some points in central territory, and to other points, which are grouped to some extent, joint rates are made by using a territorial directory in connection with the specific rates. To other destinations combination rates apply. The factors used in constructing

the combination rates from New Orleans and also used in determining the amount of the joint rates, are the proportional rates to the Ohio river crossings and 90% of sixth class rates beyond. A joint rate of 45c applies from New Orleans, Port Chalmette, La., and Mobile, Ala., to Bay City, Mich., 1,154 miles from New Orleans. Defendants filed schedules subsequent to the hearing which proposed to cancel this rate and to apply in lieu thereof the combination rate of 51.5c, which was suspended in I. & S. 2892. The evidence in this proceeding fairly justifies defendants contention that the 45c rate to Bay City was established through error. The 51.5c rate here proposed to Bay City is on the same general level as the rates here assailed to points in the surrounding territory. HELD, where rates exceeded the aggregate of the intermediate rates they are unreasonable, but with this exception rates assailed not unreasonable or unduly prejudicial. Suspended tariffs justified. Celotex Co. v. A. C. & Y. Ry., 132 I. C. C. 190.

(5j) It is of course true that the mere fact that through rates are made upon a combination basis does not prove that they are unreasonable, particularly where the combinations are made up, as they often are, of proportional rather than local rates. The tendency of the Commission has been to disapprove the practice of constructing interterritorial rates upon a combination basis. Southern Cement Rates 132 I. C. C. 427, 449.

(5k) Failure of Illinois Central to maintain the same through rates via Memphis, Tenn., with transit arrangements thereat as it contemporaneously maintains via East St. Louis and Cairo, Ill., with transit at those points, on grain and products from points in Iowa, Illinois, Minnesota, and Wisconsin to destinations on its lines in Arkansas and Texas south of Brinkley, Ark., found unduly prejudicial. Distances and rates via the three markets are substantially the same from Omaha, Nebr., and various other points. Undue prejudice ordered removed. American Grain & Hay Co. v. I. C., 129 I. C. C. 225.

(5l) Upon further consideration through rates on horses and mules from St. Louis, Mo., Ohio River crssings, and numerous other points, to Atlanta, Ga., and certain other points, found not unreasonable nor in violation of aggregate-of-intermediates clause of section 4 of the act. Rates assailed compare favorably with rates contemporaneously maintained on like traffic from Ohio and Mississippi River crossings to other cities in the Southeast and with distance scale found reasonable for future in original report. Moreover, since disparity between through rates and combination rates appears to be due to low level of latter rather than any excessiveness in former, presumption of unreasonableness has been successfully rebutted. Findings in previous reports 63 I. C. C. 6; 74 I. C. C. 419; 93 I. C. C. 325, reversed. Hudson Mule Co. v. L. & N., 129 I. C. C. 365.

(5m) Contention that commission has power to prescribe maximum reasonable joint rates only, and that inasmuch as all-rail rates are depressed they can not properly be used as a yardstick for measuring maximum reasonable rail-barge rates, not sustained. Obviously if another through route is sought between certain points in cmpetition with exisiting through routes, joint rates prescribed over the new through route must be comparable with those over existing through routes or they will be of no avail. Under section 15 (3) of act, commission is empowered to establish through routes and joint rates "or the maxima or minima, or maxima and minima, to be charged (or, in case of a through route where one carrier is a water line, the maximum rates, fares, and charges applicable thereto)," which is an alternative to preceding provision empowering commission to establish through routes and joint rates without specifying that latter must be on either maximum or minimum level. Doubtless rates must be reasonable but must not necessarily reach pinnacle of reasonableness. See 92 I. C. C. 528, 546, and other cited casts. Inland Waterways Corp. v. C. G. W., 129 I. C. C. 521, 529, 531.

(5n) Joint water-and-rail rates on sugar from San Francisco, Calif., and points taking same rates, to Spokane, Wash. through ports of Portland, Oreg., and Seattle and Tacoma, Wash., found not unreasonable or otherwise unlawful as compared with rates contemporaneously in effect from Salt Lake City and Ogden, Utah, and elsewhere, but local rate from Portland, Oreg., to Spokane,

Wash., found unreasonable as compared with rates between various points for comparable distances. Reasonable rates prescribed for future and reparation awarded. M'Clintock-Trunkey Co. v. McCormick S. S. Co., 129 I. C. C. 591.

(5o) Joint rates on wool, in the grease, in sacks, from points in Nebraska, Kansas, and Missouri, just west of Missouri River, to Boston, Mass., based on distance scale prescribed in Wool Rates Investigation, 1923, 91 I. C. C. 235, found not unreasonable, unduly prejudicial, or unjustly discriminatory, as compared with combination of proportional rates previously in effect over same territry; with rates prescribed in 77 I. C. C. 431, fom Iowa points to Boston; and rates to Boston from territory west of that here involved. Attack is directed against reasonableness of scale as applied from a small portion of territory, which exceeded for a time the aggregate of intermediates. However, record shows this violation was removed by certain tariff restrictions and presumption of unreasonableness found to have been rebutted. Boston Wool Trade Asso. v. A., T. & S. F., 129 I. C. C. 681.

§13a. Burden of Proof.

See Evidence I.

(a) Where issue is one of reasonableness and propriety of through charges from point of origin to final destination, mere fact that such through charges included a factor which may have been too high is not controlling if total charges were not unreasonably high. Wright Lumber Co. v. A. A., 112 I. C. C. 337, 339.

(b) Complainant attacked commodity rate charged on 17 cars of bituminous coal shipped since July 18, 1925, from Earlington and Morton, Ky., to Shawneetown, Ill., as unreasonable, unjustly discriminatory and unduly prejudicial as compared with rates to point on defendant's line between Ashley, Ill., and East St. Louis, Ill. Shawneetown is the terminus of a branch line of defendant extending generally southeastwardly from McLeansboro the junction with defendant's Nashville-St. Louis line. Earlington and Morton are on this latter line and are included, as to coal, in the socalled western Kentucky group 2. The shipments moved wholly over defendant's rails, 157 miles from Earlington and 160 miles from Morton. Charged $1.80, rate claimed $1.485. Complainant's evidence of unjust disdiscrimination and undue prejudice consists wholly of a showing of the lower rates to the alleged preferred points. When the competitive situation obtained with respect to rates on coal to East St. Louis is kept in mind it becomes apparent that the showing is not persuasive. HELD: Rate charged not unreasonable or otherwise unlawful, complaint dismissed. Clayton v. L. & N. R. R., 113 I. C. C. 747.

(c) The Commission may properly give sympathetic consideration to straitened financial circumstances when passing upon the propriety of establishing or continuing through routes and joint rates. Restrictions in routing over S. L. & U. R. R., 122 I. C. C. 208, 212.

(d) Complaint is directed against the through rates. It is not a complete defense of a through rate to show that each factor composing it is reasonable for local application. The through rate must be shown to be reasonable. Fox Paper Co. v. A. T. & S. F. Ry., 122 I. C. C. 399, 402.

(e) Upon further consideration, finding in former report, 115 I. C. C. 357, that proposed elimination of Salt Lake & Utah R. R., an electric line, as an intermediate participating carrier in the routing of eastbound and westbound transcontinental traffic was not unreasonable or otherwise unlawful, affirmed. The inclusion of the Salt Lake & Utah in transcontinental routes can benefit no one but that line, and can add nothing to transportation facilities. It will result, rather, in inefficient and uneconomical operation, upon which the commission is unwilling to place its stamp of approval. Restrictions in Routing over S. L. & U., 122 I. C. C. 208.

(f) Existence of option contracts on shares of stock of a carrier, issued to shippers and conditioned upon the routing of traffic over the carrier's line, can have little weight in the consideration of whether or not the line of the carrier issuing the option contracts should be eliminated as an intermediate carrier in the routing of transcontinental traffic. The proper remedy for the practice of entering into such contracts, assuming it to be illegal, would be the elimination of the practice rather than of the carrier, in the routes. Restrictions in Routing over S. L. & U., 122 I. C. C. 208, 209, 210.

(g) The commission may properly give sympathetic consideration to the financial circumstances of carriers when passing upon the propriety of establishing or continuing through routes and joint rates. See 107 I. C. C. 523. However, the financial status of a weak line is not of such importance that all other elements must be subordinated to it. Restrictions in Routing over S. L. & U., 122 I. C. C. 208, 212, 213.

(h) It is not a complete defense of a through rate to show that each factor composing it is reasonable for local application—the through rate must be shown to be reasonable. See 96 I. C. C. 485. Fox Paper Co. v. A., T. & S. F., 122 I. C. C. 399, 402.

§13½. Factor of the Rate.

See Class Rates §2; Proportional Rates.

(a) Through rates on fresh meats from points west of Mississippi River to destinations in trunk-line and New England territories found unreasonable for future to extent they exceed lowest combination of contemporaneous factors west of Mississippi River or Chicago, plus rates herein found reasonable east thereof. Reasonable rates prescribed. Morrell & Co. v. N. Y. C., 104 I. C. C. 104, 136.

(b) Rates assessed on shipments of saw logs from Tobin's Siding and Ramsay, to Sheboygan, Wis., thence reconsigned to Wausau, Wis., found inapplicable and unreasonable to extent that factor from points of origin to reconsignment point exceeded lower contemporaneous rate on "Saw Logs and Bolts for Manufacture-Products to be reshipped," logs having been manufactured at Wausau and products reshipped. By virtue of reconsigning tariff, haul from Sheboygan to Wausau became part of a through movement, and it follows logically that all conditions attaching to factor from Sheboygan to Wausau attached likewise to rate for through movement. Reparation awarded. Oelhafen-Mondeau Co. v. C. & N. W., 104 I. C. C. 295.

(c) Under ordinary conditions practice of making through rates by adding to a rate for a long distance the local rate from basing point to destination, a relatively short distance beyond, can not be approved. Jewel Co. v. A., T. & S. F., 104 I. C. C. 380, 384.

(d) Rates on cattle and hogs from Chicago, Indianapolis, and South St. Paul to Allentown, Pa., found unreasonable to extent component from East Penn Junction, Pa., the interchange point, exceeded industrial switching charge from that point. Reasonable rate prescribed for future and reparation awarded. Arbogast & Bastian Co. v. L. V. R. R. 107 I. C. C. 105.

(e) Rate on bituminous coal from South Providence and Harbor Junction Wharf, R. I., to Sterling, Conn., as part of a through interstate movement from Virginia mines by rail and water, found unreasonable to extent it exceeded lower contemporaneous rate on like traffic from New Haven and Stratford to other destinations in Connecticut for comparable distances found reasonable in 83 I. C. C. 563. Reasonable rate prescribed and reparation awarded. United States Finishing Co. v. N. Y., N. H. & H. 107 I. C. C. 412.

(f) Rates on crate and box material from Bainbridge and Brunswick, Ga., to destinations in Florida on Florida East Coast Ry., found unduly prejudicial to complainants and unduly preferential of their competitors shipping intrastate in Florida to extent that the factors from Jacksonville exceed rates contemporaneously maintained on like traffic for equal distances moving intrastate from points in Florida to same destinations. Elberta Crate Co. v. A. C. L. 107 I. C. C. 499.

(g) Upon further hearing, rate on wrapping paper from Madison, Me., to New Hope, Pa., found unreasonable to extent that proportional rate comprising factor to Brunswick, Me., exceeded lower proportional rate from Enfield, Howland, Montague, and Lincoln, Me. farther distant points, which lower rate was established from Madison subsequent to movements here involved. Reparation awarded. To this extent former report, 88 I. C. C. 593, reversed. Universal Paper Bag Co. v. M. C., 107 I. C. C. 661.

(h) Rates on logs for movement from Cooper's Point to Victor Talking Machine Company's siding, both points being within the switching district of Camden, N. J., the original movement having been by barge from James River landings, Va., found unreasonable as compared with charges on various commodities for similar hauls between points within the Philadelphia indus-

trial district, and to the extent they exceeded lower switching charge contemporaneously in effect for the same movement on logs but restricted in its application so as not to apply on shipments arriving at or moved from Camden by water. Reparation awarded. Rickards v. P. R. R., 109 I. C. C. 297.

(i) Rates on vegetables from Jacksonville, Fla., to Wichita, Kans., except cabbage and potatoes, found unreasonable and unduly prejudicial to extent the factors, Jacksonville to Wichita, exceeded the factors, Jacksonville to Kansas city, by more than 10 per cent. Reasonable and nonprejudicial rates prescribed for future and reparation awarded. Wichita Chamber of Commerce v. A. & V., 109 I. C. C. 368.

(j) Factors of through rates on traffic destined beyond should be lower than local rates, except where latter are shown to be depressed by special conditions to an extent which makes them reasonable for application as proportional rates. Wichita Chamber of Commerce v. A. & V., 109 I. C. C. 368, 376.

(k) Combination through rate applicable on anthracite coal from mines in Pennsylvania to Minneapolis, Minn., found unreasonable to extent factor beyond Suspension Bridge exceeded rate contemporaneously in effect over other and longer routes, which lower rate was subsequently established over route of movement. Transportation conditions over various routes are similar, and failure to include in tariff the routing here considered was due to error. Waiver of undercharges authorized. Elliott Fuel Co. v. M., St. P. & S. S. M., 109 I. C. C. 385.

(l) Rates on pulp wood from Minnesota points to Wisconsin Dam and Kings, Wis., points served exclusively by Marinette, Tomahawk & Western Ry., when routed from Duluth or Missabe Junction over the Soo Line via Bradley, Wis., thence over the Marinette, found unreasonable because of factor from Duluth or Missabe Junction to destinations. Reparation awarded and a reasonable proportional rate, which takes into consideration the financial condition of the Marinette and fact that movement requires a haul over two lines, prescribed for future. Tomahawk Kraft Paper Co. v. C. & N. W., 109 I. C. C. 517.

(m) Combination rates, component factors of which are joint rates, assessed on gasoline moving from Peckham, Okla., to Port Arthur, Ontario, Canada, found not unreasonable or otherwise unlawful, due to factor beyond Duluth, or as compared with lower rates contemporaneously maintained to Winnipeg. In an endeavor to establish unreasonableness, complainant showed distances and rates on gasoline from Peckham to North Dakota points and on various commodities moving from Duluth to Port Arthur. However, competition met by shippers at Winnipeg is due to fact that oil is shipped by tank steamers on Lake Superior, carrier competition and equalizing of commercial advantages between neighboring destination points being controlling elements in establishing petroleum rates to the Northwest. Northwestern Oil Co. v. St. L.-S. F., 112 I. C. C. 488.

(n) Rates on canned meats from Atlanta, Ga., to Chicago, Ill., found unreasonable due to the factors from Atlanta to the Ohio River crossings. The omission of canned meats from the canned-goods list clearly was and is an exception to the general basis of commodity rates on canned goods in the Southeast, numerous comparisons of rates from and to other points indicate that the assailed factor and through rate resulting from its use were and are inherently unreasonable, and the fact that canned meats are classified with other canned goods and that the proportional c. l. rate on canned meats exceeded both the local and proportional l. c. l. rate on other canned goods is prima facie evidence of unreasonableness of the rates assailed. Reasonable rates for the factor Atlanta to Ohio River crossings prescribed for the future, reparation awarded, and original report, 93 I. C. C. 360, reversed. Armour & Co. v. L. & N., 112 I. C. C. 695.

(o) Rates charged on one car of poles originally shipped from Colville, Wash., to Minneapolis, Minn., there stored and subsequently reforwarded to Zwingle, Iowa, found not unreasonable, discriminatory, or unduly prejudicial; except that local rate from Minneapolis to Zwingle was unduly prejudicial to extent it exceeded a lower proportional contemporaneously in effect on similar traffic shipped from territory west of the Montana-Dakota State line to Min-

nesota Transfer and Cologne, Minn., for storage and reforwarding to same ultimate destination. Lindsley Bros. Co. v. G. N. Ry., 113 I. C. C. 166.

(p) Combination through rates on live poultry from numerous points in Tennessee to New York, N. Y., found unreasonable to extent that factor from Harriman, Tenn., to New York exceeded a lower proportional rate contemporaneously in effect from Chattanooga to New York, which lower rate was subsequently established from origin points here involved. Reparation awarded Getz v. T., K. & N. R. R., 113 I. C. C. 173.

(q) Complainant attacked combination rate of 68c composed of 49.5c to Grand Jct., Colo., and 18.5c beyond charged on nine cars of asphalt shipped between Sept. 4 and Oct. 30, 1924, from Richmond, Calif., to Delta, Colo., as unreasonable. Shipments moved Santa Fe to Stockton, Calif., 68 miles, W. P. to Salt Lake City, 834 miles, and D. & R. G. W., beyond 347 miles. From Richmond and other California terminals to Pueblo and Denver, Colo., rate was and is 49.5c. A proportional rate of 10c was established Nov. 8, 1924, from Grand Jct. to Delta, resulting in a rate from Richmond of 59.5c, the present rate. Delta is 51 miles from Grand Jct. HELD: rate attacked unreasonable to extent the factor from Grand Jct. to Delta exceeded 10c, reparation awarded. Strange MaGuire Paving Co. v. A. T. & S. F. Ry., 118 I. C. C. 509.

(r) Shipments of condensing machinery, condensers, pumps, and parts thereof from North Philadelphia, Pa., to Florida points moved under combinations, the factor beyond Jacksonville being based on rates per carload, minimum 20,000 pounds excess in proportion. Tariff naming rates was governed by exceptions to the classification which omitted the words "excess in proportion." Upon contention of shipper that, due to such omission, the rates stated in the tariff were the applicable total charges for each carload, regardless of weight of contents, HELD: While omission of phrase made application of rates confusing, the tariff naming them stated that they applied "Per Carload. As prescribed in classification, excess in proportion," thereby supplying the measure of the carload unit while the minimum weight was supplied by the classification exceptions. Rates assailed were, therefore, applicable. Wheeler Mfg. Co. v. A. C. L., 115 I. C. C. 527.

(s) Combination rate on asphalt from Richmond, Calif., to Delta, Colo., found unreasonable as compared with lower rates contemporaneously in effect to destinations in the Denver group and to extent it exceeded a lower rate subsequently established when a proportional rate of 10 cents was made effective from Grand Junction to Delta on shipments originating beyond. Reparation awarded. Strange-Maguire Paving Co. v. A., T. & S. F., 118 I. C. C. 509.

(t) Combination rates charged on cordwood from Twin and Crosby, Miss., to Braithwaite, La., found unreasonable due to factor of the Louisiana Southern Ry., from New Orleans to Braithwaite. Reparation awarded. E-Z Opener Bag Co. v. P. R. V., 118 I. C. C. 524.

(u) Rates on coke and bituminous and anthracite coal from eastern points to Beaver Dam, Wis., found not unreasonable or unduly prejudicial because of factors from Milwaukee to Beaver Dam, or as compared with factors on same commodities from Milwaukee to various other eastern Wisconsin destinations. Factor assailed was established as outgrowth of a general revision of coal rates in Wisconsin with a view to harmonizing rates, and appears to be in line with the general level throughout that State. Through rates in issue are on a group basis both as to origins and destinations, and represent efforts of years towards balancing the delicate competitive situation obtaining among carriers, producers, and distributors. Complainant's comparisons cannot be taken as the measure of reasonableness in this wide territory, nor do exceptions which obtain at competitive Wisconsin points within a short distance of one or more docks show unreasonableness of rates to Beaver Dam. Beaver Dam Chamber of Commerce v. C., M. & St. P., 123 I. C. C. 5.

(v) Tariffs naming one-factor through ocean-rail rates between interior trunkline and eastern defined-territory points and the Southwest and Kansas-Missouri territory without concurrence of rail lines to the north Atlantic ports found unlawful. Such rates required to be published as joint through rates in accordance with provisions of section 6 of the act and commission's tariff rules

promulgated pursuant to that act. Consolidated Southwestern Cases, 123 I. C. C. 203, 380.

(w) Rates on hollow building tile from Volant, Pa., to Hamersville, Ohio, found unreasonable to extent that factor from Carrel Street (Cincinnati), to Hamersville exceeded lower rate subsequently established and contemporaneously applicable on common, pressed, fire, or paving brick. In 68 I. C. C. 213, equal rates were accorded face, fire, and paving brick, hollow building tile, and other clay products of similar transportation characteristics from and to same points east of the Rocky Mountains. Reparation awarded. Moores-Coney Co. v. C., G. & P., 123 I. C. C. 559.

(x) Rate and minimum weights on poles from San Pedro to Thenard, Calif., being a part of through movement from interstate points, of shipments reaching San Pedro by water, found not unreasonable or otherwise unlawful as compared with rates accorded competitors at Los Angeles, or with rates and minimum weights on lumber between points in the Los Angeles harbor district. While poles received by competitors are creosoted in the Pacific Northwest, thus reducing weight of poles transported, creosoting is permitted at Thenard and the creosoted poles move at the lower minimum sought on the green poles under the through rates from San Pedro to Los Angeles and other southern California destinations. Although none of shipments involved exceeded the applicable minima, evidence does not establish that cars covered by the complaint were loaded to full capacity or that the applicable minimum could not have been loaded. Moreover, in 87 I. C. C. 1, per-car rate on lumber equal to that here assessed was found reasonable. Baxter & Co. v. S. P., 128 I. C. C. 211.

(y) Combination rates on enamel, other than watch dial, from Cicero, Ill., to Chattanooga, Tenn., found unreasonable to extent that factor south of Cairo, Ill., second class under southern classification, exceeded the fifth-class rating contemporaneously applicable in western and official territories and subsequently established in southern. Fact that no carload movement existed at time second-class rating was established found not sufficient to justify spread in rating between southern and other territories. Reparation awarded. Tennessee Furniture Corp. v. B. & O. C. T., 128 I. C. C. 701.

(z) Complainant attacked combination rate charged on two cars of enamel, other than watch dial, shipped July 3 and Sept. 17, 1924 from Cicero, Ill., to Chattanooga, Tenn., as unreasonable. Cicero is within the switching district of Chicago, Ill. Shipments delivered B. & O. C. T. routed I. C. care N. C. & St. L. and moved I. C. to Martin, Tenn., and N. C. & St. L., beyond 710 miles charged $1.20 combination applicable fifth class and second class rates of 28 and 92c to and beyond Cairo, Ill. Complainant contended that this rate was unreasonable to the extent that the component south of Cairo, which was governed by the southern classification exceeded the fifth class rate of 56.5c. Subsequent to movement the rating in the southern classification was changed to third class in less carloads and fifth class carloads. HELD, rate attacked unreasonable to extent the factor south of Cairo exceeded fifth class of 56.5c, reparation awarded. Tennessee Furniture Corp. v. B. & O. C. T. R. R., 128 I. C. C. 701.

(aa) Complainant alleged that charges on a carload of sawmill machinery and a mixed carload of such machinery and a power boiler from Darnell, La., on May 17, 1924 to Carrabelle, Fla., were unjust, unreasonable and inapplicable. Claim as to unreasonableness was not filed within two years after date of delivery and the Commission is without jurisdiction to award reparation on that ground. Charges applicable were three factor combinations made on New Orleans, La., and River Junction, Fla., the factor beyond the latter point being $61 per car as per classification. It is with respect to the factor from River Junction to Carrabelle that there is disagreement. HELD, beyond River Jct., the applicable charge on the mixed car of machinery and boiler was $99.43 and on the carload of machinery $61, reparation awarded. West Florida Lumber Co. v. G. F. & A. Ry., 129 I. C. C. 62.

(bb) Factor of applicable combination rates on wrought-iron pipe from Lorain, Ohio, to Mississippi River crossing, was full fifth-class rate applicable to iron and steel articles. Lower rates on wrought-iron pipe than on iron and steel articles were prescribed in 29 I. C. C. 544 and 36 I. C. C. 86, and ton-

mile earnings under rates from Lorain were higher than from Chicago to same destination. Combination rates based on Mississippi River Crossing found unreasonable to extent they exceeded combination based on Jacksonville, Ill. Reparation awarded and waiver of undercharges authorized. National Tube Co. v. A., T. & S. F., 129 I. C. C. 693.

§13½a. Differentials.

See Differentials.

(a) The addition of differentials for joint line hauls from and to many points over a wide scope of territory is always attended with serious complications. The absence of such differentials should be given some weight in determining the level of the distance scale. Salt between Western and Southwestern Points, 120 I. C. C. 91, 108.

(b) Rates on flaxseed from points in South Dakota to Fredonia, Kans., constructed by adding proportionals to local rates to Missouri River, found unreasonable and unduly prejudicial as compared with rates contemporaneously in effect to Minneapolis, Des Moines, Chicago, and St. Louis, competing points, and to extent they exceeded corresponding rates to Omaha, Nebr., by more than 16 cents. Reasonable and nonprejudicial rates prescribed for future and reparation awarded. Fredonia Linseed Oil Works Co. v. A., T. & S. F., 123 I. C. C. 525.

§14. Divisions.

See Divisions §4; Evidence §13 (2).

(a) Joint rates in which Canadian lines participate FOUND to apply to a service which is not "wholly within the confines of the United States" within meaning of section 1 of the act and over which the commission has no jurisdiction. The commission having no power to prescribe such joint rates, it must follow that it is also without power to prescribe their divisions. In absence of treaty provisions or concurrent legislation in both countries affecting the matter, conflict of authority would be inevitable if any different rule were followed. New England Divisions, 126 I. C. C. 579, 637, 671.

(b) Divisions of joint rates on anthracite coal form Pennsylvania points to destinations in Illinois beyond Chicago switching district, found unreasonable, inequitable, and unduly prejudicial to extent they exceed applicable arbitraries over Chicago, plus 20 cents per ton, subject to defendant's local rates as maxima, to accrue to defendants, with balance of through rates to accrue to complainants. In 73 I. C. C. 161, arbitraries over Chicago were prescribed to remove undue prejudice which arbitraries carriers established by reducing through rates so as to maintain the arbitraries. Here, divisions claimed by complanants would stand no portion of a similar reduction; those claimed by defendants only a portion of it; and no consideration would be given to divisions accruing to connecting lines. Erie Railroad Co. v. C. & N. W., 129 I. C. C. 743.

§15. Exceeding Combination of Intermediates.

See Evidence §13 (2), §13 (3), §13 (5); Local Rates and Combinations; Long and Short Hauls §6¾; State Rates and Regulation (q).

(a) Rates on iron and steel articles from Pittsburgh and other points in western Pennsylvania to Barberton, Ohio, and from Barberton to Pittsburgh, Nadine, Corliss, and Midland, Pa., found unreasonable to extent they exceeded aggregate-of-intermediate rates contemporaneously in effect. Reparation awarded. Babcock & Wilcox Co. v. Director General, 104 I. C. C. 405.

(b) Rates on grain from Minnesota points to Chicago, Milwaukee, and other Wisconsin destinations taking same rate, which, at time of movement exceeded contemporaneous combination of locals to, and proportionals from, Winona, Minn., found not unreasonable. In view of commission's finding in 78 I. C. C. 110, that such through rates were reasonable, carriers could have complied with fourth section by increasing several components or by cancelling outbound proportionals from Winona. They elected however to reduce through rates to combination basis and later cancelled proportionals. In support of reasonableness of rates charged, defendants presented numerous comparisons of through rates, and of components of lower combinations on Winona, with other rates from Iowa points to Minneapolis and between other points in same general territory. Lewiston Elevator Co. v. C. G. W., 104 I. C. C. 473.

(c) A through rate higher than the

aggregate-of-intermediate rates over same route is prima facie, but not conclusively, unreasonable. Presumption of unreasonableness can be rebutted upon satisfactory evidence. Lewiston Elevator Co. v. C. G. W., 104 I. C. C. 473, 475.

(d) Joint rate on flour from Grand Rapids, Mich., to Birmingham, Ensley, Bessemer, and Montgomery, Ala., found not unreasonable during period when they exceeded aggregate of intermediates contemporaneously in effect. The fourth section departures were due to application of different percentage increases in different territories under general rate advances approved by commission. Such departures, however, were protected by appropriate fourth section orders, and carriers rebutted presumption of unreasonableness attaching to joint rates by showing higher rates on flour from Grand Rapids and other points to destination in Alabama, Georgia and Tennessee, for similar distances. Valley City Milling Co. v. C. & O., 104 I. C. C. 634.

(e) Where carriers rebut presumption of unreasonableness attaching to a joint rate that exceeds aggregate of intermediates contemporaneously in effect, no reparation will be awarded by commission. See Patterson v. L. & N. R. R. Co., 70 L. Ed. 8. Valley City Milling Co. v. C. & O., 104 I. C. C. 634, 636.

(f) Fact that a joint rate exceeds aggregate-of-intermediate rates does not afford a basis for an award of reparation where commission has granted fourth section relief. Valley City Milling Co. v. C. & O., 104 I. C. C. 634, 636.

(g) Class rates on fresh meats, packing-house products, and other articles, in peddler cars, from Chicago and East St. Louis, Ill., to points on C. & O. east of Gauley, W. Va., found unreasonable to extent they exceeded aggregate of intermediates to and from Gauley. Reasonable class rates prescribed for future and reparation awarded. Wilson & Co. v. C. & O., 104 I. C .C. 641.

(h) Rate on iron and steel articles from Pittsburgh group to Canton and Massillon, Ohio, found unreasonable to extent it exceeded aggregate-of-intermediate rates over routes of movement. Reparation awarded. Canton Bridge Co. v. B. & O., 107 I. C. C. 141.

(i) Rate on wood-pulp board from Bellows Falls, Vt., to Oklahoma City found not to have been unreasonable in past, but present rate found unreasonable to extent it exceeds lowest combination. Reasonable basis of rates prescribed for future. Express Publishing Co. v. A. S., 107 I. C. C. 528.

(j) Rates on Bristol board and printing paper from Holyoke, Mass., to Oklahoma City found unreasonable to extent they exceed lowest combination. Reasonable basis of rates prescribed for future and reparation awarded. Express Publishing Co. v. A. S. 107 I. C. C. 528.

(k) Joint rail and water rate via New York City on canned fruit, in tins, from Red Creek, N. Y., to Jacksonville, Fla., found unreasonable to extent it exceeded lower combination rail-and-water rate contemporaneously in effect. Reparation awarded. Smith, Richardson & Conroy v. N. Y. C., 107 I. C. C. 553.

(l) Through rate on empty returned beverage packages from Little Rock to St. Paul, found not unreasonable because in excess of lower aggregate-of-intermediate rates contemporaneously in effect, presumption of unreasonableness having been overcome by showing that sum of intermediate rates was less than reasonable maximum charge. Hamm Brewing Co. v. Director General, 107 I. C. C. 600.

(m) Joint rates which exceed aggregate of intermediates are prima facie unreasonable, but this presumption is rebuttable. Hamm Brewing Co. v. Director General, 107 I. C. C. 600, 602.

(n) Fifth-class rates on iron and steel articles from Buffalo, N. Y., Johnstown and Pittsburgh, Pa., Wheeling, W. Va., and points grouped therewith, to Cleveland, Elyria, and Lorain, Ohio, found unreasonable to extent they exceeded lower combination rates contemporaneously in effect over routes of movement. Reparation awarded. Columbia Steel Co. v. B. & O., 109 I. C .C. 46.

(o) Rates on iron and steel articles from Girard, New Philadelphia, Youngstown, and Newton Falls, Ohio, to Parkersburg, W. Va., found unjust and unreasonable to extent they exceeded aggregate-of-intermediate rates contemporaneously in effect to and from Wheeling, W. Va. Reparation awarded. Parkersburg Rig Reel Co. v. B. & O., 109 I. C. C. 209.

(p) Violation of aggregate-of-intermediates provision of section 4 of the act, where not protected by applications

to or permissions from commission, are unlawful. Decker & Sons v. C., R. I. & P., 109 I. C. C. 261, 271.

(q) Joint rates on petroleum and products moving from Casper to Buffalo, Wyo., during Federal control, found unreasonable to extent they exceeded the aggregate-of-intermediates contemporaneously in effect. Reparation awarded. Continental Oil Co. v. Director General, 109 I. C. C. 289.

(r) Joint rate on fresh vegetables from Denver, Colo., to Jacksonville, Fla., found unreasonable to extent it exceeded the aggregate of intermediates contemporaneously in effect. Reparation awarded. Hulsey-Bessent Co. v. S. A. L., 109 I. C. C. 389.

(s) A through rate in violation of the aggregate of intermediates contemporaneously in effect is prima facie unreasonable. See 18 I. C. C. 162; 100 I. C. C. 153. Hulsey-Bessent Co. v. S. A. L., 109 I. C. C. 389, 390.

(t) Through rate on horses and mules from Memphis, Tenn., to Fort Worth, Tex., found unreasonable as compared with lower rates from and to other points in same general territory for comparable distances, and to extent it exceeded charges which would have accrued on basis of rates subsequently established equal to the aggregate of intermediates contemporaneously in effect at time of movement. Reparation awarded. Darnell Commission Co. v. M. P., 109 I. C. C. 427.

(u) The aggregate-of-intermediate rates within meaning of section 4 of the act must be determined without reference to combination rule which provides a specific method for constructing through rates made on combination. McLeod case, 100 I. C. C. 219. Darnell Commission Co. v. M. P., 109 I. C. C. 427, 428.

(v) Through rates on returned empty beverage packages from Little Rock and Fort Smith, Ark., to St. Paul, Minn., found not unreasonable because in excess of aggregate of intermediates based upon Kansas City or St. Louis, evidence introduced by defendant being sufficient to rebut presumption of unreasonableness which attaches to a through rate which exceeds the aggregate of intermediates contemporaneously in effect. Hamm Brewing Co. v. Director General, 109 I. C. C. 444.

(w) Rate on canned fruit from New Orleans, La., to Haynesville, La., moving via an interstate route, found unreasonable to extent it exceeded the aggregate-of-intermediates rates contemporaneously in effect to and from Gibsland, La. Reparation awarded. Haynesville Provision Co. v. L. & N. W. R. R. 109 I. C. C. 451.

(x) Fifth-class rates on iron and steel articles from Pittsburgh, and certain other points in Pittsburgh district; from Washington, Pa., Follansbee, W. Va., and Massillon and Canton, Ohio, to Erie, Pa., found unreasonable to extent they exceeded combination of commodity rates based on Youngstown, Ohio, and other intermediate points. Reparation awarded. Erie Bolt & Nut Co. v. B. & O., 109 I. C. C. 590.

(y) Joint rates on compo-board (fiber board and wood combined), from Minneapolis to points in c. f. a. territory, found unreasonable to extent they exceeded the aggregate-of-intermediates rates contemporaneously in effect. Factors of the intermediate rates are not shown to be unduly low, nor was evidence submitted tending to rebut presumption of unreasonableness that attaches to through rates which exceed aggregates of intermediates. Formal report, 80 I. C. C. 185, reversed in part and reparation awarded. Green Lbr. Co. v. A. A. R. R., 109 I. C. C. 710.

(z) Fact that rates on numerous noncompeting commodities compare favorably with those on a specific commodity for like distances can not be accepted as justification for maintaining through rates in excess of aggregates of intermediate rates. Green Lumber Co. v. A. A. R. R., 109 I. C. C. 710, 711.

(aa) Shipments from Wilmington and Modesto, Calif., to Jacksonville, Fla., were routed by shipper and a joint through rate assessed. Governing tariff contained alternative rule providing for application of aggregate-of-intermediate rates when less than the through rate, and a lower combination, unrestricted as to routing, applied via Memphis. Upon contention that under rule 5 (b) of Tariff Circular 18-A such lower combination was applicable, HELD: Only application of rule 5 (b) is when "no joint rate applies," or "in the absence of a specified rate," and therefore had no application in the situation here presented. Moreover, had shipments moved

via Memphis an out-of-line haul of more than 1,000 miles would have resulted. Joint rate assessed found applicable. Rosser & Fitch v. Director General, 109 I. C. C. 724.

(bbcc) A lower combination applicable over a particular route does not establish the unreasonableness of a higher joint through rate applying over another route. Refiners Oil Co. v. Pennsylvania R. R., 112 I. C. C. 680, 682.

(dd) Complainant attacked combination rate charged on 129 cars of celery and on one mixed car of celery and green peppers from Sanford, Sipes, Moores, Beardall, Brisson and Beck Hammock, Fla., to Chicago between Feb. 13, 1918 and Feb. 28, 1920, as unjust, unreasonable, and illegal. Shipments moved via Cairo, Ill., by various routes. Charged joint commodity rates, factors of which were separately stated in the same tariff. Prior to June 25, 1918 these factors were the socalled gathering charge of 11c for movement up to Jacksonville, Fla., a proportional rate of 30c from Jacksonville to Cairo and a proportional carload arbitrary of 20c from Cairo to Chicago. June 25, 1918 these factors became 14c, 37.5c and 25c respectively. Complainants point out that the joint through rates exceeded the aggregates of intermediate rates composed of the joint rates to Cairo plus the local rates beyond. Fourth section departure was protected by appropriate application. HELD, rate attacked not unreasonable or illegal, complaint dismissed. Zulfer & Company v. Director General, 112 I. C. C. 723.

(ee) Joint rate on strawberries from Stevensville, Mich., to Duluth, Minn., found unreasonable to extent it exceeded aggregate of intermediates contemporaneously in effect to and from Chicago. Reparation awarded. Stacy-Merrill Fruit Co. v. P. M., 112 I. C. C. 189.

(ff) Following Windsor Turned Goods Co., 18 I. C. C. 162, wherein it was held that the fair measure of a joint through rate that exceeds the combination between same points over same route is the lowest combination that would lawfully apply if the joint through rate were canceled, the joint rate on cantaloupes from Rocky Ford, Colo., to Jacksonville, Fla., found unreasonable to extent it exceeded lowest combination, which is based on Montgomery, Ala. Reparation awarded. Hulsey-Bessent Co. v. S. A. L., 112 I. C. C. 392.

(gg) The fair measure of a joint through rate that exceeds the combination between same points over same route is the lowest combination that would lawfully apply if the joint through rate were canceled. See 18 I. C. C. 162. Hulsey-Bessent Co. v. S. A. L., 112 I. C. C. 392, 394.

(hh) Joint fifth-class rate on iron and steel articles from Cleveland, Youngstown, Girard, and Warren, Ohio, to Black Rock and Buffalo, N. Y., found unreasonable to extent it exceeded contemporaneous aggregate-of-intermediate rates over routes of movement. Reparation awarded. Taylor Co. v. P. R. R., 112 I. C. C. 541.

(ii) Rates applicable on caustic soda and calcium chloride from Midland, Mich., to points in Oklahoma, found not unreasonable or otherwise unlawful. Complaint alleged that joint rates charged exceeded combinations on certain gateways, but did not show that shipments were routed through these points. Nor that rates charged were higher than the lowest aggregate of intermediates over routes of movement. There is no violation of this clause of fourth section unless carrier maintains a specific through rate which is higher than lowest aggregate of intermediates over same route. See 89 I. C. C. 356. Dow Chemical Co. v. P. M., 112 I. C. C. 559.

(jj) Upon further consideration, finding in 102 I. C. C. 249, that the joint rate charged on lubricating oil moving from points in Texas to Dayton, Ohio, was not unreasonable or otherwise unlawful, affirmed. Unreasonableness alleged was based on ground that rates charged exceeded aggregate of intermediates via a route other than route of movement and that following 18 I. C. C. 162 shipper was entitled to lowest combination. But the lowest combination would not have applied over route of movement in the event of cancellation of joint rate. Moreover, fact that a lower combination applies over a particular route does not establish unreasonableness of a higher joint through rate applying over another route. Refiners Oil Co. v. P. R. R., 112 I. C. C. 680.

(kk) A joint rate over one route which exceeds aggregate of interme-

diates from and to same points by way of another route does not constitute a violation of section 4 of the act. Nor does it establish unreasonableness of higher joint through rate. Refiners Oil Co. v. P. R. R., 112 I. C. C. 680, 682.

(ll) Joint rates on celery, from points in Florida to Chicago, composed of factors separately stated in same tariff, found not unreasonable or illegal because in excess of contemporaneous aggregate of intermediates composed of joint rates to Cairo plus local rates beyond. The fourth-section departures were protected by appropriate applications and rates charged were contained in tariffs on file with commission. Carriers overcame presumption of unreasonableness which attaches to a joint rate that exceeds the aggregate of intermediates contemporaneously in effect by a showing that individual factors making up the joint rate were prescribed or approved by commission. Zulfer & Co. v. Director General, 112 I. C. C. 723.

(mm) Following American Shipbuilding Co., 89 I. C. C. 601, and 102 I. C. C. 530, joint rate on bar steel from Pittsburgh and South Duquesne, Pa., to Orrville, Ohio, found unreasonable to extent it exceeded aggregate of intermediate rates contemporaneously in effect to and from Youngstown, Ohio. Reparation awarded. Sanderson Cyclone Drill Co. v. P. R. R., 113 I. C. C. 213.

(nn) Joint commodity rate on cotton piece goods from Norwich, Conn., and Canton, Mass., to Lynchburg, Va., which exceeds the class rate contemporaneously in effect to same destination and to Montview, Va., found not unreasonable, discriminatory, or unduly prejudicial, but to violate long-and-short-haul provision of section 4 of the act. The rate assailed is not out of line with level of rates on cotton piece goods from Boston to Virginia territory. Moreover, it is shown that a higher basis of rates generally applies on cotton piece goods in official territory than rate under attack. Lynchburg Chamber of Commerce v. N. Y., N. H. & H., 113 I. C. C. 270.

(oo) Through rate on sirup from Montgomery, Ala., to Tampa, Fla., composed of local rate to Jacksonville and a proportional beyond, found unreasonable to extent it exceeded combination of locals contemporaneously in effect. Generally speaking a proportional rate is lower than a local rate between same points and ordinarily there should be no reason for a through rate in excess of combination of locals, it being obvious that cost of handling a through shipment is less than cost of handling a shipment into and out of some point intermediate to final destination. Alabama-Georgia Syrup Co. v. A. C. L., 113 I. C. C. 283.

(pp) Upon further hearing, original report, 88 I. C. C. 273, affirmed and rates on pickles from Colorado producing points to Oklahoma destinations found unreasonable to extent they exceeded the aggregates of intermediates over routes of movement. Reparation awarded. Ridenour-Baker Mercantile Co. v. A., T. & S. F., 113 I. C. C. 629.

(qq) Class rates on iron and steel articles between Pittsburgh, Pa., district and other points on the one hand, and Ohio points on the other, found unreasonable to extent they exceeded lowest aggregate of intermediate commodity rates contemporaneously in effect. See also 89 I. C. C. 601. Reparation awarded. Firestone Tire & Rubber Co. v. Director General, 113 I. C. C. 751.

(rr) While through rates in excess of the intermediates are prima facie unreasonable, the commission is constrained to hold that, in view of the showing of comparable rates to inland points similarly situated, the presumption of unreasonableness has been rebutted. Birmingham Traffic Bureau v. Director General, 115 I. C. C. 33, 37.

(ss) The through rate should be somewhat less than the sum of the rates to and from an intermediate point. Grain and grain products to Arkansas, 115 I. C. C. 457, 459.

(tt) That through class rates lower than the combination of local rates to and from the boundary lines should be established between official and southern territories, and there is no sufficient reason why such through class rates should be relatively higher than the maximum class rates herein found reasonable within southern territory. Taylor Produce Co. v. A. C. L. R. R., 115 I. C. C. 633, 638.

(uu) The presumption of unreasonableness under section 1 attaching to a joint rate in excess of the combination rate which would apply in the absence of the joint rate, may be successfully

rebutted. Thornton Claney Lumber Co. v. M. & O. R. R., 118 I. C. C. 25, 26.

(vv) Complainant attacked joint commodity rate of $5.63 charged on 15 cars of manure shipped during October, November and December, 1924, from New Orleans, La., to Havana and Hinson, Fla., as unreasonable and in violation of section 4. Shipments moved L. & N. to River Jct., Fla., A. C. L. to Bainbridge, Ga., and G. F. & A. beyond. Contemporaneous aggregate of intermediates were $3.92 to Bainbridge and $1.13 beyond. A joint commodity rate of $5.05 was made applicable January 1, 1925. HELD: Rate attacked unreasonable to extent it exceeded $5.05, reparation awarded. American Sumatra Tobacco Co. v. A. C. L. R. R., 118 I. C. C. 503.

(ww) The commission has repeatedly found that a joint rate which exceeds the aggregate of intermediates is prima facie unreasonable. American Sumatra Tobacco Co. v. A. C. L. R. R., 118 I. C. C. 503, 504.

(xx) Joint rate on steel-frame pitless farm scales from Pleasant Hill, Mo., to Logan, Iowa, stopped at Missouri Valley, Ia., for partial unloading, found unreasonable to extent it exceeded the aggregate of intermediate rates to Missouri Valley, plus an l. c. l. rate beyond. Reparation awarded. Deere Plow Co. v. Director General, 115 I. C. C. 1.

(yy) In absence of evidence rebutting the presumption joint rates in excess of the aggregate of intermediate are to that extent unreasonable. Deere Plow Co. v. Director General, 115 I. C. C. 1, 2.

(zz) While through rates in excess of aggregate of intermediates are prima facie unreasonable, the commission is constrained to so hold where the presumption of unreasonableness has been rebutted by a showing of comparable rates. Birmingham Traffic Bureau v. Director General, 115 I. C. C. 33, 37, 38.

(3a) Joint rate on pine lumber from Bonneau, S. C., to Chatham, Va., found not to violate section 4 of the act because lower combinations were contemporaneously in effect via routes other than route of movement. Lynchburg Traffic Bureau v. A. C. L., 115 I. C. C. 121.

(3b) Fifth-class rate on steel plates and bar steel from Pittsburgh, Junction Transfer, and Bessemer, Pa., to Zanesville and Malta, Ohio, found unreasonable to extent they exceeded aggregate of intermediate commodity rates contemporaneously in effect over routes of movenent. Reparation awarded. Brown Mfg. Co. v. B. & O., 115 I. C. C. 352.

(3c) Rates found to violate the aggregate-of-intermediates provision of section 4 of the act, due to differences in the minima on the through rates and the combination of locals. Hauber Cooperage Co. v. A., T. & S. F., 115 I. C. C. 533.

(3d) Applicable class A rate on marine-engine parts from Hamilton, Ohio, to Oakland, Calif., found unreasonable to extent it exceeded lower aggregate-of-intermediates commodity rate contemporaneously in effect, one factor of which was limited to specific kinds of machinery, not including marine-engine parts. Reparation awarded. Moore Shipbuilding Co. v. C., I. & W., 118 I. C. C. 3.

(3e) Joint rates on alfalfa meal from points in Colorado, Nebraska, and Kansas, to Jackson, Miss., found unreasonable to extent they exceeded aggregate of intermediate rates contemporaneously in effect to and from Memphis. Reparation awarded. Jackson Traffic Bureau v. A. & V., 118 I. C. C. 27.

(3f) Joint rates on annealing boxes, rough castings, and rolling-mill rolls from Vandergrift, Pa., to Cleveland, Elyria, Canton, and Ashtabula, Ohio, found unreasonable to extent they exceeded the aggregate of intermediates contemporaneously in effect to and from Youngstown, Ohio. Reparation awarded. United Engineering & Foundry Co. v. B. & O., 118 I. C. C. 43.

(3g) Rates on soap, soap powder, and cleaning, cleansing, and scouring compounds, l. c. l., from Jersey City, N. J., to points in Kentucky, Tennessee, and Georgia, and to Cairo, Ill., and Evansville, Ind., found unreasonable to extent they exceeded lower aggregate-of-intermediates rate contemporaneously in effect. While fourth-section relief was granted regarding publication of rates to intermediate points upon demand, carriers failed to amend their tariffs in compliance therewith, which action should not be allowed to defeat right of a shipper to reparation. Reasonable rates for the future prescribed and reparation awarded. Colgate & Co. v. P. R. R., 118 I. C. C. 243.

(3h) Fifth-class rate charged on bar steel from Massillon, Ohio, to Swissvale, Pa., found unreasonable to extent it exceeded contemporaneous aggregate-of-intermediates rate over same route. Reparation awarded. Central Steel Co. v. P. R. R., 118 I. C. C. 497.

(3i) Joint commodity rate on manure from New Orleans, La., to Havanna and Hinson, Fla., found unreasonable to extent it exceeded a lower joint rate subsequently established and equal to aggregate of intermediates in effect via route of movement at time of shipment. Although complainant asked for and had been promised the lower rate prior to movement, through oversight it was not made effective until subsequent thereto. In addition, carriers submitted no evidence to rebut the presumption of unreasonableness attaching to a joint rate which exceeds the aggregate of intermediates. Reparation awarded. American Sumatra Tobacco Co. v. A. C. L., 118 I. C. C. 503.

(3j) A joint rate which exceeds the aggregate of intermediates is prima facie unreasonable. American Sumatra Tobacco Co. v. A. C. L., 118 I. C. C. 503, 504.

(3k) Through rate on steel plates from Rankin, Pa., to Barnesville, Ohio, found unreasonable to extent it exceeded aggregate of intermediates contemporaneously in effect via route of movement. Carriers sought to rebut the prima facie presumption that rate charged was unreasonable by comparing it with rates from other producing points to other consuming points in same general territory for similar distances. The comparisons while persuasive, failed to accomplish their purpose. Watt Mining Car Wheel Co. v. B. & O., 118 I. C. C. 567.

(3l) Through rates on printing paper from Otsego, Mich., to Wichita, Kans., and on mixed carloads of printing paper and box board from Kalamazoo, Mich., to Wichita, found unreasonable to extent they exceeded lower combination of intermediates contemporaneously in effect. Reparation awarded. Western Newspaper Union v. A., T. & S. F., 118 I. C. C. 692.

(3m) The mere fact that through rates are the same as the combination of local factors to and from intermediate points does not constitute proof of unreasonableness in the absence of a showing that neither of the factors is depressed below what would normally be a reasonable level. Wool Rates Investigation, 1923, 120 I. C. C. 493, 506.

(3n) The fair measure of the reasonableness of a joint through rate that exceeds the combination between the same points via the same route is and will hereafter be held to be the lowest combination that would lawfully apply if the joint through rate were canceled. McLeod v. T. & P. Ry., 120 I. C. C. 550, 551.

(3o) Joint rates on grapefruit from points in Florida to Salt Lake City and Ogden, Utah, found unreasonable to extent they exceeded the aggregate of intermediate rates contemporaneously in effect to and from Jacksonville. Ryan Fruit Co. v. Director General, 120 I. C. C. 206.

(3p) Through rates on watermelons from points in Georgia, Florida, and Alabama, to Chicago and Peoria, Ill., and Milwaukee, Wis., found not in violation of section 4 of the act, because protected by appropriate applications, but unreasonable to extent they exceeded the aggregate of intermediate rates contemporaneously in effect to and from Nashville, Tenn. Reparation awarded. Alderman v. A. & V., 120 I. C. C. 387.

(3q) A through rate in excess of the aggregate of intermediates, protected by an appropriate application, does not constitute a violation of fourth section of the act. See 269 U. S. 1. Alderman v. A. & V., 120 I. C. C. 387, 388.

(3r) Class and various commodity rates from Kansas City, St. Louis, Memphis, New Orleans, and points in defined and seaboard territories, to Marshall and Jefferson, Tex., found unreasonable to extent they exceeded the aggregate of intermediate rates contemporaneously in effect, carriers having failed to rebut presumption of unreasonableness attaching to such rates. Similar findings in 85 I. C. C. 115, affirmed and reparation awarded. Marshall and Jefferson v. T. & P., 120 I. C. C. 455.

(3s) Rates which exceed the aggregate of intermediates contemporaneously in effect are prima facie unreasonable, but the presumption may be rebutted. See 107 I. C. C. 600. Marshall and Jefferson v. T. & P., 120 I. C. C. 455, 458.

(3t) While commission has frequently prescribed joint rates lower than the aggregate of intermediate local rates both for all-rail and for rail-and-water movements, it does not follow that in all cases

such rates should be prescribed. Wool Rates Investigation, 1923, 120 I. C. C. 493, 506.

(3u) Rates on sulphate of alumina from Kokomo, Ind., to Wisconsin destinations, found unreasonable to extent they exceed the aggregate of intermediate rates contemporaneously in effect over same route. Como Chemical Co. v. A., T. & S. F., 120 I. C. C. 517.

(3v) Rates on sulphate of alumina, from Kokomo, Ind., to Wisconsin destinations, found unreasonable to extent they exceed the aggregate of intermediate rates contemporaneously in effect, and unduly prejudicial to extent they exceed the contemporaneous rates on like traffic from Chicago Heights and Joliet, Ill., by more than 5.5 cents. Reasonable and nonprejudicial rates prescribed for future. Como Chemical Co. v. A., T. & S. F., 120 I. C. C. 517.

(3w) Upon further hearing, previous finding in 89 I. C. C. 356, that joint rates on gasoline from points in Texas and Oklahoma to destinations in California were applicable, and that there is no violation of the aggregate-of-intermediates clause of section 4 of the act unless carriers maintain a specific through rate which is higher than lowest aggregate of intermediate rates over same route, the product of intermediate rates treated by the combination rule and resulting in something less than the aggregate, not being an aggregate within meaning of the fourth section, affirmed. McLeod v. T. & P., 120 I. C. C. 550.

(3x) Through rate on green and green-salted hides and pelts, and tallow, in straight and mixed carloads from Wenatchee, Wash., to Portland, Oreg., made up of line-haul rates to Portland plus a switching charge for movement to complainant's warehouse at that point, found unreasonable to extent it exceeded the aggregate of intermediates to or from Seattle or any other intermediate point. Bissinger & Co. v. G. N., 120 I. C. C. 745.

(3y) A through rate which exceeds the aggregate of intermediate rates is prima facie unreasonable to that extent. Bissinger & Co. v. G. N., 120 I. C. C. 745, 749.

(3z) Generally speaking, joint through rates should not exceed combinations of proportional rates. The Commission has consistently said that a joint rate generally should be somewhat less than the full combination of locals on some intermediate point. Granite, Marble and stone from eastern points, 122 I. C. C. 319, 324.

(4a) Complainant attacked rates charged on two cars of strawboard egg case fillers moving on Dec. 21, 1923 and Jan. 2, 1924 from Tama, Ia., to Siloam Springs and Gravette, Ark., as unreasonable and unduly prejudicial and in violation of the fourth section. Tama is in central Iowa and takes Chicago territory rates on traffic to these destinations, which are in northwest Arkansas and take Fort Smith group rates. Shipments moved as routed over K. C. S. beyond Kansas City. Applicable fifth class rates charged of 91.5c to Siloam Springs and 84.5c to Gravette. Subsequent to the filing of the complaint and effective Feb. 21, 1925 a joint commodity rate of 53.5c was made applicable on mixed carload shipments of egg case fillers and related articles. The bases for these rates were prescribed in 66 I. C. C. 571. At time of movement combination on Kansas City was lower than the through rates. HELD, rates attacked unreasonable to extent they exceeded the aggregate of intermediates, reparation awarded. Cherry Co. v. C. M. & St. P. Ry., 123 I. C. C. 59.

(4b) Joint rates which exceed the aggregate of the intermediate rates have uniformly been found to be prima facie unreasonable. This presumption can be overcome only by a clear showing that the aggregate of the intermediate rates is less than a reasonable maximum charge. McFarland Co. v. G. N. Ry., 123 I. C. C. 631, 635.

(4c) A joint rate generally should be somewhat less than the full combination of locals on some intermediate point, and, generally speaking, joint through rates should not exceed combinations of proportional rates. Granite Marble and Stone from Eastern Points, 122 I. C. C. 319, 324.

(4d) Through sixth-class rate on l. c. l. shipments of rice from New Orleans, La., to Lynchburg, Va., which exceeded the contemporaneous aggregate of intermediate rates, found not unreasonable or otherwise unlawful. In rebutting the presumption of unreasonableness attaching to through rate, carriers showed that no shipments of rice have moved during the last five years to Montview, Va., the intermediate point on which lower combination is based, that a con-

siderable volume of rice moves at sixth-class rates from New Orleans and various other points to North Carolina and Virginia destinations, and that effective class rates from New Orleans to Lynchburg were approved by commission in 64 I. C. C. 107. Lynchburg Chamber of Commerce v. N. O. & N. E., 122 I. C. C. 371.

(4e) A rate in excess of the aggregate of intermediate rates is prima facie unreasonable. This is true apart from any statutory enactment, but conditions may exist or evidence may be introduced which establishes the reasonableness of the through rate. Lynchburg Chamber of Commerce v. N. O., & N. E., 122 I. C. C. 371, 372.

(4f) Rate and minimum weight applicable or mixed carloads of egg-case fillers and related articles from Tama, Iowa, to Siloam Springs and Gravette, Ark., found unreasonable to extent they exceeded rates based on lowest contemporaneous aggregates of intermediate rates and minimum weights over routes of movement, the presumption of unreasonableness attaching to such rates not having been rebutted by carriers. Reparation awarded. Cherry Co. v. C., M. & St. P., 123 I. C. C. 59.

(4g) Rates on glass bottles from Terre Haute, Ind., to Homer, La., found unreasonable as compared with rates to various Louisiana and Texas points for comparable distances and to extent they exceeded the aggregate of rates to and from Mohawk, Homer being intermediate thereto over route of movement specified in bills of lading. Reparation awarded. Root Glass Co. v. E., I. & T. H., 123 I. C. C. 68.

(4h) Joint sixth-class rate on lumber from Sunridge, Ontario, Canada, to Naperville, Ill., found unreasonable to extent it exceeded a lower combination rate contemporaneously in effect over route of movement, and subsequently published as a joint commodity rate. Carriers submitted no evidence to rebut presumption of unreasonableness attaching to a through rate which exceeds the aggregate of intermediates. Reparation awarded against United States carriers only. Kroehler Mfg. Co. v. C. N. Ry., 123 I. C. C. 555.

(4i) A rate which exceeds the aggregate of intermediates is prima facie unreasonable. Kroehler Mfg. Co. v. C. N. Ry., 123 I. C. C. 555.

(4j) Sixth-class rate on common sand from Cape May, N. J., to East Radford, Va., found unreasonable to extent it exceeded aggregate of intermediate rates contemporaneously in effect and joint rate subsequently established. Reparation awarded. Lynchburg Chamber of Commerce v. W. J. & S., 123 I. C. C. 579.

(4k) Rates on cedar poles from Sand Point, Idaho, to Shingle Springs, Calif., found unreasonable, as compared with lower rates contemporaneously in effect to San Jose, Stockton, Los Angeles, and Fresno, Calif., farther distant points; with those from San Pedro, Calif., to El Paso, Tex., and Colorado common points for comparable distances; and to extent they exceeded the contemporaneous aggregate of intermediate rates. While record indicates that factors making up the lower combination are influenced by water competition, it fails to convince that the combination is less than a reasonable maximum charge. Reasonable rates prescribed for future and reparation awarded. McFarland Co. v. G. N., 123 I. C. C. 631.

(4l) Joint rates which exceed aggregate of the intermediate rates have uniformly been found to be prima facie unreasonable and this presumption can be overcome only by a clear showing that the aggregate of the intermediate rates is less than a reasonable maximum charge. McFarland Co. v. G. N., 123 I. C. C. 631, 636.

(4m) Upon contention that the joint fifth-class rate assessed on brass ingots, moving in accordance with shipper's routing instructions from Charleston, S. C., to Pittsburgh, Pa., was unreasonable to extent it exceeded a lower combination rate contemporaneously in effect via another route. HELD: No presumption of unreasonableness attaches to a joint through rate applicable over a particular route because of the fact that the intermediate rates via another route make a lower charge. Bell Bros. v. A. C. L., 123 I. C. C. 683.

(4n) The Commission is correct in holding, that if a through rate higher than the aggregate of intermediates is attacked under section 1, the prima facie presumption that such higher through rate is unreasonable, and hence unlawful, obtains. Burns & Knapp v. A. G. S. R. R., 126 I. C. C. 410, 413.

(4o) The aggregate of intermediate rates within the meaning of section 4 of

the act is the sum of the separate rates, and not the sum of those rates subjected to the combination rule. See 96 I. C. C. 259. Walrath & Sherwood Lbr. Co. v. C. & N. W., 126 I. C. C. 97, 98.

(4p) Joint rates in excess of combinations of local rates which would apply in absence of joint rates are prima facie unreasonable. Walrath & Sherwood Lbr. Co. v. C. & N. W., 126 I. C. C. 97, 101.

(4q) Through first-class rate on boiler flues from Washington, Pa., to Zaneville and Cleveland, Ohio, FOUND unreasonable to extent they exceeded the aggregate of intermediate commodity rates contemporaneously maintained over routes traversed. Evidence introduced by carrier was insufficient to rebut presumption of unreasonableness attaching to a through rate in excess of aggregate of intermediates. Tyler Tube & Pipe Co. v. B. & O. 126 I. C. C. 135.

(4r) Joint rates applicable on broomcorn from Fairview, Leedey, and Longdale, Okla., to Philadelphia and Hamburg, Pa., and Atco, N. J., by way of Chicago and East St. Louis, Ill., found unreasonable to extent they exceeded aggregates of intermediate rates contemporaneously in effect. Reparation awarded. Hamburg Broom Works, v. C., R. I. & P., 126 I. C. C. 171.

(4s) Upon contention that combination of domestic commodity rates lower than the import rate is a violation of the aggregate-of-intermediates clause of section four of the act, HELD: Contention is without merit, for in applying provisions of the fourth section, rates and fares of the same kind must be compared with one another. See Conf. Ruling 304. Moreover, domestic rates apply only in absence of tariffs naming specific import rates. Egyptian Powder Co., v. I. C. 126 I. C. C. 293, 301.

(4t) In attempting to rebut prima facie unreasonableness of through rate in excess of aggregate of intermediates, carrier cited 2 Fed. (2d) 592, affirmed in 269 U. S. 1, in which latter court said in part: "Whether commission intended to base its order of reparation upon section 1 or upon aggregate-of-intermediates clause of section 4, or upon both, is left uncertain by language used." HELD Language of Supreme Court, notwithstanding affirmance of lower court's decision, does not avail carrier. In instant case commission found through rate unreasonable to extent it exceeded aggregate of intermediates. Technical use of word "unreasonable" in connection with section 1 only is too well understood to warrant discussion, and words "to extent that it exceeded aggregate of intermediate rates" indicate measure of unreasonableness under section 1 and do not denote a finding under section 4. Burns & Knapp v. B. S. & K. R., 126 I. C. C. 410.

(4u) Joint rates on cedar posts and poles from Lim Rock, Ala., to Mason City, Ill., and from Rising Fawn, Ga., to Olive Branch, Ill., found unreasonable to extent they exceeded the contemporaneous aggregate-of-intermediates rates. Reparation awarded. Nebraska Bridge Supply & Lbr. Co. v. A. G. S., 128 I. C. C. 94, 96.

(4v) Full aggregates of intermediate rates were assessed under an alternative rule providing that if such rates made less than joint through rates they would be applied. Contemporaneously tariff carried the combination rule which provides a specific method for constructing through rates made on combination. Upon contention that lower rates constructed in accordance with that rule should have been assessed, FOUND: In 89 I. C. C. 356; 100 I. C. C. 219, it was stated that the product of intermediate rates treated by a rule which results in less than the aggregate is not the aggregate within meaning of the alternative rule. Therefore, it is the alternative rule which specifies what rate shall apply in place of the joint rate, and when that rule designates a lower aggregate of intermediates as displacing the joint rate, it means the full aggregate of intermediates and not the product of intermediate rates treated by the combination rule. Rates assailed were therefore legally assessed. Calif. Dressed Beef Co. v. A. T. & S. F., 128 I. C. C. 607, 609, 610.

(4w) No presumption of unreasonableness attaches to a joint through rate applicable over a particular route because of the fact that the sum of the intermediate rates by way of another route would make a lower charge. Carfiel & Morris v. N. Y. C. R. R., 129 I. C. C. 658, 663.

(4x) Ordinarily the fair measure of the reasonableness of a joint through rate which exceeded the combination between the same points over the same route is the lowest combination which would lawfully apply if the joint

through rate were canceled. Darling & Company. v. N. Y. C. R. R., 132 I. C. C. 568, 570.

(4y) Shipments moved under joint through rates. Contemporaneously a lower combination rate was in effect, tariff governing one factor of which made reference to the combination rule which provides a specific method for constructing through rates made on combination. Citing Slige Case, 62 I. C. C. 643, and other cases, complainant contended that lower combination rate should have been applied. FOUND: In accordance with Conf. Rulings 220 (g) and 443, the only lawful rate was the joint through rate assessed. Therefore, principle laid down in cases cited did not apply. North American Cement Corp. v. W. M., 129 I. C. C. 90, 91.

(4z) Combination rates on cottonseed cake and meal from points in the Southwest and Mississippi Valley to York and Lancaster, Pa., and Buffalo, N. Y., there mixed in transit and product feed forwarded to trunk-line and New England destinations, found unreasonable and unduly prejudicial to extent they exceeded the contemporaneous joint rates from same origin territory to basing points with which destinations named are usually grouped. While rates assailed to c. f. a. destinations are not on proper basis record is inadequate to make finding as to their reasonableness, partly due to fact that no basing points have been established in connection with cake and meal to that territory and further that existing joint commodity rates were published to destinations to which there was a known movement. Reparation awarded. American Feed Mfrs. Asso. v. A. & S., 129 I. C. C. 157.

(5a) In relation to departures from aggregate-of-intermediates clause of section 4, rule 56 (1-c) of Tariff Circular 18-A, authorizes carriers to correct such departures by reducing through rate to sum of intermediate rates on one day's notice. Form of notice under that paragraph, which carriers are authorized to incorporate in tariffs naming joint rates, provides that a through rate equal to sum of intermediate rates will be established within 30 days from date carrier's attention is called to such departure and that authority will be sought from commission to make reparation on any shipments which move during the interim. Carriers who comply with this rule should have no difficulty in conforming their rates to the aggregate-of-intermediates clause of fourth section. Fourth Section Departures, 129 I. C. C. 187, 191, 192.

(5b) Through rates on coal from Illinois, Indiana, and Kentucky to points within Chicago switching district, consisting of locals to Chicago plus arbitraries beyond, found not in violation of aggregate-of-intermediates clause of fourth-section or otherwise unlawful. While contemporaneously lower proportional rates were in effect to Chicago, they could not be used in connection with the arbitraries but were restricted to apply only in connection with local rates beyond Chicago, on which basis charges higher than those assessed would result. Chicago Coal Merchants Asso. v. N. Y. C., 129 I. C. C. 203, 207, 208.

(5c) Motion for further hearing on ground of two alleged errors in original report 63 I. C. C. 6, viz, statement that departures from aggregate-of-intermediates provision were protected by applications, heard but not determined, and statement that rates found unreasonable appeared not unduly high, denied. Question of whether departures were protected by application was res adjudicata not because of commission's decision but that of Supreme Court in 269 U. S. 1. Even if question had not been res adjudicata and commission concluded that departures were not protected, complainants would not be entitled to reparation for violation of fourth section, since there was no proof that they suffered any special damage, and no such proof was submitted at further hearing. Hudson Mule Co. v. L. & N., 129 I. C. C. 365, 368.

(5d) Upon reconsideration, maintenance of combination rates on rosin from points in the South and Southeast to Hamilton, Ontario, Canada, accorded transit at Ivorydale (Cincinnati), Ohio, higher than joint rates from more distant points over the same route, in the same direction, the shorter being included within the longer distance, when shipments are accorded transit at Latonia or Central Covington, Ky., found to contravene the long-and-short-

haul provision of section 4 of the act. See 35 I. C. C. 27, and other cited cases. Moreover, such rates contravene the fourth section notwithstanding fact that such rates are joint rates from point within United States to Canadian destinations. See Conf. Ruling 447; 66 I. C. C. 627, and other cited cases. Former report 112 I. C. C. 381. Procter & Gamble Co. v. A. & V., 129 I. C. C. 385.

(5e) A through rate exceeding a combination under rule 5 (b) of Tariff Circular 18-A, does not violate fourth section of the act. See 83 I. C. C. 212. National Tube Co. v. A., T. & S. F., 129 I. C. C. 693, 694.

(5f) Contention that through rate exceeded contemporaneous aggregate of the intermediate rates found without merit where one of factors making combination applied only on intrastate traffic. Grovier-Starr Produce Co. v. C., R. I. & P., 129 I. C. C.711, 715.

§15½. Rate Via Other Routes.

See Evidence §47.

(a) Joint rate on refined sulphur from Freeport, Tex., to Carl Junction, Mo., found unreasonable to extent it exceeded lower rate contemporaneously in effect from Sulphur Mine, La., generally grouped with and taking same rate as Freeport, which lower rate also applied under Rule 77 of Tariff Circular 18-A to Pittsburg, Kans., a farther distant point over route of movement, and to which Carl Junction is directly intermediate. Such lower rate was subsequently established from Freeport, and it was not necessary for shipper to request its establishment at Carl Junction in order to be entitled to reparation to basis of such rate. Reparation awarded. Stauffer Chemical Co. of Texas v. H. & B. V., 112 I. C. C. 311.

(b) No presumption of unreasonableness attaches to a joint rate over a route of movement because a lower combination was and is in effect over another route. See 24 I. C. C. 626. Nor does fact that lower combination applies over another route constitute a fourth-section violation. Baker & Holmes Co. v. I. C., 112 I. C. C. 407, 408.

(c) Upon further consideration, finding in 102 I. C. C. 249, that the joint rate charged on lubricating oil moving from points in Texas to Dayton, Ohio, was not unreasonable or otherwise unlawful, affirmed. Unreasonableness alleged was based on ground that rate charged exceeded aggregate of intermediates via a route other than route of movement and that following 18 I. C. C. 162 shipper was entitled to lowest combination. But the lowest combination would not have applied over route of movement in the event of cancellation of joint rate. Moreover, fact that a lower combination applies over a particular route does not establish unreasonableness of a higher joint through rate applying over another route. Refiners Oil Co. v. P. R. R., 112 I. C. C. 680.

(d) Joint commodity rate on cotton piece goods from Norwich, Conn., and Canton, Mass., to Lynchburg, Va., which exceeds the class rate contemporaneously in effect to same destination and to Montview, Va., found not unreasonable, discriminatory, or unduly prejudicial, but to violate long-and-short-haul provision of section 4 of the act. The rate assailed is not out of line with level of rates on cotton piece goods from Boston to Virginia territory. Moreover, it is shown that a higher basis of rates generally applies on cotton piece goods in official territory than rate under attack. Lynchburg Chamber of Commerce v. N. Y., N. H. & H., 113 I. C. C. 270.

(e) Combination rate charged on lumber moving from Philadelphia, Pa., to Erie station in Paterson, N. J., there refused by consignee and reconsigned to Broadway station on the New York, Susquehanna & Western R. R., in the same city, based on rates to and from reconsignment point, found not unreasonable. While a lower through rate applied from Philadelphia to these two stations in connection with the Erie and the New York, Susquehanna & Western, separately, under complete routes, such lower rate was not applicable over the Erie as an intermediate carrier through Erie station to Broadway station. Complainant here seeks two possible deliveries at Paterson under a single rate and to direct carriers to publish such through rate over that route would be to compel the Susquehanna to short haul itself. Wilgus v. P. R. R., 113 I. C. C. 617.

(f) No presumption of unreasonableness attaches to a joint through rate applicable over a particular route because of the fact that the intermediate rates via another route make a lower charge. Bell Bros. v. A. C. L., 123 I. C. C. 683.

(g) Joint commodity rate assessed on printing presses from Vancouver,

British Columbia, to Orlando, Fla., found inapplicable to extent it exceeded lower combination of locals contemporaneously applicable under an alternative provision contained in tariff. Refund of overcharges directed. Duplex Printing Press Co. v. B. C. E., 128 I. C. C. 692.

(h) Rates, rules, and regulations on cotton, any quantity, shipped uncompressed to be compressed by and at carrier's expense, from points in Pecos Valley of New Mexico on the Santa Fe to Texas Gulf ports and beyond, moving over that line via Pecos, Tex., with option of concentration, at that point, thence over Texas & Pacific to Sweetwater, Tex., and Santa Fe beyond, found not unreasonable as compared with lower rate contemporaneously in effect over Santa Fe system's longer route via Clovis, N. Mex., and Sweetwater, with option of concentration at either Pecos or Roswell, N. Mex., or with rates from Texas stations on the T. & P., Fort Worth & Denver City, and Santa Fe for comparable hauls. Record fails to show that Santa Fe route is unreasonably long or results in wasteful transportation. See also 98 I. C. C. 183, 252. Smith-Wilson & Co. v. A., T. & S. F., 129 I C. C. 65.

(i) Rate on petroleum fuel oil from Granfield, Okla., originally destined to Granite City, Ill., and diverted to East Chicago, Ind., found inapplicable. A lower combination applicable under the combination rule was contemporaneously in effect over route of movement. Reparation awarded. Barnsdall Refineries v. C., R. I. & P., 129 I. C. C. 443.

(j) No presumption of unreasonableness attaches to a joint through rate applicable over a particular route because of fact that the sum of intermediate rates by way of another route would make a lower charge. Carfiel & Morris v. N. Y. C., 129 I. C. C. 658, 663.

(k) A through rate exceeding a combination under rule 5 (b) of Tariff Circular 18-A, does not violate fourth section of the act. See 83 I. C. C. 212. National Tube Co. v. A. T. & S. F. 129 I C. C. 693, 694.

§16. Reparation.

See Procedure Before Commission V; Reparation.

(a) Where carriers rebut presumption of unreasonableness attaching to a joint rate that exceeds aggregate of intermediates contemporaneously in effect, no reparation will be awarded by commission. See Patterson v. L. & N. R. R., 70 L. Ed. 8. Valley City Milling Co. v. C. & O., 104 I. C. C. 634, 636.

(b) Points of origin and destination are located on lines of carriers not named in the complaint, but rates found unlawful were joint through rates in which carriers not named participated. Upon objection to introduction of evidence tending to prove damage on shipments moving over lines of carriers not named as defendants in original complaint, HELD: Following 295 Fed. 53 the participation by initial carriers in a violation of the act by exacting unreasonable rates is enough to make such carriers liable for full amount of damages sustained in consequence of such violation, liability against such carrier resulting from its unlawful action in charging unreasonable rates, that liability being enforceable against defendants though other parties to such joint rates were also liable, but were not proceeded against. South Carolina Mfrs. Assn. v. C., C. & O., 112 I. C. C. 683, 685.

(c) No carrier participating in a through route, except by special agreement with its connection or connections, can be charged with responsibility for transporting any shipment over such through route until that shipment has been offered to it at a recognized interchange point on its lines. Until it has been so offered the responsibility rests with connecting line. C., R. I. & P. v. B. & O., 113 I. C. C. 681, 689.

(d) Where unreasonableness of through combination rate is found due to a particular factor, and the other factor or factors in no way contribute to such unreasonableness, reparation will be awarded against carrier whose factor is found unreasonable. E-Z Opener Bag Co. v. P. R. V., 118 I. C. C. 524.

(e) In 113 I. C. C. 343, division 1, found that the present joint rates on newsprint paper, in carloads, from Espanola, Ont., to Wisconsin, Minnesota, Illinois, Missouri and Iowa and to Omaha, Neb., are, and for future will be, in far as the transportation takes place within the United States, unreasonable and unduly prejudicial to extent they exceed by more than 4 cents the rates

applicable on the same commodity from Sault Ste. Marie, Ont., to the same destinations. The fact that the point of origin or destination may be in another country and that carriers not subject to the jurisdiction of the commission may be parties is an incident and does not nullify the requirements of the act as to American carriers. If the commission may require American lines to pay reparation under international joint rates, how much more rational is the assumption that the commission may require than to refrain from participating in and applying rates which will render them subject to such judgments. HELD, prior report affirmed. Spanish River Pulp & Paper Mills v. A. & W. Ry., 120 I. C. C. 251.

(f) In a situation where the portion of a through rate which was unreasonable is easily and certainly ascertainable it is no defense to an award of reparation that the parties who paid and bore the reasonable portion of the through rate are not before commission and that complainants who bore unreasonable portion are without assignments from them. Nelson Fuel Co. v. C. & O., 120 I. C. C. 723, 726.

(g) It is settled that where an unreasonable joint rate has been collected the liability of the parties is joint and several and the Commission may award reparation against one of the defendant carriers which participated in the traffic even though other roads which performed a part of the service are not made defendants. But where combination rates are found to have been unreasonable to the extent that components thereof exceeded certain amounts no order may be entered against a defendant for damages resulting from unreasonableness found in components in which it did not participate. Kohlman Bros. & Sugarman v. L. & N. R. R., 123 I. C. C. 56, 57.

(hi) Where an unreasonable joint rate has been charged, liability of carriers is joint and several. But in case of a combination rate, where but one factor is found unreasonable, an entirely different situation is presented. Each carrier participating in the combination has control over no factor except that maintained by it, nor contributes in any way to the injury resulting from the line maintaining the unreasonable factor. To find in such a case that all carriers are jointly and severally liable would be to require them to bear in part the injury done by the carrier whose factor only is unreasonable. See 91 I. C. C. 571. Midwest Refining Co. v. G. N., 122 I. C. C. 205, 207.

(j) Where an unreasonable rate has been collected, the liability of carriers is joint and several, and commission may award reparation against one of the carriers which participated in the traffic, even though other carriers which performed a part of the service are not made parties defendant. See 60 I. C. C. 595. Armour & Co. v. C., M. & St. P., 122 I. C. C. 380, 381.

(k) Where an unreasonable joint rate has been collected the liability of parties is joint and several, and reparation may be awarded against one of the defendant carriers which participated in the traffic even though other roads which performed a part of the service are not made defendants. But where combination rates are found unreasonable to extent that components thereof exceeded certain amounts no order may be entered against a carrier for damages resulting from unreasonableness found in components in which it did not participate. See 91 I. C. C. 571. Kohlman Bros. & Sugarman v. L. & N., 123 I. C. C. 56, 57.

(l) Where an unreasonable joint rate has been collected, the liability of parties to such action is joint and several and commission may award reparation against one of the carriers which participated in the traffic even though other carriers which preformed a part of the service are not made defendants. See 91 I. C. C. 571. Root Glass Co. v. E., I. & T. H., 123 I. C. C. 68, 70.

(m) Charging of unreasonable through rate is joint tort, and carriers participating therein are jointly and severally liable for damages sustained, though other carriers also liable were not made parties to proceeding. World Pub. Co., v. Davis, Agent. Tulsa Paper Co. v. Same, Democrat Printing Co., v. Same, 16 Fed. (2d) 130.

(n) Under Interstate Commerce Act § 8 (Comp. St. § 8572), liability as between connecting carriers for exaction of excessive joint through rates is joint and several, and reparation order of Interstate Commerce Commission, holding initial carrier liable for total excess of 35 cents per ton on pig iron shipments, HELD not void to extent of 12 cents per ton, though Commission under section

15 (Comp. St. § 8583), when requested by carriers, later determined that initial carrier on future shipments should bear shrinkage of but 23 cents per ton, the remaining 12 cents being borne by connecting carriers, notwithstanding rate was constructed out of existing proportional rates, and its establishment induced by carrier's duty under section 1 (b), which could be enforced by Commission under section 15 (c) Louisville & N. R. Co. v. Sloss-Sheffield Steel & Iron Co., 46 Sup. Ct. 73.

(o) Complainant seeks reparation on shipments from Augusta and Topeka, Kans., to St. Francis, Kans., which moved via Kansas City, Mo., to basis of rates which may be found reasonable via Superior, Nebr. FOUND: Prescription of joint rates over a new route which will result in a widespread readjustment of rates does not warrant an award of reparation on shipments made prior to time that joint rates over the new route are required to be maintained. White Eagle Oil & Refining Co. v. C., B. & Q., 129 I. C. C. 467, 470.

§16½. State Rates.

See Evidence §13 (6); State Rates and Regulations.

(a) Contention that through rate exceeded contemporaneous aggregate of the intermediate rates found without merit where one of factors making combination applied only on intrastate traffic. Grovier-Starr Produce Co. v. C., R. I. & P. 129 I. C. C. 711, 715.

V. TARIFFS AND CONSTRUCTION.

See Tariffs IV.

§17. In General.

(a) Section 6 of the act deals with two classes of rates, joint through rates and, in the absence thereof, application of separately established rate factors applicable to through movement over through route. In addition to the two methods of rate making the commission has in rule 5(b) of Tariff Circular 18-A outlined another plan of making through rates. FOUND: That the so-called Florida basis book containing proportional rate factors used for making through combination rates on Jacksonville and other Florida junction points does not conform to rule 5(b), nor are carriers serving a large part of origin territory here involved named as participating carriers. The basis book, therefore, can only be considered as containing proportional rates, which may be used in combination when such combinations are lower than other lawfully established combination rates applicable over route of movement. Lumber from or to Florida Points, 112 I. C. C. 133, 138.

(b) In relation to departures from aggregate-of-intermediates clause of section 4, rule 56 (1-c), of Tariff Circular 18-A, authorizes carriers to correct such departures by reducing through rate to sum of intermediate rates on one day's notice. Form of notice under that paragraph, which carriers are authorized to incorporate in tariffs naming joint rates, provides that a through rate equal to sum of intermediate rates will be established within 30 days from date carrier's attention is called to such departure and that authority will be sought from commission to make reparation on any shipments which move during the interim. Carriers who comply with this rule should have no difficulty in conforming their rates to the aggregate-of-intermediates clause of fourth section. Fourth Section Departures, 129 I. C. C. 187, 191, 192.

(c) Estabishment of a rate subject to rule 77 of Tariff Circular 18-A does not make that rate applicable to intermediate points, but is only a holding out that it will be extended to said intermediate points upon a reasonable request. Woodward Auto Co. v. C., M. & St. P., 129 I. C. C. 613, 615.

§18. Application of Proportional Rate.

See Supra §13½; Facilities and Privileges §11½, §15, §18; Proportional Rates; Reconsignment §6¼.

(a) Complainant attacked commodity rates charged on tank cars of crude and refined oil shipped between Nov. 25, 1920 and Dec. 31, 1921 from Kentucky, Kansas, and Oklahoma to Lawrenceville, Ill., and Toledo and Findlay, O., as inapplicable. No joint rates were in effect and combinations of proportionals to and from the above gateways applied. The through rates sought are obtained by deducting 6c from each of the respective components and adding 6c to the sum of the remainders under a socalled combination rule in the tariffs naming the factors from the gateways. At no

time was the combination rule applicable in connection with combinations of proportionals over the gateways, but it was applicable in connection with the locals from the gateways. If the locals north or east of the river in combination with the proportionals to the gateways were treated by the combination rule the resulting through rates would be lower than the combinations of straight proportionals charged. The important question here is as to what were the applicable rates available to be used as components of combinations. It is a necessary premise to complainants contention that the local and proportional rates were equally available, or, in other words, that the tariff carried conflicting rates on the same traffic and that the shipper was entitled to use the one which resulted in the lowest charges. The primary purpose of a local rate is to apply to local shipments of the commodity which it covers from and to the points specified, although in the absence of joint through rates or of proportional rates of the same character between the same points, it applies on through traffic as well as local traffic. The tariff rules of the commission do not authorize or permit the publication of conflicting rates. They provide that where a commodity rate is established between two points it removes the application of the class rate between the same points without requiring the cancellation of the class rate. The rules also authorize the publication of proportional rates and are silent as to the necessity for cancelling the local rates between the same points for application on through traffic. Since the rules do not provide that proportional rates conflict with local rates, it follows that the establishment of a proportional commodity rate removes the application on through traffic of a local commodity rate on the same article between the same points. The combination rule east or north of the gateways is applicable only in connection with the local rates from the gateways, and thus can not be applied to this traffic unless the local rates are applicable. There being specific proportional commodity rates applicable between the same points, the local rates clearly were not applicable from and to those points on through traffic coming from west or south of the gateways. HELD, rates applicable, complaint dismissed. Indian Refining Co. v. L. & N. R. R., 112 I. C. C. 732.

(b) Complainant attacked rates on grain and grain products, carloads, from transcontinental groups F and G and other points east of Pasco, Wash., on the N. P., and east of Spokane, Wash., on the G. N., to destinations north of Centralia, Wash., to and including Seattle and Tacoma and Everett, Wash., on shipments routed via Portland, as unduly prejudicial to Portland, and unduly preferential of Tacoma, Seattle and Everett, Wash., in that mills located at the latter points are accorded through rates and transit privileges on that traffic which are denied Portland millers. The gravamen of the complaint lies in the fact that when shipments of grain and grain products move to Portland, receive treatment and are reforwarded to Tacoma, Seattle and Everett, joint rates from points of origin to ultimate destinations are not available, whereas competitors at the Puget Sound points may draw grain and grain products from the same sources, transit them and reforward the traffic to Portland on basis of joint rates. Complainant shows that competition in mill products is very keen and that the disadvantage suffered by it because of the present freight rate adjustment seriously handicaps it in the Puget Sound markets and that its Puget Sound competitors have a wide scope of activity and can reach more distant markets, including Portland. HELD: Following 88 I. C. C. 99, failure to include transit at Portland on this grain and grain products unduly prejudicial. Crown Mills v. N. P. Ry., 115 I. C. C. 15.

(c) Following 88 I. C. C. 99, refusal of carriers to accord north Pacific terminal rates on grain and products from points in transcontinental Groups F and G and other points east of Pasco and Spokane, Wash., to destinations north of Centralia, to and including Seattle, Tacoma, and Everett, Wash., with milling and cleaning in transit at Portland, Oreg., while according such arrangements at Puget Sound milling points on shipments from said points of origin destined to Portland, found unduly prejudicial to Portland and preferential of competitors on Puget Sound. Crown Mills v. N. P. Ry., 115 I. C. C. 15.

(d) On cotton moving from stations south of Montgomery, Ala., there concentrated and compressed and reshipped to Mobile, Pensacola, and New Orleans, locals to Montgomery and reshipping

rates therefrom were assessed. Local factor published combination rule which provides a specific method for constructing through rates made on combination, but at no time were reshipping rates from Montgomery subject to a similar rule. HELD: Following principle laid down in 62 I. C. C. 643; 73 I. C. C. 551, reference to the rule in tariff containing one factor of combination necessitated protection of a through rate arrived at by use of the rule in connection with both factors. Applicable rates were therefore those constructed in accordance with the rule. Former report 112 I. C. C. 325 reversed and refund of overcharges directed. Montgomery Cotton Exchange v. L. & N. R. R., 118 I. C. C. 157.

(e) It would be manifestly impossible to adjust inbound and outbound rates from and to all market points so that combination of rates to any destination would be same through all markets. Nashville Traffic Bureau v. L. & N., 118 I. C. C. 748, 753.

(f) It is not unreasonable to apply the combination of locals on a shipment which has been placed for unloading at original destination and is subsequently reforwarded to a different destination. This is doubly true where the shipment has been unloaded by the shipper and is subsequently reforwarded by him or another to a different destination. Sioux City Live Stock Exchange v. C. & N. W., 122 I. C. C. 177, 186.

(g) While there may be reasons in some instances to justify the construction of grain rates so that through rates are equal to combinations of rate factors to and from important grain markets, there is a limit to the extent to which such a policy can be followed with propriety in view of requirements of the act that all rates must be just and reasonable. Ogden Grain Exchange v. A. & S., 122 I. C. C. 691, 702.

(h) In original report, 98 I. C. C. 619, the assessment of inbound and outbound, rates on shipments of cotton from Jonesboro, Pine Prairie, and Mamou, La., compressed at Alexandria, La., and reshipped to New Orleans, was found proper because shipments were not redelivered for outbound movement after compression to same carrier performing the inbound haul in accordance with applicable tariff. Upon further hearing, it being shown that such shipments were so delivered, original report reversed and through rates, less published allowance for compression, found applicable. Reparation awarded. Haas & Co. v. Director General, 123 I. C. C. 121.

(i) Alfalfa meal from Colorado to Dyersburg, Tenn., moved under combination rates via Memphis. Via East St. Louis, factor from that point to Dyersburg accorded transit on alfalfa meal mixed into feed at Dyersburg except where outbound shipment consisted of more than 30 per cent nontransit materials when local rates would apply to entire shipment. No transit was accorded via Memphis. Upon contention that as tariff specified alfalfa meal as a "transit ingredient," that regardless of how it reached Dyersburg it should not be considered in computing the 30 per cent of nontransit material in ascertaining whether remainder of outbound shipment is entitled to transit privileges, FOUND: Term "transit ingredient" comprehends only such shipments as may be transited under tariff provisions, and since nontransit material exceeded 30 per cent, meal moving via Memphis was nontransit material. Dyersburg Milling Co. v. Director General, 129 I. C. C. 739.

§19. Breaking Transit.

See Fabrication in Transit; Facilities and Privileges §15, §18; Interstate Commerce §1; Proportional Rates; Stoppage-In-Transit; Storage-In-Transit.

(a) When practicable, rates through important grain markets should break into definitely known inbound and outbound components. Minnesota-Dakota Transit Millers v. A. A. R. R., 118 I. C. C. 585, 595.

§20a. Combination Rule.

See Infra §21.

(a) Shipments originated at or were destined to points on nonfederally controlled roads and moved over routes embracing carriers under Federal control. Full combinations, both factors of which were increased under General Order No. 28 of director general, were assessed. Agency tariff carrying combination rule, which provided for application of but a single increase to through rates made on combination, named as participating carriers roads enumerated in a certain circular, and also provided for its application where specific reference to rule was made. HELD: Applicable rates were the full combinations to and from

junctions of nonfederally controlled and federally controlled lines in instances where roads not under Federal control were not named in the circular and where they did not publish or make reference to the rule. Pacific Coast Shippers Asso. v. Director General, 109 I. C. C. 166.

(b) Shipments originated at or were destined to points on nonfederally controlled roads and moved over routes embracing carriers under Federal control. Full combinations, both factors of which were increased under General Order No. 28 of director general, were assessed. The combination rule, which provided for application of but a single increase to through rates made on combination, was published in tariffs of individual lines. HELD: Applicable rates were those made by applying combination rule in instances where one or more of the individual tariffs contained or made appropriate reference thereto, and in instances where none of the individual tariffs contained or made such reference the combinations to and from junctions were applicable. Pacific Coast Shippers Asso. v. Director General, 109 I. C. C. 166.

(c) No joint rate in effect, tariff of one participating carrier neither carried nor referred to combination rule which provided a specific method for constructing through rates made on combination. HELD: Since other carriers comprised in through route authorized by their tariffs the use of combination rule, there was a holding out to shipper of a through rate constructed in accordance with that rule, which they must protect. Applicable rates found to be a through combination constructed by use of the rule. Ladd Lime & Stone Co. v. L. & N., 109 I. C. C. 251.

(d) Where one of the carriers comprised in a through route authorizes by its tariff the use of combination rule, which provides a specific method for constructing through rates made on combination, there is a holding out to shipper by that carrier of a through rate constructed in accordance with that rule, which that carrier must protect. Sligo Iron Store Co.; 62 I. C. C. 643; 73 I. C. C. 551, and other cited cases. Ladd Lime & Stone Co. v. L. & N., 109 I. C. C. 251, 252.

(e) Intrastate shipments of petroleum made during Federal control moved partly over short lines not under Federal control. No joint rates being in effect, combinations were assessed each factor of which was increased under General Order No. 28 of the director general. Tariffs publishing factors applicable over the federally controlled lines contained the combination rule which provided a specific method for constructing through rates made on combination, but no similar rule, or reference thereto, was carried in tariffs of short lines. HELD: The combination rule being unrestricted in its application, the applicable rates were those constructed in conformity therewith. Shipments found overcharged and reparation awarded. Continental Oil Co. v. Director General, 109 I. C. C. 289.

(f) Shipments moved in part over a line not under Federal control. No joint rates being in effect, combinations were assessed each factor of which had been increased under General Order No. 28 of the director general. Tariffs of federally controlled lines carried combination rule which provided a specific method for constructing through rates made on combination, the tariff of the nonfederally controlled line not carrying a similar rule or concurring in or making reference to tariffs in which it was published. HELD: That applicable rates were those constructed in conformity with combination rule, except during period when such rule was specifically restricted so as to apply in connection with rates between points on railroads "under Federal control" during which period the full combinations were applicable. Reparation awarded. Calif. Cotton & Factorage Co. v. Director General, 109 I. C. C. 293.

(g) Fact that shipments moved entirely intrastate during Federal control does not relieve carriers from their obligation to protect rates constructed under combination rule, which provides a specific method for constructing through rates made on combination, when such rule is carried in their tariffs. See 89 I. C. C. 645. Calif. Cotton & Factorage Co. v. Director General, 109 I. C. C. 293, 295.

(h) Proposed cancellation of the Kelly combination rule on livestock originating on C. & N. W. and C., M. & St. P. Railways in South Dakota and intermediate stations in adjoining States and publication in lieu thereof of proportional rates lower than corresponding locals from Chicago which reflect proper

proportion of increases under General Order No. 28 of director general when applied to through traffic, found justified. When the Kelly rule was first established it was never intended that one carrier alone should bear burden of adjusting its rates so as to take care of the entire increase under General Order No. 28 in connection with traffic moving under combination rates. At that time all participating carriers bore their proportional share. To now require the equalization to be made by a single line smacks not only of inequity and unreasonableness, but would saddle upon respondents a shrinkage of their earnings which they should not be called upon to bear. Proportional Rates on Livestock, 109 I. C. C. 417.

(i) The combination rule is applicable in the absence of a joint rate over the route traversed regardless of joint rates over other routes. Gunther v. L. & N. R. R., 112 I. C. C. 387, 388.

(j) Complainant attacked through rates charged on lumber and other forest products, carloads, since Dec. 24, 1921 from Washington, Oregon, Idaho, Montana and British Columbia to Indiana, Michigan and Ohio as unlawful in violation of section 6. In these tariffs, not only the destinations named are indexed within the meaning of the intermediate rule, but all points falling within the descriptions of "all points" "all other points" and "unnamed intermediate points located between two of the above named points" are likewise indexed. The expression last quoted is taken to mean that the unnamed intermediate point must be located within the territory covered by the specific rates. That is to say, a point in the higher rated territory, covered by the description "all other points" is not to be regarded as located between two named points merely because there is a possible route from one named point to another through such higher rated territory. Under such construction all points in Ohio, Indiana, and Michigan were indexed in the tariffs and had specific rates provided thereto, and so far as destinations in these states are concerned, the intermediate rule had no application. The tariffs named rates not only to destinations in these states, but throughout central, trunk line, and New England territories. The intermediate rule was one of general application and could be given effect in some states to which the tariffs provided rates only to specifically named points. Pennsylvania and New York being examples. In the instances where a point was indexed as located in a particular state the rate shown thereto was applicable to any destination of that name in that state upon the lines of carriers participating in the tariffs. The construction which the Commission has given these tariffs is warranted by their provisions considered as a whole, is reasonable under all the circumstances, and is undoubtedly intended by the maker so far as it can judge their intention by the tariffs. HELD: Complaint dismissed. Pacific Coast Shippers Asso. v. A. & C. Y. Ry., 112 I. C. C. 527.

(k) Full combination rates charged on shipment of lumber from Pachuta, Miss., to Homestead, Meadville, Titusville, and Mercer, Pa., found illegally assessed. Applicable rate found to be a through rate constructed by use of combination rule which provided a specific method for constructing through rates made on combination, each factor of combination being subject thereto. Reparation awarded for overcharges. Moore-Marshall Lbr. Co. v. N. O. & N. E., 112 I. C. C. 33.

(l) Tariff governing one factor of combination rate carried the combination rule, which provided a specific method for constructing through rates made on combination. Tariff governing other factor specifically provided for nonapplication of such rule. HELD: Following Sligo case, 62 I. C. C. 643; 73 I. C. C. 551, combination rate constructed by use of the rule was applicable, and restriction in tariff governing other factor did not operate to prevent application of principle laid down in cited case. See also 81 I. C. C. 193, 194. Refund of overcharges directed. Thompson, Weinman & Co. v. N. Y., N. H. & H., 112 I. C. C. 65.

(m) Tariff governing one factor of combination rate contained provision to effect that rates named therein were subject to combination rule carried in an agency tariff, which provided a specific method for constructing through rates made on combination. Tariff of carrier governing other factor contained no combination rule, or similar reference, and provided specifically that rates named therein were not subject to agency tariff. HELD: Reference to agency tariff was

equivalent to publication of the rule in rate tariff of the individual line, which must protect the aggregate rate constructed by use of the rule. See 93 I. C. C. 186. The principle laid down in the Sligo case, 62 I. C. C. 643; 73 I. C. C. 551, is controlling and there was a holding out to shipper of the rate constructed in conformity with the rule, which publishing carrier must protect. Overcharges found and reparation awarded. Phosphate Products Corp. v. C. & O., 112 I. C. C. 161.

(n) Shipment of dried lima beans from Santa Monica, Calif., to Tampa, Fla., billed via a rail-and-water route was diverted at request of shipper to an all-rail route. Combination rate based on Jacksonville, Fla., assessed. FOUND: As there was no published joint all-rail rate from point of origin to destination, shipper was entitled to lowest combination, which, under rule 5(b) of Tariff Circular 18-A, was a combination based on Memphis and Jacksonville. Reparation awarded for overcharges. Harman & Hulsey v. Director General, 112 I. C. C. 275.

(o) Joint rate on refined sulphur from Freeport, Tex., to Carl Junction, Mo., found unreasonable to extent it exceeded rate to Pittsburg, Kans., a farther distant point over route of movement, which lower rate could have been applied to Carl Junction under rule 77 of Tariff Circular 18-A. It was not necessary for shipper to request establishment of lower rate to Carl Junction in order to be entitled to reparation to basis of such rate. Stauffer Chemical Co. v. H. & B. V., 112 I. C. C. 311, 312.

(p) The combination rule applies to combination rates over routes where no joint rates are applicable regardless of whether joint rates are maintained from and to same points over other routes. See 81 I. C. C. 745 and 93 I. C. C. 614. Montgomery Cotton Exchange v. L. & N., 112 I. C. C. 325, 328.

(q) Rate charged on baled cotton transported over an interstate route from Brownsville, Tenn., to Delano, Tenn., found inapplicable. Lower combination in effect referred to a tariff carrying so-called combination rule, which provided a specific method for constructing through rates made on combination. While schedule carrying combination rule applied "where no published through rates are in effect from point of origin to destination," and there was a through rate from Brownsville to Delano over a route other than route of movement, conclusions reached in 95 I. C. C. 451, wherein commission held that this rule is applicable in the absence of a joint rate over the route traversed, regardless of joint rates over other routes, is controlling. Applicable rates found to be those constructed by use of combination rule, and reparation awarded for overcharges. Gunther & Co. v. L. & N., 112 I. C. C. 387.

(r) Rates on lumber and other forest products from points in Washington, Oregon, Idaho, Montana, and British Columbia to destinations in Indiana, Michigan, and Ohio found illegal in some instances and legal in others, due to construction of an intermediate clause. Construction given tariffs is warranted by their provisions considered as a whole, is reasonable under all circumstances, and is undoubtedly that intended by makers, so far as their intention can be judged by tariffs. Construction sought by complainants would lead to absurd results. Pacific Coast Shippers' Assn. v. A., C. & Y., 112 I. C. C. 527.

(s) Upon contention of complainants that, under an intermediate clause and open routing of the tariffs, where point of destination was intermediate to a named point designated as taking a particular group rate, a shipment could be routed over any lines parties to the tariffs and that hence the rate to any point not specifically named would be that applicable to unnamed intermediate points located between two named points, HELD: Not only destinations named are indexed within meanings of intermediate rule in question, but all points falling within the descriptions of "all points," "all other points," and "unnamed intermediate points located between two of the above-named points" are likewise indexed, i. e., a point in the higher rated territory, covered by the description "all other points" is not to be regarded as located between two named points merely because there is a possible route from one named point to another through such higher rated territory. Pacific Coast Shippers' Assn. v. A., C. & Y., 112 I. C. C. 527.

(t) On shipments of crude and refined petroleum from points in Kentucky, Kansas, and Oklahoma to Lawrenceville, Ill., and Findlay, Ohio, no joint rates

were in effect. Combinations of proportional and local rates to and from certain intermediate points, subject to combination rule produced lower charges than combinations of proportional rates to and from same intermediate points, not subject to the rule. HELD: The combination rule not being at any time applicable in connection with combinations of proportionals, but only in connection with locals from the intermediate points, and since a proportional commodity rate takes precedence over a local commodity rate on through traffic on same article between same points, the combination of proportionals was legally applicable. Indian Refining Co. v. L. & N., 112 I. C. C. 732.

(u) On shipments of crude and refined petroleum from points in Kentucky, Kansas, and Oklahoma to Lawrenceville, Ill., and Findlay, Ohio, no joint rates were in effect. Combinations of proportional and local rates to and from certain intermediate points, subject to combination rule produced lower charges than combinations of proportional rates to and from same intermediate points, not subject to the rule. Contention that under 5(c) of Tariff Circular 18-A, there being no joint rate in effect, shipper was entitled to lowest combination over the routes of movement, not sustained. Rule relied upon provided that where a combination is to be used it shall be the lowest combination of applicable rates and here the applicable rates were the combinations of proportionals. Indian Refining Co. v. L. & N., 112 I. C. C. 732, 735.

(v) On a carload of cement from York, Pa., to Cape Girardeau, Mo., a combination of two local rates to and from an intermediate point, subject to combination rule, produced a lower charge than a combination of a local and a proportional rate to and from same intermediate point, not subject to said rule. Following Indian Refining Co., 112 I. C. C. 732, FOUND: That the higher combination of the local and the proportional rate was applicable. Sandusky Cement Co. v. P. R. R., 112 I. C. C. 737.

(w) Shipments moved under combination rates, tariffs governing some factors being subject to combination rule, which provided a specific method for constructing through rates made on combination. Originating line was not a party to tariff publishing the rule nor did tariff of that carrier refer to the rule or to tariff which published it. HELD: Following Sligo case, 62 I. C. C. 643; 73 I. C. C. 551, and Armour Fertilizer Works, 93 I. C. C. 186, applicable rates were those constructed in conformity with the rule which publishing carriers must protect. Reparation awarded. Irvin v. P. R. R., 112 I. C. C. 746.

(x) Shipment moved under combination rate. Tariff governing one factor made reference to combination rule which provided a specific method for constructing through rates made on combination. Tariff governing other factor made no similar reference nor contained a similar rule. HELD: There was a holding out to shipper of rates constructed in accordance with rule which publishing carrier must protect and applicable rates were through rates constructed by application of the rule. See 93 I. C. C. 279. Reparation awarded. Ransom & Co. v. L. & N., 113 I. C. C. 177.

(y) Shipments moved under combination rates, tariff governing one factor carrying combination rule which provided a specific method for constructing through rates made on combination. Tariff governing other factor contained no similar rule nor did publishing carrier concur in tariff in which it was carried. HELD: Following Sligo case, 62 I. C. C. 643, 73 I. C. C. 551, the lawful rates were those constructed by use of the rule. Reparation awarded. Security Cement & Lime Co. v. B. & O., 113 I. C. C. 579.

(z) One factor of the combination was a class rate and the combination rule does not apply to the combination of a class and commodity rate. Bush & Co. v. L. & N. R. R., 115 I. C. C. 45, 46.

(aa) Although the commission has frequently indicated that the combination rule, designed as a temporary expedient, is undesirable as a permanent tariff rule, it does not think that carriers publishing one factor of a through rate under which there is substantial movement, should be permitted to cancel the application of the combination rule to that factor, unless carriers publishing the other factors join in the cancellation or in the publication of joint through rates. Combination rule on brick, 115 I. C. C. 293, 303.

(bb) Complainant attacked combination commodity rate charged on a car of

cedar posts shipped March 26, 1924, from spur 28, Minn., to Treaty, Ind., as inapplicable and unreasonable. Shipment moved, as routed, over M. R. L. & M. to Bemidji, Minn., M. & I. to Brainerd, Minn., N. P. to Minneapolis, M. & St. L. to Albert Lea, Minn., I. C. to Chicago and Big Four, 1,017.5 miles, charged 9c to Bemidji and 36.5c beyond. The question is one of tariff interpretation. By specific reference in the tariff names the joint rates from Bemidji that rate was made subject to the combination rule but the local rate of 9c was not. HELD: Applicable rate was 43.5c, reparation awarded. Pendleton & Gilkey v. M. R. L. & M. Ry., 115 I. C. C. 413.

(cc) The publication of the combination rule in a carrier's tariff is a holding out of a manner of making combination rates on through shipments which that carrier must protect. Pendleton & Gilkey v. M. R. L. & N. Ry., 115 I. C. C. 413, 414.

(dd) On cottonseed meal from Greenwood, Miss., to Angola, La., a combination rate based on Baton Rouge, La., was assessed. A lower joint rate was contemporaneously in effect from Memphis to Angola via Baton Rouge, tariff publishing that rate containing an intermediate rule restricted to apply via direct available routes only. HELD: Application of the lower rate not being confined to a single direct route, but being applicable over all "direct available routes," and record not establishing that route through Greenwood was not available direct route from Memphis to Angola, such lower joint rate was applicable from Greenwood and shipments were overcharged. Reparation awarded. Planters Oil Mill v. Y. & M. V., 115 I. C. C. 21.

(ee) Combination rates charged on common brick moving from Nashville, Tenn., to Morehead, Ky., found inapplicable. When shipments moved a specific commodity rate applied from Nashville to Maysville, Ky., and under an intermediate clause this rate applied from Nashville to Morehead. Shipments were therefore overcharged. Bush & Co. v. L. & N., 115 I. C. C. 45, 46.

(ff) Combination rate charged on yellow-pine lumber from Ragland, Miss., to Pittsburgh, Pa., found inapplicable to extent it exceeded rate constructed in accordance with combination rule. Application of the rule was restricted to cases where no published through rates were in effect from origin to destination. Defendant's contention that rule was therefore inapplicable to complainant's shipments because joint rates were in effect over other routes, but not via route of movement, not sustained. Usher Brothers v. A. & V., 115 I. C. C. 89.

(gg) Combination rate on iron roofing from Delphos, Ohio, to Springfield, Tenn., found inapplicable. Tariff naming a lower rate to Bowling Green and Nashville, unrestricted as to routing, carried the so-called intermediate clause which provided for its application at intermediate destinations. While Springfield is not between Bowling Green and Nashville via direct route it is directly between them on a route over which lower rate applies. Reparation awarded. Cincinnati Sheet Metal & Roofing Co. v. P. R. R., 115 I. C. C. 133.

(hh) Shipments moved under combination rate. Tariff governing one factor made reference to combination rule which provided a specific method for constructing through rates made on combination. Tariff governing other factors made no similar reference nor contained a similar rule. HELD: There was a holding out to shipper of rate constructed in accordance with the rule which publishing carrier must protect, and applicable rate was through rate constructed by application of the rule. See 62 I. C. C. 643 and 73 I. C. C. 551. Reparation awarded. Knoxville Traffic Bureau v. S. Ry., 115 I. C. C. 187.

(ii) Proposal to cancel combination rule on brick and related articles between stations in Iowa, Missouri, Kansas, Nebraska, the Dakotas, Minnesota, and other Western States, and, in some instances, to establish in lieu thereof proportional rates to and from certain specified junctions, found not justified. While the commission has commented upon the undesirability of the combination rule from a tariff standpoint and has made suggestions looking to the ultimate elimination of combination tariffs, such suggestions did not contemplate increases in rates. Carriers can not expect commission to sanction advances which would here be brought about because of a failure on part of carriers to coordinate their efforts in a unified attempt to eliminate the rule by establishing proportionals which would result in combinations not in excess of those now in

effect. Combination Rule on Brick, 115 I. C. C. 293.

(jj) Shipments moved under combination rates. Tariff governing one factor made reference to combination rule which provided a specific method for constructing through rates made on combination. Tariff of delivering line, however, carried no similar rule but specified that rates named therein were not subject thereto. Carriers contended that the rule may be availed of only where each of the tariffs naming the respective factors of combination makes reference to tariff in which it is contained, and since one tariff specifically prohibited its use the principle laid down in the Sligo case, 62 I. C. C. 643; 73 I. C. C. 551 did not apply. HELD: Following 81 I. C. C. 193, effect of such restriction was tantamount to absence of a rule, and the tariff must be construed as containing no rule. The Sligo principle was therefore controlling and rates constructed in accordance with the rule were applicable. Reparation awarded. West Construction Co. v. N., C. & St. L., 115 I. C. C. 355.

(kk) Shipment moved under combination rate. Tariff governing one factor made reference to combination rule which provided a specific method for constructing through rates made on combination, while tariff governing other factor carried no such reference or rule. Upon contention of carriers that as tariff of initial line was not made subject to the rule it would be improper to apply the rule to either factor in constructing through rates. HELD: Publication of the combination rule in carrier's tariff is a holding out of a manner of making through combination rates which that carrier must protect. See 62 I. C. C. 643; 73 I. C. C. 551. Moreover, a provision in a tariff carrying rates which may be used in combination, to the effect that the rates are subject to the combination rule, is equivalent to publication of the rule in rate tariff. See 78 I. C. C. 579. Applicable rate was, therefore, through rate constructed in accordance with the rule. Reparation awarded. Pendleton & Gilkey v. M. R. L. & M., 115 I. C. C. 413.

(ll) Shipments of refuse sand from Detroit, Mich., to Indianapolis, Ind., moved as routed by shipper. Applicable tariffs carried so-called intermediate clause, such clause via one of the routes being unrestricted in its application, whereas via the other route the clause contained phrase "on the same line." HELD: That on shipments moving via the unrestricted route the clause was applicable and lower rates provided thereunder applied. As to shipments moving over the other routes the words "on the same line" in intermediate rule required that intermediate point be on line of same carrier as the more distant point to which a rate is published and since rails of delivering line did not reach the farther distant point the intermediate rule did not apply on shipments moving thereover. American Radiator Co. v. D. & T. S. L., 115 I. C. C. 529.

(mm) Cotton from Gieger, Ala., to Rossville, Ga., moved under combination rates, no joint rates being in effect. Tariff governing one factor made reference to the so-called combination rule which provided a specific method for constructing through rates made on combinations, tariff governing other component neither carrying the rule nor making any reference thereto. HELD: That the holding-out principle as laid down in the Sligo case, 62 I. C. C. 643; 73 I. C. C. 551 is controlling, and carrier whose tariff referred to the rule must protect the aggregate rate constructed in conformity therewith. Shipments found overcharged and reparation awarded. Peerless Woolen Mills v. A., T. & N. R. R. Corp., 115 I. C. C. 577.

(nn) On shipments moving during Federal control no joint rates were in effect and combinations were assessed, the separate factors of which were increased under General Order No. 28 of director general. , HELD: In instances where none of the components carried or made reference to combination rule, which provided a specific method for constructing through rates made on combination, the holding-out principle laid down in the Sligo case, 62 I. C. C. 643 73 I. C. C. 551, did not apply. However, where tariff governing one factor carried or referred to the rule, the principle cited was controlling and shipments were overcharged. Reparation awarded. Utah-Idaho Sugar Co. v. Director General, 115 I. C. C. 707.

(oo) Rate on lumber from Brooksville, Miss., to Chicago, Ill., found not unreasonable or otherwise unlawful. Complainant contended for a lower combination of intermediates constructed by use of combination rule, but as joint

rate assessed was applicable, use of the rule was clearly prohibited. Moreover, presumption of unreasonableness under section 1 attaching to joint rate in excess of combination of locals which would apply in its absence, was successfully rebutted by a showing that it compares favorably with rates on lumber from numerous Mississippi, Georgia, Alabama, and Tennessee points to Chicago for similar distances. Thornton-Claney Lbr. Co. v. M. & O., 118 I. C. C. 25.

(pp) Combination rate treated by the combination rule which provides a specific method for constructing through rates made on combination, is not an aggregate of intermediate rates within meaning of section 4 of the act. See also 89 I. C. C. 356, 357. Thornton-Claney Lbr. Co. v. M. & O., 118 I. C. C. 25, 26.

(qq) On cotton moving from stations south of Montgomery, Ala., there concentrated and compressed and reshipped to Mobile, Pensacola, and New Orleans, the locals to Montgomery and reshipping rates therefrom were assessed. Local factor published combination rule which provides a specific method for constructing through rates made on combination, but at no time were reshipping rates from Montgomery subject to a similar rule. HELD: Following principle laid down in 62 I. C. C. 643; 73 I. C. C. 551, reference to the rule in tariff containing one factor of combination, necessitated protection of a through rate arrived at by use of the rule in connection with both factors. Applicable rates were therefore those constructed in accordance with the rule. Former report 112 I. C. C. 325 reversed and refund of overcharges directed. Montgomery Cotton Exchange v. L. & N. R. R., 118 I. C. C. 157.

(rr) Through rates may not be condemned as unreasonable merely because they are constructed upon a combination basis. Virginia Chamber of Commerce v. A. A. R. R., 118 I. C. C. 195, 199.

(ss) Shipments moved under combination rates. Tariff governing one factor made reference to so-called combination rule which provides a specific method for constructing through rates made on combination. Tariff governing other factor made no such reference nor contained a similar rule. HELD: Following the Sligo principle laid down in 62 I. C. C. 643; 73 I. C. C. 551; publication of combination rule in one of the tariffs was a holding out of the manner of making combination rates on through shipments which publishing carrier must protect. Applicable rates were, therefore, the through rates constructed by application of the rule. Reparation awarded. Lehigh Portland Cement Co. v. B. S. & K. R., 118 I. C. C. 507.

(tt) Shipment moved under combination rate. Tariff governing one factor made reference to combination rule, which provides a specific method for constructing through rates made on combination. Tariff governing other factor made no such reference nor contained a similar rule. Carrier contended that under such circumstances the rule was not applicable. HELD: This contention has been advanced in numerous cases wherein commission has applied holding-out principle laid down in the Sligo case, 62 I. C. C. 643; 73 I. C. C. 551. Reparation awarded. Standard Lbr. Co. v. A. C. L., 118 I. C. C. 703, 704.

(uu) Where one of the tariffs used in making combination rates on through shipments contains the combination rule, there is an undertaking by the carrier publishing the rule to protect the resulting aggregate rate. Dann Gerow Co. v. A. C. L. R. R., 120 I. C. C. 163, 164.

(vv) Rate on bones, horns, and hoofs, in mixed carloads, from El Paso, Tex., to Chicago, Ill., found unreasonable to extent it exceeded a lower joint commodity rate contemporaneously in effect from Deming, N. Mex., a farther distant point, over available routes through El Paso. Tariff naming lower rate referred to rule 77 of Tariff Circular 18-A, and commission has repeatedly found that publication of a rate under such authority is a substantial compliance with requirements of fourth section, and equivalent to an admission by carriers that higher rate from the intermediate point is unreasonable. See 66 I. C. C. 611. Reparation awarded. Tomkins-Summer Co. v. C., M. & St. P., 120 I. C. C. 677.

(ww) Combination rate was composed of two proportionals. One factor made reference to combination rule which provides a specific method for constructing through rates made on combination. Tariff governing other factor neither carried nor made reference to rule and prohibited its use. Upon contention that under the circumstances there was no holding out to the public of rates constructed by use of the rule and that the Sligo principle laid down in 62 I. C. C. 643 is not controlling

HELD: Similar contention advanced in 93 I. C. C. 186 was adversely decided; moreover, in other decisions commission has found that a reference to combination rule is equivalent to its publication in the rate tariff, and that the rule is applicable to through combinations, even though the tariff governing other factor made no reference thereto. Shipments found overcharged and reparation awarded. Armour & Co. v. C. & N. W., 120 I. C. C. 737.

(xx) The publication of the combination rule in a carriers tariff is a holding out of a manner of making combination rates on through shipments which that carrier must protect. A provision in a tariff carrying rates which may be used in combination to the effect that the rates are subject to the combination rule is equivalent to the publication of the rule in the rate tariff. Pendleton & Gilkey v. C. & O. Ry., 122 I. C. C. 287, 288.

(yy) Where one of the tariffs used in making the combination rates on through shipments contains the combination rule, there is a holding out to the shipper of a manner of construing combination rates which the carrier publishing the tariff must protect. The Commission has also found that where one factor of the combination was restricted by a statement that the combination rule was not applicable, the effect of such restriction was tantamount to the absence of a rule; that the combination rule referred to in the tariff publishing the other factor was applicable to the through combination; and that the applicable rate was the sum of the local rates treated in accordance with the rule. Acme Brick Co. v. C. of Ga. Ry., 123 I. C. C. 660, 661.

(zz) On cedar posts from spur 28, Minn., to Gaston, Ind., a combination rate was charged. One factor referred to combination rule which provided a specific method for constructing through rates made on combination, but other factor neither carried nor referred the rule. HELD: That a tariff provision carrying rates which may be used in combination to effect that rates are subject to the combination rule is equivalent to publication of the rule in the rate tariff. See 78 I. C. C. 579. Moreover, in the Sligo case, 62 I. C. C. 643; 73 I. C. C. 551, the principle was announced that publication of combination rule in a carrier's tariff is a holding out of a manner of making combination rates on through shipments which the publishing carrier must protect. Accordingly, rates constructed by use of the rule were applicable. Reparation awarded. Pendleton & Gilkey v. C. & O., 122 I. C. C. 287.

(3a-4a) No specific commodity rates were provided on hay from certain Illinois points to St. Louis, Mo., and charges were assessed on class rate basis. At time of movement commodity rates were in effect from farther distant point of origin in Illinois, tariff publishing such rates carrying the intermediate clause. Carriers contended that the intermediate clause has no application here because route through farther distant point is not one customarily used. HELD: Since tariff publishing the intermediate clause contains no routing restrictions and route via the farther distant point is not impracticable, the rates charged were inapplicable. Reparation awarded. Toberman Mackey Co. v. C., B. & Q., 122 I. C. C. 299.

(4b) Shipments moved under combination rates, one factor of which was subject to combination rule which provided a specific method for constructing through rates made on combination, tariff governing other factor specifically providing that rates named therein were not subject thereto. HELD: So far as the tariff which provided for nonapplication of the rule is concerned it must be construed as containing no rule, and as to the factor subject to such rule, the carriers parties thereto were required to protect the aggregate rate constructed in accordance therewith. See also 93 I. C. C. 186. Reparation awarded. U. S. Gypsum Co. v. St. L.-S. F., 123 I. C. C. 200.

(4c) Combination rates were assessed on fire brick from Mineral City, Ohio, to Miami and Tampa, Fla., there being no joint rates in effect. Upon contention that factors beyond Jacksonville were made subject to combination rule, which provides a specific method for constructing through rates made on combination, in accordance with Sligo principle laid down in 62 I. C. C. 623; 73 I. C. C. 551, HELD: Tariffs naming factors to Jacksonville made no reference nor were subject to tariff carrying the rule and factors from Jacksonville to Miami and Tampa were subject to a note which specifically precluded use of the rule. Therefore, since none of factors were subject to the rule, principle mentioned in cited cases did not apply and applicable rates were

those assessed. Federal Clay Products Co. v. A. C. L., 123 I. C. C. 557.

(4d) Shipments moved under combination rates. Tariff governing one factor made reference to combination rule which provided a specific method for constructing through rates made on combination. Tariff governing other factor made no similar reference nor contained a similar rule. Upon contention that rule may be applied only when each tariff in which factors of combination are published refer to the rule, and that all carriers over whose lines factors of combination rates apply must be named as participating carriers therein, HELD: Similar contentions have been rejected in 62 I. C. C. 643; 73 I. C. C. 551, and other cited cases, wherein the Sligo principle has been upheld. Rates constructed in accordance with the rule were therefore applicable. Refund of overcharges directed. Allen Gravel Co. v. C., R. I. & P., 123 I. C. C. 650.

(4e) Shipments moved under combination rates. Tariff governing one factor carried the combination rule which provides a specific method for constructing through rates made on combination. Tariff governing other factor specifically prohibited use of the rule. Upon contention that as rate assessed was less than rate based on distance scale prescribed in 77 I. C. C. 473, and that since one factor precluded use of the rule the Sligo principle laid down in 62 I. C. C. 643; 73 I. C. C. 551, did not apply, HELD: Cases containing similar situations have been frequently considered wherein rates constructed in accordance with the combination rule were found applicable. Reparation awarded. Acme Brick Co. v. C. of G., 123 I. C. C. 660.

(4f) The carrier authorizing the use of the combination rule held out to shippers through rates constructed in accordance with the rule which those carriers must protect. Tuffli Bros. v. W. M. Ry. 126 I. C. C. 737, 738.

(4g) Shipments of tin cans from Chicago to North Prairie, Wis., tendered unrouted moved via Waukesha, Wis. Contemporaneously a lower rate applied to Waukesha via Bardwell, Wis., over which route North Prairie is directly intermediate to Waukesha, and was applicable to North Prairie under an intermediate clause providing for application of rates to intermediate points. Upon contention that operating and other transportation conditions rendered it inadvisable and uneconomical to use the Bardwell route, and, in accordance with statement in 247 U. S. 477 that carriers may resort to the more expensive route where in their opinion the cheaper route is unreasonable, that it was therefore justified in shipping via Waukesha, HELD: Fact that carrier subsequently restricted rates to shortest route thus making rate to North Prairie applicable only via Bardwell, clearly indicates that this route is not impracticable nor so uneconomical as to be not generally usable. Rate via Bardwell was therefore applicable and shipments were misrouted. Nelson v. C., M. & St. P. Ry. 126 I. C. C. 713.

(4h) Joint rates on cedar posts and poles from points in Alabama, Georgia, and Tennessee to Illinois destinations found not unreasonable as compared with lower combination rates contemporaneously in effect constructed by use of the combination rule which provides a specific method for constructing through rates made on combination. Carriers cited 100 I. C. C. 219; 120 I. C. C. 550, to support contention that joint rates in excess of combinations are not prima facie unreasonable. They also show that one factor is a proportional rate established to enable shippers in origin territory to compete with shippers of white cedar from western producing points; that it is therefore subnormal and should not be used to condemn a reasonable through rate. Moreover, numerous rate comparisons show that from points in same general territory to less distant points in c. f. a. and eastern territories, rates are as high or higher than rates assailed. Nebraska Bridge Supply & Lbr. Co. v. A. G. S., 128 I. C. C. 94.

(4i) Complainant attacked through commodity rates charged on cement, carloads, from Mankato, Minn., to Detroit, Mich., and Toledo and Cleveland, O., between March 18, 1924 and March 25, 1925 as unreasonable to extent they exceeded rates to and from Milwaukee, Wis., reduced by using the socalled combination rule. Joint through rates were assessed which were applicable via either Chicago, Milwaukee or Manitowoc. The aggregate of the separately established rates to and from Chicago, Milwaukee, and Manitowoc reduced by using the combination rule would have produced lower through rates than those

charged. Effective April 15, 1925 the joint through rates on cement from Mankato to Detroit, Toledo, and Cleveland, over all routes, were voluntarily reduced by the carriers to 28, 27 and 29c, respectively, thus equaling the combination to and from Milwaukee reduced by using the combination rule. HELD, rate attacked not unreasonable or otherwise unlawful, complaint dismissed. Carney Co. v. A. A. R. R., 128 I. C. C. 255.

(4j) Joint rates on cement from Mankato, Minn., to Detroit, Mich., and Toledo and Cleveland, Ohio, found not unreasonable or otherwise unlawful as compared with lower rate subsequently established based on rates to and from Milwaukee, Wis., reduced by application of the socalled combination rule. Complainant introduced comparisons with rates in a different territory but failed to show that traffic circumstances and conditions were similar. Other comparisons indicate that rates assailed were not out of line with contemporaneous rates between points in the same territory. Moreover, rates from Mankato to numerous destinations in c. f. a. territory, distances considered, compare favorably with those assailed and with those subsequently established. Carney Co. v. A. A. R. R., 128 I. C. C. 255.

(4k) Shipments moved under combination rate. Tariff governing one factor made reference to combination rule, which provides a specific method for constructing through rates made on combination. Tariff governing other factor made no similar reference nor contained a similar rule. Upon attempt of carriers to distinguish present case from Sligo Iron Store, 62 I. C. C. 643 and 73 I. C. C. 551, HELD: That similar contentions were considered in 93 I. C. C. 279, in which it was found that rate constructed in accordance with combination rule was applicable. Hines Yellow Pine Co., v. M. S. 128 I. C. C. 511.

(4l) If, in connection with one of the factors of a combination rate and not with the others, a carrier makes reference to the combination tariff there is a holding out to the shippers that the through rate constructed in accordance with the combination tariff will be protected by that carrier. Edward Hines Yellow Pine Co., v. M. S. R. R., 128 I. C. C. 511, 512.

(4m) Full aggregates of intermediate rates were assessed under an alternative rule providing that if such rates made less than joint through rates they would be applied. Contemporaneously tariff carried the combination rule which provides a specific method for constructing through rates made on combination. Upon contention that lower rates constructed in accordance with that rule should have been assessed, FOUND: In 89 I. C. C. 356; 100 I. C. C. 219, it was stated that the product of intermediate rates treated by a rule which results in less than the aggregate is not the aggregate within meaning of the alternative rule. Therefore, it is the alternative rule which specifies what rate shall apply in place of the joint rate, and when that rule designates a lower aggregate of intermediates as displacing the joint rate, it means the full aggregate of intermediates and not the product of intermediate rates treated by the combination rule. Rates assailed were therefore legally assessed. Calif. Dressed Beef Co., v. A., T. & S. F., 128 I. C. C. 607, 609, 610.

(4n) Shipments moved under combination rates. Tariff governing two factors made reference to combination rule, which provided a specific method for constructing through rates made on combination. Tariff governing other factor made no similar reference nor contained a similar rule. FOUND: There was a holding out to shipper of rate constructed in accordance with the rule which publishing carrier must protect, and applicable rate was the through rate constructed by use of the rule. Refund of overcharges directed. See 62 I. C. C. 642; 73 I. C. C. 551; 74 I. C. C. 188. Culler Lbr. Co., v. C. B. & Q. 128 I. C. C. 723.

(4o) Where one of the tariffs used in making the combination rates on through shipments contains the combination rule, there is a holding out to the shipper of the manner of constructing combination rates which the carrier publishing the tariff must protect. Culler Lumber Co., v. C. B. & Q. R. R., 128 I. C. C. 723, 724.

(4p) Complainant alleged combination rates charged on five cars of copper wire shipped in April and Nov. 1923 from Black Eagle, Mont., to Topeka, Kans., and to Northport and Lexington, Neb., were inapplicable. Shipments to

Topeka and Northport were routed "G. N., O. S. L., U. P." with no rate entered on the bills of ladings; to Lexington routed G. N., U. P., delivery and a rate of 88c inserted on the bill of lading. All the cars moved over the G. N. to Butte, Mont., O. S. L. to Granger, Wyo., and U. P., beyond, charged at combination rates of $1.28, 1.48 and $1.355 to Topeka, Northport and Lexington, respectively. Joint rates were in effect to Omaha, Neb., Kansas City, Mo., and points grouped therewith. Topeka is a Kansas City rate point and Northport and Lexington are Omaha rate points, 99c to Kansas City and 88c to Lexington. Effective May 1, 1924 defendants amended their tariffs to provide for the application of the joint rates over the route of movement. Rates charged to Topeka and Lexington exceeded the applicable combination rates by 6 and 21c. HELD, rate charged to Northport applicable, rate charged to Topeka and Lexington inapplicable to extent they exceeded $1.22 and $1.145, reparation awarded. Complaint dismissed. Sinclair Pipe Line Co. v. G. N. Ry., 129 I. C. C. 251.

(4q) In the absence of a joint rate the combination on a point beyond would have applied under rule 5b of tariff circular 18-A but joint through rates in excess of combinations under that rule do not contravene section four. Lynchburg Chamber of Commerce v. D. L. & W. R. R., 132 I. C. C. 321, 323.

(4r) Where one of the tariffs used in making combination rates on through shipments contains the combination rule there is a holding out to the shipper of a means of constructing combination rates which the carrier publishing the rule must protect. Pendleton & Gilkey v. M. R. L. & M. Ry., 132 I. C. C. 359, 360.

(4s) In the absence of a joint rate over the route traversed the combination rule is applicable regardless of joint rates over other routes. Underwood Lumber Corp. v. C. of Ga. Ry., 132 I. C. C. 398, 399.

(4t) Shipments moved under joint through rates. Contemporaneously a lower combination rate was in effect, tariff governing one factor of which made reference to the combination rule which provides a specific method for constructing through rates made on combination. Citing Sligo Case, 62 I. C. C. 643, and other cases, complainant contended that lower combination rate should have been applied. FOUND: In accordance with Conf. Rulings 220 (g) and 443, the only lawful rate was the joint through rate assessed. Therefore, principle laid down in cases cited did not apply. North American Cement Corp. v. W. M., 129 I. C. C. 90, 91.

(4u) Shipments moved under combination rates. Tariff naming one factor made reference to combination rule which provides a specific method for constructing through rates made on combination. Tariff naming other factor made no similar reference nor contained a similar rule. Upon contention that carrier publishing latter rate was not shown as a participating carrier and therefore the principle announced in 62 I. C. C. 643, and other cited cases, was not applicable, FOUND: Situation here is identical with that considered in 113 I. C. C. 579, in which rates treated by combination rule were found applicable. Reparation awarded. North American Cement Corp. v. W. M., 129 I. C. C. 90, 91.

(4v) Rates on scrap brass and brass ingots from Pittsburgh, Pa., to Jersey City, N. J., and Baltimore, Md., found inapplicable. Lower rates were contemporaneously maintained from Zanesville, Ohio, subject to a clause which authorized their application from Pittsburgh as an intermediate point. Refund of overcharges directed. S. Hausman & Sons Co. v. P. R. R., 129 I. C. C. 233.

(4w) Proposed restriction of combination rule so as to prohibit any construction thereof by which respondents may be held liable for failure of some other line to make provision for single or maximum increase, found not justified. Proposed restriction would result in increases or avoid reductions of respondents' own local rates when used as factors of through rates, as well as relieve them of shrinkage in factors not published by them. However, as it would be inadequate to require them to continue a tariff rule under which they receive less for their services than carriers maintaining joint rates, and in view of finding in 93 I. C. C. 458, suspended schedules ordered canceled without perjudice to filing others which will relieve respondents of shrinkage-chargeable to their connections but will

not avoid responsibility for that portion which belongs to them. Combination Rule on Lumber, 129 I. C. C. 564.

(4x) First-class rate on passenger automobiles from Janesville, Wis., to Mason City, Iowa, found applicable and not unreasonable or unduly prejudicial. Under a restricted tariff a lower joint commodity rate subject to rule 77 of Tariff Circular 18-A was contemporaneously in effect to Ames. Complainant contended that as Mason City was intermediate to Ames over a circuitous route and shipment moved in compliance with routing restriction the lower rate was applicable. FOUND: That publication of rule 77 does not warrant a finding of unreasonableness where, as in this case, point which is claimed to be intermediate to lower-rated point is intermediate only via excessively circuitous and unnatural routes over which no shipper could reasonably request transportation under provisions of section 1 (4) of the interstate commerce act. Woodward Auto Co. v. C., M. & St. P., 129 I. C. C. 613

(4y) The commission has frequently found that rule 77 of Tariff Circular 18-A is a substantial compliance with the fourth section of the act and awarded reparation on shipments moving from or to intermediate point under rates that were higher than those from or to more distant points where rates from or to latter points were subject to rule 77 and the less distant points were intermediate over route traffic moved. Woodward Auto Co. v. C., M. & St. P., 129 I. C. C. 613, 615.

(4z) Seattle-Portland factor of combination rates on wooden poles from Washington points to California was described in the governing tariff as a porportional rate but was, nevertheless, an arbitrary. Tariff authorized the application of the combination rule "except as otherwise indicated" and restricted use to "separately established commodity(or class) rate factors," thus precluding use of the rule in connection with the Seattle-Portland arbitrary. Rates assessed found applicable except that overcharge, not due to inapplicable rate, was assessed on one shipment. Complaint dismissed. National Pole Co. v. G. N., 129 I. C. C. 697.

(5a) If the Seattle-Portland factor was a proportional rate, it was a separately established commodity-rate factor and subject to a deduction under the combination-rule provision notwithstanding fact that a specific negative application of rule was shown in connection with that factor. National Pole Co. v. G. N., 129 I. C. C. 697, 699.

§20½. Concurrences.

See Blanket Rates §12½ (i); Routing and Misrouting §6½ (a).

(a) Southern Ry. system FX3 concurrence to a tariff of St. Louis & Tennessee River Packet Co., the originating line, found not sufficient to make Northern Alabama Ry., one of the Southern system lines, not specifically shown as a concurring carrier therein, a party to such tariff. Florence Chamber of Commerce v. N. O. & N. E., 118 I. C. C. 228.

(b) Tariffs naming one-factor through ocean-rail rates between interior trunkline and eastern defined-territory points and the Southwest and Kansas-Missouri territory without concurrence of rail lines to the north Atlantic ports, found unlawful. Such rates required to be published as joint through rates in accordance with provision of section 6 of the act and the commission's tariff rules promulgated pursuant to that act. Consolidated Southwestern Cases, 123 I. C. C. 203, 380.

(c) Connecting carriers' participation in joint rates does not make them liable as partners for tort of others engaged in the common enterprise, but the establishment of a joint rate by concurrence of connecting carriers is the act of each. Louisville & N. R. Co. v. Sloss-Sheffield Steel & Iron Co., 46 Sup. Ct. 73.

(d) Local rates to Chicago plus arbitrary to points within Chicago switching district beyond, found to constitute through rates where partcipating carriers concurred in tariffs publishing both local rates and arbitrary. hicago Coal Merchants Asso. v. N. Y. C., 129 I. C. C. 203, 207.

§21. Intermediate Clause.

See Supra §20a; Tariffs §13a.

(a) Applicable class A rate on marine-engine parts from Hamilton, Ohio, to Oakland, Calif., found unreasonable to extent it exceeded lower aggregate-of-intermediates commodity rates

contemporaneously in effect, one factor of which was limited to specific kinds of machinery, not including marine-engine parts. Reparation awarded. Moore Shipbuilding Co. v. C., I. & W., 118 I. C. C. 3.

(b) Shipment of drugs and medicines from Elkhart, Ind., to New York and Philadelphia, found overcharged to extent third-class rates assessed exceeded lower commodity rates contemporaneously in effect from Kalamazoo, Mich. Tariff carried an intermediate clause providing that an intermediate origin station from which no specific rate is published is entitled to higher rates from either of two stations between which it is located from which rates are published. No specific rates were published from Elkhart which is directly intermediate to Kalamazoo, and it was therefore entitled to lower commodity rate. Refund of overcharges directed. Miles Medical Co. v. B. & O., 118 I. C. C. 33.

(c) Finding in original report, 113 I. C. C. 699, that combination rates on grain and products from Colorado, Kansas, and Nebraska to destinations in Tennessee, Georgia, and Alabama, were applicable, affirmed. Complainant sought lower joint rates to intermediate points constructed in accordance with an intermediate rule, contending that while routing as published was incomplete to certain stations, it could be properly completed by shipper by adding lines of any carriers parties to tariff carrying the rule. However, Rule 4 (j) of Tariff Circular 18-A provides that when a tariff specifies routing, rates may not be applied via routes not specified, and since routes sought were not specified, lower equal joint rates did not apply. Moreover, even though destinations involved were intermediate over routes constructed by complainant, they were not directly intermediate as the routes were unreasonably circuitous. Russell Grain Co. v. A. G. S. 126 I. C. C. 405.

(d) Rates on asphalt from North Baton Rouge, La., to Louisville and Philadelphia, Miss., higher than to more distant point to which they were intermediate, found applicable and not unreasonable. An intermediate clause provided for application of this lower rate to unnamed intermediate points, but Louisville and Philadelphia were both named in tariff and fourth-section departures were protected. Merrill Engineering Co. v. G., M. & N., 129 I. C. C. 249.

(e) Combination rates were collected on automobiles and parts from points in Illinois, Indiana, Michigan, Pennsylvania, Ohio, Missouri, Wisconsin, and Iowa to Klamath Falls, Oreg. Upon contention that lower joint commodity rate contemporaneously published to Reed, Calif., and Modoc Point, Oreg., to which Klamath Falls is directly intermediate, was applicable because of intermediate clause published in the tariff naming lower rates, FOUND: Intermediate rule applied only when rates were not specifically provided for points directly intermediate to stations to which rates were published. As joint through class rates were published to Klamath Falls, rule has no application and rates collected were applicable. Baldwin Hardware Co. v. Direcor General, 129 I. C. C. 708.

§22. What is Legal Rate.

See Supra §18, §20; Facilities and Privileges §18; Legal Rates; Tap Lines; Tariffs §3 (1), §3 (2), §18.

(a) Fremont, Ind., and Montgomery and Reading Mich., are intermediate to Angola, Ind., and Hillsdale, Mich., over different routes. On shipments moving from these origin points rates from Angola, which were higher than from Hillsdale, were assessed. FOUND: Angola rates were legally applicable since tariff provided that where rates were not specifically named from origin points located directly between two points from which rates were named, such intermediate points would take higher of named rates. Nor was rate assessed unreasonable since based on those prescribed in 36 I. C. C. 675, 694, no evidence being adduced other than that they are higher than rates from Hillsdale. Moreover, Hillsdale rates, while technically applicable through these origin points because unrestricted in their application, are lower than rates based on those found reasonable for distance over that route. Ohio Farm Bureau Federation v. N. Y. C., 104 I. C. C. 490.

(b) After establishment of joint commodity rates on paper when classified fifth class, carrier published an exception to classification providing a rating of sixth class from points on its

line to destinations to which joint rates were published. Contention that this exception removed newsprint paper from fifth-class rating and therefore, rendered commodity rates inapplicable. not sustained. The exception did not change description of paper, nor did it have effect of canceling specific commodity rates applicable to commodities covered by that description. Hartford Times v. M. C., 107 I. C. C. 536, 537.

(c) Interstate rate and reconsignment charge collected for the intrastate movement, Tulsa to Okmulgee, Okla., of fabricated iron and steel tank material, k. d. originating at Parkersburg, W. Va., found legally assessed. Common carriers are under legal obligation to apply their lawful rates and charges, which places upon them duty of determining, in first instance, the essential character of the commerce. When it is considered that on day shipment arrived at Tulsa from interstate point of origin, and before placed for unloading, complainant surrendered original billing, which was unnecessary except to effect reconsignment, and directed movement to another point to which reconsignment was authorized, the presumption is strong that carriers properly considered character of the shipment to be interstate. Parkersburg Rig & Reel Co. v. St. L.-S. F., 109 I. C. C. 235.

(d) Shipments from Wilmington and Modesto, Calif., to Jacksonville, Fla., were routed by shipper and a joint through rate assessed. Governing tariff contained alternative rule providing for application of aggregate-of-intermediate rates when less than the through rate, and a lower combination, unrestricted as to routing, applied via Memphis. Upon contention that under rule 5 (b) of Tariff Circular 18-A such lower combination was applicable, HELD: Only application of rule 5 (b) is when "no joint rate applies," or "in the absence of a specific rate," and therefore had no application in the situation here presented. Moreover, had shipments moved via Memphis an out-of-line haul of more than 1,000 miles would have resulted. Joint rate assessed found applicable. Rosser & Fitch v. Director General 109 I. C. C. 724.

(e) Tariff named joint commodity rates on cigar-box lumber. Contemporaneously there were in effect lower rates on "Lumber, except cedar, cherry, mahogany, walnut, and cigar-box material" the lower rated tariffs also providing that lumber rates would apply on "Box and crate material, wood, wired, loose or in bundles." Upon contention that exceptions to lumber descriptions first above quoted did not exclude cigar-box material from list of commodities taking the lumber rate; also that cigar-box lumber came within description of box and crate material last quoted, HELD: Under above-quoted tariff provisions cigar-box material was in fact excepted from list of articles taking the lumber rates, and description of box and crate material did not take precedence over specific description of cigar-box material. Applicable rates were those specifically named in the tariff on "cigar-box lumber." Eggerss-O'Flyng Co. v. A. G. S., 112 I. C. C. 218, 219.

(f) Scrap steel rails from Detroit to Kenosha, Wis., purchased "f. o. b. Chicago," moved under through bills of lading at joint rates. Upon complaint alleging overcharges due to failure of director general to refund charges down to basis of lowest published rate from Chicago to Kenosha, upon theory that movements from Detroit to f. o. b. point was separate and distinct from those beyond, HELD: Complainant would have been entitled to lowest rate from Chicago to Kenosha had shipments originated at Chicago or had billing indicated that rails were "company material" entitled to free transportation to that point. However, shipments originated at Detroit, moved on through bills of lading correctly describing commodity without indicating that it was company material. Moreover, through movements were intended by consignor and nothing indicates that movement to Chicago was to be a nonrevenue haul or that transportation should begin there. Claim arises out of terms of contract of sale over which commission has no jurisdiction. Joint rate assessed found applicable. Briggs & Turivas v. Director General, 112 I. C. C. 313.

(g) Combination rates and demurrage charges assessed on shipments of lumber originally moving from Eutaw, Ala., to Louisville and Cincinnati, shipment to latter point being reconsigned to Latty, Ohio, and all subsequently reconsigned to Nicetown Station, Philadelphia, found inapplicable. Carriers contended that cars were accepted at Louisville and Latty only as new shipments

subject to local rates to and from those points upon theory that shipments could not have been reconsigned because of a tariff rule which prohibited reconsignment to embargoed points. Such rule, however, placed a limitation only on reconsignments "to a station on point of delivery" against which an embargo has been placed and here no embargo was in effect against points above outlined, including Nicetown Station. Moreover, circumstances under which shipments were handled and reshipped did not change their essential character as through reconsigned shipments and lower joint rates were applicable thereon. See also 51 I. C. C. 174; 92 I. C. C. 469. Reparation awarded. Elledge v. Director General, 113 I. C. C. 704.

(h) Complainant attacked class rates charged on less carload shipments of cheese from Burnett, Random Lake, Mayfield and Hartford, Wis., to Cincinnati, O., between May 25, 1918, and February 28, 1920, as overcharged and unjust and unreasonable. Shipments moved through Milwaukee, Wis. Complainants apparently believe that in the absence of a joint through rate they are entitled to the lowest available combinations. Rates constructed in accordance with the provisions of pages 119 and 120 of Boyds I. C. C. A 813, are clearly constituted the legal through rates between the points in question and it follows that they take precedence over the lower combinations contemporaneously in effect. HELD: Complaint dismissed. Rohan Co. v. Director General, 118 I. C. C. 83.

(i) Complainant attacked commodity rates charged on 12 cars of bituminous coal shipped between September 11 and October 31, 1922, from Herrin, Ill., to Bannister, Ashley, North Star and Ithaca, Mich., as unjust and unreasonable to extent they exceeded $3.30. Shipments originated on the M. P. and were delivered by switch movement to the I. C. at Herrin, routed by shipper I. C., Matteson, Ill., M. C. R. R. Ann Arbor, Mich., and A. A. R. R. or I. C. Matteson M. C. Ann Arbor, no rate being shown in the bill of lading. They moved I. C. to Kensington, Ill., and from there 11 cars moved M. C. to Ann Arbor and 1 car to Owosso, Mich., from both latter points via Ann Arbor R. R. Charged combination rates. There was in effect a rate of $3.30 via I. C. to Harvey, G. T. to Durand, Mich., A. A. beyond subsequently canceled. The evidence bearing on the unreasonableness of the rate attacked is not convincing. The rate of $3.30 was not established by defendants over the route of movement until nearly two years after complainants shipments moved, and was subsequently withdrawn because unremunerative. HELD: Rates attacked with exception of rate of $4.81 to Ashley and one to Ithaca via Owosso were applicable, reparation awarded to basis of applicable rate. Rates attacked not unreasonable. Crerar Clinch Coal Co. v. A. A. R. R., 118 I. C. C. 171.

(j) Shipment of grapes from Portland, N. Y., originally consigned to and accepted by complainant at Memphis, Tenn., was subsequenty reshipped to New Orleans on a separate bill of lading. Upon contention that shipment was entitled to reconsignment privilege at Memphis and that lower joint rate contemporaneously in effect from Portland to New Orleans was applicable, HELD: Original billing called for delivery at Memphis and there being no intention to reconsign the car prior to its arrival at that point, subsequent movement to New Orleans constituted a new contract of carriage. The car was therefore reshipped from Memphis and not reconsigned and combination rate to and from Memphis assessed was applicable. Canale & Co. v. Director General, 115 I. C. C. 415.

(k) Through rates take precedence over lower combinations contemporaneously in effect. Rohan Co. v. Director General, 118 I. C. C. 83, 84.

(l) The lawful rate or fare for through movement is the through rate or fare, wherever such through rate or fare exists, even though some combination makes a lower rate or fare and even though the practice in the past has been to give to some the benefit of such lower combination. Fraser, Jr. v. B. & O. R. R., 120 I. C. C. 675, 676.

(m) Combination rate was assessed on cotton linters moving from Cooper, Tex., to Pittsburgh, Pa., and reconsigned to Newburgh, N. Y. Contemporaneously a lower combination rate via Marion, Ind., was in effect. Upon contention of carriers that as factor to Pittsburgh was a joint rate, under Conference Ruling 220 (g), they could not lawfully protect any lower combination of locals. HELD, had final destination been Pittsburgh, this contention would be sound, but under reconsignment theory this was a through shipment from Cooper to New-

burgh, and since applicable tariff did not require application of the joint rate to reconsignment point plus the rate beyond, and there was no joint rate in effect from Cooper to Newburgh, the lowest combination which made on Marion was applicable. Reparation awarded. Fraser v. B. & O., 120 I. C. C. 675.

(n) Shipment of hay from Manhattan, Kans., to Birmingham, Ala., was upon refusal at that point reconsigned to Jasper, Ala., a point intermediate to Birmingham. Combination rate to Birmingham plus local rate back to Jasper was assessed. Contemporaneously a lower combination rate unrestricted as to routing applied via Memphis to Jasper. HELD: Contention that Memphis rate was applicable through Jasper to Birmingham and back to Jasper is founded upon an unreasonable construction of the tariff. Manifestly a rate from one point to another does not contemplate movement beyond destination and back again. Combination rate based on Birmingham was, therefore, applicable. Arnold & Co. v. S. Ry. 126 I. C. C. 141.

(o) Grain from west-bank Mississippi River points and from Illinois, mixed into feed at Chicago, and product forwarded to c. f. a. destinations was assessed grain rates to Chicago and proportional or reshipping grain-products rates beyond. Tariff provided that when shipment originated at point from which no joint through rate to final destination applied via the transit point, rates would be the reshipping or proportional rates, except when commodity consisted of grain, in which event rate on outbound shipment would be that applicable to grain products. Here, through grain-products rates but no through by-products rates were published. HELD: Words "no joint through rate" refer to grain products. If carriers intended that the rule refer to through grain rates, tariff should have been so worded. Accordingly through one-factor rates on grain products from origins to final destinations, in effect when grain originated, were applicable. Refund of overcharges directed. Arcady Farms Milling Co. v. A., C. & Y. 126 I. C. C. 449.

(p) Shipments of grain from west-bank Mississippi River points and from Illinois mixed into feed at Chicago, and product forwarded to c. f. a. destinations, were assessed grain rates to Chicago and proportional or reshipping rates on grain products beyond. Tariff provided that "through rates on commodity forwarded from transit station" will be applied from origin to ultimate destination on shipments originating on specified lines. HELD: Since shipments here involved originated on lines named, the one factor through rates on by-products were applicable. Refund of over-charges directed. Arcady Farms Milling Co. v. A., C. & Y., 126 I. C. C. 449.

(q) Charges on grapes from Reedley, Calif., to Croxton, N. J., reconsigned to Scranton, Pa., assessed on basis of through rate to Croxton plus second-class rate to Scranton FOUND inapplicable. The through rate applied both to Scranton and Croxton and governing tariff provided that to points on directe route reconsignment would be made at through rate plus reconsignment charge except on shipments, involving a back haul, in which event charges would be computed on a mileage basis, plus reconsignment charge, for back hauls not exceeding 300 miles. Here movement involved a back haul exceeding 300 miles and class rate was assessed. However, as the through rate was unrestricted as to routing and shipments could have moved via a route involving a back haul less than 300 miles, charges based on mileage over the shorter route should have been asssessed. Reparation awarded. California Table Fruit Co. v. A., T. & S. F. Ry. 126 I. C. C. 700.

(r) Joint rates were assessed on cedar posts and poles under tariff naming rates on "fence posts, piles and telegraph and telephone poles." Upon contention that as a subsequent amendment to tariff made joint rates specifically applicable on cedar posts and poles and used symbols which indicated that addition of cedar posts and poles resulted in reductions. the rates assessed were inapplicable, HELD: Rates assailed were applicable on fence posts, piles, and telegraph and telephone poles without restriction as to kind of wood and as there is no showing that shipments did not consist of those articles, rates were therefore applicable on cedar posts, piles, telephone and telegraph poles. Nebraska Bridge Supply & Lbr. Co., v. A. G. S., 128 I. C. C. 94.

(s) Complainant alleged commodity rates charged on anthracite and bituminous coal, carloads, from Illinois, Indiana. Pennsylvania, and West Virginia to Mayfair and Peterson Ave., in the Chicago switching district on shipments

made Jan. 15 to July 30, 1924, were unreasonable and unduly prejudicial. Shipments were delivered on the C. & N. W. a little over 0.5 mile north of Mayfair and about 1.5 miles south of Peterson Ave. Rates charged and legally applicable were the same as the rates to Peterson Ave., and exceeded the rates to Chicago by 38c per ton on anthracite and 13c per ton on bituminous coal. The flat Chicago rate applied at Mayfair. In Chicago Coal Merchants Asso. v. Director General, 73 I. C. C. 161; 89 I. C. C. 137 and 123 I. C. C. 169, the rates attacked were found not unreasonable. HELD, complaint dismissed. Chicago Coal Merchants Asso. v. C. & N. W. Ry., 128 I. C. C. 519.

(t) Apples from Wenatchee, Wash., to New York, ordered diverted in transit to Philadelphia, moved to Jersey City, where diversion was effected. Joint commodity rate to Jersey City and local rate beyond was assessed. Complainant contended that joint rate applied from origin to final destination, but carriers insisted that under governing tariff the through rate could not be protected unless diversion was made at a point on direct line. FOUND: Tariff provision would not have prevented routing shipment through Jersey City if it had been originally consigned to Philadelphia and within meaning of tariff movement from Jersey City to Philadelphia is not out of route. Moreover, in 96 I. C. C. 229, on a shipment from Pacific Coast billed to New York and reconsigned at Croxton, N. J., to Philadelphia, the through rate was held applicable. Had carriers here desired to restrict application of through rate they should have done so in clear and unequivocal language. See 47 I. C. C. 59, 61. Refund of overcharges directed. Northwestern Fruit Exchange v. G. N., 128 I. C. C. 538.

(u) If no specific rate from point of origin to destination of a through shipment is provided, and no specific manner of constructing combination rate for it is prescribed, the lowest combination of rates applicable via the route over which the shipment moves is the lawful rate for that shipment. National Tube Co., v. A. T. & S. F. Ry., 129 I. C. C. 693, 694.

(v) Complainant alleged that rates charged on six cars of wooden poles which moved during May, June and October, 1922, from points in Washington to California were inapplicable. Three of the shipments moved from Machias Wash., to Fresno, Calif., over N. P. to Portland and S. P. beyond; one from Everett originally billed to Viaslia, Calif., was diverted at Fresno to Delano, Calif., moved G. N. to Portland and S. P., beyond; one from Everett to Friant, Calif., via Portland; remaining shipment from Bucoda, Wash., to Fresno over O. W. R. R. & N., to Portland S. P., beyond. Prior to Oct., 9, 1922 and during the time that all of the shipments moved except the one from Everett to Friant, S. P., I. C. C. 4165 provided that the rates from Seattle and Bucoda to the destinations involved should be arrived at by adding 7c to the rate from Portland to these destinations and expressly excepted this factor, from the application of the combination rule. The rates to the destinations named were made up of factors from Everett or Machias to Seattle plus the factors to and beyond Portland; except that from Bucoda, which is situated between Seattle and Portland, the sum of the factor rates to and beyond Portland made the through rate. All tariffs naming these factors provided reference to the combination rule. The Seattle-Portland factor although described as a proportional rate was nevertheless an arbitrary, because it did not apply as an independent rate factor from Seattle to Portland on traffic destined beyond Portland. The incorrect description used did not change the character of the rate. HELD, rates assailed applicable except an admitted overcharge on a car from Machias to Fresno which should be refunded, complaint dismissed. National Pole Co., v. G. N. Ry., 129 I. C. C. 697.

(w) Complainant alleged that the rate and reconsignment charge on one car of peaches from North Mountain, W. Va., to Toledo, O., were unreasonable, unduly prejudicial, and unjustly discriminatory and inapplicable. Shipment was billed to consignor at Cincinnati, O., on Sept., 4, 1924; the following day it reconsigned the shipment, unrouted, to Joseph Flaherty Co., at Pittsburgh. Defendant, B. & O., diverted the shipment at Cumberland, Md., and routed it over its line to Everson, Pa., and Pennsylvania beyond, which route to Pittsburgh was accorded the lowest rate. Charged 66.5c to Pittsburgh and 66c beyond. There was in effect at time of movement, a joint through rate of 89c

from North Mountain to Toledo. The 89c rate was restricted to apply over the B. & O., to Allegheny, Pa., and Pennsylvania beyond, it did not apply over the route traversed. The record does not indicate that, at the time the shipment moved, the defendants knew that Pittsburgh was not to be the ultimate destination. The prayer for the establishment of a joint rate over the route of movement is not supported by evidence tending to show that it is necessary or desirable in the public interest to open up this additional route to through traffic. HELD, rate attacked applicable, not unreasonable, but for the future will be unreasonable to provide for reconsignment charge at Pittsburgh on the Pittsburgh combination. Purse Bros. v. B. & O. R. R., 129 I. C. C. 727.

(x) Complainant alleged rate charged on one car of tractors shipped June 29, 1923 from Peoria, Ill., to Vernon, Tex., was unreasonable and unlawful. Shipment was routed by complainant "C., R. I. & P., K. C. M. & O., M. K. & T., Ft. W. & D. C., stopover at Nacona, Tex., to partly unload." Defendants stated that the shipment moved as directed, over a route through Wichita, Kas., and Altus, Okla., thence to Nacona and back to Wichita Falls, Texas, over the M. K. T. lines, and to Vernon over Ft. W. & D. C. Charges applicable were $441.60 based on a rate of $1.45 with the deduction of a differential of $7.50 because of movement over the K. C. M. & O., and addition of stopover charge of $6.30. Movement through Nacona necessitated an out of line haul and prevented the application of the through rate. HELD, shipment overcharged $75.10, defendants to refund, complaint dismissed. Holt Co., of Texas v. C. R. I. & P. Ry., 132 I. C. C. 329.

(y) The lawful rate or fare for through movement is the through rate or fare wherever such through rate or fare exists even though some combination makes a lower rate or fare and even though the practice in the past has been to give to some the benefit of such lower combination. Fruen Grain Co., v. L. C. & S. E. Ry., 132 I. C. C. 747, 748.

(z) One factor of combination rate on a mixed carload of sawmill machinery and a power boiler, shipped in a car 41 feet 4 inches in length, was published as $61 per car as per classification." Governing classification rated both sawmill machinery and power boilers sixth class, minimum 24,000 pounds, subject to rule 34. Exceptions to classification, however, provided class N rating to apply on "Boilers, steam power * * * in straight or mixed carloads, with machinery and machines, per car 20,000, excess in proportion," for cars 36 feet 6 inches, or under, larger cars being subject to rule 34. Complainant's contention that the rate of $61 is applicable to 20,000-pound units of freight with any fractional excess in proportion, sustained, and charges collected found inapplicable to extent they exceeded charges computed by multiplying the rate per car by the weight of shipment and dividing by 20,000 units. Reparation awarded. West Florida Lbr. Co. v. G. F. & A., 129 I. C. C. 62.

(aa) One factor of combination rate on a carload fo sawmill machinery, shipped in a car 41 feet 4 inches in length, was published as "$61 per car as per classification" Governing classification rated sawmill machinery sixth class, minimum 24,000 pounds, subject to rule 34, and exceptions thereto provided class N rating on "Machines and machinery, c. l., * * * minimum weight 20,000 pounds," for cars 36 feet 6 inches, or under, larger cars being subject to rule 34. Upon contention by carriers that under rule 34 the rate of $61 should be regarded as applicable to a unit of 23,400, the minimum weight for a car of size used, and that excess above such weight should be computed proportionately. HELD: The portion of rule 34 on which carriers rely ordinarily situation where rates are applicable to suecified units of weight, but has no reasonable application where, as here, the rate stated as a flat charge per carload, and charges collected were inapplicable. Reparation awarded. West Florida Lbr. Co. v. G., F. & A., 129 I. C. C. 62.

VI. RIGHT TO WITHDRAW OR MODIFY.

§24. In General.

See Infra §26; Supra §9, §14; Advanced Rates §5 (2½) (q); Canada (qq); Commodity Rates §1 (f), §2 (f), §5 (e) (f) (j) (4g); Restricted Rates; Water Carriers IV.

(a) Coal: Proposed cancellation of

proportional rates on anthracite coal from Erie, Pa., and Brocton, Buffalo, and Buffalo Junction, N. Y., to Sparland, Ill., thereby making applicable higher combination rates based on Chicago through increase of factor beyond these junction points, found justified on ground that such higher rates will compare favorably with rates on like traffic from and to other points for comparable distances. Coal from Erie to Sparland, 104 I. C. C. 188.

(b) Proposal to reduce rates on grain, seed, and products from points in Colorado, Wyoming, Kansas, Arkansas, Oklahoma, and Missouri to points in Louisiana west of Mississippi River, found justified. Proposed reductions will, among other things, remove many violations of aggregate-of-intermediates provision of section 4 of the act in so far as local rates from Kansas City and rates from country points beyond are concerned. Grain and Products from Western States, 104 I. C. C. 272, 275.

(c) Proposed withdrawal of Wabash from participation in joint rates on grain products from Chicago to destinations in Arkansas on the Missouri Pacific, resulting in application of higher combinations, found not justified. To urge that combinations are general basis for constructing rates from points on Wabash to this destination territory is not sufficient to justify increases, and is contrary to commission's view that through rate should be somewhat less than the sum of rates to and from an intermediate point. Moreover, the Wabash is at no disadvantage by reason of circuity of route and no evidence has been submitted tending to indicate that these joint rates are depressed. Grain Products to Arkansas Points, 104 I. C. C. 742.

(d) Proposed cancellation of joint rates on grain and products from points on Los Angeles & Salt Lake to destinations in Louisiana, Oklahoma, and Texas, resulting in application of higher combinations found not justified. While proposed rates would remove certain departures from long-and-short-haul provision of section 4 of the act, new departures would be created, and purpose intended would not be accomplished. Grain to Louisiana, Oklahoma, and Texas, 104 I. C. C. 753.

(e) Proposed withdrawal of Pennsylvania R. R. from participation in joint rates on grain and products from Omaha, and South Omaha, Nebr., and Council Bluffs, Iowa, to New Orleans, which had its origin in a dispute over divisions, found justified. The routes in which this carrier participates result in wasteful transportation and unwarranted loss in revenue to carriers owing to their circuity. Grain and Products to Mississippi Valley, 107 I. C. C. 167.

(f) Proposal of Seaboard Air Line Ry. to cancel its participation in a joint rate in connection with the Southern Ry. on common brick from Van Wyck, S. C., to Charlotte, N. C., in view of its own single-line route carrying same rate between same points, found justified. Over the joint route, 38 miles, the Seaboard received but a 4-mile haul, whereas over its own route, 46 miles, it receives the entire haul. The single-line route is not unduly long, the rate over that route was prescribed by commission on common brick for distance thereover, and record of past routing by protestant does not argue for the maintenance of joint route as a real necessity. Moreover, the inhibition of section 15 of the act against short hauling a carrier in a through route clearly relieves the Seaboard of obligation to participate in joint route. Routing Brick and Clay Products, 112 I. C. C. 252.

(g) Proposal to readjust rates on grain and products from points in Utah and Idaho to destinations in the Southwest and Alabama and Mississippi, and to cancel application of such rates over routes through Texas, designed for supposed purpose of removing departures from long-and-short-haul provision of section 4 of the act, found not justified. There is in issue in a pending proceeding the reasonableness of rates to this destination territory as well as to points in Texas, where rates are now higher than to more distant Louisiana points, and cancellation of joint rates over Texas routes, which are generally shorter than through states north thereof, would result in substantial rate increases which would seriously affect the ability of Texas mills to handle Idaho wheat. Grain and Products from Western Points, 112 I. C. C. 283.

(h) While the commission is not prepared to say how many transcontinental routes should be maintained at the direct-line rate, it is evident that reasonable restrictions on routing are desirable

in the interest of efficient operation. Revenues in Western District, 113 I. C. C. 3, 21.

(i) Respondents propose to cancel the existing joint proportional rates on grain and grain products, carloads, from Omaha and South Omaha, Neb., Des Moines and Council Bluffs, Ia., and Kansas City, Mo., to destinations on that portion of the Frisco in Arkansas extending from Nettleton to Victoria and formerly operated by the J. L. C. & E. For sometime past the Cotton Belt has participated in rates from Des Moines and Missouri river points to stations on its line in Arkansas applicable over the Cotton Belt beyond East St. Louis or Gale, Ill., which are lower than the combinations of rates made on East St. Louis. Joint proportional rates lower than the East St. Louis combination rates were also in effect from the same shipping points to destinations on the J. L. C. & E., with routing over the Wabash to East St. Louis, Cotton Belt to Jonesboro, Ark., J. L. C. & E. beyond When this arrangement was entered into the J. L. C. & E. was an independent line. On November 9, 1925, it was absorbed by the Frisco. It has not been the practice of the Frisco to participate in rates from Des Moines and the Missouri river points to stations on its line in Arkansas via St. Louis or East St. Louis on a basis lower than the combinations of rates made on those river crossings. Its purpose is to place the rates on grain and grain products to stations on what was formerly the J. L C. & E. on the same rate basis it maintains to nearby stations on its line, and to confine the routing of those commodities to the Kansas City gateway and its own line. This would have the effect of giving the Frisco the entire haul beyond Kansas City as compared with the short haul which it now receives beyond Jonesboro on shipments routed via East St Louis. Provision would be made for routing via St. Louis and the Frisco, thereby giving that carrier the entire haul beyond St. Louis, but the record indicates that the Frisco desires to eliminate routing via the Mississippi river crossings, except on basis of combination rates. HELD: Proposed schedules not justified without prejudice to a proposal to cancel these routes if the Frisco will substitute itself for the Cotton Belt as the carrier south of St. Louis. Grain and Grain Products to Arkansas, 115 I. C. C. 457.

(j) Respondents proposed to cancel joint rates on grain and grain products, carloads, between points on the Spearman branch of the P. & S. F. and points in Kansas and Missouri on lines other than the Santa Fe and to apply in lieu thereof combination rates. The Spearman branch extends westward from Shattuck, Okla., to Spearman, Tex., a distance of 84 miles. Prior to December 12, 1925, joint rates were not maintained between points on this branch and points in Kansas and Missouri, excepting in those states on the Santa Fe. HELD: Proposed rates not justified. Grain and grain products, 115 I. C. C. 615.

(k) Proposed elimination of Salt Lake & Utah R. R., an electric line, as an intermediate carrier in routing of eastbound and westbound transcontinental traffic, found justified and not unreasonable or otherwise unlawful. Such route is artificial, can draw traffic only through the most vigorous and expensive solicitation methods, and no advantage to anyone other than intermediate line would result. On the other hand, such participation is a positive disadvantage to other carriers and transcontinental shippers, and results in needless delays and considerable added expense of operation. While such intermediate line is in a weak financial condition public interest will not be served by solving its financial problems at sacrifice of efficiency and economy of operation. Restrictions in routing over S. L. & U., 115 I. C. C. 357.

(l) Proposal of L. & N. R. R. to restrict application over its own line of joint rates on slag from Birmingham, Ala., group points to Jacksonville, Fla., for local delivery and for beyond, found not justified. Restriction is proposed because the L. & N. has been unable to arrange satisfactory divisions with Atlantic Coast Line which handles the traffic beyond Montgomery, Ala. While proposed restriction would merely make joint rates inapplicable, the record does not show what rates would apply or whether those rates would be reasonable. Slag from Birmingham, 115 I. C. C. 587.

(m) Proposal to cancel joint rates on grain and products between points on the Spearman branch of the Panhandle & Santa Fe Ry., and points in Kansas and Missouri on lines other than the A.,

T. & S. F., and apply combinations in lieu thereof, found not justified. Carriers contend that these joint rates were erroneously established in complying with commission's order in 101 I. C. C. 116, that joint rates from the branch-line points are considerably lower than from main-line points and thus contrary to all theories of rate making, and that it has not been the practice of the Panhandle to publish joint rates between points on its lines and lines other than the Santa Fe for reasons that demand for commodities consumed along the Panhandle can well be supplied from Santa Fe origins. Contention raised can not be sustained and last-named reason advanced in justification of proposed schedules does not establish their reasonableness. Grain and Products, 115 I. C. C. 615.

(n) Complainant attacked charges on one car of farm wagons shipped on July 10, 1924 from Fort Smith, Ark., to Fredericksburg, Tex., as unreasonable to extent they exceeded $1.05, minimum 24,000 pounds. Charged combination made up of $1.05 to Fredericksburg Jct, plus local class A rate of 25 cents beyond. At the time of movement the $1.05 rate applied over a number of routes, but by an exception it did not apply to destinations on the F. & N., in connection with the Frisco. This exception became effective on Oct. 1, 1921. For a great many years prior thereto the Frisco had participated with the F. & N. and other lines in the joint rate. The record does not disclose the reason for its withdrawal from such participation, and defendants made no effort to justify the reasonableness of the higher $1.30 rate resulting therefrom. HELD, rate attacked unreasonable to extent it exceeded $1.05, reparation awarded. Deere Plow Co. v. St. L. & S. F. Ry., 120 I. C. C. 67.

(o) Respondents proposed changes which would result in increases and reductions in the rates on cement, in carloads, between points in Oklahoma and Texas and between points in Texas over interstate routes, and the cancellation of routes through Texas on shipments from Oklahoma to destinations in Arkansas, Louisiana and Mississippi. Rates were established to comply with the order in 113 I. C. C. 536. HELD, schedules not justified. Cement between Oklahoma and Texas, 120 I. C. C. 177.

(p) Respondents proposed to allow the present joint commodity rate of 25.5 cents on spelter, carloads, from Blackwell, Okla., to Greencastle, Ind., to expire, thus making applicable in lieu thereof a higher combination of intermediate rates. For many years the basis of rates on spelter, in carloads, from southwestern smelters to points east of the Illinois-Indiana state line was the aggregate of intermediate rates based on East St. Louis, Ill., the combination from Blackwell to Greencastle at the present time being 34 cents, made up 19 cents to East St. Louis and 15 cents beyond. The joint rate in effect to Greencastle of 25.5 cents is the same as that in effect to Chicago, Ill., and Hammond, Ind. This tariff was subject to rule 77. Under authority of this rule the Hammond rate was established on short notice to Greencastle, located on the Pennsylvania, intermediate to Hammond, and became effective Aug. 1, 1926. This rate is restricted to apply over the Frisco and Pennsylvania via East St. Louis, and was published to expire Aug. 31, 1926. Effective Sept. 1, 1926 the routing to Chicago and Hammond in connection with the Frisco was restricted to routes other than that through Greencastle. HELD, schedules justified. Spelter from Blackwell, 120 I. C. C. 576.

(q) Proposed increased rates and routing restrictions on potatoes and cabbage from points in Virginia on the Norfolk Southern to destinations in c. f. a. territory, for avowed purpose of correcting existing violations of long-and-short-haul provision of section 4 of the act, by which rates from points here involved are lower than rates in effect from Norfolk, found not justified. While comparison with rates in effect between various points for comparable distances indicate that proposed rates, in numerous instances, are reasonable, their establishment, without corresponding advances from competing points in North Carolina, would result in undue prejudice and leave uncorrected many fourth-section violations in addition to creating new ones at points where no such violations now exist. Vegetables from Virginia, 120 I. C. C. 319.

(r) In 115 I. C. C. 357, division 3 found that the proposed elimination of the Salt Lake & Utah as an intermediate participating carrier in the routing of westbound transcontinental traffic was justified and that the refusal of defendants to include that line as an intermediate participating carrier in routing

of eastbound transcontinental traffic was not unreasonable or otherwise unlawful. Rates to and from points on protestant's line are not in issue. The record indicates that protestant has a complete line of joint rates to and from these points and that no increase in the rates would result from protestant's exclusion from the transcontinental routes. The record is clear that the inclusion of protestant's line in the transcontinental routes can benefit no one except protestant and can add nothing to transportation facilities. It will result, further, to inefficient and uneconomical operation, upon which the Commission is unwilling to place its stamp of approval. HELD, previous finding affirmed. Restrictions in routing over S. L. & U. R. R., 122 I. C. C. 208.

(s) Northern Pacific, respondent, and its connections proposed to revise the rates on grain and grain products, carloads, from 46 points on respondents line in western North Dakota to St. Louis, Mo., and Chicago, Ill., and points taking same rates. The suspended schedules in most instances would increase the joint commodity rates, or cancel the joint commodity rates leaving higher combination rates to apply, but in a few instances would effect reductions either by establishing joint commodity rates lower than existing combinations, or by the cancellation of joint commodity rates, leaving lower combinations applicable. Respondent contends that the proper basis of making rates from these points of origin is to extend the rate applying from Yates to St. Louis into North Dakota until the point is reached where the combination basing on Minnesota Transfer makes less than the rate from Yates to St. Louis, the burden of justifying the proposed increased rates whether made upon this or any other basis rests upon respondent. This it has not borne. HELD, except for the proposed revision in the rates on flax seed from stations Geneva to Mandan, to St. Louis and from Glenullen to Gladstone, to Chicago, and on wheat, alfalfa meal and corn from Beach to Chicago, schedules not justified. Grain and grain products from North Dakota, 123 I. C. C. 49.

(t) Proposed readjustment in rates on grain and products from certain stations on the Northern Pacific in North Dakota to St. Louis and Chicago and points taking same rates, found not justified, except that no occasion is found to change proposal to cancel rates on flaxseed from stations Geneva to Mandan, N. Dak., inclusive, to St. Louis, and from stations Glenullen to Gladstone, N. Dak., to Chicago, leaving in effect the existing Minnesota Transfer combination rates, and to cancel rates on wheat, alfalfa, and corn from Beach, N. Dak., leaving in effect combinations the same in amount as present joint rates. Grain and Products from North Dakota, 123 I. C. C. 49.

(u) Proposed cancellation of rates on fish bait, leaving in effect higher rates on fresh and frozen fish from Boston to New York, found justified. Carriers showed that vessels engaged in fishing industry do not operate from New York, that the rate is now obsolete, and that large and regular shipments of high-class food fish were being made at the bait rate and that they are unable to adequately police the shipments. Harlem & Morrisiana Transp. Line v. N. Y., N. H. & H., 123 I. C. C. 480.

(v) Respondents proposed to cancel the existing joint rates on grain and related commodities from points on the M. P. and certain of its connections in Colorado, Kansas, Nebraska, Iowa, and Missouri to stations on the J. L. C. & E., now a part of the Frisco. From Kansas City to the destinations here considered proportional rates now apply also over the line of the Frisco, which has its own rails between these points, and from Missouri river cities such as Omaha joint proportional rates are likewise maintained in connection with this carrier and the M. P. These various rates are the same as or less than the joint rates from the same points sought to be canceled, and the proposed schedules would result merely in closing the existing routes which deprive the Frisco of the long haul. The Frisco seeks to place the rates to destinations on the J. L. C. & E. on the same rate basis as it maintains to nearby stations on its own line. It also seeks, on traffic from the Missouri river gateways to these destinations, to confine the routing to the Kansas City gateway and its own line, which would give it the entire haul beyond Kansas City. HELD, suspended schedules not justified. Grain and Grain Products, 126 I. C. C. 536.

(w) Proposed cancellation of joint rates on grain and related commodities from points on Missouri Pacific R. R., and certain of its connections to various destinations in Arkansas on the Jonesboro, Lake City & Eastern, now a part of the St. Louis-San Francisco, FOUND

not justified. While proposed cancellation would close existing routes which now deprive the Frisco of the long haul and place rates to destinations on the J., L. C. & E. on same rate basis as now maintains to stations on the Frisco, higher combinations from most points would result. Since protestant's mills and elevators are located on the M. P. R. R., and transit is authorized at points on its lines, protestant is desirous of maintaining present joint rates. Moreover, similar situations were considered in 113 I. C. C. 209; 115 I. C. C. 457, and if general principles which governed disposition of those cases are followed here, suspended schedules may not be approved. Grain and Products, 126 I. C. C. 536.

(x) Complainant attacked rates charged on strawberries, carloads, from Tennessee origins to C. F. A. territory shipped during 1923 and 1924 as unreasonable. unjustly discriminatory, and unduly prejudicial as compared with the rates from Huntsville and Chase, Ala., to Detriot and Grand Rapids, Mich., and in violation of the fourth section. Points of origin, with one or two exceptions, are on the C. N. O. & T. P., between Harriman and Chattanooga. Shipments moved C. N. O. & T. P. to Cincinnati, O., and either B. & O., to Toledo, O., and M. C. beyond, or C. N. from Cincinnati to Jackson, Mich., and M. C. beyond. The special service rates apply on shipments handled in a special train scheduled to leave Chattanooga at 6 P. M. and arrive at Cincinnati at noon the following day. It was requested on 90% of the 1925 movement. The use of special service is optional with the shipper, and it is not shown that defendants regular service is any different from that of other lines. The record is insufficient to determine whether or not the rates for special service are unreasonable. From Huntsville and Chase the joint rates on berries nos are 96c to Detroit and 97c to Grand Rapids. From the same points a joint rate of 81c applies on peaches in carloads. The average distances are to Detroit and Grand Rapids, 670.5 and 679.5 miles, respectively. The points of origin here considered are directly intermediate to Chase and Huntsville. Battle Creek and Kalamazoo are intermediate to Detroit and Grand Rapids via some of the available routes. Respondents, Southern Ry., proposed to increase the rates on strawberries in carloads, from Alabama and Tennessee to destinations in central territory. At the present time the Southern tariff names joint through rates on strawberries from Chase and Huntsville to points in central territory, from other points in Alabama and from Tennessee points, there are through rates based on the local rates to the Ohio river crossings, plus proportional rates beyond. It is now proposed to cancel the existing joint through rates and to restrict the application of the proportional rates from Ohio river crossings to central territory points, to traffic originating at points other than in Alabama and Tennessee, and in lieu thereof establish through rates based on the local rates to the river crossings plus third class rates beyond. Strawberries in crates, are rated first class in the official and southern classification. The exceptions to the classification applicable in central territory provide a third class rating on shipments originating in the south. Considering the light loading and perishable nature of strawberry traffic the rates proposed do not appear unreasonable. Furthermore they will correct any fourth section departures that may exist. HELD, rates attacked not unreasonable, proposed schedules justified. Complaint dismissed. Lewis Co.. v. C. N. O. & T. P. R. R.. 128 I. C. C. 3.

(y) Proposed increased rates on strawberries, from points in Tennessee and Alabama to destinations in c. f. a. territory, found justified. Carriers propose to cancel existing joint through rates from Alabama points; to restrict application of proportional rates from Ohio River crossings to traffic originating at points other than in Alabama and Tennessee, and in lieu thereof to establish through rates based on local rates to river crossings plus third-class rates beyond. Principal movement is from points intermediate to Knoxville and Cleveland, Tenn., from which rates are higher than from Knoxville and Cleveland. However, proposed rates apparently are satisfactory to latter points and compare favorably with those for corresponding distances in the same and other territories and with those prescribed in 100 I. C. C. 513 and other cited cases. Moreover, considering the light loading and perishable nature of strawberries, proposed rates do not appear unreasonable and will correct any fourth-section departures that may exist. Lewis Co. v. C., N. O. & T. P., 128 I. C. C. 3, 6, 8.

(z) Proposed cancellation of commo

ity rates on dolomite and fluxing stone in box cars between specified points in c. f. a. territory, and restriction thereof to shipments in open-top cars, on ground that shipments in box cars should take higher rates because of nature of equipment and lighter loading, found not justified. Dolomite is crushed limestone and falls within description of "agricultural limestone." Carrier participates in Indiana intrastate rate applicable on both agricultural limestone and dolomite; rates on agricultural limestone were prescribed in 112 I. C. C. 7, from various points to c. f. a. territory equal to present rate on that commodity between points involved; and record is persuasive that latter rate will be reasonable for application on commodities in box cars here involved. Dolomite and Fluxing Stone, 128 I. C. C. 23.

(aa) Proposal to cancel rates on soda ash, caustic soda, and crude bicarbonate of soda from Cartago, Skinner, and Koeler, Calif., to destinations in trans-continental groups F, G, H, and J, and to restrict routing to destinations in Texas in groups F and H to specific lines, found not justified. Present tariff names varying rates on soda ash depending on minimum weight and proposed cancellation would leave in effect higher rates, applicable on lower minima. Present rate allows protestant to compete with Michigan and Virginia shippers; compares favorably with rates from St. Louis and Chicago to California points and with those on other heavy-loading commodities to and from points involved; moreover, earnings thereunder appear amply remunerative, although respondents' reasons for publishing the protested schedules are explained, they fail to justify the higher rates and greater earnings which would result thereunder. Soda Ash from California, 128 I. C. C. 45.

(bb) Respondents proposed to cancel certain rates on soda ash, caustic soda, and crude bicarbonate of soda, in carloads and to restrict the routing in connection with others, from Cartago, Skinner and Koeler, Calif., to transcontinental groups F, G, H, and J. Points of origin are on the S. P. between Mojave, Calif., and Mina, Nev. The effect of the cancellation will be to leave applicable the higher rates with lower minimum. The earnings under the 90c rate, which it is here proposed to cancel to a large part of the affected territory, seem to be amply remunerative and although respondents reasons for publishing the protested schedules explain, they do not justify the considerably higher rates and greater earnings which would result if the proposed schedules become effective. HELD, schedules not justified. Soda ash from California, 128 I. C. C. 45.

(cc) Respondents proposed to cancel the joint rates on grain and grain products, in carloads, between Sioux City, Ia., and points taking same rates and stations in Kansas, Oklahoma and Colorado, on the Santa Fe, leaving existing higher combination rates in effect generally. Points taking Sioux City rates are in Nebraska and Iowa intermediate to Sioux City. The tariff item which respondents proposed to cancel provides for the construction of joint rates, except rates over the Omaha on northbound grain and southbound grain and grain products, made up of published arbitraries of 13.5c on wheat and articles taking same rates, and 12.5c on corn and articles taking same rates, added to the Kansas City rate. These joint rates have been in effect on northbound traffic since 1912 without substantial charges other than those which occurred under the general increases and decrease. In 1923 they were made applicable on southbound traffic. HELD, proposed schedules not justified. Grain between Sioux City group and Kansas, 128 I. C. C. 434.

(dd) Respondents proposed to cancel certain joint commodity rates on petroleum and its products, in carloads, from Vicksburg and Natchez, Miss., New Orleans, La., and points grouped therewith, including producing points in Arkansas and Texas, to destinations in Ontario and Quebec, Canada taking Buffalo and Boston, Mass., rate bases, respectively. The suspended schedules, if allowed to become effective, would leave in effect to the Canadian destinations higher combination rates based on the Mississippi or Ohio river crossings, or on Chicago, Ill. The lawfulness of rates or charges for that part of the transportation which takes place within the United States has not been put in issue, or dealt with on the record. HELD, schedules justified. Petroleum Mississippi Valley to Canada, 128 I. C. C. 545.

(ee) Proposed cancellation of joint commodity rates on petroleum and its products from Vicksburg and Natchez, Miss., New Orleans, La., and points grouped therewith, to destinations in the Provinces of Ontario and Quebec, Can-

ada, leaving in effect higher combination rates, found not in violation of interstate commerce act. As proposed cancellation was prompted by desire of Canadian lines to withdraw from participation in joint rates and provisions of section 1 of the act apply to common carriers only in so far as transportation takes place within the United States, commission has no authority to prevent Canadian lines from withdrawing their participation in joint rates, or to prevent their cancellation upon such withdrawal. See 115 I. C. C. 609. Petroleum and Products to Canadian Points, 128 I. C. C. 545.

(ff) Respondents proposed the elimination of routes via Montgomery, Ala., in connection with joint rates on cotton originating at points in Alabama and Mississippi on the Southern, Northern Alabama, A. & N. W., S. & C., and M. C., to Carolina destinations and south Atlantic ports. At the present time the rates on cotton from points on the Southern and its connections west of the main line of the L. & N. extending from Decatur, Ala., to Mobile, Ala., to the destinations here considered are not restricted and such cotton may move in connection with carriers operating through Montgomery, thereby depriving the Southern of its long haul on such traffic. The routes of the Southern from and to the points here considered are reasonably direct. In the schedules under suspension it is proposed to restrict the routes so that the Southern should not be required to surrender such traffic to its competitors at short haul junction points. In other words, the Southern proposed to conserve the long haul on traffic it originates or receives from its connections. Respondents have also undertaken to restrict the application of through rates on cotton from Miss. Cent. stations to Carolina destinations so that they will apply only in connection with the Southern beyond Hattiesburg, Miss., its junction point with that carrier. The record shows that the short line distances from M. C. stations to the Carolinas are over the proposed routes. At the present time the tariffs publishing the rates from these stations are unrestricted as to routing and the rates are applicable via numerous routes. The haul of the M. C. would be the same whether the traffic moved via the Montgomery or the Birmingham gateway. Over the latter route, however, the service is more expeditious and the record shows that during the two years prior to the hearing no cotton moved from M. C. stations to the Carolinas via Montgomery, the traffic having moved in connection with the Southern through Birmingham. Respondents have co-ordinated their schedules in such a manner as to give expedited service in the movement of cotton from M. C. stations to the Carolinas, and as these carriers form the short line routes the proposed elimination of the routes via Montgomery do not appear unreasonable. It is not shown or intimated that the elimination of the routes via Montgomery will retard the movement of cotton from and to the point considered or that shippers will be subjected to increased rates as the rates now applicable via Montgomery also apply over the routes to which the traffic is proposed to be confined. It appears that there are practical through routes in connection with respondents lines and there is no showing that the public interest will suffer as a result of the proposed schedules. HELD, proposed schedules justified. Routing on cotton, 129 I. C. C. 387.

(gg) Respondents proposed to cancel the route maintained over the C. & E. I., respondent, in connection with joint rates on lumber and forest products, in carloads, from points in the Mississippi valley to East St. Louis, Ill., and St. Louis, Mo. Traffic from the Mississippi valley to St. Louis and East St. Louis moving in connection with respondents line is generally delivered to it by the Frisco at Chaffee, Mo., or by the M. & O. at Tamms, Ill. The distances from Chaffee and Tamms over respondents line through Findlay, Ill., to East St. Louis are 310 and 279 miles. The distances to East St. Louis from Chaffee over the Frisco and from Tamms over the M. & O. are 147 and 132 miles. The distance over respondents line from Thebes, Ill., its gateway to and from the south, to East St. Louis is 294 miles as compared with 126 miles over the direct route of the M. P. HELD, suspended schedules justified. Restriction in routing lumber, 129 I. C. C. 561.

(hh) Proposed cancellation of commodity rates and application of fifth-class rates on soap and related articles between points in western trunk line and Illinois classification territories, found justified except to extent that class rates resulting therefrom exceed 35 per cent of present first-class rates prescribed in Consolidated Southwestern Cases, 123 I C. C. 203. Present com-

modity rates are low as compared with those under southwestern soap scale as well as with various other rates introduced for comparison, while soap generally moves at fifth-class rates in official and western trunk-line territories and therefore rates proposed will tend to establish uniformity of soap rates in those territories. Soap and Soap Powder, 129 I. C. C. 392.

(ii) Proposed cancellation of circuitous route over Chicago & Eastern Illinois in connection with joint rates on lumber and forest products from points in Mississippi Valley to East St. Louis, Ill., and St. Louis, Mo., found justified. Maintenance of routes does not afford the public any facilities which are not available over several more direct routes and to compel the application of short-line rates over indirect and longer routes merely as a means of providing a channel of doubtful benefit to comparatively few shippers would lay an unnecessary expense upon the railroads against the interest of the public as a whole. See 49 I. C. C. 372. Restriction in Routing Lumber, 129 I. C. C. 561.

(jj) Proposed cancellation of commodity rates on fluxing limestone in box cars between points in eastern trunk-line territory and restriction thereof to shipments in open-top cars, found not justified. While respondents intended ground-limestone rates to become effective on this commodity in box cars by proposed cancellation, sixth-class rates would become applicable thereon. Ground-limestone rates are but 45 per cent of sixth class. Since in 112 I. C. C. 7, rates on fluxing lime were found unreasonable to extent they exceeded 80 per cent of rates on common lime, hydrated, quick or slaked, and in 128 I. C. C. 23, increases to sixth-class rate resulting from porposal to restrict rates on fluxing limestone to shipments in box cars were found not justified, record is persuasive that rates on ground limestone will not be unreasonable for application on fluxing limestone in box cars. Fluxing Limestone, 129 I. C. C. 574.

VII. DUTY TO FURNISH FACILITIES.

See Supra §24; Cars and Car Supply; Facilities and Privileges II.

§26. Restriction Of Routes and Rates.

(a) Tariff provision restricting application of joint rates and providing local or combination rates on iron and steel articles shipped from Pennsylvania and Ohio points, fabricated in transit at Parkersburg, W. Va., and reshipped to Kentucky points and to New Orleans, for export, found unreasonable and unduly prejudicial to extent they exceeded the contemporaneous joint rates plus prevailing transit charges. Transit arrangements on joint rates tend to avoid maladjustments, and connecting lines can not dictate to the road that alone serves the transit point the manner in which joint rates through that point shall be applied in conjunction with the transit arrangements as long as they are not deprived of their long haul, especially where, as here, they perform no greater service on shipments fabricated in transit than they do on shipments not so handled. Reasonable and nonprejudicial rates prescribed and reparation awarded. Parkersburg Rig & Reel Co. v. B. & O., 109 I. C. C. 569.

(b) Proposal to restrict application of rates on lumber between points in Florida including Pensacola, so as to prevent use of such rates in constructing through interstate rates from or to points in that state, designed for purpose of restoring preexisting Jacksonville basis of rates, found not justified. Carriers' contention that Jacksonville combination should be applicable regardless of lower combinations based on Pensacola or other junction points is not sound and would result in unlawful charges to extent that Jacksonville combination would exceed lower aggregate of intermediates over same route. Lumber from or to Florida Points, 112 I. C. C. 133.

(c) While the commission is not prepared to say how many transcontinental routes should be maintained at the direct-line rate, it is evident that reasonable restrictions on routing are desirable in the interest of efficient operation. Revenues in Western District, 113 I. C. C. 3, 21.

(d) Proposed restriction to transcontinental routing of the application of the transcontinental Deming, N. Mex., rates as maxima on grain and related articles from defined territories to all destinations in Texas found not justified. Carriers merely referred to inconsistent routing provisions, their history and re-

sults, and some of the out-of-line hauls which are or may be made under present tariffs, but did not seriously attempt to justify reasonableness of resulting rates. While they should be permitted, even encouraged, to eliminate wasteful transportation, in seeking, as here, to disrupt a rate adjustment of long standing they must show that resulting rates will be reasonable, and will not result in other violations of the act. This burden carriers have failed to sustain. Grain and Related Articles, 113 I. C. C. 195.

(e) Respondents proposed to exclude the Salt Lake & Utah from participation as an intermediate carrier in domestic and export traffic from eastern transcontinental groups to points in inter-mountain and Pacific coast territory. Complainant, Salt Lake & Utah, alleged that the failure and refusal of defendants to list it as a participating carrier in certain eastbound transcontinental tariffs has subjected it to rules, regulations, and practices which have been, and are, unreasonable and unduly prejudicial. Protestant, an electric line, has 78.04 miles of main track and 19.09 miles of side tracks. Its main line extends southwardly from Salt Lake City to Payson, Utah, 66.6 miles, and a branch line extends from Granger, Utah, 6 miles south of Salt Lake City to Magna, Utah, 9 miles. Protestant transports freight, express, mail and passengers between points on its line. At Provo, Utah, it connects with D. & R. G. by means of direct interchange, and with the Salt Lake Route, a unit of the U. P., and Utah Ry. through a switching movement by the D. & R. G. At Salt Lake City it has a direct connection with the movement for protestant's interchange at that point with the D. & R. G. and W. P. Necessarily protestant can participate as an intermediate carrier under the effective tariffs only on traffic moving westward over the D. & R. G. or the U. P. From Salt Lake City to Payson protestant's line parallels both the D. & R. G. and Salt Lake Route, the maximum distance from any point on its line to the nearer of the two steam roads being about 2.5 miles. Between Salt Lake City and Payson there are 10 points on protestant's line spread out fairly evenly, not including Salt Lake City, which are also served by one or the other of the two steam roads, some few of its stations being served by both. The financial status of protestant is but one of the elements of the question before the commission and is not necessarily controlling. Not only is there no advantage to anyone other than protestants by reason of its participation as an intermediate carrier of transcontinental freight, but it sufficiently appears that its participation is, and will continue to be, a positive disadvantage both to respondents and to the transcontinental shippers. It is true that a very few of the shippers along protestant's line might in rare instances be slightly benefited thereby, although the number of such instances has thus far been negligible, but there seems to be no real demand by them for the routes sought; the record is persuasive that the real interest of these shippers lies in protestant's continued existence as an origin and destination carrier, and that the apparent interest of certain other shippers located on other lines has been stimulated by methods of doubtful propriety. It is undisputed that protestant's participation in these routes will result in needless delays and in a considerable added expense of operation. The public interest will not be served by solving protestant's financial problems at the sacrifice of efficiency and economy of operation. HELD: Suspended schedules justified, complaint dismissed. Restrictions in routing over S. L. & U. R. R., 115 I. C. C. 357.

(f) L. & N., respondent, proposed to restrict the application over its line of joint rates on slag, carloads, from Birmingham, Ala., and points in the Birmingham district to Jacksonville, Fla., for local delivery and for beyond. The present rates are $2.03 and $1.91 per ton for local delivery and for beyond, respectively, and apply over all initial lines, including the route over the L. & N. to Montgomery, Ala., and its connections beyond, the Montgomery route. Respondent serves all of the slag producing points in the Birmingham district. Under the proposed schedules these rates would apply on shipments originating on respondent's line when turned over to its connections at Birmingham, but would not apply on such shipments when moved over respondent's line beyond Birmingham. The distance over the Montgomery route in connection with the A. C. L. is 43 miles longer and in connection with the S. A. L. and G. S. & F. is only 20 miles longer than the short line distance over the C. of Ga. to Albany,

Ga., and A. C. L. beyond. As there is no proposal to cancel routing generally, the Montgomery route would still remain open for class and other commodity traffic. So far as appears it would also remain open for the transportation of slag. The proposed restriction would merely make the joint rates inapplicable on shipments so routed, and the record does not show what rates would apply or whether those rates would be reasonable. HELD: Proposed schedules not justified. Slag from Birmingham group points, 115 I. C. C. 587.

(g) If defendants intended to restrict application of the joint rate to any particlar route, and to likewise restrict the reconsignment service in connection therewith, they should have done so in clear and unequivocal language. That there were no established divisions over the route of movement is immaterial. National American Wholesale Lumber Asso. v. A. C. L. R. R., 120 I. C. C. 665, 666.

(h) No joint rates were in effect on lumber from Sulligent, Ala., to Wallins, Evarts, Baxter, Harlan, and Livingston, Ky., and combinations were accordingly assessed. Contemporaneously lower rates applied but were restricted in their application to specified routes. Upon contention that such lower rates were applicable to shipments here involved under an intermediate clause carried in the tariff, HELD: As intermediate rule was specifically restricted to apply via routes over which shipments did not move, they were not entitled to lower rates sought and those charged were applicable. Kentucky Lbr. Co. v. L. & N., 122 I. C. C. 119.

(i) Upon further consideration, finding in former report, 115 I. C. C. 357, that proposed elimination of Salt Lake & Utah R. R., and electric line, as an intermediate participating carrier in the routing of eastbound and westbound transcontinental traffic was not unreasonable or otherwise unlawful, affirmed. The inclusion of the Salt Lake & Utah in transcontinental routes can benefit no one but that line, and can add nothing to transportation facilities. It will result, rather, in inefficient and uneconomical operation, upon which the commission is unwilling to place its stamp of approval. Restrictions in Routing over S. L. & U., 122 I. C. C. 208.

(j) Contention of the Salt Lake & Utah R. R., that the practice of transcontinental lines in permitting certain carriers to short haul them on transcontinental traffic while refusing it the same privilege, subjects it to discrimination under section 3 (3) of the act, not sustained. No showing was made that the circumstances under which these other carriers short haul the transcontinental lines are similar to those existing in connection with the Salt Lake & Utah, or that the latter named carrier is adversely affected by the transcontinental lines' arrangements with these other lines. Moreover, if these arrangements were discontinued protestant would be in no better position than that in which it now finds itself. See 35 I. C. C. 131. Restrictions in Routing over S. L. & U., 122 I. C. C. 208, 210.

(k) Joint rate charged on sweet potatoes from Wybark, Okla., to Hutchinson, Kans., moving via Emporia, Kans., found unreasonable as compared with lower through commodity rate contemporaneously in effect from and to same points but restricted to apply via a longer route through Kansas City, Mo., which lower rate was established via route of movement subsequent to shipment. Reparation awarded. Mid-West Fruit Co. v. A., T. & S. F., 122 I. C. C. 383.

(l) The fact that the shipment traveled a particular route because of a reconsignment order does not deprive the shipper of the benefit of the joint rates. If it was defendants purpose to restrict the application of the joint rate to any particular route, and the reconsigning privileges authorized in connection therewith to any particular point, that should have been done by clear and unequivocal language. Thames v. Southern Ry. Co., 128 I. C. C. 508, 509.

(m) Coal from southern Illinois, Indiana, and Kentucky to points within Chicago switching district were assessed local rates to Chicago plus arbitraries beyond. Contemporaneously lower proportional rates were in effect to Chicago but were restricted to apply only to points beyond the switching district via Chicago and to points on certain lines within the district to which no through rates were published. While complainants contend that rates assessed were not through rates and lower proportionals were applicable, carriers urge that since both locals and arbitraries were concurred in by all participating carriers, they were through as well as joint rates. FOUND: While

doubt as to meaning of tariff provisions is ordinarily construed against the maker, such doubt must be reasonable after consideration of pertinent tariff provisions. Here, it is reasonably apparent that local rates plus arbitraries were through rates within meaning of restrictive tariff provisions and that rates assessed were applicable. Chicago Coal Merchants Asso. v. N. Y. C., 129 I. C. C. 203.

(n) Through rates on coal from Illinois, Indiana, and Kentucky to points within Chicago switching district, consisting of locals to Chicago plus arbitraries beyond, found not in violation of aggregate-of-intermediates clause of the fourth section or otherwise unlawful. While contemporaneously lower proportional rates were in effect to Chicago, they could not be used in connection with the arbitraries but were restricted to apply only in connection with local rates beyond Chicago, on which basis charges higher than those assessed would result. Chicago Coal Merchants Asso. v. N. Y. C., 129 I. C. C. 203, 207, 208.

(o) Proposed restriction of combination rule so as to prohibit any construction thereof by which respondents may be held liable for failure of some other line to make provision for single or maximum increase, found not justified. Proposed restriction would result in increases or avoid reductions of respondents' own local rates when used as factors of through rates, as well as relieve them of shrinkage in factors not pulished by them. However, as it would be inequitable to require them to continue a tariff rule under which they receive less for their services than carriers maintaining joint rates, and in view of finding in 93 I. C. C. 458, usupended schedules ordered canceled without prejudice to filing others which will relieve respondents of shrinkage chargeable to their connections but will not avoid responsibility for that portion which belongs to them combination Rule on Lumber, 129 I. C. C. 564.

(p) First-class rate on passenger automobiles from Janesville, Wis., to Mason City, Iowa found applicable and not unreasonable or unduly prejudicial. Under a restricted tariff a lower joint rate subject to rule 77 of Tariff Circular 18-A was contemporaneously in effect to Ames. Complainant contended that as Mason City was intermediate to Ames over a circuitous route and shipment moved in compliance with routing restriction the lower rate was applicable. FOUND: That publication of rule 77 does not warrant a finding of unreasonableness where as in this case, point which is claimed to be intermediate only over excessively circuitous and unnatural routes over which no shipper could reasonably request transportation under provisions of section 1 (4) of the interstate commerce act. Woodward Auto Co. v. C., M. & St. P., 129 I. C. C. 613.

(q) Seattle-Portland factor of combination rates on wooden poles from Washington points to California was described in the governing traiff as a proportinoal rate but was, nevertheless, an arbitrary. Tariff authorized the application of the combination rule "except as otherwise indicated" and restricted use to "separately establish commodity (or class) rate factors," thus precluding the use of the rule in connection with the Seattle-ortland arbitrary. Rates assessed found applicable except that overcharge, not due to inapplicable rate, was assessed on one shipment. Complaint dismised. National Pole Co. v. G. N., 129 I. C. C. 697.

VIII. EVIDENCE AND PROCEDURE.

See Evidence; Procedure Before Commission.

§27. In General.

(a) A failure to name one participating carrier as a party defendant in a complaint is not fatal where rate in which such carrier participated was a joint rate under which liability of the participants is joint and several. Russellville Compress Co. v. G., M. & N., 120 I. C. C. 481, 482.

(b) Comparisons of average earnings and hauls on all traffic and on a particular commodity are of little value in considering reasonableness of joint rates on such particular commodity between particular points. United Zinc Smelting Corp. v. B. & O., 126 I. C. C. 677, 686.

(c) On hearing before Interstate Commerce Commission to establish tariffs on certain naval stores, from points south of the Ohio river to Kalamazoo, Grand Rapids, and other points testimony of reasonableness of "specifics"

north of the river was competent, since on issue of reasonableness, propriety of each factor was both competent and material, notwithstanding in proposed new tariff rate was published as through rate. Western Paper Makers' Chemical Co., v. United States, 7 Fed. (2d) 164.

(d) Prior existing rates, whether locals or such proportionate rates from a key point to points of destination as were made applicable to particular class of traffic, or through rates on other commodities moving from similar points of origin, are proper matters to be considered by Interstate Commerce Commission in establishing new through rates. Western Paper Makers' Chemical Co. v. United States, 46 Sup. Ct. 500.

(e) Carriers objected to including in an exhibit certain shipments which moved over routes embracing carriers not named as defendants. HELD, objection is without merit. Testimony was not limited to any particular route or routes; rates under attack applied at time of movement over all routes shown on the exhibit; and several of named defendants participated in each movement set forth. Where carriers participate in an unreasonable joint rate they are jointly and severally liable for the unlawful assessment. See 21 I. C. C. 20: Boston Wool Trade Asso. v. B. & A., 128 I. C. C. 185, 186.

(f) Carriers point to defect in pleadings in that a certain carrier was not named as party defendant in the complaint. FOUND, as shipments moved under joint rates omission is not fatal, although no order can be entered against carrier not named. Practical Drawing Co. v. C. & N. W., 128 I. C. C. 540, 541.

§28. Orders of Commission.

(a) Authority exercised by Interstate Commerce Commission in directing that certain routes, which were seldom used, should be abandoned, in order that new schedule of rates would not violate long and short haul clause of Interstate Commerce Act. § 4 (Comp. St. § 8566), HELD within broad discretion vested in Commission. Western Paper Makers' Chemical Co. v. United States, 46 Sup. Ct. 500.

(b) Under Act to Regulate Commerce, §§ 1, 3 (Comp. St. §§ 8563, 8565), Interstate Commerce Commission's finding that combined rates on Western coal shipments from particular West Virginian mines were unreasonable and discriminatory HELD not invalid, for want of finding of public necessity for establishment of through rates and joint rates. Virginian Ry. Co. v. United States. United States v. Virginian Ry. Co., 47 Sup. Ct. 222.

(c) Where Virginian Railroad, having physical connection with Chesapeake & Ohio, was ordered to establish through routes and joint rates from mines on its line to Western markets, HELD, a subsequent agreement to lease Virginian to Norfolk & Western and the establishment of through routes and joint rates between Virginian and Norfolk and Western, was not equivalent to compliance with such order. Virginian Ry. Co., v. United States. United States v. Virginian Ry. Co., 47 Sup. Ct. 222.

TIME ZONES

(a) Upon petitions of cities of Middletown and Cincinnati O., the Commission reopened this proceeding for further hearing to determine whether the boundary line between the United States standard eastern time zone and the United States standard central time zone should be so modified as to include them in the Eastern time zone. Cincinnati is in southwestern Ohio on the Ohio river, and Middletown is about 30 miles north of Cincinnati. HELD, from the entire record it would appear that the inclusion within the eastern time zone of the petitioning municipalities and that territory on and east of the B. & O. from Toledo to Cincinnati, will remove many inconsistencies in commerce, will not interefere with the safe operation of the railways serving such territory, or necessitate any change in the present division points, but will simplify the operation of certain of such railways. Standard Time Zone Investigation, 122 I. C. C. 122.

(b) Upon supplemental report, previous orders, particularly the twelfth supplemental report, 91 I. C. C. 686, defining limits of United States standard Eastern and Central time zones, modified so as to include Cincinnati and Middletown, Ohio, and portions of Ohio, Kentucky, and West Virginia in the Eastern time zone. Such change will remove many inconveniences in commerce, will not interfere with safe operation of railways serving the territory, or necessitate any change in present division points, but will simplify operation of certain of such railways. Standard Time Zone Investigations, 122 I. C. C. 122.

(c) Santa Fe requests, by petition, that the Commission modify its orders so as to include its branch lines from Dodge City, Kan., to Felt and from Satanta to Pritchett within the Central time zone, and also to authorize it to operate its Great Bend branch, which extends from Great Bend to Scott City, Kas., under standard central time. HELD, petition granted. Standard Time Zone Investigation, 129 I. C. C. 209.

(d) Previous orders based upon original and supplemental reports, 51 I. C. C. 273, 555, defining limits of United States standard Central and Mountain time zones, modified so as to place certain portions of the State of Kansas now in the Mountain zone within the Central time zone, and under an exception to allow the Atchison, Topeka & Santa Fe Ry. Co., to operate its line from eastern boundry of Ness County, Kans., to Scott City, Kans., under standard Central time. By such change greater convenience of commerce will be served and intent of preceding orders better effected. Standard Time Zone Investigation, 129 I. C. C. 209.

TOP ICING

See Perishable Freight; Refrigeration §3½a.

(a) Proposed changes in rules, regulations, and practices affecting refrigeration and handling of perishable freight at points in United States, designed for purpose of securing compensatory charges for transporting ice placed upon top of load and alleged resultant damage to cars, found not justified. While carriers should be compensated in some way for whatever damage may be attributable to top icing and for cost of transporting ice, the proper method of refrigerating perishable traffic is from ice in bunkers. Protective Service Rules on Perishable Freight, 104 I. C. C. 79.

(b) Findings in original report, 104 I. C. C. 79, wherein commission approved maximum amount of top ice which should be permitted to be placed on top of load, modified to permit increase in maximum amount on shipments of cauliflower. Protective Service Rules on Perishable Freight, 109 I. C. C. 657.

TOWAGE

See Water Carriers.

TRACKAGE AGREEMENTS

(a) Upon petition of carriers parties to an operating agreement governing use and operation of union terminals at Kansas City, seeking entry of an order, pursuant to section 3 (4) of the act, under which they will be accorded right to use such facilities upon compensation determinable wholly upon a user basis, HELD: Power and authority invoked are not conferred by section 3 (4), requirment of which lays upon a carrier "owning or entitled to enjoyment" of such facilities to accord their enjoyment or use to "another carrier or carriers." Here carriers under operating agreement and as coproprietors, already use and enjoy such terminals, and to grant relief sought would involve a revision or reformation of operating agreement. M.-K.-T. v. K. C. T., 104 I. C. C. 203, 222, 223.

(b) Carriers seeking, in effect, revision or reformation of an improvident operating agreement governing joint use and operation of terminal facilities, contend that for commission's jurisdiction to attach it need only give effect to section 15a of the act without waiting until a carrier's bankruptcy shall ensue, and find as a fact that operating agreement is so burdensome as to result in inefficient and uneconomical operation, to cause misapplication of funds created for an entirely different purpose, and generally to operate to impair carrier's ability to furnish adequate railway service. FOUND:Neither expressly nor by implication does section 15a embrace a direct or indirect revision or reformation of any such contract, nor is commission able to find requisite power or authority in any other provision of the act. M.-K.-T. v. K. C. T., 104 I. C. C. 203, 223, 224.

(c) Complainant's mines are exclusively on one carrier, and neither defendant has the right of access thereto over the lines of the other. The duty of a carrier to equalize treatment among shippers extends only to those whom it is bound to serve. Complainant contends that they are discriminated against because defendants refuse to enter into trackage arrangements or otherwise extend their lines so as to accord them joint service. Commission has held the location of mines upon two or more lines differentiates their situation from that of a mine or mines located on but one carrier. Winding Gulf Colliery Co. v. C. & O. Ry., 115 I. C. C. 113, 116.

(ca) If a carrier extends its service by trackage agreement to one mine on another line, it would be difficult, if not impossible, to justify a refusal to accord similar treatment to another intermediate competing mine located on the track over which it operates under the trackage agreement. Ragland Coal Co. v. V. Ry., 115 I. C. C. 147, 150.

(d) Trackage agreements may in some cases result in undue preference to the party benefited by such arrangements. Winding Gulf Colliery Co. v. C. & O., 115 I. C. C. 113, 118.

(e) Failure of carriers to accord same service and facilities to certain local mines in the New River district of West Virginia as are accorded other mines in the same district similarly situated, the latter by trackage agreement or otherwise being accorded a joint-mine status, found not to result in discrimination or undue prejudice. The location of mines upon two or more lines differentiates their situation from those located on but one carrier and where a railroad enters into a trackage agreement with another, it is in effect an extension of its line. The complaining mines here are not intermediate to mines accorded a joint status, and carriers are not chargeable with discrimination or undue prejudice merely because they accord certain mines a joint status by trackage arrangements, while refusing to extend similar service to other mines. Winding Gulf Colliery Co. v. C. & O. Ry., 115 I. C. C. 113; Ragland Coal Co. v. V. Ry., 115 I. C. C. 147.

(f) Prior report 98 I. C. C. 183, modified so as to provide for application of single-line distance scale rates therein prescribed, in lieu of joint-line rates, on cottonseed and related articles between points west of Mississippi River on the St. L., S. W. Ry., and Memphis, Tenn., when handled by that carrier over the C., R. I. & P. Ry., between Memphis and Brinkley, Ark., under a trackage arrangement. Oklahoma Corp. Commission v. A. & S., 118 I. C. C. 439.

I. WHAT IS TRANSPORTATION SERVICE.

§1. In General.

(a) "Transportation service" is one which requires no other service to complete shipper's object, while "switching or transfer service" is one which precedes or follows transportation service, regardless of whether or not it involves use of portion of carrier's main line or that of another. Andrews Steel Co. v. Davis, (Ky., 1925) 276 S. W. 148.

(b) Carrier's movement of loaded cars, containing freight shipments between two companies located about a mile apart, in yard limits, HELD, a "transportation service," and not a switching service, and carrier not entitled to recover car rental charge for such service in excess of published rate denominated a "switching charge." Andrews Steel Co. v. Davis, (Ky., 1925) 276 S. W. 148.

§1½. Jurisdiction of Commission.

See Interstate Commerce Commission I; Jurisdiction of Commission.

(a) Denial by a common carrier subject to the act of delivery lawfully designated in a bill of lading or reconsignment instructions in respect of shipments moving in interstate commerce is a matter which may change, affect, or determine value of service rendered to a shipper, and as such is within commission's Jurisdiction. Berger v. P. R. R., 115 I. C. C. 697, 698.

II. DUTY OF CARRIER TO TRANSPORT.

See C. O. D. Shipments (a); Cars and Car Supply IV, V; Classification §6½ (a), §16 (i); Common Carrier §6; Facilities and Privileges II; Freight Charges (f); Routing and Misrouting II.

§2. In General.

(a) Complainant alleged defendant's refusal to accept shipments of gasoline and petroleum refined oils, in tank cars, tendered by complainant at Wilmington, N. C., for transportation over interstate routes to Kernersville, Hookerton and Raeford, N. C., as unlawful. The routings specified were interstate, and rates of 32c prior to July 1, 1922, and 29c thereafter were applicable. No routing restrictions were published in connection with the interstate rates, the application of which were limited to interstate traffic. When the bills of lading for the shipments were tendered to the agent of the A. C. L. at Wilmington, he refused to accept the shipments for transportation over the interstate routes, and before he signed the bill of lading demanded that the routing be changed to the intrastate route over A. C. L. and A. & R., over which intrastate rates of 35.5c prior to July 1, 1922, and 32c thereafter were applicable. Shipments moved over intrastate routes. Defendants clearly violated paragraph 8 of section 15 in that they refused to accept the shipments for transportation over the duly published unrestricted interstate routes. HELD: Refusal to accept the shipments for transportation over interstate routes unlawful, reparation awarded. Standard Oil Co. v. A. C. L. R. R., 115 I. C. C. 239.

(b) Refusal of carriers, parties to southern classification, to accept l. c. l. shipments of stoves or ranges made of cast iron, or of plate or sheet iron with cast-iron bases or tops, unless boxed or crated, found unreasonable. Reasonable rating of second class, or one class higher than on crated stoves or ranges, prescribed for future. Cairo Asso. of Commerce v. B. & N. W., 115 I. C. C. 3.

(c) A carrier's duty to furnish transportation does not arise until request is made therefor. See section 1 (4) of the act. Victor-American Fuel Co. v. D. & S. L., 115 I. C. C. 169, 174.

(d) Refusal of carriers to accept and transport intrastate shipments tendered for transportation via a duly published unrestricted, interstate route and compelling shipper to change routing in bills of lading to a higher intrastate route, found to violate section 15 (8) of the act. Reparation awarded. Standard Oil Co. v. A. C. L. R. R., 115 I. C. C. 239.

(e) Denial by a common carrier subject to the act of delivery lawfully designated in a bill of lading or reconsignment instructions in respect of shipments moving in interstate commerce is a matter which may change, affect, or determine value of service rendered to a shipper, and as such is within commission's jurisdiction. Berger v. P. R. R., 115 I. C. C. 697, 698.

(f) Fuel oil shipped from Okmulgee,

Okla., to Chicago Heights, Ill., was delivered to consignee. Thereafter, car was placed on tracks outside plant, and carrier notified by telephone that it was empty and to return same over inbound route, such instructions also being confirmed in writing. Upon arrival of returned car at original point of origin it was found to have been fully loaded. HELD, complainant not denying that he gave instructions above set forth and that he executed the usual certificate authorizing return of car without having first ascertained whether or not it was empty, failure of carriers to ascertain whether car tendered to them was empty did not result in collection of unreasonable or discriminatory charges. Mfgrs. Asso. of Chicago Heights v. C. H. T. T., 120 I. C. C. 357.

(g) It is the duty of carriers to provide transportation services desired by the public over any of their lines at rates not in excess of reasonable maxima. Consolidated Southwestern Cases, 123 I. C. C. 203, 377.

(hi) Carrier's refusal to accept shipment of watermelons for transportation, charges collect, FOUND, not discriminatory or otherwise unlawful. Governing tariff specified that watermelons would be accepted freight "collect" only where carriers were protected by surety bond guaranteeing payment of freight charges. Complainant's telegram and certain bills of lading covering similar shipments from another point, were only evidence offered by shipper as authority to ship on complainant's bond and agent considered this insufficient authority to cover shipment tendered. Moreover, determination of what constitutes sufficient evidence of authority must necessarily be left to discretion of agents, and it was not an abuse of such discretion to refuse to accept the telegram as general authority to ship on complainant's bond. Edgerton & Beers v. A. C. L., 126 I. C. C. 422.

(j) Though carrier may make separate and additional charge for service (that is, accessorial to transportation service), it may not make such charge for one of necessary elements of that service. Andrews Steel Co. v. Davis (Ky., 1925) 276 S. W. 148.

(k) Abnormal conditions may relieve carrier from liability for failure to perform usual transportation services, but does not justify extra charge for performing them. Chesapeake & O. Ry. Co. v. Westinghouse, Church, Kerr & Co., Inc., 46 Sup. Ct. 220. Mellon, Director General of Railroads, v. Same, 46 Sup. Ct. 220.

§5. Delivery By Carrier.

See Drayage; Express Companies §2; Side Tracks and Spur Tracks; Spotting; Stock Yard Companies; Switch Tracks and Switching §5.

(a) In absence of instructions to the contrary, it is right of a carrier, and ordinarily would be appropriate course, to place a car for unloading promptly upon arrival at destination. Milne Lbr. Co. v. C. & N. W., 107 I. C. C. 653, 655.

(b) When a shipment is placed at a track where either actual delivery or inspection could be made, it would be vain to require unloading if receiver of the car desired to resell its contents and reship to another party. But where point of placement is admittedly selected solely for purposes of inspection it is obvious that any unloading which there takes place is incident to inspection and that an immediate sale of contents to another party is not sufficient to change character of transaction from inspection to actual or constructive delivery. Brown & Co. v. E. R. R., 109 I. C. C. 109, 113.

(c) While shipment was in transit consignee notified carrier by telephone that it would not be accepted. Nevertheless, upon arrival shipment was placed on consignee's private track where it was refused and subsequently reforwarded without surrender of bill of lading. HELD: Notice of refusal being given before arrival of shipment at original destination, placement of car on consignee's private track was unauthorized and shipment found overcharged to extent that charges collected exceeded those which would have accrued on basis of through rates from origin to final destination. Refund of overcharges directed. Scoular-Bishop Co. v. A., T. & S. F., 118 I. C. C. 501.

§6. Notifying Consignor or Consignee.

See Notice.

(a) Tariff required that notice of a refused shipment at destination shall be "sent by wire to consignor when known," but does not name agency for transmission of the notice. Fact that such notice is sent "by wire" over carrier's private

line and not over lines of Western Union or Postal Telegraph, does not affect the sufficiency thereof. Milne Lbr. Co. v. D., T. & I., 120 I. C. C. 488, 491.

§8. Special Services.

See Express Companies §2; Special Rates and Services.

(a) A carrier is not required, as part of its transportation service, to furnish warehouse space to all shippers of fruits and vegetables for unloading, sorting, displaying, auctioneering, and delivery of c. l. shipments in l. c. l. lots, to purchasers thereof. This is a trade service. Generally speaking, shippers are required to unload c. l. freight and it does not appear that there is any duty upon carrier to do more than furnish suitable delivery tracks for the unloading service. Andrews Bros. v. P. R. R., 123 I. C. C. 733, 739.

III. OPERATION OF RAILROAD.

§11½. In General.

(a) Carrier is presumed to conduct business lawfully. New York, N. H. & H. R. Co., v. Salter, (Conn. 1926) 134 Atl. 220.

TRANSPORTATION ACT

See Act to Regulate Commerce VI; Claims §1½; Statute of Limitations.

TRANSSHIPMENT RATES

See Facilities and Privileges §15½; Transfer.

(a) Rates on anthracite silt from Scranton and other Pennsylvania mines to Buffalo, N. Y., and Erie, Pa., for transshipment by lake to interstate destinations, found unreasonable. Washed silt is of extremely low value at the mines and although used to some extent for other purposes, it has value as a domestic fuel only when manufactured into briquets. Furthermore, transshipment rates which contemplate a movement beyond ports may reasonably be somewhat lower than those applicable on local traffic. Stott Briquet Co. v. P. R. R., 113 I. C. C. 693.

TRAP CARS

See Allowances §8 (7a), §12 (2) (a); Demurrage §10; Ferry Charges.

(a) Failure or refusal of carrier to compensate complainant out of line-haul rates for services performed by latter in checking, weighing, loading, and unloading l. c. l. shipments delivered to or forwarded from its industrial plant at Minetto, N. Y., in trap or ferry cars, found not to violate the act. Here shipper voluntarily elected to perform such services without request, intention, or desire of carrier, who expressed a preference to handle such shipments through its own terminals. It was carrier's privilege to perform these services itself and commission can not competently prescribe compensation it is to pay to a voluntary agent (here the complainant) for performing them. Columbia Mills v. D., L. & W., 118 I. C. C. 112.

(b) A carrier is under no duty or obligation to "farm out" the work of and incident to receipt or delivery of l. c. l. freight handled in usual way, and such traffic as is accorded service of a trap or ferry car, received or delivered upon private sidings remote from carrier's own terminal facilities, is for obvious reasons loaded or unloaded by consignors or consignees. This is recognized by definition of the term "trap or ferry car service" in 34 I. C. C. 516, 519, 520. Columbia Mills v. D. L. & W., 118 I. C. C. 112, 117.

TWENTY-EIGHT HOUR LAW

See Live Stock Shipments.

(a) Carrier, by contracting that shipper shall take care of animals during transportation, cannot escape liability for penalty, under U. S. Comp. St. § 8653 for confining animals in car for more than 28 hours without unloading for rest, water and feeding, as required by sections 8651 and 8652. Walrath v. American Ry. Ex. Co. 216 N. Y. S. 545, 546.

See Control and Regulation.

§1. Jurisdiction Of Commission.

See Interstate Commerce Commission I; Jurisdiction of Commission.

(a) Shipment of old files (company material) moved free over initial carrier's line, but for movement beyond such carrier failed to prepay full amount of applicable rates, resulting in outstanding undercharges being collected from consignee. Upon complaint seeking their refund upon theory that as director general was operating both initial and delivering lines he disregarded his own instructions that charges be fully prepaid, and that billing should have been corrected and collection made of initial carrier, HELD: It is delivering carrier's duty to collect applicable rates on prepaid shipments and correct any errors made by initial carrier's agent in billing or in collection by it of prepaid charges; and it is not for the commission to determine the liability of consignor or consignee for undercharges, that question being one for the courts. Continental File Corp. v. Director General, 109 I. C. C. 403.

(b) It is delivering carrier's duty to collect applicable rates on prepaid shipments and to correct any errors that may have been made by agent of initial carrier in billing or in collection by it of prepaid charges. See 25 I. C. C. 442, 475; Conf. Rulings 16, 156, and 314. It is not for the commission to determine in any case which party, the consignor or consignee, is legally liable for an undercharge; that question is determinable only by a court having jurisdiction and upon the facts in each case. Continental File Corp. v. Director General, 109 I. C. C. 403, 404.

§1½. Jurisdiction Of Courts.

See Courts.

(a) It is not for commission to determine in any case which party, the consignor or consignee, is legally liable for an undercharge; that question is determinable only by a court having jurisdiction and upon facts in each case. Continental File Corp. v. Director General, 109 I. C. C. 403, 404.

II. DUTY OF CARRIER TO COLLECT.

§2. In General.

(a) It is delivering carrier's duty to collect applicable rates on prepaid shipments and to correct any errors that may have been made by agent of initial carrier in billing or in collection by it of prepaid charges. See 25 I. C. C. 442, 475; Conf. Rulings 16, 156, and 314. It is not for the commission to determine in any case which party, the consignor or consignee, is legally liable for an undercharge; that question is determinable only by a court having jurisdiction and upon the facts in each case. Continental File Corp. v. Director General, 109 I. C. C. 403, 404.

IV. LIABILITY TO PAY.

§7. In General.

(a) Paper was sold f. o. b. mill at a price reflecting actual freight charges paid instead of applicable rate, deduction of such charges as such not being shown on face of invoice. Such freight charges, were paid and borne by consignee, who passed them on to its customers. Upon contention of consignee that in selling it has to meet prices of competing jobbers, and that if forced to pay outstanding undercharge, the paper having been resold, it will sustain a loss in the amount of undercharges collected, HELD: Undercharges and consequent loss would have occurred even if rate assessed had not been unduly prejudicial, and since shippers as well as carriers are charged with a knowledge of legally applicable tariff charges the fact that there are outstanding undercharges is insufficient to sustain an award of damages under a finding of undue prejudice. Clements Paper Co. v. T. C., 112 I. C. C. 411, 416, 417.

(b) Where charges presented to and paid by consignee of interstate freight shipment, on his receipt thereof, were less than the established rate, he is liable

for the undercharge, carrier not being estopped, as this would result in discrimination, which under any circumstances is forbidden. Director General of Railroads v. McCormick, (N. H., 1927) 136 Atl. 253.

(c) The delivering carrier may maintain an action to collect undercharges on prepaid shipments. Illinois Cent. R. Co., v. Van Dusen, Harrington Co., (Minn., 1927) 212 N. W. 940.

(d) A common carrier must collect the amount of an undercharge on an interstate shipment from one legally liable, and, under the facts detailed in the opinion, one, who bought merchandise in the course of transportation to be delivered, and who accepted the shipment and paid the charges, was liable to the carrier for an undercharge, though not named as consignee in the bill of lading. Case v. Union Pac. R. Co., (Kans., 1925) 241 Pac. 693.

(e) In an action by a railway carrier to recover a balance alleged to be due as undercharges on the intrastate transportation of 31 carloads of wheat and the products milled in transit therefrom, the record and pertinent freight rate schedules considered, and HELD to support plaintiff's cause of action and the judgment based thereon. Missouri Pac. Ry. Co., v. Red Star Milling Co. (Kans., 1926) 251 Pac. 417.

(f) Evidence that railroad iced carload of oranges to preserve them from damage in transit HELD to authorize recovery of icing charge from consignee. Central of Georgia Ry. Co. v. City Supply Co. (Ga., 1926) 135 S. E. 767.

(g) Where contract of shipment of cut stone provided for rate less than published schedule filed with interstate commerce commission, carrier could recover difference, since scheduled rate formed part of contract of shipment by operation of law and parties could not contract for less rate than schedule filed with commission. Missouri Pac. R. Co., v. Pfeiffer Stone Co., (Ark., 1924) 266 S. W. 82.

(h) Where a shipper ships goods to a consignee over a railroad whose rates are fixed by a public body, and such rates are made obligatory upon the railroad and a mistake is made in the rate charged for such shipments, and the shipment is delivered to the consignee before such mistake is discovered, the carrier may recover the difference in the rate paid and that required to be paid from the shipper. In such case it has the option to sue either the shipper or consignee, unless it has made a binding contract to the contrary. Gulf, M. & N. R. Co. v. Riverside Brick & Mfg. Co., (Miss., 1926) 107 So. 193.

(i) Delivering carrier cannot sue consignee for undercharge on interstate shipment where latter is agent for consignee and such fact is known to carrier. Louisville & N. R. Co. v. A. N. Chappell & Co. (Ala., 1926) 109 So. 573.

(j) Delivering carrier may recover of consignee for undercharge on interstate shipment delivered to consignee, though latter is agent for consignor, which fact is known to carrier. Louisville & N. R. Co. v. A. N. Chappell & Co., (Ala., 1926) 109 So. 573.

(k) One who acts as agent for another in receiving from a railway carrier a shipment of goods is not liable to the carrier for the amount due in case of an undercharge of freight, in the absence of facts justifying an estoppel by which he should be prevented rom showing such agency. Under this principle the defendants in this case were not liable for the undercharge sued for. The verdict in the plaintiff's favor was unauthorized and must be set aside. Smith Bros. Co. v. Charleston & W. C. Ry. Co. (Ga., 1927) 137 S. E. 115.

§7½. State Courts and Laws.

See Courts.

(a) In suits to recover for undercharge on interstate shipments, federal statutes control, but state courts follow their own judgment unless statutes have been construed by United States Supreme Court. Louisville & N. R. Co. v. A. N. Chappell & Co., (Ala., 1926) 109 So. 573.

§10. Statute of Limitations.

See Statute of Limitations.

(a) Complainant alleged that the collection of undercharges by defendants after the expiration of the three year period of limitation on a carload of flour shipped Oct. 14, 1920 from Lawrenceburg, Ind., to Jacksonville, Fla., was unreasonable, unjustly discriminatory, unduly prejudicial and unlawful. The jurisdiction of the Commission to consider ques-

tions of this kind is shown in paragraph 3 of section 16 of the act as amended, and is confined to cases where complaints are filed within two years from the date of delivery or tender of delivery of the property, except that where transportation charges are collected by carrier on or before the expiration of the two year period of limitation in subdivision b or of the three year period of limitation in subdivision c of said paragraph complaint may be filed within 90 days from the date such charges are collected. The statutory period had expired before the complaint was filed. HELD, complaint dismissed. Baker & Holmes Co. v. A. C. L. R. R., 132 I. C. C. 723.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. In General.

(a) The policy declared by Congress in section 500 of the transportation act 1920, is to foster and preserve in full vigor both rail and water transportation. Traffic between trunk-line territory and the Texas ports and points contiguous thereto is naturally tributary to the ocean lines and to permit rail carriers from St. Louis, Chicago, Pittsburgh, Cleveland, and other points to maintain rates so low as to deprive such water carriers of the traffic naturally theirs is not in accord with the spirit of section 500. Consolidated Southwestern Cases, 123 I. C. C. 203, 341.

(b) Section 500 (1) of transportation act, 1920, declaring it "to be the policy of Congress to promote, encourage, and develop water transportation, service, and facilities in connection with commerce of the United States, and to foster and preserve in full vigor both rail and water transportation," negatives any intent on part of Congress to restrict extension of water transportation to regions which can not be adequately served by rail lines. Inland Waterways Corp. v. C. G., W., 129 I. C. C. 521, 529.

§2. Jurisdiction of Commission.

See Interstate Commerce Commission I; Jurisdiction of Commission.

(a) To give interstate commerce commission authority to fix a through rate, including both rail and water car-

riage, it is not necessary that the water carrier should be controlled by a rail carrier. Chicago, R. I. & P. Ry. Co. v. United States, 6 Fed. (2d) 888.

(b) Under Interstate Commerce Act as amended, the Interstate Commerce Commission has jurisdiction to establish through joint rates for carriage partly by rail and partly by water. Chicago, R. I. & P. Ry. Co. v. United States, 6 Fed. (2d) 888.

II. DISCRIMINATION AND REASONABLENESS.

See Infra VI; Discrimination; Reasonableness of Rates.

§3. In General.

(a) Conditions peculiar to water transportation require consideration of cost elements which do not enter into all-rail rates. Express Publishing Co. v. A. S., 107 I. C. C. 528, 532.

(b) Piling is unsatisfactory traffic from the point of view of the steamship operator. It is difficult to stow properly and as a deck load it is not even as suitable as lumber. In the event that piling is loosed from its lashings during rough weather it becomes a source of serious damage and danger. Dutton Lbr. Corp. v. Director General 112 I. C. C. 661, 674.

(c) The ratio in favor of water transportation as compared with rail transportation increases with the length of water haul, but what the ratio may be in case of long hauls between the costs through Panama Canal is purely speculative. Wool Rates Investigation, 1923, 120 I. C. C. 493, 503.

III. TARIFFS AND CONSTRUCTION.

See Tariffs.

§4. In General.

(a) Southern Ry. system FX3 concurrence to a tariff of St. Louis & Tennessee River Packet Co., the originating line, found not sufficient to make Northern Alabama Ry. one of the Southern system lines, not specifically shown as a concurring carrier therein, a party to such tariff. Florence Chamber of Commerce v. N. O. & N. E., 118 I. C. C. 228.

(b) Cotton gathered at Tennessee River landings by packet boat line was carried to Riverton, Tenn., and forwarded by rail to New Orleans under new bills of lading taken out by complainant for sole purpose of showing car numbers therein. Charges were prepaid at through rate shown in bills of lading which also specified routing via Northern Alabama Ry. That carrier not concurring in packet company's tariff carrying through rate, additional charges were collected at destination. HELD: Nonconcurrence rendered a combination applicable. Moreover, shipments were through shipments and had packet company advised complainant that its tariff did not, as its title-page purported to do, apply via Riverton, complainant unquestionably would have directed rerouting. There being no intention to break continuity of movement, packing company's failure to refuse shipments or hold them pending settlement of conflict between rate and route specified in original bills or lading, resulted in misrouting. Reparation awarded against all carriers for overcharges and against packet company for misrouting. Florence Chamber of Commerce v. N. O. & N. E., 118 I. C. C. 228.

(c) Most large shippers have spur-track connections, and if a shipment moves over a carrier's line owning the spur there is no switching charge in addition to line-haul rate. Local steamer rates apply from dock to dock and shippers have to pay drayage and switching charges to and from the dock. Switching charges plus handling charge make total switching cost about same as drayage cost. In some, but not in all instances, unloading, reloading, and switching charges are absorbed by standard steamer lines. Such lines contend that if rail carriers' rates were based upon a 10-cent differential over the water rate both water and rail lines would enjoy an equal opportunity and each could be expected to obtain its share of traffic. Pacific Coast Fourth Section Applications, 129 I. C. C. 3, 14.

(d) All-rail and water-and-rail rates on sugar from San Francisco and Crockett, Calif., to Missoula, Mont., found unreasonable as compared with lower rates distance considered contemporaneously in effect from San Francisco to Utah, Colorado, and various other points; and rates from Portland, Oreg., Seattle and Tacoma, Wash., to Missoula, found unreasonable and unduly prejudicial to extent they exceed corresponding rates from Seattle, Tacoma, and Portland to Spokane, Wash., by more

than 20 cents per 100 pounds. Reasonable rates prescribed for future and reparation awarded. M'Clintock-Trunkey Co. v. McComick S. S. Co., 129 I. C. C. 591.

IV. THROUGH ROUTES AND JOINT RATES.

See Routing and Misrouting §6½ (a); Through Routes and Joint Rates.

§6. In General.

(a) Pulp wood: Proposal of Pennsylvania R. R., to restrict application of its rate on, from Washington, D. C., to Roaring Springs, Tyrone, Williamsburg, and Lock Haven, Pa., to shipments reaching Washington by water, and on such traffic originating locally at Washington to apply a higher rate in effect from Rosslyn, Va., found not justified. West Virginia Pulp & Paper Co. v. B. & O., 104 I. C. C. 495.

(b) Refusal of rail carriers to establish through routes and joint or proportional rates with the Nelson S. S. Co. on same basis and to same extent as contemporaneously maintained with the Pacific S. S. Co. and McCormick S. S. Co., competing water lines, found to result in undue prejudice. The Nelson company transports same classes of freight at same time between same ports at same rates under substantially similar circumstances and conditions as its competitors, its service is satisfactory, and it is financially responsible. While service rendered by the competing lines is also satisfactory, this fact alone is sufficient under the law to warrant undue prejudice found in view of the express language of section 3 of the act. The through routes and rates prayed for found desirable in the public interest and ordered established. Nelson S. S. Co. v. B., A. & P., 109 I. C. C. 529.

(c) The commission has repeatedly declined to sustain pleas of rail carriers that their existing water-line connections were ample and satisfactory as a reason for not requiring them to make similar arrangements with another water line. The national policy has been declared to be that a navigable river is a public highway, a natural avenue of commerce, and public interests demand that its advantages be utilized to the fullest extent. The same language is applicable to the ocean. See 31 I. C. C. 281 and other cited cases. Nelson S. S. Co. v. B., A. & P. Ry., 109 I. C. C. 529, 536.

(d) Refusal of rail carriers at Duluth to accord the Minnesota-Atlantic Transit Co., increased divisions for handling carload freight between cars and floor of its privately owned docks, found not unjustly prejudicial, nor in violation of section 1 (4) of the act. The law does not require defendants to perform services sought merely because they perform them at their own docks, so long as no discrimination is practiced. Here defendants perform no loading or unloading at any private dock, at any dock leased by it to steamship lines or shippers, or at docks of other carriers to which, for convenience of shipper or steamship line, it switches cars. Moreover, the issue of divisions has not been presented with sufficient particularly to warrant a finding as to their reasonableness. Minnesota-Atlantic Transit Co. v. C., St. P. M. & O., 123 I. C. C. 485.

(e) Order of Interstate Commerce Commission, requiring carriers to fix through rail and water rates by relation to their all rail rates between the same points, HELD not invalid. Chicago, R. I. & P. Ry. Co. v. United States, 6 Fed. (2d) 888.

(f) Complainants alleged that the through water and rail rates on sugar from San Francisco, Crockett, and Protrero, Calif., through the ports of Portland, Ore., and Seattle and Tacoma, Wash., to Spokane, Wash., as well as proportional rates from the said ports and the local rate from Portland, are unreasonable, unjustly discriminatry and unduly prejudicial to Spokane and unduly preferential of dealers located at the ports as well as at Salt Lake City, Utah and Ogden, Utah, and elsewhere. Although attacking the through rate, complainants contend that the unreasonableness is in what they term the rail factor from the ports, and they seek the establishment of a local and proportional rate of 38.5c from Portland, applicable from Seattle and Tacoma as a proportional rate. Sugar is a heavy loading commodity whose transportation is not attended by any special difficulties, but its value is such that freight rates play comparatively small part in the ultimate cost to the consumer. It may reasonably pay relatively high rates, compared with many low grade commodities, but the 75c and 61c rates under attack yield amounts per ton mile and per car mile which are sufficiently high to invite scrutiny. HELD, rate

of 75c water and rail from San Francisco to Spokane not unreasonable or otherwise unlawful. The 61c rate is too high for local rate from Portland. HELD, this rate from Portland to Spokane, Wash., unreasonable to extent it exceeds 55c, minimum 44,000 pounds, reparation awarded. No. 17562. Complainant attacked the water and rail rates on sugar from San Francisco and Crockett, Calif., and the local and proportional rates on the same commodity from the north coast ports to Missoula, Mont., 238 miles east of Spokane, as unreasonable and unduly prejudicial, and attacked the all rail and water and rail rates on canned goods from San Francisco and local and proportional rates from north coast points to Missoula, Mont. The distance from San Francisco to Missoula is shown as 1,331 miles water and rail and as 1,338 miles all rail. Present rates on sugar over both routes are $1.31, minimum 36,000 pounds and $1.10 minimum 60,000 pounds. these same rates are also in effect from Portland, Seattle and Tacoma to Missoula. HELD, rates on sugar, carloads, from San Francisco and Crockett, Calif., to Missoula, Mont., are unreasonable to extent they exceeded 95c minimum 44,000 pounds via water and rail routes; and $1, minimum 44,000 pounds, via direct all rail lines. HELD, further rates on sugar, carloads, from Portland, Tacoma and Seattle to Missoula, unreasonable to extent they exceed 75c, minimum 44,000 pounds. HELD, further rates from points above mentioned to Missoula unduly prejudicial to extent they exceed the rates from the same points to Spokane by more than 20c. CANNED GOODS. Rate on condensed milk is 62.5c, minimum 60,000 pounds. There is no sufficient reason why the rates on canned goods should be lower than the rates on sugar. HELD, rates on canned goods from San Francisco and points taking same rates to Missoula over water and rail and all rail rates and from north coast ports to Missoula are not unreasonable but unduly prejudicial to extent the rates to Missoula exceed the rates to Spokane by more than 20c per 100 pounds, reparation awarded. McClintock Trunkey Co. v. McCormick Steamship Co., 129 I. C. C. 591.

V. EVIDENCE.

See Evidence.

§7. In General.

(a) Cost of transportation per mile by water is comparatively high for short distances and very small for long distances. See 24 I. C. C. 570. Wool Rates Investigation, 1923, 120 I. C. C. 493, 503.

VI. REASONABLENESS OF RATES.

See Supra II; Loss and Damage; Reasonableness of Rates.

§8. In General.

(a) Piling is unsatisfactory traffic from the point of view of the steamship operator. It is difficult to stow properly and as a deck load it is not even as suitable as lumber. In the event that piling is loosed from its lashings during rough weather it becomes a source of serious damage and danger. Dutton Lbr. Corp. v. Director General, 112 I. C. C. 661, 674.

WATER COMPETITION

II. METHODS OF COMPUTING CHARGES.

§2½. In General.

(a) Shipper sought a change in method of stating rates on fresh and green vegetables from a basis per package, generally used from all vegetable-producing areas, to a weight basis. HELD: No general demand for such a change having been brought to commission's attention, the burden is upon shipper to show unlawfulness of present method of stating rates. South Carolina Produce Asso. v. A. & R., 107 I. C. C. 613, 614.

(b) Upon complaint seeking a change in method of stating rates on fresh and green vegetables from a basis per package, generally used from all vegetable-producing areas, to a weight basis, FOUND: Basis proposed would necessitate use of minimum weights on some of these commodities which can not be loaded, a practice which commission has universally condemned. Moreover if rates on these commodities were published on a weight basis it would be a practical necessity, in interest of economical and expeditious handling, that estimated rather than actual weights be used and record fails to contain a sufficient showing upon which to base a schedule of estimated weights. South Carolina Produce Asso. v. A. & R., 107 I. C. C. 613, 614.

(c) Complainant attacked charges on one car of cottonseed cake shipped October 24, 1923, from Itasca, Tex., to them at Memphis, as illegal, unreasonable, unjustly discriminatory and unduly prejudicial. The complaint is against the overloading under authority of item 155 D Supt. 14 St. L. S. W. tariff I. C. C. 3374. Shipment was loaded by consignor and moved M. K. T. to Fort Worth, St. L. S. W. beyond. While enroute the car was set out bad ordered at Texarkana and Wabbaseka, Ark. Its capacity is shown as 60,000 pounds and under the tariff the maximum weight which should have been loaded therein was 10% greater than marked capacity or 66,000 pounds. Charged 38.5c on that weight and at 77c on balance of shipment. The weight of the shipment was inserted on the bill of lading executed by the consignor. The way bill also shows this weight, bears the notations "B-L weight," and "HOT BOX," and the number of the weight agreement which indicated the manner in which the weight was ascertained as required by the tariffs. The consignor has operated under a weight agreement for 18 years. When shipper's weights are accepted under such an agreement the applicable tariffs do not require that shipments should be weighed. The tariff of the originating line provides that they should not be reweighed. The tariffs imposed no duty on defendants to weigh this shipment enroute. The carrier is obligated to furnish proper equipment for the safe transportation of goods which it holds itself out to carry. It is the corresponding duty of the shipper to load his goods properly for shipment and to observe carriers' rules which have as their object the protection of such equipment. HELD: Charges assessed and rate attacked not unreasonable or otherwise unlawful, complaint dismissed. Memphis Freight Bureau v. St. L. S. W. Ry., 115 I. C. C. 409.

(d) Complainant contended that because of defendant's failure to verify the weight as stated by the consignor on a car of coal shipped February 26, 1923, from Clinton, Ind., to Wabash, Ind., he was overcharged. Shipment moved C. & E. I. to Danville, Ill., and Wabash beyond, rate was applicable of $1.70. The evidence shows that the consignor after loading the car with 4-inch lump coal, weighed it on its mine scales, and from the gross weight of 177,800 pounds deducted the marked tare weight, leaving a net weight of 137,300 pounds. No request for reweighing was made by complainant of the delivering carrier, nor was any complaint made to consignor or to defendants at that time with respect to any error in weight. HELD: Complaint dismissed. Hipskind v. Wabash Ry., 115 I. C. C. 417.

(e) Complainant alleged overcharge on coal, carloads, from Kentucky and West Virginia to Connersville and Greenfield, Ind. Shipment from Plymouth, W. Va., November 23, 1922, to Greenfield. The only fact to be determined is the

weight of the coal shipped. The evidence shows that the loaded car was weighed at Hobson, O., and charged at net weight of 92,500 pounds at rate of $2.52 per ton. Gross weight shown on the freight bill was 123,800 pounds and tare weight 31,300 pounds. D. & H. Ry. advised that the tare weight of this car was 30,800 pounds in December, 1922. A check by the N. Y. C. develops the fact that on the scale records the loaded car is shown to have weighed 103,800 pounds gross and not 123,800 pounds as stated on the freight bill. HELD: Shipment overcharged based on net weight of 73,000 pounds, overcharge to be refunded, complaint dismissed. Van Hart v. C. I. & W. Ry., 115 I. C. C. 741.

(f) Marked tare weight of car was used in computing freight charges on coal. Upon contention that shipment was overcharged because of discrepancies in recorded tare weights of car and carrier's failure to verify weight stated by consignor, HELD: Governing tariff provided that when coal is weighed at mines under an arrangement with initial carrier, the weight thus obtained will govern, and car will not be reweighed at destination unless carrier is requested to do so. No request for reweighing or complaint as to error in weight having been made at time of acceptance of shipment, evidence fails to sustain complainant's allegation of overcharges. Hipskind v. W. Ry., 115 I. C. C. 417.

(g) Complainant alleged that the charges collected on 183 cars of lumber, brick, cement, and gravel between points in Alabama or between Alabama and Georgia from Jan. 1, 1923 to Jan. 9, 1925 were inapplicable. The points of origin and destination are either local to the Chattahoochee Valley, C. V., or the points of origin are located on connecting lines and the destinations are on the C. V. No joint rates are in effect, and the rates assailed are applicable only for the movement over the C. V. The applicable tariff publishes commodity rates on brick and other building materials in terms per car, except as shown. The rate on brick from West Point to Langdale, Ala., a distance of 5 miles, is illustrative. The tariff referred to publishes a rate of 1.550c on common brick, carloads, minimum weight 30,000 pounds. The tariff publishing the assailed rates was canceled effective Jan. 10, 1925 and the subsequent tariff added the words "excess in proportion" immediately after the minimum weight per car. HELD, charges assailed were inapplicable, and the applicable charges were those computed in the published "per car" basis without any charge for the additional weights loaded in excess of the published minima. Overcharges to be refunded, complaint dismissed. Batson Cook Co. v. C. V. Ry., 132 I. C. C. 703.

§3. Actual Weight.

(a) The question of the weight of shipments is one of fact, and actual weight constitutes true basis upon which assessment of freight charges should be made. Curtis v. Director General, 109 I. C. C. 378, 379.

(b) Shipment of coal found overcharged, due to deduction by carrier of 41,000 pounds to cover weight of car, whereas actual weight as shown by carrier's records was 45,000 pounds. Reparation awarded. Monon Lbr. Co. v. Director General, 109 I. C. C. 429.

(c) Complainant alleged that charges on numerous carloads of coal shipped interstate between Jan. 10, 1920 and Feb. 20, 1924 from West Virginia, Pennsylvania, Ohio, Indiana, Illinois, and Kentucky and reweighed at destinations in Indiana, were inapplicable. No. 17386. From Rawl, W. Va., a carload of bituminous coal to Tipton, billed gross, 123,700 pounds, tare 39,500 pounds, net 84,200 pounds. Upon request of complainant shipment was reweighed at Tipton with result, gross 122,600 pounds, tare 39,500, net 83,100 pounds difference in weight of 1,100 pounds. The tariff does not provide that destination weight shall govern, but that in determining the correct weight of the car all of the conditions which obtained when the car was severally weight would be taken into consideration. The shipment was subject to a tolerance of 1,263 pounds which exceeded the difference in the scale weights. The charges were properly assessed. Sub. No. 1. Car of coal from Kennerly No. 1, Pa., to Indianapolis, original billed weights gross 142,000, tare 39,900 pounds, net 102,100, and those on reweighing, gross, 140,800 tare 39,900, net 100,900, difference 1,200 pounds. The difference in weight is less than the tolerance plus the allowance for evaporation. Charges assessed applicable. Sub. 2. Coal from Clinton, Ind., to Muncie, Ind., billed weights gross 147,100, tare 39,200, net 107,900 pounds. Reweighing gross 146.000, tare 38,300, net 107,700 pounds. HELD, charges as-

sessed applicable. Sub. 3. Coal from Springfield, Ill., delivered at Indianapolis, Ind. There was no charge made for reweighing and the only claim in this case is for excessive freight charges collected. HELD, record not sufficiently definite to warrant a finding in complainants favor. sub. 4, 6, and 8, Complaints are barred by the statute of limitations. Complaint dismissed. Sub. 5. Coal from Lost Run, O., to Nappane, Ind. Weighed gross 160,500, tare 38,000, net 122,500 pounds. HELD, charges assessed applicable. Sub. 7. Coal from Lackeyville, Ky., to Muncie, Ind., billed gross 130,600, tare 37,800, net 92,800 pounds. Reweighed at Muncie, gross 135,700, tare 37,800, net 97,900, difference 5,100 pounds. Tariff check shows that the charge of $2.70 was correctly assessed. Sub. 9. Two cars of coal, one from Thacker, . Va., to Indianapolis, billed gross 131,100, tare 42,200, net 88,900, reweighed at Indianapolis, gross 128,000, tare 42,200, net 85,800, difference 3,100 pounds. No evidence was introduced tending to show that the weighing at destination was more reliable than the original weighing. HELD, charges correctly assessed. Other car was barred by statute of limitations. Downing & Son v. Director General, 132 I. C. C. 19.

§5. Estimated Weight.

See Estimated Weights; Express Companies §37½ (a).

(a) Estimated billing weights used in assessing charges on shipments of ice cream by express, and rates and charges resulting therefrom, found not unreasonable or unjustly discriminatory. Upon contention that a new-style tub adopted by ice cream shippers is of less cubic capacity and of less weight when packed for shipment than old-style tub upon which present estimated billing weight was established, it was agreed by parties that a joint weighing test be made. Certificate reports thereof show that average gross weight of shipments in new-style 5-gallon tubs exceeds that of old-style and that actual average gross weight of all shipments in 5-gallon tubs is greater than that upon which present estimated billing weight is based. Nat'l Asso. Ice Cream Mfrs. v. Amer. Ry. Exp. Co., 107 I. C. C. 267.

(b) Based upon weight tests conducted by carriers in various sections of the country, proposed increased estimated weight on lettuce, in crates of specified dimensions, moving transcontinentally eastbound from points west of Albuquerque, Belen, and Deming, N. Mex., El Paso, Tex., Salt Lake City, Utah, and certain points in northern California, found justified. Lettuce from Pacific Coast Territory, 107 I. C. C. 559.

(c) Vegetables: Upon complaint seeking a change in method of stating rates on fresh and green vegetables from a basis per package, generally used from all vegetable-producing areas, to a weight basis, FOUND: Basis proposed would necessitate use of minimum weights on some of these commodities which can not be loaded, a practice which commission has universally condemned. Moreover, if rates on these commodities were published on a weight basis, it would be a practical necessity, in interest of economical and expeditious handling, that estimated rather than actual weights be used and record fails to contain a sufficient showing upon which to base a schedule of estimated weights. South Carolina Produce Asso. v. A. & R., 107 I. C. C. 613, 614.

(d) Complainant attacked commodity rates on grape fruit, carloads, from Florida to Salt Lake City, Ogden, Pocatello and Butte between April, 1918 and May 3, 1924 as unreasonable, unjustly discriminatory and unduly prejudicial, and in violation of section 4. Charged to Salt Lake City and Ogden at applicable joint commodity rates named in amounts per standard box or crate, minimum 300 boxes or crates, prior to Dec. 20, 1921 and at combinations of proportional commodity rates to and from Jacksonville, Fla., on and after that date, with the exception of four shipments from points on the A. C. L., three of which moved to Ogden in Jan., Feb. and March, 1922 and one to Salt Lake City in Jan., 1922 on which joint commodity rates were collected. Charges to Pocatello were collected at the applicable combination of proportional commodity rates based on Jacksonville. Charged at 80 pounds per box or crate. Although the tariff rule is illogical, in that while it purports to provide an estimated weight for standard boxes or crates, such weight is subject to change when it is less than the actual weight of the box or crate, and unfair, in that no compensatory provision is made for pro rata decrease in rates for boxes weighing less than 80 pounds, nevertheless the joint rates were subject under that rule to pro rata increase for standard boxes

weighing in excess of 80 pounds. HELD, joint rates in effect from April 4, 1918 to April 4, 1923 unreasonable to extent they exceeded the aggregate of intermediates; undercharges should be waived. Reparation awarded. Rates to Pocatello not unreasonable. Ryan Fruit Co. v. Director General, 120 I. C. C. 206.

(e) Respondents proposed to increase the estimated weights on carrots from all points in the Mississippi valley, except New Orleans, La., on the I. C. and Y. & M. V., respondents, to numerous destinations in official classification territory, certain of the middle western states and Carolina territory. Large majority of the points of origin are in Mississippi and a smaller number in Louisiana. Except to the destinations considered herein, estimated weights on the same basis as those proposed are effective from these points of origin to practically all destinations, including Chicago, Ill., and the proposed estimated weights are in effect from New Orleans to all destinations. Rates on carrots are made with respect to, and are the same as, rates on beets, and the proposed weights are the same as those now applicable on beets. It is almost self evident that if an estimated weight is less than the actual weight, the shipper obtains free transportation of so much of his shipment as is in excess of the estimated weight, and that if the estimated weight is greater than the actual weight, the carrier obtains a revenue upon the excess not hauled. It is obvious, therefore, that the estimated weights should correspond as closely as practicable to the carrying capacity of the container, when properly packed, plus the weight of the container. Estimated weights of different sized containers should be properly related and the estimated weights applicable from different points of origin in this territory should be uniform. HELD, suspended schedules justified. Estimated weights on carrots, 120 I. C. C. 733.

(f) Tariff provided for assessing of charges for transferring fuel oil from standard to narrow-gauge cars at Palisade, Nev., for transportation over the narrow-gauge line of the Eureka Nevada Ry. Co., based upon an estimated weight of 7.4 pounds per gallon at full shell gallonage capacity of the car. Upon contention of shipper that transfer charges should have been based on weight per gallon of oil transported which aggregated less than weight based on full shell gallonage capacity of cars, HELD: transfer charges being restricted in tariff to apply per carload, the contention is without merit. Mackintosh Mines Co. v. E. N. Ry., 120 I. C. C. 121.

(g) Upon complaint seeking establishment of an estimated weight of 80 pounds per standard box or crate on grapefruit from points in Florida to Salt Lake City and Ogden, Utah, HELD: to grant relief sought would be inconsistent with commission's findings in 95 I. C. C. 532, wherein it was proved that an average estimated weight of 85 pounds per box of this commodity is not excessive. Ryan Fruit Co. v. Director General, 120 I. C. C. 206.

(h) Proposed increased estimated weights on carrots from points on Illinois Central and on Yazoo & Mississippi Valley railroads, to northern, eastern, and western points, found justified. Based upon the evidence of record and tests conducted by carriers, the 1-bushel containers are capable of holding enough carrots to bring the aggregate up to the estimated weight here proposed. Although the average test-weight of ⅞-bushel hampers was less than the estimated weight, instances in which these hampers reached the proposed weight are sufficient in number to make it reasonably certain that when properly packed they can attain that weight. However, estimated weights of different-sized containers should be properly related and established weights applicable from different points of origin in this territory should be uniform. Estimated Weights on Carrots, 120 I. C. C. 733.

(i) If an estimated weight is less than actual weight, the shipper obtains free transportation of so much of his shipment as is in excess of estimated weight, and if estimated weight is greater than actual weight, the carrier obtains a revenue upon the excess not hauled. It is obvious, therefore, that estimated weights should correspond as closely as practicable to the carrying capacity of containers, when properly placed, plus the weight of the container. Estimated Weights on Carrots, 120 I. C. C. 733, 734.

§6. **Reweighing.**

(a) Complainant alleged overcharge in sum of $16.20 for reweighing at destination six cars of anthracite coal shipped from Pennsylvania points to Kokomo, Ind., during the period March 8

to October 27, 1923. They were first weighed at points on the lines of the originating carriers. At complainant's request they were reweighed at destination by the N. Y. C. & St. L., and weighmaster's certificate which showed the gross, tare, and net weights obtained by reweighing were furnished to complainant with the bills for reweighing and the freight bills. The gist of the complaint is that defendant failed to comply with the provisions of its tariff governing the weighing and reweighing of coal, in that the gross, tare, and net weights obtained by reweighing were not shown on the freight bills, and that because of such failure the weighing charges were illegally assessed and should be refunded. The difference between the original net weights and the weights obtained by reweighing at destination did not exceed the tolerance allowance. All of the data pertinent to the reweighing was contained on the weighmaster's certificate which accompanied each freight bill. Failure of complete literal compliance with the rule does not affect the applicable charges to the shipper. For a long period complainant accepted without objection weighmaster's weigh certificates in lieu of such information on the freight bills, which latter frequently did not afford sufficient space for this information. HELD: Charges for reweighing applicable, complaint dismissed. Consolidated Coal & Supply Co. v. N. Y. C. & St. L. R. R., 115 I. C. C. 209.

(b) Reweighing charges on coal at Kokomo, Ind., found to have been legally collected. Complainant contended that inasmuch as gross, tare, and net weights were not shown on freight bills as provided by tariff, charges were illegally assessed. However, as all data pertinent to reweighing was contained on weighmaster's certificate accompanying each freight bill, for all practical purposes this was equivalent to entry on the bill itself, the latter frequently not affording sufficient space for this information. Moreover, failure of complete literal compliance with rule did not affect applicable charges to shipper. Consolidated Coal & Supply Co. v. N. Y., C. & St. L., 115 I. C. C. 209.

(c) Marked tare weight of car was used in computing freight charges on coal. Upon contention that shipment was overcharged because of discrepancies in recorded tare weights of car and carrier's failure to verify weight stated by consignor. HELD, governing tariff provided that when coal is weighed at mines under an arrangement with initial carrier, the weight thus obtained will govern, and car will not be reweighed at destination unless carrier is requested to do so. No request for reweighing or complaint as to error in weight having been made at time of acceptance of shipment, evidence fails to sustain complainant's allegation of overcharges. Hipskind v. W. Ry., 115 I. C. C. 417.

§7½. **Track Scales.**

(a) Shipment of piles moving in two cars from Hadley, Ala., to West Brighton, N. Y., found overcharged. Charges were assessed on basis of an erroneous rate and billed weight, whereas they should have been assessed on basis of applicable rate and actual weight as determined by track scale, the shipment having been weighed on such scale en route. Reparation awarded. Bowers & Co. v. Director General, 107 I. C. C. 305.

(b) Carriers maintained no track scales at origin points. Freight charges were assessed on basis of weights obtained on scales operated by mining companies at such points. These weights were also used for invoice purposes, and complainants paid for coal on basis of such weights. They were also checked for purpose of making up pay rolls. Complainants made no request to have shipments reweighed, as they were entitled to do, nor did they weigh them upon arrival at destination. Upon complaint alleging that weights were not ascertained in conformity with tariff rules and regulations and that freight charges, should have been based upon applicable rate and minimum weight, HELD: Weight question of shipments is one of fact, and actual weight constitutes true basis upon which freight charges should be assessed. While carrier's failure to comply with certain tariff rules may make it liable to penalty provisions of the act, such failure is not a sufficient basis for a reparation award where evidence, as here, does not show that shipper was damaged thereby. Curtis v. Director General, 109 I. C. C. 378.

(c) Charges assessed on a shipment of coal were based upon weight obtained on carrier's track scales at point of origin. Shipper's invoice, upon which basis it made settlement for the coal, showed a less weight. Upon complaint alleging that charges of carrier were

upon an erroneous basis, HELD: The scale weight must govern in the absence of convincing proof of error. See 20 I. C. C. 60 and other cited cases. Were the commission to base its opinion in cases of this character upon invoice weight, the door would be left open to collusion and fraud, making rebating an easy matter. Here the invoice weight, obtained from some unknown agent of carrier, can not be considered proof that the scale weight was incorrect, nor is this shown from fact that market tare weight of car was somewhat less than the actual weight. Monon Lbr. Co. v. Director General, 109 I. C. C. 429.

(d) In cases involving claims for refunds of charges based upon alleged improper weights, the scale weight must govern in absence of convincing proof of error. See 20 I. C. C. 60 and other cited cases. Were commission to base its opinion in cases of this character upon invoice weights of shipments the door would be open to collusion and fraud, making rebating an easy matter. Monon Lbr. Co. v. Director General, 109 I. C. C. 429, 430.

(e) Complainant attacked track scale weighing charge of $2.70 assessed at Allegheny, Pa., on inbound shipments of scrap iron, carloads, and a like charge on empty cars after unloading, between November 9, 1922, and December 22, 1923, as unreasonable and unduly prejudicial. Complainant's plant is south of and parallel with defendant's Smoky Island break up yard. The track scale at which the weighing was performed is about 858 feet east of complainant's yard. Under written instructions all carload shipments of scrap iron for complainant were weighed prior to placement and the empty cars were weighed after unloading, for which the total charge was $5.40. HELD: Charge attacked not unreasonable or unduly prejudicial, complaint dismissed. Luria Bros. Co. v. B. & O. R. R., 115 I. C. C. 193.

(f) The presumption of accuracy which attaches to weights obtained over scales maintained by carriers must be clearly rebutted to be overthrown. Dallas Transfer Co. v. S. P., 115 I. C. C. 658, 659.

VI. TARIFFS AND CONSTRUCTION.

§12. Inspection Bureaus.

See Inspection.

(a) Circulars published by the Weighing and Inspection Bureau not published as tariffs by carriers or filed with commission are not controlling as are tariffs or other publications filed in accordance with section 6 of the act. Glarner & Co. v. S. Ry., 129 I. C. C. 75, 77.

VII. REASONABLENESS OF CHARGES.

§13. In General.

See Reasonableness of Rates.

(a) Complainant contended that weighing charge of B. & O. at Allegheny, Pa., on inbound shipments of scrap iron, and on empty cars after unloading, was unreasonable and unduly prejudicial in that it exceeded rate charged competitors for similar service by the Pennsylvania R. R. in Pittsburgh district as well as by other carriers in trunk-line territory generally. However, upon showing that charges assailed were same as those charged all shippers in Pittsburgh and at other stations on B. & O's lines, and that all carriers in c. f. a. territory make same charge for similar service. HELD, charge assailed was not unreasonable or otherwise unlawful. Luria Bros. & Co. v. B. & O., 115 I. C. C. 193.

(b) Applicable charges and tariff rule which provided for assessing of double the c. l. rate on excess weight of overloaded cars when moved through to destination, or for levying a charge for reloading into suitable equipment where such shipments are discovered en route, found not unreasonable or otherwise unlawful. Complainant here operated under a weight agreement whereby his weights were accepted by carriers, tariffs providing that such shipments need not be reweighed either at point of origin or en route. Moreover, while a carrier is obligated to furnish proper equipment for safe transportation of goods, shipper's duty is to load properly and to observe tariff rules, noncompliance with which affords no basis for finding legally applicable charges unreasonable or otherwise unlawful. See also 95 I. C. C. 525; 51 I. C. C. 99. Memphis Frt. Bureau v. St. L. S. W., 115 I. C. C. 409.

WHARFAGE

See Allowances §8 (8); Dockage; Facilities and Privileges §16; Water Carriers §6¾.

(a) Proposal of the Hawaii Consolid-

ated Ry., Ltd., on the island of Hawaii, to increase loading and unloading charges on sugar, from 35 to 50 cents per net ton when unloaded from cars to warehouse and reloaded from warehouse to lighters, or ship's side at Kuhio wharf, found not justified. Kuhio wharf is a Government-owned structure, portions of which are leased by the carrier. The carrier has no money invested therein but collects from those making use of these facilities amounts sufficient to pay all expenses incident to service performed. However, it is entitled to a fair profit for its services and a study of expenses attached thereto indicates that an increase of 5 cents per net ton is ample for this purpose. Rates on Hawaii Consolidated Ry., 118 I. C. C. 489.

WORDS AND PHRASES

(a) "Billets" and "blooms:" In the manufacture of steel, pig iron, the crudest form in which metallic iron is shipped, is refined by eliminating in part certain undesired metals and metalloids by oxidation. The resulting product, steel, is cast into ingots weighing from two to three tons each. While still hot the ingot is passed through rollers of the blooming mill until reduced to a size about 8 inches square in cross section, when it is known as a bloom. The bloom is then rolled in billet mill until it reaches a size from 4 inches square to 1.5 inches square in cross section, when the steel is usually cut into convenient lengths and allowed to cool, for the first time. These lengths are called billets. Iron and Steel Articles, 104 I. C. C. 616, 617, 618.

(b) "Grain leather:" When leather is split, that which is removed from the flesh side of the hide is known as split leather and that which remains as grain leather. Griess-Pfleger Tanning Co. v. E., J. & E., 104 I. C. C. 464, 465.

(c) "Just and reasonable:" The words as used in Federal control act obviously bear a similar or closely analogous meaning to that attaching to their use in interstate commerce act. See 51 I. C. C. 250, 258. North Packing & Provision Co. v. Director General, 104 I. C. C. 607, 608.

(d) "Plant service:" The holding of cars at a place in a plant where loading is impossible is not spotting cars for loading, but if the plant requires empties to be placed in this manner for its convenience the additional move is a plant service. Divisions Received by B. R. R. & C. Co., 104 I. C. C. 415, 432

(e) "Practice:" Defined as an "often repeated or customary action, usage, custom." York Mfrs. Asso. v. P. R. R., 107 I. C. C. 219, 232.

(f) "Private tracks:" Placement tracks, from standpoint of tariff description, are either public or private; there is no middle ground. A plug track used for inspection of hay and leased to a hay exchange for that purpose could not be described as a public delivery track on which any or all shippers could receive or ship any or all freight. Consequently it falls into the general category of private tracks. Brown & Co. v. E. R. R., 109 I. C. C. 109, 111.

(g) "Shortest workable routes:" Defined. Southern Class Rate Investigation, 109 I. C. C. 300, 312.

(h) "Split leather:" When leather is split, that which is removed from the flesh side of the hide is known as split leather and that which remains as grain leather. Greiss-Pfleger Tanning Co. v. E., J. & E., 104 I. C. C. 464, 465.

(i) "Tank Car:" Proposal to define a "tank car" as a car with permanently attached tank or tanks which can not be detached for filling, emptying, or storage of contents, found not justified. Such definition would result in charges on chlorine and other compressed gases moving in multiple-unit tank cars higher than on shipments moving in single-unit class V cars. The multiple-unit car affords every safeguard for transporting and handling chlorine gas, and it would be impracticable or impossible for some consumers to use that commodity when shipped in single-unit cars. Use of a car, tanks of which may be removed in interest of safety, is necessary for future development of chlorine-gas industry. Moreover, if full complement of tanks which form superstructure of middle-unit car is securely attached to underframe when offered for transportation, or return movement after being unloaded, no good reason appears for applying different rules and charges on the two types of equipment. Definition of Tank Cars, 104 I. C. C. 196.

(j) "Working Capital:" is understood to include, usually, three parts; First, investment in a stock of material and supplies, second, cash necessary to pay operating expenses incurred for com-

mon-carrier service prior to time when revenues from that service are available; and, third, a buffer fund of cash constantly on hand to cover amply recurrent and fluctuating deficiencies in the inflow of revenue applicable to payments falling due. Divisions Received by B. R. R. & C. Co., 104 I. C. C. 415, 426.

(k) "Action": The word "action" as used in section 16 (3) of the act must be interpreted to mean "action at law." Pfister & Vogel Leather Co. v. E. R. R., 112 I. C. C. 659, 660.

(l) "Barrel Shook": A barrel shook is a set of staves, heads, and hoops for a complete barrel, knocked down and packed for shipment. For latter purpose the staves are tied in bundles and the heads and hoops stowed in barrels. Hamilton v. P. R. R., 113 I. C. C. 723.

(m) "Compo-board" is a built-up board consisting of a wood core of thin narrow slats or strips of wood, glued together, and faced on either side with a layer of paper or clapboard, which is glued or cemented to the wooden core. About 70 per cent of the finished article is composed of lumber. The product is used for drawer bottoms, show-case backs and bottoms, shelves, store fixtures, blackboards, bulletin boards, picture packing, etc. Wright Lumber Co. v. A. A., 112 I. C. C. 337.

(n) "Electric Starter": An electric starter is an electric motor. Wagner Electric Corp. v. Director General, 112 I. C. C. 57.

(o) "Engine distillate" is a product intermediate between gasoline and kerosene. It contains some of the low-volatile gasoline fractions which do not meet gasoline specifications, and a large percentage of kerosene. It is a finished product and is used as a fuel for certain types of internal-combustion engines. Commodity Specifications on Petroleum Products, 113 I. C. C. 707, 709.

(p) "Engines": Question as to whether marine engines are comprehended in the term "engines" as used in a tariff item in view of the limiting words in the heading, viz., "Electrical, Iron Working (Power), Mining and Smelting," HELD: In common acceptation the term "engine" does not include motors and generators or dynamos, which the item specifically names. However, it can not be said that engines used for operating iron-working, mining, or smelting machinery are essentially different from other engines used to operate power machinery; in fact, same kind and style of engines as are used for purposes named are put to many other uses, marine-type engines being sometimes used on land for power purposes. The parenthetical expression in the heading, therefore, clearly does not so restrict the term "engines" as to prevent its application to marine engines. See 68 I. C. C. 195, construing the term "turbines" in the same item. Duthie & Co. v. Director General, 113 I. C. C. 255, 257.

(q) "Existing Connections for the Interchange of Carload Traffic": Fact that by means of a switch it is possible to so handle a car at a place not a point of interchange as to reduce distance between points of origin and destination by the fraction of a mile or a few miles does not bring such a place within the meaning of the phrase "existing connections for the interchange of carload traffic" as used in a finding of commission prescribing distance rates and which provided for computation of distance by the use of "the shortest routes via existing connections for the interchange of carload traffic * * *." Cottonseed to Cairo, 112 I. C. C. 709, 711.

(r) "Gas Oil" is generally understood to be a low-grade product containing no gasoline or kerosene. Refinery tops are not considered to be gas oil for transportation purposes. Commodity Specifications on Petroleum Products, 113 I. C. C. 707, 712.

(s) "Gas Oil" as defined by chemists and others connected with the oil industry, is a low-grade petroleum product containing no kerosene or gasoline in quantities commercially recoverable by distillation. It is the product which is distilled from crude petroleum immediately following kerosene, and is used in manufacture of illuminating gas, as a furnace oil, to thin heavy fuel oil, and as charging stock in the production of gasoline by the cracking process. Commodity Specifications on Petroleum Products, 113 I. C. C. 707, 709.

(t) "Lime": It is impracticable to frame definitions of lime in terms under which different grades could be distinguished merely by inspection and which at same time would be free from discrimination. Eastern Lime Mfrs. Traffic Bureau v. A. & B. B., 112 I. C. C. 7, 15.

(u) "Newsprint paper": Upon contention that "printing paper" is a ge-

neric term and therefore should include "newsprint paper," HELD: Terms describe separate and distinct articles, the commission having previously stated in 38 I. C. C. 120, 140, that they are readily distinguishable. Great Northern Paper Co. v. B. & A., 113 I. C. C. 463, 464.

(v) "Products of agriculture": Terms "products of agriculture" and "livestock" construed by the commission to mean such products and animals as are customarily produced for profit by farmers and ranchmen individually or cooperatively. Revenues in Western District, 113 I. C. C. 3, 39.

(w) "Practice": Contention that the word "practice" as used in the act relates only to matters between shippers and carriers and not to questions affecting handling of traffic between carriers, not sustained. The word as used in paragraphs (6) and (11) of section 1 and paragraph (1) of section 15 of the act clearly comprehends within its meaning questions relating to handling of traffic between carriers. C., R. I. & P. v. B. & O., 113 I. C. C. 681, 683.

(x) "Printing paper": Upon contention that "printing paper" is a generic term and therefore should include "newsprint paper," HELD: Terms describe separate and distinct articles, the commission having previously stated in 38 I. C. C. 120, 140, that they are readily distinguishable. Great Northern Paper Co. v. B. & A., 113 I. C. C. 463, 464.

(y) "Red oil" is a reddish-brown liquid derived from splitting the natural oil which has run off animal grease after a process of cooling and pressing. It is also known as oleic acid or olein and is used in the manufacture of soap, oleates, medicine, and polishing compounds, and for scouring and oiling wool. Williams Co. v. C. N. E., 112 I. C. C. 158.

(z) "Refinery Tops" is a loose and indefinite term, being nothing more than a nickname used to designate the "top" of the crude oil produced by the first distillation. Commodity Specifications on Petroleum Products, 113 I. C. C. 707, 714.

(aa) "Refinery tops" are not considered to be gas oil for transportation purposes. Commodity Specifications on Petroleum Products, 113 I. C. C. 707, 712.

(bb) "Refinery tops" are a semi-refined product obtained from crude petroleum by the first distillation. They contain gasoline, engine distillate, kerosene, and a small quantity of gas oil, which are extracted in the order named at refineries. Commodity Specifications on Petroleum Products, 113 I. C. C. 707, 709.

(cc) "Tin plate scrap" consists of clippings from tin plate used by can manufacturers. In the detinning process tin scrap is hydraulically bundled and exposed to chemical action of chlorine gas. Bundles are then washed to remove remnant of chlorine and products are steel scrap and tin. Metal & Thermit Corp. v. C. R. R. Co. of N. J., 112 I. C. C. 523, 524.

(dd) In interpreting meaning of the term "unclaimed" a demand for delivery and a readiness to pay charges are equivalent to claiming a shipment. See 85 I. C. C. 331, 333. Northwestern Fruit Exchange v. E. R. R., 112 I. C. C. 29, 32.

(ee) "Actual-value rates:" Released rates afford shipper a choice of two rates, under the higher of which unlimited carrier's liability attaches and under the lower of which the shipper, in consideration of reduced rate, by fair and reasonable agreement declares or agrees that for purpose of claim in case of loss or damage the value of his shipment is a certain amount, or not in excess of a certain amount. Actual-value rates, on the other hand, are published on commodities upon which ranges in value are so wide that articles covered by different groups of valuations are in fact different commodities. In other words, released rates limit carrier's liability, whereas actual-value rates designates the commodity. Carr v. Director General, 118 I. C. C. 569, 571.

(ff) "Alcohol, denatured and wood:" Denatured alcohol is ethyl alcohol that has been rendered unfit for beverage purposes by addition of foreign substances, while wood alcohol is obtained from distillation of wood and is a poisonous substance. U. S. Industrial Alcohol Co. v. C. & N. W., 118 I. C. C. 674, 675.

(gg) "Base point:" The term "base point" as used in rule 5 (b) of Tariff Circular 18-A was not intended to refer to stations named in tariffs as basing points, or even to well-known basing points, but was used merely to refer to any point upon which rates may base. Birmingham Traffic Bureau v. Director General, 115 I. C. C. 33, 36.

(hh) Depreciation is loss in service value not restored by current maintenance other than extraordinary repairs

and incurred in connection with consumption or prospective retirement of property in course of service from causes against which carrier is not protected by insurance, which are known to be in current operation, and whose effect can be forecast with a reasonable approach to accuracy. Telephone and Railroad Depreciation Charges, 118 I. C. C. 295, 342.

(ii) The function of depreciation is to account currently for consumption or exhaustion of service life of property from causes known to be in operation and effect of which can be forecast with reasonable accuracy. Telephone and Railroad Depreciation Charges, 118 I. C. C. 295, 341.

(jj) "Depreciation reserve" is a record of undoubted fact that service lives of existing depreciable property units have to a certain extent been consumed. Telephone and Railroad Depreciation Charges, 118 I. C. C. 295, 308.

(kk) "Dumping:" The term as understood in sand and gravel trade, consists of shipping one's surplus production to a market, usually without a previous sale, and disposing of same at prices which are considerably below the market and represent only freight charges or little more. Chicago Gravel Co. v. A., T. & S. F., 118 I. C. C. 633, 637.

(ll) "Extraordinary repairs:" Term construed and defined for purpose of depreciation accounting of railroad and telephone companies. Telephone and Railroad Depreciation Charges, 118 I. C. C. 295, 350.

(mm) "Insurance:" The function of insurance is to afford protection against possible contingencies which can not be foreseen and which may or may not ever occur. Telephone and Railroad Depreciation Charges, 118 I. C. C. 295, 341.

(nn) "Lahn" is a form of tinsel and is not wire. Nat'l. Tinsel Mfg. Co. v. C. & N. W., 115 I. C. C. 631, 632.

(oo) "Ledger value:" Method of determining "ledger value" for purpose of depreciation accounting of railroad and telephone properties, outlined and described. Telephone and Railroad Depreciation Charges, 118 I. C. C. 295, 351, 378, 380, 381.

(pp) "Lime, agricultural:" Agricultural lime is limestone kiln-burned, whereas agricultural limestone is ground or powdered limestone. Both are used as fertilizers and are similar from a transportation standpoint. Case & Sons v. P. R. R., 115 I. C. C. 694.

(qq) "Machine:" Upon contention that a self-propelling road roller is not a machine because it is ordinarily referred to as a "steam roller" rather than a machine, HELD: For obvious reasons most machines are referred to by their individual names but that does not make them any the less machines. A self-propelling road roller is a machine in an entirely proper and normal sense of the word. Lawrence Construction Co. v. L. & N., 115 I. C. C. 439.

(rr) "Net salvage value:" Term construed and defined for purpose of depreciation accounting of railroad and telephone companies. Telephone and Railroad Depreciation Charges, 118 I. C. C. 295, 350, 351.

(ss) "On the same line:" Phrase as incorporated in an intermediate clause of tariffs construed to require that intermediate point be on line of same carrier as more distant point to which a rate is published. American Radiator Co. v. D. & T. S. L. R. R., 115 I. C. C. 529, 531.

(tt) "Other malt liquors:" Tariff description "other malt liquors" found sufficiently broad to comprehend "cereal beverages." Latter are made in same manner as beer, but are then subjected to a process for reducing alcoholic content. Bradley & Woertz v. I. C., 118 I. C. C. 233, 236.

(uu) "Released rates:" Released rates afford shipper a choice of two rates, under the higher of which unlimited carrier's liability attaches and under the lower of which the shipper, in consideration of reduced rate, by fair and reasonable agreement declares or agrees that for purpose of claim in case of loss or damage the value of his shipment is a certain amount, or not in excess of a certain amount. Actual-value rates, on the other hand, are published on commodities upon which ranges in values are so wide that articles covered by different groups of valuations are in fact different commodities. In other words, released rates limit carrier's liability whereas actual-value rates designates the commodity. Carr v. Director General, 118 I. C. C. 569, 571.

(vv) "Scraps or pieces of iron suitable for remelting purposes only:" To come within tariff description articles must not be shipped in their original

form but must be so reduced to fragments, scraps, or pieces as to be useless for any purpose other than remelting. Richmond Radiator Co. v. C. & N. W., 115 I. C. C. 743, 744.

(ww) "Service life:" Term construed and defined for purpose of depreciation accounting of railroad and telephone companies. Telephone and Railroad Depreciation Charges, 118 I. C. C. 295, 350.

(xx) "Service value:" Term construed and defined for purpose of depreciation accounting of railroad and telephone companies. Telephone and Railroad Depreciation Charges, 118 I. C. C. 295, 351.

(yy) "Servidors" are patented doors designed with double panels enclosing a narrow compartment to permit delivery or removal of clothes and other articles from hotel rooms without an employee having to enter a room. By means of a locking device only one panel can be opened at a time, so that there is always a complete barrier or door between the room and the corridor. Servidor Co. v. C., M. & St. P., 118 I. C. C. 49.

(zz) "Sinking fund method of depreciation:" Described. Telephone and Railroad Depreciation Charges, 118 I. C. C. 295, 309.

(3a) "South and west of Jacksonville:" Tariff carried notation "applicable only via Seaboard Air Line as initial carrier and only on traffic originating at points south and west of Jacksonville." Upon contention that notation included points on all lines in Florida south and west of Jacksonville or on traffic turned over to the S. A. L. at that point, HELD: Given a reasonable construction such notation restricted lower rate to traffic originating only on Seaboard Air Line south and west of Jacksonville. Wauchula Development Co. v. A. C. L., 115 I. C. C. 207.

(3b) "Transportation charges:" Question as to whether or not demurrage charges are included in the term, discussed. Manassa Timber Co. v. L. & N. R. R., 115 I. C. C. 421, 424, 425.

(3c) "Under substantially similar circumstances and conditions:" The phrase as found in section 2 of the act, refers to matter of carriage and does not include competition. See 44 I. C. C. 455 and cases there cited. Winding Gulf Colliery Co. v. C. & O., 115 I. C. C. 113, 119.

(3d) "And intermediate points." Tariff item publishing Rates from Carthage and Phoenix, Mo., to various Illinois and Missouri destinations listed rates to "Chicago, Ill., Milwaukee, Wis., and intermediate points." Upon contention that phrase "and intermediate points" included all points between Carthage and Phenix as origins, and Chicago and Milwaukee as destinations, via all routes, and that rates named thereunder applied on sawed stone and marble moving from Carthage and Phenix, to Indianapolis, Brightwood, and St. Mary of the Woods, Ind., HELD: by a fair and reasonable construction of tariff as a whole, the phrase "and intermediate points" refers only to points between Chicago and Milwaukee. To sustain complainant's contention would necessitate a strained and unnatural construction of tariff and result in various conflicts. Gates Marble & Tile Co. v. C., P. & St. L., 120 I. C. C. 275, 277, 278.

(3e) "Billets": A billett is a short piece of wood, split or sawed to convenient size for turning purposes. See 62 I. C. C. 701. Cronk & Carrier Mfg. Co. v. G., M. & N., 120 I. C. C. 663, 664.

(3f) "Intermediate Carrier:" Fact that a carrier hauls cars with its own engines over tracks of an intermediate line does not constitute the latter line an intermediate carrier. Kansas City, K. V. & W. Ry. v. A., T. & S. F., 120 I. C. C. 258, 261.

(3g) "Street car": Upon contention that phrase in tariff "Cars and Car Bodies, Street, with or without motor attachments," must be construed as applying only to passenger street cars or street-car bodies on theory that term "street car" as ordinarily used means a passenger street car, not sustained. Dictionaries define a street car as "A car, usually a passenger car, running through the public streets, usually on rails," and "A passenger car on rails laid on the surface of streets; a car on a street railway." Both phrases incorporated in the tariff or above definitions are sufficiently broad to include cars used on street railways for construction and repair work, in addition to passenger cars. Market Street Ry. Co. v. S. P., 120 I. C. C. 654, 655.

(3h) "At-and-east rates": The at-and-east rates are proportional rates from the lake ports and apply on grain which is moved to lake ports by water. They include a charge of one cent a bushel for elevation and transfer of lading to cars.

Birkett Mills v. D., L. & W., 123 I. C. C. 63, 64.

(3i) "Cottonseed-hull fiber or shavings and cotton linters": Shipments billed as "cottonseed-hull fiber or shavings" were upon inspection found to consist of "cotton linters," and charges on later commodity were collected. Neither published tariffs nor classification defined "hull fiber or shavings" or "linters." Upon complainant's contention that shipments consisted of hull fiber or shavings, HELD: Where tariffs merely provide rates on linters and hull fiber or shavings without defining either, determination of applicable rate is a question of fact. See 77 I. C. C. 727. Here, samples of commodity shipped were entirely free from particles of the hull, which is one of the chief characteristics of cotton-seed hull fiber or shavings, and were somewhat lighter in color, whereas hull fiber or shavings are usually dark. Therefore shipments consisted of linters and applicable rates were assessed. Fraser v. A. C. L., 122 I. C. C. 520.

(3j) "F. o. b. rates": The f. o. b. rates are local rates applying on both grain and products from the lake ports and do not include elevation or other services incident to transfer of lading from lake vessels to cars. Birkett Mills v. D., L. & W., 123 I. C. C. 63, 64.

(3k) "Locomotive" and "Motor car" defined. Rules for testing other than Steam Power Locomotives, 122 I. C. C. 414, 419.

(3l) "Merchandising cotton": Includes grading and arranging in lots of even-running grade and staple, sampling and resampling, tagging, marking, patching, reconditioning, rebaling, and assembling in shipment lots. Rates on Cotton to Gulf Ports, 123 I. C. C. 685, 697.

(3m) "Prior to September 1, 1920": Phrase as used in section 208 (a) of the transportation act, 1920, is not to be construed as prescribing a time limitation within which commission was authorized to act, but as fixing the period as to which its approval was necessary to a reduction in rates whether made during the guaranty period by naming lower rates for future, or accomplished after expiration of the period by way of reparation on shipments which moved during that period. Reparation on Intrastate Traffic, 122 I. C. C. 443, 448.

(3n) "Railroad premises": Storage assessed charges on private cars of gasoline under storage rule providing for assessment of charges on dangerous articles requiring "inflammable" placards, held on railroad premises in excess of free time, found inapplicable. Under the rule the term "Railroad premises" included private tracks constructed, maintained or operated under written agreement, located inside carrier's right-of-way, yard, and terminals, reserving to carrier right of use. Here, tracks were constructed under contract, but were used exclusively as plant facilities, and could be used by carrier only when such use did not interfere with complainant's business. Moreover, in 65 I. C. C. 58, interpretation of term "railroad premises" made the written agreement the controlling factor rather that right of use. Complainant's tracks therefore could not under any circumstances be considered as railroad premises. Refund of charges directed. Kelly Oil Co. v. M.-K.-T., 123 I. C. C. 517.

(3o) "Scarfed material": Used in making basket tops consists of that portion of the wood remaining in the slab after the log has been squared. Liberty Cooperage & Lbr. Co. v. S. Ry., 122 I. C. C. 297, 298.

(3p) "Separately operated": Winston-Salem Southbound Ry., found not to be a separately operated railroad within meaning of commission's order entered in 56 I. C. C. 1. In defining the term "separately operated" the commission did not limit it to physical operation but it was given a broader meaning to include administration of the affairs of the carrier as well. The Winston-Salem has not a separate administrative organization and hence does not come within the classification of roads for which higher rates of mail pay were established. Railway-Mail Pay, 123 I. C. C. 33.

(3q) Direction "Best Route for B. & O. Del." required shipments to be sent over the cheapest route that would permit of B. & O. delivery, either by line haul or in switching service. See 42 I. C. C. 719. Norcross Marble Co. v. B. & O., 126 I. C. C. 741, 742.

(3r) Direction to send shipments over the "Best Route" to be given the same effect as if the shipments were not routed by shipper at all, and imposes upon carrier the duty to send them over the cheapest reasonable route to which shipper would be entitled on shipments tendered unrouted. Norcross Marble Co., v. B. & O., 126 I. C. C. 741, 742.

(3s) "Consignee" is one to whom goods are consigned, shipped, or other-

wise transmitted. Case v. Union Pac. R. Co., (Kan., 1925) 241 Pac. 693.

(3t) "Fleshings" consists of refuse of tanneries in the form of pieces of flesh and waste scraped from hides. It is a low-grade commodity used in making glue, being preserved for shipment by a milk-of-lime treatment and, as shipped, consists of approximately 80 per cent water and 20 per cent solid matter. It is not easily damaged and may be transported in either box cars or open-top equipment. Keystone Glue Co. v. S. Ry. Co., 126 I. C. C. 507, 508.

(3u) "Product of Agriculture:" Respondents' contention that milk and cream are not products of agriculture and that provisions of Hoch-Smith resolution do not apply in determining whether proposed increases in rates thereon may be established, not sustained. Milk and cream are agricultural products and come within class of products with which the resolution specifically deals, and in adjusting freight rates in accordance with its provisions "the conditions which at any given time prevail in the several industries to the end that commodities may freely move, and especially the effect upon agricultural products," must be considered and rates for movement of such commodities reduced to lowest lawful level consistent with maintenance of adequate service. Milk and Cream Between New England Points, 126 I. C. C. 38, 68, 69.

(3v) "Rods:" It is immaterial whether a steel rod be circular, rectangular, or hexagonal in cross-section to come within the description of a rod. See 93 I. C. 171 and other cited cases. Standard Nut & Bolt Co. v. N. Y., N. H. & H. 126 I. C. C. 731, 732.

(3w) "Tin Oxide:" is pig tin reduced to a pulverized form and mixed with oxygen. It is shipped in this pulverized form, in barrels, in box cars, and is not inflammable or subject to loss and damage. Federated Metals Corp. v. P. R. R. Co., 126 I. C. C. 144.

(3x) "To extent that it exceeded, etc.:" Words in finding of commission "to the extent that it exceeded the aggregate of intermediate rates" indicate measure of unreasonableness under section 1 and do not denote a finding under section 4 of the act, this manner of stating measure of unreasonableness having been followed in numerous decisions. Burns & Knapp v. B. S. & K. R. 126 I. C. C. 410, 413.

(3y) "When from beyond:" Tariff published two sets of rates from Peoria, one without restriction, and the other a lower rate applicable on traffic "when from beyond." Upon contention that lower rates are not proportional rates because when added to rates inbound to Peoria from shipping points generally "through rates" are not thereby secured inasmuch as joint rates on lower basis are maintained from such points through Peoria, HELD: Contention is without merit. The "when from beyond" rates could be used in constructing combination rates from points from which no through rates were published. Moreover, in 81 I. C. C. 688, the commission HELD that the word "beyond" implies a line-haul movement "beyond" the rate-breaking point. Armour & Co. v. Director General, 126 I. C. C. 539, 540, 541.

(3z) Under Interstate Commerce Act (U. S. Comp. St. § 8563 et seq.), term "transportation" includes storage charges. Erie R. Co., v. F. Kieser & Son Co., 215 N. Y. S. 576.

(4a) "China clay" is an imported, low-grade commodity and is used as a filler in the manufacture of paper. Newton Falls Paper Co. v. R. Co., 128 I. C. C. 563, 564.

(4b) "Cold-pack fruit" is fresh fruit, the deterioration of which has been arrested by freezing and refrigeration. American Preserve Co. v. Reading Co., 128 I. C. C. 146, 147.

(4c) "Competitive Traffic:" Tariff provided for absorption of switching charges on lumber when shipments originated at competitive points but not when it originated at noncompetitive points. Upon contention that term "competitive traffic" as used in tariffs should include all shipments of lumber on ground that more or less competition is always present in purchase of that commodity, FOUND, that is not the meaning of this term as used in connection with absorption or nonabsorption of switching charges, competition as there used relating only to competition between carriers for the traffic. Federal Match Corp. v. G. N. 128 I. C. C. 415, 417.

(4d) "Dolomite:" Dolomite is crushed limestone and falls within the general commodity description "agricultural limestone." The dolomite used by the glass industry is the residue after two crushings and screenings of the limestone have removed, first, the stone of a size suitable

for the manufacture of burnt lime, and, second, the size suitable for furnaces in the steel industry. This residue is then dried and further screened. The third screening retains particles one-fourth inch and less in size, is used as a flux in the manufacture of glass and is known as raw dolomite stone. Dolomite and Fluxing Stone, 128 I. C. C. 23, 24.

(4e) "Mah-jongg" is a Chinese game, played with tiles and requiring a certain amount of skill. While to some extent it is played by children, it can not be dominated a toy. Paraffine Companies v. S. P., 128 I. C. C. 421, 423.

(4f) "Out of Route:" There is an obvious distinction between cases in which it has been found that shipments moving by other than the short route were not forwarded "out-of-route" in the absence of a definition of the term and the present case where "out-of-route" is described in the tariff as a movement not on direct route between origin and destination. Michigan Bean Co. v. D., G. H. & M., 128 I. C. C. 207, 209.

(4g) "Paper, wrapping, vegetable-parchment:" Vegetable-parchment wrapping paper, so called because it has some superficial resemblance to true parchment, is made of a mixture of rag pulp sulphite pulp, the rag-pulp content averaging about 35 per cent. It is treated with sulphuric acid, which removes the animal and mineral matter and leaves only the vegetable base. Because of its grease and water resisting properties it is used to wrap food products such as butter, meat, and certain vegetables which give off moisture or grease, or both. Kalamazoo Vegetable Parchment Co. v. C., K. & S., 128 I. C. C. 675, 677.

(4h) "Picher District:" The Picher district in northwestern Oklahoma and southeastern Kansas, is the largest zinc-ore producing district in the world, producing approximately one-third of the world's supply of that commodity. Probable productive life of the mines is said to be from five to seven years. Absorption of Drayage Charges, 128 I. C. C. 405.

(4i) "Port:" A port is neither the destination nor the origin of traffic passing through it. It levies toll on the traffic in substantially same manner as do common carriers in its charges for use of its facilities in transfer of traffic between rail and water carriers. Galveston Commercial Asso. v. G. H. & S. A., 128 I. C. C. 349, 369.

(4j) "Preserved:" Term "preserved" as applied to fruit contemplates only fruit that has been treated in such a manner that it will keep for an indefinite but substantial length of time at ordinary temperatures, and does not embrace cold-pack fruit which is fresh fruit, the deterioration of which has been arrested by freezing and refrigeration. American Preserve Co. v. Reading Co., 128 I. C. C. 146, 147.

(4k) "Viz" is generally read "namely" or "to wit," and is commonly employed to make specific that which has theretofore been stated in general terms. Paraffine Companies v. S. P., 128 I. C. C. 421, 423.

(41) "Asphalt, liquid": Liquid asphalt is a residual oil obtained from crude petroleum after the more valuable properties, such as gasoline, kerosene, naptha, and lubricating oils, have been removed. It is used in the manufacture of roofing material and for other purposes. Continental Roofing Mfg. Co. v. G. & S. I., 129 I. C. C. 313, 14.

(4m) Coal mining is not "commerce." Berwind-White Coal-Mining Co. v. United States, (Pa., 1925) 9 Fed. (2d.) 429, 430.

(4n) "Fiber or shavings, cottonseed-hull": Cotton linters are used for spinning purposes, as absorbents, and in manumacture of mattresses, low-grade yarns, and pads for automobiles. Cottonseed-hull fiber or shavings are used in manufacturing certain knids of paper, such as blotting or glazed paper, Rayon or artificial-silk products, guncotton and other cellulose products, low-grade mattresses, and pads. Average value of linters is perhaps about twice that of fiber or shavings. Glarner & Co. v. S. Ry., 129 I. C. C. 75, 76.

(4o) "Last blocks": Last blocks are used in manufacture of shoe lasts and consist of maple logs sawed into triangular pieces of proper length, turned into rough shape in a lathe and placed in ovens to dry. They are loaded loose in car and are not susceptible to damage. Jackson v. M. C., 129 I. C. C. 235, 236.

(4p) "Lead, red": Red lead and litharge, oxides of lead, are scarlet and dark yellow powders produced from the film which forms when lead is heated to certain temperatures in con-

tact with air. Oklahoma Traffic Asso. v. St. L.-S. F. 129 I. C. C. 461, 462.

(4q) "Linters, cotton": Cotton linters are used for spinning purposes, as absorbents, and in manufacture of mattresses, low-grade yarns, and pads for automobiles. Cottonseed-hull fiber or havings are used in manufacturing certain kinds of paper, such as blotting or alazed paper, Rayon or artificial-silk products puncotton and other cellulose products, low-grade mattresses, and pads. Average value of linters is perhaps about twice that of fiber or shavings. Glarner & Co. v. S. Ry., 129 I. C. C. 75, 76.

(4r) "Litharge": Red lead and litharge, oxides of lead, are scarlet and dark yellow powders produced from the film which forms when lead is heated to certain temperatures in contact with air. Oklahoma Traffic Asso. v. St. L.-S. F. 129 I. C. C. 461, 462.

(4s) "Off-line industries": Are industries which can only be reached by the line-haul carrier through a switching service performed by some other railroad. Southern Kansas Millers Club v. A., T. & S. F., 129 I. C. C. 632.

(4t) "Plugs, paper-mill": Are used in paper mills to grind paper stock and consist of castings mounted on a steel shafting, weight of casting approximating 1,200 pounds, and that of the shafting 800 pounds. Outer, or grinding, surface of casting is corrugated. Bahr Bros. Mfg. Co. v. C., C., C. & St. L., 129 I. C. C. 289.

(4u) "Reasonable rate": A reasonable rate may be said to be somewhere between minimum charge that can be made for the service and permit carrier be borne by shipper. Otherwise stated, to live, and maximum charge that can there is a zone of reasonableness within which any rate is just and reasonable to the carrier as well as just, fair, and reasonable to the shipper that utilizes carrier's service. Calif. Growers' & Shippers' Protective League v. S. P., 129 I. C. C. 25, 33, 34.

(4v) "Separately established rates": Can not be construed as embracing switching charges. Romann & Bush Pig Iron & Coke Co. v. A., T. & S. F., 129 I. C. C. 509, 510.

(4w) "80-5-15 mixture" is a dry agricultural insecticide composed of 80 per cent sulphur, 5 per cent lead arsenate, and 15 per cent lime. It is combat scale insects and the plum curculio, a beetle injurious to fruit. General Sprayer Co. v. A., B. & A., 129 I. C. C. 318.
